HERZOG, JOHANN GEORG, an eminent German organ player, born Sept. 6, 1822, at Schmolz in Bavaria. He was educated at Altdorf in Bavaria, and his earlier career was passed in Munich, where in 1842 he became organist, in 1849 cantor, and in 1850 professor at the Conservatorium. In 1854 he removed to Erlangen, and became teacher in the University and Director of the Singakademie. His Präludienbuch and his Handbuch für Organisten are widely and deservedly known. His Organ School is a work of very great merit, and his Fantasias are fine and effective compositions. He retired in 1888, and has since lived in Munich.

HERZOGENBERG, HEINRICH VON (full name HEINRICH, BARON VON HERZOGENBERG-PECCADUC), born June 10, 1843, at Graz in Styria, studied at the Vienna Conservatorium in 1862-64, after which his time was divided between Graz and Vienna, until 1872, when he went to Leipzig. From 1875 to 1885 he was conductor of the Bach-verein in that town, and was subsequently appointed head of the department of theory and composition at the Hochschule at Berlin. In the spring of 1886 he succeeded Kiel as professor, and at the same time became head of an academical 'Meisterschule' for composition. In 1888 he retired, owing to his wife's ill-health, but resumed his labours after the death of his successor, Bargiel, in 1897. His works are for the most part remarkable for breadth, vigour, and originality. That they bear trace of the influence of Brahms is surely no reproach, nor is that influence so marked as to impeach their individuality of style. The list includes: 'Columbus,' a cantata, op. 11; 'Odesseus,' a symphony, op. 16; 'Deutsches Liederspiel,' for soli, chorus, and pianoforte; 'Der Stern des Liedes,' op. 55; 'Die Weihe der Nacht,' op. 56; 'Nannas Klage,' op. 59, two psalms, opp. 70 and 71, a requiem, op. 72; 'Totenfeier,' op. 80; 'Missa,' op. 81; 'Die Geburt Christi,' op. 90 and 'Die Passion,' op. 98—all important works; variations for two pianos, and a second set, op. 23, on a theme by Brahms; trio for piano and strings in C minor, op. 24; two trios for strings alone, op. 27; choral songs or volkslieder, opp. 26, 28, 35; Psalm cxvii. for chorus, op. 34; sonata for pianoforte and violin in A, op. 32 (the only work by which, through the agency of Joachim, the composer's name has yet become known in England); trio in D minor for pianoforte and strings, op. 86; a second violin sonata in Es, op. 64; a sonata for pianoforte and violoncello, op. 52; organ fantasias on chorailes, opp. 89 and 46; three string quartets, op. 45; symphony in C minor, op. 50; piano pieces and duets, opp. 25, 33, 37, 49, and 53; songs and vocal duets, opp. 29, 31, 38, 40, 41, 44, 45, 47, 48. Frau von Herzogenberg, née Elizabeth Stockhausen, was born in 1848, was an excellent pianist, and died at San Remo, Jan. 7, 1892. Herzogenberg himself died at Wiesbaden, Oct. 9, 1900. (Information from Dr. A. Durfl, etc.) 7.

HESDIN, PIERRE, a French composer of the earlier half of the 16th century, mentioned as a singer in the Chapel of Henry II., King of France. Two of his masses and a motet were copied into the large choir-books of the Sixtine Chapel under Pope Paul III. Other masses and motets appeared in the printed collections of the time. Two of Hesdin's chansons have been reprinted in modern score, one in Expert's reprint of Attaingnant, 1529, the other in Eitner's sixty chansons, 1899. It is only a pity that the texts of many of these melodious chansons are so utterly scandalous. In complete editions it may be necessary to reproduce everything as
it stands, but in making selections it might perhaps be better only to choose pieces with fairly unobjectionable texts. J. R. M.

HESLTINE, JAMES, a pupil of Dr. Blow, was in the early part of the 18th century organist of St. Katherine's Hospital, near the Tower. In 1711 he was elected organist of Durham Cathedral, retaining his London appointment. Heseltine composed many excellent anthems, etc., a few of which are still extant in the books of some of the cathedrals, but the major part were destroyed by their composer upon some difference between him and the Dean and Chapter of Durham. He died at Durham, June 20, 1763. A portrait of him is in the Music School, Oxford.

HESSE, WILLY, violinist, born in Mannheim, July 14, 1859. Studied first with his father, a professional violinist, pupil of Paganini. In 1885 visited America, where he resided with his family and continued his studies, receiving in 1888 an engagement to tour through the States with the Thomas orchestra. In 1872 left America for Holland, playing in various Dutch towns with his sister. The following year he moved to Heidelberg in Germany, making that town a point of departure for tours in various continental musical centres. In 1874 visited London for the first time, and in 1876 went to Berlin to study under Joachim, with whom he remained for two years, until his appointment as leader of the opera and Museum Concerts at Frankfort, where he also founded a string quartet and a trio with Kwart and Hugo Becker. In 1886 succeeded Professor Wirth as professor at the Rotterdam Conservatorium, and in 1888 took the place of Ludwig Strauss as leader of Sir Charles Hallé's orchestra in Manchester, where he remained for seven years. He then received an invitation to return once more to Germany, this time to Cologne, where he found a very musical position awaiting him, comprising the leadership of the Gürzenich Quartet, and conductorship of the Gürzenich orchestra. In 1903 he accepted the position vacated by Emile Sauvet as professor of the violin at the Royal Academy of Music, but in 1904 went to Boston to lead the Symphony Orchestra and a quartet. Mr. Hess is distinguished both as soloist and quartet leader, and, adding to the intellectuality of the German school, a certain impetuousity of style peculiar to himself, his range is remarkably wide, and he is not less at home in the romantic than in the classic school. He plays upon a violin by J. B. Guadagnini, one of the finest known of that maker.

HESSE, ADOLF FRIEDRICH, great organ player and composer, son of an organ-builder, born August 30, 1809, at Breslau. His masters in the pianoforte, composition, and the organ, were Berner and E. Köhler. His talent was sufficiently remarkable to induce the authorities of Breslau to grant him an allowance, which enabled him to visit Leipzig, Cassel, Hamburg, Berlin, and Weimar, in each of which he played his own and other compositions, and enjoyed the instruction and acquaintance of Hummel, Röck, and Spohr. In 1831 he obtained the post which he kept till his death, that of organist to the church of the Bernhardins, Breslau. In 1844 he opened the organ at S. Eustache in Paris, and astonished the Parisians by his pedal playing. In 1851 he was in London, and played on several of the organs in the Crystal Palace in Hyde Park — protesting much against the unequal temperament in some of them. But his home was Breslau, where he was visited by a constant stream of admirers from far and near up to his death, August 5, 1863. Hesse was director of the Symphony Concerts at Breslau, and left behind him a mass of compositions of all classes. But it is by his organ works that he will be remembered. His 'Practical Organist,' containing 32 pieces—amongst them the well-known variations on 'God save the King'—has been edited by Lincoln and published by Novello. A complete collection of his organ works was edited by Steggall and published by Boosey.

HEUBERGER, RICHARD FRANZ JOSEPH, born at Graz, June 18, 1850, was at first an engineer, but in 1876 devoted himself to music, becoming choirmaster of the Vienna Academische Gesangverein, and in 1878 conductor of the Singakademie in the same capital. In 1881 he gave up work as a conductor, and took up criticism, working on the Wiener Tageblatt, the Munich Allgemeine Zeitung, and the Neue Freie Presse, for which he wrote from 1896 to 1901. In 1902 he was a teacher in the Conservatorium, and in 1904 became editor of the Neue Musikalische Presse. He has written numerous vocal and orchestral works, some cantatas, etc.; and three operas, 'Abenteuer einer Neunjahrigenacht' (Leipzig, 1886), 'Manuel Benegas' (ib. 1889), 'Paladin' (Vienna, 1894), and 'Das Maister' (ib. 1901), as well as two ballets, 'Die Lantenschlägerin' (Prague, 1898) and 'Struwwelpeter' (Dresden, 1897), and four operettas, 'Der Opernball' (Vienna, 1899), 'Ihre Excellenz' (ib. 1899), 'Der Sechszehnzug' (1900), and 'Das Baby' (1902) (Riemann's Lexikon).

HEUGEL ET CIE, An important firm of French music-publishers, founded by Jacques Léopold Heugel (born at La Rochelle in 1815, died in Paris, Nov. 13, 1883). The house has a great reputation for the issue of educational works, such as the treatises or methods of Cherubini, Baillot, Mengoza, Crescentini, Cinti-Damoreau, Stamaty, Marmontel, Fauré, Dubois, and others. Besides these, numerous compositions by Delibes, Massenet, Reyer, Lalo, Charpentier, and others, are published by the firm. The famous musical periodical, Le Ménestrel, was started in 1834 by the founder, and is still
the property of the firm. Since 1883 the business has been under the control of Henri Heugel, son of the founder, with whom has been associated as a partner, his nephew, Paul Chevailler Heugel, since 1891.

**HEXACHORD.** In order to remove certain grave difficulties connected with the Tetrachords of the Greek tonal system, Guido Artiliis is said to have proposed, about the year 1294, a new arrangement, based upon a more convenient division of the scale into Hexachords—groups of six sounds, so disposed as to place a diatonic semitone between the third and fourth notes of each series, the remaining intervals being represented by tones. The sounds of which these Hexachords are composed are sung, by the rules of this system, to the syllables ut, re, mi, fa, sol, la, the semitone falling always between the syllables mi and fa. But, in addition to this syllabic distinction, the notes of each entire octave are provided with alphabetical names, exactly similar to those now in use—A, B, C, D, E, F, G; and, these names being immutable, it follows, that, as the Hexachords begin on different notes, and constantly overlap each other, the same syllable is not always found in conjunction with the same letter. At this point arises the only complication with which the system is burdened—a complication so slight that it is well worth the student’s while to master it, seeing that its bearing upon the treatment of the Ecclesiastical Modes, and the management of Real Fugue, is very important indeed.

The first, or Hard Hexachord (Hexachordon durum), begins on G, the first line in the bass: a note which is said to have been added, below the Greek scale, by Guido, who called it Γ (gamma), whence the word gamma-ut, or gamut—

```
F A B C D E
ut re mi fa sol la
```

The second, or Natural Hexachord (Hexachordon naturale), begins on C, the second space—

```
C D E F G A
ut re mi fa sol la
```

On comparing these two examples it will be seen that the note which, in the first Hexachord, was sung to the syllable fa, is here sung to ut. Hence, this note, in the collective gamut, is called C for ut. And the same system is followed with regard to all notes that occur in more than one Hexachord.

The third, or Soft Hexachord (Hexachordon molis), begins on F, the fourth line: and, in order to place the semitone between its third and fourth sounds, the note, B, must be made flat.

```
F G A B C D
ut re mi fa sol la
```

The note, sung, in the second Hexachord, to the syllable fa, is here sung to ut, and is therefore called F fa ut. The next note, G, is sung to sol, in the second Hexachord, re, in the third, and ut, in the next Hard Hexachord, beginning on the octave G; hence this note is called G sol re ut. And the same rule is followed with regard to all notes that appear in three different Hexachords. The note B, occurring only in the Soft Hexachord, is always called B fa. B2 is called B mi, from its place in the Hard Hexachord, where alone it is found.

The four remaining Hexachords—for there are seven in all—are mere recapitulations of the first three, in the higher octaves. The entire scheme, therefore, may be represented, thus—

```
<table>
<thead>
<tr>
<th>Hex.</th>
<th>The Gamut.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>E</td>
</tr>
<tr>
<td>2</td>
<td>F</td>
</tr>
<tr>
<td>3</td>
<td>G</td>
</tr>
<tr>
<td>4</td>
<td>A</td>
</tr>
<tr>
<td>5</td>
<td>B</td>
</tr>
<tr>
<td>6</td>
<td>C</td>
</tr>
<tr>
<td>7</td>
<td>D</td>
</tr>
</tbody>
</table>
```

The art of correctly adapting the syllables to the words is called Solmisation. So long as the compass of a single hexachord is not exceeded, its solmisation remains immutable. But, when a melody extends from one hexachord into the next, or next but one, the syllables proper to the new series are substituted—by a change called a Mutation—for those of the old one. In the following example, the bar shows the place at which the syllables of the hexachord of C are to be sung in place of those belonging to that of G; the syllables to be omitted being placed in brackets.

```
<table>
<thead>
<tr>
<th>Hexachord of C</th>
</tr>
</thead>
<tbody>
<tr>
<td>(sol)</td>
</tr>
<tr>
<td>re mi fa sol la</td>
</tr>
<tr>
<td>ut re mi fa (sol)</td>
</tr>
<tr>
<td>Hexachord of G</td>
</tr>
</tbody>
</table>
```

The Hexachord of C passes freely either into that of G, or F; but no direct communication between the two latter is possible, on account of the confusion which would arise between the B2 and B3. The mutation usually takes place at re, in ascending; and ut, in descending.

We have said that this subject exercises an important bearing upon the treatment of Real
Fugue, in the Ecclesiastical Modes. Without the aid of Solmisation, it would sometimes be impossible to demonstrate, in these modes, the fitting answer to a given subject; for, in order that the answer may be a strict one, it is necessary that its solmisation shall correspond, exactly, in one hexachord, with that of the subject, in another. Failing this characteristic, the passage degenerates into one of mere imitation. The answer, therefore, given at b, in the following example, to the subject at a, is, as Pietro Aron justly teaches, an answer in appearance only, and none at all in reality.

As an instance of the strict method of treatment, it would be difficult to find a more instructive example than the opening of Palestrina's 'Missae brevis,' in the Thirteenth Mode transposed, where the solmisation of the answer, in the hexachord of F, is identical with that of the subject in the natural hexachord.

Now, this answer, though the only true one possible, could never have been deduced by the laws of modern Tonal Fugue: for, since the subject begins on the second degree of the scale—by no means an unusual arrangement in the Thirteenth and Fourteenth Modes—the customary reference to the Tonic and Dominant would not only have failed to throw any light upon the question, but would even have tended to obscure it, by suggesting D as a not impossible response to the initial G.

It would be easy to multiply examples: but we trust enough has been said to prove that those who would rightly understand the magnificent real fugues of Palestrina and Anerio, will not waste the time they devote to the study of Guido's hexachords. To us, familiar with a clearer system, their machinery may seem unnecessarily cumbrous. We may wonder, that, with the octave within its reach, the great Benedictine should have gone so far out of the way, in his search for the means of passing from one group of sounds to another. But, we must remember that he was patiently groping, in the dark, for an as yet undiscovered truth. We look down upon his Hexachords from the perfection of the Octave. He looked up to them from the shortcomings of the Tetrachord. In order fully to appreciate the value of his contribution to musical science, we must try to imagine ourselves in his place. Whatever may be the defects of his system, it is immeasurably superior to any that preceded it: and, so long as the modes continued in general use, it fulfilled its purpose perfectly.

Heyther, or Hay. The name of a figure of a dance frequently mentioned by Elizabethan writers. Its derivation is unknown; the word may come from the French hatie, a hedge, the dancers standing in two rows being compared to hedges. Its first occurrence is Thoinot Arbeau's description of the passages at arms in the Bouffons, or Matassins, one of which is the Passage de la haye. This was only danced by four men, in imitation of a combat. Chappell (Popular Music, p. 629) remarks that 'dancing a reel is but one of the ways of dancing the hay. . . . In the "Dancing Master" the hey is one of the figures of most frequent occurrence. In one country-dance "the women stand still, the men going the hey between them." This is evidently winding in and out. In another, two men and one woman dance the hey,—like a reel. In a third, three men dance this hey, and three women at the same time,—like a double reel.' There is no special tune for the hey, but in Playford's Musicks Hand-maid (1678) the following air, entitled 'The Canaries or the Hay,' occurs:

[See Canaries.]
of the Chapel Royal. He was the intimate friend of Camden; they occupied the same house in Westminster, and when, in 1609, Camden was attacked by a pestilential disease, he retired to Heyther's house at Chislehurst to be cured, and there he died in 1623, having appointed Heyther his executor. When Camden founded the history lecture at Oxford in 1622, he made his friend Heyther the bearer to the University of the deed of endowment. The University on that occasion complimented Heyther by creating him Doctor of Music, May 18, 1622. [It is fairly certain that Gibbons's anthem, 'O clap your hands,' served for Heyther's exercise. [See GIBBONS, ORLANDO.] In 1626-27 Heyther founded the music lecture at Oxford, and endowed it with £17:6:8 per annum. The deed bears date Feb. 2, of 2 Charles I. Richard Nicholson, Mus. Bac., organist of Magdalen College, was the first professor. Dr. Heyther died in July 1627, and was buried August 1, in the south aisle of the choir of Westminster Abbey. He gave £100 to St. Margaret's Hospital in Tot Hill Fields, commonly known as the Green Coat School. There is a portrait of him in his doctor's robes in the Music School, Oxford, which is engraved by Hawkins (chap. 120). W. H. H. HIAWATHA. Scenes from Longfellow's 'Song of Hiawatha' set to music for soprano, tenor, and baritone solos, chorus and orchestra, by S. Coleridge Taylor, op. 30. The first section, 'Hiawatha's Wedding Feast,' was first performed at a students' concert at the Royal College of Music, Nov. 11, 1898; the second, 'The Death of Minnehaha,' at the North Staffordshire Musical Festival (Hanley), Oct. 26, 1899; and the third, 'Hiawatha's Departure,' by the Royal Choral Society at the Albert Hall, March 22, 1900, on which occasion the whole trilogy was given for the first time. S. G.

HIBERNIAN CATCH CLUB. The oldest existing musical society in Europe. Founded by the Vicas Choral of St. Patrick's and Christ Church Cathedrals, Dublin, in the winter season of 1679-80, for the cultivation of catches and vocal music. In 1698 the place of assembly was in Francis Street, and a visitor (Henry Ecles) in 1730 describes the Hibernian Catch Club as then of fifty years' standing (Letter to the Earl of Burlington). The existing records go back to 1740, and a volume of their favourite catches was published in 1741. On the occasion of Earl Hardwicke's visit to the club on May 4, 1803, Stevenson received the honour of knighthood. From the second decade of the 19th century the club met 'every second Tuesday in the month during the season,' at Morrison's Hotel—the President for the year being selected from the members in rotation. Ever since the year 1844 the club has its habitat at the Antient Concert Rooms, and is still (1905) in a flourishing condition, meeting on the second Tuesday in every month from December to May, at 7.15 p.m. The late Duke of Cambridge was elected an honorary member in 1847, and the Duke of Connaught in 1877. W. H. G. F.

HICKFORD'S ROOM, if not the first, was one of the first regular public concert-rooms in London. After the death of THOMAS BRITTON and consequent discontinuance of the musical gatherings in the long room over his shop in Clerkenwell, the only room previous to Hickford's where music could be heard seems to have been the music room at Clayton's House in York Buildings (see CLAYTON).

Of Hickford himself very little is known. He appears to have been a dancing-master during the latter part of Queen Anne's reign and in the early Georgian days, for the first advertisements of concerts held in his room mention it as 'Mr. Hickford's Dancing School,' or 'Mr. Hickford's Great Dancing Room.' Later it was called simply 'Mr. Hickford's Great Room' or 'Hickford's Room.' It was originally in James Street, Haymarket, opposite the Royal Tennis Court (the building of which is still standing), and its probable site is now occupied by the Comedy Theatre. It must have been a room of very considerable size to begin with, and was perhaps enlarged, since, two or three years after it was opened, we hear of an entrance from Panton Street; and in 1719, on the occasion of a concert for the benefit of Mr. Dahuron, the Flautist, it is stated that 'Coaches and Chairs may come into this Room by St. Margaret's Passage...' The first concert in this room took place on April 4, 1713, for the benefit of Signor Claudio Rieri, followed by one on April 17 'by subscription for Signor Nicolino Haym.' The only other concert of that year took place on May 20, for the celebrated 'Baroness' and Mrs. Paulina. Hickford's Room became very quickly a favourite place of entertainment with audiences and performers, and with good reason. For the former, it was situated in a fashionable part of the town, close to the leading theatres, in a most convenient locality much frequented by the 'quality'; for the latter, it was probably cheaper and less trouble to arrange for a concert there than at the Opera House or one of the City Companies' Halls, where some concerts were given. It must have had considerable advantages; for most of the great performers, both vocal and instrumental, who visited England, gave their concerts there, and those who resided in London held their benefits there year after year. In 1714 there are records of six concerts in the room. On Feb. 1 'an extraordinary Consort of Vocal and Instrumental music by the best Masters of the Opera,' for the benefit of Mr. Rogier. The Baroness held her benefit on March 17, when the 'famous Signor Veracini' performed several Sonatas, and the great Violinist had a benefit of his own on April 22, the Concert consisting entirely of his own
compositions, both vocal and instrumental, and 'several solos on the Violin never played before.' Signora Stradiotti, a player on the harpsichord, 'who has never yet performed since her arrival in England,' gave a concert on April 29. Signor Pardini had a benefit on May 20; and the Daily Courant of May 18 gives notice that the concert for the benefit of Mr. Matthew Dubourg, which was to have been at Mr. Hickford's school, is deferred to May 27. Dubourg was then eleven years old, and though he is reported to have played in public at the age of eight, he was evidently, in 1714 and long after, considered an extraordinary youthful prodigy; for in the advertisements of his annual benefits which for some years invariably took place at Hickford's Room his age is always mentioned.

The development of chamber music, and consequent increase in the number of concerts, was doubtless due very largely to the influence of Handel, lately come to England with George I. When Handel began his work of improving the opera, and procured celebrated performers for England, many of these, in addition to their engagements at the opera, took the opportunity of giving one or two concerts for their own benefit. The patrons of the opera could hardly refuse to attend a concert given by some favourite artist of the day, and Mr. Hickford's great dancing-room soon became one of the fashionable resorts of the town. In 1715 nine or ten concerts were given by and for various more or less well-known people. But the first concert of that year is thus advertised in the Daily Courant of March 21:—'By desire of several Ladies of Quality. For the benefit of Mrs. Smith. At the Great Room in James Street near the Haymarket, on Wednesday next, being the 23rd of March will be performed a compleat Consort of Musick by the best Masters of the Opera.' Mrs. Smith, or Betty Smith as she was sometimes called, was wigmaker to the opera for many years, and this was not the only occasion on which the 'Ladies of Quality' desired and obtained for her a benefit at Hickford's Room.

On March 31 Valentini, though not singing at the opera, appears to have been in England, held a benefit concert, at which he was assisted by the gifted and fascinating Anastasia Robinson. The Baroness was a very faithful patroness of Hickford's Room for many years. At her benefit concerts she almost always managed to introduce some new and attractive instrumentalist, or some new compositions. In this year she announces 'a Consort of Musick entirely new. Particularly several solos on the violin by Mr. Alexander Bitti, newly arrived from Italy.' Only two other concerts of 1715 call for any particular notice. Mr. Dubourg, mentioned as 'the youth of 12,' held his annual benefit, playing several solos, and a concert was given 'for the benefit of a lady under misfortune.' This would seem to mark the beginning of charity concerts, for it is the first announcement of its kind. The first concert of 1716 was a benefit for the violinist Castrucci, and may possibly have been his first appearance in England, for he is announced as being 'lately come from Italy.' It is in the advertisements of this concert that mention is first made of an entrance from Panton Street into the room. Besides being appointed leader at the opera, Castrucci quickly obtained many concert engagements, and after his first appearance at Hickford's Room he played at most of the best concerts there for some years. On March 15 he performed the instrumental music at Signora Isabella Aubert's concert, and again on March 21, for the benefit of the Baroness, who on that occasion introduced several songs out of the opera 'Pyrrhus and Demetrius'—'to be sung in Italian and English.' On April 12 there was a ball and masquerade by Mr. Dumirail, together with 'several entertainments of dancing performed by Mr. Dumirail and his son, who is lately come from Paris, and others. This being the last time of their appearing in Publick before their return to Paris.' 'A compleat Consort of Vocal and Instrumental Musick by the best Masters of the Opera' was announced for the benefit of Signor Giorgio Giacomo Berwillibald, 'Servant to His Serene Highness the Margrave of Brandenburg Anspach, Brother to Her Royal Highness the Princess of Wales.' This concert, originally intended for May 21, was put off two or three times on account of the opera, and was finally given on June 9. Up to this period it was usual for the concert season to terminate at the end of May or in the middle of June, but in 1716 two entertainments at Hickford's Room were given in December, one on the 13th, another on the 29th. In 1717 the first concert recorded was for the benefit of Castrucci on March 13; and at another, on the 40th, for the benefit of Signor Botelli, 'lately arrived from Italy' the celebrated Nicolini Grimaldi (see Nicolini) is announced to sing; possibly one of his last performances in England. Dubourg and the Baroness held their annual benefits as usual in the Great Dancing-Room, as did Signor Pietro, a player on the bass-viol and German flute. These, with three or four less important concerts, complete the tale for that year. Few concerts are recorded in 1718, except the usual annual benefits of the regular performers—Dubourg, Castrucci, etc., and the only apparent novelties were those introduced at her concert by Mlle. Corail, in the form of 'several new songs by the famous Domenico Scarlatti, never before performed in this Kingdom.' The concerts of 1719 seem to have been mostly given by various members of the opera band, including the famous hautboy player Kyte, whose name figures at several concerts, and who, at his own
benefit played 'several new solos and Concertos on the Hautboy and Little Flute': it is further stated that the 'Vocal and Instrumental Musick will be by the Best Hands from the Opera.' The Daily Courant of May 1 advertises 'The Benefit of Signor Francesco Scarlatti. The greatest part of his own composition, being brother to the famous Alessandro Scarlatti.'

During the next ten years few concerts calling for special remark are recorded as having taken place at Hickford's Room. Among the most noticeable may be mentioned one announced for March 20, 1724, for the benefit of Signor Scarlatti, 'in which will be a Pastoral Cantata for two voices, accompanied by all sorts of instruments, composed by himself on this occasion.' The concert-giver is most likely to have been Domenico Scarlatti, who is known to have visited England, and who was a great friend of Handel. In December of the same year we hear of an entertainment of dancing by a French company, who performed 'the curious Sword Dance as it is danced in Italy, Spain, France, and Germany, which never was danced in England before.' Signor Bigonzi, the contralto, also gave a concert at Hickford's Room, as did other less noticeable singers and instrumentalists who visited England during that period, and Dubourg, Kytch, and various members of the opera band gave concerts of their own, and played at others for the benefit of their friends. Castrucci's name occurs frequently, and he always held his annual benefits at Hickford's. For these he generally advertises some novelty, sometimes concertos and solos 'by his master Corelli,' sometimes pieces in which he can show off his power of playing tricks on his instrument, such as 'a particular Concert with an Echo,' and 'a new composition called the Feasts of the Piazza di Spagna, in which Mr. Castrucci will make you hear Two Trumpets on the Violin.' During the year 1724, and always afterwards, the room was called 'Hickford's Great Room in Panton Street,' to which street the main entrance appears to have been transferred, though at certain concerts people are requested to let their chairs wait in James Street near the old entrance which was still used as an extra exit. Early in January 1729 Granon the composer began a series of subscription concerts to take place on Saturday evenings, but no details of the performances are recorded. It would appear, however, that the weekly concert began at about this period to be a recognised form of entertainment with people of fashion, and in December 1731 Geminiani advertised a series of concerts, twenty in number, beginning on Thursday December 9, and to be continued on every succeeding Thursday till the number was completed. The subscription was four guineas, and for that amount each subscriber had a silver ticket. These tickets were non-transferable, for it is emphatically stated that 'no other Lady or Gentleman will be admitted in the absence of the subscriber, and each lady that subscribes may take another Lady with her, paying a Crown at the door, but no Gentleman will be admitted without a Ticket.' The concerts were carried on for some years; Geminiani himself performed at them, together with other instrumentalists, and he engaged popular singers of the day, such as Mrs. Young and Mr. Hull. In addition to the Geminiani concerts many others were given at Hickford's Room during the next few years, some by old habitués, some by artists who came to London for one season and were not heard of again. In 1738 there are no concerts recorded in connection with Hickford at the Panton Street room, his name does not appear at all, nor are the entertainments such as he was generally associated with; but on Feb. 9, 1739, appeared an advertisement of a concert for the benefit of Mr. Valentine Snow (see Snow) to be given 'at Mr. Hickford's new Great Room in Brewer Street near Golden Square.' Of Hickford's reasons for removing from Panton Street nothing is known. The new room had the advantage of being in a fashionable part of town, for both Golden Square and Brewer Street were at that time inhabited by persons of position. The room itself is still in existence, and is built out at the back of one of the fine old Georgian houses yet remaining in Brewer Street, in which Hickford lived. It is a room of good proportions, 50 feet long by 30 broad, lofty, and with a coved ceiling. It is lighted by one large window at the southern end, in front of which is the platform, small and rather low, and there is a gallery opposite, over the door. It appears to be in much the same state now as in Hickford's time, and bears but few marks of alteration, except that the walls, cornices, and beautiful carved moldings have been covered with paint and whitewash to their great disfigurement. At the present time the house belongs to a private club, and concerts are still given by the members in the room, which possesses good acoustic qualities, and was evidently designed and built for a music-room. It originally had a back door into Windmill Street, where, as formerly in James Street, ladies and gentlemen were desired to order their chairs to wait, but no trace of this old exit remains, and buildings of a later date now crowd closely against the back of the old house. The concerts in the new room were on a larger scale than those in the old one, and in addition to the ordinary concerts of 'Vocal and Instrumental musick' for the benefit of various soloists, oratorios, anthems, and other compositions of a like nature were given, and frequently formed the programme of some of the subscription concerts that were carried on with greater success than ever. John Christoph\ier Smith's musical drama
‘Rosalinda,’ and his oratorio ‘The Lament of David over Saul and Jonathan,’ were both performed for the first time at Hickford’s Room during the season of 1740, and were repeated three or four times at the particular desire of several persons of Quality. Two new anthems by Handel, ‘O sing unto the Lord,’ and ‘My song shall be always,’ were performed in Holy week of that year, also for the first time. Among the singers were Geminiani’s brilliant pupil Mrs. Arne and John Beard the famous tenor (see Beard). During 1741 Andriani and the celebrated violoncellist Caporale appeared several times at the subscription concerts now held every Friday, and one of the chief novelties of that season was Hasse’s ‘Salve Regina,’ much advertised beforehand, and performed three times.

One of the most noticeable concerts of the later days of Hickford’s Room was that given by Mozart and his sister on May 13, 1765. It was announced some weeks beforehand, and the following advertisement appeared in the Public Advertiser on the day of performance:

‘For the benefit of Miss Mozart of thirteen and Master Mozart of eight years of age; Prodigies of Nature. Hickford’s Great Room in Brewer Street. This day May 13 will be a Concert of Vocal and Instrumental Music. With all the Overtures of this little Boy’s own composition. The vocal part by Sig. Cremonini, Concerto on the Violin Mr. Barthelomon, Solo on the Violoncello by Sig. Cirili. Concertos on the Harpsichord by the little Composer and his sister, each single and both together, etc. Tickets at 5s. each to be had of Mr. Mozart at Mr. Williamson’s in Thrift Street, Soho.’ This was the last public concert given by the Mozarts before they left England. During the next ten years Hickford’s Room continued to be used for a variety of good concerts, some being directed by Bach and Abel; and for several seasons Mr. Hay carried on a series of subscription concerts on Monday evenings. After 1775, however, most of the important concerts were given in the new rooms in Hanover Square, and Hickford’s Room fell gradually into disuse. The last concert with which his name is connected took place in 1779.

HIDDEN FIFTHS AND OCTAVES (Lat. Quintae coeportae, seu abscenditos; Germ. Verdeckte Quinten). Hidden Fifths, or Octaves, are held to be produced, whenever two parts proceed, in similar motion, towards a single Fifth, or Octave, to which one of them at least progresses by a leap, as in the following example—

\[
\begin{align*}
&\text{Progressions such as these are prohibited, because, were the leaps filled up by the intervals of the Diatonic Scale, the hidden ‘consecutives’ [see Consecutive] would at once be converted into real ones, thus—}
\end{align*}
\]

\[
\begin{align*}
&\text{It may be urged, that, as the leaps are not intended to be filled up, the forbidden sequence is not formed, and there remains, therefore, nothing to be condemned.}
\end{align*}
\]

The answer to this objection is twofold. In the first place, the impression left on the ear by Hidden Fifths or Octaves is sometimes almost as strongly marked as that produced by real ones; the ear itself possessing the faculty of filling up the leaps, in imagination, when tempted to do so by the nature of the progression submitted to it. Secondly, in unaccompanied vocal music—to which the prohibition most particularly refers—the least tendency on the part of an incautious singer to bridge over the leap by means of a portamento would instantly produce the effect indicated in the above example.

Nevertheless, the law against Hidden Fifths and Octaves is not an inelastic one. It is true, that, in two-part counterpoint, they are sternly condemned as the most glaring sequence of real Fifths. Even in three parts their presence is scarcely tolerated. But, in four or more parts, they are only to be reprehended under certain conditions. For instance, between the extreme parts, they should only be used as a means of escape from some serious difficulty. Between one extreme and one mean part they are considered less objectionable. Between two mean parts there is little to be said against them; and, when one of the parts concerned in their formation moves a semitone, they are freely permitted, even between treble and bass. Bearing these rules in mind, the student can scarcely go very far wrong; and, should he find any difficulty in detecting the faulty progressions, it may be removed by a reference to the old law, which enacts that ‘A Perfect Concord may not be approached in similar motion.’

The great masters of the 16th century were far more lenient towards Hidden Fifths and Octaves than many modern theorists. In the works of Palestrina and his contemporaries, examples, even between extreme parts, may be found on almost every page.1 These composers also delighted in hiding Fifths and Octaves in another and a singularly beautiful way. It is of course understood that such progressions are only forbidden when they occur between the same two parts. When formed between different voices, by means of crossing the parts, they are perfectly lawful; as in the following combinations from Palestrina’s ‘Missa Papae Marcelli’ and ‘Missa Brevis’—

1 In the beginning of Palestrina’s motet ‘Pretre e poi’ there is indeed an instance of Hidden Fifth, in two parts; but this case is so extraordinary that the writer cannot remember ever having met with a parallel one.
The effect of such passages as these, when sung without accompaniment, is perfectly pure and beautiful; but when arranged for keyed instruments, where the motion of the parts cannot be distinguished, they become simply intolerable. In this form they degenerate into sequences of the most vulgar character; but this is not the form in which Palestrina intended them to be heard. W. S. R.

The above article is written from the point of view adopted by earlier theorists, whose experience of such progressions was limited chiefly to their employment in pure unaccompanied vocal music of an essentially contrapuntal character. The development of music upon a harmonic basis has, of course, greatly influenced the human mind in its attitude to listening to music, with the result that all laws of harmonic progression which have been handed down from previous times, and which are explained in their relationship to the special nature and condition of the Art of those times, and derive their authority from its special requirements, must, before their authority can be admitted in connection with the latest developments of the Art, be justified by modern practice, or must submit to be modified by the light of modern experience. In no rules of harmonic progression do such considerations apply with greater force than those which refer to the employment of hidden octaves and fifths. Viewed from the modern standpoint, the term 'hidden,' itself, as applied to perfect octaves or perfect fifths approached in similar motion, seems a misnomer. The idea that the listener unconsciously fills up the gaps in the parts which proceed by similar motion to a perfect octave, or a perfect fifth, and so create forbidden consecutives, which do not exist in the music itself, can only be regarded as an interesting tradition of the past, which, in the present day, no intelligent musician can pretend to believe. When so-called hidden octaves or fifths do produce an objectionable musical effect, it is obviously due to the fact that the octave or the fifth which is present is itself thrown into undue prominence, and what is unsatisfactory in the progression is the result of the exceptional 'exposure' of the perfect interval which is present, and not to a faulty progression which is supposed to exist in the imagination of the listener. This fact is now admitted by the more progressive amongst musical theorists, and in modern text-books the traditional and misleading term 'hidden' is being gradually displaced by the more accurate one 'exposed,' the universal adoption of which is certainly desirable in the interests of all students and teachers of Harmony.

With reference to the employment of what in future will be referred to as 'exposed octaves' and 'exposed fifths,' not only do the rules given in different text-books to regulate their employment reveal wide differences of opinion upon this subject amongst theorists themselves, but these rules are quite out of touch with the established practice of composers. In connection with the different views held by theorists representing different schools of thought, it is worthy of passing notice that some of the most eminent continental theorists impose restrictions upon the employment of octaves and fifths so formed, either between two inner parts, or between one inner and one outside part, which are not recognised by English theorists. Both Tchaikovsky in his Guide to the Practical Study of Harmony (Leipzig, 1900), and Jadassohn in his Manual of Harmony (1890), forbid the employment of many such octaves and fifths, and that in portions of their text-books, which obviously are not merely for the guidance of beginners, but for the fairly advanced student. When such restrictions and prohibitions extend so far as to describe as bad, and forbid the employment of the progression shown below, it is doubtful whether such rules are not merely devoid of all musical authority, but whether they possess any value even for the purposes of mental discipline; whether, in fact, they do not tend to make the introduction of any kind of spontaneous musical thought into the work of the student absolutely impossible.

The following example indicates some of the differences of opinion upon this subject which prevail amongst leading modern theorists. All the progressions illustrated are familiar ones, and some are even commonplace; yet so much are the accepted rules out of touch with the practice of composers that upon no single progression are these theorists all agreed, nor is there one progression which all of them allow to be employed:—

**Hidden Fifths**
Having glanced at the attitude of modern theorists towards exposed octaves and fifths we will now briefly consider their employment in musical composition, from the point of view adopted by English theorists, that is, when they are formed between the outside parts. The examination of many examples of exposed octaves and exposed fifths, approached in various ways, seems to suggest that the effect of such progressions varies (and is more or less satisfactory) according to the extent to which the particular effect of the exposed interval dominates the effect of the second chord of the progression. When the nature of the individual chords forming the progression, their harmonic relationship, the number of parts employed, or their general progression, is such as to neutralise the effect of the exposed interval, no unsatisfactory effect is produced.

By the nature of the individual chords is meant whether either or both of the chords be a discord, or whether both are concords. When the second chord is a discord, to whatever extent an exposed interval may be thrown into prominence, the effect of this exposure is almost invariably neutralised by the dissonant character of the chord, as shown below:

**Elvey.** Anthem. **Gounod.** Motet.

Although few theorists have yet admitted the fact, yet the works of modern composers prove that other rules of harmonic progression, besides those referring to exposed intervals, lose much of their musical authority (at least so far as the universal application of them is concerned), when either or both of the chords forming the progression are discords.

With reference to exposed intervals formed between triads and their inversions, the presence of some form of harmonic connection between the two chords helps to mitigate the effect of an exposed interval. In connection with triads and their inversions whose roots are a fourth or a fifth apart, and which, therefore, have one note in common, when one of the parts moves by step, the other part leaping, the effect is rarely unsatisfactory. When both parts leap, especially when the leaps are made in a downward direction, neither part leaping more than a fifth, the effect may be excellent. The following illustrate exposed intervals so formed:

**Lasso.** Madrigal.

Exposed intervals formed in connection with triads and their inversions whose roots are a third (or a sixth) apart, vary very much according to the nature of the progression itself. The strength of such progressions depends largely upon the respective degrees of the scale upon which such triads are formed, some such progressions being strong and bold, while others are weak and unsatisfactory. That two triads, so related, have two notes in common, implies the presence of a strong and direct harmonic connection between them, which naturally tends to neutralise the effect of the exposed interval. In the majority of instances such exposed intervals are more satisfactory when approached from above than when approached from below. The following progression is by no means an unfamiliar one:

**Tulor.** Chant.

Exposed intervals formed in connection with triads and their inversions whose roots are adjacent, and therefore which have no direct harmonic connection, vary considerably in musical effect, both according to the degrees of the scale upon which such triads are formed, and also partly as to whether either chord is in an inverted form. When one of the chords is in an inverted form, and the highest part moves by step, while the lower part leaps either a fourth or a fifth, the effect is almost invariably good:

**Sullivan.** 'Te Deum.' **Garrett.** 'Te Deum.'

An exposed octave formed between two such triads, the second being in its second inversion, is also unobjectionable when one part moves by step and the other leaps a fourth:

**Gounod.** Motet.
The following illustration shows an exposed octave formed between two such triads in their original position, the lower part moving a second, and the higher one a fourth—

Mendelssohn. *St. Paul.*

In connection with the last four examples, the strong and characteristic movement of the two parts, by a second and by a fourth or fifth, exerts considerable influence in the direction of strengthening the effect of the progressions.

An exposed fifth formed between two triads having adjacent roots, the first triad being in an inverted form, and the bass falling a second, as shown below, is perfectly satisfactory—

Brahms. *Requiem.*

With reference to the number of parts employed in the formation of the progression, in all matters of harmonic progression the 'fulness' of the chords employed, which is produced by the doubling or duplication of the several notes of the chord in different octaves (especially when the doubling results in harmony of more than four parts) exerts a large influence upon the musical effect of the progression, and one which has hardly been sufficiently recognised by those who have framed the rules of harmonic progression. In connection with exposed intervals the number of parts which make up the progression is a most important factor in determining the ultimate musical effect. A comparison of the different musical effect of the same progression heard first in few parts and then in a large number of parts, proves that progressions which are unsatisfactory in two or even three parts, may be quite good in four or five parts. When the two chords forming the progression have one or more notes in common it is obvious that an increase in the number of parts means the strengthening of the direct harmonic connection between the chords by the doubling of the common notes, as shown in the following example—

Wagner. *Die Meistersinger.*

When the chords have no such connection, as the number of parts increase, the attention of the listener is distributed over the movement of a greater number, and the progression of any two parts (even when they are outside parts) must in some corresponding proportion become less noticeable.

In any general consideration of exposed intervals viewed from a modern standpoint, it is hardly incorrect to say that, in harmony of not less than four parts, there are very few progressions which, while satisfactory from every other point of view, are made really objectionable by the presence of an exposed octave or fifth.

**Highland Fling.** A step in dancing, peculiar to the Scotch Highlanders. The name is commonly transferred to the dance itself. The term 'fling' expresses the kicking gesture which characterises it. When a horse kicks by merely raising one leg and striking with it, he is said, in grooms' parlance, 'to fling like a cow.' The performer dances on each leg alternately, and flings the other leg in front and behind. The Highland Fling, in which three, four, or more persons may take part, is danced to the music of the Strathspey. The following is a specimen:—

Marquis of Huntly's Highland Fling. *Allegro.*

HIGH MASS (Lat. *Missa Solemnis*; Fr. *Grand-Messe*; Germ. *Grosse Messe*). Mass, sung throughout, with full ceremonial, the Priest being assisted by Deacon and Subdeacon, Master of Ceremonies, Thurifer, and two Acolytes. A Mass, sung with equally solemn music, but without the assistance of a Deacon and Subdeacon, and without the use of Incense, is called a *Missa cantata,* or Sung Mass.

Low Mass is said by the Priest, without music, and with the assistance of one Server only. [See Mass.]

Hildebrand, Zacharie (1680-1743), and his son Johann Gottfried, were eminent organ-builders in Germany. The latter, who was the principal workman of the Dresden Silbermann, built the noble organ of St. Michael's, Hamburg, in 1762, which cost more than £4000. V. De F. Hiles, Henry, born Dec. 31, 1826, at Shrewsbury, received instruction from his brother John; he was organist successively at Shrews-
bury, as his brother's deputy; at Bury in 1846; at Bishopwearmouth in 1847; St. Michael's, Wood Street, in 1859; at the Blind Asylum, Manchester, in Aug. 1859; at Bowdon in 1861; at St. Paul's, Manchester, 1863-67. In 1852-59 he travelled round the world on account of ill-health. He received the degrees of Mus.B. Oxon., 1892, and Mus.D. 1897. In the latter year he resigned his post of organist; in 1876 he became lecturer on harmony and composition at Owens College, and in 1879 at the Victoria University; he was one of the promoters of the National Society of Professional Musicians (see p. 464). He was conductor of several musical societies in Lancashire and Yorkshire, and was editor and proprietor of the Quarterly Musical Review, a modern namesake of the well-known magazine of that name, which lasted from 1885 to 1888. In 1893 he was appointed Professor at the Manchester College of Music. He retired to Pinner, near Harrow, in 1904, and died at Wortingh on Oct. 20 of that year. His compositions include 'David,' oratorio, 1860; 'The Patriarchs,' oratorio, 1872; 'War in the Household,' operetta, 1836, from the German of Castelli ('Häusliche Krieg'), originally composed by Schubert; 'Harold,' overture, composed 1893; 'Watchfulness,' 'FaYe Pastorel,' and 'The Crusaders,' cantatas; settings of Psalms xlviii. and xcviii.; several anthems, services, and part-songs (his glee, 'Hushed in Death,' is very popular; it obtained the prize offered by the Manchester Gentlemen's Glee Club, 1878); 'Installation Ode,' Victoria University, 1892, and other choral works. Prelude and Fugue in A; Do. in D minor, a Sonata in G minor, six Impromptus, two Sets, 'Festival March,' 'Youth,' a concert-overture, etc. for organ; pianoforte pieces and songs. He has written books on music, Grammar of Music, two vols., Forsyth Bros. 1879; Harmony of Sounds, three editions, 1871, 1872, 1879; First Lessons in Singing, Hine & Addison, Manchester, 1881; Part Writing or Modern Counterpoint, Novello, 1884. Harmony or Counterpoint? 1889; Harmony, Choral or Contrapuntal, 1894. (A biographical sketch appeared in the Musical Times for July 1900.)

His elder brother, John, born 1810, at Shrewsbury, was also an organist at Shrewsbury, Portsmouth, Brighton, and London. He wrote pianoforte pieces, songs, and musical works, A Catechism for the Pianoforte Student, Catechism for the Organ (1878), Catechism for Harmony and Thorough Bass, Catechism for Part Singing, Dictionary of 12,500 Musical Terms (1871), etc. He died in London, Feb. 4, 1882. A. C.

HILL, Henry, a distinguished English viola player, a son of Henry Lockey Hill, the violin-maker, was born in London, July 2, 1808, and died on June 11, 1856, in the same city. His early life as a musician was eventful, and the success that he achieved in after life was not due to any particular training he received, but to his own inherent ability. He became the leading viola player of his time at the Opera, the provincial Festivals, and the principal oratorio concerts, and he especially made a name for himself as a player of chamber music. He was a cultured musician and a man of scholarly attainments. He was a member of the Queen's Private Band, of Elia's Musical Union, and the Queen's Square Select Society, playing at most of their concerts; and in association with Mr. Alsager he was one of the founders of the Beethoven Quartet Society, for the analytical programmes of which he was responsible. He made the acquaintance of Berlioz, and he played the solo part in 'Harold en Italie' on the occasion of its first performance in London, Feb. 7, 1848. Berlioz, in his Soirées de l'Orcheste, speaks of Hill and his incomparable instrument, which it is interesting to add was made by the English maker, Barak Norman. An admirable lithograph portrait of Henry Hill was drawn by Baugniet, a well-known draughtsman of the time.

A. F. H.

HILL, Joseph, a London violin and other instrument maker, who was born in 1715 and died in 1784. He worked at 'Ye Harp and Hautboy' in Piccadilly, then in High Holborn; afterwards at the 'Violin' in Angel Court, Westminster, and finally at the Harp and Flute in the Haymarket in 1762. From this address he issued some volumes of music, being sets of lessons for the harpsichord by different authors. He was ancestor to a line of fiddle-makers, the descendants of whom are Messrs. W. E. Hill & Sons, of New Bond Street. [Information from Mr. Arthur F. Hill.]

F. K.

Hill, Thomas Henry Weist, born in London, Jan. 23, 1828; was taught violin-playing by Sainton at the Royal Academy of Music, and in 1845 was elected King's Scholar. He first appeared at an Academy Concert in 1847, in Spohr's 9th Concerto, and subsequently went to America, where he introduced Mendelssohn's Violin Concerto. He afterwards undertook a professional tour in Europe, and in 1849 became a member of Costa's band at the Royal Italian Opera and elsewhere. In 1871 he followed his old conductor to Drury Lane, where he filled the post of Director of the Ballet Music, and then to Her Majesty's till 1879. In 1873, and in 1875-76, he was conductor at the Alexandra Palace, and displayed great energy in that department, giving performances of Handel's 'Esther' and 'Susanna,' Gade's 'Spring Fantasia,' Berlioz's 'Danse des Sylphes,' compositions of Saint-SAëNS, etc. Mr. Hill introduced to the British public the works of Bizet and Massenet, the former by his 'Patrie' Overture, the 'Arlesienne' Suite, and Ballet music, 'Fair Maid of Perth'; the latter by his 'Scénes pittoresques.' In 1877 and 1878 he conducted a short season of English opera at Her
HILL, W. E., & SON are organ-builders in London. The house was founded by John Snetzler about 1755, who was succeeded in 1780 by his foreman, Ohrmann. [SNETZLER.] The latter had a partner, W. Nutt, in 1790, who was afterwards joined by Thomas Elliott about 1803. After Elliott had done business for some time alone, he took as partner, in 1825, William Hill, a Lincolnshire man, who had married his daughter, and died in 1832, Hill remaining alone until 1837, when he was joined by Frederic Davison. After 1838 Davison left to become a partner of John Gray, and the firm became W. Hill & Son. [GRAY & DAVISON.] Hill died Dec. 18, 1870. He deserves the gratitude of English organists for having, in conjunction with Gauntlett, introduced the CO compass into this country.

Elliott & Hill built the present organ in York Minster, since which the Hills have built, amongst many others, the organs of Ely, Worcester, and Manchester Cathedrals; Birmingham Town Hall; St. Peter's, Cornhill; and All Saints', Margaret Street, London; Melbourne Town Hall, etc. Mr. Arthur George Hill, one of the partners in the firm, is the author of a valuable book on Organ-cases and Organs of the Middle Ages and Renaissance, etc., 1853.

HILL, W. E., & SONS; a London firm of violin makers, dealers and repairers, carrying on business at 140 New Bond Street, and holding in the musical world a position of recognised authority on all matters relating to the violin. Most of the famous instruments by Stradivari and other makers have passed from time to time through their hands. The firm, which consists at the present time of four brothers, Arthur Frederick

Alfred Ebsworth, William Henry, and Walter Edgar Hill, and which is connected traditionally with the 'Mr. Hill, the instrument maker' mentioned in Pepys's Diary (1660), was founded by Joseph Hill (1715-84, see above), who was apprenticed to Peter Wansley, and afterwards carried on business at the sign of the 'Violin' in Holborn in 1782, and later at the sign of the 'Harp and Flute' in the Haymarket. He turned out, in his time, many good instruments, and his violoncellos are to this day in good repute both here and on the continent. His five sons, William, Joseph, Lockey, Benjamin, and John, were all violin-makers and musicians, the names of three of them appearing in the orchestra at the first Handel Commemoration in 1784. As much may be said of many other members of the family. One of them belonged to Queen Anne's Band; others appeared late in the 18th century in the Minute Books of the Royal Society of Musicians, and in the records of the Musicians Company. The connection between the art and the craft has always been maintained, and Henry Hill (see above) ranked as the leading English viola player of his day, and was one of the founders of the Beethoven Quartet Society. His brother, William Ebsworth Hill (died 1896), father of the present members of the firm, was one of the worthies of the violin world, a genuine craftsman, whose judgment could be relied upon where the authenticity of old instruments was concerned. He was gifted, it may be added, with a keen sense of humour. Alfred Ebsworth Hill and Walter Edgar Hill both learned their craft of lutherie in the old French violin-making town of Mirecourt, the former being the first Englishman to do so. William Henry Hill began life as a professor of the viola. The firm has established workshops near London, and although the number of instruments produced has not been large (about a hundred and fifty), some good results have been attained. All the brothers have co-operated in the editing of various pamphlets dealing with the viola, of which 'Life and Work of Muggini, from the pen of Lady Huggins, is the most important; and in writing a Life of Stradivari, which has been welcomed by every lover of the violin at home and abroad, being not only a compendium of all that is known of the master, but containing, in addition, the results of independent research extending over a series of years. W. W. C.

HILLEMACHER, two brothers whose works, written in collaboration, have attained a high position in French music. Both were born in Paris; Paul, on Nov. 25, 1852, and Lucien, on June 10, 1860; both studied at the Conservatoire; the elder obtained a second accessit in harmony and accompaniment in 1870, a first accessit in counterpoint and fugue in 1872, a second prize in 1873, the second grand prix de Rome in 1873, and the first in 1876. The younger brother gained a first accessit in harmony
and composition in 1877, a first prize in 1878, the second grand prix de Rome in 1879, and the first in 1880. The practice of writing in collaboration was adopted in 1881, with the signature 'P. L. Hillemscher.' Their first important work was 'Loreley,' a Légende symphonique (Grand Prix de la ville de Paris, 1882); 'Saint-Mégrin,' four-act opera (Brussels, March 2, 1888); 'Une aventure d'Arlequin,' four-act opera-comique (Brussels, March 22, 1888); 'Le Régiment qui passe,' one-act opéra-comique, (Royaumont, Sept. 11, 1894); 'One for Two,' one-act pantomimes (London, Prince of Wales's Theatre, May 26, 1894); 'Le Drac' ('Der Fluthgeist'), lyrical drama in three acts (Carlsruhe, Nov. 14, 1896); and 'Orsula,' lyrical drama in three acts (Paris, Grand Opéra, May 21, 1902). 'Circe,' lyrical drama in three acts, accepted in 1898, by the Opéra Comique, has not yet been performed. The brothers have also brought out several albums of songs, and choral pieces, as well as works for orchestra and chamber music. Refined musicians, possessed of remarkable technical knowledge and a profound dramatic instinct, the Hillemschers are among the most distinguished of modern French composers; but the complete development of their originality has been to some extent retarded by the undue influence upon them of Wagner's music. a. p.

HILLER, FERDINAND, was born of Jewish parents at Frankfurt-on-the-Main, Oct. 24, 1811. His first music-lessons were from a violinist named Hofmann, who did little beyond allowing him to form his taste by playing the sonatas of Mozart and Beethoven. Instruction on the pianoforte he received from Alois Schmidt, and in harmony and counterpoint from Vollweiler. At ten he played a concerto of Mozart's in public, and at twelve began to compose. Though educated for a learned profession, he was allowed to take up the study of music in earnest; and in 1825 was placed with Hummel at Weimar. Here for a time his attention was absorbed by composition; for Hummel, recognising his obvious bent, allowed him to take his own course. His master's criticisms on his early compositions were severe and disheartening, but Hiller proved the reality of his artistic impulse by never allowing himself to be discouraged. In 1827 he accompanied Hummel on a professional tour to Vienna, and had the privilege of seeing Beethoven on his death-bed and of witnessing the dissipation of the cloud which had once interrupted his intercourse with Hummel. Of this meeting he has given an interesting account from memory in his Aus dem Tonleben (2nd series). While in Vienna he published his op. 1, a pianoforte quartet written in Weimar. He then returned to Frankfurt, but stayed there only a short time, in spite of his advantageous intercourse with Schelble, as he was anxious to push on to Paris, at that time the headquarters of music and everything else. His stay in Paris lasted from 1828 to 1835, with one break caused by the death of his father. He acted for a time as professor in Choron's 'Institution de Musique,' but afterwards lived independently, perfecting himself as a pianist and composer, enjoying the best society. Besides Mendelssohn, whom he met as a boy at Frankfurt and with whom he remained in the closest friendship to a late date, he was intimate with Cherubini, Rossini, Chopin, Liszt, Meyerbeer, Berlioz, Nourrit, Heine, and many others. Fétis, in his Biographie Universelle, gives further particulars of this stay in Paris, and especially of Hiller's concerts, in which Fétis took part. Suffice it to say here that his performances of Bach and Beethoven had an important share in making the works of those great masters better known in France. He was the first to play Beethoven's E♭ Concerto in Paris; and his classical soirees, given in company with Ballot, excited much attention at the time. From Paris he returned to Frankfurt, conducted the Carliskere Verein in 1836 and 1837 during Schellie's illness, and then passed on to Milan, where he again met Liszt and Rossini. Rossi furnished him with the libretto of 'Romilda,' which he set to music, and which, through the intervention of Rossini, was produced at the Scala in 1839, but without success. Here also he began his oratorio 'Die Zerstörung Jerusalems,' perhaps his most important work, and one that interested Mendelssohn so much that he induced Hiller to pass the winter of 1839 in Leipzig, personally superintending its production (April 2, 1840), which was most successful, and was followed by performances at Frankfurt, Berlin, Dresden, Vienna, Amsterdam, and elsewhere. On his second journey to Italy in 1841, he went to Rome, and studied old Italian Church music under the guidance of Baini, of whom he has recorded his recollections (Tonleben, ii. 101). On his return to Germany he lived successively in Frankfurt, Leipzig (conducting the Gewandhaus Concerts of 1843-44), and Dresden. Here he produced two more operas, 'Traum der Christnacht,' and 'Conradin.' During this time he lived on intimate terms with Spohr, Mendelssohn, the Schumanns, David, Hauptmann, Joachim, and many more illustrious artists. A lasting memorial of this period is preserved in the dedication of Schumann's PF. Concerto to him—'freundschaftlich zugeeignet.' In 1847 he became municipal capellmeister at Düsseldorf, and in 1850 accepted a similar post at Cologne, where he organised the Conservatorium, and became its first director. This post he retained till his death, May 10, 1885, and in his various capacities of composer, conductor, teacher, and littérateur, he exercised an important influence on music in the Rhenish Provinces. He gave such an impetus to the musical society of which he was conductor, that its concerts have been long considered among the best in Germany. The Lower Rhine Festivals, which he conducted from 1850 as often as they
were held at Cologne, chiefly contributed to gain him his high reputation as a conductor. As a teacher his career was closely connected with the history of the Cologne Conservatorium. Among his numerous pupils there, the best known is Max Bruch. He occasionally left Cologne to make concert-tours in Germany, or longer excursions abroad. He conducted the Italian opera in Paris for a time (1852-53), and visited Vienna and St. Petersburg, where in 1870 he conducted a series of concerts by the Russian Musical Society. England he visited several times, first in 1852, when he conducted a work of his own at the London Philharmonic Concert of June 28; and again in 1870, when his cantata, 'Nala und Damajanti,' was performed at the Birmingham Festival, and in 1872, when he was enthusiastically received both as a pianist and conductor of his own works at the Monday Popular and Crystal Palace Concerts, and also in Liverpool and Manchester. Hiller's published works are very numerous. They include, Chamber music—five PF. quartets; five trios; five string quartets; Sonatas for PF. alone, and with violin and violoncello; a suite 'in Canone' for PF. and violin; Serenade for PF. and violoncello; 'Moderne Suite' for PF.; and a mass of other pianoforte compositions, including twenty-four Études, 'rhythmische Studien,' Impromptu 'zur Gitarre,' operettas without words, etc. etc. Orchestral works—four overtures, including that to 'Demetris'; a Festival March for the opening of the Albert Hall; three symphonies, including that with the motto 'Es muss doch Fröhling werden'; etc. etc. Vocal compositions—two oratorios, 'Die Zerstörung Jerusalems' and 'Saul'; five operas, including 'Die Katacomben,' 'Der Deserteur,' and many smaller works; Lieder; choruses, mixed and for men's voices only; motets, psalms, etc.; a number of cantatas for soli, chorus, and orchestra, especially 'O weint um Sie' from Byron's Hebrew Melodies, op. 49, 'Ver sacrum,' op. 75; 'Nala und Damajanti,' written for Birmingham; 'Israels Siegesgesang,' op. 151; 'Prometheus,' op. 175; and 'Rebecca,' op. 182. His literary works include a crowd of interesting articles, biographical, critical, and miscellaneous, contributed to the Kölische Zeitung, many of them republished under the title Aus dem Tonleben unserer Zeit, two volumes in 1867, with a Neue Folge in 1871, and a fourth vol., Persönliches und Musikalisches, in 1876. He has also published his recollections of Mendelssohn—which appeared in Macmillan's Magazine, and were reprinted separately with a dedication to Queen Victoria—and a very interesting paper on Cherubini, first printed in the same periodical. He edited a volume of letters by Hauptmann to Spohr and other well-known musicians. To complete the list, we may add—additional accompaniments for Handel's 'Deborah' (for the Lower Rhine Festival, 1834), and 'Theodora'; and an instruction book Uebrungen zum Studium der Harmonie und des Contrapunkts (2nd ed. 1860).

HILLER, JOHANN ADAM, whose real name was HULLER, born Dec. 25, 1728, at Wendisch-Ossig near Görlitz in Prussia, the son of a schoolmaster and parish-clerk. He lost his father when barely six, and had a hard struggle to obtain his education. He possessed a fine treble voice, and had already acquired considerable facility on various instruments, and he quickly turned these talents to account. He passed in 1747 from the Gymnasium at Görlitz to the Krenzschule at Dresden, where he studied the harpsichord and thorough-bass under Homilius. It was, however, the operas and sacred compositions of Hasse and Graun which exercised the most lasting influence upon him. Hasse's operas, of which he had the opportunity of hearing excellent performances, had a special attraction for him, and he copied the scores of several. In 1751 he went to the University of Leipzig, where, besides his legal studies, he devoted much attention to music, 'partly from choice, partly from necessity,' as he himself relates. He took part in the so-called 'Grosses Concert' both as flautist and singer, and began to make his way as a composer and author. In 1754 he entered the household of Count Bruhl, the Saxon minister, as tutor, and in this capacity accompanied his pupil to Leipzig in 1758. A hypochondriacal tendency, which overshadowed his whole life, caused him not only to resign this appointment, but also to refuse the offer of a Professorship at St. Petersburg. Henceforward he lived independently at Leipzig, engaged in literature and music, and actively employed in promoting the revival of public concerts, temporarily given up during the war; and it is largely owing to his exertions that they afterwards reached so high a pitch of excellence. He was appointed director in 1763, when the concerts were called 'Liebhaber-concerte,' and immediately took steps to improve the choruses. In 1771 he founded a school for the cultivation of singing, which he supported from 1775 by giving performances of the oratorios of Handel, Graun, etc. As paid director of a society for the practice of music, he established 'Concerts Spirituel's' in 1776 (so called after the Paris concerts of that name), which took the place left vacant by the failure of the old 'Grosses Concert.' In 1781 this 'Concert-Institut' moved into the newly-built hall of the 'Gewandhaus,' and thus originated the 'Gewandhaus Concerts' of world-wide celebrity (see vol. 1. p. 712, and ante, pp. 163, 164). Not content with this he composed for the then flourishing theatre at Leipzig, a series of 'Singepiele,' which are sufficient of themselves to perpetuate his name in the history of music. Though doubtless an adaptation of the French operetta,
Hiller established the German ‘Singspiel’ as a separate branch of art. He took for his basis the simple ‘Lied,’ a form which brought it within the capacities of the company, who were by no means trained singers; but within these narrow limits he developed a variety of invention and expression, a delicacy and precision of character, which at once secured universal approval, and have sufficed to maintain this class of piece to the present day. He enlarged both the form and substance of the ‘Lied’ proper, by departing from the simple strophe, and giving to the songs a specific dramatic colouring in accordance with the character. He also introduced ‘morceaux d’ensemble,’ and traces are not wanting of the beginnings even of the dramatic ‘scene.’ Of these ‘Singspiele’ Hiller composed fourteen, each containing thirty numbers of this ‘lied’-like character. The best known are ‘Lisuard und Darolette’ (1768), ‘Lotteken am Hofe’ (1789), ‘Lieber auf dem Lande’ (1769), ‘Dorfbärlieb’ (1771), and especially ‘Die Jagd’ (1771), which has kept the stage for more than a century, and is even still performed. He also wrote a quantity of sacred songs and ‘Lieder,’ which had their share in bringing to perfection this style of composition—so significant a contrast to the Italian ‘aria.’ Having been induced to accompany his pupils, the two Präulein Podleska, to the court of the Duke of Courland at Mittau, in 1782 Hiller made so favourable an impression, that on his departure in 1784, he was appointed Hofkapellmeister, with a salary. He resigned his post at the ‘Gewandhaus’ concerts in 1785, and in 1789 his many services to the cause of music were recompensed by the appointment as Cantor and musical director to the Thomasschule in Leipzig. He was at first appointed as deputy to Doles, and succeeded to the post after the latter’s death in 1797. This post he held till 1801, and his death took place on June 16, 1804, after much trouble from the old hypochondria. As composer, conductor, teacher, and author, Hiller’s industry was indefatigable. His instrumental compositions are now quite antiquated, but not so his vocal works. These consist chiefly of motets and the ‘Singspiele’ already named; but the following must not be omitted:—‘Choralmelodien zu Gellert’s geistlichen Oden und Liedern’ (1761); ‘Weisse’s Lieder für Kinder’ (1799); ‘50 geistliche Lieder für Kinder’ (1774); and ‘Vierstimmige Choräle’ (1794). Of his larger works may be cited, a ‘Passions-cantata,’ and a 100th Psalm, both much prized by his contemporaries. Hiller also composed a Choralsbuch (1793), with two appendices (1794 and 1797), largely used in his day, though since widely condemned. It should be remembered that he lived in a time of general softness and relaxation, when all music took its tone from Italian opera. Hasse and Graun were the models of his taste, whom he revered all his life. But he was by no means insensible to the influence of the great renovation of music originated by Haydn and Mozart, and was powerfully impressed by Handel, while for Bach and Gluck he entertained a bare outward respect, with no real sympathy. He had deeply imbided the spirit of that insipid and shallow age, which being entirely without feeling for historical propriety, permitted arbitrary changes in the treatment of older works, which in our day of historical enlightenment seem as astounding as they are impertinent. This is very remarkable in Hiller’s careful editions of classical works. Thus he introduced many alterations of his own into a German edition of Handel’s ‘Jubilante’ under the title of the 100th Psalm, and arranged Pergolesi’s two-part ‘Stabat Mater’ for a four-part choir. He also edited Hasse’s ‘Pilgrimage auf Golgatha,’ Graun’s ‘Tod Jesu,’ and Haydn’s ‘Stabat Mater’ with German words, and in an abridged form for pianoforte. Still much praise is due to him for his frequent performances of oratorios, chiefly those of Handel. The ‘Messiah’ especially was given at Berlin, Breslau, Leipzig, and other places, with nearly as much éclat as at the great English festivals. As an author Hiller was painstaking and prolific. [His first important book seems to have been Abhandlung von der Nachahmung der Natur in der Musik, 1758.] Besides several single articles in periodicals he edited a weekly paper, Wöchentliche Nachrichten und Anmerkungen die Musik betreffend (1766-1770). He had always given great attention to the cultivation of singing, and two instruction books of that kind—Anweisung zum musikalisch-richtigen Gesange (1774), and Anweisung zum musikalisch zierlichen Gesange (1780), are among the most valuable of his works. He also published a good method for violin. He edited Lebensbeschreibungen berühmter Musiklehrern und Tonkünstler (1 vol. 1784), with his autobiography. Two of his collections also deserve mention—Musikalische Zeitvertreib (1760), of German and Italian airs, duets, etc., and ‘Vierstimmige Motetten,’ etc. (6 vols. 4to, 1776-91), containing motets by many celebrated composers—a work of real value. [For complete list of his works, both musical and literary, see the Quellen-Lexikon.] His grateful pupils, the sisters Podleska, erected in 1832 a small monument to his memory on the Promenade at Leipzig, before the windows of his official residence at the Thomasschule, and close to Mendelssohn’s Bach memorial.

Hilton, John (1), contributed a five-part madrigal, ‘Fair Oriana, Beauty’s Queen,’ to the ‘Triumphs of Oriana,’ 1601. He is there called ‘Batcheler of Musick,’ very likely correctly, though no record exists of his having taken his degree. He may probably be identified with John Hilton, a counter-tenor in Lincoln Cathedral Choir, first mentioned in 1584. The Lincoln Chapter gave him 30s. (Jan. 21, 1593), for helping to prepare two Comedies to be acted by
the Choristers. As a reward for good and faithful service, the Chapter allowed him to dispose of his house in the Close on his being elected organist of Trinity College, Cambridge, Jan. 26, 1594; he is then described as 'late Poor Clerk and Organist of the Cathedral,' but he can only have been assistant organist, for Thomas Butler was organist. [Canon Maddison, in Associated Architectural Societies' Reports, etc., 1885, vol. xviii. pt. ii. p. 110.] Hilton was probably dead before 1612, when George Mason was organist of Trinity. [West, Cathedral Organists.] A seven-part anthem, 'Call to remembrance,' by 'John Hilton, senior,' is in the Bodleian Library (MS. Mus. f. 25-28).

Possibly some of the compositions assigned below to the younger Hilton may prove to be by the elder.

Hilton, John (2), was born in 1599, according to the date on his portrait at Oxford. He may very well have been the son of the first John Hilton. In 1626 he took his degree of Mus.Bac. at Cambridge from Trinity College. In supplicating for the degree he mentions that he has studied the science of music for ten years. In 1627 he published 'Ayres, or Fa La's for Three Voyces' (edited by Warren for the Mus. Antiquarian Society, 1844). In dedicating these unripe First-fruits of my Labours, as he calls them, to Dr. Heather, founder of the Oxford Professorship of Music, Hilton speaks of them as 'but a drop that I receive'd from you the Fountain'; which may be taken to mean that Heather was either his master or his patron. In 1628, Hilton was made Parish Clerk and Organist of St. Margaret's, Westminster, receiving for the former office a salary of £6:13:4 a year. It is assumed that on the suppression of the organs in 1644, he retained the post of clerk. [Hawkins's History, 1875, p. 575.] An Elegy by Hilton on the death of William Lawes 'Bound by the neere conjunction of our Soules' for three voices and bass, was printed among other similar compositions in Lawes's Choice Psalms, 1648. In 1652 he published 'Catch that catch can,' or A Choice Collection of Catches, Rounds, and Canons for three or four Voyces, dedicated to his 'much Honoured Friend, Mr. Robert Coleman.' This contains a large number of compositions by Hilton himself as well as by other musicians; among his Round being the still popular 'Come follow me.' The second edition is dated 1658. In the British Museum (Add. MS. 11,608), among a number of airs and dialogues by Hilton, are two songs, which have been thought to be his latest dated works, 'Love is the sun,' and 'When first I gazed,' both bearing the date 1656; but as the first is also dated Feb. 16, 1641, in neither case can 1658 be taken as the date of composition.

Anthony Wood, in his MS. Notes on Musicians, now in the Bodleian Library, says, 'He died in the time of Oliver, and was buried in the Great Cloysters at Westminster; at which time the singing at burials being silenced, as popish, the Fraternity of Musicians who intended to sing him to his grave, sang the Anthem in the House over the corpse before it went to the church, and kept time on his coffin.' Wood seems to have been wrong as to the place of his burial, for it is entered in the Registers of St. Margaret's, Westminster, on March 21, 1656-57.

Two Madrigals by Hilton, 'One April Morn,' and 'Smooth-flowing Stream,' were printed by Oliphant 'from an old MS.,' with words adapted by the editor. Rimbauld printed a Service by him in his Cathedral Music, 1847, professedly from a MS. at Westminster Abbey. Among his works still remaining in MS. are the anthems, —'Teach me, O Lord' (Oxford Mus. School); 'The Earth is the Lord's' (Christ Church, Oxford); 'Sweet Jesus,' and 'Hear my cry' (Peterhouse, Cambridge); the last is also in a MS. at Lichfield which calls Hilton 'organist of Newark' (see Peterhouse Catalogue, Ecclesiologist, 1859), but this is an error; John Hinton, not Hilton (died 1685), was organist of Newark. In the British Museum are two songs for the Lute (Egerton MS. 2013), and eight short pieces for three viols (Add. MSS. 29,283-5); the latter were in Warren's collection, and are needlessly described by him as being written in too late a style to be the work of this Hilton. Six Fantasies in three parts are at Christ Church, Oxford. The organ part of an evening service and six anthems is in Batten's Organ Book (Warren's edition of 'Ayres, or Fa-La's').

It should be mentioned that Hilton's name is given as composer of the anthem 'Lord, for Thy tender mercies' sake' (usually ascribed to Farrant), in a MS. copy made by James Hawkins, organist of Ely, 1682-1729, whence Touchy copied it for his collection. Rimbauld also speaks of a MS. copy in Blow's writing, dated 1666, with Hilton's name. This ascription, however, has not found general acceptance.

The portrait of Hilton at the age of fifty, dated Sept. 30, 1649, is in the Oxford Music School Collection; the head was engraved for Hawkins's History of Music. G. E. F. A.

HIME, a family of music-publishers who in the latter part of the 18th century and in the early years of the 19th did the largest provincial trade in this country. The firm was commenced by Humphrey and M. Hime (brothers), who were in business in Liverpool at 56 Castle Street, prior to 1790. Before 1795 M. Hime had gone to Dublin, and established an extensive concern there. Owing to the fact that at this period music, copyrighted in England, had no protection in Ireland, great numbers of English works were re-engraved by the Irish publishers and in many cases sent over to England for sale at cheaper rates. The Liverpool Hime's connection with his Dublin brother no doubt was advantageous to him in this respect. Wm.
Gardiner, in *Music and Friends*, mentions how he was thus enabled to obtain from Hime of Liverpool some cheapened works of Haydn; and Michael Kelly, in his *Reminiscences*, tells how he had to travel to Dublin in 1813, being subpoenaed as a witness in a law suit against Hime of Dublin, for this kind of piracy. M. Hime was first at 26 Dame Street, Dublin, but before 1795 he was at 34 College Green, from which address most of his publications were issued. About 1812-13 the number at College Green became 29, and shortly after this date published music bearing his name ceases. Humphrey Hime retains his address in Castle Street, Liverpool, from 1790 to 1805, when, taking his son into partnership, they have additional premises in Church Street, and this place of business was held by the family until well into the seventies. The shop was then taken over by a music-selling firm, "Henry Lee, late Hime."  

F. K.

HIMMEL, FRIEDRICH HEINRICH, a man of some mark in his day, born Nov. 20, 1765, at Treuenbriegen, Brandenburg. He was intended for the Church, and studied theology at Halle; but the excellence of his pianoforte playing induced the king, Frederick William II., to have him educated as a musician. After three years' harmony and counterpoint under Naumann at Dresden, he took to Berlin 'Isacco,' an oratorio, performed (1792) by the court-chapel with brilliant success, and a cantata 'La Danza.' The king gave him 100 Friedriehs for his oratorio, made him his chamber-composer, and sent him to Italy for two years. While there he produced "Il primo Navigatore" at the Fenice in Venice (1791), and 'Semiramide' at San Carlo in Naples (Jan. 1792). Reichardt having been dismissed from the Court-capellmeistership at Berlin, the king gave the appointment to Himmel, who therewith returned at once. When in office he composed several pièces decirconstance, such as a Trauer-cantate for the funeral of King Frederick William in 1797, and a Te Deum for the coronation of his successor. In 1798 he visited Stockholm and St. Petersburg, where the Emperor commissioned him to write 'Alessandro,' an opera for which he received 6000 reishes. [In 1789 he was at Riga.] In 1801, in which year his 'Prohnn und Schwärmerle' was given at Berlin, he produced 'Vasco di Gama' at Copenhagen, proceeded thence to France, England—where he made only a short stay of which we have no particulars—and Vienna, returning to Berlin in December 1802. After the battle of Jena he retired first to Pyrmont, and then to Cassel, and died of dropsy at Berlin, June 8, 1814. Besides the works already mentioned he composed — 'Fanchon, das Lievnmädchen' (1804), libretto by Kotzebue, his best opera; 'Die Sylyphen' (1806), 'Der Kobold' (1814); all produced in Berlin; a 'Vater Unser'; Psalms; motets, masses, etc.; PF. sonatas; dance music and concerted music for PF.; and a number of songs. The sonatas and songs abound in melody, and are the work of a sound musician, but though popular in their day, they are now quite forgotten. [A list of compositions is in the *Quellen-Lexikon.*] Himmel had much intercourse with Beethoven during the visit of the latter to Berlin in 1796. If Beethoven hurt his feelings by a rude joke on his extemporising, Himmel had certainly the better of the encounter in the end. [See vol. i. p. 277.] A song by him, 'An Alexis,' is in the *Musical Library*, vol. i. M. C. C.

HINDLE, JOHN, Mus.Bac., born in Westminster in 1761, was a lay vicar of Westminster Abbey. He matriculated at Oxford in 1791. He published 'A Collection of Songs for One and Two Voices,' and 'A Set of Glees for 3, 4, and 5 voices.' His favourite glee 'Queen of the silver bow,' first appeared (with another) in the 'Professional Collection.' He also composed a well-known chant. He died in 1796. W. K. H.

HINE, WILLIAM, born at Brightwell, Oxfordshire, in 1807, became a chorister of Magdalen College, Oxford, in 1814, and continued so until 1705, when he was appointed a clerk. He was removed from his place in the same year, when he came to London and studied under Jeremiah Clarke. In 1712 he succeeded Stephen Jefferys as organist of Gloucester Cathedral, and shortly afterwards married Alicia, daughter of Abraham Rudhall of Gloucester, the famous bell founder. Hine died August 28, 1750. His wife survived him until June 28, 1755. Both were interred in the eastern ambulatory of the cloisters, where a mural tablet to their memory informs us that the Dean and Chapter had voluntarily increased Hine's stipend in consideration of his deserts. Dr. Philip Hayes presented a portrait of Hine (his father's instructor) to the Music School, Oxford. After Hine's death his widow published, by subscription, 'Harmonia Sacra Giocestrisicia; or, Select Anthems for 1, 2 and 3 voices, and a Te Deum and Jubilate, together with a Voluntary for the Organ.' The Te Deum is by Henry Hall, and the other compositions by Hine. The voluntary furnishes a curious example of the style of organ playing then in vogue. W. K. H.

HINGSTON, JOHN, was a pupil of Orlando Gibbons, and one of the musicians to Charles I., and afterwards entered the service of Oliver Cromwell, whose daughters he instructed in music. When the organ of Magdalene College was removed from Oxford to Hampton Court, about 1654, Hingston was appointed organist to the Protector at a salary of £100 per annum, and with two boys, his pupils, was accustomed to sing Dering's Latin motets to Cromwell, who greatly delighted in them. He had concerts at his house, at which Cromwell was often present. Hingston has been said to have been Dr. Blow's master, but this is doubtful. He composed some Fancies. He was buried at St. Margaret's,
Westminster, Dec. 17, 1853. A portrait of him is in the Music School, Oxford, w. h. h.

HINTON, ARTHUR, born at Beckenham, Kent, Nov. 20, 1869, was educated at Shrewsbury School, and at first intended for a commercial career. With his father's consent, however, he was entered at the Royal Academy of Music, where he studied the violin with Sainton and Sauet, and composition with F. W. Davenport. After his three years' course, he was appointed a sub-professor of the violin, and after three years more in London, he went to Munich to study with Rheinberger. His first symphony, in B flat, was played at a Conservatorium concert there, under the composer's direction. Some time was spent at Vienna, Rome, and Albano, and the fruits of this stay abroad were an opera, 'Tamara,' in two acts, an orchestral fantasia, 'The Triumph of Caesar,' and other things. The fantasia was played at a concert given by a group of young English composers in the Queen's Hall in Dec. 1896. Since that time the composer has lived in London, getting experience as conductor of theatre orchestras, and in many other ways. Two scenes from Endymion for orchestra were given at New Brighton at Mr. Granville Bantock's interesting concerts there, and his second symphony in C minor was played at a concert at the Royal College of Music in 1903. A sonata in B flat for violin and pianoforte was played by M. Sauet, to whom it is dedicated, and a suite in D, op. 20, for the same instruments, was played at one of the Broadwood concerts in January 1903. A trio in D minor, op. 21, was given at the composer's concert in June 1903, a scherzo for piano, violin, and violoncello has also been performed, and a 'Chant des Vagues' for violoncello has become very popular. Among the composer's unpublished works are a dramatic romance, on Porphyria's Lover, for orchestra, and a tenor scene from Epiphanidion. His operettas for children, 'The Disagreeable Princess' and 'St. Elizabeth's Rose,' have had much success, and while his songs have been more or less frequently sung, his pianoforte pieces have found an ideal interpreter in his wife, known as Miss Katharine Goodson. She was born June 18, 1872, at Watford, Herts, and after various provincial appearances as a pianist, when only twelve years of age, went to the Royal Academy of Music, where she studied with Oscar Beringer from 1886 to 1892. She was under Leschetizky in Vienna from 1892 to 1896, and on her return to England in the latter year, made a great success at the Popular Concerts, after which she gave an interesting set of recitals, and made a provincial tour in 1897. In that year and every year since, she played with great success in various parts of the continent, her début in Berlin taking place in 1899. In Vienna her first appearance was in 1900, when she played at the New Philharmonic Concerts, with the Bohemian Quartet, and at recitals. She played Tchaikovsky's concerto at a Richter Concert in London, 1901, and toured with Kubelik in 1902, 1903, and 1904. She was married to Mr. Hinton in 1903. Her playing is marked by an amount of verve and animation that are most rare with the younger English pianists. She has a great command of tone-gradation, admirable technical finish, genuine musical taste, and considerable individuality of style.

HINTZE, JACOB, born Sept. 4, 1622, at Bernau near Berlin, became in 1666 court musician to the Elector of Brandenburg at Berlin; but he retired to his birthplace, in 1695, and died at Berlin, May 5, 1702, with the reputation of being an excellent contrapuntist. He edited the 12th and subsequent editions of Crüger's 'Praxis pietatis,' Berlin, 1666, 1690, 1695, adding to it sixty-five hymns to the Epistles by himself, none of which are said to be ever used now; but others in the book are his, some of which continue to be favourites, especially 'Gieb dich zufrieden' and 'Alle Menschen müssen sterben' (if the latter be really by him). Concerning the chorales composed by Bach, refer to Spitta's Bach, vol. iii. pp. 105, 114, 287, etc. (English translation.)

HIPKINS, ALFRED JAMES, F.S.A.; born at Westminster, June 17, 1826, entered the pianoforte business of Messrs. Broadwood & Sons in 1841, and remained in it until his death, sixty-three years afterwards, on June 3, 1903. The practical experience he gained in the business was turned to the best account, and he gradually and quietly established his position as the highest authority in England on many points connected with the pianoforte. During Chopin's visits to England, he always insisted on using a piano tuned by Hipkins, and thus the young man enjoyed frequent opportunities of hearing the composer play. As need hardly be said, he was, in after years, very difficult to please in performances of Chopin by the younger players. His own playing of Chopin was of exquisite beauty, for he was a highly accomplished pianist, and was an unrivalled authority on the old keyboard instruments. His studies, guided by the perusal of C. P. E. Bach's treatise, made him a master of the harpsichord, concerning which, before his time, but little was really understood in modern days; his methods of disposing the two keyboards, so as to play the 'Goldberg' variations of Bach, or the sonatas of Domenico Scarlatti, with their continual crossings of hands, are undoubtedly right, and to him is to be ascribed the resuscitation of a practical interest in this instrument, as well as in the claveichord; the secrets of which he divined from long practice on an instrument lent to him by Carl Engel, whose friendship was of great value to him for many years. He was the first in modern times to perform the pieces already named upon the harpsichord, and
the ‘Fantasia cromatica’ of Bach on the clavichord. Besides the professional work involved in holding a position of the highest importance and responsibility in music, becoming a specialist on the questions of Temperament and Pitch. His support of the practical adoption of Equal Temperament dates from 1844; and his investigations into the history of musical pitch, which he prosecuted from 1855 onwards, at length bore fruit in the substitution of a pitch nearly in accord with the diapason normal \( A = 440 \text{ at a temperature of } 68^\circ \text{ Fahrenheit} \), instead of the old ‘Philharmonic’ pitch. This good work was not finally accomplished until 1896. His studies on musical pitch led in 1876 to an acquaintance with Dr. A. J. Ellis, with whom he was closely associated in his later writings, such as The History of Musical Pitch, 1880; Musical Scales of all Nations, 1885, and the second edition of Ellis’s translation of Helmholz in the latter year. The latest fruits of his researches on the Pianoforte and on Pitch are embodied in articles contributed to the ninth edition of the Encyclopaedia Britannica, and throughout the first edition of this Dictionary he contributed valuable articles on the keyboard and other instruments. His final corrections for the present edition, carried down as far as the article ‘Harpsichord,’ represent the last work of his life.

The following works, only one of which is of any great bulk, have become classics in their own way; Musical Instruments, Historic, Rare, and Unique (1888), the outcome of Hipkins’s connection with the Music and Inventions Exhibition of 1885, with a beautiful series of coloured illustrations by William Gibb; the concise and learned little History of the Pianoforte and its Precursors, 1896-97; Dorian and Phrygian, re-considered from a non-harmonic point of view, 1902. This last was reprinted in the Sammelbände of the Int. Mus. Ges. in the year after its publication. Besides these he wrote reviews on books dealing with ethnology and antiquity, articles for many musical works and magazines, andprefaces to various catalogues of musical exhibitions, etc., all of which are of great and permanent value.

Between 1883 and 1896 he gave many interesting lectures, published in contemporary journals; many of them have been translated into French, German, Italian, and Japanese. For one, on the Pianoforte, the Society of Arts awarded him a silver medal, an honour repeated for his paper on the Standard of Musical Pitch. At the Royal Society he gave two lectures on Certain Harmonics in a Vibrating String, recorded in vol. xxxvii. p. 363, and vol. xxxviii. p. 53, of the Proceedings. He also gave lectures, illustrated by himself on the old instruments, at the Royal Academy of Music, Royal College of Music, the musical clubs of Oxford and Cambridge, and various musical societies in the country. His services to various exhibitions must not be passed over; they began with the Great Exhibition of 1851, in connection with which he gave a series of pianoforte recitals, over forty in number; here, too, he acted as interpreter to Péris, one of the jurors at the Exhibition. In the Exhibition of 1885, before mentioned, he took a principal part in the formation of the loan collection. Other exhibitions claimed his services, such as Bologna, 1888; the Military Exhibition, 1891; the Music Exhibition at Vienna, 1892; the Victorian Exhibition, 1897; and finally the Paris Exhibition of 1900. Besides all these services to musical art he established, when on a visit to Potsdam, the claim of Cristofori to be considered as the inventor of the Pianoforte. He had permission from the Empress Frederick, then Crown Princess, to make the necessary examination of the instruments in the Royal collection.

He enjoyed the friendship of an extraordinary number of great musicians, from Cramer, Stern- dale Bennett, Chopin, Liszt, Von Bülow, Rubinstein, Wagner, down to the youngest aspirants for musical fame, who found in him a wise counsellor and the kindest of supporters. His geniality of manner, his earnestness, modesty, good humour, and the generosity with which his vast knowledge and skill were put at the disposal of any one who was in earnest, made him universally beloved. He was a member of the Council of the Royal College of Music, and honorary curator of its Museum, and a Fellow of the Society of Antiquaries. His collection of Tuning Forks, together with those of his collaborator, Dr. A. J. Ellis (who made him his literary executer), was given after his death to the Royal Institution, and his splendid collection of musical instruments to the Royal College of Music.

HIS MAJESTY. The German name for B sharp.

HIS MAJESTY’s THEATRE. See King’s Theatre.

HISPANIAE SCHOLA MUSICA SACRA, a valuable collection of Spanish Church music of the 15th-18th centuries, begun about 1894, and apparently still in progress. The editor is Señor Felipe Pedrell, the eminent musical archeologist; the contents of the volumes already published are as follows:

Vol. i. Requiem, Magnificat, and motets by Cristoforo Morales.
   ii. Magnificat, Pasiones, and motets by Francisco Guerrero.
   iii. and iv. Organ Music by A. de Cabezón.
   v. Requiem, motets, etc., by J. G. Pérez.
   vi. ‘Psalmodias modulatas (ulter saxia fabulas), a diversa musico-rhythmus, inter qua Fr. Thomas et Sancta Maria, Franciscus Guerrero, Thomas Ludovici et Victoria, Ceballos, aliquis incerti aut ignotus.’
HISTORIES OF MUSIC

It will be necessary in this article to confine our attention almost exclusively to Histories proper, except in cases where there are none of the subject under treatment; so that only occasional mention will be made of Musical Biographies, Dictionaries, Manuscripts, and Periodicals, or works on the Theory of Music. Most of the works enumerated, unless marked with an asterisk, will be found in the library of the British Museum. The dates of the first and latest editions are usually given. For convenience we shall adopt four principal headings, namely:—General Histories of Music, Histories of separate Countries, of Musical Instruments, and of a few other special subjects arranged alphabetically; and most of these will have to undergo further subdivision.

I. General Histories of Music

(a) Ancient Music. The earliest writings bearing at all upon the history of music are the Αρχαίας Συμβολικος des Nicomachus (see Melodies), and the ποιημα του χορού des Isidore of Seville in 630, and by Rudolf Westphal in 1865. Pausanias's Genealogiae Descriptores also contains frequent allusions to music. Other popular treatises on the subject are those by the Greek philosopher Platon, and the highly valuable De musicothesia of Athenaeus and the Stromata of Stesimones Clemens (Clement of Alexandria), containing a number of heterogeneous remarks on musical subjects. The earliest known music-writer to the Renaissance musical writers appear to have been too deeply engrossed in the development of the music of their time to bestow much thought upon that of the past. The Church of Rome had already taken up the new subject and devoted a large amount of labor to the study of the works of such authors as St. Augustine, Boethius, St. Isidore of Seville, Bede, Hucbald, Guido d'Arezzo, Philippe de Vitry, Ambrose, Guido of Arezzo, Guillaume Durand, Paul the Apostle, Galeno, Glarean, etc., that we can obtain an adequate history of music in the early and middle ages. Johannes Tinctor wrote a treatise De origine Musicae in the 13th century; Rud. Schlickius's Exercitatio musice originis, published at Spires in 1588, was thought highly of in its day; the De Musica of F. Salmas, 1602, is chiefly theoretical.

(c) General Histories, of Ancient and Modern Music combined. Sethus Calvisius's important work De initio et progressu Musices appeared in 1600, and a second edition in 1768; this was followed shortly by Michael Praetorius's still greater Syntagma Musicum. The most useful works of this period bearing on the subject are Père M. Morette's Traité de l'Harmonie Universelle, in 2 vols., 1773; J. Albert Bannus's De Musica Naturn, etc., 1657; Pietro della Valle's Della Musica dell' eta nostra, 1640, containing a good deal of information on music in 16th, and early 17th centuries (see G. B. Doni's works, vols. II-III); P. C. Fleischer's Kirche's Musurgia Universalis, 1656; Wolfgang C. Frantis's Beschreibung der Geburt, See- und Kirchen-Musices, in 4 vols., 1698—1700 (but it is a reprint, and it is not as yet a real history of music of the German nations; it is published in the 1749 edition of Printed Music in Leipsic.

The following is a list of the principal musical histories of later date:—Jacques Bonnet's Histoire de la musique anciennne; Charles Burney's General History of Music, 4 vols., 1776-89; Charles Fétis's Histoire de la Musique, in 3 vols., 1838; J. H. T. Schmitt's Histoire des Musiques, 3 vols., 1743; Olivier Leggiadro's De Musica eurynoe, etc., 1691; F. Busby's General History of Music, 2 vols., 1819; W. C. Stanford's History of Music, 1820-30 (52 vols. of Constable and Marson); Charles C. Southey's History of Music, 1826; Charles Burney's General History of Music, 4 vols., 1776-89; Charles Fétis's Histoire de la Musique, 3 vols., 1838, with the English version, A History of Music, 4 vols., 1843-47; Burney's General History, 1826; Castiglione's Dizionario Universale, 1788-1801; C. Kalkbrenner's Histoire de la Musique, 2 vols., 1820; Erich Wolfgang Korngold's History of Music, 2 vols., 1930; A. Busby's General History of Music, 2 vols., 1819; W. C. Stanford's History of Music, 1820-30; F. Busby's General History of Music, 1826-30 (52 vols. of Constable and Marson); Charles C. Southey's History of Music, 1826; Charles Burney's General History of Music, 4 vols., 1776-89; (in English translation, edited by Sel. D. Gore Ouseley; O. Fouque's La Revolutions des Musique, 1827, Langhans's Geschichte der Musik, 1828, etc., in Dutch; L. Nehl's Allgemeine Musikkgeschichte, 1835, popularly illustrated, 1882; Felix Clement's Geschichte der Musik (copiously illustrated, translated, 1885); G. A. Macfarren's Allgemeine Musikgeschichte, 1835, with contribution by W. Langhans, 1885; W. S. Rockstroh's General History of Music, 1886; Otto Wangerman's Grundriss der Musikgeschichte; R. Pohl's Musikalische Abhandlungen, 1885; Sir Hubert Parry's Art of Music, 1893, was included in the International Science Series in 1896, and here, as well as in the second (2nd ed., 1896), is the third (third ed., 1898), The Education of the Art of Music, by James E. Matthews's Handbook of Musical History and Bibliography, 1898, is the second (2nd ed., 1898) of the last two volumes, published as part of the same series, and published by the Clandon Press, and edited by W. H. Hadow. The first two volumes, of which the first only is published as yet (1898), deal with the earliest period, down to the revolution of 1600, and are by Professor Woolridge. Vol. III. The Seventeenth Century, is by Sir Hubert B. Parry, Vol. IV. The Age of Bach and Handel, by J. A. Fuller Maitland. Vol. V. The
II. HISTORIES OF SEPARATE COUNTRIES

(a) AFRICA.—M. Villotoue's De l'Etat actuel de l'art musical en Egypte, 1812; see also articles in Conté and Jouannard's La Description de l'Egypte, 1808-28.

(b) ASIA.

3. HEBREW.—The first important work on this subject, Solomon van Tilt's Digii, Sang, en Speeltalon ... des Hebreeuws, was written in Dutch (1622-1728). Othw. writers, are August F. Pfeiffer's Uber die Musik der alten Hebräer, 1779, and Sir J. Stainer's Music of the Bible, 1879.

5. PERSIAN.—Sir W. Ouseley's Persian Miscellanies, 1791, and Oriental Collections, 1797.

(c) BRITISH ISLES.

1. BRITISH ISLES.

England.—We have had many writers on music, from Thomas Morley downwards, and even historians of music, such as Burney, Hawkins, and in modern times William Chappell and others, but few historians of note have yet thought it worth while to write a history of English music following are some of the best works relating to it:—J. Parry and C. Williams's Ancient British Music, 1742; Joseph Ritson's Collection of English Songs, with an Historical Essay on National Songs, 1784; Richard Hooper's Music and Musicians, especially English, to the days of Purcell, 1853; William Chappell's Popular Music of the Olden Time, 2 vols., 1841; Richard C. D. Birch's Music of the Musical Instruments of Southern India and the Deccan, 1901.

3. OPERA AND MUSICAL DRAMA.—Histories of this branch of Music were very numerous in France during the 19th century; a list of the best is subjoined:—M. Gaztli-Biasso's Histoire de l'Opéra en France, 1833; J. F. Chouquet's Histoire de la Musique Dramatique en France, 1873; Jacques Herrmann's La Drame Lyrique en France, 1873; E. G. Hooper's Les Opéra de l'Ancien Régime, etc., 3 vols., 1881; A. Poujade's Les Oeuvres de l'Opéra français, 1881; M. Dietz's Geschichte der musikalischen Dramen in Frankreich, 1885; H. M. Schletterer's Geschichte der deutschen und der französischen Oper, 1885; C. Nütter and E. Thoan's Les Origines de l'Opéra français, 1886. A valuable series of works was begun by Adolphe Julien, and the Lajarte's Catalogue is indispensable. (See both names.) Pronkows, etc.—E. C. Poiniot's Éssais sur les Musicales, Bourguignons, 1844; Mie. E. Chippin de Gernigley's De l'Etat de la Musique en Normandie, 1857. For music and Lorraine see Germany.

3. GERMANY, AUSTRIA, ETC.

General History.—Out of all the musical historians and writers whom the Fatherland has produced, from Calvisius down to Forkel, there are scarcely any general histories of German Music. The best works on the subject are:—J. Schröter's Geschichte der Musik in Deutschland, etc., 1773; F. H. von der Hagen's Minnesinger, etc., 1838; C. E. F. Wackernagel's Das Deutsche Künstlerleben bis zur Gegenwart, etc., 1874; Johannes Meyer's Betrachtungen über die Deutsche Tonkunst im 18ten Jahrhundert; C. F. Becker's Die Musikwissenschaft in Deutschland im 19ten Jahrhundert, 1894; Emil Naumann's Die deutsche Tonkunst, 1871; A. Reissmann's Illustrirte Geschichte der Deutschen Musik, 1851; Melanopsis, Deutsche Tonkunst im 18-19. Jahrh., 1893; F. Chotey's Modern German Music, 2 vols., 1854. Vollkund, etc.—R. von Lilienbro's Die historische Vollkunde der Deutschen vom 13ten bis zum 14ten Jahrhundert, 1865-69; F. M. Boëschen's Alte deutsche Liederbuch aus dem 16ten bis zum 17ten Jahrhundert, 1876; E. O. Lindner's Geschichte des Deutschen Liedes im XVII. Jahrhundert, 1871; E. Pape's Geschichte der 'Lied', 1858; 'Talby's Geschichte der Musik in Deutschland, 1874; A. Reissmann's Geschichte der deutschen Lieder, 1874; A. Sauer's Robert Franz und das deutsche Vollkund, 1875; B. Eitner's Das deutsche Lied, etc., 1876, 1888.

Opera, etc.—Schneider's Geschichte des Oper und der Kgl. Opernhaus zu Berlin, 1832; E. O. Lindner's Das erste standende Deutsche Oper, 1855; H. M. Schletterer's Das Deutsche Kunstmahl, 1853; Chrysander's Untersuchungen über die deutsche Oper, 1883.

Pronkows, etc.—J. F. Lobstein's Beiträge zur Geschichte der Musik in Elsass, 1840; A. Jacquots La Musique et Lorraine, 1842; J. Sittard's Kritische Richtschau über das deutsche und französische Musiktheater und Konzertwesen in Hamburg, 1899; Geschichte der Oper am Hof zu Stuttgart, 1890-91; A. Sandberg, Beiträge zur Geschichte der besagten Hafkapelle
in the absence of musical histories of this country by early Greek writers, we may mention, as works useful to the student of history, Henrici's Geschicht der Musik, 1831, 2 vols. 1811-21, and Plutarch's work already alluded to, which is interesting as the only surviving work of that time on the history of Greek music. Other works on this subject are:—L. Perot's Exposition de la Semiméthode, ou Notation Musicale des Grèces, 1815; F. von Driesberg's Die Musik der Griechen, 1819; Friedrich Bellemann's Die Musikgeschichte der griechischen Cultur, 1837, 2 vols.; Fortlage's Das musikalische System der Griechen, 1847. A. J. H. Vincent's De La Musique des Anciens Grèces, 1854; C. F. Weitzmann's Geschicht der hochschulischen Musik, 1855; Oscar Paul's Die Absolute Harmonik der Griechen, 1866; Marquard's Harmonische Fragmente des Aristoc- ratis, 1868; Johannes Tartz's Über die altgriechische Musik der Musen, 1869; P. Carli's Storia della Musica Antichissima, 1853; and Aristotle von Torell, 1895; R. G. Kiesewetter's Über die Musik der neuen Griechen, etc., 1850; Donizetti's Modède l'ancien et le moderne Gréco, 1854; and H. S. Macra's Harmonik der Aristocraten, 1892. (See under Greek Music.)

Hovius, Y. L. Die Zigeuner und Ihre Musik in Ungarn, 1888. See also appendix to K. Abranyi's Alttalános Zene története, 1885.

General History.—The excellent writings of Pietro della Valle and Padre Martini were not confined to the music of their own country; the principal works on Italian music are:—Peter J. Grouley's Nouvelles Études ..., sur l'Italie, 1764-74, which was thought so highly of that a German edition appeared at Leipzig, 1848; Oscar Paul's Die Musik in Italien, 1850; R. de Junod's Histoire de la Musique de l'Italie, 2 vols. 1880-82; A. Perrotti's Stato attuale della musica Italiana, 1812; Cusin, F. van Eleyck's De L'élément de la Musique en Italie, 1875; Giov. Matteo Mastruzza's Storia della musica Italiana del nostro secolo, 1850 (2nd edition); R. A. Streett's History of Italian Music, 1895; and A. Melchiori's Storia della musica d'Italia, 2 vols. 1783-90. Steger. Artega's well-written work La Rivoluzione del Teatro Musicale Italiano, 3 vols. 1773-92, 1792, 1800.

Netherlands.

Besides being rich in native musical writers and historians of General Music, such as Grétry, Petis, Consensiene, there can be no more work devoted exclusively to its own musical history than perhaps any other country. The best are:—J. P. N. Land's Geschichte der Musik der Niederlande, 1870; E. van der Stein's Histori der der Musik der Nijderlanden, 1882; E. C. J. Gregor's Essai historique sur la Musique et les Musiciens des Pays-Bas, 1855; E. Blauroich's Blauroich's Biographie des Artistes-Musiciens Néerlandais des 18th et 19th Siècles, 1869; Historique de la Formation et des Euteurs d'Orgue, 1869; and L'Art Musical en Belgique sous ... Léopold I, et II., 1879; A. Samuel's L'histoire de la Musique des Musiciens Belges depuis 1820, 1881.

III. MUSICAL INSTRUMENTS

(b) Keyed Instruments.

JOHANNES HAGENS. The history of this instrument has been written by musical historians of most of the northern races. As instances we may cite—J. C. Mittag's Internationaler Musikalischer Arbeitsbegriff, 1864; A. Dubois de Celles L'Art du Facteur d'Orgue, 1766-1779, with a fourth part, 1793; J. J. Sponer's Organhistorie, 1771; Joseph Amyot's Die Orgel, 1832; E. J. Hopkins's The History and Construction of the English Pipe Organ, 1874; E. F. Himslanzi's Die Orgel, 1855-70; X. van Eleyck's Geschichte der Orgel, C. L. Lindberg's Handbook of羽 Organ, 1891.
IV. SPECIAL SUBJECTS.

(a) Church Music.—In the subjoined list it has not been thought necessary to include all the innumerable treatises on Plain-Song. The following works have been selected as throwing most light on the subject:—

(b) Dance Music.—John Payford's English Dancing Master, 1600, might be regarded as a regular History of dancing. But, for an Essay towards the History of Dancing, 1713, the best histories, however, of Dance Music are by Frenchmen. Of these we have La Cahuès's danse, 1713; de Cahuzac's Histoire des danses, 3 vols. 1726; G. Compan's Histoire de la Danse, 1782; and C. Blasis Manuel Complet de la Danse, or the Code de Terpsichore, 1830; J. A. Lenoir de la Fage's Histoire de la Musique et de la Danse, 2 vols. 1844; F. Perrier's Histoire de la Musique et de la Danse, 1844; A. Czarwinski's Geschichte der Tanzkunst, etc., 1862, and Frey's Tanzkunst, 1879. Some of the latest works on this subject are: A. P. van Oevelen's Beiträge zur Geschichte der deutschen, F. L. Schubert and O. Ueugewitter having been the authors (in 1867 and 1888 respectively) of works bearing the title Die Tanzmusik; F. M. Löffme's Geschichte des Tanzens im Deutschland, etc., 1890.

(c) Gymn.—The only work of importance on this subject is Lichte's, alluded to above under Hungary; a French edition was published in 1859, and a Hungarian in 1861.

(d) Military Music has been treated of by very few authors; we need only instance F. C. Kastner's Les Chants de l'Armée française, with an Essai historique sur les Chants Militaires des Français, 1855, Albert Ferrin's Military Music, Military Bands, etc., 1862; and H. G. Warmer's Members of the Royal Artillery Band, 1894, an excellent book of its kind.

(e) National.—Works on this subject have been mentioned under the countries in which they are most relative; other general works are:—C. Engel's Introduction to the Study of National Music, 1866, and Literature of National Music, 1879; H. P. Chorley's National Music of the World, published in 1888-89 after the author's death.

(f) Notation.—A. J. H. Vincent's De la Notation Musique attribuée à Boëce, etc., 1855; Hughail's Erzählungs-Blätter (see Gerber's Scriptorium, vol. 1); G. Jacob's De Musicae Nota-Brata, etc., 1790; and G. Grubauer's De Musicae Notatione, 1791; J. Bellerman's Die Meßnoten und Taktzeichen des XIV. und XV. Jahrhunderts, 1793; A. J. Bally's De la Lettre des Lettres, etc., 1801; Abbé F. Rallari's Explication des Neumes, 1856 (2); A. Baumgartner's Geschichte der musikalischen Notation, 1856; and G. B. Reinhard's Studien zur Geschicht der Musiknoten, 1787, and Die Entwicklung unserer Notenschrift, 1789, etc., I. David and M. Lussey's Histoire de la Notation Musicale, 1856; J. B. J. Rob's Traité de la Musique, 1858; C. F. Abdy's Will's Story of Notation, 1862.

The most important work in this department is Johann Wolf's Geschichte der Musiknoten, 1250-1460 (1894).

(g) Opera and Oratorio. —We have already written on this branch of music we select the following:

—G. B. Doni's Trattato della Musica Scena (see the 1783 edition of his works); Claude P. Mengel's Description représentation sur musique anciennes et modernes, 1882; and J. Mathessen's Die Neueste Untersuchung der Singspiele, 1744; G. Schiavon's Handbuch der Oper, in two parts,
HOBBS

(2) The Orestoire.—C. H. Bitter's Untersuchungen zur Geschichte des Oratoriums, 1872; Otto Wangelmann's Geschichte des Oratoriums, 1882; Dr. Annie Patterson's Story of Oratorio, 1902.

(k) Sonata.—J. S. Shedlock's The Pianoforte Sonata, 1855.

(2) H. Riemann's Geschichte des Musiktheorie, in 9 his 20er-Jahre, 1898.

For further information see the articles on Dictionaries, Song, Violin, etc. in this work, and similar articles in Mendel and Reissmann's Musik-Lexikon. J. N. Forkel's Allgemeine Literatur der Musik may also be consulted with advantage for early works on the history of music.

A. H. HOBBS, John William, was born August 1, 1799, at Henley-on-Thames, where his father was bandmaster of a volunteer corps. He sang in public at the early age of three years, and at five was admitted a chorister of Canterbury Cathedral, of which his father was a lay vicar. The beauty of his voice attracting the attention of John Jeremiah Goss, the alto singer and singing master, young Hobbs was articled to him. He appeared as principal singer at a Musical Festival at Norwich in 1813. On arriving at manhood his voice had developed into a tenor of limited compass, but of remarkable purity and sweetness. He became a member of the choirs of King's, Trinity and St. John's, Cambridge, and afterwards of that of St. George's Chapel, Windsor, of which his father was already a member. In 1827 he was appointed a gentleman of the Chapel Royal, and in 1836 a lay vicar of Westminster Abbey. Hobbs long held a prominent position as a concert-singer. His singing was distinguished by taste, refinement, and expression. He was the composer of a very large number of songs, several of which gained prizes from the Melodists' Club, and many were highly popular, especially 'When Delia sings,' 'Phillis is my only Joy,' 'My Ancestors were Englishmen,' and 'The Captive Greek Girl.' He died at Croydon, Jan. 12, 1877.

HOBRECHT. [See Oberbrecht.]

Hochschule (Berlin), The Königliche Hochschule für Musik, or the Royal High School for Music at Berlin, was established in its present form in 1875, on the reorganisation of the Royal Academy of Arts. It was formed by the amalgamation of two distinct bodies. The first of these, which constitutes the 'Abtheilung für musikalische Composition' of the present School, was founded in March 1833. In 1869 the 'Abtheilung für ausübende Tonkunst' (consisting only of instrumental classes for violin, violoncello, and piano) was added under the direction of Professor Joachim. In 1871 an Organ class, in 1872 classes for Brass Instruments, Double Bass, and Solo Vocalists, and in 1875 a Choral class were added; and in 1874 a full chorus was organised: the 'A Capella' choir of the school has attained great renown in the performance of works by Bach and others. The High School thus consists of two departments. The first of these is devoted solely to instruction in Composition. The second department is devoted to executive music, and is under the direction of Professor Joachim. There are thirty-six professors, and instruction is given in the violin, violoncello, quartet playing, pianoforte (both as a principal and a secondary subject), playing from score, organ, double bass, flute, oboe, clarinet, bassoon, horn, trumpet, ensemble playing, solo playing with orchestral accompaniment, orchestral playing, solo singing, part singing, choral singing, training choruses, theory of vocal instruction, declamation and acting, Italian, pianoforte (with regard to vocal music), theory, and history. The number of pupils in 1901 was 288. This division receives from the State a grant of 149,568 marks (£7493). The receipts are estimated at 41,780 marks (£2088), so that the institution costs the State about £5400. One-fifth of the number of pupils receive free instruction, awarded according to progress, or talent, and a yearly sum of 1200 marks is devoted to the assistance of needy and deserving pupils. The orchestra consists of seventy or eighty performers, amongst whom are ten professional leaders, each with a salary of 500 marks (£30). Since 1872 the pupils of the Hochschule have given three or four public concerts every year, and since 1876 operatic performances have been given by the pupils on an average three or four times in the year. In 1902 a new building in Pfanenstrasse, Charlottenburg, was opened with much ceremony.

W. H. S.

Hochzeit des Camacho, Die (The Wedding of Camacho). A comic opera in two acts; words by Klingemann, after Don Quixote; music by Mendelssohn (op. 10); score dated August 10, 1825. Produced in the small theatre, Berlin, April 29, 1827, and not performed a second time. The music was
published in PF. score by Lane of Berlin. [See Mendelssohn.]

HOCKET. A term which occurs in old English writers on music, beginning with De Handlo (1326), for passages which were truncated or mangled, or a combination of notes and pauses. The term puzzles Sir John Hawkins (Hist. chap. 53), but it is certainly a corruption of *hocket*, a hiccup. [Professor Wooldridge (Oxford Hist. of Mus. vol. i. p. 250) defines it as a sudden hiatus in the voice governed by the rhetorical mode of the passage. In modes consisting of longs and breves either the long or the breve is omitted in the *hocket* from its proper situation, and... for the sake of continuity, the hiatus created in one voice is filled by another. See also Ochetto.]

HODGES, Edward, Mus.D., born July 20, 1796, at Bristol, was organist of Clifton Church, and afterwards of the churches of St. James (from 1819) and St. Nicholas (from 1821), Bristol. At the age of fifteen he developed remarkable inventive faculties, and some of his projects have since been adopted in different branches of mechanical science. Connected with music were improvements in organ bellows, etc., and, more important than all, the introduction of the C compass into England is claimed for him. The new organ in St. James's church, remodelled under his direction, and opened 1824, contained the first CC manual, and CCC pedal made in England. He produced a Morning and Evening Service and two Anthems on the reopening of St. James's organ, May 2, 1824, and published them in 1825. He obtained his doctor's degree at Cambridge in 1825. He was a contributor to The Quarterly Musical Magazine, and The Musical World. In 1838 he quitted England for America, was appointed organist of the cathedral of Toronto, and in the following year became director of the music of Trinity Parish, New York, taking the duty at St. John's while the new Trinity Church was being built. He published An Essay on the Cultivation of Church Music at New York in 1841. On the opening of Trinity Church, New York, May 21, 1846, (the organ in which had been built from his specifications), Dr. Hodges quitted St. John's to become its organist. He composed church music, published in New York and London. During his long residence in America he was much esteemed for his performance on the organ. Illness obliged him to give up duty in 1859, and in 1863 he returned to England, and died at Clifton, Sept. 1, 1867. Besides the contributions to musical literature mentioned above, he wrote many pamphlets, etc., on musical and other subjects. He was an excellent contrapuntist, and possessed a remarkable gift of improvisation, and especially of extempore fugue-playing. His church compositions are numerous and elaborate. They comprise a Morning and Evening Service in C, with two anthems, a full service in F, and another in E, Psalm cxii., etc. (all published by Novello), besides many MS. compositions, and occasional anthems for various royal funerals, etc. His daughter, Faustina Hasse Hodges, organist in Brooklyn, and subsequently of two churches in Philadelphia, composed some songs and instrumental pieces. [She died in New York in 1895, and in 1896 her memoir of her father appeared in New York and London.] His son Rev. John Sebastian Bach Hodges, D.D., Rector of St. Paul's Church, Baltimore, is an excellent organist.

HODSOLL, William, a London music-seller and publisher who first worked in 1794, at Sevenoaks, Kent, and succeeded shortly before 1800 to the business established by John Bland (q.v.) at 45 High Holborn, then in the hands of Francis Linley (q.v.) Hodsoll published sheet music, country-dances, and other collections, and held the business until about 1831, when it was taken over by Zenas T. Purday, noted for his great issue of the comic songs of his period.

HOEY, James, a famous Dublin printer of the first half of the 18th century. In 1728 he issued the 'Beggar's Opera,' and in 1742 published the word-book of the 'Messiah.' In 1749 he printed a book of songs with symphonies and thorough-bass, by Lampe, then residing in Dublin, and some pieces by Pasquale. His address was the sign of the 'Mercury in Skinner Row.' James Hoey died in 1773 in extreme old age.

HOFMANN, Richard, a pianist, teacher, and composer of English birth and European training; but for over half a century intimately associated with the best musical activities of New York. He was born in Manchester, May 24, 1831, and studied at various periods with his father, Leopold de Meyer, Pleyel, Moscheles, Rubinstein, Dohler, and Liszt. He was sixteen years old when he went to New York in 1847, and a year later embarked on his first concert tour with Joseph Burke, a precocious Irish lad, who was both actor and violinist. Meanwhile he had introduced himself to New York as a pianist, effecting his début at a concert of the Philharmonic Society on Nov. 27, 1847, with Mendelssohn's Concerto in G minor. He played again the next season, and in March 1854 gave the society's patrons their first opportunity to hear Chopin's Concerto in E minor. He had spent some of the intervening time on a concert tour with Jenny Lind, and stood so high with the musicians of the city that the Philharmonic Society now elected him an Honorary Member. His name figures on the society's programmes for sixteen seasons, and forty-five years after his first appearance in New York, at the age of sixty-one, he took part in the concert with which the Philharmonic celebrated the fiftieth anniversary of its foundation. Ten years later he was still interested in his profession,
though enjoying well-deserved ease and comfort, sweetened and dignified by the affectionate admiration of hundreds of former pupils. Mr. Hoffmann composed and published many piano-forte pieces of the brilliant kind in vogue in his early period, including an excursion into the field of folk-music in the shape of some Cuban Dances.

H. E. K.

HOFFMANN, ERNST THEODOR WILHELM, a man of genius, and an extraordinarily clever and eccentric musician and littérature, who though a voluminous composer will not live by his compositions so much as by some other productions of his pen. He was born at Köppenesg, Jan. 24, 1776; learned music and law at the same time, and bid fair to rise in the official world; but an irreparable loss of caricaturing put an end to such solid prospects and drove him to music as his main pursuit. [His music to Goethe's 'Scherz, List, und Rache' was given at Posen in 1801, and three other compositions in the department of incidental music are mentioned in Riemann's Lexikon. His operas include 'Der Kanonikus von Mailand' (1805), 'Scharüe und Blume' (1805, to his own libretto), 'Der Trank der Unsterblichkeit' (Bamberg, 1808), 'Das Gespenst' (1809), 'Aurora' (1811), and 'Undine' (Berlin, 1816). One act of another, 'Julius Sabinus,' was unfinished at his death, as well as a ballet, 'Harlekin.' His first musical appointment was to the theatre at Bamberg in 1809, but it was a post without salary, on which he starved. It fortunately urged him to writing a set of papers in the character of 'Johannes Kreisler the Kapellmeister' for the Allgemeine musikalische Zeitung of Leipzig. They appeared at intervals from Sept. 26, 1810, and onwards, and in 1814 Hoffmann reprinted them with other essays in the same vein in two volumes as Fantastiette in Callòde's Manier, with a preface by Jean Paul, in whose style they are couched. Among the most interesting, and at the same time most practically valuable, are the essay on Beethoven's instrumental music—far in advance of the day—another on Gluck, and a third on 'Don Giovanni.' The essays, which have often been reprinted, are all more or less humorous, some extremely so. They were followed by the Elixiere des Turfe, a novel (1815); Nachtstücke (1817), Scarroninsbrüder (4 vols. 1819-21); and by the Lebensansichten des Kater Murr, etc., or Views of Life of Murr the Tomcat, with fragments of the biography of Johann Kreisler, the Kapellmeister, from loose and spotted sheets. [Many single stories from the above have been translated into English in various periodicals; a version of the Scarroninsbrüder, as scrapy Brehm, by Major Alex. Ewing, appeared in 1886.] Schumann's admiration of these pieces may be inferred from his imitations of them in his Florestan and Eusebius, and his adoption of their nomenclature in the titles of his music. After the fall of Napoleon, Hoffmann again obtained official employment at Berlin, which he discharged with efficiency, and kept till his death at a Silesian bath on June 25, 1822, of gradual paralysis, after much suffering for four months. He was fantastic and odd in the greatest degree, much given to liquor and strange company, over which 'he wasted faculties which might have seasoned the nectar of the gods.' (Carlyle.) He sang, composed, criticised, taught, conducted, managed theatres, wrote both poetry and prose, painted—all equally well; and in fact could, and did, turn his hand to anything. The list of his works is extraordinary—eleven operas (MSS. in the Berlin Library) [see above], one of which ran for fourteen nights, incidental music for three plays, a ballet, a requiem, two symphonies, etc. etc.

Beethoven took the unusually spontaneous step of addressing him a letter (March 23, 1820). This probably led to a closer acquaintance, to judge from the canon in his letter to the Cäcilia (Nohl, No. 328)—

which it is difficult not to refer to him.

Hoffmann's devotion to Mozart led him to add Amadeus to his Christian names. Weber knew and loved him, and he died keenly regretted by many friends. Carlyle has translated his Gotthe Teg in German Romanes (vol. ii.), and gives a sketch of his life, which is also in the Miscellanei (vol. iii.). His life by Rochlitz is in Für Freunde d. Tonkunst, vol. i., and Hitzig's Aus Hoffmanns Leben, etc. (Berlin, 1822), contains an estimate of him as a musician by A. B. Marx.

HOFFMANN, GERARD, architect, born at Rastenberg, Nov. 11, 1690; composed sacred cantatas and church music; is credited by Walther with certain improvements in musical instruments—an additional key to the horizontal flute, making it easier to tune (1727); an additional key to the oboe, by which the G in both octaves was given much more correctly; a mechanical arrangement by which the whole four strings of the violin could be altered at once (a different pitch was then in use for church and chamber music); a new temperament for tuning instruments (1728); and for the organ (1733); and a gange for the strings of violins, bass-viol, lutes, and other stringed instruments.

M. C. C.

HOFFMANN, HEINRICH AUGUST, surnamed 'von Fallersleben' from his birthplace in Hanover, born April 2, 1798, philologist, poet, and German hymn writer; was educated at Helmstedt, Brunswick, and (under Grimm) at the University of Göttingen (1816). In 1819 he removed to Bonn, and in 1821, after studying Dutch literature in Holland, was appointed in
1835 professor at Breslau. His political views caused his dismissal in 1843, and he was not allowed to return to Prussia till 1848. Finally he became librarian to Prince Lippe at Corvey in Westphalia, and there died Jan. 19, 1874. His Geschichte des Deutschen Kirchenliedes (1st ed. 1832; 2nd 1854; Rumpfer, Hanover) is written in a thoroughly scientific spirit, and contains important discoveries. He edited Schlesische Volkslieder mit Melodien (1842), and Deutsche Gesellschaftslieder des 16. und 17. Jahrhunderts (1844). His original melodies, and above all his poems for children (Kinderlieder, 1843), are widely and deservedly popular.

Hoffmann, Karl. See Bohemian String Quartet.

Hoffmeister, Franz Anton, born at Rothenburg on the Neckar, 1754; studied law at Vienna, began his musical life as a Church-Capellmeister, and in 1783 opened a book, art, and music business there. This he threw up in 1798 with the intention of going to London. He, however, got no farther than Leipzig, remained there, and in Dec. 1800, in conjunction with Ambrosius Kühnel, founded the well-known 'Bureau de Musique,' which still flourishes more than ever. [Peters.] On Jan. 2, 1805, he again relinquished his business, returned to Vienna, devoted himself to composition, and died Feb. 10, 1812. Hoffmeister was an extraordinarily prolific writer; he left 350 pieces of all dimensions for the flute alone; 120 for strings; symphonies and nocturnes for full orchestra; pieces for wind band and for clavier; songs; church music; and nine operas—all light and pleasing, and much relished by dilettanti. [See the Quellen-Lexikon.] The early publications of his firm were very coarsely engraved, as, for instance, Haydn's overture in D and quartet in D minor (known as op. 8), also Mozart's PF. quartets in G minor and E flat, which promised to be the beginning of a long series, but on Hoffmeister's allegation that they were too obscure for the public, Mozart cancelled the contract, though applying to Hoffmeister when in want of money shortly afterwards. [He started a subscription in 1801 for the publication of Bach's works.] The nature of Beethoven's relations with him is shown by his letters of 1800 and 1801, in which he offers his opp. 19, 20, 21, 22, to his 'liebtesten Herrn Bruder'.

Hofhaimer (Hoffheimer), Paul, born Jan. 25, 1459, at Radstadt in the territory of the Archbishop of Salzburg, became, apparently without much special instruction, one of the most distinguished organ players of his time. He entered first the service of Archduke Sigismund of Tyrol, but afterwards betook himself to the court of the Emperor Maximilian I. He was in high favour with the Emperor, and frequently accompanied him on his journeys. There is some uncertainty as to the precise dates of his appointments, but from 1480 to 1519 his chief place of abode would seem to have been Innsbruck, where the Emperor had his regular chapel with Hofhaimer as organist. In 1515, on the occasion of a solemn Te Deum sung in St. Stephen's Church, Vienna, when Hofhaimer played the organ in the presence of three crowned heads, he, at the Emperor's request, created a Knight of the Golden Star by King Ladislaus of Hungary, and was raised to the rank of nobility by the Emperor himself. After the Emperor's death in 1519 he would seem to have returned to Salzburg, where from 1526 to his own death in 1539 he was in the service of the Archbishop as Cathedral organist. It was chiefly as an organ player that Hofhaimer acquired fame in his lifetime and was celebrated by his contemporaries. Ottmar Luscinus praises his playing in the highest terms, describing it as full of warmth and power, uniting the most wonderful finger-skill with a majestic flow of harmony previously unsurpassed. But of his organ compositions little if anything remains. In a MS. of song compositions by Isaac, Senfl, and others, now in the Imperial Library, Vienna, Ambros was fortunate enough to discover a piece with Hofhaimer's name, which appeared to be a three-part organ fantasia upon a song, 'On freund verzehr ich manchentag.' Kitter in his Geschichte des Orgelspiels (p. 97), where the piece is reproduced (n. 58), confirms the judgment of Ambros as to its being really an organ piece, and considers that it alone suffices to give Hofhaimer his place as a master of the organ beside Arnold Schlick, who, if he surpasses Hofhaimer in the invention of florid passages for the organ, is inferior to him as a harmonist. But it is chiefly as the composer of simple four-part German songs that Hofhaimer is now known to us. Eitner is able to reckon up fifteen songs as certainly by Hofhaimer, but many more by him may be hidden among the anonymous works in the various collections of the time. Five of them are found without name in Oedl's Liederbuch, 1512 (see the reprint by Eitner, 1880). Several others besides these are to be met with in Forster's Liederbuch, 1538. Kade in the Noten-Beilagen zu Ambros has reprinted three from Forster, one of which is the same as in Oedl. These songs, as Eitner says, are distinguished by a rare tenderness of feeling and unusual loveliness of expression. They are written for the most part in very simple four-part harmony, without much contrapuntal elaboration. In the Münchobste, xxv. p. 191, Eitner gives a specimen of Hofhaimer's different contrapuntal treatment of a three-part song. In one of the four-part songs reprinted by Kade, ('Meins trauern ist') Ambros calls attention to the remarkable resemblance to the melody of the well-known chorale, 'Aus tiefer Noth.' Another work of Hofhaimer's to be noticed is his Harmonie Poeticae, sive carmina nonnulla Horatii, 4 voc., published at Nuremberg in 1539.
This work consists of forty-four simple harmonic settings (thirty-five by Hofhaimer, nine by Senfl) of Odes of Horace in strict accordance with the rules of Latin prosody. The idea of writing music in strict accordance with the rules of metre was one of the fruits of the classical humanism of the time, and had considerable influence in helping forward the movement in favour of homophonic music, as also on the development of the simple note-for-note setting of the Protestant Chorale. These settings of the Horatian Odes have been reprinted in recent times.

HOFMANN, HEINRICH KARL JOHANN, born Jan. 13, 1812, in Berlin, was a chorister in the Domechor at nine years old, and at fifteen entered Kullak's academy, studying the piano with that master, and composition under Dohn and Witerst. For some years after leaving this institution he played in public and gave lessons. His earliest compositions were pianoforte pieces, but he first came before the public as a composer with his comic opera, 'Cartouche,' op. 7, produced 1869, and performed successfully in several places. In 1875 the production of his 'Hungarian Suite,' op. 16, for orchestra, obtained such renown that he determined to devote himself thenceforth to composition alone. In the next year his 'Frithiof' symphony, op. 22, was brought out with extraordinary success at one of Bilse's concerts in Berlin, and rapidly became known all over Germany; in 1875 his cantata, 'Die schonen Melusine,' op. 30, gained a similar success, and from that time onwards he held a position equalled, in respect of immediate popularity, by scarcely any living composer. As in many other cases, this ephemeral popularity led to almost complete oblivion on the part of the musical public of Germany, even before his death, which took place on July 16, 1902. In 1852 he was made a member of the Berlin Academy. Besides the works mentioned, the following are the most important of his productions.—'Nornengesang,' for solos, female chorus, and orchestra, op. 21; two orchestral suites, op. 16 and 68; string sextet, op. 25; violoncello concerto, op. 31; trio, op. 18; quartet, for piano and strings; an octet, op. 50; cantatas, 'Aschenbrodel,' 'Editha,' 'Prometheus,' 'Waldfräulein,' and 'Festgesang,' op. 74; the operas 'Der Matalor,' 1872, 'Armin' (produced at Dresden 1877), 'Aennchen von Tharau,' 1878, 'Wilhelm von Oranien' (three acts, op. 56), 1882, the words of the first two by Felix Dahn, and 'Donna Diana' (op. 75, Berlin, Nov. 13, 1886). Among his later compositions are a Liederspiel (op. 84) for solo quartet with PF. accompaniment, entitled 'Leuz und Liebe,' a set of songs for baritone and orchestra, 'Die Lieder des Troubadours Raoul' (op. 89), and 'Harald's Bravtahrt' for baritone solo, male chorus, and orchestra (op. 99), 'Johanna von Orleans,' 'Nordische Meerfahrt,' etc. An orchestral suite, 'Im Schlosshof,' is op. 78, a serenade for strings and flute, op. 65, serenade for strings, op. 72, concerto-stuck for flute, op. 98, an orchestral scherzo, 'Irlichter und Kobolde,' op. 94. Many concerted vocal works, songs, duets, and pianoforte pieces have also been published.

HOFMANN, JOSEF, was born at Cracow in 1877. His father was a professor at the Warsaw Conservatoire and conductor of the Warsaw opera, his mother having been a distinguished singer. Till 1892 he studied the piano with his father, and then till 1894 he studied with Rubinstein, who declared him a boy such as the world of music had never before produced. At the early age of six he played in public, and when only nine made a tour of Germany, Denmark, Norway, Sweden, playing also in Vienna, Paris, and London. Whilst touring in America in 1887 he was overworked, giving fifty-two concerts in two and a half months, which caused great indignation, and ended in the Society for Prevention of Cruelty to Children taking the matter up, his health having given way under the strain. After six years' rest in Berlin, he reappeared stronger, more mature, and more musical, making his debut in Dresden in 1894, and in 1898 made a successful tour in America. He played in London as a mature artist in 1903. He has been summed up by an eminent critic as an astonishingly individual artist, and has been classed as one of the group of pianists that concerns itself with the orchestral development of piano tone. He has also composed for the pianoforte.
influences at work; for his artistic instinct was sure even where his knowledge was limited. These works are Musical History, Biography, and Criticism, 1855; Memoirs of the Musical Drama, 1888; a revised edition of the same, called Memoirs of the Opera, 1851; The Birmingham Festival, 1855; and The Philharmonic Society, from its foundation in 1813 to its 50th year in 1863, a history he was well qualified to undertake, owing to his connection with the Society as secretary from 1850 to 1864. Other literary works are mentioned in the Dict. of Nat. BioL His musical compositions comprise ballads, glee, and editions of standard English songs.

Hogarth died on Feb. 12, 1870, in his eighty-seventh year, and was buried in Kensal Green Cemetery.

L. M. M.

HOLBORNE, ANTONY and WILLIAM. There was published in 1597 a work bearing the title of 'The Cittharn Schoole, by Antony Holborne, Gentleman, and servant to her most excellent Majesty.' Hereunto are added sixe short Aers Neapolitan like to three voyces, without the Instrument: done by his brother, William Holborne.' It is dedicated to Thomas, Lord Burgh, Baron Gainsburgh. In the Preface the author says he was induced to publish these early works in consequence of some stranger having put forth corrupt copies of them. 'The Cittharn Schoole' contains thirty-two pieces (preludes, pavans, galliards, popular song tunes, etc.) for the cittharn alone, in tablature; twenty-three others for the cittharn with an accompaniment, in ordinary notation, for bass viol; and two more for the cittharn, with accompaniments for treble, tenor and bass viols. The six 'Aers' by William Holborne are stated to be 'the first frutes of Composition' done by him. The second of them speaks of 'Bonny Boots' as dead, agreeing in that respect with one of Morley's 'Canzonets,' or, Little Short Aers to five and sixe voices,' published in the same year. 'The Cittharn Schoole' was unnoticed prior to 1847, when Dr. Rimbaud partially described it in his Bibliotheca Musigraliana, from a copy, presumably unique, then in his possession, but now in the library of the Royal College of Music. [Music by Antony Holborne is also in Dowland's Varietie of Lute Lessons (1610), and he is there called Gentleman Usher to Queen Elizabeth. A duet, 'My Heavy Sprite,' is in Dowland's Musical Banquet (1610), and commendatory verses by him are prefixed to Morley's Plaine and Enio Introd. (1595 and 1608), and to Farnaby's Canzonets, 1598.]

W. H. H.

HOLBROOKE, JOSEF (originally Joseph Holbrook), was born at Croydon on July 6, 1878. He studied at the Royal Academy of Music, his principal teachers being F. Corder for composition, and Frederick Westlake for the pianoforte. Since leaving the Academy in 1898 he has devoted himself entirely to composition and has come frequently before the public, principally as a composer of orchestral music of pronounced modern tendencies. His first important work to be performed was a tone poem entitled 'The Raven,' after Poe, played at the Crystal Palace Concerts in 1900. This was the first of a series of symphonic poems of unusual interest. It was followed by the 'Ode to Victory' (Byron), 'The Skeleton in Armour' (Longfellow), 'Uralume' (Poe), (London Symphony Concert, Nov. 28, 1904), 'Queen Mab' (Shakespeare), (Leeds Festival, 1904), and 'The Masque of the Red Death' (Poe). His other orchestral works include an overture entitled 'The New Renaissance,' and three fantastic sets of variations on the following popular melodies: 'Three Blind Mice,' 'The Girl I Left Behind Me,' and 'Auld Lang Syne.' Of his choral works the most important is his setting of 'The Bells,' which at the date of writing has not yet been performed. He has also written a large quantity of chamber music and some songs and smaller instrumental pieces. In these smaller forms it can scarcely be said that he is entirely successful, his methods adapting themselves only with difficulty to their narrow limits. Neither can it be said that he has as yet furnished evidence that he possesses the peculiar temperament that can find its expression through the medium of chamber music. His works in this branch almost invariably leave one with the impression that they could with advantage be scored for full orchestra. It is in his orchestral music that he has asserted himself as a thoroughly characteristic and independent member of the younger group of British composers. He possesses a vivid imagination of that type which is readily stimulated by the intensely tragic, and occasionally drifts into that debatable territory which divides the morbid from the grotesque. It is not without significance that so many of his works are based upon the writings of Edgar Allan Poe, and that these are to be reckoned the most successful. His orchestration, like his construction, is always bold and occasionally sensational. If at times it threatens to become turgid, the defect must be attributed to the impetuosity with which the effects are produced, nor is it out of keeping with most of the subjects illustrated.

E. E.

HOLCOMBE, HENRY, born about 1690, probably at Salisbury, where he was a chorister. He came to London while a boy, and sang in the Anglo-Italian operas at Drury Lane as Prenesto in 'Camilla' (1706, 1708), and the Page in 'Rosamond' (1707). On the breaking of his voice he left the stage and became a teacher of the harpsichord and singing, in which he was very successful. He died in London about 1750. Holcombe issued as op. 1 six solos for a violin in 1745, and about the same year published two collections of songs, viz. The Musical Medley; or, A Collection of English Songs and Cantatas set to Music,' and 'The Garland;
HOLDEN, Smollet. Dr. Petrie in his Ancient Music of Ireland, 1855, refers to him as 'the most eminent British composer of military music in his time.' He was the father of Dr. Francis Holden, who, with his sister, was instrumental in noting down many of the old Irish traditional airs. Smollet Holden kept a music shop at 26 Parliament Street, Dublin, at the end of the 18th century. He issued a valuable collection of Irish airs, many being printed for the first time. It is in two volumes folio, and is entitled A Collection of Old-Established Irish Slow and Quick Tunes, circa 1808-7. Other of his publications include A Selection of Masonic Songs, A Collection of Original Welsh Music, A Collection of (24) Quick and Slow Marches, and a collection of Irish melodies published periodically.

F. K.

HOLDER, JOSEPH WILLIAM, MUS.B., born in St. John's, Clerkenwell, in 1764, and educated in the Chapel Royal under Dr. Nares. After quitting the choir he became assistant to Reinhold, organist of St. George the Martyr, Queen Square. He next obtained the post of organist of St. Mary's Church, Bunsgay, which he held for many years, after which he removed to the neighbourhood of Chelmsford. He took his degree of Bachelor of Music at Oxford in Dec. 1792, his exercise being an anthem, the score of which is preserved in the Bodleian Library. Holder's compositions consist of a mass, anthems, glees (three collections published), canons, songs, and pianoforte pieces, including arrangements of many of Handel's choruses. Holder claimed descent by the father's side from Cardinal Wolsey. He died in 1852.

W. H.

HOLDER, REV. WILLIAM, D.D., born in Nottinghamshire in 1616, and educated at Pembroke Hall, Cambridge, became, in 1642, Rector of Bletchington, Oxfordshire. [He was incorporated M.A. at Oxford in 1643, collated to the third prebendal stall in Ely Cathedral in 1652, and installed there 1660. He was presented to the rectory of Northwold in Norfolk, and to that of Tidd St. Giles, in the Isle of Ely, in 1662. He was elected F.R.S. in 1655. He had succeeded in teaching a deaf-mute to speak, and he wrote a paper on the subject in Philosophical Transactions for May 1668, publishing his Elements of Speech, etc., in the following year. He was appointed a canon of St. Paul's in 1672.] He took the degree of Doctor of Divinity in 1660. On Sept. 2, 1674, he was sworn Sub-dean of the Chapel Royal, which office he resigned before Christmas 1659, and he was also Sub-almoner to the King. [In 1687 he was presented to the rectory of Therfield, Herts, and gave two bells to the church, besides making other improvements.] He was author of A Treatise on the Natural Grounds and Principles of Harmony, 1694; second edition 1731, a very able work, written chiefly for the service of the gentlemen of the Chapel Royal. An Evening Service in C and two anthems by him are in the Tudway Collection (Harl. MSS. 7338 & 7339). Dr. Holder died at Hertford, Jan. 24, 1697, and was buried in the undercroft of St. Paul's Cathedral. Holder married a sister of Sir Christopher Wren, and had a considerable share in his education. [Additions from Dict. of Nat. Bioy] W. H. H.

HOLE, William. It may be claimed that he was the first to engrave music in England. This was the celebrated work Parthenia, or the Mapledeanke of the First Musicke that ever was printed for the Virginals. Folio. The imprint says that it was 'engraven by William Hole for Dorethie Evans.' There is no date, but this has been fixed at 1611. Later editions were issued from the same plates. William Hole in 1613 engraved the Prinse Musichue neuere of Angelo Notari, and the portrait of Michael Drayton which is prefixed to the 1627 edition of his works.

Robert Hole of the same family engraved a companion work to Parthenia named Parthenia Taviolate, circa 1614. Of this work only one copy is known, which is in the hands of an American collector.

F. K.

HOLLANDER, Alexis, was born in Ratibor, in Silesia, on Feb. 26, 1840. He went to Breslau, where he was a pupil of Schnabel and Hesse, and conducted the Gymnasium scholar singing society. From 1858 to 1861 he studied in Berlin at the Royal Academy under Grell and A. W. Bach, and was also a private pupil of K. Bohmer. In 1861 he was appointed instructor at Kullak's Academy, and in 1870 conducted the Caecilienverein, being nominated professor in 1888. He has written several compositions for the piano, a suite for violin and piano, a pianoforte quintet, also songs, part songs, studies as a preparation for choral singing, besides editing a volume of Schumann's pianoforte pieces.

W. R. C.

HOLLANDER, Gustav, violinist, teacher,
and composer, was born in Leobschütz, in Upper Silesia, Feb. 15, 1855, and was taught the violin by his father, a physician, appearing in public as a prodigy when very young. From 1867 to 1869 he studied with David at Leipzig, and then went to Berlin, where he was for five years a pupil of Joachim. In 1875 he became the principal violin teacher at Kullak’s Academy, and was appointed Royal Chamber Musician, also making a successful tour with Carlotta Patti in Austria. From 1878 to 1881 he gave a series of subscription chamber concerts in Berlin, and in 1881 became leader of the Gürzenich orchestral concerts, and teacher at the Cologne Conservatorium. After Japha’s retirement he took the leadership of the Cologne string quartet, playing not only locally but in various continental towns with success. In 1884 he was leader of the Stadttheater orchestra, and in 1894 led the Professoriend Streichquartette, being in the same year appointed director of the Stern Conservatorium in Berlin, a post he still holds. In 1896 he was engaged as Concertmeister of a new orchestra in Hamburg, and has toured in Belgium, Holland, and Germany. Besides being an excellent violinist, he has composed several works for violin and piano, as well as arrangements, and more recently a small violin concerto for pupils. w. e. c.

HOLLÄNDER, Victor, is a younger brother of the above, and was born in Leobschütz in 1866, and studied with Kullak. In 1897 he became substitute director of the Stern Conservatorium, and in 1901 musical director of the Metropol Theater in Berlin. He has composed pieces for the piano and a one-act comic opera ‘Carmosinella,’ which was produced in Frankfort-am-Main in 1888, and another ‘The Bay of Morocco,' produced in London in 1894. w. e. c.

HOLLANDER, Benno, born in Amsterdam, June 8, 1853, first appeared as a violinist in London in the Hanover Square Rooms when quite a child. On the advice of Isodor Lotto, who was then playing at the Promenade Concerts at the time, the boy was sent to Paris to study at the Conservatoire with Massart. Here he had the good fortune to become acquainted with Berlioz during the last years of that master’s life, and had the advantage of hearing Wieniawski, from whom he learnt much, and of studying composition with Saint-Saëns. He carried off the first violin prize in 1873, and came to London in 1876 after a long tour in Sweden, Denmark, Russia, Germany, and France, where he made many successful appearances. At first, like so many young artists, he was much discouraged, but on Costa’s strong recommendation he remained in London composing and playing viola while waiting for more important engagements. He joined Auer’s quartet at the Musical Union, and played the viola frequently at the Popular Concerts. For the German Opera seasons of 1882 and 1884 he was leader of the orchestra under Richter, was appointed professor of the violin at the Guildhall School of Music in 1887, and was leader of the orchestra for HensCHEL during his seasons of London Symphony Concerts. The Wagner concerts conducted by Motti, Strauss, Weingartner, and Levi were ‘led’ by Hollander, and the practical experience he had gained of conducting bore excellent fruit in the establishment of an organisation of his own, called the (i.e. B.H.) Orchestral Society, which, after a preliminary experiment, began its regular work in the Kennington Town Hall in May 1903. By the conductor’s skill and enthusiasm, by the intrinsic interest of his programmes, and by the eminence of the soloists who have appeared at the concerts, they have already gained a high position among the less pretentions of London enterprises. Hollander’s compositions include two violin concertos with orchestra, a pastoral fantasia for the same (played by Ysaye at a Queen’s Hall Symphony Concert in Feb. 1900), an opera in German (MS.), ‘The Last Days of Pompeii,’ a septet for piano, strings, and two horns, two string quartets, a trio for two violins and viola, a trio for piano, violon, and violoncello, two sonatas for piano and violon, a sonata for piano solo, a symphony, ‘Roland,’ and two pieces for orchestra, ‘Drame’ and ‘Comédie,’ as well as numerous songs and violin solos. He was appointed court violinist to the late King of Holland.

HOLLANDER, Christian Janszon, from 1549 choir-master at St. Wallburg’s, Andenarde, became in 1559 singer in the imperial chapel at Vienna under the Emperors Ferdinand I. and Maximilian II. He died before 1570. A large number of motets by him are contained in the collections of the time, and especially in the Thesaurus of Journelli, 1568, from which Commer has reprinted twenty-five. The only other works of Hollander that appeared in print are (1) a collection of German songs, sacred and secular for four to eight voices (Munich, 1570), and (2) ‘Tricinia’ (Munich, 1573). From the former, Commer has reprinted two sacred songs for five voices, ‘O Herr durch deinen bittern Tod,’ ‘Allmächtiger Gott der du all’ ding erhaltst,’ and two secular songs for four voices, ‘Der Wein, der schmeckt,’ ‘Ach edles Bild.’ For a critical account of his motets, see Ambros’s Geschichte der Musik, Bd. iii.

HOLLINS, Alfred, born at Hull, Sept. 11, 1865, is a remarkable example of the attainment of great proficiency in spite of total blindness. He was taught by relatives until the age of nine, when he went to the Wilberforce Institution for the Blind at York, remaining there for three years, studying under the eldest brother of Sir Joseph Barnby. In Jan. 1878 he entered the Royal Normal College for the Blind at Upper Norwood, where the pianoforte
was his principal study under Frits Hartvigson. He was soon promoted to learn the organ with Dr. E. J. Hopkins, and it is remarkable that throughout his career he has maintained his skill equally on both instruments. He was quite a boy when he played Beethoven's E flat concerto at the Crystal Palace, under Mann's direction, and only sixteen when he played to Queen Victoria at Windsor. He went to Berlin to study with Hans von Bulow, and derived much benefit from the intercourse with that inspiring teacher. He played before the King and Queen of the Belgians at Brussels, and the Empress Frederick at Berlin, and was appointed to the post of organist at St. John's Church, Redhill, in 1884. In the Music and Inventions Exhibition of 1885 he appeared with great success as an organist, and in 1886 was taken by the principal of the Royal Normal College, Dr. F. J. Campbell, to America, with a quartet party of blind performers. A second visit to the United States was made in 1888; but before that Mr. Hollins had studied again in Germany at the Raff Conservatorium at Frankfort; and in 1886 he had appeared at one of the Popular Concerts, and in 1888 at the Philharmonic Concert, in Beethoven's E flat concerto. In 1888 he was appointed the first organist of the People's Palace, and organist of St. Andrew's Presbyterian Church, Upper Norwood. During his tenure of the latter post he was a professor of pianoforte and organ in the Royal Normal College. In 1897 he was appointed organist of Free St. George's Church, Edinburgh, where the organ was first introduced into that church. In August and September 1904 he gave a number of organ recitals in Australia, creating great enthusiasm by his wonderful skill. Mr. Hollins's compositions are marked by sound musicianship, and no little originality. They include some six anthems; a trio for female voices, to words by Kingsley; a few songs, some published; a romance for violin and piano; several piano solos; and a considerable number of organ pieces, among them two concert overtures and a triumphal march, written for the Sydney recitals. He is honorary Fellow of the Royal College of Organists.

It is often the case that the performances and works of blind musicians are felt to be wanting in what may be called vitality; in many notable instances a certain dryness of style has undoubtedly been noticed; but if a practical argument against the assumption that it is universally the case were wanted, none better could be given than both the playing and the compositions of Mr. Hollins, both of which are eloquent and vividly full of vigour and feeling. An excellent article on him appeared in the Musical Times for October 1901, from which much of the above information is taken.

M.

HOLMES, Alfred, born in London, Nov. 9, 1837, son of Thomas Holmes of Lincoln, a self-taught man, was at the age of seven initiated by his father in the practice of violin playing. With no other instruction than that of his parent and Spohr's 'Violin School,' he soon became distinguished, and especially noted for the performance of duets with his younger brother, Henry. At a later period their father made them study the classic French school of Rode, Baillot, and Kreutzer. When about ten years of age Alfred became principal soprano boy at the Oratory, then newly established in King William Street, Strand, in the building theretofore the Lowther Rooms, afterwards Toole's Theatre. On July 13, 1847, the two brothers made their first appearance in public at the Haymarket Theatre at the benefit of F. Webster, and played Auber's overture to 'Masaniello,' arranged as a violin duet. They were heard by Spohr about 1852, but did not again appear in public until 1863, in the summer of which year they played at a concert at the Beethoven Rooms, assisted by W. H. Webb, Piatti, and Lindsay Sloper. In 1865 they made their first visit to the continent and went to Brussels, where they remained for several months performing with great success. In 1866 they visited Wiesbaden, Frankfort, Darmstadt, Leipzig, Mayence, and Cassel [where Spohr paid them the compliment of dedicating his three grand duos to them]. In 1867 they went to Vienna; after that to Sweden, where they remained for two years, and then to Copenhagen in 1869 and Amsterdam in 1861, meeting everywhere with great success. In 1864 Alfred Holmes settled in Paris, where in 1866 he established a quartet party. In 1867 he made a tour in Belgium, Holland, Germany, and Russia. At St. Petersbourg he produced his 'Jeanne d'Arc,' symphony with solos and chorus, which was performed for the first time in England at the Crystal Palace, Feb. 27, 1875. Returning to Paris he gave some fragments of a symphony called 'The Youth of Shakespeare,' at one of the Concerts Populaires, and an opera 'Iuez de Castro,' was accepted, though never performed, at the Grand Opéra. He afterwards produced two symphonies entitled 'Robin Hood' and 'The Siege of Paris,' and composed two others under the names of 'Charles XII.' and 'Romeo and Juliet.' His overture 'The Cid,' was played at the Crystal Palace, Feb. 21, 1874, and another, 'The Muses,' after the composer's death, in London. He died, after a short illness, at Paris, March 4, 1876.

Henry Holmes, born in London, Nov. 7, 1839, was, like his brother, instructed solely by his father. In his boyhood he was also a chorister at the Oratory. After quitting his brother in Paris in 1865 he proceeded to Copenhagen and thence to Stockholm, where he remained some time, but ultimately returned to England and
settled in London, where he was highly esteemed as a solo violinist and quartet player. His principal compositions are four symphonies (No. 1, in A, performed at the Crystal Palace, Feb. 24, 1872), a concert overture, two quintets for stringed instruments, a violin concerto (in F, Crystal Palace, Dec. 11, 1875), many violin solos, two sacred cantatas for solo voices, chorus and orchestra, entitled 'Praise ye the Lord,' and 'Christmas,' and numerous songs. [A symphony, 'Boscastle,' was performed at one of the London Symphony Concerts in the spring of 1887. For some years from 1888 he gave chamber concerts under the title of Musical Evenings; he held the post of professor of the violin at the Royal College of Music from its foundation until his enforced resignation in 1894, since which time he has not appeared in public in England.]

W. H. H. Holmes (properly Holmes), Augusta Mary Anne, born in Paris, Dec. 16, 1847, of Irish parents, and naturalised in France in 1879, was, in fact, a composer of French music, for, being a member of the advanced school of Franck, she only wrote music to French words. Her parents were strongly opposed to her musical propensities, and she began her career as a prodigy, playing the piano at concerts and in drawing-rooms, and singing airs of her own composition signed with the nom de plume of Hermann Zenta. She studied harmony and counterpoint with H. Lambert, organist of the cathedral at Versailles, where she was then living, and received excellent advice as to instrumentation from Klosé, band-master of the Artillerie de la Garde Impériale, and professor of the clarinet in the Conservatoire. In reality, however, Mlle. Holmes, whose character was one of great independence, worked alone both at her musical and literary studies, for between the time of her début and her intimacy with M. Catulle Mendès she always wrote her own libretto; but in 1875 she became aware of the necessity for more serious studies under a master, and enrolled herself as a pupil of César Franck. With the exception of an opera, 'Héro et Léandre,' submitted to the directors of the Opéra Populaire, and of the Psalm 'In exitu,' performed by the Société Philharmonique in 1873, her compositions nearly all date from this time. After two years of serious study under Franck's direction, she produced at the Concerts du Châtelet (Jan. 14, 1877) an Andante Pastorale from a symphony on the subject of Orlando Furioso, and in the following year she gained a second place after Dubois and Gouard (bracketed together) at the musical competition instituted by the city of Paris. Her prize composition, a symphony entitled 'Lutèce,' was afterwards played at the concerts at Angers (Nov. 30, 1884). In 1880 Mlle. Holmes again entered the second competition opened by the city of Paris, and though she only gained an honourable mention she was fortunate enough to attract the attention of Pasdeloup, who performed the entire score of her work, 'Les Argonautes,' at the Concerts Populaires (April 24, 1881), and this unexpected test proved to be entirely to her credit, and to the discomfiture of Duvernoy, whose 'Tempesta' had been preferred to Mlle. Holmes's work by eleven judges against nine. On March 2, 1882, Mlle. Holmes produced at the Concerts Populaires a Poême Symphonique entitled 'Irlande'; another symphony, 'Pologne,' after its production at Angers, was played at the same concerts on Dec. 9, 1883; and a symphonic ode for chorus and orchestra with recitative, entitled 'Ludus pro patria,' was given on March 4, 1888, at the Concerts of the Conservatoire. The above, with a collection of songs called 'Les Sept Ivresses,' are the works by which Mlle. Holmes's vigors and far from effeminate talent may be judged. We see the influence of Wagner, but only in the general conception; we do not light upon whole bars and passages copied literally from him, such as are found in the case of some composers. Certain portions of Mlle. Holmes's work, as the opening of 'Irlande' (1885), her most complete work, and the third part of 'Les Argonautes,' although they contain serious faults in proosity and in the union between the words and the music, are nevertheless creations of great worth, evincing by turns a charming tenderness, ardent passion, and masculine spirit. It is true that the author did not always measure her effects; she gave rather too much prominence to the brass instruments, and in seeking for orginality and grandeur she was sometimes affected and pompous; but this exuberance was at least a sign of an artistic temperament, and of a composer who had something to say and tried to give it a fitting expression. This virtue, rare enough amongst men, is exceptional in women, and is therefore worthy of the highest praise. [An 'Ode triomphale,' for solos, choir, and orchestra, was played at the Paris Exhibition of 1889; a 'Hymne à la Paix,' for the same, at Florence in May 1890, at the fêtes in honour of Dante; and 'Au pays bien,' a symphonic suite, was played in 1891. Her four-act opera, 'La Montagne noire,' was produced at the Grand Opéra in Paris, Feb. 8, 1893, and had a considerable success. Two more operas, 'Astarte,' and 'Lancelot du Lac,' remain in MS. She died in Paris, Jan. 28, 1903. On July 13, 1904, a monument to her memory was unveiled in the St. Louis Cemetery, Versailles. C. F.]

A. J. Holmes, Edward, born in 1797, schoolfellow and friend of Keats, was educated for the musical profession under V. Novello, and became a teacher of the pianoforte. He was engaged as musical critic of the Atlas newspaper. In 1827, he made a tour in Germany, and wrote a volume entitled, A Rambler among the Musicians of Germany, etc. 1828. It reached a third edition. In 1845 he published
The Life of Mozart, including his Correspondence, in an 8vo volume, which justly attracted great attention. This book, which was the result of a second visit to Germany, and bears traces of great and conscientious labour, as well as of talent and judgment of no common order, was characterised by Otto Jahn as the most useful, complete, and trustworthy biography then in existence (Jahn's Mozart, 2nd ed. Vorwort, p. xv). Jahn's own Life of the master contains a mass of materials which no one but a German residing on the spot could have collected, but Holmes's has greatly the advantage of it in compression and readableness, and a new edition was prepared by Professor Prout (Novello & Co., 1878). In addition to this, his great work, Holmes wrote a life of Purcell for the second issue of Novello's edition of his Sacred Music, an Analytical and Thematic Index of Mozart's PF. works, often reprinted by the same firm, analyses of several of Mozart's Masses, which were published in the Musical Times, with many other papers on musical subjects. He married the grand-daughter of S. Webb, and died in America, August 28, 1859. (See Mus. Times, Oct. 1, 1859.)

W. H. H.

HOLMES, GEORGE, organist to the Bishop of Durham, was appointed organist of Lincoln Cathedral on the death of Thomas Allinson in 1704. He composed several anthems, two of which—"Arise, shine, O daughter of Zion," composed on the Union with Scotland, 1706, and "I will love Thee, O Lord,"—are to be found in the Tudway Collection (Harl. MS. 7341), and others are in the choir books of Lincoln. [His setting of the Burial Sentences is still sung in Lincoln Cathedral.] Holmes composed an Ode for St. Cecilia's Day, but for what particular year is not stated; its contents, however, show it to have been written between 1703 and 1713. He died in 1721. Some catches by a George Holmes are contained in Hilton's 'Catch that Catch can,' 1652; their composer may possibly have been the father of the organist of Lincoln.

W. H. H.

HOLMES, JOHN, organist of Winchester Cathedral in the latter part of the 16th century, and organist of Salisbury Cathedral from 1602 to 1610, contributed to 'The Triumphes of Oriana,' 1601, the madrigal for five voices, 'Thus Bonny Boots the birthday celebrat.' Some church music of his composition is extant in MS. He was master to Adrian Batten and Edward Lowe. His son Thomas was sworn a gentleman of the Chapel Royal, Sept. 17, 1633. Some catches by him are contained in Hilton's 'Catch that Catch can,' 1652. He died at Salisbury, March 25, 1638.

W. H. H.

HOLMES, WILLIAM HENRY, son of a musician, born at Sudbury, Derbyshire, Jan. 8, 1812, entered the Royal Academy of Music at its opening in 1822, and gained two of the first medals granted there for composition and the piano. In 1826 he became Sub-professor and subsequently Professor of the Piano. As a teacher he was remarkably successful, having trained some of the most eminent of English musicians; among them Sterndale Bennett, the two Macfarren's, J. W. Davison, and others. His knowledge of PF. music was very great, and as a virtuoso he long enjoyed a high reputation. His first appearance at the Philharmonic was in Mendelssohn's Introduction and Rondo, March 24, 1851; and as late as 1876 he performed at the Alexandra Palace a concerto of his own, in A major, written for the Jubilee of the R.A.M. His compositions are numerous and of all classes—symphonies, concertos, sonatas, songs, and an opera—still in MS. Like his friend Cipriani Potter he was always ready to welcome new composers and new music, in proof of which we may name the fact that it was at its instigation and under his care that Brahms's first PF. Concerto was first played in England by Miss Bagelhole, at the Crystal Palace, March 9, 1872. He died in London, April 23, 1885.

HOLSTEIN, FRANZ VON, the son of an officer of high position, born at Brunswick, Feb. 16, 1826. He was himself obliged to adopt the military profession, but eagerly embraced every opportunity of improving his musical knowledge. He studied with such success under Griepenkerl that in 1845, while he was working for an examination, he found time to finish an opera in two acts, 'Zwei Nächte in Venedig,' which was privately performed. He went through the Schleswig-Holstein campaign, and on his return to Brunswick set to work upon an opera on the subject of 'Waverley.' This more ambitious work in five acts was finished in 1852, and was shown to Hanptmann, who was so pleased with it that he persuaded Holstein to leave the army and devote himself to art. From 1853 to 1856 therefore, with a considerable interval occasioned by ill-health, he studied at Leipzig, and produced several very promising works, among them a concert overture, 'Loveley.' He went to Rome in the winter of 1856-57, and continued his studies there, and subsequently at Berlin and Paris. In 1869 a new opera, 'Die Haideschacht,' was produced with success at Dresden, and was heard on all the principal stages of Germany. A comic opera, 'Die Erbe von Morley,' was produced in 1872 at Leipzig, and in 1876 yet another, 'Die Hochhänder,' was given at Mannheim. In the night of May 21-22, 1878, the composer died at Leipzig. Besides the dramatic works we have mentioned, the following are important: a post-humous overture, 'Frau Aventiure,' a solo from Schiller's 'Braut von Messina,' 'Beatrice,' a scena for soprano with orchestra, and many songs and instrumental compositions.

HOLYOKE, SAMUEL, A.M. An American teacher and composer of both vocal and instrumental music, born at Boxford, Mass., 1771.

HOLZ, KARL, Austrian official, able violinist, and devoted lover of music, born at Vienna, 1798. In 1824 he became one of Schuppanzigh's quartet party, and an active member of the direction of Gebauer's 'Spirituel Concerte,' in which he led the first violins. A jovial, pleasant fellow, devoted heart and soul to Beethoven, who dubbed him 'Mahagoni-Holz,' and often invited him to dinner, where he took more than his share of his entertainer's wine—'a hard drinker, between ourselves,' says Beethoven. Possibly drink was not his only failing, if we may so interpret the 'Monsieur terrible amoureux' of another letter of Beethoven's.

In 1826 Beethoven informed him by letter 4 that he had chosen him for his biographer, in the confidence that whatever information might be given him for that purpose would be accurately communicated to the world. According to Schindler, Beethoven afterwards repented of this arrangement. In 1843 Holz made over his rights to Gassner of Carlsruhe, but nothing has been done. Holz died at Vienna, Nov. 9, 1858.

One of the last times that Beethoven's pen touched the paper before he took to his deathbed was to add his signature and a line of music (in a strange scale) to a note of his dictation to Holz, 'Dec. 1826' (Nohl, Letters, 385):—

Wir ir-ren alle Barm, Nur jeder ir-ret anderet. 
Wie immer ihr Freund Beethoven.

HOLZBAUER, IGNAZ, composer, born at Vienna in 1711. He was a chorister in St. Stephen's Church, and was destined for the law, but devoted all his spare time to music, and by study of Fux's *Gradus* made himself a good contrapuntist. On Fux's advice he went to Italy, running away from the Prince of Tour and Taxis to whom he was secretary at Laybach; but a fever, caught at Venice, obliged him to return. He next became capellmeister to Count Rottal in Moravia, and while there married. Returning to Vienna in 1745, the court-theatre engaged him as director of music, and his wife as singer. In 1747 they started on a tour in Italy, and in 1751 he became first capellmeister to the Duke of Wurttemberg at Stuttgart. In 1753 his pastoral opera 'Il Figlio delle Selve' (Schwetzingen) procured him the appointment of capellmeister to the Elector Palatine at Mannheim. It was during his time that the Mannheim orchestra attained that excellence of performance which made it so famous, though it is difficult to say how much of this was due to Holzbaumer and how much to Cannabich the leader. In 1757 he produced 'Nitteti' at Turin with great success, and in the following year his best work, 'Alessandro nell' India' was well received at Milan. In 1776 he composed his only German opera, 'Günther von Schwarzburg' (Mannheim), which was brilliantly successful. When the orchestra was transferred to Munich, Holzbaumer remained at Mannheim; he was entirely deaf for some years before his death, which took place at Mannheim, April 7, 1783. He composed other operas besides those mentioned, and church and instrumental music (see *Quellen-Lexikon* for list), all now forgotten, though not without value in their day, as we may judge from the testimony of Mozart, no less eminent critic: 'I heard to-day a mass of Holzbaum's, which is still good though twenty-six years old. He writes very well, in a good church style; the vocal and instrumental parts go well together, and his fugues are good.' (Letter, Nov. 4, 1777.) And again—'Holzbaumer's music (in 'Günther') is very beautiful—too good for the libretto. It is wonderful that so old a man has so much spirit, for you can't imagine how much fire there is in the music.' (Nov. 14-16, 1777.) He evidently behaved well to Mozart, without any of the jealousy which he often generated. [The score of 'Günther von Schwarzburg' is printed in the *Denkmäler deutscher Tonkunst*, vols. viii. and ix., and a thematic list of sixty-five symphonies is given in *Denkmäler*, etc. *Bayern*, Jhr. iii. vol. i.]
The air is marked 'Sicilian,' and is as follows:

To the Home of My Childhood.

Sicilian air.

It will be noticed that this is 'Home, Sweet Home' without the characteristic refrain, and having some slight difference in melody. No notice appears to have been taken of the song and air in this form, and it was never republished.

When Bishop was writing the music for his opera 'Clari, or The Maid of Milan,' produced in May 1823, he took the supposed Sicilian melody, and adapted it to the two verses paraphrased by John Howard Payne from T. H. Bayly's earlier song.

In the theatre the lyric was sung by Miss Maria Tree, and it at once leaped into an extraordinary popularity. It was included as one of the items of the Birmingham Festival of that year, and was sung by Miss Kate Stephens in the second evening concert (Sept. 25) of the York Festival of 1823. 'Home, Sweet Home' now became a valuable copyright, and Goulding issued it as 'composed' by Bishop, who afterwards confided to William Clappell and to others that he was the real author of the melody. Whatever may be its merits or demerits it has become the great 'Home' song of the English-speaking people.

F. K.

HOMILIUS, GOTTFRIED AUGUST, born Feb. 2, 1714, at Rosenthal in Saxony. Beyond the facts that he was a pupil of J. S. Bach, and master of Adam Hiller, little is known of his life or circumstances. [He matriculated at the University of Leipzig in 1736], in 1742 he became organist of the Frauenkirche in Dresden, and in 1755 director of the music in the three principal churches there, and Cantor of the Kreusschule, the choir of which he brought to a high pitch of perfection. Heled a simple, modest life, entirely occupied with his duties, and died June 2, 1785. He enjoyed a considerable reputation among his contemporaries as an organist, especially for his skill in registration. He was an industrious composer, and in the latter part of the 18th century his larger church works were ranked very high. Although we cannot now endorse that verdict, we must still allow Homilius to have been no unworthy pupil of J. S. Bach's. His numerous sacred compositions are characterised by a peculiarly happy vein of melody, and, in accordance with the taste of the day, an avoidance of polyphonic treatment of the parts. On the other hand, it is difficult to compare his music with more modern homophonic compositions. His treatment of his themes—as is the case throughout this period in which Bach's influence was paramount—is always interesting, and sometimes masterly. His most important works are his motets, model compositions of the kind. Little of his music has been printed, but he was very liberal in allowing copies of his works to be taken. Of his thirty-two motets some excellent examples are to be found in his pupil J. A. Hiller's 'Vierstimmige Motetten, in Sander's 'Heilige Caecilia' (Berlin, 1818-19), Weber's 'Kirchliche Chorgesänge' (Stuttgart, 1857), and Trautwein's 'Auswahl.' Specimens of his organ works are to be found in Kremer's Orgelvirtuos. A Pater noster for four voices, fully bearing out the description of his style just given, is printed in Hullah's 'Vocal Scores.' His published works include, a 'Passions-Cantate' (1775); a Christmas oratorio, 'Die Freunde der Hirten über die Geburt Jesu' (1777); 'Sechs Deutsche Arien für Freunde ernsthafter Gesänge' (1786) and a 'Weihnachtsmotette.' Those still in MS. are much more numerous, and comprise a course of church music for Sundays and festivals; several Passions, including one according to St. Mark, perhaps his best work; a Choralbuch containing 167 chorales; and finally organ music, consisting of fugues, chorales with variations, and trios. [See the article on him by Spitta in the Allgemeine Biographie, and the Verflehrjahrschrift für Musik, vol. 10, No. 3, p. 346, where an extensive list of his works is to be found.] A. M.

HOMOPHONY (Monodia), voices or instruments sounding alike—unison. The term is sometimes applied to music written in what is called the Monodic style. [See MONODIA.] But it is now ordinarily employed for music in plain harmony, the parts all sounding together, as opposed to the Polyphonic treatment, in which the several voices or parts move independently of each other or in imitation. Thus in 'Elijah,' 'Cast thy burden' would in this later sense be called homophonic, while 'He that shall endure to the end' is polyphonic after the sixth bar. [POLYPHONY.]

HOOK, JAMES, born at Norwich, June 3, 1746, studied music under Garland, organist of the cathedral. When a very young man he came to London and composed some songs which were sung at Richmond and Ranelagh, and which he published as his op. 1. In 1769 he was engaged at Marylebone Gardens as organist and composer, and continued there until 1778. In 1774 he was engaged at Vauxhall Gardens in the same
capacities, and continued there until 1820. He was for long organist of St. John's, Horsleydown. During his engagements at Marylebone and Vauxhall he is said to have composed upwards of 2000 songs, cantatas, catches, etc. He gained prize medals at the Catch Club in 1772, for his catch, 'One morning Dame Turner,' and in 1789 for 'Come, kiss me, dear Dolly.' In 1775 Hook brought out 'The Ascension,' an oratorio. He composed the music for the following dramatic pieces:—'Dido,' 1771; 'The Divorce,' composed in 1771 for Marylebone, but not produced until 1781 at Drury Lane; 'Trick upon Trick,' 'Il Diletante,' 'Country Courtship,' and 'Cupid's Revenge,' 1772; 'Apollo and Daphne,' 1773; 'The Fair Peruvian,' 1776; 'The Lady of the Manor,' 1778; 'William and Nancy,' 1779; 'Too civil by half,' 1779; 'The Double Disguise,' 1784; 'The Triumph of Beauty,' 1786; 'Jack of Newbury,' 1785; 'Diamond cut Diamond,' 1797; 'Wilmore Castle,' 1800; 'The Soldier's Return,' 1805; 'Tekeli,' 'The Invisible Girl,' and 'Catch him who can,' 1806; 'Music Mad,' and 'The Fortress,' 1807; 'The Siege of St. Quintin,' 1808; 'Killing no Murder,' and 'Safe and Sound,' 1809. Besides these he composed a number of odes, such as that on the return of peace, 1783, and music for the following, the dates of production of which are uncertain: 'The Wedding,' 'Love and Virtue,' 'The Cryer of Vauxhall,' 'The Pledge,' 'Coralie,' 'Bianche and Edgar,' and 'The Country Wake.' Many of his songs were published in collections, as 'The Feast of Anacreon,' 'Hours of Love,' etc., but the greater number were issued singly. Hook composed several concertos for the organ or harpsichord, and sonatas for the pianoforte, and was author of *Guida di Musica*, a book of instruction for the pianoforte. Several of his glees, catches, and rounds are printed in Warren's Collections. Hook died at Boulogne in 1827. Several members of his family were eminent in literature. His first wife, Miss Madden (died Oct. 19, 1795), was author of 'The Double Disguise.' His son, James Hook, D.D., Dean of Worcester (born 1772, died 1828), was author of the words of 'Jack of Newbury,' 'Diamond cut Diamond,' etc. His younger son Theodore Edward (born 1788, died 1841), was the well-known humorist; and his grandson, Walter Favvular Hook, D.D., Dean of Chichester (born 1798, died 1875), son of James, was the famous divine. w. h. HOOK, born at Halberston, Devon, probably about 1553, is said to have been a chorister in Exeter Cathedral; he became connected with the choir of Westminster Abbey about 1582, and on Dec. 3, 1588, was appointed Master of the Children. He was one of the ten composers who harmonised the tunes for 'The Whole Book of Psalms,' published by Este in 1592. On March 1, 1603-4, he was sworn a Gentleman of the Chapel Royal, and on May 9, 1606, was appointed organist of Westminster Abbey. Three anthems by him are printed in Barnard's collection, and six others, and a set of Preces, Psalms and Responses are contained in Barnard's MS. collections in the library of the Royal College of Music, and two anthems in the Tudway Collection (Harl. MSS. 7337 and 7340). He contributed two pieces to Leighton's 'Tears or Lamentations,' 1614. He died July 14, 1621, and was buried July 16, in the cloisters of Westminster.

His eldest son JAMES, a lay vicar of Westminster, died Dec. 1561.

w. h. HOPKINS, EDWARD JOHN, born in Westminster, June 30, 1818, became in 1826 a chorister of the Chapel Royal under William Hawes. On quitting the choir in 1833 he studied under Thomas Forbes Walmisley. In 1834 he was chosen organist of Mitcham Church, in 1838 organist of St. Peter's, Islington, and in 1841 of St. Luke's, Berwick Street. In 1843 he was appointed organist of the Temple Church, the musical service of which under his care acquired great reputation. As an accompanist he was quite unrivalled. Hopkins composed many church services, anthems, chants, and psalm tunes. His anthems, 'Out of the deep,' and 'God is gone up,' obtained the Gresham prize medals in 1838 and in 1840 respectively. He was also composer of 'May day' (duet) and 'Welcome' (trio), and author of *The Organ, its History and Construction*, an excellent treatise published in conjunction with Dr. Rimbault's *History of the Organ* in 1855; 2nd edit. 1870; 3rd edit. 1877. He edited Bennet's 'Madrigals,' and Weekes' 'First Set of Madrigals' for the Musical Antiquarian Society, and the music portion of 'The Temple Church Choral Service.' [He received the degree of Mus.D. from the Archbishop of Canterbury in 1882. He had sung at the coronation of William IV. in 1831, and he lived to join the choir at the Diamond Jubilee of Queen Victoria, in 1897. On the completion of his fifty years' service as organist of the Temple, in May 1885, he had a presentation from the Benchers. He retired in 1885, and died in London, Feb. 4, 1901. He was buried in Hampstead Cemetery.]

JOHN HOPKINS, his younger brother, born in Westminster in 1822, was a chorister of St. Paul's from Sept. 1831 to Sept. 1836. In August 1835 (before quitting the choir) he was appointed to succeed his brother as organist of Mitcham Church. He afterwards became successively organist of St. Stephen's, Islington, June 1839; St. Benet's, Paul's Wharf, July 1841; Trinity Church, Islington, May 1849; St. Mark's, Jersey, Feb. 1846; St. Michael's, Chester Square, 1846; and Epson Church, Jan. 1854. In May 1856 he succeeded his cousin, John Larkin Hopkins, as organist of Rochester Cathedral, a post which he held till his death,
HOPKINSON

August 27, 1900. John Hopkins composed services, anthems, chants, hymn tunes, voluntaries, pianoforte sketches, songs, and part-songs, a few of which have been published.

His cousin, JOHN LARKIN HOPKINS, Mus.D., born in Westminster, Nov. 25, 1810, was a chorister of Westminster Abbey under James Turle. In 1841 he succeeded Ralph Banks as organist of Rochester. In 1842 he graduated Mus.B. at Cambridge. In 1856 he removed to Cambridge on being appointed organist to Trinity College and to the University. He succeeded Mus.D. in 1867. Hopkins composed many services and anthems, and published a collection of his anthems. In 1847 he edited, in conjunction with Rev. S. Shepherd, a collection of the Words of Anthems used in Rochester Cathedral. He died at Ventnor, April 25, 1873.

HOPKINSON. The greater part of the pianoforte making of this country has centred in London, and the firm of J. & J. Hopkinson—though founded and at first carried on exclusively at Leeds—cannot now be quoted as an exception.

John Hopkinson established his workshops in Leeds in 1835, and removed them to London in 1846. The warerooms were at first in Soho Square, and were in 1856 removed to Regent Street, where the business was carried on until 1882, when it was removed to 95 New Bond Street. From 1892 to 1900 the business was carried on at 84 Margaret Street, Cavendish Square, and in the latter year it was moved back to the present address, 84 New Bond Street. Branch showrooms at Kilburn were opened in 1900. From 1856 to 1895 a music-publishing business was carried on in addition to the pianoforte trade. Hopkinson patented a repetition action for a grand pianoforte in 1850, and in 1882 he further patented a 'harmonic pedal,' producing the octave harmonics from the strings by the contact, at the exact half of the vibrating length, of a very slender strip of felt governed by a special pedal. The firm gained high distinction at the Exhibitions of 1862 and 1878—at the latter the Great Gold Medal. A similar distinction was conferred at the Music and Inventions Exhibitions of 1885. John Hopkinson retired in 1889, leaving his brother, James Hopkinson, the first place in the business. The latter's son, John, a director of the company formed in 1895, is the only member of the family now in the firm.

A. J. H.

HOPPER. A name applied to the jack or escapement lever in the action of a pianoforte, or to the escapement lever with its backpiece, regulating screw, etc. complete. [See GRASSHOPPER.] So named because this lever hope out of the notch against which its thrust has been directed; allowing the hammer to rebound, and leaving the string free to vibrate.

A. J. H.

HORN BAND (Russian). In 1751, J. A. Maresch, a horn player attached to the Court of the Empress Elizabeth of Russia, conceived the idea of forming a band exclusively composed of hunting horns. The instruments varied in length from one foot to seven feet, covered a distance of four octaves, and were thirty-seven in number. Most of the players could only produce one fundamental tone, but a few of the smaller horns produced two notes. The difficulty of playing with precision by such a band as this must have been enormous; but nevertheless the first concert at Moscow in 1755 was a huge success. Horn bands became the rage with all the great nobles, and they frequently sold the bands—horns and players—to one another. In 1817 one of these bands visited Germany, and performed a Te Deum at Mannheim. Another band visited France and England in 1833. In the latter case there were twenty-two performers led by a clarinet. Two complete sets of these horns made of hammered copper were exhibited in the Vienna Exhibition, 1892. Further particulars may be found in Dalyell's Musical Memoirs of Scotland, p. 170. See also Catalogue du Musee Instrumental du Conservatoire Royal de Bruxelles, tome ii. liv. v.

HORN, FRENCH HORN (Fr. Cor, Cor de Chasse; Ger. Horn, Waldhorn; Ital. Corno, Corno di Caccia). [In popular language all instruments with cupped mouthpieces are frequently called either horns or trumpets. The two terms, however, even when used in the broadest sense, are not properly interchangeable, for 'horn,' as signifying any instrument having its origin in a natural horn may be held to incline the trumpet, but 'trumpet,' having a much more limited significance, cannot include the horn. By withdrawing trumpets (including with them for this purpose, trombones) from the whole group of lip-blown instruments, we have left under the term horn a large variety of wind instruments, the mutual relationship and developments of which can be easily understood, and if we speak of horns and trumpets and not of horns or trumpets, we are using terms which can be defined with some accuracy, and which afford a useful means of classifying the two main divisions of brass instruments.

A general view of the horn class is presented under WIND INSTRUMENTS, but in this article a somewhat more detailed account may be conveniently given.

Among primitive races men, the convenience both in war and the chase of some means of signalling more powerful than that afforded by the human voice must have led to the appreciation of some rude instrument fashioned from a conch-shell, an ox-horn, or an elephant's tusk. The interior form of all these objects is approximately conical, and such a tube, when blown with the lips at the small end, gives a succession of notes approximately in the harmonic
series, the exact agreement between the notes obtained and this series depending chiefly upon the precise internal form of the horn. Other things being equal, the better the intonation of the horn, the greater is the ease of blowing, and the greater its carrying power; it is, therefore, not unreasonable to suppose that the more powerful horns would be particularly prized, and men’s ears would become accustomed to the true intervals of the common chord. The gradual evolution of the best signalling instrument is, therefore, closely connected with music itself. This power of giving the common chord cannot be realised, however, on very short horns, and the instrument must be from three to four feet long for the first six harmonics. These, on a horn of about four feet long, are $c, c', g', e', e', g'$. 

Horns of metal (see *Buccina, Cornu*) were used in the Roman armies, and also by the Greeks and other more ancient nations. Large war-horns (somewhat improperly called trumpets) were also used by the Norsemen, and drawings of interesting specimens of these are given in Du Chailnu’s work, *The Viking Age*. 

Coming to medieval times, we find the bugle carried by knights was often made of ivory, richly carved, and known as the ‘oliphant,’ and various forms of forester’s or hunting horns were in use. There were also Burgomote horns, the property of town corporations, and horns used for transferring inheritances in connection with feudal proprietorship.

From these various instruments used either in war, in the chase, or for purely ceremonial purposes, our modern horns have grown. These may be grouped under three heads: 1st, Simple horns for signalling and such-like purposes; 2nd, Saxhorns, used chiefly in military and brass bands; and 3rd, The orchestral or French horn, the most refined and delicate instrument of the ‘horn’ group.

1st. *Simple Horns.* — The ordinary fox-hunter’s horn agrees most closely with a natural horn, but it has no musical value. Longer than this, are the various post- and coach-horns, on the best of which bugle-calls can be given. The military *Bugle* (q.v.) ranks in this group. The post-horn in A has been introduced by Koeing into his well-known post-horn galop.

2nd. *Saxhorns.* — As these instruments are described under their name, it will be sufficient to state here, that they are essentially bugles made in various keys and embracing a compass extending from about one octave below the lowest notes of the bass voice to the highest notes of the soprano, their total range being thus about one octave more than that of the human voice. It is by the introduction of the *Valve* (q.v.) that these instruments stand differentiated from the simple horns described in the first group.

3rd. *The Orchestral or French Horn.* — This instrument in its most simple form, that is, without valves, is the outcome of the longer horns used in hunting. The short horns or bugles were by degrees lengthened, the bore reduced in diameter, and the inconvenience of a long horn, especially on horseback, obviated by bending the instruments into one or more circular turns. In this form it is easily carried over the shoulder, and is known as the Cor de chasse or Waldhorn. It is difficult to say at what precise date this horn superseded the more ancient cornet, of wood, horn, or ivory, which was more akin to the bugle, and it is probable that all were used contemporaneously. Special hunting calls and fanfares in four and five distinct parts for horns in F as used by the huntsmen of the German princes are extant, and the gradual development of the instrument in France may be gathered from the following notes.

Louis XI. of France ordered the statue on his tomb to be dressed in the costume of a hunter with his cornet at his side. Dufourloux dedicated a treatise on Venery to Charles IX., who had himself written a similar work. He therein praises the cornet, and imitates its sound by the word *tron*. In the woodcuts contained in his work, and in pictures of Louis XI.’s projected monument, the cornet appears to have only a single ring or spiral; being thus competent to produce only a few notes. In the edition of Dufourloux published in 1628, however, the king and his lords are represented as having cornets with a second half-circle in the middle. Louis XIII., who was extremely fond of hunting the fox, invented a call, to distinguish that animal, containing several different notes, which show that for their proper intonation the instrument itself must have made progress, and increased in length. Louis XV., however, and his master of the hunt, M. de Dampierre, composed and selected the greater number of calls and fanfares used in the royal hunt, which are still employed up to the present time.

Three kinds of hunting airs are to be made out. (1) Calls (*tons de chasse*), of which there are about thirty-one. These are intended to cheer on the hounds, to give warning, to call for aid, and to indicate the circumstances of the hunt. (2) *Fanfares*, of which there is one for each animal, and several for the stag, according to his age and antlers. (3) *Fancy airs*, performed as signs of joy or after a successful hunting.

The best-known calls are the *Réveillé*, the *Lancé* and *Relancé*; the *Hourvari*, or default; the *Débouché*; the *Volertest* (when the fresh foot-mark of the animal is found); the *Hulai*, and the *Mort*. Of fanfares there are the *Royale*, sounded for a stag of ten points—invented by Louis XV. ; the *petite Royale*, sounded for the wild boar; various others distinguishing the wolf, fox, weasel, and hare; and the *Fanfare de St. Hubert*, as the patron saint of hunting, only sounded on his day. (3) The third series
approximates more than the others to regular musical performances, and furnishes the link between the use of the horn as a signal and as a melodious instrument. These airs are many and various, named after royal personages or distinguished hunters. Douanier du cor is the term for sounding the horn.1

The players of these hunting airs and calls, and the companies who heard them, thus became practically acquainted with the possibilities of their instruments both in melody and harmony. Towards the close of the 17th century the coiling of the huntsman's horn, which was sufficiently large to be worn obliquely round the body, resting on one shoulder and passing under the opposite arm, was modified so as to give the proportions of the orchestral horn as we now know it. The records of the Royal Theatre of Dresden show that there were two horns in the orchestra in 1711. It was introduced into the Imperial Opera at Vienna from 1712 to 1740, and it appears that its use was then discontinued for a time. In France it was introduced into the orchestra by Campra in the opera 'Achille et Déjanire' in 1735, and probably before that date by Lulli; in 1759 Rameau used a couple of hunting-horns in one of his operas. The horn was, however, first used in England as early as 1720 by the opera band in the Haymarket, in Handel's 'Radamisto.'

It may be noted that the only horn of which Praetorius gives an illustration in his Syntagma (published in 1618) is the closely coiled Jager-trommet. The horns of that period, whether coiled thus closely, or in a wide circle to go over the shoulder, were not differentiated so distinctly from the trumpet as they subsequently were, and we find that about a century elapsed from the time of Praetorius to the time when, after modifications of the conical bore and of the mouthpiece, the instrument was fitted to take its place in the orchestra with its general proportions established substantially as we now have them.

It was much objected to when first heard in the orchestra, as coarse and vulgar; and severe strictures were indulged in at the introduction of a rude instrument of the chase among more refined sources of sound, such as the violins and oboe. [In 1717, Lady Mary Wortley Montagu referred to the fondness of the Viennese for it, and said she considered it as a 'deafening noise.'] It is remarkable how subsequent experience has reversed this hasty judgment; the smooth tender tone peculiar to the horn contrasting admirably with its orchestral companions, and forming a firm foundation for harmony in chords and holding notes.

In consequence of this prejudice, when the horn was originally transferred in Germany from the hunting-field to the orchestra, it was suggested to introduce a mute or damper into the bell, for the purpose of softening the tone; this was at first made of wood, and afterwards of cardboard. It was the custom to produce a like effect in the oboe by filling the bell, made globular for the purpose, with cotton-wool; a plan which suggested to Hampi, a celebrated horn-player at the court of Dresden, about the year 1770, to do the same with the horn. To his surprise, the insertion of the pad of cotton lowered the pitch of the instrument by a semitone. Struck with the result, he employed his hand instead of the pad, and discovered the first and original method by which the intervals between the harmonic series of open notes could be partially bridged over. The notes thus modified have since been termed 'hand-notes,' and the instrument itself the 'hand-horn.' Sir John Hawkins mentions a concerto played by an artist named Spandan with the help of the hand notes in 1775, 'attempering the sound by the application of his fingers in the different parts of the tube.'

[Before describing in detail the rationale of these 'stopped' or 'hand' notes, it will be convenient to define the general characteristics and capabilities of the typical 'hand horn' as now used.

The horn in F, which appears to have been its pitch when it was first introduced into the orchestra, and which is still the pitch in which it is most used, is a tube of about 12 feet in length. At the end in which the mouthpiece is inserted its diameter is about a quarter of an inch, and the conical expansion, which in proportion to its length, is much more gradual than on instruments of the bugle type, rapidly increases, or changes out, at the bell mouth to a rim of about eleven inches diameter. The general lines of the cone are hyperbolic, but a certain portion of the tubing is cylindrical, owing to the provision to be made for changing the pitch by crooks or slides. The mouthpiece is about five-eighths of an inch across inside the rim, and its 'cup' is of a deep funnel-shape, in this respect differing greatly from the cup of the trumpet mouthpiece, which is almost hemispherical. The mouthpieces of bugles, cornets, and saxhorns are intermediate in character between these two. (See MOUTHPIECE.)

Such an instrument as described is capable of giving the notes of the harmonic series up to about the sixteenth, although the prime is practically useless, and those above the twelfth are difficult. Although the horn as pitched in F is more used than in any other key at the present time, it is seldom built in this key, owing to the need of changing both to higher and to lower pitches. As a means of effecting slight changes of pitch for tuning purposes the instrument is fitted with a pair of slides connected by a U-shaped bow, and in some cases

---

1 In English we say 'sound the horn;' 'wind the horn'; Tonynson ('Lockley Hall'), 'sound upon the bugle horn.'
the various lengths of tube for the different pitches required are fitted to supplementary slides. The more usual construction, however, is one in which the body of the horn terminates in a conical ferrule at a length of about 90 inches from the rim of the bell. Into this ferrule various crooks or bent tubes fit, each one of which is of the size to receive the mouth-piece at its smaller end. The length of these crooks for the old (high) Philharmonic pitch is about as follows:—

<table>
<thead>
<tr>
<th>Pitch</th>
<th>Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eb</td>
<td>16 inches</td>
</tr>
<tr>
<td>A♭</td>
<td>254...</td>
</tr>
<tr>
<td>A</td>
<td>304...</td>
</tr>
<tr>
<td>G</td>
<td>353...</td>
</tr>
<tr>
<td>F</td>
<td>403...</td>
</tr>
<tr>
<td>E♭</td>
<td>453...</td>
</tr>
<tr>
<td>E</td>
<td>503...</td>
</tr>
<tr>
<td>D</td>
<td>553...</td>
</tr>
<tr>
<td>C</td>
<td>601...</td>
</tr>
<tr>
<td>B♭</td>
<td>651...</td>
</tr>
</tbody>
</table>

and to these are sometimes added crooks for A♭ and A♭ basso.

The notation used is that which represents the true sounds of an alto horn pitched in the 8-foot C, but this horn is now obsolete. The parts are written in the treble clef, with the exception of occasional low notes: these are written in the bass clef, but with the peculiarity that they are written an octave lower than they sound, thus (the prime, or first note of the harmonic series, which is barely obtainable, being omitted):—

\[
\text{As written, sounded.} \quad \text{As written and sounded.}
\]

| Harmonic Series | 2 3 4 2 3 4 3 4 5 6 7 8 etc. |

The horn is treated as a transposing instrument, and therefore the various crooks give sounds lower than the notation, according to the following table:—

<table>
<thead>
<tr>
<th>Horn in</th>
<th>Transpose</th>

</tr>
</tbody>
</table>

The following examples will serve to illustrate the relationship between the notation and the sounds produced: the prime being omitted in each case, the range of compass shown extends from the second to the tenth harmonic:—

\[
\text{Notes as Written.}
\]

\[
\text{Actual Sounds Produced.}
\]

| Harmonic Series | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 |

The notes in the bass clef, as stated above, sound an octave higher than written. The notes Nos. 7 and 14 in the series are slightly flatter than shown by the notation, and the notes Nos. 11 and 13 cannot be strictly represented on the staff; their true pitch in each case lies between the notes under the brackets. The tone of the horn being very flexible, the flatness of the notes Nos. 7 and 14 can be corrected by the pressure of the lip and by a slight degree of 'hand-stopping;' a good F can be obtained from No. 11, and a good Ab from No. 13. A is obtained from Nos. 7 and 14 by somewhat less stopping than is required for a semitone.]

The method of stopping the horn is not by introducing the closed fist into the bell, but the open hand, with the fingers close together, some way up the bore. By drawing the fingers back, the natural sounds are again produced. The degree in which the horn is stopped is not the same for all stopped notes, there being half and whole stopping. In the first, by raising the
hand the bell alone is, as it were, closed: in the second the hand is introduced as far as if it were intended almost to prevent the passage of air. The 'half-stop' is used to depress an open note by a semitone, and the 'whole-stop' in like manner gives a tone: more than this in the ordinary way cannot be done by stopping.

Between the stopped or 'hand notes' and the open notes there is an obvious difference in character and quality which it is impossible wholly to suppress, but which may be sufficiently modified so as not to offend the ear. This object is attained by blowing the open notes softly, so as to reduce the contrast between their sonorosity and the closed or 'stuffed' (tongued) character of those modified by means of the hand. Much difference of opinion exists as to the superiority of the simple hand-horn, or the more modern instrument furnished with valves. Some experts are of the opinion that the lightness and vibratile power of the former, added to the absence of abrupt bends and sinuosities in the bore, adds materially to the brilliancy of the tone. But, on the other hand, in rapid melodic passages, such as it is now the fashion to write, the alteration of open and stopped notes tends to produce uncertainty and unevenness. The older composers, especially Mozart, seem to have been aware of this fact, and employ both open and stopped notes with full consciousness of their respective effects. Many examples could be given of the mournful and mysterious effect of the stopped notes judiciously used. [The tone-quality of the horn is full, but on the whole soft and mournful, and it blends well with the woodwinds. There is a great range of quality, however, from the mysterious mournfulness of the low 'stopped' notes to the almost painful and despairing cry of the upper notes when sounded / (see Bell).]

The great value of these low notes was well known to Beethoven, as is evident from more than one passage in his works. In the allegro moderato of his Sonata in F for Horn and Piano (op. 17) the following passage occurs twice over:—

\[\begin{align*}
\text{Horn in } F.
\end{align*}\]

The same note also occurs in the 7th Symphony. Allowing for a crook one-fifth lower, the real sounds would be as at (a):—

\[\begin{align*}
\text{(a)}
\end{align*}\]

that is to say, 16-foot F and 16-foot C. The former of these is practically, and the latter entirely, impossible on a tube of under 12 feet long. It is evident, therefore, that by a freak of notation, the bass notes have been referred to a 16-foot scale, whereas those in the treble, as already explained, belong to one of 8 feet, and the real note sounded is as at (b). This accounts for the ordinary but erroneous statement in Horn Methods, that the 'treble part is conventionally written an octave higher than it is played,' the fact being that the bass part is an octave too low. In consequence of this misconception, no two scales as given in the ordinary instruction books agree with one another. This is partially owing to the fact that the extreme low tones are difficult, if not impossible, to produce, except with a larger mouthpiece. Indeed, 16-foot C can only be feebly touched with a trombone mouthpiece, and by an experienced trombone player.

[On the introduction of valves, scale passages of even quality, both diatonic and chromatic, became possible, and this power is virtually recognised by modern composers. At first, two valves only were used, but at the present day three valves are almost universal. (For the scale as produced by valves see Valve.)]

The horn is seldom played singly in the orchestra. A pair at least, and four, or two pairs, are most commonly employed. The third is in the latter case regarded as a ripieno first, and the second and fourth as being correlative to one another.

Every great composer since Handel has written freely for the horn. A characteristic specimen of this master occurs in his 'Allegro and Penseroso,' where the bass song 'Mirth, admit me of thy crew,' is embellished by a brilliant arpeggio accompaniment rising to the top C.

Mozart, even where his score is otherwise limited, hardly ever dispenses with two horns. For these he writes with the most perfect tact and judgment; seldom introducing hand-notes, except when their peculiar effect is required. Instances of this can easily be found in any of his symphonies, overtures, or operas. He has, moreover, written three concertos for orchestra with horn obbligato, and a large quantity of concerted music such as that named under Clarinet for two horns and the reed instruments. All his compositions are eminently fitted for the hand-horn, of which he had thoroughly studied the capacities.

Beethoven has been especially lavish, though singularly cruel and exacting, in the use of the horn, for besides the Sonata in F for Horn and Piano, the Sestet for String quartet and two Horns obbligato, which is so difficult as to be never played, and the Septet, which contains a trying passage in triplets for E* horn:

\[\begin{align*}
\text{Horn in } E^\#
\end{align*}\]

he constantly gives it a prominent place in all his works. The most noticeable of these are
the Second Horn solo in the overture to ‘Fidelio,’ in E, which incidently demonstrates the error in notation adverted to above:

\[ \text{Second Solo} \]

Correctly played.

In the last bar but one there is a jump of a twelfth from treble G to bass C; whereas horn players invariably fulfill the obvious intention of the composer by descending only a fifth, and thus completing the common chord.

The fact is, that the first part of the melody, written in the treble clef, is really played by the E horn a minor sixth lower than its written symbol, and the bass part a major third higher, thus reaching E in the 8-foot octave. The passage, if literally played, as it would be by an organist, would end on the impossible and hardly musical E of the 16-foot octave. These remarks also apply to the illustrative passage quoted below from the Choral Symphony; the Scena (‘Komm Hoffnung’) in ‘Fidelio’ for three horns; and a very florid obligato to the bass song ‘Deign, great Apollo,’ in the ‘Ruins of Athens,’ scored for four horns, two in F and two in C.

In the Eroica Symphony the trio is scored for three horns in E, playing on closed notes. In the 4th Symphony two horns in Eb attack top C pianissimo, and slur down to G and E below. The slow movement of the ‘Pastoral’ contains a difficult passage for two horns in thirds kept up for several bars. In the Vivace of the 7th—near the close—the low note already named (sounding E) is sustained by the second horn for no less than twenty-two bars without intermission.

The G here given, which has been shown to be an octave too low, really appears to be an outlying harmonic, or fictitious note, not recognised in the ordinary harmonic scale, obtained by a very loose lip and sounding the fifth of the fundamental note, intermediate between that and the first harmonic. To make it a real note, the horn should begin on 32-foot C, which is impossible for a 16-foot tube, and there ought to be a harmonic third on the second space in the bass clef, which does not exist. Many players cannot produce it at all, and few can make sure of it. The slow movement contains a melodious passage in contrary motion with the clarinet, and in the scherzo the two move in close harmony with the bassoons and clarinets, the second horn beginning the second portion of the trio with a solo on its low G and F (sounding A and G in Eb, as at b), the latter a closed note; a phrase which is repeated seventeen times with but slight change.

2nd Horn in D.

In the minuet of the 8th occurs a long and important duet for two horns in F, accompanied by the violoncello solo, and beginning as follows:

Horns in F. dol.

imitated by the clarinet, and running into a conversation between the two horns, who repeat alternately the same notes—

\[ \text{Horn in Eb} \]

Schubert’s great Symphony in C (No. 9) opens with a passage of eight bars for the two horns in unison, and they are used with beautiful effect, with the accompaniment of the strings alone in the Andante of the same work just before the return to the subject.

No other composer up to his time surpassed or even equalled Weber in his masterly use of this instrument. He evidently loved it above all other voices in the orchestra. Besides abundant concerted music, the effective opening of the Overture to ‘Oberon,’ the weird notes in that of ‘Der Freischütz,’ and the lovely obligato to the Mermaid’s song, will rise into immediate remembrance. He fully appreciates its value, not only as a melodic instrument, but as a source, whether alone or blended with other qualities of tone, of strange and new aesthetical effects.

1 The difficulty of this passage is sometimes met in the orchestra by giving the two low notes (which sound Eb and Hb below the bass stave) to one of the other players, so that the sudden transition of three octaves is not felt, and the low notes are obtained with greater clearness.
HORN

The same, in a somewhat less marked degree, may be said of Mendelssohn, who makes comparatively less melodic use of the horn, but very much of its combining and steadying powers. Notable exceptions are, however, the opening phrase of the Duet and Chorus in the ‘Hymn of Praise,’ and the Notturno in the ‘Midsummer Night’s Dream.’ When the latter was first performed in England, the composer especially desired the copyist to forward the part early to Mr. Platt, who was to play it.

With Rossini, the son of a horn player, and himself no mean performer on it, a new school may be said to begin. He uses it freely for his bright and taking melodies, whether alone or in pairs; but the old method of Mozart is lost, and values become essential for the execution of runs, turns, scales with which the part is abundantly strewn. In ‘William Tell’ especially a favourite and recurring effect is that of the horn imitating the Alpenhorn, and echoing among the Swiss mountains. The triplet passages thus allotted it in rapidly shifting keys are to the last degree difficult and treacherous. Rossini’s example seems to have been followed by Auber and many more recent composers.

[Notable examples in the works of Wagner are extremely numerous; all amateurs will remember the effect of the four horns in act ii. of ‘Tristan’ at the words ‘Wie sie selig, hehr, und milde wandelt,’ and the magical impression of the six stopped horns in the scene of the Tannheim in sc. ii. of ‘Das Rheingold.’ In Brahms’s 2nd Symphony (in D, op. 73) the horns have a very important part, especially in the first Allegro. An interesting example of the use of horns is to be found in the overture to Humperdinck’s ‘Hänsel und Gretel,’ and another striking instance is in Strauss’s ‘Don Juan.’]

**Music for the Horn**

With Orchestra:—

** Mozart.**—Op. 92, First Concerto; op. 105, Second, &c.; op. 106, Third, &c.

** Hummel.**—Op. 155, Elegy and Rondo for chromatic horn.

** Schumann.**—Op. 98, Concerto for four horns and orchestra.

** Brahms.**—Op. 11, Concerto.

** Concerto.**

** Hummel.**—Op. 88, Grand Sextet for piano, two horns, and strings.

** Mozart.**—First Divertimenti for two violins, two horns, and violoncello.

** Schumann.**—Op. 108, Quintet for horn and string quartet; Quintet for piano and wind instruments.

** Hummel.**—Op. 74, Grand Sextet for piano, oboe, horn, flute, viola, violoncello, and contrabass.

** Kalkbrenner.**—Op. 13, Sextet for piano, two violins, two horns, tenor and bass.

** Schumann.**—Op. 70, Adagio and Allegro for piano and horn.

** Brahms.**—Op. 49, Trio for piano, violoncello, and horn (for violoncello, violin, and viola).

W. H. S. [Additions in square brackets by D. J. B.]

** HORN.** Karl Friedrich, was born at Nordhausen, Saxony, 1762. After studying music under Schroeter at Nordhausen, he came in 1782 (Mrs. Papendiek says, as a valet) to London, where Count Brühl, the Saxon ambassador, patronised him, and introduced him as a teacher amongst the English nobility. Having published his first work, ‘Six Sonatas for the Pianoforte,’ he was appointed music master in ordinary to Queen Charlotte and the Princesses, an office which he held until 1811. In 1808, in conjunction with Samuel Wesley, he commenced the preparation of an English edition of J. S. Bach’s Werktreue stove Clavier, which was published in 1810. In 1823 he succeeded William Sexton as organist of St. George’s Chapel, Windsor, and died August 5, 1830. Horn composed some ‘Military Divertimentos,’ ‘Twelve Themes with Variations for the Pianoforte, with an accompaniment for Flute or Violin,’ and several sets of sonatas. He was also author of a Treatise on Thorough-Bass.

His son, Charles Edward, was born in St. Martin’s-in-the-Fields in 1786. He received his early musical education from his father, and in 1808 had a few lessons from Rauzzini. Returning to London, he endeavoured to obtain a position as a concert singer, but not succeeding he changed his course, and on June 28, 1809, appeared at the English Opera House, Lyceum, in M. P. King’s opera, ‘Up all night.’ In the next year he composed and produced ‘The Magic Bride,’ upon which he quitted the stage and studied singing under Thomas Welsh. [Horn’s musical setting of Moore’s only attempt at an opera libretto, ‘M. P., or the Blue Stocking,’ was produced at the English Opera House, London, on Sept. 4, 1811, but was a failure. Shortly afterwards, a more successful work, ‘The Beehive,’ was produced at the same house. In 1820 he wrote music for Moore’s ‘Lalla Rookh,’ and had it performed in Dublin; it met with little favour. Two years later his ‘Direz’ and ‘Annette’ were given at the Theatre Royal, Dublin.] In 1814 he reappeared as the Scroaker in Storace’s ‘Siege of Belgrade,’ with great success. His connection with the theatres both as composer and singer lasted for many years. His voice was poor, but of such extensive compass that he was able to undertake baritone as well as tenor parts. [He visited Dublin again in 1823, bringing back with him, as an articled pupil, M. W. Balfe.] On the production of ‘Der Freischütz’ in 1824 at Drury Lane, Horn took the part of Caspar, displaying considerable histrionic ability. [His ‘Peveril of the Peak’ (1830) had a passing popularity.] In 1831 and 1832 he was director of the music at the Olympic. In 1833 he went to America and introduced several English operas at the Park Theatre, New York, with marked success. A severe illness having deprived him of the use of his voice, he retired from the stage and began teaching, and established himself in business as an importer and publisher of music in connection with a Mr. Davis. During his stay in America he produced an oratorio, entitled ‘The Remission of Sin.’ In the beginning...
of 1843 Horn returned to England. In 1845 his oratorio, renamed 'Satan,' was performed by the Melaphonic Society, and he was appointed musical director at the Princess's Theatre. In 1847 he again went to America, and on July 23 was elected conductor of the Handel and Haydn Society of Boston. Early in 1848 he revisited England for a short time, and produced his oratorio 'Daniel's Prediction.' Upon his return to Boston he was re-elected conductor of the Handel and Haydn Society, June 10, 1848. He died at Boston, Oct. 21, 1849. His productions for the theatre include 'The Magic Bride,' and 'Tricks upon Travellers' (with Reeves), 1810; 'M. F.' (1811); 'The Beshive' and 'The Boarding House,' 1811; 'Rich and Poor,' and 'The Devil's Bridge' (with Brahms), 1812; 'Golophin, the Lion of the North,' 1813; 'The Ninth Statue,' and 'The Woodman's Hut,' 1814; 'Charles the Bold,' 1815; 'The Persian Hunters,' 1816; 'The Election,' and 'The Wizard,' 1817; 'Lalla Rookh,' Dublin, 1820; 'Direce' and 'Annette,' 1822; Songs in 'The Merry Wives of Windsor' (with Webbe, jun. Parry, etc., including the popular duet, 'I know a bank'), and 'Actors al fresco' with T. Cooke and Blevitt, 1823; 'Philandering,' 1824; 'The Death Fetch,' 1826; 'Pay to my order,' 1827; 'Peveril of the Peak,' and 'Honest Frauds' (containing the beautiful ballad, 'The deep, deep sea,' originally sung by the composer, and afterwards raised to the summit of popularity by the singing of Malibran), 1830. He also composed 'Nourjahad,' the date of performance of which is uncertain; [his last opera, 'Ahmed al Kameel,' was produced at the New York National Theatre in 1840. Dict. of Nat. Biog.,] a cantata entitled 'Christmas Bells,' a set of canzonets, besides numerous single songs, glees, etc., and edited a collection of Indian Melodies. Some of his songs, 'Cherry ripe,' 'Thro' the wood,' 'I've been roaming,' and 'Ev'n as the sun,' were highly popular. w. h. n. (with additions in square brackets by w. h. g. f.).

Hornpipe, in its present meaning, a step dance, also a particular type of melody in common time to which this is danced. The name appears to have been derived from a certain early rude instrument mentioned by Chaucer in his translation of the Roman de la Rose, the original of which is in date about the middle of the 13th century. Chaucer translates 'Estives de Cornoaile' into 'Hornpipes of Cornwalls.' The instrument of this day must have been a pipe made from the horn of an ox or other animal, which, from a primitive design, most likely culminated in the Stock and Horn (q. v.) in common use in certain districts of Scotland and Wales during the earlier portion of the 18th century.

Stainer and Barrett in their Dictionary of Musical Terms suggest that 'hornpipe' has been originally 'cornpipe' named from a pipe of straw, and mentioned by Shakespeare in the line, 'When shepherds pipe on eaten straws'; but the present writer would rather refer it to its more obvious original, a pipe made from a horn.

As a dance the hornpipe was well known in this country in the 16th century. There is a 'Hornepype' by Hugh Aiston (temp. Hen. VIII.) in the Brit. Mus. MSS. Reg. Appendix 58, a portion of which is printed in Woolridge's edition of Chappell's Popular Music. Barnaby Rich, writing in 1581, mentions its popularity, and Ben Jonson in the Sad Shepherd speaks of it as 'the nimble hornpipe.' Among the country people of Lancashire and Derbyshire the hornpipe was much cultivated, and for a long time after its disappearance in other parts, these counties were famous for it.

Hawkins names one John Ravenscroft, a Wait of the Tower Hamlets, who was especially noted for the playing and composition of hornpipes; he prints a couple of these (in date about 1700) in his History. All these early hornpipes are in triple time, and the method of dancing them is now unknown. As many are included in collections of country dances some would be danced as these are, but there is a probability that they were also, like the modern hornpipes, danced by a single performer to either a bagpipe or a violin. Though there are several books of hornpipes mentioned in the advertisements of early 18th century music books, yet very few collections have survived in our libraries. One of the books of hornpipes so advertised (in Keller's Thorough Bass published by John Cullen in 1707) is called 'A Collection of original Lancashire Hornpipes old and new . . . being the first of this kind published. Collected by Thomas Marsden, price 6d.'

The following is a fairly typical example of an early triple time hornpipe; it is found in several books of country dances issued about 1735 as—Wright's Collection of 200 Country Dances, vol. i., and one of Walsh's Compleat Country Dancing Master, etc.

Excerpt from The London Hornpipe:

Earlier specimens may be seen under the titles 'Ravenscroft's Hornpipe' and 'Bullock's Hornpipe,' in the third volume of The Dancing Master (Pearson and Young), circa 1726.

About 1760 the hornpipe underwent a radical change, for it was turned into common time and was altered in character. Miss Anne Catley, Mrs. Baker, Nancy Dawson, and other stage dancers, introduced it into the theatre, and they
have given their names to hornpipes which are even now popular.

Dr. Arne included a couple of common time hornpipes into his version of 'King Arthur,' 1770.

A specimen of the late hornpipe (circa 1788) is here given. It is named after one Richer, a rope and circus dancer of some celebrity in his day.

Richer's Hornpipe.

The stage hornpipe was generally danced between the acts or scenes of a play even as late as 1810 or 1850.

The hornpipe's association with sailors is probably due to its requiring no partners, and occupying but little dancing space—qualities essential on shipboard.

The latest modern development of the hornpipe is to break up the regular time and even notes of the old common time ones, by making the bars up of dotted quavers and semiquavers, producing a sort of 'Scotch snap.'

Handel ends the seventh of his 12 Grand Concertos with one which may serve as a specimen of the hornpipe artistically treated. In his 'Semele' the chorus, 'Now Love, that everlasting boy,' is headed alla Hornpipe. v. k.

HORSLEY, William, Mus.Bac., born in London, Nov. 15, 1774, having at the age of sixteen chosen music as a profession, was articled for five years to Theodore Smith, a pianist and minor composer, from whom he received but small instruction and much ill-usage. He profited greatly, however, by his intimacy with the three brothers Pring and Dr. Calcott, his association with whom led him to the practice of purely vocal composition, and he soon produced many excellent glees, canons, and rounds, besides services and anthems. He became organist of Ely Chapel, Holborn, in 1791, and was made a member of the Royal Society of Musicians in 1797. In 1798 a suggestion of his resulted in the establishment of the CONCENTORES SODALES. About the same time he was appointed assistant organist to Dr. Calcott at the Asylum for Female Orphans, upon which he resigned his appointment at Ely Chapel. On June 18, 1800, he graduated Mus.B. at Oxford, his exercise being an anthem, 'When Israel came out of Egypt.' On the revival of the Vocal Concerts in 1801, Horsley produced several new compositions, and for several years continued to supply them, not only with glees and songs, but also with instrumental pieces, amongst which were three symphonies for full orchestra. In 1802, Calcott having resigned the organistship of the Asylum, Horsley was appointed his successor. In 1812 he was chosen organist of the newly erected Belgrave Chapel, Halkin Street, Grosvenor Place, which he held in conjunction with the Asylum. He was one of the founders of the Philharmonic Society in 1813. In 1818 he succeeded J. S. Stevens as organist of the Charter House, still retaining his other appointments. [He was elected member of the Royal Academy of Music at Stockholm in 1847.]

Horsley published five Collections of Glees (1801–7); a Collection of Hymn and Psalm Tunes, 1820; a Collection of forty Canons; a Collection of Psalm Tunes with Interludes, 1828; many single glees and songs, sonatas, and other pieces for the pianoforte, and An Explanation of the Major and Minor Scales, 1825. He contributed several glees to Clementi and Co.'s Vocal Harmony, the second edition of which was issued under his care. He edited a Collection of the Glees, etc., of Dr. Calcott, to which he prefixed a memoir of the composer and an analysis of his works, and Book I. of Byrd's 'Cantiones Sacrae' (for the Musical Antiquarian Society). Horsley holds a deservedly high rank among glee composers. His 'By Celia's Arbor,' 'See the Chariot at Hand,' 'Mine be a Cot,' 'Cold is Cadwallao's Tongue,' 'O Nightingale,' and others, have long held, and will doubtless long continue to hold, a foremost place in the estimation of lovers of that class of composition. He died June 12, 1858, and was buried in Kensal Green Cemetery. He married in 1813 Elizabeth Hutchins, eldest daughter of Dr. Calcott, who survived him until Jan. 20, 1875. During Mendelssohn's visit to England in 1829 he began an acquaintance with the Horsley family which ripened into an intimate friendship, as is evident from the letters printed in Goethe and Mendelssohn.

Horsley's son, CHARLES EDWARD, was born in London, Dec. 16, 1822, and instructed in music by his father, and in the pianoforte by Mozcheis. His promise was so great that he was sent, in 1839, on Mendelssohn's advice, to study under Hauptmann at Cassel, whence he afterwards went to Leipzig, and enjoyed the friendship and instruction of Mendelssohn himself. Whilst in Germany he produced several instrumental compositions, amongst them a Trio for pianoforte, violin, and violoncello, and an overture, the latter performed at Cassel in 1845. Returning to England he became organist of St.

1 See Letter Jan. 17, 1809, in Goethe and Mendelssohn, 166.
2 Ibid. March 13, 1841.
John's, Notting Hill, and produced several important works—'David,' and 'Joseph,' oratorios, both composed for the Liverpool Philharmonic Society; and 'Gideon,' oratorio, composed for the Glasgow Musical Festival, 1860; an anthem for the consecration of Fairfield Church, near Liverpool, 1854; and music for Milton's 'Comus,' besides many pieces for the pianoforte, songs, etc. In 1862 he quitted England for Australia, becoming organist of Christ Church, South Yarra, Melbourne; while there he wrote an ode entitled 'Euterpe,' for solos, chorus and orchestra, for the opening of the Town Hall, Melbourne, in 1870.1 After remaining in Melbourne for some time he removed to the United States, and died at New York, Feb. 28, 1876. His body was brought back to England and buried in the family grave in Kensal Green Cemetery. He edited his father's Glee in 1873, and a Text Book of Harmony by him was published posthumously in Dec. 1876, by Sampson Low & Co. [Additions and corrections from Dict. of Nat. Bio., private sources, etc.]

HORTENSE Eugénie de Beauharnais, daughter of Josephine, Queen of Holland and mother of Napoleon III., known as 'La reine Hortense,' born in Paris, April 10, 1783, died at Viry, Oct. 5, 1837, the reputed authoress (at Utrecht, 1807) of both words and melody of 'Partant pour la Syrie,' an air which was to the Second Empire what the 'Marseillaise' was to the Republic. Her musical knowledge was very slight, but in Drouet she had a clever musician for secretary, who has left an amusing account2 of the manner in which he was required to reduce into form the melodies which she hummed. Whether Drouet or the Queen of Holland were the real author of the pretty tune in question, it is certain that she will always be credited with it.

M. C. C.

HOSANNA, a Hebrew word, hosahna na, meaning 'Save now!' (Psalm cxviii. 25), used as an exclamation of triumph in Matt. xxi. 9, etc. In its Latin form Asenna in ecclesia it occurs in the Mass, after both Sanctus and Benedictus. [Mass.] In English music the word will always live in the grand anthem of Orlando Gibbons, 'Hosanna to the Son of David.'

HOTTHBY, JOHN. Nothing is known of the early life of this learned musician beyond the fact that he was born in England and belonged to the Carmelites order. He is said to have travelled in Spain, France, and Germany, and to have settled about 1440 in Florence; other accounts say that he lived for many years at Ferrara; he certainly left traces of his work in both of these places. Hotthy, or Ottobi, as he was called in Italy, is known to have spent the greater part of the last seventeen or eighteen years of his life at Lucca, from about 1468 to March 1486, in which year he was summoned back to England by his sovereign, Henry VII.

He is said to have returned at once to England, and to have died Nov. 6, 1487. Certainly his death was announced to the chapter of Lucca on Nov. 10 in the latter year. He appears to have been invited there by the Canons of St. Martin's to teach music in their schools, in which he was most successful, judging from the testimonial given to him by the Commune of Lucca on his departure. Besides being Doctor of Music he was Doctor of Theology, and held several important ecclesiastical prebendaries in the town of his adoption. In addition to music in various branches, he also taught grammar and arithmetic in the schools of St. Martin's. His only known works are—(1) 'Ars Musica'; (2) a dialogue on music, in which the author quotes, among others, Dunstable, Dufay, and even Okeghem; (3) a letter in Italian, refusing the censures of Osmonse, a Spaniard (of these three there are copies in the National Library at Florence); (4) 'La Calliopea Legale' (copies in the same library; at Venice; and, in an epitomised form, at the British Museum); (5) 'Regulae super Proportionem' (copies in the libraries of the Liceo Communale at Bologna, at Venice, and in the Bibliothèque Nationale at Paris—the latter dated 1471, and in the hand of a pupil of Hotthy's); (6) 'De Cantu Figurato'; (7) 'Regulae super Contrapunctum'; (8) 'Manus per genus distinonum declara'; (9) 'Regulae de Monochordo manuali' (copies of these last four at Bologna); (10) 'Quid est proprictio' (copies at the British Museum and Lambeth Palace); (11) 'Tractatus quaedam regurarum artis musices' (copies at Florence and at the British Museum); (12) another treatise on counterpoint, beginning 'Consonantia interpretatur sonus eun alio sonans' (in the Paris MS., immediately following the 'Regulae super proportionem,' but without Hotthy's name attached to it). No. 4 has been published by Coussemaker in his Histoire de l'harmonie au moyen âge, p. 295; and Nos. 5-7 in his Scriptores of Musico; vol. iii. pp. 328-334. The Bologna MS. is itself a copy of one at Ferrara (since lost), said to have been made by Padre Martini; the Ferrara MS. contained also a 'Kyrie,' a 'Magnificat,' and other compositions by Hotthy.

A. H. H.

HOVINGHAM FESTIVAL. See Festivals, ante, p. 28b.

HOWARD, SAMUEL, Mus.Doc., born 1710, a chorister of the Chapel Royal under Croft, and subsequently a pupil of Pepusch; was afterwards organist of St. Clement Danes, and St. Bride, Fleet Street. In 1744 he composed the music for 'The Amorous Goddess; or, Harlequin Married,' a pantomime produced at Drury Lane. In 1769 he graduated as Doctor of Music at Cambridge. He composed numerous songs and cantatas (many of which appeared under the name of 'The British Orpheus,' in several books.
and others in various collections), sonatas, and other pieces for instruments. He assisted Boyce in the compilation of his 'Cathedral Music.'

He died in London, July 13, 1782. An anthem of his, with orchestra, 'This is the day,' was published in 1782. A melodic song by him, 'O had I been,' from 'Love in a Village,' is given in the Musical Library, vol. iii. w. h. n.

HOWELL, JAMES, was born at Plymouth in 1811. Possessing a fine voice he was, at an early age, taught singing, and at ten years of age sang in public. He was brought to London in 1824, and in the next year admitted a pupil of the Royal Academy of Music, where he studied singing under Rovedino and afterwards under Cylveli, and the pianoforte and clarinet under T. M. Maddie. He subsequently learned the double bass under Anfossi, and made such rapid progress that he decided upon making it his special instrument. He continued a pupil of the Academy for about five years, during part of which time he acted as sub-professor of the double bass. On the cessation of his pupilage he was appointed a Professor, and afterwards Associated honorary member of the Academy. He soon took his place in all the best orchestras, and on the death of Dragonetti in 1846 succeeded him as principal. He died August 5, 1879.

His elder son, Arthur, born in 1836, was an excellent double bass player and bass singer; for some time was stage manager to the Carl Rosa Opera Company, and died April 16, 1885; and his younger son, Edward, born Feb. 5, 1846, held the post of principal violoncello at the Royal Italian Opera, and in the principal orchestras for many years; he was educated at the Royal Academy of Music, at which he became professor of the violoncello. He was a member of Queen Victoria's Band and the Philharmonic Society, and appeared at the Crystal Palace and elsewhere as a soloist on many occasions. He adapted Romberg's treatise into A First Book for the Violoncello. He retired in 1896, and died Jan. 30, 1898.]

HOWGILL, WILLIAM, organist at Whitehaven in 1794, and afterwards in London; published 'Four Voluntaries, part of the third chapter of the Wisdom of Solomon for three voices, and Six favourite Psalm Tunes, with an accompaniment for the Organ'; 'Two Voluntaries for the Organ, with a Misericere and Gloria Tibi, Domine,' and 'An Anthem and two preludes for the Organ.' w. h. h.

HOYLAND, JOHN, son of a cutler at Sheffield, born in 1783, in early life a pupil of William Mather, organist of St. James's Church in that town. In 1808 he succeeded his master, and in 1819 removed to Louth, Lincolnshire, where he established himself as a teacher, and was shortly afterwards chosen organist of the parish church. He composed several anthems and other pieces of sacred music, besides songs and pianoforte pieces. He died Jan. 18, 1827. His son, William, was elected organist of Louth parish church in 1829, and held the appointment until his death, Nov. 1, 1857. w. h. h.

HOYLE, JOHN, was author of a dictionary of musical terms entitled Dictionarium Musice (sic), being a complete Dictionary or Treasury of Music, published in 1770, and republished with a varied title in 1790. It is a mere abridgment of Grassineau's Dictionary. See GRASSINEAU. Hoyle is said to have died in 1797. w. h. h.

HUBAY, JENO (originally known as EUGEN HUBER), violinist and composer, was born in Budapest, Sept. 14, 1853. From his father, Karl Hubay (Huber), violin professor at the Pest Conservatorium, and capellmeister of the Hungarian national opera, he received his first instruction, and was heard in public, in a Viotti concerto, at the age of eleven. But though hailed by the Hungarian press as a wonder-child, his precocity was, fortunately, not exploited, and he was sent at the age of thirteen to the Hochschule at Berlin, where he studied for five years under Joachim. During this period he was in the receipt of a Hungarian State stipend, and at its conclusion returned to Budapest. Subsequently (in 1878) visited Paris, appeared with success at the Pasdeloup concerts, and made the acquaintance of Vieuxtemps, whose intimate friend he became, and whose posthumous works were edited and in some cases completed by him (shortly after the composer's death in 1880). In 1882 was appointed to a post filled by many brilliant violinists, that of principal professor at the Brussels Conservatoire, but in 1886 accepted, from patriotic motives, an offer to return to his native town to fill the position at the Conservatorium which became vacant on the death of his father. Both at Brussels and Budapest he formed quartets, in the one place with Josef Servais, in the other with Hegyesy, as violoncello. He has toured as a soloist in most European countries, and by virtue of a certain romantic quality to be noticed in his style and tone (he plays on a very fine Amati) has made a great name on the Continent. As a quartet leader he was enthusiastically praised by Brahms. He is the composer of a successful two-act opera based upon Coppée's 'Luthier de Crémonne,' a four-act opera 'Almoh,' and a Hungarian opera 'A Fahu Rossza.' He has written also several songs, a 'concerto dramatique' for violin, a 'sonate romantique' with pianoforte, and countless violin pieces, of which the 'Scenes from the Czardas' are the type, founded mostly upon Hungarian national tunes. They are in the repertory of most violinists, and are popular all the world over. w. w. c.

HUBER, HANS, born June 28, 1852, at Schönewerd in Switzerland, studied from 1870 to 1874 at the Leipzig Conservatorium, and subsequently, after two years' experience as a teacher in Basle,
where he succeeded H. Bagge as director of the music school in 1896. He received the honorary degree of D.Phil. from the university in 1892. His compositions, most of which are for the piano, either in combination with other instruments or alone, show the strong influence of Brahms, but not to the exclusion of the more romantic style of Liszt. Two operas, 'Weltfrühling' (Basle, 1894), and 'Kudrun' (Basle, 1896), a fairy opera 'Florestan,' concertos for piano and for violin, three trios, a pastoral sonata for piano and violoncello, a 'Tell-symphonic' (op. 63), 'Sommernächte,' a serenade (op. 87), 'Carneval,' 'Ländliche Symphonie,' and 'Romischer Carneval,' for orchestra, as well as piano pieces and songs, may be mentioned.

HUBERMAN, Bronislav, violinist, was born Dec. 19, 1882, at Czenstochowa, near Warsaw. He received his first instruction from Michalowicz, a teacher in the Conservatorium, and performed, at the age of seven, Spohr's second violin concerto, besides taking the leading part in a quartet of Rohe. After taking a short course of lessons under Isidor Lotto, a distinguished pupil of the Paris Conservatoire, he was taken by his father, in May 1892, to Berlin, where he studied for eight months under the direction of Joachim, and was able already in 1893 to make public appearances in Amsterdam, Brussels, and Paris. Playing in London in May 1894, he attracted the notice of Adelina Patti, who introduced him the following year to an Austrian audience, engaging him to play at her farewell concert given at Vienna on January 12, 1895. At this concert he made a sensation, and attracted the favourable notice not only of the capricious Viennese public, but also of Hanslick and Brahms. He then made tournées through Austria, Italy, Germany, Russia, America, and England (1904). An incident of his Italian journey was his engagement by the Municipality of Genoa to play, in one of the chambers of the Town Hall, on Paganini's Guarnerius violin, an honour he shares with the late Camillo Sivori. This took place on May 16, 1903. Hubermann is a resident of Berlin, and a prominent figure in the musical life of that city. As an artist he may be described as eclectic, having attached himself to no particular school, and worked out his own musical salvation. With an excellent technique, especially of the right hand, he is able to give a good account of all the great concertos and solos for the violin, whilst the hope has been expressed by his friends that he will devote more attention than he has hitherto done to chamber music, for which his interpretative gifts and depth of feeling pre-eminently suit him. W. W. C.

HUBERT. See PORPORINO.

HUCBALDUS DE S. AMANDO (HUBALD DE S. AMAND; HUBALD DE S. AMAND). Our knowledge of the condition of Music during the early Middle Ages is derived chiefly from the information furnished by three learned writers, of whom the earliest was a monk, named Hucbald, of S. Amand sur l'Elson, in Flanders, who is frequently mentioned under the title of Monachus Elnonensis. He was born about the year 840, and flourished, therefore, a full century before Guido d'Arezzo, and a century and a half before Magister Franco—the only two writers whose musical treatises possess an interest comparable with his own. Of the details of his life we know but very little more than that he was a disciple of S. Remi of Auxerre, and the intimate friend of S. Odo of Cluny; that he was a poet, as well as a musician; and, that he died, at a very advanced age, in the year 930. But of his life work we know all that need be desired.

Of Hucbald's Enchiridion or tract, De Harmonica Institutione—the only work by him that has been preserved to us—the two most perfect copies known are those in the Paris Library, and in that of S. Benet's (now Corpus Christi) College, Cambridge. The title of the Paris MS. is Enchiridion Musicae. The Cambridge MS. forms part of a volume entitled 'Musica Hodi,' sive Exceptiones Hodi Abatias ex Autoribus Musicae Artia,' and containing, besides the Enchiridion of Hucbald, a less perfect copy of another Enchiridion by his friend, S. Odo of Cluny, which, though written in Dialogue, resembles it, in many respects, so closely that copies of the one MS. have sometimes been mistaken for the other. In this tract Hucbald describes, under the name of Symphonia, the primitive form of Part-writing called, by Guido d'Arezzo, Diaphonia, or Organum, and, by Magister Franco, Discant. Of this Symphonia he mentions three kinds, which he calls Diatessaron Symphonia, Diapente Symphonia, and Diapason Symphonia; in other words, Harmony in the Fourth, the Fifth, and the Octave. Examples of these rude attempts at Harmony will be found in the article Notation. But, in addition to the rules for the construction of these, he tells us, in his eighteenth chapter, that so long as one voice continues to sing the same note, the others may proceed at will; of which method he gives the following example:

These examples are written in a peculiar form of notation invented by himself, which is exhaustively described and illustrated by his own examples in the article above referred to. He did not, however, confine himself entirely to this ingenious device, but supplemented it by

---

1 He dedicated to the Emperor, Charles the Bald, a poem in praise of baldness, beginning 'Carmina Clarissi, Calva, Cantate Claronem,' in which every word begins with the letter C, etc.

2 No. 229.

3 Our colx.

4 Hucbald and S. Odo were both disciples of S. Remi of Auxerre.

5 S. Odo was born A.D. 873, and died in 942.

---
the invention of fifteen arbitrary signs, for representing the notes of the Gamut, from F to d'. The signs for the four finals of the authentic mode which form his second tetrachord are as follows:—

Primum qui et gravissimus Graece Protons dictur vel Archos.

Secundus Deuterons tono distans a Proto.

Tertius Tritos semitono distans a Deutero.

Quartus Tetrados tono distans a Trito.

The number of examples given in illustration of these principles, and others deduced from them, is very great; and the tract concludes with an account of the descent of Orpheus into Hades, in search of Eurydice.

HUGEBUT, Jno. A London music-publisher, who employed Heptinstall and other printers. His name is attached in 1879 to an exceedingly curious engraved work (probably unique), now in the Bodleian Library, A Tale Comun for the Lovers of Music showing the Excellency of the Recorder... MDCLXXIX, London, printed by N. Thompson for John Hugebut, at the sign of the Golden Harp, and Holyday in Chancery Lane. Oth. Svo. In 1895 he published from Heptinstall's press the Songs in the Italian Queen... by Mr. Henry Purcell, and in the preface he, with another bookseller who was concerned in the work, calmly confesses that it is published without knowledge of the author.

F. K.

Hudson, Robert, Mus.B., born in London, Feb. 25, 1752, was a tenor singer, and sang when a young man at Ranelagh and Marylebone Gardens. In 1755 he was assistant organist of St. Mildred, Bread Street. In 1766 he was appointed vicar-choral of St. Paul's, in 1768 a gentleman of the Chapel Royal, and in 1773 almoner and master of the children of St. Paul's, which offices he resigned in 1793. He was also music master at Christ's Hospital. Hudson was the composer of 'The Myrtle,' a collection of songs in three books, published in 1767; of a service and some chants, and many hymn tunes. He also set for five voices the lines on Dr. Child's monument at Windsor, commencing 'Go, happy soul.' He died at Eton, Dec. 18, 1815. His daughter Mary was, in 1790, and till her death, March 28, 1801, organist of St. Olave, Hart Street, and St. Gregory, Old Fish Street. She was the composer of several hymn tunes, and set for five voices the English version of the Latin epitaph on Purcell's gravestone, 'Applaud so great a guest.'

W. H. H.

HUE, Georges Adolphe, French composer, born at Versailles, May 6, 1858, studied under Reber and Paladilhe, and competed for the Grand Prix de Rome in 1878, when he obtained honourable mention, and the prize itself in 1879. The 'Crescent' prize was awarded to him in 1891, and that offered by the city of Paris in 1856. Hie is a master of the art of musical colour, and is also remarkably skillful in the development of his ideas; he excels in works of an elegiac character. He has written numerous songs, choruses, a symphonic overture, a symphony, 'Rubezahl,' a symphonic legend in three parts (Colonne concerts, 1886); 'Resurrection' (Concerts du Conservatoire, 1892); 'La Berger,' a 'Ballade et Fantaisie' for violin (Colonne Concerts, 1893); 'Jeunesse,' on a poem by Hettich (Colonne Concerts, 1897); etc. His works for the stage have been received with various degrees of favour. They are 'Les Pantins,' opera-comique, two acts (Opera Comique, Dec. 28, 1881); 'Coeur brisé,' pantomime (Bouffes Parisiens, 1890); 'La Belle au Bois dormant,' incidental music (Theatre de l'Opera, 1894); 'Le Roi de Paris,' lyric drama, three acts (Opera, April 26, 1901); 'Titania,' musical drama, three acts (Opera Comique, Jan. 20, 1903).

HUEFFER, Francis, Ph.D., author and musical critic, was born at Münster, May 22, 1843. After studying modern philology and music in London, Paris, Berlin, and Leipzig, he fixed his residence in London and devoted himself to literary work. His first articles appeared in the North British Review, in the Fortnightly Review (when under Mr. John Morley's editorship), and in the Academy, of which he became assistant editor. At a time when England hesitated to acknowledge the genius of Wagner, Hueffer brought home to amateurs the meaning of the modern developments of dramatic and lyrical composition by the publication, in 1874, of his Richard Wagner and the Music of the Future. He was in 1878 appointed musical critic of The Times, and consistently followed up his advocacy of the modern in art by supporting the claims of living English musicians. He also wrote librettos for several eminent English composers. Thus 'Colomba' and 'The Troubadour' were written for MacKenzie, and 'The Sleeping Beauty' for Cowen. He made an excellent adaptation of Boito's libretto of Verdi's 'Otello.'

As early as 1869 Mr. Hueffer had published a critical edition of the works of Guillaume de Cabestan, which gained him the degree of Ph.D. from the University of Göttlingen, and led to his election to the 'Fellowship of the Fellbrigg,' or Society of modern Troubadours, of which Mistrail (the author of Mireille), Théodore Ambaël, and other distinguished poets were the leading spirits. The Troubadours, a history of Provencal life and literature of the Middle Ages, appeared in 1878; and a series of lectures on the same subject was delivered at the Royal Institution in 1880. A collection of Musical Studies from The Times, etc., was published in 1880, and soon appeared in various translations; The Life of Wagner, the first of the Great Musicians series, in 1881; Italian and Other Studies in 1883. The Correspondence of Wagner and Liszt, a translation, followed soon after the publication of the
Briefwechsel, by Breitkopf & Härtel in 1888. No more than a brief reference can be made to Hueffer's occasional contributions to the Quarterly and other reviews, and to some songs composed by him from time to time. He died in London, Jan. 19, 1889.

HUNTEN, FRANZ, pianist and composer, born Dec. 26, 1783, at Coblenz, where his father DANIEL was organist. In 1819 he went to the Paris Conservatoire, studying the piano with Pradher, and composition with Reicha and Cherubini. He lived by teaching and arranging pieces for the pianoforte, and in time his lessons and compositions commanded high prices, although the latter, with the exception of a trio concertante for PF, violin and violoncello, were of little value. His 'Méthode nouvelle pour le piano' (Schott) had at one time a reputation. In 1837 he retired to Coblenz, and lived on his means till his death, Feb. 22, 1878. His two brothers, WILHELM and FETTER, were for many years successful pianoforte teachers at Coblenz and Duisburg.F.G.

HUGUENOTS, LES. Opera in five acts; words by Scribe and Deschamps, music by Meyerbeer. Produced at the Académie, Feb. 29, 1836; in London, first by a German company, at Covent Garden, June 20, 1842; in Italian at Covent Garden as 'Gli Ugonotti,' July 20, 1848; in English at the Surrey Theatre, August 16, 1849. Like 'William Tell,' the opera is in England always greatly shortened in performance. [In the early days of Harris's operatic management at Drury Lane, this opera was given with the fifth act, and lasted till nearly one o'clock in the morning.]

For a remarkable criticism by Schumann see the Neue Zeitschrift, Sept. 5, 1837, and Gesammelte Schriften, ii. 228.

HULLAH, JOHN PEKE, LL.D., was born at Worcester, June 27, 1812, but came whilst very young to London, where his life was spent. He received no regular musical instruction until 1829, when he was placed under William Horsley. In 1833 he entered the Royal Academy of Music for the purpose of receiving instruction in singing from Grivelli. He first became known as a composer by his music to Charles Dickens's opera, 'The Village Coquettes,' produced at the St. James's Theatre, Dec. 5, 1836. [The whole of the music was destroyed in a fire at the Edinburgh Theatre soon after the production of the piece there.] This was followed by 'The Barbers of Bassora,' a comic opera, produced at Covent Garden Theatre, Nov. 11, 1837, and 'The Outpost,' at the same theatre, May 17, 1838. [In 1837 he became organist of Croydon Church, and composed some madrigals.] Soon after this Hullah's attention was turned to that which became subsequently the business of his life—popular instruction in vocal music; and attracted by the reports of Mainzer's success as a teacher, he visited Paris, only to find Mainzer's classes entirely dispersed. In 1839 he went to Paris, and remained for some time observing Wilhem's classes, then in the full tide of success. On his return to England he made the acquaintance of the late Sir James Kay Shuttleworth, then Dr. Kay, and undertook the instruction of the students in the Training College at Battersea, the first established in England, and just opened under the direction and at the cost of Dr. Kay and Mr. Edward Carlton Tufnell. On Feb. 18, 1840, he gave his first class-lesson at Battersea, and from that day dates the movement he originated. On Feb. 1, 1841, he opened at Exeter Hall a school for the instruction of schoolmasters of day and Sunday schools in vocal music by a system based on that of Wilhem, which met with remarkable success. Not only schoolmasters, but the general public flocked to obtain instruction, and country professors came to London to learn the system and obtain certificates of being qualified to teach it. The system was acrimoniously attacked, but it outlived all opposition. From his elementary classes Hullah formed two schools, an upper and a lower, and commenced giving concerts in Exeter Hall, the members of his upper school forming his chorus, and the orchestra being completed by professional principal singers and instrumentalists. Remarkable among these were four historical concerts illustrating in chronological order the rise and progress of English vocal music, given at Exeter Hall on Mondays in the first four months of 1847. At this time his friends and supporters determined on erecting and presenting to him a concert hall, and, having procured a piece of ground near Long Acre, the foundation stone of St. Martin's Hall was laid June 21, 1847. The hall was opened, although not entirely completed, on Feb. 11, 1850, and Hullah continued to give his concerts there until the building was destroyed by fire August 25, 1860, on the occurrence of which event his friends and pupils testified their gratitude and sympathy for him by the presentation of a handsome testimonial. During the existence of the upper school he brought forward a large number of unknown works, old and new. From 1840 to 1860 about 25,000 persons passed through his classes. In 1844 Hullah was appointed Professor of Vocal Music in King's College, London, an office which he held till 1874. He held similar appointments in Queen's College and Bedford College, London, with both of which he was connected from their foundation. From 1870 to 1873 he was conductor of the students' concerts of the Royal Academy of Music. On the death of his old master, Horsley, in 1858, Hullah was appointed organist of the Charter House, where since 1841 he had carried on a singing-class. For many years he conducted the annual concert of the Children of the Metropolitan Schools at the Crystal Palace.
In March 1872 he was appointed, by the Committee of Council on Education, Inspector of Training Schools for the United Kingdom, which office he held till his death. In 1876 the University of Edinburgh unexpectedly conferred on him the honorary degree of LL.D., and in 1877 he was made a member of the Society of St. Cecilia in Rome and of the Musical Academy in Florence. [In 1880 and 1883 he was attacked by paralysis, and died in London, Feb. 21, 1884, being buried in Kensal Green Cemetery.] Hullah composed many songs, some of which —such as ‘O that we two were Maying,’ ‘Three Fishers,’ ‘The Storm’—were very popular, and wrote A Grammar of Vocal Music (1843), A Grammar of Harmony (1852), and A Grammar of Counterpoint (1864), The History of Modern Music (1862), and The Third or Transition Period of Musical History (1865) (courses of Lectures delivered at the Royal Institution of Great Britain), The Cultivation of the Speaking Voice (1870), Music in the House (1877), and numerous essays and other papers on the history and science of music contributed to various periodicals. He edited Willens’s Method of teaching Singing, adapted to English use (1841). The Psalmist, a Collection of Psalm Tunes in four parts (1853), The Book of Praise Hymnal (1868), The Whole Book of Psalms, with Chants; and a large number of vocal compositions in parts, and other publications for the use of his classes. Amongst these should be named Part Music (reprinted as Vocal Music), for four voices, and Vocal Scores,—two most admirable collections; Sacred Music (1867), The Singer’s Library; Sea Songs, etc. etc. [See Part Music, Vocal Scores.] [A memoir by his second wife was published in 1886; it has been used in correcting the above article.]

HUME, TOBIAS, an officer in the army, and an excellent performer on the viol-da-gamba; published in 1605 ‘The First Part of Ayres, French, Polish, and others together, some in Tabliture, and some in Prick-Song. With Pavines, Galliards, and Almaines for the Viole de Gambo alone . . . and some Songs to bee sung to the Viole,’ etc., containing 116 airs in tabliture and five songs. ‘The title ‘Musicall Humors,’ sometimes applied to the publication of 1607, is printed at the top of every page of the ‘First Part of Ayres.’] In 1607 he published ‘Capitaine Hume’s Poetical Musicke principally made for two basse-viols, yet so contrived that it may be played eight several waiues upon sundry instruments with much facility,’ etc., containing eighteen instrumental and four vocal pieces. In 1642, being then a poor brother of the Charter House, he presented a ‘True Petition of Colonel Hume’ to the House of Lords offering his services against the Irish rebels, which he afterwards printed, but it is evident from its contents that he was labouring under mental delusion. [There is no authority for his rank of colonel. He died April 16, 1645.]

HUMFREY, ELHAM (as he himself wrote his name, although it is commonly found as Humphry or Humphrys, with every possible variety of spelling), was born in 1647. He is said to have been a nephew of Colonel John Humphrey, a noted Cromwellian, and Bradshaw’s sword-bearer. In 1660 he became one of the first set of Children of the re-established Chapel Royal under Captain Henry Cooke. Whilst still a chorister he showed skill in composition, as appears by the second edition of Clifford’s ‘Divine Services and Anthems,’ 1664, which contains the words of five anthems composed by Elham Humfrey, one of the Children of His Majesties Chapell, the music of two of which is still extant. During the same period he joined Blow and Turner, two of his fellow-choristers, in the composition of what is commonly known as the Club-Anthem. In 1664 he quitted the choir and was sent abroad by Charles II. to pursue his studies. He received from the Secret Service money in that year ‘to defray the charge of his journey into France and Italy, £200’; in the following year from the same source £100, and in 1666, £250. His studies were prosecuted chiefly in Paris under Lully. On Jan. 24, 1666-67, he was during his absence appointed a Gentleman of the Chapel Royal in the room of Thomas Hazard, deceased. He returned to England in the following October, and on the 26th was sworn into his place. [Amusing references to Humfrey’s skill and conceit are in Pepys’s Diary, Nov. 1667.] Anthems by him were at once performed in the Chapel Royal. On the death of Captain Cooke, Humfrey was appointed his successor on July 30, 1672, as Master of the Children. On Aug. 8 following he had a patent (jointly with Thomas Purcell) as ‘Composer in Ordinary for the Violins to His Majesty.’ Humfrey died at Windsor, July 14, 1674, at the early age of twenty-seven, and, three days afterwards, was buried in the cloisters of Westminster Abbey, near the south-east door. He was the composer of several fine anthems, seven of which are printed, but without the orchestral parts, in Boyce’s Cathedral Music. The greater part of these, together with six others and the Club Anthem, also an Evening Service in E minor, are contained in the Tudiway Collection (Harl. MS. 7338), and others are extant at Ely, Salisbury, Windsor, Oxford, and the Fitzwilliam Museum. Many are also in the Royal College of Music. Three Sacred Songs by him, and a Dialogue, composed jointly with Blow, are printed in ‘Harmonia Sacra,’ book ii. 1714.

1 Said by Dr. Tudway to have been composed on a naval victory over the Dutch by the Duke of York; but it cannot have been so, as no such event occurred until June 1665, at which time Humfrey was abroad. The statement of Dr. Boyce and others that it was composed as a memorial of the fraternal esteem and friendship of the authors is much more probable. Humfrey is said to have composed the former, and Blow the latter portion of the anthem, Turner’s share being an intermediate bass solo.
He composed two Odes for the King's Birthday, 'Smile, smile again,' and 'When from his throne,' and an Ode for New Year's day, 'See, mighty sir.' Many songs by him are included in 'Choice Ayres, Songs and Dialogues,' 1768-1854; and on the rare, separately-paged, sheet inserted in some copies of book 1 of that publication, containing 'The Ariel's Songs in the Play cal'd The Tempest' (Dryden and Davenant's alteration printed in 1670), his setting of 'Where the bee sucks' is to be found. His song 'I pass all my hours in a shady old grove' was first printed in the appendix to Hawkins's History. J. S. Smith included five songs by Humfrey in his 'Musica Antiqua,' amongst them, 'Wherever I am and whatever I do,' composed for Dryden's 'Conquest of Granada,' part 1, 1672. Humfrey is said to have been the author of the words of several songs published in the collections of his time, and to have been a fine lutenist. He introduced many new and beautiful effects into his compositions. He was the first to infuse into English church music the new style which he himself had learnt from Lully, and which was carried much farther by Purcell (see Hallab's Modern Music, Lect. 4). His predilection for minor keys was remarkable. [A curious orchestral piece attributed to him in the Conservatoire of Brussels, is mentioned in the Quellen-Lexikon as being set for strings, oboes, trumpets, and drums, but Dr. Eitner thinks it is hardly possible to assign it to so early a writer as Humfrey.]

HUMMEL, JOHANN NEPOMUK (properly Johan Nepomuka), was born on Nov. 14, 1785, and was the son of Joseph Hummel, the Director of the Imperial School of Military Music at Presburg. He married Elisabeth Röckl, an opera singer (born 1793, died at Weimar 1833); and as he died in 1837, he was a contemporary of Beethoven, Cramer, Kalkbrenner, Weber, and Field.

For the first musical studies of the little Johann his father selected the violin, but this only led to signal failure, and the boy was allowed to take up the piano instead. Upon this instrument he at once displayed a most remarkable facility, so much so that when, in the year 1795, the Imperial School at Presburg was dissolved, and Joseph Hummel obtained the position of conductor at Schönander's Theatre in Vienna, whither the boy accompanied him, Mozart was so struck with the child's playing that he offered to give him lessons, and for that purpose took him to live with him in his house in the Grosse Schuleinstrasse. Here the little Hummel remained for two years, and although his lessons were very informal and irregular he made immense progress, and Mozart predicted for him a brilliant future. Hummel was nine years old when he went to live with Mozart, and we can well imagine that to live for two years in daily intercourse with such stupendous genius, and to be brought into contact with all the distinguished people who frequented the house, would constitute a very paradise of musical and social education to a young, eager, and sharp-witted boy such as Hummel. At the close of the two years (1787) Hummel made his first appearance at a concert given by Mozart, and his success was so decided that his father resolved to take him on a concert tour through Germany and Holland; they then visited Edinburgh, where Hummel made a great success and then went south to London, where they lived for about a year, the boy meanwhile receiving instruction from Clementi. The change from the live melody of Mozart to the didactic scholarship of Clementi must have been an experience to the boy, but probably he gained more from the sound, logical method of Clementi than has usually been acknowledged by his biographers. Hummel's first concert in London was given at the Hanover Square Concert Rooms, May 5, 1792. The programme announced that 'Master Hummel' would play a Concerto (by Mozart), and the performance was given under the direction of Salomon. On the conclusion of the visit to London Hummel made a short stay in Holland, and by way of that country returned to Vienna in 1793. He then devoted himself to more serious study of composition under Albrechtsberger, who was now, at the age of sixty-seven, a veteran among teachers, but by no means superannuated. And in addition to the classic instruction of Albrechtsberger, and the advice of Haydn, Hummel also sought the assistance of Salieri for dramatic composition. It was presumably at this time that some, if not all, of his four operas were composed. Between this date and the year 1803 Hummel made a concert tour to St. Petersburg, where he was very well received, and accorded an ovation such as rarely falls to the lot of an artist. In 1803 he was back in Vienna, where he appears to have held an engagement in the Court Theatre; but in the following year, 1804, he accepted the very important post of capellmeister to Prince Esterhazy, a post rendered famous by the fact that it had been held for thirty-eight years by Haydn, who now resigned it, only on account of the increasing infirmities of old age. Hummel retained this post until 1811, and it was during his tenancy of office that Beethoven's Mass in C was first performed (1810), on which occasion some remark of Hummel's caused an unfortunate estrangement between him and Beethoven, which continued until the time when Hummel visited Beethoven in his last illness, and, almost in the shadow of death, the old enmity faded away.

1 It should be remembered that the piano, though still constructed with the light Viennese action, and buckskin hammer, favouring ease of execution and hardness of tone, was just receiving at the hands of Beethoven those improvements which have since been adopted by all the great piano-makers in the world.

2 Beethoven also came to Vienna in this same year, and placed himself under Haydn and Albrechtsberger, so that the two young men, fellow-students under two professors, probably became acquainted with each other.
Hummel resigned his post in 1811, and for the last time returned to Vienna, where he lived, without appointment, as a teacher and concert player until 1816, in which year he once more undertook the duties of court capellmeister, this time at Stuttgart. However, the duties or the surroundings seeming uncongenial, he in 1820 exchanged his appointment for a similar one at Weimar, an office which he retained until the time of his death. Frequent leave of absence was granted him, of which he took advantage to revisit Petersburg in 1822, and to visit Paris, on the conclusion of his Russian tour. The audiences in the French capital were delighted with his performances, and gave him unstinted applause. It was about this time that Hummel began to give up public playing, and to turn his attention to conducting the orchestra. It is true he made a visit to Paris again in 1829 but, being coldly received, immediately came to London, where his playing still excited the former enthusiasm. After a short sojourn in Weimar (1830-33), he returned to London as conductor of the German Opera Company at the King's Theatre. Here he seems to have remained only for one season, for he was again in Weimar in 1833, and never again left that city, until in 1837 death closed a brilliant career, full of triumphs, and plentifully sweetened with pleasant and enduring friendships. In appearance Hummel was large and rather ungainly, while his dress was the reverse of gaudy. His face was not full of artistic intelligence and culture, but was rather that of a healthy business man with an abundance of common sense and savoir faire.

Hummel as a composer displays a thorough mastery of the mechanism of his art, a keen sense of rhythm and compact form, a full appreciation of shapeliness, and a great command of appropriate ornamentation. The themes are usually concise and to the point, and there is a certain square cut about them which gives satisfaction to the hearer. The treatment is conducted with tact and discretion. Like those of polished men of the world, his creations, even if seeming to lack human sympathy, are always well behaved, tactful, and free from any gaucherie. His work, if sometimes artificial in style, is at all times well dressed, and although he does not pierce the depths of the human heart, he gives well-finished and beautifully symmetrical pictures of the surface. Compared to the work of more emotional writers, his music bears somewhat the relation that photography does to colour. Acquainted as he was from early infancy to the marked accuracy and impersonality of military music, in which there seems always present a certain measured blaring, and which appeals more to the excitement of a scenic display than to the more individual and domestic emotions; it is natural that he should lean to a like character of music in writing, and should give us precision even at the expense of sympathy. Associated afterwards with the shapely beauty of Mozart's themes and developments, he learned from that to give his work neatness and finish, even at the expense of warmth; and, accustomed, as a concert player, to judge his effects according to the amount of applause they evoked, he was at times too powerfully drawn by the charms of brilliant, if superfluous ornamentation, and away from deep thoughts and grand emotional ideas.

Unfortunately, much of Hummel's music is not accessible now, for many of the concerted works were never scored (at least the scores are not to be found), so that it is not possible to criticise some departments of his work justly; but the general character of all the work which still exists is very fairly described in the words already written. Considering that Hummel was the pupil of Mozart, Haydn, Salieri, Clementi, and Abrechtsberger; the fellow-pupil of Beethoven, and the teacher of Czerny, Hiller, Henselt, and Thalberg, to whom he doubtless transmitted his style, his music is almost exactly what might be expected from a brilliant virtuoso in such circumstances. Add to this the fact that he was a public player upon the piano with the old Viennese action, so eminently suited to a facile execution of light ornamentation, but deficient in expressing depth of emotion, and we have a pretty complete idea of Hummel's methods—and we no longer wonder at his making use of themes which at times were hardly worthy of the delicate and tasteful costumes in which he clothed them, or at his being apt to regard his music more from the standpoint of a virtuoso, than from that of a purely intellectual and emotional musician.

The same set of influences no doubt dominated Hummel's mind when he played; but it is hardly possible that a player, enviroined as he was by much of the finest talent the world has ever seen, can have been the mere animated machine that some would have us believe. Wherever he appeared as a pianist, Hummel achieved very distinct success; and in order to hold his own with credit in a city where, under the refreshing shadow of Mozart and Haydn, Beethoven reigned over an assemblage of ability, which contained Schubert, Moscheles, and Ries (in addition to those already named), a man must have had more than mere cleverness and dexterity to recommend him. Besides, Hummel's strongest point was his remarkable power as an extemporiser player. In this department he was considered a rival to Beethoven, a fact which speaks for itself. To take a high position as an extemporiser in such circumstances required great development of the mental and physical powers, wonderful skill in presentation, both in the imagination and upon the keyboard, and a full command of the instantaneous use of all the intricate devices of figures, passages, and ornamentation. The amount expected from an extemporiser in those
days was very great. Every kind of elaboration was required, and every phase of art-form suitable to the instrument used, from a simple melody up to a complete fugue, had to be well understood and readily expressed. To succeed in this branch of the art necessitated a musician far removed from a mere skilful designer or artful player. Hummel did not achieve his reputation as a pianist by performing his own compositions only, and therefore he must have had the 'gift of interpretation,' as well as the gift of speech; and in this connection it is pleasant to remember that the symphonies of Beethoven became known to many people, and perhaps were only known, through the medium of the excellent arrangements for Piano Duet, which were made by Hummel. This fact shows that on Hummel's part there was no narrow prejudice against Beethoven's work. His production of the great Mass in C strengthens this conclusion, and honour is due to a musician, who arranged or produced the work of an artist of whom even Albrechtsberger said, 'He has learnt nothing, and will never do anything well'; while Weber wrote, 'He is now quite ready for the asylum.' How little can a glorious mountain peak be appreciated by most of those who live so close to it that they cannot see its noble proportions! In his later years Hummel published his celebrated Piano School (1824), in which he advocates a rational system of fingering. Although of course not free from the tradition that the thumb should be forbidden to play upon the black keys, he argued that, apart from this restriction, the same shaped passage or figure should be fingered in the same way wherever it occurred, thus foreshadowing the modern method of fingering, alike in all keys.

He tried to alter the manner of playing the trill (which had hitherto followed the tradition of C. P. E. Bach, in beginning upon the auxiliary note) by insisting that it should commence upon the principal note: and when the principal note is an essential note of the melody, common sense would seem to be in Hummel's favour. He also tried to reverse the accepted meaning of the direct turn ~, and the inverted turn s, and to reverse the accent in the 'simplified trill' when accompanied by holding notes as in the Rondo of the 'Walstein' Sonata. The object of these last two changes is not so obvious as that of the first, though the third was suggested by the desirability of all the accents being placed upon the notes which would have sounded with the melody note, had there been no trill; a view which would certainly meet with the approval of harmonists. Hummel also suggested the use of this mark \(\Delta\) to indicate the use of the 'Celeste' Pedal, invented in its present form by Sebastian Erard, as distinguished from the 'shifting' Pedal, first used by Stein, which permitted the use of one, two, or three strings, at will. (Nach und nach mache Saiten,' Beethoven Sonata, op. 101.)

The Piano School altogether was a decided advance upon the previous methods, and a valuable contribution to the more logical development of the technique, which, already raised to a high degree of excellence by Clementi, Liszt, Schumann, and Chopin. It should be remembered that Czerny was the pupil of Beethoven and Hummel, that the playing of Hummel was a 'revelation to him,' and that he was the teacher of Liszt, so that modern pianists, whilst acknowledging their indebtedness to C. F. E. Bach and Clementi, owe a great deal to the Viennese School and to Hummel in particular.

Hummel's compositions, which number 127, contain the following items, of which those marked with a * are still played, the remainder having become practically obsolete. There are a great many more without opus numbers, and in many cases the same number is attached to two different compositions (see Quellen-Lexikon).

Bach.

Hummel.

principal note is an essential note of the melody, common sense would seem to be in Hummel's favour. He also tried to reverse the accepted meaning of the direct turn ~, and the inverted turn s, and to reverse the accent in the 'simplified trill' when accompanied by holding notes as in the Rondo of the 'Walstein' Sonata. The object of these last two changes is not so obvious
op. 81. sonata in F. minor. Piano.
82. Popowski, Russian songs.
83. trio in E.
84. POTPOURRI. Violoncello.
85. concerto in A minor, piano.
86. quartet for pf., and strings.
87. grand for four violins.
89. OFFERTORY. Alon Vengo, sop.
90. solo and orchestra [concert in B minor].
91. 6 vals aus dem Apollo.
92. duet sonata. Piano.
93. trio in D minor.
94. Potpourri for Violin and orchestra.
95. second ditto.
96. trio in e.
97. variations, piano and orchestra.
98. rondo.
99. notturno. Piano duet and two horns.
100. opera, matilde von guise.
101. overture in C.
102. variations, oboe and orchestra.
103. 3 grand waltzes.
104. sonata, clarinet and piano.

HUMORESKE. A title adopted by Schumann for his op. 20 and op. 88, no. 2, the former for piano solo, the latter for piano, violin, and violoncello. Heller and Grieg have also used the term the pianoforte pieces—op. 64 and opp. 9 and 16 respectively. There is nothing obviously 'humorous' in any of these, and the term 'caprice' might equally well be applied to them. Rubinstein also entitles his Don Quixote 'Humoreske,' but the 'humour' is there of a much more obvious and boisterous kind.

HUMPERDINCK, Engelbert, born at Siegburg in the Rhine provinces, sept. 1, 1854, is a composer who rose with lightning rapidity to a very high pinnacle of popular fame. After studying at the Gymnasium at Paderborn he entered the Cologne Conservatorium under Ferdinand Hiller in 1872, and while a student there he won (1876) the Frankfort Mozart Stipendium. By the aid of this fund he proceeded to Munich, where he was a pupil at first of Franz Lachner and later of Josef Rheinberger at the Royal Music School (1877-79). Next Humperdinck won the Mendelssohn Stiftung of Berlin in 1879, and promptly went to Italy, where at Naples he met Richard Wagner. At Wagner's invitation Humperdinck followed him to Bayreuth, and materially assisted him during 1880-81 in the preparations for the production of Parsifal. But having won still another prize in the latter year—the Meyerbeer prize of Berlin—he set out south once more, and after travelling again in Italy, France, and Spain, he settled for two years at Barcelona, where in 1885-86 he taught theory of music in the Conservatoire. In 1887 he returned to Cologne, and in 1890 till 1896 he was a professor at the Hoch Conservatorium in Frankfort-a.-M. and teacher of harmony in Stockhausen's Vocal School, as well as musical critic for the Frankfurter Zeitung. Meanwhile he had not been idle as a composer, for in 1850 he produced a Humoreske for orchestra, which enjoyed a vogue in Germany; in 1884 his popular choral work Das Glück von Edenhall was first sung, and the choral ballade Die Wallfahrt nach Klevlar in 1887, as well as a large quantity of music in smaller forms, for male or mixed choirs. In 1893 his masterpiece, the opera Hansel und Gretel (libretto by his sister A. Wette), was brought to a hearing at Weimar (London, Dec. 1895), and immediately captivated all music-lovers, so that it ran a rapid course the wide world over, and was warmly welcomed as an antidote to the then prevailing craze for the lurid work of the young Italian school of Mascagni, etc. This he followed up with another opera, or rather play accompanied with music through-out, Die Königskinder, in 1896, and Der Rosenkranz in 1902, neither of which made any success comparable with that of the first-named work. A 'Maurische Kaphodes' for orchestra was produced in 1898. In 1896 the Kaiser created Humperdinck Professor, and in 1897 he went to live at Boppard, but in 1900 he was once again in Berlin, where he had been appointed head of a Meister-Schule for musical composition, and a member of the Senate of the Royal Akademie der Künste. His opera, Die Heirath wider Willen, was brought out at Berlin, April 14, 1905. As a composer he has a complete mastery of technique, and in his operas he relied very largely upon folk-tunes; the tunes he invents are often beautiful, and are largely formed on the model of the folk-song.

R. H. L.

Humphreys, Samuel, was employed by Handel to make additions to the libretto of his oratorio 'Esther,' to fit it for public performance in 1732. He subsequently provided him with the words of 'Deborah' and 'Athaliah.' He was also author of 'Ulysses,' an opera set to music by John Christopher Smith, and of a poem on the Duke of Chandos's seat at Canons. He died at Canobury, Jan. 11, 1738, aged about forty years.

HUNGARIAN MUSIC. [See Magyar Music.]

Hunt, Arabella, singer, lutenist, and singing mistress, was the instructress in singing of the Princess (afterwards Queen) Anne. She was also a favourite of Queen Mary, who made her one of her personal attendants in order that she might have frequent opportunities of hearing her sing. Many of the songs of Purcell and Blow were composed for her. The beauty of her person equalled that of her voice. Congreve wrote an ode 'On Mrs. Arabella Hunt singing,' which is mentioned by Johnson as the best of his irregular poems. She died Dec. 26, 1705. After her death an engraving from her portrait by Kneller was published, with some panegyrical lines by Congreve (not from his ode) subjoined. W. H. H.

Hunt, Richard, a viol and other instrument maker at the sign of the Late in St. Paul's Church Yard, who from this address and in conjunction with Humphrey Salter published, in 1688, The Gentle Companion for the Recorder, ob. 8vo. According to Mr. Wheatley's new
edition of Pepys's *Diary*, Pepys on Oct. 25, 1661, called at Hunt's about his lute, which was almost done, having had a new neck for double strings. Three days later he went to St. Paul's Church Yard to Hunt's, and found his Theorbo ready, which pleased him, and for which he paid 20s., but is told that it is now worth 10L, and as good as any in England. In April and in August 1663 Pepys again is in communication with Hunt seeing, first, a 'Viall' which he is considering whether to buy and next, having bought it for 23s, is assured that he has 'now as good a Theorbo, Viall, and Viallin as is in England.'

HUNT, THOMAS, contributed to 'The Triumphes of Oriana,' 1601, the 6-part madrigal, 'Hark! did you ever hear so sweet a singing?' An anthem by him, 'Put me not to rebuke, is contained in Barnard's MS. collection in the Sacred Harmonic Society's library. Nothing is known of his biography. He is said to have been Mus.B., but no record of his degree is forthcoming.

HUNTER, ANNE, a Scotch lady, wife of John Hunter the surgeon, and sister of Sir Everard Home the physician. She was born 1742, and died 1821. The Hunters lived in Leicester Square during Haydn's first visit, and were intimate with him. Mrs. Hunter wrote the words for his twelve Canzonets (1792), of which the first six were dedicated to her and the second six to Lady Charlotte Bertie. Hunter's death (Oct. 16, 1793) put a stop to the acquaintance. Mrs. Hunter published a volume of poems (1801; 2nd ed. 1803), which are condemned by the *Edinburgh* and praised by *Blackwood*. She was also probably the author of both words and melody of 'Lady Anne Bothwell's Lament.' She is mentioned in Robert Burns's MS. 'Edinburgh Commonplace-Book,' and two poems by her—'To the Nightingale, on leaving Earl's Court, 1784,' and 'A Sonnet in Petrarch's manner'—are there copied out by the poet, the only poems which received that distinction.

HURDY GURDY (Fr. Vielle; Ital. *Liuta*, *Ghironda*, *Ribeca*, *Stampella*, Viola da *orbo*; Germ. *Bauernleier*, *Deutscherleier*, *Bettelreier*, *Drechleier*; Latinised, *Lyra rusticus*, *Lyra pagana*). Has a place among musical instruments like that of the Dulcimer and the Bagpipes, as belonging to rural life, and quite outside modern musical art. It is true that in the first half of the 18th century the Hurdy Gurdy or Vielle contributed to the amusement of the French higher classes, but evidently with that affectation of rusticity so abundantly shown when mock shepherds and shepherdesses flourished. Engel (*Musical Instruments*, 1784, p. 235) gives several titles of compositions where in the Vielle formed, in combination with Bagpipes (Musette), Flutes (of both kinds), and Hautbois, a *Fête Champêtre* orchestra. M. G. Chouquet (Catalogue du Musée du Conservatoire, Paris, 1875, p. 23) adds, for the instrument alone, sonatas, duos, etc., by Baptiste and other composers, and two methods for instruction by Bouin and Corrette. This music of a modern Arcadia seems to have culminated about 1750 in the virtuosity of two brothers, Charles and Henri Baton, the former playing the Vielle, which he had much improved, the latter the Musette. Their father, a luthier at Versailles, was a famous Vielle maker, who about 1716-20 adapted old guitars and lutes and mounted them as hurdy gurdies. Other eminent makers were Pierre and Jean Louvet, Paris, about 1750; Lambert, of Nancy, 1770-80; Delannay, Paris, and Berge, Toulouse. The last popular street-player in Paris was Barbu; according to M. Louis Paquerre he was to be heard before 1781, and was also heard in London. He is supposed to have been shot during the Commune.

The Hurdy Gurdy is an instrument the sound of which is produced by the friction of stretched strings, and the different tones by the help of keys. It has thus analogies to both bowed and clavier instruments. It is sometimes in the shape of the old Viola d'Amore (a viol with very high ribs), of the Guitar, or, as in the woodcut, of the Lute. Four to six tuning-peg in the head bear as many strings of catgut or sometimes wire, two of which only are carried direct to the tailpiece, and tuned in unison, and one or both are 'stopped' by a simple apparatus of keys with tangents, which directed by the fingers of the player's left hand, shortens the vibrating length to make the melody. The chanterelle has two octaves from the tenor G upwards; the drones are tuned in C or G; G being the lowest string in either key.

When in the key of C, the lowest drone is tenor C. The lowest drones are called Bourdons, the next higher open string is the Mouche. The Trompette which is again higher, a copper string next the two melody-strings, may be tuned as indicated and used at pleasure.

One or other of the bourdons, shown as round black notes in the examples, is silenced by a spring, according as the key is C or G.

In the cut showing the wheel and tangents one string only is used as a melody string. The ivory keys are the natural notes, the ivory the sharps. From the position in which the Hurdy Gurdy is held the keys return by their own weight. The longer strings, deflected and carried round the ribs or over the belly and raised upon projecting studs, are tuned as drones or bourdon strings. All these strings are set in vibration by the wooden wheel, which, being rosin, has the function of a violin bow, and is inserted crosswise in an opening of the belly just above the tailpiece, the motor being a handle at the tail-end turned by the player's right hand. There are two sound-holes in the belly near the wheel. The Hurdy Gurdy here represented is a modern French instrument ('Vielle en forme de luth'), 27 inches in length without the handle. Two of the drones are spun strings, and one, the so-called 'trumpet,' is of copper, and is brought upon the wheel at pleasure by turning an ivory peg in the tailpiece. There are also four sympathetic wire strings tuned in the fifth and octave. Like lutes and other medieval instruments, the Hurdy Gurdy was often much and well adorned, as may be seen in the Victoria and Albert Museum; fancy woods, carving, inlaying and painting being lavishly employed. The Hurdy Gurdy has been sometimes called Rota (from its wheel), but the Rote of Chauer had no wheel, and was a kind of half lyre. Half lyre, with an opening (as in the Cembalo) for the hand of the player to touch the strings from the back. The old Latin name for a Hurdy Gurdy was Organistrum, and this large form of the instrument it took two persons to play, as it was so long as to lie across the knees of both. The artist touched the keys; the handle-turner was no more important than an organ bellows-blower. The summit of the arch of the Gate of Glory of Santiago da Compostella,—a cast which is in the Victoria and Albert Museum—is occupied by two figures playing an Organistrum. The date of this great Spanish work is 1188. There are other early representations, especially one in the museum at Rouen, but the earliest, dating in the 9th century, was copied by Gerbert from a MS. in the monastery of St. Blaise in the Black Forest, and published by him (De Canto et Musical Sordis) in 1774. Engel has reproduced this drawing in the work already referred to (p. 103). The instrument had eight keys acting on three strings, tuned either in unison or concord. The 'Symphonia' or 'Chionia' was the Hurdy Gurdy in the 13th century. As for the name Hurdy Gurdy it was probably made merely for euphony, like 'hocos poems,' 'harum scarnum,' but it may have been suggested by the peculiar tone. The Hurdy Gurdy was the prototype of the Piano Violin, and all similar instruments, and we may perhaps see in its simple action the origin of the Clavichord.

Donizetti's 'Linda di Chamouni' (1842) contains two Savoyard songs with accompaniment for the Hurdy Gurdy. In recent performances violins and violas, and even the concertina, have been substituted for the original instrument, which, however, remains in the score. A. J. H.

By some strange misconception, a common example of the erroneous nomenclature which exists among average non-musical persons regarding the lesser-known instruments, it has long been the practice, both in literature and in speech, to refer to the barrel and piano organs as 'hurdy gurdies.' This has probably arisen from the fact that the Italian street-boy, who in the twenties and thirties perambulated town streets with this instrument, in due course discarded it for a primitive form of organ which simulated the then popular cabinet piano. Out of this the modern piano organ has evolved.

F. K.

HURSTONE, William Yeates, pianist and composer, was born in London, Jan. 7, 1876. Though coming of a family with artistic leanings (his grandfather was President of the Royal Society of British Artists), he did not enjoy the advantage of upbringing in a musical atmosphere. His mother was his first instructor for pianoforte; in composition he received no instruction whatever in early life. Yet at the age of nine he published a set of 'Five Vales' for pianoforte solo, and at the age of eighteen gained a scholarship at the Royal College of Music. In this institution he studied until 1898, under Stanford for composition, Algernon Ashton and Edward Dannreuther for pianoforte, and left the college a brilliant pianist, with exceptional gifts as a sight-reader, and performer of chamber music. Ill-health has prevented him making as many public appearances as a soloist as he would otherwise have done, but as a composer he has won considerable reputation. In May 1904 a series of 'Fantasie-Variations on a Swedish air' for orchestra from his pen was produced at the first concert of the 'Patron's Fund' (founded by S. Ernest Palmer), and received not only the applause of the public, but also the congratulations of the professors present. He has further written for orchestra a pianoforte
concerto in D (played by himself at St. James's Hall in 1896), and a fairy Suite, 'The Magic Mirror.' His chamber works include an early sonata for pianoforte and violin of conspicuous merit, another for violoncello and pianoforte, and a string quartet in E minor, all of which were produced at the British Chamber Concerts given in St. James's Hall in 1897-8-9; a quintet for pianoforte and wind instruments; and a suite for clarinet and pianoforte, frequently played by Mr. Clinton. Once more, in December 1904, a work of his was chosen for performance at a 'Patron's Fund' concert, this time a quartet for pianoforte and strings, and was well received. Mr. Hurlstone's published works include several songs, part-songs, and compositions for violin and pianoforte. His aim has been to reproduce the spirit of British music with all modern resources, and he has admittedly succeeded.

HUSK, WILLIAM HENRY, born in London, Nov. 4, 1814. He was librarian to the Sacred Harmonic Society, and compiled three editions of a catalogue of the books, the last (a most useful bibliographical work) being dated 1872. Prior to this he had published An Account of the Musical Celebrations on St. Cecilia's Day, London, 1857, and an excellent collection of Christmas Carols, with many of their airs, as Songs of the Nativity, 1864. His careful and conscientious work in the biographies given in the first edition of this present work needs no comment. He died in London, Aug. 12, 1887.

HUTCHESON, FRANCIS, an amateur composer, born in Glasgow in 1720, only son of Professor Hutcheson of Glasgow, who was well known in connection with the study of ethical philosophy; he took a Scottish degree in medicine before 1702, when he took the degree of M.D. at Trinity College, Dublin. As early as 1750 he had published a medical work at Glasgow. In the roll of Graduates the following entry occurs: 'Francis Hutcherson (or Hutchison), B.A. 1745, M.A. 1748, M.D. 1702.' He adopted the pseudonym of Francis Ireland, fearing to injure his professional prospects by being known as a composer. Under this name he produced in the latter half of the 18th century many vocal compositions of considerable merit. The Catch Club awarded him three prizes, viz. in 1771 for his catch 'As Colin one evening,' in 1772 for his cheerful glee 'Jolly Bacchus'; and in 1773 for his serious glee 'Where weeping yews.' Eleven gees and eight catches by him are printed in Warren's collections. His beautiful madrigal, 'Return, return, my lovely maid,' is universally admired.

HUTCHINSON, RICHARD, was organist of Durham Cathedral from 1614 to about 1644; he had, probably, previously held some appointment at Southwell Minster. He composed some anthems, one of which is preserved in the Tudway collection (Harl. MS. 7340), and, with two others, at Ely, Durham, and Peterhouse, Cambridge.

HUTSCHENRUIJTER, WOUTER, born Dec. 28, 1796, at Rotterdam, at first studied the violin and horn, but subsequently devoted himself to composition and to the direction of various choral and other musical societies, the Erudito Musica, the Musie Sacrum, and the Euterpe. He was also music-director at Schiedam, and was for many years a member of the Academy of St. Cecilia in Rome. He wrote more than 150 compositions of various kinds, of which the most important were:—an opera, 'Le Roi de Bohême,' produced at Rotterdam, four symphonies, two concert overtures, an overture for wind instruments, several masses, cantatas, songs, etc. A fine sonata for piano and violoncello, op. 4, may also be mentioned. He died at Rotterdam, Nov. 18, 1878. (Riemann's Lexikon.)
had seven or eight languages at his command. Some extracts from his letters to Pére Mersenne (in the British Museum, Add. MS. 16,912, f. 180), written from the military camp at Maldeghem in 1640, show yet another side of his many-sided character, his interest in physical science; for he minutely describes the sinking of a well, with diagrams to illustrate the methods adopted to prevent its being choked with sand.

He was also author and poet; his first poems were published at Middelburg as early as 1622. A collected edition of Latin and of Dutch poems called *Oda* was published at the Hague in 1625, and a collection of all his poetry entitled *Koren-Bloemen* in 1668. In 1653 he published an account in Dutch verse of his country life at Hofwijk (Vitatium), the house he had built near the Hague in 1641, and where he principally resided. When over eighty years of age he wrote his autobiography in Latin; as it was intended for the use of his family only, it was not published till nearly 150 years later, under the title *Constantini Hugenii. De Vita propria sermonum inter liberos libri duo*, Haarlem, 1817.

Throughout his life he always found time to devote to music, and was a competent performer on several instruments, such as the viol, harpsichord, organ, theorbo, guitar, and lute. In one of his letters he says that by the time he was seventy-nine years old he had composed 769 airs: 'Sur les deux sortes de luths, le clavecin, la viole de gambe, et s'il plaisait à Dieu sur la guitarre,' as well as others 'pour plusieurs violes, et nommément pour trois violes basses en unison.' These all remained in manuscript. A letter to H. du Mont, organist of St. Paul, at Paris, dated April 6, 1665, thanks du Mont for looking through his compositions, and incidentally mentions 'la pratique des Italiens, qui, à mon avis, ne sont pas les plus mauvais compositeurs du monde.' His friends in Spain, England, and France were placed under contribution for his fine collection of music and of musical instruments; thus, with the assistance of Gautier's help, he obtained a 'Luth de Bologne' from England; with the assistance of M. Chièze, a guitar from Madrid. In a letter to Mademoiselle de la Barre, July 21, 1643, he writes that in his house are 'luths, tiorbes, violes, espinettes à vous divertir, quasi autant que toute la Suède vous en pourra fournir.' He had also collected a large general library; after his death his three surviving sons added considerably to it, but they died between 1695 and 1699, and it was then sold at Leyden in 1701; a catalogue was published with the title *Bibliotheca magnae et elegantissimae Zeugfichemiana, rarissimonum exquisitiissimorumque librorum, in omnibus facultatibus et linguis, nobilissimis viri D. Constantini Huygens, Leyden,* Sept. 26, 1701.

In Huygens's autobiography is the marginal note 'Psalmi ad citharam in castris compositi,' Lutetiae editi'; this refers to the work *Pathologia sacra et profana occupati,* published under the supervision of Sieur Gobert by Robert Ballard at Paris in 1647. (Van der Staaen, *La musique aux Pays-Bas,* ii. 353.) It contained twenty Latin, twelve Italian, and seven French compositions, for 'un seul titore,' which he had written before 1627 while in camp. MM. Jonckbloet and Land (Correspondence, etc.) reprinted the volume in its entirety, with a facsimile page of music.

Another work by Huygens, cited by Matthiesen (Der musikalisiche Patriot, Hamburg, 1728, p. 21), was written on the use and misuse of the organ in the Protestant Church; he held that it should be used only for the glory of God, and not played merely with a desire to charm the listeners as they leave church. According to Ester, it was first published at Amsterdam in 1696. 'There are two editions in the British Museum: Gobryck of ungebruyck van't orgel in de Kerken der Vereenigde Nederlanden. Leyden, Abraham Elsevier, 1641, 8vo, published anonymously; and Gobryck, in Unegebruuk van't Orgel, in de Kerken der Vereenigde Nederlanden, Beschreven door Constantyn Huygens, Ridder, Heere van Zuytchen, Zeelheim, en de Monickendam, Erste Band, and Tekenenmero van zijn Hoogheid, den Heere Prince van Oranje, Verrijkt met enige Zangkam.' Amsterdam, Arent Gerritz van der Heuvel, 1659, 8vo, which gives the author's name and titles in full. The first engraved title-page in this volume has a small medallion portrait of Huygens, inscribed 'Constanter,' and is dated 1660. Another edition was published at Amsterdam in 1660.

An excellent portrait of Huygens was engraved by W. Delf from a painting by Michel Miereveld; it is inscribed 'Constanter, 1665, aestatis XXVIII.' This is reproduced by Van der Straeten (*La musique aux Pays-Bas,* ii. p. 366), who also mentions the well-known portrait painted by Antoine Van Dyck at a later date, and admirably engraved.

Christian Huygens, Constantin Huygens's second son, was born at the Hague, April 14, 1629; he died there June 8, 1696. He studied at the University of Leyden, and was distinguished both as a musician and as a mathematician. He wrote various scientific works; two dealing with musical matters were published after his death: *Novus Cycus harmonicus* and *Christiani Hugenii Cosnnooros sive de terris coelestibus, earumque ornate, conjectores.* *Ad Constantimianum Huygensianum, Frestren: Cygulino IIII. Magnae Britanniae regis, a secretis.* The Hague, 1698, 4to. A copy is in the British Museum, also an English translation: *The Celestial Worlds discovered, or conjectures concerning the inhabitants, plants, and productions of the worlds in the planets.* London, 1698. This work is distinctly entertaining. The author states that music, like
geometry, is everywhere immutably the same.

All harmony consists in concord, and concord is all the world over fixed according to the same invariable measure and proportion. So that in all nations the difference and distance of notes is the same whether they be in a continued gradual progression or the voice makes skips over one to the next. Nay, very credible authors report that there's a sort of bird in America that can plainly sing in order six musical notes: whence it follows that the laws of music are unchangeably fixed by nature.

Discussing the probability of other planets being inhabited, and of the inhabitants' possible interest in music, and invention of musical instruments, he continues: 'what if they should excel us in the theory and practick part of musick, and out-do us in consort of vocal and instrumental musick, so artificially composed, that they shew their skill by the mixtures of discords and concords? 'Tis very likely the fifth and third are in use with them.' 'The inhabitants of the planets may possibly have a greater insight into the theory of musick than has yet been discovered among us. For if you ask any of our musicians, why two or more perfect fifths cannot be used regularly in composition; some say 'tis to avoid that excessive sweetness which arises from the repetition of this pleasing chord; others say this must be avoided for the sake of that variety of chords . . . But an inhabitant of Jupiter or Venus will perhaps give you a better reason for this, viz. because when you pass from one perfect fifth to another, there is such a change made as immediately alters your key, you are got into a new key before the ear is prepared for it, and the more perfect chords you use of the same kind in succession, by so much the more you offend the ear by these abrupt changes.' (See English translation, pp. 86-89; Latin version, P. 73.)

HYDASPES (or 'I'Idaspe Fedele'). An Italian opera composed for a London audience by Francesco Mancini. It was produced at the Haymarket (or Queen's) Theatre on May 23, 1710. It followed 'Almahide,' which was performed in the January of the same year. 'Almahide' and 'Hydaspe' were of the series of Italian operas prior to Handel's advent in England, and were the first to be wholly given in that language. 'Camilla,' 1708, and some others were, according to Colley Cibber (Life, 1740 ed. p. 262), sung at their representation by the singers in their native tongues, Italian or English as the case might be. 'Hydaspe' was brought on to the stage by Nicolini, and the libretto was dedicated to the then Lord Chamberlain, the Marquis of Kent; it was staged with much finery in decoration. The principal singers in it were Nicolini, Valentin, Signora Margarita de l'Epine, afterwards the wife of Dr. Pepusch, and some other Italians. One of the features of the piece was a combat between Nicolini and a sham lion; this incident is amusingly treated in No. 13 of the Spectator. 'Hydaspe' was performed twenty-one times, and was well received. The songs were published in a folio volume by Walsh and Hare, contemporary with the production of the opera. At the Lincoln's Inn Fields Theatre, in 1719 was performed a parody of it by a Mrs. Aubert, entitled 'Harlequin Hydaspe, or the Greshamite.'

HYDRAULUS, the water-organ of the ancients, was invented by Ctesibius the Egyptian about 300-250 B.C., and after undergoing various additions and improvements became the popular instrument of the gladiatorial shows and musical contests. Nero himself, according to Suetonius, having been a performer on it. Owing to its close association with pagan customs it was proscribed as an element in Christian worship, and so entirely was it lost sight of, at any rate in Western Europe, that in the Middle Ages the details of its construction became a matter of conjecture, the keyboard and stop action having in fact to be re-discovered. The Pneumatica of Hero (2nd cent.) and the treatise De Architecutnae of Vitruvius (1st cent. A.D.) contain descriptions of the instrument, but such drawings as
accompanied them are unfortunately lost. The Hydraulus is frequently portrayed on coins, in sculpture and mosaic, but it was not until 1885, when a little model of the instrument and a player, moulded entirely in baked clay, was discovered in the ruins of Carthage, that its actual form could be accurately determined. The model (about 7 inches high) dates from the early part of the 2nd century A.D. It is now in the Museum of S. Louis at Carthage, and the fragment of the organist has enabled the proportions of the original instrument to be fairly ascertained. It appears to have been about 10 feet high including the base, and 4½ feet in its greatest width. The air was forced by side pumps through a valve to the wind-chest, and so into a 'compressor,' shaped like an inverted bell, standing in water held in a central container or water-box. The water, being expelled by the in-rushing air, reacted on it and compressed it in the same way and for the same purpose as lead weights are now used on the wind reservoir of pneumatic organs. In the model the details of the keyboard are very distinct. When perfect there were nineteen pivoted keys (about 8 inches long and 2 inches wide in the original), which on being depressed pushed in metal slides held in position by springs and pierced with holes corresponding to similar holes in the sound-board of the organ. Three ranks of metal flue
pipes are shown placed on three cross channels, into which the wind could be admitted at will by stops in the form of tape placed at the side of the instrument as minutely described by Vitruvius. A working half-size reproduction (wind pressure 3½ inches) has been made by the writer, and was exhibited at the Musicians’ Company’s Exhibition in the Fishmongers’ Hall (1904), where a demonstration with extant specimens of Graeco-Roman music was given, showing the use of the Hydraulus for solo performances and also with the Kithara as an accompaniment to the voice. The writer also published a description of the instrument with photographs and diagrams in the *Reliquary* (July 1904) and the *Scientific American* (Nov. 19, 1904). The pipes, which are all of the same diameter, a peculiarity observed also in the bronze pipes of two small organs now in the Museum at Naples, are pitched as unison, octave and super-octave. Following the explanations of Greek writers and extant traces the unison rank is formed of stopped pipes furnished with movable plugs; the other ranks are open and provided with tuning slides. The feet of the pipes may have been of wood. An anonymous writer of the 2nd century A.D. states that six pipes or scales were used for the Hydraulus, viz. the Hyperlydian, Epyriaistian, Lydian, Phrygian, Hysylydian and Hypophrygian which was a perfect octave below the first. The notes (according to Westphal and others) required to give the last five of these scales are nineteen, corresponding to the nineteen pipes in the Carthage organ. They are as follows:—

G A B B c d e f g f g a b b c c' c' d d' d'

the Hyperlydian trope being in this case played on the octave stop. Vitruvius mentions organs with more than three stops, in some cases reed-pipes were probably used. [See, besides treatises on pipes already alluded to, articles Organ and Pipes; also Chappell, *History of Music* (1874); *Lore, Revue Archeologique* (1890), Art ‘Hydraulus,’ in Darenberg and Saglio’s *Dictionnaire des Antiquites grecques et romaines*; and an excellent article by Dr. C. Maclean in the *Sammelbande of the Int. Mus. Ges.* vol. vi. p. 183.]

**HYMN**

Gr. Ὕμνος; Lat. *Hymnus*; Ital. *Inno*; Germ. *Kirchenlied, Kirchengesang*. The first Hymn mentioned in the annals of Christianity is that sung by our Lord, and His Apostles, immediately after the institution of the Holy Eucharist. There is some ground for believing that this may have been the series of Psalms called Hallel (xxvi. to xxviii. of the Authorised Version), which was used, in the Second Temple, at all great festivals, and consequently at that of the Passover.

In early times, any act of praise to God was called a Hymn, provided only that it was sung. Afterwards, the use of the term became more restricted. The Psalms were eliminated from the category, and Hymns, properly so called, formed into a distinct class by themselves. Ὅμοιος, a composition sometimes attributed to Athenogenes (c. 169), and still constantly sung in the Offices of the Eastern Church, is supposed to be the oldest Hymn of this description now in use. Little less venerable, in point of antiquity, is the ‘Angelic Hymn,’ *Gloria in excelsis Deo*, of which special mention is made in the Apostolic Constitutions, a document of the 4th century, but based on earlier writings. It was not, however, until the latter half of the 4th century, that the immense importance of the Hymn, as an element of Christian Worship, became fully understood. S. Ephrem of Edessa made many valuable contributions to the store of Hymns already in use at that period. S. Chrysostom zealously carried on the work at Constantinople, like S. Ephrem, with the special object of counteracting heresy through the popularisation of orthodox hymns.

In the West sacred poems of the same sort were written increasingly, and those of S. Hilary and of the Irish monks are of special merit. To S. Ambrose, however, is due the honour of having first introduced the true metrical hymn into the services of the Western Church, and given it a place side by side with the Psalms and Canticles. His example was followed by S. Benedict and other monastic founders; and the hymns on being adopted into the monastic services speedily overcame opposition, and became general in Divine Service. Only in conservative Rome were they excluded, and the opposition to them there was not broken down until the 9th century. S. Ambrose’s favourite species of verse was Iambic Dimeter—the ‘Long Measure’ of English Hymnology—which was long regarded as the normal metre of the Latin Hymn. S. Gregory the Great first introduced Sapphics; as in *Nunc surgentes vigilantes omnes*.

Some of the poems which Prudentius had written in the 4th century were utilised as hymns, and thus were introduced several fresh metres:—Trochaic tetrameter catalectic, as in *Corde natus ex parentis*; Iambic trimeter, *O Nascor nec, lux Bethlehem, verbum patris*; and Iambic dimeter catalectic, *Cultor del momento*. One of the earliest instances of a hymn in elegiac verse is found in the *Ulixes benedicta vexit* of Venantius Fortunatus (530-609). Other metres came into use from time to time, but the Ambrosian metre remained dominant. When the Proses and Sequences were introduced at the Mass, the two forms of composition went on side by side without confusion. The difference in their structure and use was sufficiently marked to keep them distinct (see *SEQUENTIA*).

The authorship of the Plain-song melodies of these Hymns is very uncertain. The unbroken connection which exists in many cases between words and melody makes it probable that in
such cases both came from the same source. But melodies were not always linked permanently to the words with which they were first connected. Thus the tune universally associated with the Veri Creator had in earlier days belonged to S. Ambrose's Easter hymn *Hic est dies verus Dei*. On the other hand, it seems clear that the tunes of *Vexilla regis prodeunt* and *Pange lingua gloriosi praelium certaminis* must spring from the same occasion which produced the words, viz. the translation of the relics of the Cross to Queen Radegund's monastery at Poitiers, Nov. 19, 569.

The Plain-song melodies are to be seen in the Antiphonal, and many of them in the Vesperal, with the modernised forms of the Latin words. Many of them appear in English dress in *Church Hymns* and in *Hymns Ancient and Modern*, with the ancient melodies in the forms in which they are given in early English Antiphonals and Hymnals; these are in some cases more correct than the forms now current abroad.

The character of these Plain-song melodies differs from that of measured tunes in the greater freedom of rhythm which the Plain-song has, owing to the fact that its notes have in themselves no determinate time-value. On the other hand, Plain-song melodies of this class, and especially those that are entirely or nearly syllabic, approximate more closely to measured music than those of any other class; since, being set to metrical words, they acquire from them a more regular rhythm than melodies set to prose can ever have.

After the invention of Discant, these venerable Hymn Tunes, or phrases selected from them, were constantly used as *Canons ficti* for Masses and Motets. In the year 1589 Palestrina turned them to still better account in his great work entitled *Hymni Totius Anni* — a collection of Hymns for every Festival throughout the Ecclesiastical Year, admirably treated, in the polyphonic style, for three, four, five, and six voices, and bearing traces of the great composer's best manner on every page. From a fine tall copy of the original Roman edition of this work of Palestrina's, preserved in the British Museum, we transcribe a portion of the Hymn for Passion Sunday — *Vexilla regis prodeunt*¹ — the well-known melody of which is combined, throughout, with contrapuntal treatment of the most masterly description, involving clever imitations, and closely-interwoven fugal points, so carefully concealed beneath the expressive harmonies which result from them that their ingenuity is quite forgotten in the indescribable beauty of the general effect.

A few Latin Hymns, such as those to be found among the works of Hassler, Tallis, Byrd, and some other great composers, have been set, for four or more voices, in a similar manner: but, as a whole, Palestrina's magnificent Hymnal stands quite alone — too great to admit the possibility of rivalry. The delight with which it was received was unbounded. Indeed, long before the middle of the 16th century, the Science of Hymnology had already begun to attract an immense amount of attention, in widely different directions. Hymns, or rather Carols,² of a somewhat lighter character than those we have been considering, had been sung, for ages past, between the scenes of the Mysteries and Miracle Plays which form so conspicuous a feature in the religious history of the Middle Ages. Many of these — notably such as set forth the Glad Tidings commemorated at Christmas-tide — became, from time to time, extremely popular, and obtained a firm hold on the affections of rich and poor alike. [See *NœL.*] Well knowing the effect of songs upon popular feeling, and fully appreciating the beauty of the Latin hymns to which he had been accustomed from his earliest youth, Luther

¹ Sung also, as a Processional Hymn, on the morning of Good Friday. See *Hymnologia*.

² Hail, Carola: from carolus, to sing songs of joy. Bailey, how- ever, suggests a Saxon *clywton; cewe*, radike—whence 'church'.
turned these circumstances to account by producing a vast amount of German Kirchenlieder, which, adapted to the most favourite melodies of the day, both sacred and secular, and set for four, five, and six voices (with the Plain Chant in the Tenor) by Johannes Walther, were first published, at Wittenberg, in 1524, and re-issued, in the following year, with a special preface by Luther himself. Innumerable other works of a similar description followed in rapid succession. The vernacular Hymn found its way more readily than ever to the inmost heart of the German people. The Chorale was sung, far and wide; and, at last, under the treatment of John Sebastian Bach, its beauties were developed, with a depth of insight into its melodic and harmonic resources which is not likely ever to be surpassed. Even the simplest settings of this great master bear tokens of a certain individuality which will render them household words, in the land of their birth, as long as true musical expression shall continue to be valued at its true worth: and, perhaps, in these gentle inspirations, Bach speaks more plainly to the outer world than in some cases where he has subjected the melody to more elaborate treatment. [See Chorale.]

In France, the metrical Psalms of Clement Marot, and Theodore Héez, were no less enthusiastically received than the Hymns of Luther in Germany, though their popularity was less lasting. The history of the French Psalter has already been recounted in the article Bourgeoisy.

It was not to be supposed that the movement which had spread thus rapidly in France and Germany, would be suffered to pass unheeded in England. The Reformation had created here the like popular demand for a musical outlet for its religious enthusiasm, and moreover the study of the Madrigal had already brought part-singing to a high degree of perfection. [MADRIGAL.] Here, as in France, the first incentive to popular Hymnody seems to have been the rendering of the Psalms into verse in the mother tongue, and the Englishmetrical Psalter of Sternhold and Hopkins met the need. [See Psalm.]

Apart from the metrical Psalter there was little development of Hymns properly so called, and nothing at all analogous to the German Chorales. The old Latin hymns disappeared for no other reason than that there was no one to put them into English dress. Archbishop Cranmer himself lamented the failure of his efforts in this direction. Thus the bald translation of the 'Veni Creator' into Common Metre inserted in the Ordinal in 1550 represented the sum total of the result of the efforts of the Reformers to preserve the old office-hymns.

Attempts to introduce the German chorales in an English dress were no more successful: Bishop Coverdale began them in 1546 with his Goostly Psalmes and Spirituall Songs: but the moment was not propitious, and he found no imitators in this direction. Indeed his little book with its crude adaptations of German words and tunes is of excessive rarity, and it is doubtful if any copy exists except the one preserved in the Library of Queen's College, Oxford.

One great hindrance, no doubt, to the spread of the hymns was the objection, which had militated against the introduction of hymns in early days and now appeared afresh and with new force, against the use in public worship of anything that was not directly scriptural. The early metrical Psalters, it is true, adopted into the Appendix, which mainly comprised the Bible canticles, some few pieces of a non-scriptural character. Besides the 'Te Deum' and 'Veni Creator' which had the authority of the Prayer Book to support them, there were, for example, the 'Lamentation,' 'O Lord, turn not Thy face away,' which survives in an altered form in Hymns Ancient and Modern, No. 103; and others of a penitential character—'The Complaint of a Sinner,' 'The Humble Suit of a Sinner,' together with a prayer for peace and occasionally some other 'prayer' or a thanksgiving at Communion. But it is noteworthy that apart from these, the Appendix drew direct upon German sources, not only for the metrical version of the Lord's Prayer but also for Luther's celebrated 'Pope and Turk' hymn, 'Preserve us, Lord, in Thy dear word, From Pope and Turk defend
us, Lord'; but here the hospitality of the Appendix came to an end, and the metrical Psalter admitted for a hundred years or more no new guests.

Hymns existing apart from the metrical Psalter had little chance of being taken into public use. The Elizabethan period was not unproductive of such compositions, e.g., Hunnis's Handfull of Hymns (1583), but they gained no entrance to the Church Services. In 1623 a bold attempt to widen the sphere failed, though it was an attempt of a very high order. George Wither then published his Hymns and Songs of the Church,—a volume in which he was prudent enough to begin with paraphrases of Scripture, of the recognised sort, before coming to the Hymns for Festivals or Special Occasions. He also secured for the music the co-operation of Orlando Gibbons, who provided sixteen tunes, set in two parts only, treble and bass, thus differing from the usual method of setting the psalm tunes. But in spite of these advantages the book was a failure. The work of Withers and Gibbons fell flat; subsequent generations recognised its worth, but it is only in the 19th edition of Hymns Ancient and Modern that Gibbons's tunes have received the full welcome due to them. (See Nos. 6, 124, 286, 287, 450, 484.) When Playford tried to recover the church music after the Restoration, he was not content merely to reproduce the old Psalter, but he began to enlarge its scope. In his Psalms and Hymns of 1671, he introduced a hymn for Good Friday as well as 'Six divine songs for one voice to the organ.' Finding this publication too elaborate and musicianly for the low state of musical efficiency prevalent since the Rebellion, he published his simpler Whole Book of Psalms in 1677, which became the standard edition of Sternhold and Hopkins. To this he made further additions, including the translation which Bishop Cosin had made in 1627 of the hymn, 'Jam lucis orto sidere,' for his Collection of Private Devotions. Already his version of the 'Veni Creator' had been adopted into the Prayer Book of 1661, from the same source; and no doubt this reflected a sort of authority on the other hymns in the same book.

When the New Version of the Psalter, written by Tate and Brady, was issued in 1696, it drew a sharper line at the Psalms and cast the additional matter more definitely into a 'Supplement.' Within this section simultaneously, the number of hymns began a little to increase; and the Supplement was definitely authorised, with the Psalter, by the Crown in 1703. Thus there appeared for the first time the familiar hymn, 'While shepherds watched their flocks by night,' and with it, Easter hymns and Hymns for Holy Communion. Hymns for the latter occasion had appeared occasionally in the early Psalters—for example in Daman's Psalms of 1579, but henceforward they came into regular use throughout the 18th century.

The end of the 17th century had already seen one book win success in which the Hymns had crept out from beneath the shelter of the Psalms, and taken up a stand on their own account. This was Select Psalms and Hymns for St. James's, Westminster, 1697. But with the new century the position began entirely to change, and the Hymns began a new career of self-assertion, which has ended in their outshining almost entirely the metrical Psalms. The years immediately preceding had witnessed the real beginnings of English creative hymnody. John Austin had followed Cosin in setting hymns in his book of Devotions, and had gone beyond him in appending a larger collection. Bishop Ken had written his three immortal hymns; and, most important of all, the new liberty of worship conceded to Nonconformists had set free among them a great creative force of sacred verse and song. Baxter and Mason had begun the traditions, which were taken up by Watts and Doddridge, and handed on to the Wesleys. Among the Nonconformists, at any rate, the monopoly of the metrical Psalter was now broken down, and the hymns had won an established place for themselves.

Simultaneously, Playford and others began to gather up the results of a parallel activity on the part of the musicians. The first edition of The Divine Companion was designed as a supplement to the Psalter, and contained only novelties. These included six tunes by Dr. Blow, several by Jer. Clarke, and one by Croft. Of these, one by Clarke has since held the field—viz. the fine tune later called Uffingham—Hymns Ancient and Modern, No. 453. In the second edition of 1709 there were great additions, including Clarke's Brockham, 'I will extol,' and St. Magnus, with Croft's 148th (Hymns Ancient and Modern, Nos. 3, 90, 171, 234).

The new hymn tune was marked by the same solidity and sterling character which had made the old Psalm tunes so satisfying; and later books carried on these good traditions. Thus Gawthorn's Harmonia Perfecta of 1730 contains a large part of the Ravenscroft Psalms tunes, together with a collection of the best new hymn tunes in the same style. Some tunes of earlier date were also recovered and perpetuated, such as Tallis's 'Canon,' and Gibbons's 'Angelia.' A fine example of the new accessions is the massive tune Eltham (see Hymns Ancient and Modern, No. 322). Side by side with the hymn-books there were also collections of tunes by individual authors, such as Battishill's 'Twelve Hymns' (1765), Haye's 'Sixteen Psalms' (1774), and others. These made valuable contributions to the succeeding general collections.

But already before this there were signs that the frivolity which had spoilt the music of the
Restoration period had not been without an effect upon the hymns. In 1708 there was published a curious collection under the title of *Lyra Davidica*. The chief interest of the book lies in the fact that it was a new and serious attempt to introduce the German chorale to England; but at the same time the preface expressed the hope that a 'freer air than Psalm tunes might be acceptable.' The freest air given in the familiar 'Jesus Christ is risen to-day, Hallelujah' (*Hymns Ancient and Modern*, No. 152). The hymn is such a favourite that one can but judge it indulgently [and in its purest form, as given in *Songs of Syon* (1905), it is a good deal less florid than in the usual version]; nevertheless it marks the introduction of a new and frivolous spirit into English hymn tunes, which gradually spread throughout the 18th century, and had disastrous results. The same criticism may be made of the famous tune *Helmley*. [See *Carter; Catley; Lo, He comes.*] The Church of England kept very close to the metrical Psalter; and indeed it was not until 1769 that the first Church hymn-book for general use was published, viz. Madan's *Collection of Psalms and Hymns*, known as the Lock Hospital Collection. But long before this, books for Nonconformist use abounded, and in them grave and frivolous tunes were combined, secular and unsuitable music was adapted to sacred words, repetitions were multiplied which obscured the meaning of the words, and vocal exercises more suitable to the Italian opera of the day were introduced for the honour and glory of the singers. The following tune is not by any means an extreme instance.

![Tune Illustration](Image)

In 1791 the collections began to be codified. Dr. Rippon, who had already published a collection of words, then with the help of T. Walker, put out his *Selection of Psalm and Hymn Tunes*; when this was received with enthusiasm, Walker further issued a *Companion to Dr. Rippon's Tune Book*; and these two stood out prominent among the many collections for Nonconformist use throughout the early part of the 19th century.

With the coming of the new century, came an awakened interest in hymns among English Churchmen, and the publication of many collections of Psalms and Hymns; these were chiefly for local use, but a few attained a wider popularity. Little was done on the musical side; the old Psalm tunes, and the solid hymn tunes still held their ground more or less successfully against the frivolous compositions, while on the borderland lay a number of tunes, of which Rockingham, Martyrdom, Abriedge, Moscow, in triple time, Miles Lane, Truro, Duke Street, in common time, may be cited as representatives. These had not the solid quality of the early tunes, but they had a grace and attraction of their own, and were far from the triviality of the worse tunes.

From 1850 onwards the influence of the Church revival made itself felt, and a new era set in. Hymns from the Latin and the German became more frequent, and a protest rose against the unworthiness of many of the existing hymns and tunes. The *Hymn and Breviary* (1853) revived not only the Latin Hymns, but also their plain-song melodies. The work of sifting the old collections was carried out by H. Parr, while Dr. Maurice and Canon Havergal, in addition to undertaking this task on a smaller scale, set themselves also to adapt and introduce the best German melodies. Meanwhile a new school of indigenous hymn-tune writers had grown up, imbued with the new spirit. Some, inspired by the ancient Psalm tunes, produced solid tunes of a lasting character; others, while avoiding the frivolity of the 18th century tunes, fell into similar snares, such as catchy melodies and luscious harmonies, and produced tunes more suitable for part-songs than hymns, which have enjoyed an immense but a waning popularity. Many of the writers produced work of both classes, notably Sir John Stainer and Dr. Dykes, whose tunes are among the best and among the worst of those written in the latter half of the 19th century. The *Church Hymn and Tune Book*, published in 1852, set a high standard of
Church hymnody; the music was brought out by Dr. Gauntlett, who had already proved himself a skilled writer of good tunes. Two years later this was followed by Mercer's Church Psalter and Hymn Book, which acquired a wide circulation, and was of a comprehensive character. 1861 saw the first appearance of Hymns Ancient and Modern, 1863 of the Chorale Book for England, the Bristol Tune Book, the Metropolitan Tune Book, and others. The tide was then flowing strongly. Meanwhile, among the Non-conformist bodies the production of hymns and tunes had gone on without diminution. Numerous books for various denominations have been produced; they have drawn to a large extent upon the hymns and tunes of the Church of England as well as of Roman Catholic writers such as Faber and Caswall, and have given back much in return. The level of some of this work has been high, but on the contrary much of it has sunk to levels untouched before; and it is difficult to describe the emptiness and vulgarity of much that has been produced in England and America for revival services, and even for use in regular Sunday worship.

Of late years the books have diminished in number from the survival of the fittest. Among Church books, Hymns Ancient and Modern, Church Hymns, and The Holyland Companion to the Book of Common Prayer have occupied the larger part of the field. Among Nonconformist bodies there has been a good deal of assimilation, notably among the Wesleyans. The Scottish Church has done good work in preserving many fine old tunes, and such commentaries as James Love's Scottish Church Music (1891), and The Music of the Church Hymnary by Cowan and Love (1895) are of great value. Reference should also be made to Julian's Dictionary of Hymnology (1893, 2nd ed. 1904).

Both Church Hymns and Hymns Ancient and Modern, have recently undergone a thorough and well-executed revision; similarly the new Scottish Church Hymnary has taken a high place, and reached a high standard. These are representative names among a large class of good hymn-books. All of them, no doubt, contain a certain percentage of matter that is on its trial, and some that will before long disappear. This must be the case in any progressive era. Meanwhile it is much to be hoped that they will out the weaker and less worthy collections of hymns and hymn tunes.

Among the more important and typical collections of metrical hymns and tunes, published in this country for use in Divine worship during the last half century, the following may be named:—

National Psalmody, B. Jacob (Novello); Surrey Chapel Music, V. Novello (Novello); The Psalter with appropriate Tunes, John Hullah, 1843; J. W. Parker, Church Hymns and Psalmody, Rev. E. F. Z. Witt, with List of Composers and Authors (1845); Novello; The Standard Psalmody Book, Rev. E. F. Z. Witt, 1852 (Sheal); Union Tune Book, J. S. C. Cobb, 1854 (Sunday School Union), with Supplement by John Hullah, 1870; The Hymnal, Rev. T. Holmore, 1860 (Novello); The Church Psalter and Hymn Book.
HYPER- (Gr. ὑπερ, 'over,' 'above'; Lat. super). A prefix, extensively used in the terminology of ancient Greek music—wherein it appears in the names of the five Acute Modes—and thence transferred to the musical system of the Middle Ages. The nomenclature of the one system must, however, be very carefully distinguished from that of the other; for, though the same terms are, in many cases, common to both, they are used to designate very different things. For instance, the discarded Locrian Mode (B, G, D, E, F, G, A, B) is often called the Hyper-Eolian, in recognition of the fact that its range lies a tone above that of the true Eolian; but this Mode has no connection whatever with the Hyper-Eolian of the Greeks; neither have the Authentic Modes, as we now use them, the slightest affinity with the Greek acute forms, though the prefix 'hyper' has sometimes been very unnecessarily added to the names of all of them. [See Modes.]

Greek authors constantly use the prepositions ὑπερ and ὑπό in what we should now consider an inverted sense; applying the former to grave sounds, and the latter to acute ones. This apparent contradiction vanishes when we remember that they are speaking, not of the gravity or acuteness of the sounds, but of the position on the lyre of the strings designed to produce them.

HYPO- (Gr. ὑπό, 'under,' 'below'; Lat. sub). A prefix applied, in ancient Greek music, to the names of the five Grave Modes. In the Middle Ages it was added to the names of the seven Plagal Modes—the Hypodorian, the Hypophrygian, the Hypolydian, the Hypomixolydian, the Hypo-Aolian, the discarded Hypolocrian, and the Hypo-ionian—the range of which lies a fourth below that of their Authentic originals. [See Modes.]

Early writers also add this prefix to the names of certain intervals, when reckoned downwards, instead of upwards; as Hypo-diatessaron (= Subdiatessaron), a fourth below; Hypo-diapente (= Subdiapente), a fifth below. [See Interval.]
I AMBIC. An Iamb or Iambus is a metrical foot consisting of a short and a long syllable—as before; or as Coleridge 1 gives it, 'Iambic march from short to long.'

This, from Handel's 'Alexander's Feast' is an iambic passage. So also is 'Rejoice greatly' from the 'Messiah.' So is the following from the Finale to Beethoven's 'Kreutzer Sonata' (op. 47).

IASTIAN MODE. [See Modes.]

IBACH & SONS. Johannes Adolf Ibach, the founder of this firm of pianoforte makers, was born in 1766 in Barmen. In his childhood he learnt music from the monks of Beyenberg, whose organ he restored in later years, this being the first piece of work to bring him notoriety. He began life by being a children's shoemaker, and then made pianos with his own hands, without aid from anyone, in the day when pianos were only made to order. He thus founded the pianoforte and organ manufactory in Barmen in 1794. In the year 1811, the worst year of the war, it was his proud boast that he made and sold no fewer than fourteen pianos. The manufactory became a family concern, his wife and daughters even helping in the work. In 1834 his son Carl Rudolf, and in 1839 his son Richard were taken into the firm, which in consequence became known as Adolf Ibach Söhne. At his death the firm was called Carl Rudolf and Richard Ibach; then in 1869 Richard took the organ building and Carl Rudolf's son continued the pianoforte business alone, under the title of Rudolf Ibach Söhne, bringing it into high repute, founding a branch at Cologne and being appointed purveyor to the Prussian Court. The English business was established in 1880, and the premises in Wigmore Street were opened in 1886.

IDEO. A theme or subject.

IDOMENEO RÈ DI CRÈTA, OSSA ILIA E ADAMANTE. An opera seria in three acts; music by Mozart. Composed at Salzburg in 1780, and produced at Munich, Jan. 29, 1781. The libretto was Italian, adapted by the Abbé Varesco (also author of that of 'L'Oca del Cairo') from a French piece of the same name by Danchet, which had been composed by Campra in 1712.

1 'Metrical feet—Lessons for a boy.' Poetical Works, ii. 145.

Mozart's autograph is in the possession of André at Offenbach. Full score published by Simrock with Italian text. The opera contains a complete ballet in five numbers (autog. André) which appears in the new edition of Breitkopf & Härtel.

'Idomeneo' has never been a favourite opera. The Ally. Musik. Zeitung during fifty years only chronicled sixteen performances, and it appears never to have been put on the stage either in Paris or London. It has been twice newly arranged—by Treitschke (Vienna, 1806), and by Lichtenthal (Milan, 1843). Mozart himself felt that some improvements were wanted, as he speaks (Letter, Sept. 12, 1781) of rewriting the part of Idomeneo and making many alterations in the French style.'

ILYINSKY, ALEXANDER ALEXANDROVICH, composer, was born, Jan. 24, 1859, at Tsarskoe Selo. He studied music in Berlin, first under T. Kullak (pianoforte) at the Conservatoire, and afterwards under Bargiel (theory) at the Königliche Akademie. In 1885 he returned to Russia, and has since held a professorship at the Music School of the Philharmonic Society, Moscow. His chief works are as follows:—

For Orchestra.

Vocal and Orchestral.

Two cantatas: 'Strakost' and 'The Roussalka' (for female voices only).

Operatic.

'The Fountain of Bekechisara.'

Miscellaneous.

String quartet. Songs, op. 5. Pianoforte pieces, op. 7, 12. Pieces for violin, op. 6. R. N.

IMBERT, HUGHES, French musical critic and litterateur, born Jan. 11, 1842, at Moulin-Engilbert (Nièvre), received his first lessons in music from his father, and was educated at the Collège Sainte Barbe in Paris, where he had violin lessons from Faucheu and R. Hammer. Notwithstanding the duties of an official career, he kept up his intimacy with musicians, and his first book of criticism, Profils de Musiciens (consisting of articles published first in the Indépendance musicale in 1886) appeared in 1888. Another series of Profils de Musiciens appeared in 1892; and in the previous year, under the title Symphonies, he published a volume of critical essays, mainly musical; Portraits et Études (1894) contains, among other musical studies, a striking article on Brahms's 'Requiem,' and a separate Étude sur J. Brahms appeared in the same year. Profils d'Artistes contemporains (1897) deals with the younger French composers; Rombrant et Wagner, le Clair-Obscur dans l'Art (1897) is, as its title indicates, a contribution of some value to the Wagner literature, treating many...
questions from a fresh point of view. His other works are Ch. Gounod (1897), G. Bizet (1899), La Symphonie après Beethoven, a reply to Wengartner’s pamphlet (1900) and the last of M. Imbert’s volumes is a set of studies, literary and musical, called Médaillons contemporains (1903). He contributed to important articles to the Revue d’art dramatique, the Revue d’art ancien et moderne, the Revue bleue, L’Art musical, The Musician (his sketch of Vincent d’Indy and Rembrandt and Wagner being included in translations, in Studies in Music, 1901). From 1889 he was a regular contributor to the Guide Musical, of which he shared the direction with M. Maurice Kufferath. He was a valiant champion of the cause of modern music, and while fostering the love of Berlioz and Schumann in France, may be said to have revealed the music of Brahms to the Parisian public. He died from the effects of an operation, on Jan. 15, 1905.

IMBROGLIO, i.e. confusion. A passage, in which the vocal or instrumental parts are made to sing, or play, against each other, in such a manner as to produce the effect of apparent, but really well-ordered confusion. The three orchestrations in the ball-room scene of ‘Don Giovanni’ may be cited as an instance, and the end of the second act of ‘Die Meistersinger’ is perhaps the most elaborate example in existence.

IMITATION is a name given to one of the most useful and indeed necessary devices in contrapuntal composition. It consists in a repetition, more or less exact, by one voice of a phrase or passage previously enunciated by another, e.g.—

In the former of these examples the imitation takes place at one bar’s distance, and at the interval of an eleventh above. In the latter it is at the interval of an octave below.

If the imitation is absolutely exact as to intervals it becomes a Canon. But in the majority of cases imitations are not canonical. Imitations may take place at any interval or at any distance. They may also be sustained by any number of voices or instruments, e.g.

where we have an imitation in four parts.

Imitations are sometimes conducted by contrary motion of the parts, or by inversion, e.g.—

More rarely we meet with imitations per recte et retro or, as they are sometimes called, ‘by reversion,’ in which the antecedent, being read backwards, becomes the consequent:—

(These examples are all taken from Fétis.)

Imitations may also be made by ‘inversion and reversion’ or by ‘augmentation,’ or ‘diminution.’ It will be needless to give examples of all these different kinds. Good examples may be found in the theoretical works of Baltiferri, Azopardi, Zimmermann, Marpurg, Fux, and Cherubini. The Suites and Fugues of Bach, the Symphonies and Sonatas of Haydn, Mozart, and Beethoven are full of good examples of various kinds of imitation. In fact every classical writer, whether of vocal or instrumental music, has derived some of his finest effects from a judicious employment of such artifices. Every student of music must make himself familiar with these contrapuntal resources if he would fain scale the loftiest heights and make himself distinguished as a composer of high-class music. E. A. G. O.

IMMYNS, JOHN, by profession an attorney, was an active member of the Academy of Ancient Music. Having in his younger days been guilty of some indiscretion which proved a bar to success in his profession, he was reduced
to become clerk to a city attorney, copyist to the Academy, and amanuensis to Dr. Pepusch. He possessed a strong alto voice and played indifferently on the flute, violin, viol da gamba, and harpsichord. At the age of forty, by the sole aid of Mace's *Musick's Monument*, he learned to play upon the lute. In 1741 he established the Madrigal Society [see Madrigal Society]. In 1752, upon the death of John Shore, he was appointed lutenist of the Chapel Royal. He was a diligent collector and assiduous student of the works of the madrigal writers and other early composers, but had no taste whatever for the music of his own time. He died of asthma at his residence in Cold Bath Fields, April 15, 1764.

His son John made music his profession, became a violincellist and organist, and was the first organist of Surrey Chapel, Blackfriars Road, which post he held for about a year, until his death in 1794. W. H. H.

I. Time. Medieval writers (acustomed to look upon the number Three—the symbol of the Blessed Trinity—as the sign of perfection) applied the term, Imperfect, to all rhythmic proportions subject to the binary division.

The notes of measured music were called Imperfect, when divisible into two equal portions. Thus, the Minim—always equal to two Crotchets only—was essentially Imperfect, in common with all other notes shorter than the Semibreve. The Large was also Imperfect, whenever it was made equal to two Longs; the Long, when equal to two Breves; the Breve, when equal to two Semibreves; and the Semibreve when equal to two Minims.

The Imperfection of the Minim, and Crotchet, was inherent in their nature. That of the longer notes was governed, for the most part, by the species of Mood, Time, or Prolation, in which they were written: for, Mood, Time, and Prolation, were themselves capable of assuming a perfect, or an imperfect form. In the Great Mood Imperfect, the Large was equal to two Longs only, and therefore Imperfect; while all shorter notes were Perfect, and, consequently, divisible by three. In the Lesser Mood Imperfect, the Long was, in like manner, equal to no more than two Breves. In Imperfect Time, the Breve was equal to two Semibreves. In the Lesser (or Imperfect) Prolation, the Semibreve was equal to two Minims.

But notes, even when perfect by virtue of the Mood, Time, or Prolation in which they were written, could be made imperfect; and that, in several different ways.

A Perfect note was made Imperfect 'by position,' when another note, or rest, of half its value, was written either before or after it; thus, the Semibreves in the following example, though written under the signature of the Greater Prolation, were each equal to two Minims only—

![Diagram](image)

Black square notes, though Perfect by the Modal Sign, became Imperfect in like manner when mixed with white ones: thus, in the following example, each white Breve is equal to three Semibreves, and the black one, to two only—

![Diagram](image)

Again, the Perfection, or Imperfection, of any note whatever, could be regulated by means of a Point.

Imperfect notes were made Perfect by the Point of Augmentation—the exact equivalent to the dot in modern music, and, therefore, needing no example.

Notes perfect by the modal sign, but rendered imperfect by position, could be restored to perfection by a Point of Division, as in the next example, where the first Semibreve, equal, in the Greater Prolation, to three Minims, would be made imperfect by the Minim which follows it, were it not for the Point of Division placed between the two notes—

![Diagram](image)

In both these cases, the Point serves to augment the value of the notes: but, it may also be made to produce an exactly contrary effect. For instance, a Point of Division, placed between two shorter notes, following and preceding two longer ones, in Perfect Time, served, anciently, to render both the longer notes Imperfect. In the following example, therefore, the Breves are equal to two Semibreves only—

![Diagram](image)

There are other ways in which the Perfection of certain notes may be changed to Imperfection, and *vice versa*; and, for these, the Student will do well to consult the pages of Zacconi, Zarlinus, and Thomas Morley. [See Mood, Notation, Point, Prolation, Proportion, Time.]

II. Writers on Plain-song apply the term Imperfect to melodies which fail to extend throughout the entire compass of the mode in which they are written. Thus, the melody of the Antiphon, *Angelus nunti Domini*, is in the Eighth Mode; but, as it only extends from F to D—two notes short of the full range of the Hypomixolydian scale—it is called an Imperfect Melody.

W. S. R.

III. For Imperfect Cadence, see Cadence, vol. i. p. 437.

IV. For Imperfect Interval, see Interval.
IMPROVISATION

The title of the French adaptation (considerably altered) of Mozart's "Schauspiel director," by Léon Battu and Ludovic Halévy, produced at the Bouffes Parisiens, May 20, 1856. This piece is said to have been mixed up with Cimarosa's 'Impresario in Angoscia,' so as to form one piece, by Goethe in 1791 while director of the theatre at Weimar.

6.

IMPROMPTU. Originally no doubt the name for an extemporaneous piece; but as no piece can be extempore when written down, the term is used for pianoforte compositions which have (or aim at) the character of extemporaneous performances. The most remarkable are Chopin's, of which there are 4—op. 29, 36, 51, and 66 (Fantaisie-Impromptu in C♯ minor.). The two sets of pieces by Schubert known as Impromptus— op. 90, Nos. 1 to 4, and op. 142, Nos. 1 to 4, mostly variations—were, the first certainly and the second probably, not so entitled by him. The autograph of the first exists. It has no date, and no title to either of the pieces, the word 'Impromptu' having been added by the publishers, the Hasingers, one of whom also took upon himself to change the key of the third piece from C♯ to G. The autograph of the second set is at present unknown. It was to these latter ones that Schumann devoted one of his most affectionate papers (Gesamm. Schriften, iii. 37). He doubts Schubert's having himself called them Impromptus, and would have us take the first, second, and fourth as the successive movements of a Sonata in F minor. The first does in fact bear the stamp of a regular 'first movement.' Schumann himself has improvised on a theme of his wife's, op. 5, and another Impromptu among his Albenblatter. Neither Beethoven, Weber, nor Mendelssohn ever used the word.

6.

IMPROPERIA, i.e. 'The Reproaches.' A series of Antiphons and Responses, forming part of the solemn Service, which, on the morning of Good Friday, is substituted for the usual daily mass of the Roman Ritual.

The text of the Improperia, written partly in Latin, and partly in Greek, is designed to illustrate the sorrowful remonstrance of our Lord with His people, concerning their ungrateful return for the benefits He has bestowed upon them. The touching words in which these remonstrances are expressed were originally sung to well-known Plain-song melodies, preserved in the Graduale Romanum, and still retained in very general use, both in England and on the Continent; but, since the Pontificate of Pope Pius IV. they have been invariably chanted, in the Sistine Chapel, to some simple, but exquisitely beautiful Roman bourdon, to which they were adapted, by Palestrina, in the year 1560. In depth of feeling, true pathos, and perfect adaptation of the music to the sense of the words, these wonderful Improperia have never been exceeded, even by Palestrina himself. We may well believe, indeed, that he alone could have succeeded in drawing, from the few simple chords which enter into their construction, the profoundly impressive effect they never fail to produce.

No printed copy of the Improperia was issued, either by Palestrina himself, or the assignees of his son, Ingino. They were first published in London, by Dr. Burney; who, on the authority of a MS. presented to him by the Cavaliere Santarelli, inserted them, in the year 1771, in a work entitled La Musica della Settimana Santo, which has now become very scarce. Alfieri also printed them among his Excerpta, published, at Rome, in 1840; and, in 1863, Dr. Prosko included them in the fourth volume of his Musica Divina. These three editions differ from each other very considerably. That of Prosko,

are both valuable and interesting, as records of the *abbellimenti* used in the Pontifical Chapel at the time of their transcription. Burney's version was reproduced, by Choron, among his examples of the great masters, in 1836; and again, in 1840, by Vincent Novello, in *Holy Week Music*, as used at the Sistine Chapel at Rome. w. s. e.

IMPROVISATION, an equivalent term for Extempore Playing or Extemporising. Moscheles has left a curious account of the way in which Mendelssohn and he used to amuse themselves by improvising à quatre mains, a feat already mentioned in respect to Beethoven and Woll under Extempore. 'We often,' says he (Life, i. 274), 'improvise together on his magnificent Erard, each of us trying to dart as quick as lighting on the suggestions contained in the other's harmonies, and to make fresh ones upon
INCIDENTAL MUSIC

them. Then, if I bring in a theme out of his music, he immediately cuts in with one out of mine; then I retort, and then he, and so on ad infinitum, like two people at blind man’s bluff running against each other.

Nottebohm remarks in his *Beethoveniana* (p. 54) that of all Beethoven’s string quartets, that in G minor (op. 131) has most the character of an Improvisation, but at the same time he quotes alterations from the sketch-books (fifteen of one passage only) which show that the work was the very reverse of an impromptu, and the result of more than ordinary labour and vacillation, thus corroborating the remark made in the article on Beethoven in this Dictionary (vol. i. p. 239) that the longer he worked at his phrases, the more apparently spontaneous did they become.

INCIDENTAL MUSIC is the term applied to music which proceeds during the action of a play, and is thus distinguished from overture, entr’actes, or interludes. Properly speaking, the name should be confined to the musical numbers which are ‘incidental’ to the action, such as marches, dances, or songs; but it is often applied to what is in Germany called ‘Melodram,’ i.e. the kind of music that accompanies the speaking voice, and reflects, more or less faithfully, the emotions through which the characters are imagined to be passing. That music of an incidental kind was in use in Shakespeare’s time is proved by the first words of the Duke in ‘Twelfth Night,’ but none of this instrumental music has come down to us, and only a few of the many songs in the whole range of Elizabethan drama have carried with them the tradition of their original tunes. The ‘Theatre Ayres’ of Purcell and his contemporaries were of the nature of entr’actes, and therefore do not come under the head of incidental music; but such works of Purcell’s as ‘The Fairy Queen’ and ‘King Arthur’ seem to have been of a kind of incidental music, although the whole scenes in which the music occurs were apparently intercalated in the drama, as a succession of interludes with vocal and instrumental music as well as action. The ‘ballad operas’ of a later period adapted words to tunes that were well known to every one in the audience; and the process of arrangement of these tunes was more justly called compilation than composition. Beethoven’s music to ‘Egmont,’ ‘The Ruins of Athens,’ ‘King Stephen,’ and ‘Leonora Frolaska,’ is known, at least by name, to all students; Weber’s to ‘Preciosa’ has preserved that play in the repertory of many a German theatre; and Mendelssohn’s ‘Midsummer Night’s Dream’ music is considered by many good judges as among the very finest of his compositions.

Coming to modern times, Hattori’s compositions for the Shakespearean revivals of Charles Kean at the Princess’s Theatre from about 1852 to 1858, were among the most important things written by a distinguished musician for special occasions; and it was the incidental music to ‘The Tempest’ that first brought the name of Sullivan into prominence, although it was first played at the Crystal Palace apart from any revival of the play. During Irving’s management of the Lyceum Theatre, it became the fashion for managers to commission new incidental music for almost every play they produced or revived, thus giving opportunity to many excellent composers of the younger English school. Sullivan’s later works in this kind were for ‘Macbeth’ (Lyceum Theatre, 1885), Tennyson’s ‘Foresters’ (Daly’s Theatre, 1893) and ‘King Arthur’ (Lyceum, 1895). Sir Julius Benedict supplied some incidental music for Irving’s revival of ‘Romeo and Juliet’ in 1882, and twenty years later, Mascagni was called upon for music to ‘The Eternal City’ (His Majesty’s Theatre, 1902).

Stanford’s music to Tennyson’s ‘Queen Mary’ and ‘Becket’ at the Lyceum Theatre, Parry’s to ‘Hypatia’ at the Haymarket, Mackenzie’s to ‘Ravenswood’ and ‘The Little Minister,’ and Heuschel’s to ‘Hamlet,’ are exceptional instances of incidental compositions by men who have done most of their work outside the theatre.

Edward German has won special fame as a writer of incidental music, and his list of such compositions is a long one (see German).

Coerlidge-Taylor’s music to Stephen Phillips’s ‘Herod’ and ‘Ulysses,’ and Percy Pitt’s to the same writer’s ‘Paolo and Francesca’ are famous recent works of the kind. Special qualities seem to be needed for success in incidental music, and the most important of all from a practical point of view, is a certain elasticity as to the formal structure of the pieces introduced. A stage-manager will insist on his right to cut out as many bars as he considers redundant from a piece of processional music, or the chief actor may require more emotional colouring in the accompaniment of his chief soliloquy, just as he will want more limelight on his face. If the play is a great success, the composer may find the numbers of the orchestral performers reduced by half, in order to accommodate an extra row of stalls; and in many ways there are practical difficulties in the way of those who cleave to the idea that music ought to be presented as it was conceived.

INCLEDON, CHARLES BENJAMIN, — the second of which names he despised and seldom used, — was the son of a medical practitioner at St. Kevern, Cornwall, where he was born in 1763 [and baptized on Feb. 5 of that year, as ‘Benjamin’ — Charles being adopted by him later]. At eight years of age he was placed in the choir of Exeter Cathedral, where he received his early musical education, first from Richard Langdon and afterwards from William Jackson. In 1779 he entered on board the *Formidable*, man-of-war, ninety-eight guns, under Captain (afterwards Rear-Admiral) Cleland. On the
West India station he changed his ship for the Raisonnable, sixty-four guns, Captain Lord Hervey. His voice had now become a fine tenor, and his singing attracted the attention of Admiral Pigot, commander of the fleet, who frequently sent for him to join himself and Admiral Hughes in the performance of glees and catches. Incledon returned to England in 1783, when Admiral Pigot, Lord Mulgrave, and Lord Hervey gave him letters of introduction to Sheridan and Colman. Failing to obtain an engagement from either manager he joined Collin's company and made his first appearance at the Southampton Theatre in 1784 as Alphonso in Dr. Arnold's 'Castle of Andalusia.'

In the next year he was engaged at the Bath Theatre, where he made his first appearance as Belville in Shield's 'Rosina.' At Bath he attracted the attention of Rauzzini, who gave him instruction and introduced him at his concerts. [Here he took the part of Edwin in 'Robin Hood.'] In 1786 he made his first appearance in London at Vauxhall Gardens with great success, and during the next three years he was engaged there in the summer and at Bath in the winter. On Sept. 17, 1790, he made his first appearance at Covent Garden Theatre as Dermot in Shield's 'Poor Soldier,' and from that time for upwards of thirty years held a high position in public favour singing not only at the theatre and Vauxhall, but also at concerts, the Lenten oratorios, and the provincial music meetings.

[He sang in the first performance of the 'Creation' on March 28, 1800, at Covent Garden, and in 1803 at the Worcester Festival.] In 1817 he visited America, and made a tour through a considerable part of the United States, where he was received with great applause, [though his voice was past its prime. He returned to England in 1818, and took his leave of the stage at the English Opera House, April 19, 1822, and went to live at Brighton. During the latter years of his life he travelled through the provinces under the style of 'The Wandering Melodist,' and gave an entertainment which was received with much favour. Early in 1826 he went to Worcester for the purpose of giving his entertainment, where he was attacked by paralysis, which terminated his existence on Feb. 11. He was buried in Hampstead Churchyard. Incledon's voice and manner of singing were thus described by a contemporary:—'He had a voice of uncommon power, both in the natural and falsetto. The former was from A to g, a compass of about fourteen notes; the latter he could use from d' to e' or f', or about ten notes. His natural voice was full and open, neither partaking of the reed nor the string, and sent forth without the smallest artificial; and such was its ductility that when he sang pianissimo it retained its original quality. His falsetto was rich, sweet and brilliant, but totally unlike the other. He took it without preparation, according to circumstances either about d', e' or f', or ascending an octave, which was his most frequent custom; he could use it with facility, and execute ornaments of a certain class with volubility and sweetness. His shake was good, and his intonation much more correct than is common to singers so improperly educated. . . . He had a bold and manly manner of singing, mixed, however, with considerable feeling, which went to the hearts of his countrymen. He sang like a true Englishman. . . . His forte was ballad, and ballad not of the modern cast of whining or wanton sentiment, but the original manly energetic strain of an earlier and better age of English poetry and English song-writing, such as 'Black-eyed Susan' and 'The Storm,' the bold and cheerful hunting-song, or the love-song of Shield, breathing the chaste and simple grace of genuine English melody. All who had heard Incledon's singing of 'The Storm' (which he sang in character as a sailor) were unanimous in pronouncing it unique, both as a vocal and an historic exhibition. Of the songs written expressly for him it may suffice to mention Shield's 'Heaving the lead' and 'The Thorn.' He was also famous in the fine song 'The Arthurs,' probably composed by O'Carolan.

Charles Venanzio Incledon, his eldest son, originally engaged in agricultural pursuits, but on Oct. 3, 1829, appeared at Drury Lane Theatre as Young Meadows in 'Love in a Village,' and shortly afterwards played Tom Tag in Dibdin's 'Waterman.' Meeting, however, with but very moderate success he returned to his former avocation, for a time, [and afterwards lived at Vienna as a teacher, and died at Bad Tüffer in 1865]. W. H. R.; additions from Dict. of Nat. Biog.

Incorporated Society of Musicians, the, was founded in June 1882. Mr. James Dawber, Mus. B., of Wigan, in conjunction with Dr. Henry Hiles, of Manchester, invited the musicians of Lancashire to attend a meeting to consider the establishment of a professional association for the furtherance of the following objects: The union of the musical profession in a representative society; the provision of opportunities for the discussion of matters connected with the culture and practice of the art; the improvement of musical education; the organisation of musicians in a manner similar to that in which allied professions were organised; and, by means of registration, the obtaining of legal recognition of qualified teachers of music as a distinctive body. At the meeting the formation of the 'Society of Professional Musicians' was decided upon, and the promoters of the movement by visiting the neighbouring towns soon obtained the cordial support of the musicians of the district, and by extending their missionary work they succeeded in forming allied Sections in Yorkshire and the Midland Counties.
In Jan. 1885, matters were considered sufficiently advanced to render combined action advisable by the union of the Sections in one Society. Each Section elected two delegates to form a General Council, and in this capacity Dr. H. Hiles, Dr. H. Fisher, Mr. J. Dawber, Mr. A. Page, and Mr. A. F. Smith, met at Blackpool. After much consideration this first General Council adopted a constitution, invited Mr. E. Chadfield, of Derby, to take charge of the interests of the Society as Hon. General Secretary, and Mr. A. Page, to act as Hon. General Treasurer. Mr. Chadfield energetically carried on the 'propaganda' so well commenced by the promoters, and organised deputations in the provinces with so much success that in Jan. 1886 it was resolved to hold a Conference of the whole Society in London for the purpose of obtaining the adhesion of the London musicians to the movement. A meeting was held in the Charing Cross Hotel, under the presidency of Dr. F. H. Cowen, and the claims of the Society were advocated by Dr. Hiles, Professor Prout, and Mr. Chadfield, with the result that Dr. W. H. Cummings, Dr. C. Vincent, Mr. A. Gilbert, Mr. C. J. Stevens, and many others, joined the Society, and afterwards became some of its warmest advocates. The whole of England being thus included in the organisation, the word 'National' was added to the title of the Society.

In 1892 the Society was incorporated as an artistic association, and assumed its present title 'The Incorporated Society of Musicians.' The following year, 1893, the Duke of Edinburgh became President of the Society, a position which he retained until his death. In the autumn of the same year a missionary deputation visited Ireland and Scotland. The deputation was warmly welcomed, and Sections were formed embracing the whole of the sister Kingdoms. It is unnecessary to follow in detail the continued progress of the Society, which now consists of twenty-five Sections, in which meetings are held periodically, discussions on musical subjects take place, addresses are read, and performances given, so that each Section becomes a social and artistic centre for the musicians of the district. In addition an Annual Conference in one of the capitals, or one of the large cities of the United Kingdom, is held. These Conferences of the Society, as representative of the musical profession, have always received a cordial welcome from the municipal authorities, and members journey from the most distant parts of the country to take part in the proceedings. This Annual Conference is both social and instructive in character, and the addresses delivered at the various Conferences by the highest authorities, embrace the whole range of musical thought.

The Examinations of the Society, both Local and Professional, are conducted by the General Council on principles securing perfect impartiality, and have become an important factor in the musical education of the country. The Society contains more than two thousand members, is governed by a General Council consisting of Delegates elected annually by the various Sections. The General Council is thus directly representative of teachers of music, and has sought to obtain registration for them by introducing a Bill into Parliament. A Monthly Journal is published in which the meetings and proceedings of the Society are recorded, and of which Mr. A. F. Smith, Mus. B., is the Editor. In addition the Society has not forgotten the needs of unfortunate musical brethren. Most of the large Sections of the Society have formed Benevolent Funds, and in 1897, in commemoration of Queen Victoria's Jubilee, the Society took over and has since continued the Orphanage for the Children of Musicians, first established by Miss Helen Kenway. The London Section contains more than 500 members, and the proceedings at its Sectional Meetings are always interesting and largely attended. The Section is represented on the General Council by Dr. W. H. Cummings, Professor Prout, and Dr. C. Vincent. Dr. C. W. Pearse is the Hon. Treasurer, and Mr. F. Harold Hankins the able and energetic Secretary of the Section. The General Offices of the Society are at 19 Berners Street, London, W. Mr. A. Page is the Hon. General Treasurer, Mr. Edward Chadfield the General Secretary, and Mr. Hugo T. Chadfield the Acting Secretary.

INDY, PAUL MARIE THÉODORE VINCENT DE, born in Paris, March 27, 1851, studied for three years under Dietmer, attended Marmonêt's class, and learnt harmony and the elements of composition with Lavignac. He then, without having learnt counterpoint or fugue, undertook to write a grand opera, 'Les Burgervaves,' which was not finished, and a quartet for piano and strings, which was submitted to César Franck in the hope of overcoming the objections to the musical profession which were expressed by his family. Franck, recognising much promise in the work, recommended the presumptuous youth to study composition seriously. In 1873 d'Indy, who was now a first-rate pianist, entered Franck's organ class at the Conservatoire, where he obtained a second accessit in 1874, and a first in the following year. In 1875 he became chorus-master under Colonne, and in order to obtain experience of orchestral detail, took the position of second drummer, which he retained for three years, at the end of which time he began to devote himself entirely to composition. He has since been extremely helpful in organizing Lamoureux's concerts and in directing the rehearsals, which have led to such fine results as the performance of 'Lohengrim.' Like many another musician, d'Indy owes

1 Date verified by register of birth.
the first performance of his works to Pasdeloup, and his overture 'Piccolomini' (Concert Populaire, Jan. 25, 1874), revealed a musician of lofty ideals, whose music was full of melancholy sentiment and rich orchestral colouring. This overture, altered and joined to the 'Camp de Wallenstein' (Société Nationale, 1880), and the 'Mort de Wallenstein' (Concert Populaire, March 14, 1880), forms the trilogy of 'Wallenstein,' a work inspired directly by Schiller, and one of the composer's most remarkable productions. The entire trilogy was performed for the first time at the Concerts-Lamoureux, Feb. 20, 1888. After this work he produced a symphony, 'Jean Hunyadi' (1875); an overture to 'Antony and Cleopatra'; 'La Forêt enchantée' (1878); symphonic ballad after Ulland; a quartet for piano and strings in A; 'La Chevauchée du Cid,' scene for baritone and chorus; 'Sangefleuri,' legend for orchestra; a suite in D for trumpet, two flutes, and string quartet; a 'Symphony' on an Alpine air for piano and orchestra, all of which have been performed at various Parisian concerts. [A 'Symphonic Cévenole' appeared in 1886; a 'fantaisie' for orchestra and oboe solo, op. 31, on French themes, was played at the Lamoureux Concerts in 1888; 'Tableaux de Voyage,' a suite for orchestra, op. 36, was given at Angers in 1891; a set of symphonic variations, 'Istar,' op. 42, at the Yasaye Concert in Brussels in 1897; a 'choral varie' for saxophone and orchestra, op. 55; and a second symphony in B flat, op. 57, was played at the Lamoureux Concerts in 1904.] D'Indy's first work for the stage was a small opera entitled 'Attendez-moi sous l'orme,' produced at the Opéra Comique on Feb. 11, 1882, with but little success, but he has since made up for its failure by the dramatic legend 'Le Chant de la Cloche,' which gained the prize at the competition of the city of Paris in 1884, and was performed three times in 1886 under Lamoureux's direction. [His important opera, 'Fervaal,' op. 49, in three acts and a prologue, was given at Brussels, March 12, 1897; and 'L'Étranger,' op. 59, in two acts, at the same theatre, Jan. 7, 1903.] Besides these, d'Indy has written several minor works, a 'Rêve' for violin, cello, and orchestra, pianoforte pieces and songs, sacred and secular. [A trio for pf., clarinet, and violoncello, op. 29; quartets in D, op. 35, and E, op. 45; and a sonata in C, for pf. and violin, op. 59, are the most important of his chamber works. He has written incidental music to various plays, such as, 'Karadec,' op. 34 (Théâtre Moderne, 1892), and 'Mélie,' op. 47 (Th. Sarah-Bernhardt, 1898). He collected a set of ninety 'chansons du Vivarais,' op. 52.] He is a serious and thoughtful composer, who does not in the least care to please the public ear. The melodic idea may be sometimes poor and not very striking, but the composer has such a command of the resources of his art as to be able to make the most ordinary phrases interesting. In order to obtain this extraordinary knowledge of technical combinations and of vivid musical colouring, d'Indy, who was at first a follower of Schumann, has borrowed largely from Berlioz's methods; but in conception and general style his 'Chant de la Cloche' approaches more nearly to Wagner. [He is the author of the libretti of 'Fervaal' and 'L'Étranger'; he has published the first part of a treatise on composition; and he was one of the founders of the Schola Cantorum, a director, and professor of composition in it. An essay on him, by the late Hugues Imbert, was published in The Musician, and reprinted in Studies in Music, p. 110.] A. J.; additions in square brackets by G. F.

INFLEXION. Whenever sentences are to be uttered loud for many people to hear, in the open air or in a large building, there is a natural tendency, for distinctness' sake, to say the greater part on one note, that is, in monotone. It is not, however, natural to say the whole at one pitch; nor is it pleasing, for then monotone becomes monotonous. It is natural and pleasing to make at the opening some short gradual ascent to the note in question, to make at the close some gradual descent from it; and, if the phrase is long, possibly also to make some variation of the monotone in the middle of its course. The foregoing statement contains the germ out of which a great part of plain-song has developed; the simpler developments denoted by the term inflexion will be treated in this article, the more elaborate ones under Responsorial Psalmody.

The simplest method of singing a religious service, or part of one, may then be described as 'monotone with inflexions'; and three classes of inflexion above indicated have their technical names as follows:—the ascent to the monotone is called the intonation, the descent is called the cadence or ending, the variation that may occur between these two is called the mediation. The Gregorian Tones afford an excellent illustration of this; for in their normal form each of them consists precisely of these elements. An intonation leads up to the monotone, which is broken by a half-close expressed in the mediation; the monotone is then resumed, till it ends with the closing inflexion called the ending. Of these three ways of varying the monotone, the cadence or ending is the most universal, the intonation is the one most readily forgone (see INTONATION). This, too, is shown by Psalmody; for in the ordinary singing of Psalms the intonation is used but once, while the mediation and ending are used at every verse. But turning from Psalmody, which is fully treated in its own place, it is well to see how these principles affect other simple parts of the service,—the reading of lessons, the saying of collects, the singing of versicles and responses, and the like. In all
such matters as these, experience soon showed that it was necessary to lay down rules; the individual officiant could not be trusted in all cases to use melodious or pleasing inflexions or cadences, if left to himself and the light of nature; it was necessary to define those that were to be used. Still more was such definition necessary in the case of responses and chants in which a large body of singers had to unite.

Regular forms of inflexion have, therefore, been prescribed for the guidance of officiant and choir; they have differed in detail at various times and in various places, but the same principles underlie them all. Some examples from the ancient English Sarum Use, compared with Guidetti's *Directorium Chori* of 1582 and with the recently revised choir-books of Solesmes, will set the similarities and differences in a clear light.

1. For the collect proper, the collect of the day, the Sarum books prescribe, as a rule, one very simple inflexion, a cadence at the end taken up by the Amen, thus:

\[\text{per omni} - \text{la saeculo} - \text{rum. Amen.}\]

In other cases the cadence took a different form, thus:

\[\text{saeculo} - \text{ulum. Amen.}\]

and sometimes there was a mediation as well as a cadence, for example, thus:

\[\text{per sanctorum} \text{qui tecum. sanctorum per. saeculo} - \text{rum. Amen.}\]

or thus:

\[\text{sanctorum qui tecum. deus per. saeculo} - \text{rum. Amen.}\]

Guidetti prescribed three forms, one festal and two ferial: the ordinary ferial is uninflected monotone, the festal has two inflexions, thus:

\[\text{per omni quem qui. spersa} - \text{sanctorum per. saeculo} - \text{rum.}\]

The latter of the two inflexions is employed also at the principal break, or metrum, in the body of the collect, and the former at minor breaks. In the other ferial form, used in collects said on various occasions, the inflexion employed is the drop of a minor third, or 'semitomius.'

The Benedictine rules are more elaborate; the *Tonus solennis* recites on G, but rises from F for the intonation, and falls to it again in mediation and cadence:

\[\text{Oremus. Concred... omnipotens deus ut nos... libret.}\]

The simpler form combines the use of the semiditonus, the drop of a fifth called 'diapente,' and the usual inflexion given above for the metrum.

2. For the ordinary versicles and responses the semiditonus is used universally; but a divergence of use shows itself when the sentence ends with a monosyllable, for then both Guidetti and Solesmes prescribe a return to the reciting note (F), while the familiar English custom is to rise only a tone (to E).

Some versicles have more elaborate cadences:

\[\text{Exurge dominus ad juva nos.}\]

\[\text{Dirigat te... deus.}\]

3. The usual form of Salutation was as follows at Sarum:

\[\text{Dominus vos liberat. Et... ut... orare. Amen.}\]

but on some occasions there was merely the drop of a third as the inflexion at the cadence. Solesmes has a solemn form corresponding to that of the collect; and a simple form which, at Sarum, is simply a semiditonus. Guidetti prescribes nothing but monotone.

4. The 'ekphonosis,' or closing sentence pronounced aloud at the end of a prayer, had similarly two forms. The more elaborated was this:

\[\text{per omni quem qui. spersa} - \text{sanctorum per. saeculo} - \text{rum. Amen.}\]

but the simpler form, having the drop of a semitone at the end, was also used. These are common elsewhere.

5. The drop of a fifth, which was used for versicles as well as for the collects, according to Sarum use, thus:

\[\text{Humilis... ead benedictionem. Et... Deus... prae.}\]

was also the inflexion for Old Testament lessons read at Mass, and for the preliminary
The Benedictines have preserved the same forms as those used at Salisbury, in a slightly different shape. Guidetti gave a very poor substitute for them, which has become sadly common since. He prescribed monotone for the Epistle, except in case of a question; this, however, is sometimes varied by the rise of a tone on the last accented syllable of the last sentence and a descent again to the reciting note. For the Gospel he ordered no metrum, the following punctum—

\[ \text{Simon Petrus ad Iesum,} \]

and the following conclusion:

\[ \text{et vi - tam e - ter nam pos - si de - bit.} \]

Of the Ambrosian inflexions it can now only be noted that they are very many and very different from those given above. To describe them adequately would require another long article. They may be seen in one form in La Regola del Canto Fermo Ambrosiano (Milan, 1522). W. R. E.

**INGEGNERI, MARC ANTONIO,** born at Verona about the middle of the 16th century, received his musical instruction there from Vincenzo Ruffo, then choirmaster of the Verona Cathedral. Some time before 1572 Ingegneri became choirmaster of the Cathedral at Cremona, in which position he seems to have remained till his death in 1592. At Cremona he had the celebrated Claudio Monteverde for his pupil. Ingegneri is chiefly noticeable as being the composer of a set of twenty-seven Responsoria for Holy Week, which passed for a long time and until quite recently as the work of Palestrina. They were received into the complete edition of Palestrina's works, among the Opera dubia in the 32nd Volume. But in 1897, the original printed work of Ingegneri dated 1588, from which they were taken, turned up at a sale, and the ascription of them to Palestrina was thus proved to be erroneous. Dr. Haberl of Regensburg has since republished them under the name of their true author. In themselves these Responsoria are very beautiful devotional music, and quite worthy to be ranked with the works of Palestrina, although there occur in them harmonies and modulations foreign to the usual style of Palestrina. Ingegneri's other works are two Books of Masses, 1573 and 1587; three Books of Motets, 1576-89; one Book of Hymns, and eight Books of Madrigals not all completely preserved. Besides the Responsoria the only other works of Ingegneri republished in modern times are three Motets, 'Surrexit Pastor Bonus,' a 5, in Duhn's Sammlung Altdeutscher Musik; 'Duor Seraphim,' a 8, in Commer's Musica Sacra; and 'Haec Dies' in Haberl's Musica Sacra, 1898.

J. R. M.
INGLOTT, William, born 1554, became organist of Norwich Cathedral in 1608. He was distinguished for his skill as a performer on the organ and virginals. [Two of his pieces for the latter instrument are in the Fitzwilliam Virginal Book, vol. ii. pp. 576 and 581.] He died in Dec. 1621 aged sixty-seven, and was buried Dec. 31 in the cathedral, where on the west side of the southern pillar adjoining the entrance to the choir a painted monument to his memory was placed, June 15, 1622. Nearly ninety years afterwards the monument, having become dilapidated, was restored at the expense of Dr. Croft. An engraving of it in its restored state is given in The Posthumous Works of Sir Thomas Browne, 1712.

INITIALS, ABSOLUTES. Though it is not necessary that a Plain-song Melody should begin on the Final, Dominant, or even Mediant, of the Mode in which it is written, the choice of the first note is not left entirely to the composer's discretion. He can only begin upon one of a series of sounds, selected from the Regular or Conceded Modulations of the Scale in which he writes, and invariably occupying the first place in all Plain-song Melodies referable to that Scale. These sounds are called Absolute Initials. Their number varies, in different Modes; no Tonality possessing less than three, or, as a rule, more than six; and, among them, there are a few which, though freely permitted by law, are, in practice, very rarely used.

In the following Table the letters enclosed in brackets denote the more unusual Initials: while those printed in Italics indicate that the sounds they represent are to be taken in the lower Octave, even though they should thus be brought beyond the normal bounds of the Mode.

| Mode XI. | C.[A][D][G] | [C][A][D][G] | [C][A][D][G] | [C][A][D][G] | [C][A][D][G] |

[The Sarum Tonal, which is one of the most careful and methodical of medieval authorities on such a point, gives a slightly different list: the rarer initials are bracketed.]

The selection of some of these sounds may seem, at first sight, a little arbitrary; but, in truth, it is sometimes very difficult to decide upon a suitable first note. This is particularly the case with regard to Antiphons, the first notes of which exercise a marked effect upon the Tone-ending to which the corresponding Psalms are sung. It will be remembered that the entire Antiphon is always repeated, immediately after the Psalm. It follows, therefore, that, unless care be taken to bring the last note of the ending of the Psalm into true melodic correspondence with the first note of the Antiphon, forbidden intervals may arise. By a careful arrangement of the Absolute Initials, the earlier writers on Plain Chaunt did their best to reduce the danger of introducing such intervals to a minimum. [See Antiphon: Modes, THE ECCLESIASTICAL.]

INNIG. A word used by Beethoven during his German stay (op. 101, 1st movement; 109, last duo.; 121 b), and Schumann (op. 12, 'Des Abends'; op. 24, No. 9; op. 56, Nos. 2 and 4, Manfred music, No. 2, etc.) to convey an intensely personal, almost devotional, kind of expression.

IN NOMINE. A somewhat vague name, bestowed by old English writers, on a certain kind of Motet, or Antiphon, composed in Latin words. It seems to have been used, in the first instance, for compositions the text of which began with the words in question, or in which those words were brought prominently forward: such as the Introit, 'In nomine Jesu'; the Psalm, 'Deus, in nomine tuo'; and other similar cases. But its signification certainly became more extended; for Butler, writing in 1636, commends the 'In nominem of Parsons, Tye, and Taverner,' just as we should commend the Madrigals of Weelkes, or Morley, or Gibbons. The name is even employed for instrumental pieces [as in the case of two works by Bull in the Fitzwilliam Virginal Book, vol. i. p. 135 and vol. ii. p. 54].

The term, In nomine, is also very reasonably applied to a Fugue, in which the solmisation of the answer does not correspond with that of the subject, and which, therefore, is a fugue in name only. [See HEXACHORD.] W. S. E.

IN QUESTA TOMBA OSCURA. A song of Beethoven's for contralto, with PF. accompaniment, to words by Carpani, written probably at the invitation of the Countess von Razewuska, and forming one of thirty-six compositions to the same words by various musicians, professional and amateur. Among the most eminent of the contributors are Salieri, Sterkel, Cherubini, Astolfi, Righini, Zingarelli, Weigl, Dionys Weber, Tomaszek, Aloys Forster, Paer, Eberli, Czerny. Zingarelli sent ten versions with quartet accompaniment. Czerny's single setting occupied eleven folio pages. Beethoven's was the last in the volume, and is the only one which has survived. The Allgemeine Musik-Zeitung for Oct. 19, 1808, in announcing the publication, prints
two of the settings, by Salieri and Sterkel, and in Jan. 1810, two more by Reichardt. For another joint-stock volume in which Beethoven took part, see VATERLÄNDISCHE KÜNSTLERVEREIN.

INSANGUINE, GIACOMO, a Neapolitan composer, called also Monopoli from his birthplace near Naples, was born between 1740 and 1744, and was a pupil of the Conservatorio di Sant' Onofrio, where he studied with Cotumacci, being appointed second professor of the school in 1774. Besides masses, psalms, a setting of the Passion, and several motets, he wrote about fifteen operas (list in Florimo and Fétis), of which the following are extant:—'Didone abbandonata' (1772), 'Arianna e Teseo' (1773), 'Adriano in Siria' (1773), 'Le Astuzie per Amore' (1777), 'Medonte' (1779), 'Calipso' (1782), and 'Lo Punnaco revotato,' the undated score of which is in the Fitzwilliam Museum, Cambridge. Insanguine also wrote part of an opera 'Eumene,' with Majo (1771). He died about 1795 at Naples. (Quellen-Lexikon.)

INSCRIPTION (Lat. Inscription, Ital. Motto). A motto, or sign, or combination of both, placed at the beginning of a canon, to indicate, more or less clearly, the manner of its resolution.

During the latter half of the 15th century, the founders of the Flemish School—by whom the more abstruse forms of imitation were assiduously cultivated—seem chiefly to have aimed at rendering the solution of their Enigme, or enigmatical canons, impossible. Some of their most extravagant conceits are presented in the shape of crosses, circles, squares, triangles, rainbows, chess-boards, sun-dials, and other equally fantastic designs, without the addition of any clue whatever to their hidden meanings. (See examples in Hawkins's Hist. chap. 97.) But, more frequently, they are written in a single line—called the Guida—headed by some old proverb, or well-known quotation from Holy Scripture, which, though ostensibly vouchedsafed for the purpose of giving the student some little insight into the secret of their construction, tends rather, as a general rule, to increase his perplexity. Headings, such as these, are called Inscriptions: and so obscure is their occasional meaning, that even Glareanus calls one of them τον σφυγτη ανάμμα.

Foremost among the composers of these ingenious works, and high above them all, stands Josquin des Préz, the refinement of whose scholarship is as clearly proved, by the grace of his Moti, as his quite exceptional genius is by the smooth flow of the canons to which they are prefixed. In the second Agnus Dei of his 'Missa L'Ami bandidon,' he intimates that the tenor is to be silent, by the pretty inscription, 'Agnus secundum non est cum grege.' In another place, heIVERY the same meaning under the Greek proverb, βατραχος οκ Σαρέος, in allusion to Aelian's statement that the frogs on the island of Scriphos do not croak. Other writers have contended themselves with 'Vox faucibus haesit.'

To show that the second voice is to begin at the end, and sing backwards, Hombrecht says, plainly enough, 'Ut prius, sed dictior retrograde.' Pierre de la Rue more sternly exclaims, 'Vade retro, Satanas.' Another quaint old composer writes, 'Canit more Hebraaram';—referring to the custom of reading Hebrew from right to left. Josquin sums up the whole matter in a single word—'Cancriza,' i.e. walk like a crab. Equally terse is the motto prefixed to the third Agnus Dei in his 'Missa L'Omme armé';—where the omission of all rests, in one of the parts, is indicated by the direction 'Clama ne cesses.' Sometimes he gives us a French motto, as in his 'Missa de Beata Virgine,' where 'Vons jeurnez les quatre temps' shows that one part is to wait four semibreves, before taking up the subject—a direction which is less poetically expressed by another writer, in the words 'Fuga in epidiaspon, post duo tempora'—'a Canon in the Octave above, after two Semibreves.'

Some of Hombrecht's inscriptions are very obscure. 'Accedens potest inesse et abesse praeeter subjecti corruptionem' implies that the part may be sung, or omitted, at will, without injury to the music. 'Decimas reddo omnia quae possideo' shows that the (unwritten) bass must sing a tenth below the Discant. 'Tu tenor cancrida, et per antifrasa canta' indicates that the tenor is to sing backwards, and, with all the intervals inverted. Not less oracular is Mouton's 'Deo adversus in unam,' which means that two singers are to stand opposite each other, with the canon between them, each reading it upside down from the other's point of view—an arrangement which is also dictated by 'Respice me, ostende mihi faciem tuam.' More mysterious still is 'Justitias et Pax osculatiae sunt'—indicating that the two performers are to begin at opposite ends, and meet in the middle.

When black notes are to be sung in the time of white ones, we sometimes find 'Nigra sum, sed formosa;' or, 'Nocent in diem vetere;' or, 'Dum habitus lucem credite in lucem.' By 'Crescit in duplum' (or 'tripulum') we understand that the notes are to be sung in double or (triple) augmentation. 'Tres dect sept toes' means, that each of the three written parts is to be doubled, in canon, so as to form a composition for six voices.

The list of these hard sayings is interminable; and the hardness of many of them is increased by the signs of Mood, Time, and Prolation, with which they are sometimes accompanied. For instance, a semicircle, a semicircle with a bar drawn through it, and a circle with a point in the centre, would, if placed one above the other, at the beginning of a stave, serve to indicate
that one voice was to sing four crotchets in a bar, another, four minims, and the third, three semibreves. In the last Agnus Dei of Pierre de la Rue's 'Missae L'homme armé,' we find a combination of no less than four such signs.

Following the example of Palestrina, the great composers of the golden age cast all these pedantries aside, and wrote their really beautiful canons in notation which any singer could readily understand. Palestrina himself delights in making two voices sing in canon, while three or four others carry on the subject in close imitation, or complicated free fugue; as in the lovely second Agnus Dei of his 'Missa Brevis,' and many others, equally beautiful. In all these cases, the voices to which the canon is committed are expected to sing from a single part; but, the inscription prefixed to that part is so plain, that they find no difficulty whatever in doing so. Thus, 'Symphoniae' (Missa Brevis as above) indicates a canon in the unison. 'Canon in Diapason' or 'Epidiapason,' a canon in the octave above, and so on. The sign, $\text{\oe}$, or some similar figure—called the \textit{Presbo}—indicates the place at which the second voice is to begin; and a pause, \textit{\textdegree}, is placed over the note on which it ends. The two voices can, therefore, sing just as easily from a single part as from two separate copies.

In modern editions, the matter is still further simplified, by writing out the canon in full; though, in the best copies, the inscription is still carefully retained.

\textsc{Instrument} (Lat. \textit{Instrumentum}, Ital. \textit{Stromento}). In general language, a tool, that by means of which work is done; hence, in music, an apparatus for producing musical sounds. Numerous are the various kinds of instruments in practical use at the present day, they form but a small proportion of the immense number which have been invented and used from time to time. Out of nearly 240 different kinds mentioned in a list in Koch's \textit{Musikalisches Lexicon} (art. 'Instrument') only 67 are given as being in use at present, and some even of these are merely varieties of the same genus. Various causes have contributed to the survival of certain instruments and the extinction of others. Quality of tone would of course be a powerfully operating cause, and practicalness in a mechanical sense would be scarcely less so; besides this, the various ways of combining instruments in performance which prevailed at different periods, had the effect of proving certain of them to be unnecessary, and so indirectly tended to abolish them. Thus before the time of Lullii it was customary for the most part to combine instruments of the same class only, and we read of a 'Consort of Violes,' 'Concert of Flutes,' etc.; this fact rendered necessary flutes of deeper compass than are now used, and accordingly we find tenor and bass flutes, extending downwards to $f$ on the fourth line of the bass stave;¹ [in Purcell's 'Ode on St. Cecilia's Day' there is a part for bass flute down to $d$]. So soon, however, as the combination of wind and stringed instruments was found to be preferable, the feeble bass of the flute would be insufficient and unnecessary, and the larger kinds of flutes naturally enough fell into disuse.

All musical sounds are the result of atmospheric vibrations; and such vibrations are excited either directly, by blowing with suitable force and direction into a tube, or indirectly, by agitating an elastic body, such as a stretched string, whereby it is thrown into a state of vibration, and communicates its own vibrations to the surrounding air. One or another of these two is the acting principle of every musical instrument. On tracing the history of the two it does not appear that either is of earlier date than the other; indeed tradition with respect to both carries us back from history into myth and fable, the invention of the earliest form of stringed instrument, the Lyre, being attributed to the god Mercury, who, finding the shell of a tortoise cast upon the bank of the Nile, discovered that the filaments of dried skin which were stretched across it produced musical sounds; while the invention of the \textit{tibia} or pipe—the earliest form of which is said to have been made (as its name implies) from the shank-bone of a crane—is variously ascribed to Pan, Apollo, Orpheus, and others.

To attempt to describe, however briefly, all the various kinds of instruments which have been in use from the earliest ages to the present day would extend this article far beyond its due limits. It will only be possible to mention those which are still of practical importance, referring the reader for a fuller description to the articles under the headings of their various names, and for the earlier and now obsolete kinds to Hawkins's \textit{History of Music}, which contains copious extracts from the works of Blainchianus, Kircher, Luscinus, and others, illustrated by wood-cuts.

In all essential respects, instruments may be divided into three classes: namely, wind instruments, the descendants of the pipe; stringed instruments, descended from the lyre; and instruments of percussion. This classification, which is of considerable antiquity,² though not entirely satisfactory, is sufficiently comprehensive, and appears more practical than any other.

1. \textsc{Wind Instruments} (Ger. \textit{Blasinstrumente}; Ital. \textit{Stromenti da vento}; Fr. \textit{Instruments à vent}).—These are of two kinds; namely, those in which a separate pipe or reed is provided for each note, and those in which the various notes

¹ In Lully's \textit{Le TRIOMPHE DE L'AMOUR}, Paris, 1699, there is a quartet of flutes, the lowest part of which is only possible on a bass flute.

² Casiodorus, writing in the 6th century, gives the same three divisions, under the names \textit{infundibula}, \textit{cornubia}, and \textit{peruviosinae}.\]
are produced from a single tube, either by varying its length, or by the action of the lip in blowing. In the first kind the wind is provided by means of bellows, and is admitted to each individual pipe or reed by the action of a key. The instruments of this kind are the Organ, Harmonium, Concertina, and Accordion. The only members of this class which differ from the others are the Syrinx or Pan's-pipes (which although it possesses a pipe for each sound has neither keys nor bellows, but is blown directly with the breath) and the Northumbrian and Irish bag-pipes, which are provided with bellows, but have their pipes pierced with holes, as in the flute. Wind instruments which have but a single tube are made of either wood or metal (generally brass), and the various sounds of which they are capable are produced, in the case of two of the metal instruments—the Horn and Trumpet,—by simply altering the tension of the lips in blowing, while in the others and in the wood instruments this alteration is supplemented and assisted by varying the length of the tube. In brass instruments the length of the tube is altered in three different ways; first, by means of a slide, one part of the tube being made to slip inside the other, after the manner of a telescope; secondly, by valves, which when pressed have the effect of adding a small piece of tube to the length of the circuit through which the wind passes; and thirdly, by keys, which uncover holes in the tube, and so shorten the amount of tube which is available for the vibrating column of air. The brass instruments with slides are the Trombone and Slide Trumpet; those with valves are the Cornet à pistons, Valve Horn, Valve Trumpet, Flügelhorn or Valve Bugle, Saxhorn, Valve Trombone, Euphonium, Bombardon, Bass Tuba, and Contrabass Tuba; while those with keys are the Key-bugle or Kent Bugle and the Ophicleide. All these are played with a cup-shaped mouth-piece. Wood wind instruments have the tube pierced with holes, which are covered by the fingers or keys, and the uncovering of the holes shortens the amount of tube available for vibration and so gives notes of higher pitch. Some of them receive the breath directly through a suitably shaped opening; these are the Flute, Piccolo (i.e. flauto piccolo, a small flute), Fife, and the Flageolet and the toy 'tin whistle,' which last two are survivors of the now obsolete family of flûtes à bec. In others the sound is produced from the vibrations of a split reed, which is either single and fixed in a frame or mouthpiece, as in the Clarinet and Bassethorn [see Clarinet], or double, consisting of two reeds bound together so as to form a tube with the upper end flattened out, as in the Oboe, Cor Anglais or Oboe di Caccia, Bassoon, and Contrabass or Double Bassoon. One wind instrument of wood remains to be mentioned, the use of which is becoming rare, though it is still occasionally met with in military bands. This is the Serpent, which differs from all other wood instruments in having a cup-shaped mouthpiece, similar to that of the trumpet. It is the only remaining member of a now extinct family of German wood instruments called Zinken (Ital. Cornetti), which were formerly much used in the Church service, and were in use as late as 1715 for playing chorales at the top of church towers. 2 (See, Pipe, Wind Instruments.)

2. Stringed Instruments (Ger. Saiten-instrumente; Ital. Strumenti da corde; Fr. Instruments à cordes).—In all these the sound is produced from stretched strings of either catgut, wire, or occasionally silk, the naturally feeble resonance of which is in all cases strengthened by a sound-board. As with the wind instruments, some of these are provided with a separate string for each note, while in others the various sounds are obtained by shortening the strings, of which there are now never fewer than three, by pressure with the fingers. Stretched strings are thrown into vibration in three different ways—friction, plucking, and percussion.

The mode of friction usually employed is that of a bow of horse-hair, strewn with powdered rosin (see Bow), and instruments so played are called bowed instruments (Ger. Streichinstrumente). They are the Violin, Viola or Tenor, Violoncello, and Contrabasso or Double Bass; and an humble though ancient member of the same family is occasionally met with in the Hurdy-gurdy, in which the friction is produced by the edge of a wooden wheel strewn with rosin and revolving underneath the strings. In this instrument the stopping or shortening of the strings is effected by means of a series of keys, which are pressed by the fingers of the left hand, while the right hand turns the wheel. [See HURDY-GURDY.]

The instruments played by plucking are the Harp, in which each note has a separate string, and the Guitar, Mandoline, and Banjo, in which the strings are 'stopped' by pressure with the fingers upon a finger-board, provided with slightly raised transverse bars, called frets. In the Cither or Zither, an instrument much used in Switzerland and the Tyrol, five of the thirty strings are capable of being stopped with the fingers, while the remaining twenty-five are played 'open,' giving but one sound each. In most of these instruments the plucking takes place with the tips of the fingers (pizzicato), but in the Zither the thumb of the right hand is arched with a ring bearing a kind of metal claw, while in the instruments of the Mandoline family a plectrum of tortoiseshell is used. In the Harpsichord and Spinet the strings were also played by plucking, each key being provided with a small piece of quill or stiff leather.

1 In 1628 was published in Paris a 'Phantastique et cinq parties, pour les Cornets, par H. Lejeune.' J. S. Bach occasionally uses them in his Church Cantatas.
Only three stringed instruments are played by percussion—the Dulcimer, Clavichord, and Pianoforte; in the first the strings are struck by hammers held in the hands, in the second the metal ‘tangents’ which strike the strings also hold it in such a position that it can vibrate, and in the third the hammers are attached to the keys.

3. Instruments of percussion (Ger. Schlag-instrumente; Ital. Strumenti per la percussione; Fr. Instruments à percussion).—These are of two kinds, those whose chief use is to mark the rhythm, and which therefore need not, and in many cases do not, give a note of any definite pitch, and those which consist of a series of vibrating bodies, each giving a definite note, so that the whole instrument possesses a scale of greater or less extent. Of the instruments of indefinite pitch, some are struck with drumsticks or other suitable implements; these are the Bass Drum, Side Drum, Tambour de Provence, Gong or Tam-tam, and Triangle; others, such as Cymbals and Castanets, are used in pairs, and are played by striking them together; and one, the Tambourine, or Tambour de Basque, is struck with the open hand. The instruments of percussion which give definite notes, and which are therefore musical rather than rhythmical, are the Kettle Drums (used in pairs, or more), Glockenspiel (bells used in military bands and occasionally with orchestra), and the Harmonica, consisting of bars of either glass, steel, or wood, resting on two cords and struck with a hammer.

4. There are still one or two instruments to be mentioned which are not easily classed in any of the three categories just described. In the Harmonium, which we have accepted as a wind instrument, the sound is really produced by the vibrations of metal springs, called reeds, though these vibrations are certainly excited and maintained by the force of wind; so also stretched strings may be acted upon by wind, and of this the Aeolian Harp is an illustration. [See Aeolian Harp.]

Metal tongues or reeds may also be played by plucking, and this method is employed in the so-called Musical Box, in which a series of metal tongues are plucked by pins or studs fixed in a revolving barrel. [See vol. i. p. 136.] Another instrument played by plucking, but possessing only a single reed or tongue, is the Jew’s-harp. In respect to the production of its various notes this instrument differs from all others. It is played by pressing the iron frame in which the reed is fixed against the teeth, and while the reed is in a state of vibration altering the form of the cavity of the mouth, by which means certain sounds of higher pitch than the fundamental note may be produced, and simple melodies played. These higher sounds appear to be upper ‘partial-tones’ of the fundamental note of the reed, which are so strongly reinforced by the vibrations of the volume of air in the mouth as to overpower the fundamental tone, and leave it just audible as a drone bass. [See Jew’s Harp.]

In the Harmonica proper, another mode of sound-production is employed, the edges of glass bowls being rubbed by a wettled finger. [See Harmonica.]

For much of the information contained in this article the writer is indebted to Schilling’s Universallexicon der Tonkunst. F. T.

Instrumentation (or Orchestration), the art of distributing music suitably among the various instruments which the composer is, for the time being, employing. This important branch of art is of quite modern growth, even the greatest of the older composers having scarcely attempted to grapple with its numerous and difficult problems. Before it was possible to solve these it was necessary that instruments should be well developed into marked and contrasting types, their mechanism rendered trustworthy, a common tuning adopted, that players should exist of tolerably advanced technique, and finally that that wonderful product of our art, the Conductor, should have been gradually evolved.

Under the head of Orchestra will be found an account of the growth, during 300 years, of the orchestral ensemble; under the names of the separate instruments an historical account of each is attempted. It is our purpose in the present article to follow the swift rise, during the 19th century, of the art of ensemble writing.

A cursory glance at the state of music during the 17th and early 18th centuries will suffice to show under what difficulties the musicians of those times laboured. Vocal music was still the reigning branch; instruments were chiefly used to accompany this, either in counterpoint, as with the Bachs, or in harmony, as with Scarlatti. A fixed custom existed of writing all such accompaniments in the form of a ceaseless figured bass (basso continuo), which imparted a monotonity of rhythm and colour to the music which nothing could disguise. Until this disappeared little could be done. In the cantatas of Bach will be found exquisitely ingenious instances of songs with an accompaniment, that is, a polyphonic interweaving of two or three oboes, flutes, bassoons, or even trumpets, with the voice, but the eternal continuo beneath robs these of half their beauty and nearly all of their originality. [There is, however, strong evidence that Bach and Handel used to fill up the basses with such a wealth of melodic and harmonic resource that the monotony which is now generally felt can hardly have been present. Bach, in particular, improvised real parts, which were woven into the general fabric of the music with the most beautiful results. Without the possibility of reproducing the real effect of this, it is difficult to imagine what impression it may have created.] The following is perhaps an extreme case, but a striking one:—

2b
Replace the monotonous bass by something more varied and this would be a marvel.

The *Basso continuo* appears to have kept its ground in music so long because it really formed a most convenient shorthand or sketch for the harmonic outline of a piece. But so long as music was composed in an unvarying number of parts—whether two, three, four, or five—the piece was a monochrome. To produce the fluctuating tints, the gusts of feeling in which modern writers delight, an ever-shifting quantity as well as quality of sound is necessary—now all high up, now all low down, now in many parts, now in unison. And here instrumentation may be said to begin. Just as in vocal music the glee—in which the voices were employed in varying combinations—gave us a new source of vocal colour, so it was not till the tradition of the continuo was broken through that orchestral colour became possible.

These few bars, from an early symphony of Haydn (Peters, No. 4, in G) will give an idea of our meaning. The charm of such a passage depends upon two things,—the unexpected use of high-placed harmony after low-placed, and the adroit entry of the new instruments. Before this if a solo instrument was used it began in the first bar and went solidly on to the last, so that the element of surprise was wholly wanting. It is in Haydn and still more in Mozart that we first find capital made out of a slender stock of resources by adroitly bringing in a new element in a prettily unexpected way. Mozart's magnificent ear did not fail to catch the individual characteristics of the separate wind instruments, and though in his early works conventionality reigns, the number of novel effects to be found in his last three symphonies and his last opera is really surprising. It must be borne in mind that in Mozart's time the orchestra consisted of a small body of strings—from six to ten first violins, as many seconds, four violas, four violoncellos and two basses—one or two flutes, two oboes, seldom two clarinets, one or two bassoons, two natural horns, two natural trumpets, and drums. Only for large choral works were a few extra instruments engaged, and these generally included three trombones—why three no one knows exactly. The prevalence of three-part harmony in the 18th century is hardly a sufficient cause, as the trombones never took a treble part, but so universal was the custom that Beethoven's 'Pastoral Symphony' is the only instance known of the use of two of these instruments.

So the experienced composer learnt pretty
It is with reluctance that we omit the eight or ten bars preceding this passage, but we must urgently beg the reader to examine the entire movement and convince himself that nothing more perfectly orchestral and more exquisitely coloured could ever be achieved. It will be seen that even the trumpets, which can only play the notes of the tonic chord, are worked in with consummate address in the loud tutti in G flat, without piano accounting for their absence from the one chord which contains no possible note for them, while the initial accompaniment figure is so invented that every instrument in the orchestra may take it in turn. Unfortunately it would only be too easy to quote instances where even Beethoven's skill was baffled by the wretched limitations of the natural horn and trumpet. One curious case demands notice. The remarkable part for the third horn in the Ninth Symphony is always quoted as evidence that Beethoven understood the valve-horn; but whether this is so or not, can any one understand why in the rest of the symphony no attempt is made to depart from conventional practice? Here and here alone does the horn forsake its harmonic scale. There is an analogous instance in Mendelssohn where, in the Coda of the 'Ruy Blas' overture—and nowhere else—he makes the trumpet play an entire 1½ octave of the scale of C, an impossible feat for the natural trumpet.

The most important step in the progress of instrumental art was the enfranchisement of the horn and trumpet—or, to put it more correctly, the completion of their scale by scientific contrivance. And it is really remarkable how this inevitable and indispensable step was fought against by the composers whom it was to benefit. As early as 1818 Rossini, who was a proficient player, had shown in his works that a new field lay open to the horn; yet in 1874 when Verdi wrote in the Sanctus of his 'Requiem' this passage for the full orchestra in octaves, including the trumpets and horn,
little personal, practical knowledge of wind instruments, and one finds it hard to understand how Richard Wagner, an operatic conductor of great experience, should have struggled in the mists of ignorance so long as he did. In his early works we find—as in most contemporary scores—two valve-horns and two hand-horns, an absurd compromise which many composers then made. The hand-horns were to satisfy the purists, the valve-horns to satisfy the composer's needs, and a very slight inspection of the 'Tanhauser' Overture will reveal the futility of this concession to pedantry. The unique way in which valve-horns are written for in 'Lohengrin'—'Cori in E, in F, in G,' etc. marked at every other bar—shows quite a phenomenal misunderstanding of what seems to us now a very simple matter. But the treatment of the trumpet question by the French is still more curious. French composers were the first to adopt the useful cornet à pistons into the orchestra, but instead of using it as a substitute for the trumpet they kept both, and they retain them to this day. Therefore all French music suffers from too much brass in the treble octave. Another curious feature is that the French have always been accustomed to write for three tenor trombones, instead of for alto, tenor, and bass, like other nations, and to write the three parts on one stave of the score. Which is the cause and which the result is hard to say, but it will be noticed that they write their trombone harmony in the tenor register, generally in close position—the least sonorous arrangement—and have no lower octave. All the music of Auber, Halévy, Gounod, and even Meyerbeer, and Berlioz (where they are not employing extra forces) shows this weakness, and Wagner, in scoring his 'Rienzi' for the Paris Opera, imitated the French plan: he, however, added a tuba, which was a considerable improvement.

Here are three typical passages for brass: the first, from Gluck, shows that the faulty arrangement of trombones was traditional. Here all the instruments are very badly placed:—

The next, a well-known passage in Gounod's 'Faust,' shows a fine idea marred for want of the low notes of the bass trombone:—

The third, from 'Rienzi,' shows the assistance lent by the tuba, which here should have been a bass trombone and tuba in octaves. It also shows the curiously futile arrangement of the two natural and two valve trumpets.

It is necessary at this point to remonstrate against the practice of all writers of books on orchestration who quote recklessly any passage from the scores of the great composers which contains the instruments they are speaking of, and leave it to be inferred that all such illustrations are good. As a matter of fact the examples culled from Beethoven and Schubert are all—in the modern sense—quite bad, for it is almost certain that neither of these composers, great though they were, ever heard a trombone in his life, and they seem to have no notion of their enormous tone. Then, too, the student's attention should be directed to the fact that in Mendelssohn's time there was no proper treble to the brass (the valve-trumpet being still distrusted), and the oboe was used as a vile substitute. Also, when a powerful bass was wanted, the ophicleide, serpent, and bass horn—anything that could be obtained, in fact—was used indifferently. Mendelssohn was also responsible for the superstition that the brass must be used only on rare occasions. This was perhaps quite as well in the days when trombonists had not learned to play as Tchaikovsky taught them:—
Coming now to the second stage of the orchestral art, the period when the instruments were all perfected and musicians were really acquainted with their powers and limitations, it may be as well to look at each separately for a moment. The flute underwent little change after the perfecting of its mechanism by Gordon in 1830 (for which Boehm obtained the credit), but its numerous family became reduced to two, the concert flute and the military flute (a semitone higher), with two corresponding piccolos. Meyerbeer gave us the boon of three flutes in the orchestra—only exceptionally used by Grétry and Haydn before his time—and afterwards this was increased to four. The beautiful bass flute (so-called) will perhaps be revived some day.

The oboe has had its compass restricted, and its tone fined down to a silver thread. Its valuable relative the Cor Anglais has only lately attained to a permanent place in the orchestra. A baritone oboe, called the heckelphone, has just been invented (1904), and may perhaps find favour. It is a modern improvement of a little known but beautiful instrument called the bass oboe. Strauss has used the oboe d'Amore in a recent work. This is an oboe in A, of no very distinctive tone-quality. It is sometimes brought out for revivals of Bach's works, where it is frequently needed. The clarinet has undergone much development. The C clarinet has quite vanished, and the A is seldom now encountered, the extra semitone of compass being easily attained by an extra key on the B♭ instrument. The E♭ and D high clarinets are being introduced into the orchestra, and when judiciously used serve materially to strengthen the upper regions of wind harmony. Few who have heard it will forget the wild derivative shriek of the D clarinet towards the end of 'Till Eulenspiegel':

Yet more will come of the clarinet. Wagner has given us that noble instrument the bass clarinet (which Strauss and others have so terribly missed), and Messrs. Rudall & Carte now make an equally beautiful tenor clarinet in E♭. A trustworthy double bass clarinet is much needed to supersede the unsatisfactory contrabassoon, and now the saxophone is being at last recognised as a novel source of power. But really fine players for all these are yet lacking. The bassoon has learned to be agile, and has had its upward compass much extended, and of the horn—now another instrument altogether—the same may be said. The player no longer deranges his lip by 'crooking' in multifarious keys, but uses his own judgment, and the composer is gradually learning (he has not yet quite learnt) to simplify the maddening operation of transposition by writing for the normal instrument—that in F. Those who really understand the capabilities of this very difficult instrument are not afraid to write passages which, a few years ago would have been declared to be quite impossible: e.g.:
The natural and slide trumpets have been relegated to their proper habitat, the military band. The valve-trumpet is now written for, generally in F by the Germans, in G by the French, in B♭ by the Russians, and with sad vагueness by the English, who generally find it replaced by the more handy but less brilliant cornet. Strauss, by his frequent use of stopped or sordino effects, has given it a new voice in the orchestra. He has attempted, but without success as yet, to do the same for the trombone and tuba. Wagner first introduced us to the uncertain family of the tubas, not, it is said, intending the saxhorn group, but a special type of a tone-quality intermediate between horn and trombone. The tuba, or saxhorn is not yet employed with a true comprehension of its rather gross tone, but composers are learning. The percussion instruments have won only too much favour, and musicians would do well to imitate Wagner's admirable reticence and skill in their use rather than to copy the semi-barbarous Russians. To Edward Elgar must be credited two new effects on the Timpani, a roll executed with the fingers and one with metal coins instead of drumsticks. To Tchaikovsky we owe the admirable Celesta.

The harp remains what it was when first introduced—a mere futility in the orchestra; its part very pretty to look at in the score and agreeable to the conductor's ear, to which it is generally in close proximity, but inaudible to every one else. Almost the only useful effect is the glissando, first used by Liszt and so sadly abused by Strauss; but the elaborate passages of the latter composer and Wagner are seldom more than a useless vexation to the player. Lastly, the stringed instruments have had their compass extended, and the most enormous demands are made upon their execution. The double basses creep note by note lower, in Spohr's time G was an exceptional note, now they are sometimes required to tune down to C. The violoncello has nearly four octaves of compass, the viola has learnt to play as difficult and relatively as high music as the violin, which latter some of our present-day composers require to go as high as \( \frac{7}{5} \).

Such are the orchestral resources of to-day, the development of most of which we owe to Richard Wagner. He it was who first used the instruments in complete groups and—a much more important matter—found out how to combine these groups with certainty of effect, however disproportionate their strength of tone. What is aptly called the instrumental problem of the three basses had never been systematically solved before his time, the varying proportions of each required to balance in pp, in mf, and in ff requiring many years of experiment before it was finally decided. Any student now learns it in a few months. The publication of cheap miniature scores, the fine orchestras in our music-schools, and the more scientific teaching have resulted in a new generation of composers and almost a new orchestral language. The earliest quotable example of this language of emotional colour, as it may be called, still remains one of the very finest—the opening bars of the Prelude to 'Lohengrin.' (See p. 479.) Of this new language the most brilliant exponents are, beyond question, Tchaikovsky and his little band of compatriots. It is fortunate that the principal works of this great Russian writer are cheaply attainable by all, for there are no scores to compare with them for educational purposes, owing to the comparative simplicity of the effects and the perfect certainty of their results. Merely to hear a performance of the 'Symphonie Pathétique' and the 'Casse-Noisette' Suite with the miniature scores in one's hand is worth all the books on orchestration ever written. In London, at least, the student of to-day need not lack the necessary means of learning instrumentation in its best form.

It should not be ignored that much orchestral music is written in all countries without this experience and knowledge, and nothing but the curious fact that an orchestra will nearly always sound beautiful, even when the composer has gravely miscalculated his effects, saves such works from failure. It is quite a common thing for a composer to experiment, in the full assurance that though he cannot in the least tell how his music will sound he is sure it will not sound bad. The Prelude to 'Rheingold' might be cited as a case in point. None of the effects come off as intended—the first B♭ on the bassoons is too coarse for the double basses, the arpeggios for the horns do not sound well, the long notes of the tubas are impossible and too coarse, the wood wind cannot come out against the strings—yet the general effect desired, that of a swelling, surging river, is undoubtedly attained. Perhaps the same may be said of some of Strauss's more extravagant tone-pictures. So long as the harmonic structure is sound and the music interesting, it is almost impossible to write orchestration that sounds bad.
But Strauss has exploited a field which is open to grave doubt and even opposition. This is the utilisation of unresolved dissonances merely for the purpose of obtaining thickness of sound or novel tone quality. It had been discovered, even by Mozart, that a discord could be sounded together with its resolution, provided the two were on instruments of different quality. Here is a familiar instance from the first solo of his pianoforte concerto in D minor:

---

But at least such passages are theoretically defensible, while Strauss not only always allows himself to write (as Beethoven did occasionally) counterpoint that does not fit, e.g.:

---

and a still bolder and more striking one from Beethoven's ditto in G major:

---

this sounds frightful if played on two pianos, but perfectly well on the orchestra. On other occasions Beethoven has been less happy, and passages could be pointed out which not all our reverence for the king of music can make us admire. This, from the 'Leonore' Overture is unobjectionable on the piano, but hideous on strings:

---

and so on for 5 bars.
and harmony, like Berlioz, that seems to have no sense:—

but writes deliberate cacophony such as these:—

not to mention the bleating of sheep in ‘Don Quixote’ and the battle in ‘Ein Heldenleben,’ things which really seem outside the pale of music altogether. And the consideration of such exceptional cases as these leads us to glance at the phase through which the art of orchestration is now (in 1905) passing. The marvellous polyphony of Wagner’s later works was intended, above all, to produce an emotional effect by means which—though subtle—were yet susceptible of analysis, and only in the extremest dramatic moments broke their own laws. But an attempt is now being made to produce still greater emotional effect by a style of orchestral writing which defies analysis, and in which the music per se has but a weak structure and material of the utmost degree of tenuity. This is surely a return to the poetically intended but unsuccessful strivings of Franz Liszt! It is of no use to astonish an audience and worry an orchestra by writing almost impossible passages if there be no definite structure beneath the dazzling surface. And there are very few of the musical works we now allude to which will bear the simple but infallible test of being played upon the piano.

The distinction to be drawn between the merit of orchestration itself and the value of the music to which it is applied brings us to another point. Many books on orchestration have been written, and beyond the first details the student finds them all equally disappointing and useless. The reason of this is that the quotations from scores, the more admirable they are, the less they appeal to the student’s needs. Berlioz, for instance, gives seventeen examples from Gluck, seventeen from Beethoven, and twelve eccentric—but one hardly dare say successful—specimens from his own pen. None represent normal music such as a student would be likely to write. Gevaert’s monumental treatise is the best, but of his 276 ( ) quotations from Beethoven not one would be of practical use, as they one and all are the outcome of Beethoven’s originality. Richard Hofmann has written a ponderous treatise with many hundreds of quotations—mostly identical with those in Gevaert. His method of teaching the art is to set the student to score chorales for every conceivable combination of instruments. This might teach score-reading, but would have no further effect. Not till about 1896 did it occur to any one to teach the translation of pianoforte music into orchestral idiom, which is all that a book can teach on this subject. For the relation between eye and ear can only be learnt through exercise of both, especially the latter. The tyro who looks at this simple example—

cannot possibly appreciate its beauty. Flute, oboe, and clarinet, all have the same phrases, and look exactly alike. And again, who could, from a mere inspection of the notes, guess for what instruments our first quotation from Bach was scored, and appreciate its extreme boldness? No: orchestration can only be learnt by teaching the cor to remember effects already heard, while the eye renders doubtful and untrustworthy assistance as to the putting these upon paper. But much might be learnt by a critical comparison of the different scoring of similar passages—when these can be found. One interesting example of this kind exists in the two arrangements of Weber’s ‘Invitation à la Valse’ by Berlioz and Felix Weingartner, illustrating very vividly the progress in our art from 1841 to 1896. We append a couple of specimens, giving, as in all our other quotations, the real notes to all the instruments, for facility of reading.
THE SAME PASSAGE. WEINGARTNER.
Final Tutti. Weingartner.

Piccolo and 2 Flutes.
3 Oboes.
E flat Clarinet.
2 Clarinets.
3 Bassoons.

4 Horns.

3 Trumpets.

3 Trombones, and Tuba.

3 Drums.

Castanets and Tambourine.

Triangle.

Cymbals.

Harp.

Violins.

Viola.

Cello.

Bass.

[* The percussion instruments loud but not coarse.*]
The limitations of space forbid us to enter into the multiform questions that arise when the orchestra is used as an accompanying medium to a solo instrument, a solo voice, or a chorus. The instrumentation of brass and wind instruments is also a matter to interest specialists only. F. C.

The use of the organ in religious services has now undergone a remarkable reform. The once separate lines of each verse—an arrangement, which, however effective it may be in the hands of an accomplished organist, is generally very much the reverse in those of a tyro. (Good examples are to be found in Ch. H. Rink's 'XXIV Chorale,' op. 64, 1894.) The beautiful orchestral interludes which embellish the chorale, 'Cast thy burden upon the Lord,' in Mendelssohn's 'Elijah,' and those on a more extended scale in 'Nun danket' in the 'Lobgesang,' were evidently suggested by this old German custom; while the grand crash of brass instruments, introduced between the lines of 'Sleepers, wake!' in the same composer's 'St. Paul,' illustrates, perhaps, the most striking effect which has yet been made to produce.

For an explanation of the word Interlude, in its dramatic sense, see INTERMEZZO. W. S. R.

INTERMEZZO (Fr. Intermezzo, Ent'acte; Old Eng. Enterlude). I. A dramatic entertainment of light and pleasing character, introduced between the acts of a Tragedy, Comedy, or Grand Opera; either for the purpose of affording an interval of rest to the performers of the principal piece; of allowing time for the preparation of a grand scenic effect; or, of relieving the attention of the audience from the excessive strain demanded by a long serious performance.

The history of the Intermezzo bears a very important relation to that of the Opera; more especially to that of the Opera Buffa, with the gradual development of which it is very intimately connected. The origin of both may be traced back to a period of very remote antiquity. It is, indeed, difficult to point out any epoch, in the chronicles of dramatic art, in which the presence of the Intermezzo may not be detected, now in one form, and now in another. Its exact analogue is to be found in the Satirae of the old Roman Comedy. In the Mysteries and Miracle Plays of the Middle Ages—those strange connecting-links between old things and new—it assumed the form of a Hymn, or Carol, sung, either in chorus, or by the Angelo marzio, to a sort of chant which seems to have been traditional. In a rare old work, by Macropedias, entitled Bassarius, Fabula festivissima (Utrecht, 1553), some verses, adapted to a melody by no means remarkable for its festive character, are given at the close of every scene. And the popularity of the tune is sufficiently proved by its persistent reiteration in other works of nearly similar date.

These rude beginnings contrast strangely enough with the highly finished Intermezzi decennially presented in the course of the Passion-Play at Ober-Ammergau. But, the Passion-Play is known to have undergone many im-
important improvements, within a comparatively recent period; and its case is, in every way, so exceptional, that it is no easy task to determine its true position as a historical landmark.

Almost all the earlier Italian plays were relieved by Intermezzi. Many of these were simply madrigals, sung by a greater or less number of voices, as occasion served. Sometimes they were given in the form of a chorus, with instrumental accompaniment. The most favorite style, perhaps, was that of a song, or canzonetta, sung by a single performer, in the character of Orpheus. In no case was the subject of these performances connected, in any way, with that of the pieces between the acts of which they were interpolated. Their construction was extremely simple, and their importance relatively small. We first find them assuming grander proportions, at Florence, in the year 1589, on the occasion of the marriage of the Grand Duke Ferdinand, with Christine de Lorraine. To grace this ceremony, Giovanni Bardi, Conte di Vernio, produced a new comedy, entitled L'Amico fidè, with Intermezzi, a grand spectacolo, prepared expressly for the festival, and presented with a degree of splendour hitherto unknown. For the first of these, called 'The Harmony of the Spheres,' the poetry was written by Ottavio Rinuccini, and the music composed by Emilio del Cavaliere, and Cristofano Malvezzi. The second, also written by Rinuccini, and called 'The Judgment of the Hamadryads,' was set to music by Luca Marenzio. For the third, called 'The Triumph of Apollo,' invented by Bardi, and written by Rinuccini, the music was composed, partly by Luca Marenzio, and partly, it is said, by the Conte di Vernio himself. The fourth, entitled 'The Infernal Regions,' was written by Pietro Strozzi, and accompanied by sombre music, composed, by Giulio Caccini, for violins, viole, lutes, lyres of all forms, double harps, trombones, and 'Organs of Wood.' The fifth—'The Fable of Arion'—was written by Rinuccini, and set to music by Cavaliere and Malvezzi.

This grand performance naturally gave an extraordinary impulse to the progress of dramatic music. Within less than ten years, it was followed, in the same city, by the production of the first Opera Seria, at the Palazzo Corsi. Meanwhile, the Intermezzo steadily continued to advance in interest and importance. Guarini (1537-1602) wrote Intermezzi to his own Pastor Fido, in the form of simple madrigals. In 1623, L'Amorosa Innocezza was produced at Bologna, accompanied by Intermezzi della Congregazione di Apollo, per Difese convertita a Luaro, set to music by Ottavio Vernizzi. This work introduces us to a new and extremely important epoch in the history of this branch of dramatic art. By degrees, the Intermezzi were made to embody a little continuous drama of their own. Their story—always quite unconnected with that of the principal piece—was more carefully elaborated than heretofore. Gradually increasing in coherence and interest, their disjointed members rapidly united themselves into a consistent and connected whole. And thus, in process of time, two distinct dramas were presented to the audience, in alternate acts; the character of the Intermezzo being always a little lighter than that of the piece between the divisions of which they were played, and on that very account, perhaps, better fitted to win their way to public favour. The merry wit inseparable from the Neapolitan school undoubtedly did much for them; and, before long, they began to enter into formidable rivalry with the more serious pieces they were at first only intended to relieve. Their popularity spread so widely, that, in 1723, a collection of them was printed, in two volumes, at Amsterdam; and so lasting was it, that, for many years a light Italian Operetta was frequently called an Intermezzo in Musica.

The next great change in the form of the Intermezzo, though really no more than the natural consequence of those we have already described, was sufficiently important, not only to mark the culminating point in its career, but to translate it, at once, to a sphere of art little contemplated by those who first called it into existence. Already complete in itself, all it now needed was independence: an existence of its own, apart from that of the graver piece to which it owed its original raison d'être. Such an existence was obtained for it, by the simple process of leaving the graver piece—whether tragedy, comedy, or serious opera—to depend upon its own resources, while the Intermezzo, with its once disconnected links united in unbroken sequence, was performed as a separate work, in one act. This revolution was effected chiefly by the genius of a young composer, whose untimely death, considered in relation to its influence upon the lyric drama, can never be sufficiently deplored. From beginning to end, the narrative of Pergolesi's art-life is identified with the ultimate fate of the Intermezzo. His first important composition—a sacred drama, called 'San Guglielmo d'Aquitania,'—was diversified by Intermezzi, of a playful character, introduced between its principal divisions. His greatest triumph—'La Serva Padrona,'—was, itself, an Intermezzo, pur et simple. This delightful work—the whole interest of which is centred in two characters, whose voices are accompanied only by a stringed band—was first produced, in Italy, between the acts of another piece, in the year 1733. Its success was unbounded. It soon found its way to every capital in Europe; and, everywhere but in France, was received with acclamation. The French, however, were slow to appreciate it at its true value. Its first
performance in Paris, Oct. 4, 1746, was little short of a failure: but when, August 1, 1752, it was played between the acts of Lulli's 'Acis et Galathee,' it originated a feud between the 'Lullistes' and the 'Boullonistes,' scarcely less bitter than that which raged, at a later period, between the rival followers of Gluck and Piccinni. National vanity forbade the recognition of the Italian style: national good taste forbade its rejection. Rousseau, with characteristic impetuosity, threw himself into the thick of the fray; fought desperately on the Italian side; declared French Opera impossible; and stultified his own arguments by the immediate production of a French Intermezzo—the well-known 'Devin du Village.' Long after this, the controversy raged, with unabated fury; but, in spite of the worst its enemies could do, 'La Sœvra Padrona' exercised a salutary and lasting effect upon French dramatic music—indeed, upon dramatic music everywhere. In 1750 it met with an enthusiastic reception in England. Its success was as lasting as it was brilliant; and, even to our own day, it has kept its place upon the stage, not between the acts of a serious opera, but as an independent piece; marking the critical period at which the history of the Intermezzo merges, permanently, into that of the Opera Buffa, its legitimate heir. [See Opera Buffa.]

The anomalous character of this sweeping change became at once apparent. It was as necessary as ever, that, on certain occasions, some sort of entertainment should be given between the acts of serious pieces. The Intermezzo having so far outgrown its original intention as to be utterly useless for this purpose, something else must needs be found to supply its place. The dance was unanimously accepted as a substitute; and soon became exceedingly popular. And thus arose a new species of interlude, which at no time, perhaps, attained a greater degree of perfection, than under the 'Lunley Management' at Her Majesty's Theatre, where, night after night, a Ballet Divertissement, with Cerito, or Carlotta Grisi, for its principal attraction, was given between the acts of a grand opera.

Instrumental music is frequently played, in Germany, after the manner of an Intermezzo. The noble Entr'actes composed by Beethoven, for Schiller's 'Egmont,' by Schubert for 'Rosamunde,' and by Mendelssohn, for Shakespeare's 'Midsummer Night's Dream,' are familiar to every one. These, of course, can only be presented in association with the great works they were originally designed to illustrate.

II. The word is also used for a short movement, serving as a connecting-link between the larger divisions of a sonata, symphony, or other great work, whether instrumental, or vocal; as in No. 4 of Schumann's 'Faschingsschwank aus Wien' (op. 20). The beautiful Intermezzo which, under the name of 'Introduzione,' lends so charming a grace to Beethoven's 'Waldstein Sonata' (op. 53) is said to be an afterthought, inserted in place of the well-known 'Andante in F' (op. 35), which, after due consideration, the great composer rejected, as too long for the position he originally intended it to occupy. The term is, however, used for larger movements:—as by Mendelssohn for the third movement in his F minor PF. Quartet (op. 2), or for the 'grand adagio' which, under the name of 'Nachru,' he specially composed in memory of his friend Ritz, and inserted in his Quintet (op. 18), in lieu of the previous Minuet (Letter, Feb. 21, 1832); or for the Entr'acte expressive of Hermia's search for Lysander in the 'Midsummer Night's Dream' music. The second movement of Goetz's Symphony, virtually a Scherzo, is entitled Intermezzo. Schumann and Brahms, again, have both used the word to denote independent pieces of small dimensions, the former in his Opus 4—six pieces usually consisting of a main theme and an Alternativo; and the latter in his opp. 76, 117, 118, and 119, for PF.

INTERNATIONAL MUSICAL SOCIETY

(Internationale Musikgesellschaft). This Society, inaugurated in 1899 by Professor Oskar Fleischer with the assistance of Dr. Max Seiffert and others, has for its object a federation of the musicians and musical connoisseurs of all countries, for purposes of mutual information on matters of research or on more current matters. Its method is first of all to promote group-action in the shape of local bodies (Ortsgruppen), meeting for lecture, debate, or social and musical intercourse; secondly to combine these and other units for administrative purposes in larger sections (Sektionen) corresponding to nationalities; and thirdly to federate the whole by means of publications issued in four alternative languages, or occasionally by General Congresses. Of Local Groups (Ortsgruppen) there are already organised about forty, each with its own machinery. Two large Societies already existing, the Musical Association of Great Britain, and the Vereeniging voor Noord-Nederlands Muziekgeschiedenis of Holland, have consented to act under certain conditions as Ortsgruppen of the Society, and are therefore 'allied societies' (Kartell-Vereine). By the side of these Local Groups there are very numerous separate members (einfache Mitglieder), who have not entered any of the groups. Of National Sections (Sektionen), for administrative purposes, there are at present nineteen organised:—Austria, Baden, Bavaria, Belgium, Denmark, Finland, France, Great Britain and Ireland, Holland, India, Italy, North Germany, Russia, Saxony, Spain, Sweden, Switzerland, Thuringia, United States of America. The Sectional administration in the case of Great Britain and Ireland is by means of a body called the 'English Committee.' The whole Society is controlled by a Governing
Body (Präsidium), consisting of the aggregate of the heads of the different National Sections. The four alternative languages of the publications are German, English, French, and Italian. The publications consist of (a) a Monthly Journal, (b) a Quarterly Magazine, (c) Book-publications. The Monthly Journal (Zeitschrift) has varied in size from 32 to 72 pages; it usually contains official announcements of the Society, three or four leading articles, reports of current events, records of performances of ancient music, records of lectures, occasional notes, book-reviews, music-reviews, lists of newspaper articles on music in all countries, notes and queries among members, etc. The Quarterly Magazine (Staatsblätter) averages 170 pages per quarter, and contains large articles of scientific value. A quarter of the reading matter in Journal and Magazine is in English. A yearly Index of Journal and Magazine combined averages 70 pages. The Book-publications (Beiträge) consist of articles too large for the Magazine; there have been hitherto fourteen. The publishers are Messrs. Breitkopf & Härtel of Leipzig. The publications are controlled by an Editing Committee (Redaktions-Kommission) appointed by the Governing Body. The Editing Committee in turn appoint one or more editors (Redakteure). There are Corresponding Members (Korrespondirende Mitglieder) appointed by the Governing Body. At the General Congress of 1904, held in Leipzig, the organisation was slightly altered in the direction of strengthening the control of the Governing Body. The present Chairman of the Governing Body is Professor Hermann Kretzschmar. The Society contains possibilities which will perhaps be further developed.

C. M.

INTERVAL. The possible gradations of the pitch of musical sounds are infinite, but for the purposes of the art certain relative distances of height and lowness have to be definitely determined and maintained. The sounds so chosen are the notes of the system, and the distances between them are the Intervals. With different objects in view, different intervals between the sounds have been determined on, and various national scales present great diversities in this respect—for instance the ancient Gaelic and Chinese scales were constructed so as to avoid any intervals as small as a semitone; while some nations have made use of quarter-tones, as we have good authority for believing the Muzizzins do in calling the faithful to prayer, and the Dervishes in reciting their litanies. The intervals of the ancient Greek scales were calculated for the development of the resources of melody without harmony; the intervals of modern scales on the other hand are calculated for the development of the resources of harmony, to which melody is so far subordinate that many characteristic intervals of modern melody, and not unfrequently whole passages of melody (such as the whole first melodic phrase of Weber's Sonata in A.) are based on the use of consecutive notes of a single chord; and they are often hardly imaginable on any other basis, or in a scale which has not been expressly modified for the purposes of harmony. Of the qualities of the different intervals which the various notes form with one another, different opinions have been entertained at different times; the more important classifications which have been proposed by theorists in medieval and modern times are given in the article HARMONY.

The modern scale-system is, as Helmholtz has remarked, a product of artistic invention, and the determination of the intervals which separate the various notes took many centuries to arrive at. By the time of Bach it was clearly settled though not in general use; Bach himself gave his most emphatic protest in favour of the equal temperament upon which it is based in his Wohltatnperatures Olivier, and his judgment has had great influence on the development of modern music. According to this system, which is specially calculated for unlimited interchange of keys, the semitones are nominally of equal dimensions, and each octave contains twelve of them. As a consequence the larger intervals contained in the tempered octave are all to a certain extent out of tune. The fifth is a little less than the true fifth, and the fourth a little larger than the true fourth. The major thirds and sixths are considerably more than the true major thirds and sixths, and the minor thirds and sixths a good deal less than the true minor thirds and sixths. The minor seventh is a little larger than the minor seventh of the true scale, which is represented by the ratio 9:16, and is a mild dissonance; and this again is larger than the harmonic sub-minor seventh which is represented by the ratio 4:7; and this is so slight a dissonance that Helmholtz says it is often more harmonious than the minor sixth.

The nomenclature of intervals is unfortunately in a somewhat confused state. The commonest system is to describe intervals which have two forms both alike consonant or dissonant as 'major' and 'minor' in those two forms. Thus major and minor thirds and sixths are consonant, and major and minor sevenths and ninths are dissonant; and where they are capable of further reduction they are called 'diminished,' as diminished thirds and sevenths; and when of further enlargement as 'augmented,' as augmented sixths. With intervals which have only one normal form the terms 'major' and 'minor' are not used; thus fifths and fourths lose their consonant character on being either enlarged or reduced by a semitone, and in these forms they are called respectively 'augmented' and 'diminished' fifths and fourths. The interval of the
augmented sixth is indifferently called 'superfluous' or 'extreme sharp' sixth; and the same terms are applied to the fifth; the term 'false' is also used for diminished in relation to the fifth and for augmented in relation to the fourth.

The term 'Imperfect' is used in two senses in relation to Intervals. In the classification of Consonances it was common to divide them into perfect and imperfect, or perfect, middle, and imperfect; but as the classification varied at different times reference must be made for details to the article Harmony. On the other hand, when an interval is commonly known in its normal condition as perfect, such as a fourth or a fifth, it is natural per contra to speak of the interval which goes by the same name, but is less by a semitone, as 'imperfect.'

For further details on the subject see Just Intonation, Scale, and Temperament.

INTONATION. I. The initial phrase of a plain-song melody. For the intonations of the psalm tones see the article Psalmody, and for other intonations in simple inflected monotone see the article Inflexion. But the term is applied more widely to the opening phrases of other plain-song melodies besides those that grow out of inflected monotone; this is due to the fact that such melodies as antiphons, hymns, etc. were 'precented,' that is, the opening phrase was started alone by the Precentor or other skilled musician, or by some one else under his direction. This secured a right opening and a suitable pitch. Other pieces were precented by the celebrant, and the intonations of the Creed, and the various settings of Gloria in excelsis were inserted in the Missal for his guidance.

It is always interesting to observe the use made, by modern composers, of ancient materials; and we shall find that some of the Intonations given, in our examples, have been turned by the greatest masters of the modern school, to very profitable uses. For instance, Handel, in 'The Lord gave the word,' from the 'Messiah,' uses the Intonation of the First Tone, transposed a fourth higher, with wonderful effect—

![Intonation example](image1)

while that of the Eighth (as sung to the Magnificat) has been employed, in a very striking manner, by Mendelssohn, in the 'Lobgesang'—

![Intonation example](image2)

We have selected these instances from innumerable others, not only because the chief interest of the works mentioned is centred in these few simple notes; but because, in both cases, the phrases in question are really used as Intonations—i.e. as initial phrases, given out in unison, to be continued in harmonious chorus.

Whether the composers were conscious of the source of the ideas they treated with such masterly power, is a question open to argument; but, there can be no doubt that John Sebastian Bach, when writing his great Mass in B minor, chose the opening subject of his magnificent Credo, simply because it was the Intonation assigned to the Credo in the plain-song mass—

![Intonation example](image3)

That the effect with which Bach introduces this grand old subject was not lost upon Mendelssohn, is evident, from a passage in a letter written from Rome, by the last-named composer, to his friends in Germany (April 4, 1831).

II. The word is also used of singing or playing in tune. Thus, we say that the intonation of such and such a performer is either true, or false, as the case may be. For a detailed account of the conditions upon which perfect tune depends, see Just Intonation, Scale, and Temperament.

INTONING. The practice of singing the opening phrase of a Psalm, Canticum, or other piece of Ecclesiastical Music, not in full chorus, but, as a solo, or semi-chorus, assigned either to a single Priest, or to one, two, or four leading Choristers. [In the present day the more accurate term PRECENTING is generally used.]

INTRADA, or ENTRATA. A term used for an opening movement, as by Beethoven for the introductory piece of the Battle-Symphony of his Battle of Vittoria, or for the first movement of the Serenade, op. 25. 'Entrâde' is used by Mozart for the overture of his 'Bastien' (K.58); and 'Entrada o Concerto' by Bach for an independent movement (Cat. No. 117). [See ENTRée (ii.), vol. i. p. 784.]

INTRODUCTION. The main purpose of an Introduction in music is either to summon the attention of the audience, or to lead their minds into the earnest and sober mood which is fittest for the appreciation of great things. The manner in which these purposes are accomplished varies greatly with the matter which is to follow. If that be light and gay any noise will answer the purpose, such as brilliant passages or loud chords; but if it be serious it is manifest that the Introduction should either have proportionate inherent interest or such dignity of simplicity as cannot be mistaken for triviality. It is interesting to note the manner in which this...
has been carried out by great masters, and the more important relations which seem to subsist between a movement and its Introduction in their works.

In the first place there are many examples of simple signals to attention; such as the single independent chord which opens Haydn's Quartet in $E_b$ (Trautwein, No. 33); the simple cadence which introduces his Quartet in C, op. 72 (Trautwein, No. 16), and the group of chords with cadence which precedes the Quartet in $B$, op. 72 (Trautwein, No. 12). These have no other relation to the movement than that of giving notice that it is about to commence, and are appropriate enough to the clear and simple form of the Haydn Quartet. Similar examples are to be remarked in very different kinds of music; as for instance at the commencement of the Eroica Symphony, where the quiet sobriety of the beginning of the movement seems to call for some signal to attention, whilst its supreme interest from the very first seems to indicate that introductory elaboration would be out of place. In Chopin's Nocturne in B major, op. 62, No. 1, again, it is not difficult to see the reason for the adoption of the two simple forte chords with which it is introduced; since the commencement of the Nocturne proper is so quiet and delicate that without some such signal the opening notes might be lost upon the audience whilst a more developed Introduction would clearly be disproportionate to the dimensions of the piece.

In great orchestral works, such as symphonies, Haydn usually commences with a set and formal Introduction in a slow tempo, which marks the importance of the work, and by remaining so close to the principal key of the movement as hardly ever to pass the limits of the tonic and dominant keys, assists the audience to realise the tonality. Mozart did not follow the example of Haydn in this respect, as many of his symphonies are without Introductions,—especially the well-known ones in $C$ (Jupiter) and $G$ minor. In quintets, quartets, sonatas, and such forms of chamber-music he is also sparing of Introductions, but there is an example of some extent in the quintet for pianoforte and wind in $E_b$ (Kochel, 452), in which the harmonic successions are simple, and there is a more celebrated one to the string quartet in C, in which the harmonic bases vary more freely than in other examples of that period which can be adduced.

Beethoven began from the first to follow up this point, and it is said that some pedants never forgave him for opening the Introduction to his Symphony in C (No. 1) with chords which appear not to belong to that key. The Symphony in $D$ again (No. 2) has a very important Introduction, in which there is free modulation, such as to $B_b$ and $F$, and many passages and figures of great beauty and interest. In the Symphony in $B_b$ the introductory Adagio is in the highest degree beautiful and impressive, and contains modulation even to the degree of an enharmonic change. In the Symphony in $A$ the idea of the independent Introduction culminates. It has a decidedly appreciable form and two definite subjects. It opens with great dignity and decision in $A$ major, and passes thence to $G$, the key of the minor third above, in which a clear and beautiful second subject is given; after this the figures of the opening are resumed and a short transition is made back to the original key, passing on thence to $F$ major, the key of the third below, in which the second subject again appears. From this key the transition to $E$, the Dominant of the original key, is at the same time easy and natural, and sufficiently interesting; and considerable stress being laid upon this note both by its continuance in the harmonies and its reiterated individually, it thoroughly prepares the definite commencement of the Vivace.

In the above instances the Introduction is practically an independent movement, both as regards the substance and the clear division which is made between it and the succeeding movement by a full or half close. In many of his later works Beethoven made an important change in respect of the connection between the Introduction and the movement introduced; by abolishing the marked break of continuity, by the use of figures which are closely related in both, and by carrying the subject matter of the Introduction into the movement which follows.

One of the clearest and most interesting examples of his later treatment of the Introduction is in the first movement of the Sonata in $E_b$, op. 81 a, in which the introductory adagio opens with the text of the movement, which is constantly reiterated in the 'working out' of the Allegro, and yet more constantly and persistently and with many transformations in the long and beautiful coda. Rubinstein has adopted the same device in his Dramatic Symphony in $D$ minor: in which also the first subject of the first movement proper is a transformed version of the opening subject of the Introduction.

In several of his later Quartets Beethoven makes the most important material of the Introduction appear in the movement which follows it, in different ways—as in the Quartet in $E_b$, op. 137, and that in $B$, op. 130, and $A$ minor, op. 132, in the last two of which the subjects of the Introduction and the first movement are very closely intermixed. In the $E_b$ Concerto also the Introduction reappears with certain variations of detail in the latter part of the movement previous to the 'recapitulation' of the subject. In its intimate connection with the movement which follows it, the Introduction to the first movement of the Ninth Symphony is most remarkable. It commences mysteriously with the open fifth of the Dominant, into which
the first rhythms of the first subject begin to drop, at first sparsely, like hints of what is to come, then closer and closer, and louder and louder, till the complete subject bursts in in full grandeur with the tonic chord. In this case the introductory form reappears in the course of the movement, and also briefly in the discussion of the previous themes which immediately precedes the commencement of the vocal portion of the work.

After Beethoven no composer has grasped the idea of intimately connecting the Introduction with the work which it introduces more successfully than Schumann, and many of the examples in his works are highly interesting and beautiful. In the Symphony in C, for instance, a striking figure of the opening reappears in the first movement, in the scherzo, and in the last movement. In the Symphony in D minor, in which all the movements are closely connected, the Introductory phrases are imported into the Romanze, where they occupy an unimportant position. In his Sonata in D minor, for violin and pianoforte, op. 121, the Introduction proposes in broad and clear outlines the first subject of the succeeding allegro, in which it is stated with greater elaboration. The Overture to Manfred affords another very interesting specimen of Schumann's treatment of the Introduction. It opens with three abrupt chords in quick tempo, after which a slow tempo is assumed, and out of a sad and mysterious commencement the chief subject of the Overture proper is made by degrees to emerge. An earlier analogue to this is the Introduction to Beethoven's Egmont Overture, in which one of the chief figures of the first subject of the overture seems to grow out of the latter part of the introduction.

Of all forms of musical composition none are more frequently preceded by an Introduction than overtures; the two above mentioned, and such superb examples as those in the Overtures to Leonora Nos. 2 and 3, and to Coriolan, and such well-known ones as those to Weber's Der Freischiitz and Oberon, Schumann's Genoveva, and Mendelssohn's Ruy Blas, will serve to illustrate this fact.

Introductions are not infrequently found in the place of overtures before choral works, as in Handel's Joshua, Haydn's Creation, Beethoven's Mount of Olives, and Rossini's Stabat Mater. In this sense also the Vorspiel, which Wagner so often adopts in place of an overture before his operas is an Introduction; as in Lohengrin, and Rheingold, and the three operas of the trilogy. In these the figures are generally very intimately connected with the music of the opera, and in all but the first they are part of the first scene, into which they pass without a break. In Tristan und Isolde Wagner gives the name Einleitung to the orchestral prelude both of the first and second acts, and this term is yet more literally translatable as 'Introduction' than Vorspiel. In earlier operas the term Introduction is frequently applied to the whole first scene, as in Don Giovanni, Zauberflöte, Figaro, Freischütz, Il Barbiere, Norma, and so on. In Fidelio, Beethoven gives the name to the opening of the second act, which comprises more of an orchestral prelude, like Wagner's 'Einleitung.'

In relation to instrumental music again Introductions are occasionally found in other positions than at the beginning of an entire work; as for instance the preparatory adagio before the last movement of Beethoven's Septet and of his Symphony in C, the more important one in the same position in Brahms's C minor Symphony, the short passage before the slow movement of the Ninth Symphony, the two notes which introduce the slow movement of the By Sonata (op. 106), and the Introduction to the last movement of Brahms's Quintet in F minor.

INTROIT (Lat. Introitus, Antiphona ad Introitum, Ingressus). An antiphon and psalm, sung, by the choir, at the beginning of mass.

The words of the antiphon, or introit proper, come almost universally from Holy Scripture. The psalm has been curtailed until one verse only is sung, followed by the Gloria Patri. The antiphon is repeated in full at the conclusion of the Gloria, and, according to English custom, before it also. Proper introits are appointed for every day in the ecclesiastical year; and from the first words of these many Sundays derive the names by which they are familiarly known—as Laetare Sunday, the fourth Sunday in Lent; Quasimodo Sunday, the first Sunday after Easter (Dominica in Albis—the 'Low Sunday' of the old English Calendar). The music to which the introit is sung forms part of the Gregorian chant (see GREGORIAN MUSIC) and is to be found in the gradual. The psalms are sung to special forms of the Gregorian tones, more elaborate than those used for the Gospel canticles. The introit for the first mass on Christmas day, which we would have transcribed, had space permitted, is a remarkably fine specimen of the style.

The First Prayer Book of King Edward VI. (1549) appointed for an introit an entire psalm, followed by the Gloria Patri, but sung without an antiphon. At first sight, the rubric 'Then shall he say a Psalm appointed for the Introit,' would lead to the supposition that the psalm in question was not intended to be sung by the choir; this idea, however, is disproved by the fact that the music for it is supplied in Merbecke's Booke of Common Praier Noted, printed in 1550, and adapted, throughout, to King Edward's First Book. This provision of an introit ceased in the second Prayer Book (1552), and has not been renewed. But of recent years the use of an introit has been restored in many Anglican
churches, and many of the plain-song introits have been adapted to English words. W. H. F.

N.B. — Handel uses the word as a synonym for Intrada or Introduction. The autograph of 'Israel in Egypt' is headed 'Moses' Song. Exodus, Chap. 15. Introits.' W. s. n.

INVENTION. A term used by J. S. Bach, and probably by him only, for fifteen small pianoforte pieces—each in two parts, and each developing a single idea. The companion pieces in three parts are, for some not very obvious reason, called 'Symphonien.'

INVERSION (Ger. Umkehrung). The word Inversion bears, in musical terminology, five different significations.

I. Intervals are said to be inverted, when their lowest notes are raised an octave higher, and thus placed above the highest ones, or vice versa, thus——

Inversion. Inversion. Inversion.

In order to ascertain the Inversion of a given interval, add to it as many units as are necessary to make up the number nine. The sum of these units will represent the inverted interval. Thus, since six and three make nine, the inversion of a Sixth will be a Third; as eight and one make nine the inversion of an Octave will be a Unison. The following table shows the Inversions of all intervals lying within the compass of the Octave——

1 2 3 4 5 6 7 8  
8 7 6 5 4 3 2 1

The process of Inversion not only changes the name of an interval, but, in certain cases, and to a certain extent, influences its nature. Major intervals, for instance, become minor, by Inversion; and minor intervals, major. Augmented intervals become diminished, and diminished ones augmented. But the essential character of the interval survives the operation unchanged, and asserts itself, with equal force, in the Inversion. In whatever position they may be taken, consonant intervals remain always consonant; dissonant intervals, dissonant; and perfect intervals, perfect. [See Interval.]

II. A chord is said to be inverted, when any note, other than its root, is taken in the lowest part.

Thus, if the root of a common chord be transposed from the lowest part to one of the upper parts, and the third placed in the bass, the change will produce the chord of the 6-3. If the fifth be similarly treated, the result of the transference will be the chord of the 6-4. Hence, the chord of the 6-3 is called the First Inversion of the common chord; and the chord of the 6-4, the Second.

1 Although the Perfect Fourth — the Inversion of the Perfect Fifth—is chased, by contemporaries, among Discords, it only forms an apparent exception to the general rule; since it is admitted to be a consonance, when it appears between the upper parts of a chord.

If the same process be applied to the chord of the seventh we shall, by successively taking the third, fifth, and seventh, in the bass, obtain its three Inversions, the 6-5-3, the 6-4-3, and the 6-4-2.

Chords, in their normal form, with the root in the bass, are called fundamental harmonies; those in which any other note occupies this position are called derivative, or inverted chords. [See Harmony.]

III. A Pedal Point (Point d'orgue) is described as Inverted, when the sustained note, instead of being placed in the bass, is transferred to an upper part, as in Mozart's Pianoforte Fantasia in C minor (op. 11):——

— or to a middle one, as in the following passage from Deh vieni, non tardi (Nozze di Figaro), where the Inverted Pedal is sustained by the second violins:——

In these, and similar cases, the characteristic note (whether sustained, or reiterated) forms no part of the Harmony, which remains wholly unaffected, either by its presence or removal. [See Harmony.]

IV. Counterpoint is said to be inverted, when the upper part is placed beneath the lower, or vice versa: thus (from Cherubini)——

(a) Double Counterpoint for 2 Voices.

(b) Inversion.

We have, here, an example of what is called Double Counterpoint in the Octave, in which
the Inversion is produced by simply transposing the upper part an octave lower, or the lower part an octave higher. But the Inversion may take place in any other interval; thus giving rise to fourteen different species of Double Counterpoint—those, namely invertible in the Second, Third, Fourth, Fifth, Sixth, Seventh, Eighth, Ninth, Tenth, Eleventh, Twelfth, Thirteenth, Fourteenth, and Fifteenth, either above, or below. In order to ascertain what intervals are to be avoided, in these several methods of inversion, contrapuntists use a table, constructed of two rows of figures, one placed over the other, the upper row beginning with the unit, and the lower one (in which the numbers are reckoned backwards), with the figure representing the particular kind of Counterpoint contemplated. Thus, for Inversion in the Ninth, the upper row will begin with one, and the lower, with nine; as in the following example—

\[
\begin{array}{cccccccc}
1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 \\
9 & 8 & 7 & 6 & 5 & 4 & 3 & 2 & 1
\end{array}
\]

By this table we learn that, when the relative position of two parts is reversed, the Unison will be represented by a Ninth; the Second, by an Eighth; the Third, by a Seventh; and so on to the end: and we are thus enabled to see, at a glance, how every particular interval must be treated, in order that it may conform strictly to rule, both in its normal and its inverted condition. In this particular case, the Fifth being the only consonance which is answered by a consonance, is, of course, the most important interval in the series, and the only one with which it is possible to begin, or end; as in the following example from Marpurg:

**(a) Double Counterpoint in the Ninth.**

![Double Counterpoint in the Ninth](image)

**(b) Inversion—the upper part transposed a Ninth lower.**

![Inversion—the upper part transposed a Ninth lower](image)

Each of the different kinds of Inversion we have mentioned is beset by its own peculiar difficulty. For each, a separate table must be constructed; and, after carefully studying this, the student will be able to distinguish for himself between the intervals upon which he must depend for help, and those most likely to lead him into danger. Without the table he will be unable to move a step: with its aid the process is reduced to a certainty. For a fuller account of contrapuntal inversion see **INVERTIBLE COUNTERPOINT.**

**W. S. B.**

V. In Counterpoint the term inversion is also used to signify the repetition of a phrase or passage with reversed intervals, or, as it is sometimes called, by contrary motion, \(^1\) e.g.—

**Subject, or theme.**

![Subject, or theme.](image)

**Inversion of subject, or theme.**

![Inversion of subject, or theme.](image)

This is a device very frequently adopted in the construction of fugues in order to secure variety. In J. S. Bach’s fugues are many magnificent instances of the effective use of this contrivance—as in the ‘Wohltemperirte Clavier,’ Nos. 6 and 8 of Part 1. Mendelssohn also uses it in his Pianoforte fugues in E minor and B minor, op. 35, Nos. 1 and 3. Sometimes the answer to the subject of a fugue is introduced by inversion—as in Nos. 6 and 7 of Bach’s *Art of Fugue*—and then the whole fugue is called ‘a fugue by inversion.’ Canons and imitations are often constructed in this way. As examples see the Gloria Patri in the Deus Misereatur of Purcell’s Service in Bp, and the Chorus ‘To our great God’ in ‘Judas Maccabaeus.’ \(\text{[See Canon, Fugue, Inscription, Invertible Counterpoint.]} \) **F. A. G. O.**

**INVERTIBLE COUNTERPOINT.** See **Cadence, \(\S\), vol. i, p. 441.**

**INVERTIBLE COUNTERPOINT.** Counterpoint is called invertible when its parts may effectively change places, the higher taking the lower place, and *vice versa.*

Invertible counterpoint in two parts is called double counterpoint:

**From Boyce’s Anthem ‘Turn Thee unto Me.’**

![From Boyce’s Anthem ‘Turn Thee unto Me.’](image)

Let me not be con-found ed.

\(^1\) This device of inversion should be carefully distinguished from the kindred device (which might be termed retroversion) used in all cases of retrograde imitation (see *Boyce* by *Bach* and *Rovewson*), wherein a melody or phrase is not inverted interval by interval, but from beginning to end, the last note standing first and the first last. The exact distinction may be seen in the following short example:

\(\text{[Reversion, used in retrograde imitation]}\)

The association of this last effective device with laborious artifice, in many cases ineffective, seems rather to have obscured its practical value in short phrases. \(\text{K. W. B.}\)
INVERTIBLE COUNTERPOINT

When three-part writing is so constructed as to be completely invertible,—that is, when each part in turn will make an effective bass, while the other two standing above it may still change places,—the result is called triple counterpoint:—

From Bach's 'Wohlte, Clav.,' No. 22.

Whereas double counterpoint offers only two possibilities—the original and its inversion, triple has six—the original and five different inversions; and obviously the addition of a fourth invertible part—making quadruple counterpoint—will give exactly four times the six versions of triple, viz. twenty-four. Similarly, quintuple counterpoint has a hundred and twenty possibilities (five times that of quadruple); sextuple has seven hundred and twenty; and the range may be carried indefinitely into regions which become alarmingly vast, only as they become unpractical.

There is a second important manner of inversion. When parts in counterpoint change places as described above, they undergo what may be called harmonic inversion. But a melody can be subjected also to an inversion which may be termed melodic. (See Inversion, § v.) The following free but excellent instance of this melodic inversion taken from Brahms's German Requiem shows the effect it has upon the melody itself:—

It will be seen that all intervals are reversed,

1 If the three subjects be called 1, 2, and 3 respectively, the following formula makes clear the six possible arrangements of parts: 1 2 3 1 2 3 2 1 3 2 1.

so that every rise becomes a fall, and vice versa—a process in itself so artificial that it is naturally used with much care by the great composers, and in moderation, even by the greatest master of it, Bach himself. The mere melodic inversion of one part, as in the Brahms example, cannot, however, be said to constitute invertible counterpoint; in this at least two parts are necessarily involved. It is true that instances may be found of the melodic inversion of one part, while the other part or parts remain unaltered. There is a striking though fragmentary example in the counter-subject of one of Bach's 'Forty-eight' (No. 24 in B minor), of which the following various forms have a distinctly experimental effect:—

No. 24 of the 'Forty-eight.'

But it may soon be seen that when one of two parts is melodically inverted, it is both natural and easy to invert the other also. And further, it is an important and not an immediately obvious fact that two parts cannot be effectively invertible in this melodic sense without being harmonically invertible also; and the double inversion, like a double reflection, restores their relationship to each other in a way that will be made clear by the short example which follows.

This is a fragment of counterpoint and three different inversions:—
(c) is the model; (d) an ordinary inversion in the harmonic sense only; (e) an inversion in the melodic sense only, or, as it is often called, inversion by contrary movement. In both of these it will be observed that the intervals between the two parts in the model are inverted—sixths turning into thirds, thirds into sixths, a second into a seventh, and so forth. But in the double inversion (both harmonic and melodic) at (d), all the intervals are restored, being exactly what they were in the model. This being so it is only natural that though ordinary inversion flourishes separately, the rarer and more artificial melodic sort is closely associated with ordinary inversion; and in quite early treatises, to be mentioned later, it was taught as a second and difficult variety of double counterpoint invented in both senses. Latterly it does not appear to have been as systematically taught as its real importance would warrant.

The two Manner of Inversion contrasted.—The essential difference between the two styles of inversion is as important as it is interesting. While both bear the stamp of ingenuity rather than spontaneity, their application in composition has widely different effects. One is pre-eminently useful and seldom very significant; the other is usually highly significant and has, in some cases, quite fantastic, even dangerous possibilities. A glance at the Boyce example quoted above will show that its invertibility simply makes for increased utility rather than for increased significance. The feeling of the passage is in no way changed; it is only in a subtle way amplified; and a composer who plans an effective piece of invertible counterpoint is only like a wise builder who chooses well-planned sizes and patterns of building material with a view to very extensive and varied use. Indeed, for this reason, an extended contrapuntal movement is scarcely to be conceived without some traces of double counterpoint. But melodic inversion, on the other hand, makes rather for new emotional significance than for mere utility. Useful it may be, but significant in most cases it must be, sometimes it is startlingly so. It is easy to account for this. The rise and fall of a melody are strongly associated with the feeling that underlies it, just as the rise and fall of the speaking voice are dependent upon the feeling of the speaker, so that often a melody which is practically unaffected by ordinary inversion becomes vitally transformed by melodic inversion, in a way that ingenious contrapuntists may sometimes be apt to overlook. While almost any melody will bear transplanting from a higher to a lower part, it is hardly too much to say that some of the greatest melodies ever written would sound as helplessly grotesque when melodically inverted as a great verse of poetry if read line by line, backwards. The famous second subject in Beethoven's violin concerto is such an one, of which the technically correct inversion is here written down:

Original.

Inversion.

It must sound horrible to all lovers of the tune. The exquisite rise and fall in the 1st and 2nd and the 5th and 6th bars disappear, while the phrases of tranquillity which follow them in the original become abnormally and grotesquely active. If it be possible that any reader needs further proof of the dangers of melodic inversion, he may apply this process to the first phrase of the Et resurrexit in the B minor mass, or to the second subject of Brahms's G minor piano quartet, or, indeed, to almost any of Beethoven's more deeply felt subjects—notably second subjects. From this it will be seen that, as a general principle, while harmonic inversion is capable of the widest application, subjects of strong emotional significance cannot be melodically inverted without real danger. But while this disqualifies a great class of melodies for such inversion, there still remain a vast number of other kinds which may be subjected to this
inversion with the happiest results. Tunes
equable and complacent, and, most of all, tunes
of which rhythm (always preserved in inversion)
forms the chief feature may safely be so treated.
To illustrate this, the process applied with such
disastrous results above may be tried upon less
profound subjects, notably those to be found in
Scherzi and last movements. For example,
such a tune as that of the playful Trio in the
Choral Symphony may be inverted without
great disaster:

Original.

Possible Inversion.

Indeed, the humorous bassoon part which
already makes effective double counterpoint
with it might also be inverted without ill-effect,
especially if Beethoven's plan of adding a free
third part be resorted to, thus:

Original.

A possible inversion.

These momentary tamperings with well-known
melodies may perhaps readily be pardoned if
they serve to make clear the functions of this
form of inversion. In such cases as the latter,
where it has no revolutionary effect upon the
subject, it more nearly shares the qualities of
ordinary usefulness which belong to the custom-
ary method of inversion; and of course where-
ever it is used, it practically doubles the possi-
bilities of ingenious development. And it is
in such a manner that melodic inversion is used
for the most part by Bach in his fugues, of
which one of the most famous instances may
now be quoted:

No. 20 of the 'Forty-eight.'

The third bar (with its leap of a seventh and a
third in the same direction) seems to touch the
extreme limit of what may be done in melodic
inversion without dangerous distortion. Two
other notable instances from Bach show more
clearly than words the exact type of subject
most suited for melodic inversion. The first is
the famous one from his Act of Fugue, which
is probably more extensively subjected to this
kind of inversion than any ever penned:

The work of which it forms the text is a
monument of skill. The subject itself has under-
lying emotion, but it is restrained and equable;
it also has a certain amount of rhythm which is
easily recognisable; and it shows a third quali-
fication not yet mentioned but highly signifi-
cant—its harmonic import is not materially
disturbed by inversion. For these reasons,
nothing in its many inversions seems to distort
or even to disturb the spirit of the subject.
The second instance to be quoted is of a very
different kind, and inserted here to show that
even an emotional melody of a certain type can
be inverted without disturbance of its expressive qualities. It is not an example of regular inversion, but one in which Bach has taken the two limits of a fugue subject (that of No. 16 from the 'Forty-eight') and used them, rather freely inverted, as the counter-subject:

Subject.

\[ \text{Answer.} \]

\[ \text{Counter-subject.} \]

Instances need not be further multiplied to prove the striking and consequently dangerous nature of melodic inversion, or to show its best use. Neither need further quotations be made to prove that its dangers are not shared by ordinary harmonic inversion. The contrast of the two, however, would not be just, or at all complete, if we omitted to point out, that, although the prevailing characteristic of ordinary inversion is its extreme usefulness, there are rare instances in which it also achieves a certain delicate expressive significance of its own. One such is to be found in a movement in Part I. of Bach's Christmas Oratorio, where two oboe parts which stand thus in the introduction:

\[ \text{acquire a new thoughtfulness in their inverted form} \]

at the close of the movement:

\[ \text{Some account of the earlier stages of the art of inversion, as expounded by two notable 16th century theorists, and exemplified in the works of the greatest composer of the golden age, may be appropriately attempted here.} \]

**Forty use of Invertible Counterpoint.**—The custom, in the early days of Organum and Diaphonia, of freely doubling the vox organi an octave above or the vox principalis an octave below (see Diaphonia), forms virtually the prototype of ordinary inversion. It seems probable that its practical origin lies in the natural conditions of vocal compass. When the words of a motet or mass were passed from part to part, their musical counterpart would

\[ \text{Invertible Counterpoint} \]

be given with them; the accompanying parts would then fall into other relative positions, and inversion of some sort would soon be discovered and prove useful. The other (melodic) manner of inversion doubtless first arose with the mere exercise of contrapuntal ingenuity; it is safe to assume that it was greatly fostered by the canonic devices so dearly loved and diligently cultivated in the 14th century, if, indeed, it did not originate then. It might perhaps have been expected that the usefulness and fascination of inversion would have claimed it for greater attention in the earlier days than it actually received. Its use in the 16th century, as will be seen presently in the extracts from Palestrina, was quite masterly but never very systematic. As to the theorists, Ornithoparques (in 1516) has apparently no mention of the subject of inversion, but in his delightful *Micrologus*; but a limited number of artificial manners were sufficiently common to be minutely dealt with by Zarlino in 1558. Of these some details may be here given, especially as our own Morley explained the subject a few years later to English students in his * plains and Easy Introduction* as 'a manner of composition used among the Italians, which they call contrapunto doppiato, or double descant, which being sung after divers sorts, by changing the parts, maketh diverse manners of harmony: and is found to be of two sorts.' Both Zarlino's and Morley's two sorts prove to be really three, as their first sort is divided into two manners, one of which (as the former author says in his *Istitutioni armoniche*), 'when the parts are inverted continues with the same intervals,' the other 'with variations.' Both theorists proceed to suggest that, in the first manner, the inversion is to be effected by transposing the higher part a fifth lower and the lower an octave higher, while in the second manner the higher part should be taken a fifth lower and the lower an octave higher. These two kinds are virtually double counterpoint in the twelfth and tenth respectively, indeed, Morley gives them these names; and the description of the latter as being 'with variations' simply refers to the modifications of intervals necessary to preserve tonality when transposing any part a tenth. The other sort of 'double descant,' described by both theorists, is practically inversion by contrary movement, already referred to at length in this article; but some of the examples are planned, by an accumulation of device, not only to invert in a variety of ways, but also to make strict canon, sometimes direct and sometimes by contrary movement.

A clear idea of the evolution of this art is only to be given by rather extensive quotation. Morley's examples of the first two sorts are too long to quote in full, but a few bars will give an idea of their vigorous character as well as show their exact method of inversion as laid down by both Zarlino and Morley himself:

---

1 This useful and easy inversion of two upper parts, while the last two bars unchanged, was constantly used by Bach. It often occurs as if the extenuity of composers above dictated it, but in such an instance as that quoted above, it is a gratuitous inversion, justified only and entirely by its exquisite beauty of effect.
Morley's rules for the first sort are concise and practical, and agree closely with those given by Zarlino, the chief being that no sixth is to be used, the compass of a twelfth is not to be exceeded, and the parts are not to cross. He adds directions for the avoidance of special progressions, which would involve false relations in inversion. For the second sort the chief rule given is that no consecutives of any kind are to be written, but curiously enough the parts are allowed to cross to the extent of a third.

The two following examples, from Zarlino and Morley respectively, show an interesting attempt on the part of both authors to write a counterpoint at once invertible in all three ways:

From Morley's *Plaine and Easie Introduction*. 

VOL. II 2 K
But the greatest cleverness is exercised by both theorists in their third kind of inversion. In this manner, an example is given, by each, of what Morley calls a "canon made per arsin et thesin" without any discord in binding manner in it. The object of this device may be thus explained: When any two parts are written without suspended discords, they can be inverted in the double sense (melodically and harmonically), as was shown earlier, in such a way that all the intervals between them will be exactly restored. But if the two parts be also constructed so that, apart from this inversion, the one forms with the other an exact canon by contrary movement, the inversion, when it takes place, will have this simple and surprising result: the part that was the consequent may lead, and the leading part may follow as a new consequent. This use of double counterpoint is worth quoting at length here, as it seems to represent the height of what may be styled practical ingenuity in this direction. The principal or model is given in full in each case, but only a few bars of the reply are indicated, as these may easily be completed by the reader:

\[\text{Zarlino}\]

[Music notation]

\[\text{Reply}\]

[Music notation]

1 This expression appears to be used here to signify by contrary movement, and not, as in its ordinarily accepted sense, by crossed accents.
2 i.e. suspension.
INVERTIBLE COUNTERPOINT

Morley after his effort adds: 'Thus you see that these ways of double descent cause some difficulties, and that the hardest of them all is the Canon.'

Still, in spite of such ingenuity as this, the art of inversion seems scarcely to have been very highly developed or prosperous in the 16th century. The arbitrary choice of a few artificial devices out of so many—though these few were certainly of the most typical and practical kinds—and the minute correspondence of description in both authors, together with the slender consideration they each give the subject as compared with the rest of their work, and the air of relief with which they both declare that genius can discover other new and beautiful inventions of the same kind—all these things point rather to the fact that invertible counterpoint was not very systematically formulated at the time, and that theorists were content to be more suggestive than didactic on the subject. The omission of any mention of double counterpoint at the octave or fifteenth seems remarkable; it suggests that this may have been so obvious a use as not to be included among 'artificial kinds of counterpoint' nor to deserve Zarlino's description as 'composition so ingeniously arranged that it may be sung in several ways.' Whether at that time it was not even dignified by the name of contrapunto duplo, as it has been since, is not clear.

To turn to the practical application of the art of inversion in the 16th century, it may be said that Palestrina's use of it is more moderate and perhaps less systematic than might be expected. His great fluency of parts, his faithfulness to melodic outline, and his minute reproduction of the emotion of the words in each part all seem to point to invertible counterpoint as the one art which would give him absolute freedom. For when melodious phrases pass repeatedly from voice to voice, counterpoints that will not fall naturally into the vacated places above or below the chief melody must needs be modified, or perhaps abandoned altogether. This may be a real hindrance to inspiration; and it is even possible, without heresy, to imagine that Palestrina and his contemporaries, had they chanced to study this particular art more, might have attained to their great heights with even greater ease. But it is perhaps truer, and certainly pleasanter, to believe that Palestrina's erudition was in such complete subjection to his spirit that learned devices of inversion, though fully at his command, were modified, or abandoned altogether, only because, when the time came, a more beautiful note or part or progression suggested itself. He seems rarely to take a subject from a high to a low voice, or vice versa, without the process of adorning or completely changing its accompanying counterpoints. Strict inversions are to be found; but they are always beautiful rather than learned in effect, and since they are clearly the exception in his works, they seem to prove his rule of freedom. It needs a well-read disciple of the music of that period to speak authoritatively—and this the writer cannot claim to be; but it seems doubtful whether a more complete or typical example of the 16th century use of inversion in practical composition could be found than chances to be easily accessible inPalestrina's motet, 'O beata et gloriosa Trinitas,' 2 from which the following examples are taken. The first is a double counterpoint in the twelfth, and its first occurrence (which may be called the model), with its three subsequent inversions, are here set down:

\[\text{\includegraphics{image1.png}}\]

It is difficult to speak with sober moderation of this and like examples of Palestrina's art. It will be seen that the model is capable of exact inversion, that it never once received it at his hands, and yet the effect of exact inversion is virtually produced. The modifications in each case have a practical reason behind them which the merest tyro can grasp, but in each case they put on an inspired grace. The next extract may be cited as a like instance of free triple counterpoint:

\[\text{\includegraphics{image2.png}}\]

1 Morley's great debt to Zarlino is clear.

2 Recently edited by Miss Eleanor Gregory, with Latin and English words, and published by Henry Frowde (Amen Corner, E.C.).
The chief subject passes from treble to tenor; it is twice modified, yet its spirit is entirely preserved; the inversion of the other parts is free, beginning at the fifth and twelfth respectively, but merging into what cannot be called an inversion, and yet gives the feeling of one. The third example is in four parts, and, as the bass remains the same, it affords what would seem a rare instance of an inversion in which all the four parts are reproduced note for note:

Those who know Palestrina’s method will realise that these phrases form the counterpart of each other; but they are each part of a five-bar phrase, and in the rest of the phrase they have only one part strictly in common. The last quotation affords a practical application of strict double counterpoint at the octave which seems really rare in Palestrina. The point of great interest is the flexibility and freedom of the bass part which accompanies each inversion, while the great beauty and masterly freedom of the final cadence are so typical, and they so enhance the whole treatment, that they are here included:

These, it will be seen, are not such as will comfortably invert. In the days between the death of Palestrina and the birth of Bach, the key kingdom became more or less established and the way prepared, so that when the latter
arrived with his stupendous gifts, it was possible for him and for his contemporaries and followers completely to restore melodic flexibility to all the parts without any violation of the absolute rule of key. This was the new polyphony, and it bestowed fresh vitality upon the act of inversion as upon every other contrapuntal device.

It is scarcely too much to assert that in Bach’s lifetime this particular art made as much progress as it had made in the whole of its previous existence, and it has not greatly advanced since. Bach’s characteristic freedom of melodic style, together with his extraordinary clearness of harmonic purpose, were specially favourable to it; indeed, they furnished him with just the two requisites for success; and doubtless the diligence with which he constructed parts that were invertible reacted favourably upon his style. He found the simple harmonic scheme of tonic, dominant, and subdominant, awaiting him, and attained complete mastery over it, establishing and extending it by all he wrote. It is not intended to suggest here that harmonic root basses, such as those cited above, belonged only to the early days of harmonic rule, or that they were altogether abolished by Bach in favour of more flexible and melodious basses. They are, of course, as indispensable to-day as they were in the hands of any early Italian harmonic writer, such as Vivaldi, and nothing can replace them for strength and real grandeur of effect. Moreover, Bach and Handel used, to great advantage, basses as angular and incapable of inversion as any of their predecessors had used. The pre-eminent achievement, however, of Bach’s polyphony was to reconcile harmonic strength with melodic grace in one and the same part whenever he needed both, and this is clearly the whole problem of modern invertible counterpoint. Innumerable are the melodies of beauty and the basses of strength which will not invert; but let parts be combined which are strong enough to be basses and beautiful enough to be melodies, and the two great commandments of invertible counterpoint are fulfilled. It is this fact which makes Bach’s fugues, and notably the Forty-eighth and the collection called the Art of Fugue, the finest text-book on inversion.

For a detailed exposition of all the varieties of inversion and their peculiarities, the reader must be referred to the many works on the subject since that of Fux, amongst which may be named those of Marpurg, Azzopardi, Cherubini, Albrechtsberger; and in England, in modern times, the little Primer by Bridge, and the much larger one by Prout, have done much to help the student. Many modern German treatises, too, are devoted to double counterpoint; one by J. E. Haberl (Leipzig, 1899) deals in much detail with the rarer inversions. Here no more can be attempted than to add some general remarks as to the three most useful and common kinds of inversion, together with a few practical hints on inversion by contrary movement.

Inversion at the Octave or Fifteenth (in two, three, or more parts).—This inversion is the most natural and serviceable, and is by far the most common. It has already been made clear that the all-important point, whether in double, triple, or manifold counterpoint of this kind, is to imply the harmonic progression so unequivocally as to secure it in all inversions from ambiguity or from actual distortion. But the practical difficulty, as is pointed out by every theorist from Fux onwards, generally centres upon the ambiguous nature of the perfect fourth and upon the unnatural restrictions which consequently limit the use of its inversion, the fifth. A fifth (or possibly a fourth if between two upper parts) may form at one moment an innocent concord, and at the next, when inverted as a fourth from the lowest part, it may become a discord, with a different root. For a fourth from the bass ordinarily implies a delayed third, just as a seventh implies a sixth or a ninth an octave. The rough-and-ready rule to obviate this difficulty is to exclude the fifth, because of the difficulty of its inversion as a fourth, or else, in view of its becoming a discord, to prepare it by suspension or cautious conjunct movement. But this is clearly not the best method, nor does it produce results to be compared with Bach’s finest examples of double or triple counterpoint. There are innumerable instances of well and freely-planned fifths and fourths; to know how these may be written the student must probably adopt the more circuitous course of studying all the devices by which a deliberate harmonic basis may be made perspicuous, and that not only in four or three parts, with more or less complete chords, but in the implied harmonies of two parts, and even in a single melody without accompaniment. Some of these devices may be briefly indicated. Thus the leap of a fourth upwards or a fifth downwards to an accented note implies the root progression whether accompanied or not; and the inevitable progression of leading note to tonic—perhaps plain, perhaps adorned by the conventional shake or changing note or other adornment—is easily recognizable whenever it occurs.

1 The history of this unfortunate interval, which to this day (a both concord and discord, is still in the making. It is possible to conceive a system in which its early freedom and equal right as a perfect concord had been much longer maintained, Greater freedom seems to have been attained for it by Beethoven and his contemporaries by treating a 6/4 as a concord. Schumann used to end a Nineteenth-century chord on this much-used chord. Its increasing freedom will diminish restraint in inversion. But whatever happens to it, the chord will doubtless remain a most powerful and rightful consonant.

2 It is also possible to write the complete 5-6-4 fearlessly, and simply to avoid the inversion which converts it into an unsatisfactory 5-6-4. The Bach has done, for example, in the case of the chord marked " in the triple counterpoint quoted at the beginning of this article (p. 823).
INVERTIBLE COUNTERPOINT

Still more conspicuous among melodic devices, by which harmonic intention is implied, is that which in all its forms may be called the arpeggio device, i.e., moving from note to note of a chord till it be completely inferred.

In these instances of inferred diminished and dominant sevenths it will be seen that it is enough to indicate the two characteristic notes of each chord, the rest being omitted. This principle is easier to embody in two-part writing, where all the melodic devices just enumerated may be supplemented by a characteristic note in the second part that shall make the progression still clearer. For instance, if the dominant seventh be added to the leading note in the example at the top of this page, the progression is confirmed, and a sure foundation for good double counterpoint will be formed.

The same principles of harmonic implication evidently guided Bach in his construction of such masterly triple counterpoint as the following:—

From No. 3 of the ‘Forty-eight.’

in which a bold leap to C sharp in the second bar enables him to retain the vigour and fulness of a complete common chord without the smallest risk of ambiguity. The reader will have perceived that in an important sense it becomes really easier to write good invertible counterpoint in many parts than in two. For, as the parts increase, the means of harmonic clearness manifestly increase also. Thus, a chord of the dominant or diminished seventh is not liable to the ambiguity in inversion that besets a plain common chord. And from this the student may argue backwards and discover that in three-part counterpoint, and even in two, incomplete or implied chords of the seventh will often serve far better than complete or implied common chords, and will make his harmonic purpose quite clear. A splendid instance of this device is to be found in the following triple counterpoint taken from Bach’s great G minor organ fugue:

which is chiefly built on incomplete chords of the seventh.

Of the many varieties of inversion at other intervals (mentioned in the article Inversion) two are to be singled out as the most useful.

Double Counterpoint at the Tenth.—The chief claim of this variety to special consideration is to be found in the fact, pointed out by the 16th century theorists as well as those of to-day, that it is possible to use the model (or principal) and its inversion (or reply) simultaneously, thus making a three-part result. Before Palestrina was born, Ornithoparucus wrote: ‘The most famous manner of the Counter-point (as saith Franchinus) is, if the Base goe together with the Meane, or any other Voyce, being also distant by a tenth, whilst the Tenor doe goe in Concord to both.’ To achieve this, consecutive thirds and sixths are obviously banned in the model. This is its chief condition, and two parts in well-planned contrary and oblique motion generally allow not only of this valuable inversion in its simple form, but also of various applications of what are known as added thirds, in which the advantages of lucidity and economy are combined with those of richness and strength which the subjects naturally gain by being doubled in thirds or sixths. Albrechtsberger invents the following example in his treatise,

which he is able to translate into four parts thus:
The great usefulness of this kind of counterpoint is also well illustrated in such learned fugues as the A minor from Bach's Forty-eight quoted at p. 495. The following fragment of double counterpoint, which appears at the second and third entries of the subject,

is enlarged into this at the fourth entry:

and an analysis of the whole fugue reveals its almost inexhaustible possibilities, in such devices as these:

**Double Counterpoint at the Twelfth.** — The chief practical points to note in this inversion are:

1. that, in it, thirds become tenths and vice versa, so that consecutive thirds and tenths may be freely used; (2) octaves and fifths are also interchangeable, each inverting into the other; (3) sixths are to be used with peculiar caution as they invert into sevenths. Its chief characteristic, and probably its chief usefulness, are both to be found in its power to effect or

suggest a subtle modulation to a nearly related key (the dominant or subdominant, as the case may be), since while one of the parts remains stationary, the other is transposed a twelfth up or down. Special allowance for this effect should be made in the model, especially at the cadence. The device of a falling fifth adopted by Morley in the fourth bar of the passage already quoted (at p. 497), is excellent and should be noted, as when the lower part is transposed a twelfth higher a perfect cadence in D minor is effectively secured. The following fragment is so planned as to infer three different cadences (in A minor, F major, and C major respectively) in its model and two inversions.

however, to suggest modulation. It may be avoided either by careful omission of the note that would effect the modulation in inversion (subdominant or leading note), or else by deliberate alteration of that one note in the inverted form. This Bach has done in the following beautiful triple counterpoint, an instance of particular grace and significance:

**Inversion by Contrary Movement.** — So much has already been said in the first part of this article on this important variety that it only remains to name the chief points to be observed in construction, and the ways in which inversion may best be effected.

(1) Conords must prevail at the accented points, and only passing discords may be introduced. Naturally no suspended discords are possible, for the simple reason that in the inversion the suspension would fall upwards, and

1 It is the contrary conjunct movement which chiefly accounts for the great resources of this particular counterpoint. It will be seen that it is invertible in a variety of ways other than the tenth, and that when the subject is taken in contrary movement and in close stretto, the use of the first counter-subject never fails.

2 It is the cadence in all double counterpoints that naturally needs closest attention, for it is there that cleanness is most desirable.
504 INVERTIBLE COUNTERPOINT

though the laws of gravity seem less immutable in music than in physics, such a suspension can only sound forced and unnatural. (2) The beginning and ending, but especially the ending, must be regulated by the scale on which the melodies are inverted, as will be seen below.

The possible scales on which any melody may be inverted are obviously seven. The scale of C, for example, may be inverted in the following positions:

Of these the first, third, and fifth possess special harmonic advantages, for in each the chief harmonies (tonic and dominant) upon which the model is built may, to a large extent, remain unchanged in the inversion. In none is it possible to achieve this completely. The scale which most favours the dominant is least favourable to the tonic chord. Thus in No. 6 the dominant triad coincides completely, and a subject built upon it would fare excellently in inversion till it came to the tonic:

Good. [Diagram]

Bad. [Diagram]

Similarly, scale No. 5 completely favours the tonic, but the dominant triad in it is answered by the subdominant. Nos. 1 and 3 effect compromises, having points of coincidence in each triad as seen in this fragment:

And if the dominant seventh be used for a basis of the model, as it is in numberless cases, these two scales (together with No. 5, if the dominant ninth be a feature) form by far the most useful.

Of these No. 3 justly takes first place (in the major mode), for it alone combines with its harmonic advantages the exact melodic coincidence of every interval in inversion, tone coinciding with tone, semitone with semitone, and—most important of all—tritone with tritone. For this reason it is almost always used both in early and modern examples.

The art of inversion by contrary movement in modern times seems to hold real promise. It possesses far greater qualities than mere ingenuity, and its scope is certainly wider now than ever before. Its dangers, when applied to some subjects, have been fully discussed; but its possibilities seem such as are not very generally apprehended yet, and it seems certain that it has an important future.¹

In conclusion, it may be said that the common reputation of invertible counterpoint is that of an exercise of ingenuity rather than an important part of a composer's equipment. It is naturally associated more with cleverness than with inspiration, and seems to earn the title of artifice rather than of art. This is not because it is less valuable in the hands of a master than most other clever things, but perhaps because its serious pursuit offers difficulties so formidable that it has been apt to draw the attention, ultimately perhaps the affection, of those who do study it away from its purpose into itself. So absorbing are its interests that its devotees have perhaps found it too easy to become specialists. But such devotees have been, it must be confessed, few; the present danger is one of over-neglect on account of its difficulties, rather than over-attention on account of its fascinations. Since Bach's time, both Haydn and Mozart were masters of contrapuntal device, but they were so much taken up with uncontrapuntal matters as only partially

¹ A careful study of all varieties of inversion now described reveals the fact that if octaves and thirds be made theelope concords of any double counterpoint, if only contrary and oblique motion be used, and all but passing discord be avoided, the result will be invertible in all these ways, and, in addition, will form a basis for many possible devices of added thirds or sixths, both by direct and contrary movement.

Some of the many possible inversions of this fragment are:

1. At the octave.
2. 10th.
3. 9th.
4. 7th.
5. 8th.
7. With added ninths above.
8. With added 10ths above.
9. With added 10ths below.
10. With added 10ths below.
11. No. 4 by contrary movement.
12. No. 7.
15. No. 10.

to exercise their powers in this direction. Of Beethoven it is hardly too much to say that he seemed to affect ingenuity in this art, rather than to find it native; and in modern times, too little real success in the contrapuntal arts is to be recorded.

It is certain that few technical powers give such freedom to inspiration as the mastery of part-writing. Basses that will make good trebles, melodies that are possible as basses, and inner parts that are worthy to take the place of either treble or bass, are neither always possible nor always desirable. But the power to write them at will, which the art of inversion teaches, is invaluable. It is obviously perfected constructive ability that favours perfect expression of feeling. Exact balance of that which we call construction with that which we call inspiration is rare indeed. There have been many composers, and indeed whole periods of musical development, preponderantly intellectual, while others have been distinguished for almost reckless emotional enterprise. It is to the works of men who, like Palestrina and Bach, reconcile both sides of the art, that we may well turn for the true examples of such musical mechanism as invertible counterparts. They bring their best inspiration to the best construction of which they, or rather their age, may be capable. They show us how to combine the joy of freedom with the dignity of restraint. They are servants of laws not less than we are, but they find their service perfect freedom. They not only instil abounding life into every intellectual device, but they assiduously cultivate the latter for the sake of the former. They obey old laws and silently exact new ones, setting their own particular seal of permanence upon things hitherto only tentatively expressed or scarcely even apprehended, making their own fine attempts to express a perfect thing perfectly. Towards this high end the art of invertible counterpart is not the least important contributor.

**INVITATORIUM.** The Invitatory, as sung at matins, stands alone among all the chants of the breviary services. It is a refrain which is sung in conjunction with the 95th Psalm, 'O come let us sing,' at the beginning of matins; and this with its refrain is a survival of the old responsorial singing. The Psalm itself is sung by solo voices; the refrain is repeated by the choir; sometimes the whole, sometimes only the second part, is intercalated between the verses, which are grouped for this purpose very differently from the natural arrangement of the Psalm in the Psalter. These Invitatories form part of the antiphonal; but they, together with the special chants (appropriate to each mode) to which the Psalm is sung, are often collected in a separate volume, and have been so collected and printed at Solesmes.

The term Invitatory has been sometimes applied to the 95th Psalm itself, especially by writers who were dealing with the English Prayer Book since the refrain was given up at the Reformation. The term, however, properly belongs to the responsorial refrain, and not to the Psalm.

**IONIAN MODE (Lat. Modus Ionius, Modus Insticus).** The Thirteenth—or, according to some writers, the Eleventh—of the Ecclesiastical Modes [according to the later reckoning. In the earlier modal system, of eight modes, this one has no place]. [See Modes, the Ecclesiastical.]

The Final of the Ionian Mode is C. Its compass, in the Authentic form, extends upwards, from that note to its octave; and, as its semitones occur between the third and fourth, and the seventh and eighth degrees, its tonality corresponds exactly with that of the major diatonic scale as used in modern music—a circumstance which invests it with extraordinary interest, when considered in connection with the history of musical science. Its Dominant is G—another point of coincidence with the modern scale. Its Mediant is E, and its Participant, D. Its Conceded Modulations are F, A, and B; and its Absolute Initials C, E, G, and frequently, in polyphonic music, D. Its chief characteristics, therefore, may be illustrated thus—

Mode XIII (or XI).

\[\text{Mode XIV (or XII).}\]

The compass of the Plagal, or Hypo-ionian Mode, lies a fourth lower than that of the Authentic form, ranging from G to G. The Dominant of this Mode is E, its Mediant, A, and its Participant, G. Its Conceded Modulations are D, F, and the F below the initial G; and its Absolute Initials C, G, A, and, in polyphonic music, very frequently D.

It will be seen that the semitones here fall between the third and fourth, and sixth and seventh degrees—exactly the position they occupy in the Authentic Mixolydian Mode: and, as the compass of these Modes is also identical, the one is often mistaken for the other, though they are as clearly distinguished, by their respective Finals, as the modern keys of E♭, and F♯ minor.

Melodies in the Lydian and Hypolydian Modes were under the earlier modal system not infrequently transposed a fifth higher when they contained no B♭, and therefore could be correctly given in the higher sect. They usually were so transposed in order that by use of a D♭
there might be secured the interval of a whole tone below the final, and the melodically weak effect of a leading note might be avoided. Ancient melodies which employ the leading note are rare in either seat. The following antiphon melody shows the way in which the leading note was avoided in many cases.

But in later mediaeval days a change took place. The leading note was sought instead of avoided, and even in Plain-song the melodies with a leading note, either in the Lydian Mode with B♭ or in the Ionian Mode without it, began to multiply. The fine Plain-song 'Missa in Festis Solemnibus'—better known in a less pure form, as the 'Missa de Angelis' (see Mass) —is a case in point. An older instance is the particularly captivating Hypo-Ionian melody used for the Alleluiistic form of lesser resounds as, e.g., in the Paschal form of the Respond in 'In manus tuas, Domine,' as given in the Roman Vespers. In some places melodies that were properly Mixolydian or Hypomixolydian were in later days transposed to the Lydian or Ionian seat in order to secure the leading note. A noteworthy case of this is the Italian Melody of 'Aeterna Christi munera'; see Hymn Ancient and Modern, 202, contrasted with 430 in the old edition of that hymn-book. As a result of the strong prejudice which thus existed against the Ionian Mode in mediaeval times, when the softness of its intervals gave so great offence, it was commonly called Modus lascivius. The early contrapuntists seem also to have regarded it with grave suspicion. It was only as the harmonic Art advanced that the inexhaustible extent of its capabilities became gradually apparent. W.H.F.

When first employed in polyphonic music, the Authentic scale was usually transposed (for the greater convenience of ordinary combinations of voices) with the customary B♭ at the signature; in which condition it is often mistaken for the modern key of F. Palestrina delighted in using it, with this transposition, as the exponent of a certain tender grace, in the expression of which he has never been approached; as in the 'Missa Brevis,' the Missa 'Aeterna Christi munera,' the delightful Motets, 'Simulceius,desiderat,' and 'Pueri Hebraeorum,' and innumerable other instances. Giovanni Croce has also employed it in the Motet, 'Virtute magna'—known in England as 'Behold, I bring you glad tidings': while in our own School, we find instances of its use in the imperishable little Anthem, 'Lord, for Thy tender mercy's sake,' and Gibbons's fine Service in F.

The Hypo-Ionian Mode is less frequently transposed, in writing, than the Authentic scale, though it is sometimes found desirable to depress it a whole tone, in performance. This is the Mode selected, by Palestrina, for the Missa Papae Marcelli; and by Orlando di Lasso, for his Motet, Confirma hos, Deus—both which compositions are erroneously described, in the latest German reprints, as in the Mixolydian Mode.

The melody of the Old Hundredth Psalm, in its original form, is strictly Hypo-Ionian; and is given in its true Mode, transposed, in the masterly setting, by John Dowland, printed in Ravenscroft's 'Book of Psalms' (Lond. 1621). [See Hymn; Old Hundredth Psalm.]

IPERMESTRA. An opera of Metastasio's which has proved very attractive to a long list of composers. The Dictionnaire Lyrique of Clement gives no less than 18 settings of it by Galuppi, Sarti, Jommelli, Hasse, Gluck, and other eminent musicians. See Metastasio. G.

IPHIGENIE. The story of Iphigenia, the daughter of Agamemnon and Clytemnestra—in the two episodes of her deliverance from sacrifice at Aulis, and her rescue of her brother Orestes from the same fate at Tauris, which formed the subject of Euripides' two tragedies—has been a favourite subject with the composers of operas. Not to speak of the two masterpieces of Gluck, noticed below, we may say here that the opera of 'Ifigenia in Aulide,' by Apostolo Zeno, has been, according to the Catalogue in the Théâtre Lyrique of F. Clement, set to music by no fewer than twenty composers between 1713 and 1811—D. Scarlatti, Caldara, Porpora, Abdi, Traetta, Majo, Guglielmi, Jommelli, Salari, Sarti, Martin y Solar, Prati, Giordani, Zingarelli, Bertoni, Mosca, L. Rossi, Trento, Mayer, Federici. The opera of 'Ifigenia in Tauride' (author unknown, but possibly Vinci) has been composed by nine separate composers—D. Scarlatti, Orlandini, Vinci, Jommelli, Mazzoni, Agricola, Monzi, Tarchi, and Carafa. G.

IPHIGENIE EN AULIDE. 'Tragedie-opera' in three acts; words by the Bailli du Rollet, after Racine; music by Gluck. Produced at the Académie, Thursday, April 19, 1774. The nightly receipts at first were 5000 livres, a sum then unheard of. The sum taken on April 5, 1796, amounted, owing to the depreciation of the assignats, to 274,900 livres. Up to Dec. 22, 1824, it was played 428 times. [Wagner made a special arrangement of it, revising the text and instrumentation, and altering the end. His version was performed at Dresden, Feb. 22, 1847. The score of his close to the overture was published in 1859.]

IPHIGENIE EN TAURIDE. 'Tragedie lyrique' in four acts; words by Guillard, music by Gluck. Produced at the Académie, Thursday, May 18, 1779. On June 6, 1796, the assignat of 100 livres being equal to only 10
centimes, the receipts were 1,071,350 livres =1,071 livres 7 sous. Up to June 5, 1829, it was played 408 times. On Jan. 23, 1781, the tragedy of the same name by Paccini, words by Dubreuil, was produced at the Académie, and survived in all thirty-four representations. On the first night, the chief actress being obviously intoxicated, a spectator cried out, 'Iphigénie en Tauride! Alons done, c'est
Iphigénie en Champagne!'

IPPOLITOY-IVANOY, MICHAEL MIKHAILOVICH, composer and conductor, born at Gatchina, Nov. 19, 1859, was a son of a mechanic employed in the palace. From 1876 to 1882 he studied at the Conservatoire of St. Petersburg, and passed through the composition class under Rimsky-Korsakov. On completing his studies he was appointed director of the Music School, and conductor of the Symphony Concerts at Tiflis (in connection with the Imperial Russian Musical Society). Here he made a close study of the music of various Caucasian races, more especially that of the Georgians. His book, On the National Songs of Georgia, is considered an authority on this subject. In 1893 he accepted a professorship at the Moscow Conservatoire, and for five years conducted the Moscow Choral Society. In 1899 he became conductor of the Moscow Private Opera, an enterprise which has exercised an important influence upon musical life in Russia. IPPolitov-Ivanov's style is essentially lyrical, straightforward, and agreeably melodious. His works comprise:—

*For Orchestra.*

1. Overture on a Russian theme, 'Yar-Khanel,' op. 1. 2. Symphonic scherzo, op. 2. 3. Suite, 'Caucasian Sketches,' op. 10 (1886). 4. Sinfonietta (originally sonata for pianoforte and violin, op. 9, op. 24 (1892).

*Choral and Vocal works with Orchestra.*

Concertation Cantata, op. 12. 'Twelve Characteristic Pictures' for chorus and orchestra, op. 18. Cantatas in memory of Fosshein, Gogol, and Dostoevsky.

*Opera.*

'Aria,' (Tiflis, 1867); 'Anya,' (Anya,' subject from Tourenier (Moscow Private Opera, 1868).

*Chamber Music.*

Songs and Duets with pianoforte accompaniment, op. 11, op. 14 (6), op. 31 (30), op. 31 (31), op. 32 (Moehish melody, op. 28 (5) duets, op. 27 (12), op. 28 (5), op. 31 (40), op. 33 (6). Also several choruses, a cappella, and with pianoforte accompaniment. 1. N.

IRENE. See QUEEN OF SHEBA.

IRISH MUSIC. Although it is not long since the opinion was generally entertained that Ireland had been sunk in barbarism until the English invasion, historical and antiquarian researches have established the fact that the island was in early times the seat of Christianised learning and a remarkable artistic civilisation. [In the 6th century, Shiel (Seduhus) composed many hymns, and also the Introit 'Salve Sancte Parens,' still included in the Roman Gradual. John Scothi Frigena, an Irishman, who died circ. 875, is the first to allude to discant or organum. Another Irishman, St. Cellach (Gall) founded the great monas-

tery of St. Gall in Switzerland, and died in 616. Somewhat later flourished St. Maildull, the Irish founder of Mailduffsburgh, or Malmesbury, who taught St. Alkibem, a renowned Saxon musician. St. Hesias, an Irish monk, was the first to introduce the Roman chant at Cologne about the year 1025.] The music of Ireland, and in particular her ancient school of Harp-playing, have from early times been in high repute, having been landed in the writings of Brompton, Giraldus Cambrensis, Dante, and John of Salisbury (12th century). The latter writes thus: 'The attention of this people to musical instruments I find worthy of commendation, in which their skill is beyond comparison superior to that of any nation I have seen.' Fuller's words are equally strong: 'Ye, we might well think that all the concert of Christendom in this war [the Crusade conducted by Godfrey of Boulogne] would have made no music, if the Irish Harp had been wanting.' Fordun (14th century), Clyn (1340), Polidore Virgil and Major (15th century), Vincenzo Galilei, Bacon, Spenser, Stanilust, and Camden (16th century), speak with equal warmth. [Irish tunes have been found in 11th-century MSS. (Dr. Fleischer).]

Three Irish airs appear in the Fitzwilliam Virginal Book.—(1) 'The Ho-hoane' ('Ochoine'), (2) an 'Irish Dumpe,' and (3) 'Callino Casturmame,' the last set by William Byrd. They are all in 6–8 measure, and seem to possess the characteristic features of Irish melody. To the last air there is an allusion in Shakespeare, 'Henry V.,' act iv. sc. 4, where Pistol addresses a French soldier thus:—'Quality! Calen o custure me!'—an expression which has greatly puzzled the critics. It is evidently an attempt to spell as pronounced the Irish phrase 'Callinog a stuir me'—'young girl, my treasure!' For the earliest published collections of Irish music see the Bibliography below. But these, being for flute or violin, supply no idea of the polyphonic style of the music for the Irish Harp, an instrument with many strings of brass or some other metal: the harp preserved in Trinity College, Dublin (commonly but erroneously called the Harp of Brian Boru), having thirty strings; that of Robin Adair, preserved at Holybrook in co. Wicklow, thirty-seven strings; and the Fitzgerald Harp, incorrectly called the Delway Harp (1621), fifty-two strings. (See Harp.) During the incessant wars which devastated the island in the 16th, 17th, and 18th centuries, the art of music languished and decayed: there had indeed been many famous performers upon the harp, the national instrument had appeared on the coinage of Henry VIII., and had also been appended to some State papers a.d. 1567; but the powers of the law had been brought to bear upon the minstrels who sympathised with the natives,
struggling at this time against the English power. When the wars of Elizabeth, Cromwell, and William III. ceased, the distracted country had peace for a while. Soon afterwards the Hanoverian Succession was settled, and foreign musicians visited Ireland, and remaining there, introduced the music of other countries; the nobility and gentry too, abandoning their clannish customs, began to conform to the English model; and the Irish melodies went out of fashion for a time.

Some of the celebrated harpers of the 16th and 17th centuries were Rory Dall O’Cahan (whom Sir W. Scott makes the teacher of Annott Lyle); John and Harry Scott; Miles O’Reilly (born 1635); Thomas and William O’Conell (1640); Cornelius Lyons; O’Carolan (1670); Denis Hempson (1695), who in 1745, when fifty years old, went to Scotland and played before Charles Edward; Charles Byrne (1712); Dominic Mongan (1715); Daniel Black (1715); Eochlin Kane (1729), a pupil of Lyons, before named—Kane, who travelled abroad, also played for the Pretender, and was much caressed by the expatriated Irish in Spain and France; Thaddeus Elliot (1725); Owen Keenan (1725); Arthur O’Neill (1734); Charles Fanning (1736); and James Duncan, who having adopted the profession of a harper in order to obtain funds to carry on a law-suit in defence of his patrimony, was successful, and died in 1800, in the enjoyment of a handsome competence.

Among efforts to arrest the decay of the Irish Harp School may be mentioned the ‘Contentious of Bards’ held at Bruce, co. Limerick, 1730-50, under the presidency of the Rev. Charles Bunworth, himself a performer of merit; a meeting of harpers at Granard, co. Longford, organised by an Irish gentleman, James Dungan of Copenhagen, in 1781, and carried on till 1786; and the assemblage of harpers at Belfast, July 11-13, 1792, when the promoters engaged the subsequently well-known collector, Edw. Bunting, to write down the music as performed. From this arose Bunting’s three volumes of Irish music, dated 1796, 1809, and 1840: accurate drawings, biographical notices, and some hundred airs have been left on record by Bunting, to whom indeed the subject owes whatever elucidation it has received. Ten performers from different parts of Ireland attended the meeting of 1792, and their instruments, tuning, and use of a copious Irish musical vocabulary, agreed in a remarkable manner. The compass of the harps was from C to d”. Their scale was sometimes C, but mostly that of G. Each string, each grace, each feature had a name peculiar to it. It was proved that the old harpers had played with their nails, not the fleshy tip of the fingers. They used other scales besides those above, but agreed that G major was the most ancient: in this lies ‘The Coolin’ (temp. Henry VIII.):—

One of the most striking of the Irish airs is that called ‘Colleen ditha,’ etc., to which Moore’s lines, ‘The valley lay smiling,’ are adapted; it lies on a scale from A to A, but with semitones between 2–3 and 6–7 (i.e. the ecclesiastical Dorian mode) as follows:

It was of course to be expected that singers, pipers, whistlers, or violinists, would not always adhere to the fixed semitones of a harp scale; hence this air is sometimes corrupted, and its pathetic beauty impaired by the introduction of G.:

An example of the &Eolian mode, as scale E to E, semitones between 2–3 and 5–6, is found in the fine Irish air, ‘Remember the glories of Brian the Brave’:

Here again, in careless performance, Dz may have been used instead of Dz, once or twice. Very plaintive airs are found in the fourth scale (i.e. the Mixolydian mode), D to D,
semitones between 3-4 and 6-7. In this scale lies the air 'Weep on!'

Moore seems to have noticed the peculiar tail, thrice repeated, of the second strain, but to have been unaware of the true cause, when he says, 'We find some melancholy note intrude —some minor third or flat seventh, which throws its shade as it passes and makes even mirth interesting.'

[Examples of almost all the church modes are to be found in Irish airs, as in those of Great Britain, France, and other countries.]

The old Irish bagpipe was blown by the mouth, like the Scottish, but the later bagpipe, the Ulleann or Union pipe, blown with a bellows, became popular in Ireland; from this cause, and the delicacy of its reeds, the tone is softer. Dr. Burney remarked upon the perfection of the intervals of the Irish chanter (or melody-pipe), which he had never met with in the pipes of North Britain. The scale of the Irish bagpipe is from C below the treble stave to C above it, with all the semitones. The Irish instrument is also furnished with a sort of tenor-harmony of chords:

\[\text{\textbf{The pipe of Scotland has nothing of this sort, and, as previously noticed, its scale is only nine notes in extent, and does not correspond with the normal diatonic scale. There generally are two drones in the Scottish pipe, A and its octave; and three in the Irish instrument, generally C, c, and c'. The ancient Irish bagpipe, like that of Scotland, was an instrument of shrill and warlike tone, by which, as Stanley tells us, the natives were animated —as other people are by trumpets. The bagpipe, perhaps the oldest and most widely known instrument in the world, still subsists in Ireland; the harp, however, is almost extinct; both have been in a great degree superseded by the violin and flute, which are cheaper, more readily repaired, and above all more portable; most of the ancient minstrels of Ireland found it necessary to maintain attendants to carry their harps. From 1775 to 1782 the Volunteer Bands did much towards the cultivation of music in Ireland, and of late years, during the Temperance movement and the various semi-military organisations which have sprung up in Ireland, brass and reed bands have become popular, and play through the streets of the towns. Choral classes were formerly not popular throughout the country; they met with no favour among the peasantry of the South and West. [But at present (1905) there are choral classes in every important town in Ireland.]

Dismissing the bagpipe, ancient or improved, we find among ancient Irish wind-instruments the following:—(1) the Lennbbnobil (pronounced Ben-Bullal), a real horn, generally that of a wild ox or buffalo; (2) the Luinne, a primitive oboe, and (3) the Guthkineen, a primitive bassoon; (4) the Corn, a pipe—Chaucer's 'Corne-pipe'; (5) the Sloc, a smaller trumpet; (6) the Stiugan, another small trumpet. (7) the Fuedan, a flute or fife. It is singular that all these pipes were curved; no straight pipe, like an oboe or clarinet, having been found in Ireland. (8) Some large horns were discovered, of which the embouchure, like that of the Ashantee trumpet, was at the side. Singular to say, the Irish possessed an instrument very similar to the Turkish crescent or 'Jingling Johnny' once used in the British army; it was called the Musical Branch, and was adorned with numerous bells. O'Curry describes the Crubh civil and the Cruna civil as forms of a Musical branch or cymbalum, not bells, as here stated.] There were single bells called clothia: the so-called crotals are merely sheep-bells of the 17th and 18th centuries. It should be remarked that the tympan was not a drum, as was formerly supposed, but a stringed instrument, and by the researches of the antiquary O'Curry it is proved to have been played with a plectrum or bow. The schottisch is an eight-stringed Nadel or Psalterium.] Some other allusions to music are found in Irish MSS, viz. the airleach, an union of all voices, a vocal tutti in which it were: this was called ophce in Scotland. The ceran was some sort of chirping sound by female singers; the dordfiansa, a warlike song accompanied by the clashing of spears after the Greek manner. An interesting example was the Irish Cronan or drone bass, after the manner of the 'Ground' of Purcell's day. [There are seven Irish words signifying concerted singing or playing.] The Cronan was softly sung by a Chorus, while the principal voice sustained the solo. The well-known air called Balladerry was provided with such a chorus; see Stanford's arrangement in 'Songs of Old Ireland.'

A few words about the dances of Ireland will not be out of place. These are (1) the Planxty, or Threaca, 8-8 time, with strains of unequal number of bars. (2) The Jig, or Rince, with an equal number of bars. (The Jig was, as its

\[1\text{This is the distinction between the Musette and the Cornamuse, the former answering to the Irish and the latter to the Scotch Pipe.} \]

\[2\text{This explains the passage about the wild cats in the Story of Cusail (Campbell's Tales and Legends of the West Highlands, 1.167)} \]
name implies, derived from the Goige or Fiddle, just as the Hornpipe was named from the instrument of that name): of these there were
(a) the Double Dig, (b) Single Dig, (c) Hop Dig, and
(d) Moucen, or Green-soll Dig. (3) The Reel, similar to that of Scotland, of which it is the national dance. (4) The Hornpipe.
(5) Set dances, chiefly by one dancer, and (6) The Country dance. [The Reinece Foile, or Long Dance, has become again very popular in Ireland. It was danced before James II. in 1689 in Dublin. There are 16th century allusions to the 'Irish Hey' and the 'Irish Trot,' of which examples are given in Playford's Dancing Master. The 'Cake Dance' is met with in 1650 and onwards.] Many of the dances in 6-8 measure were originally march tunes; for it is remarkable that the 'slow march,' as used by other nations, never prevailed among the Irish, whose battle music was frequently in the 6-8 measure, with two accents in the bar.

Every civil occupation in Ireland had also its appropriate music; thus milking the cows (an occupation in which the ancient Irish took peculiar delight), spinning, and ploughing, had each its tune.

Such are a few of the characteristics of a native minstrelsy second to none in the annals of aboriginal art. But the lines of demarcation by which national peculiarities were preserved are being daily obliterated; steam and electricity have worked many wonders, of which this is not the least remarkable. [The publication of the whole collection of airs formed by Dr. Petrie—embracing nearly 2000—by the Irish Literary Society of London, is a monumental work. This vast treasury of Irish folk-music, edited by Sir C. V. Stanford and Mr. C. Forsyth, was completed in 1906.]

A bibliography of collections and works on Irish music is given below; few of them are really trustworthy, save those of Petrie and Bunting, both honoured names in the annals of Irish music. It is to George Thompson, of the Trustees' Office, Edinburgh, 1 who was much interested in national airs from 1792 to 1820, especially those of Scotland, and engaged Pleyel, Kozeluch, Haydn, Beethoven, Hummel, and Weber, as arrangers of them, that we owe the Irish music arranged by Beethoven between the years 1810 and 1819. Among sixteen national airs, with variations, as duets for violin (or flute) and piano (opp. 106, 107), are three Irish melodies—'The Last Rose' (a very incorrect version of the air), 'While History's Muse,' and 'O had we some bright little isle.' Although interesting in their way, these little works of Beethoven are very inferior to his Vocal Collections. Of these '12 Irish airs with accompaniments of piano, violin, and violoncello' (obli-

1 See The Life of George Thomson, by J. Cuthbert Hadden, 1888, and the article Thomson in this Dictionary.

gato), were published in 1855 by Artaria & Co. of Vienna, as proprietors of Beethoven's MS. It is likely that Messrs. Power, owners of Moore's copyright songs, refused Mr. Thomson permission to publish them along with Beethoven's arrangements, for in the new edition of Breitkopf & Härtel, of which they form No. 258, the melodies are adapted to verses (some comic, and of extreme vulgarity) by Joanna Baillie and others; three are arranged as vocal duets; two have a choral refrain. Another collection of twenty-five Irish airs forms No. 261 of Breitkopf & Härtel's edition; they are arranged in similar form and are equal in excellence; some are found in Moore, others are of doubtful authenticity; of the air called 'Garry-one' (Garryowen), Beethoven has different arrangements in each. [It was Dr. J. Latham, a musical amateur of Cork, who about 1802-5 supplied George Thomson with the grossly corrupt versions of the Irish airs for Beethoven.] His carelessness or incompetence will appear on comparing the air 'Colleen dhas,' as found in No. 9 of Artaria's edition, with that already given in this article; not only is the scale destroyed and the air deprived of its pathetic peculiarity, but whole strains are omitted altogether. R. F. S.; with additions and corrections by W. H. G. F.

BIBLIOGRAPHY.

Since the above article was written for the first edition of the Dictionary, the study of Irish Music has gone on in a more systematic manner, with the result that fresh light has been thrown on certain points. The following extended and corrected bibliography of the fountain-heads of Irish traditional music will, it is believed, be found fuller than any before published:—

c. early 17th century. 'Fitzwilliam Virginal Book' already noticed above contains three Irish airs, the earliest examples of Irish national music which we possess.

1650-1720. Playford's Dancing Master, has several Irish airs scattered through different editions.

1698-1720. 'Tune to purpe Melancholy,' contains some Irish tunes adopted by Pilkington's songs.

1700-1800. The 19th century Country Dance Collections issued by Walsh, Johnson, Rutherford, Thompson, Waylett, Knife, Longman, as well as many other London music-publishers of numbers of Irish airs, and this may also be said of the 'Tatlers' for different instruments issued by them.

1727. Aris (see) of Cornings, being a choice collection of Scotch, Irish and Welsh airs for the violin and German flute, by the following masters: Mr. Alex. [short of Edinburgh, Mr. Derek O'Conor of Limerick, Mr. Hugh Edwards of Carnarvon, London, printed for Jonn Wright near the Sun Tavern in Holborn, and Jonn Wright, Jun., at the Golden Baw in St. Paul's Churchyard. (Instructions and seventy-five tunes, pp. 25, 48, 4200, engraved throughout.)

(This probably unique volume, in the present writer's own library, is unfortunately curious in containing no Irish airs, several by 'Carolan.' There are other works issued about 1750 by the Wrights, father and son, with Irish airs. The date of the 'Aris of Cornings' is fixed by the title of one air 'Wood's Lamentation on Jeoffroy of his halfpenny.')

1730-35. Scale of Dublin. In 'The Second Part of the Beggar's Opera,' a work issued by these publishers after 1724 (date ascertained by advertisement of the opera 'Merrin' acted in 1734, or a later under same name in 1725), is advertised 'A Book of Irish Airs.' Bunting mentions (1806 ed.) three early Irish Publications: 'The Gleaner' by Bunting, Dunedee, 1770, another by Neil of Christ Church Yard soon after, and a third by John's son in 1777. Petrie's pp. 30, 180, 357, speaks of a collection of Carolan's tunes issued by 'O'Connell and Christ Church Yard.' Dubbing for, and the reason of, this or these publications and their titles are given vaguely it would be very desirable if something more definite could be ascertained about them. No trace appears to be left of the work's existence, except these unsatisfactory references. The earliest definite record of the Scale family, the music-sellers
IRISH MUSIC

ISAAC

of Christ Church Yard, Dublin, in 1742, when they had been arranged and performed in the performance of 'The Messiah.' (See NAXOS.)

1731. The Beggar's Opera, a new opera as it is acted at the theatre in Dublin, by Mrs. Cottle. Fourth edition. London: Knight, 1751.

1732. 'A Collection of the most admired Irish Tunes, the original and genuine Composition of Carold the celebrated Irish Bard,' Dublin, John Lee. Folio, pp. 28. (This work has several Irish airs included, as have other collections of the period.)

1734, etc. 'Mulan,' 1764; 'The Golden Pippin,' 1771; and 'The Poor Soldier,' 1783, with some other of the second period of English ballads, published by Queen's Airs, and Foreign Airs, adapted to the title, violin, or German flute, James Aird, Glasgow, six small oblong parts of various dates, 1765, 1766, 1774, 1797, etc.

1734, etc. Gow, 'A Collection of Strathspey Reels' and 'A Complete Repository of Strathspey, Reels, and Slow Airs,' printed by Gow (the various 'Collections' and 'Repositories' published by the Gow family contain many Irish airs not before published.)

1739, Jackson's 'Celebrated Irish Tunes.' Dublin, Edmund Lee. Folio. (Possibly a reprint from an earlier source.)

1740, Bynason, J. 'A Curious Selection of favourite Tunes with Variations which is added fifty favourite Irish Airs.' Edinburgh, printed for J. Bynason, Ob. Folio.

1746, a 'Collection of Songs, Irish and Foreign Airs, including the most favourite Compositions of Caroline.' London: Thompson, Ob. 4to.

1750, M'Mulock, J. 'The Repository of Scots and Irish Airs, Strathspey, and Reels.' Glasgow, Ob. 4to. Another work under the same title was issued by the same firm, also of Glasgow, Ob. 4to. Also several other Scottish collections issued both in London and Glasgow, contain Irish airs, named as such, not elsewhere printed.

1760, Bunting, Edward. 'A General Collection of the Ancient Irish Music ... collected from the harpers, etc., in the different provinces of Ireland ... by Edward Bunting.' Vol. I. Twenty-two sermons of Caroline's air (1593).

(Many Dublin printed editions of this.)

(An entirely different collection from the above edition of 1830, the collection then existing.)

c. 1798, 'Cook's Collection of twenty-one favourite original Irish airs never before printed arranged for the harp, violin, or flute.' Dublin, published by B. Cooke, 4 Cockleigh St. Dublin, improvised by two of the most celebrated Irish harpers in 1790. 8vo.

1800-50, Queen, A. 'Twelve original Irish melodies with characteristic words, arranged by Miss Ann Queen.' London: J. Robinson, Preston, London, Folio.

1810, Do. 'This work was continued periodically: Holden's Collection of the most esteemed old Irish Melodies.' Dublin. Folio issued in quarto.

1809, Murphy, John. 'A Collection of 17th and 18th airs with Variations. By John Murphy.' (No imprint, printed at Dublin, issued at the end of the year 1809.)

1809, M'Kinnon, A. 'A Collection of Irish and Scots Tunes containing airs of Aird, MacPherson, Strathpey, and adapted to the pianoforte ... by John MacPherson M'Kinnon.' Edinburgh, 4to, c. 1808.

1810, M'Donell, John. 'A Collection of Irish Airs adapted for the harp, violin, flute, and pipes ... in 2 volumes.' Belfast, 4to.

1810-16, O'Reilly's Pocket Companion for the Irish Union Flute, containing 120 songs and ballads, London: O'Reilly and another, 4to.

1817, O'Farril's Pocket Collection of the Irish or Union Flute, containing 120 songs and ballads, London: O'Reilly and another, 4to.

1820, 'A Select Collection of Irish Melodies ... with symphonies and accompaniments ... by Dr. C. Villiers. By C. Villiers. 8vo.'

1821-6, Fitzmaurice, 'A Collection of original Melodies of Irish character,' words by Edward Fitzmaurice. Folio.

1821, O'Carroll, 'Irish airs and ballads composed and arranged by Sir J. Stevenson, and words by Hor. F. O'Carroll.' Dublin, Folio.

1825, Smith, E. A. 'The Irish Minstrel,' a selection from the vocal music of Ireland. The airs were chosen by J. Walsh, arr. by R. A. Smith. Large 8vo. Edinburgh. (Two editions!)

1848, 'The Poets and Minstrels of Munster, a Selection of Irish songs,' 2 vols. (First edition dated 1820, second, 1829. Other later editions.)

1855, Petrie, Thomas. 'The Petrel Collection of the Ancient Music of Ireland,' arranged for the pianoforte, edited by George Petrie.

(The above collection of Irish national airs, noted down by Petrie, was issued by the Society for the Preservation and Publication of the Memoirs of Ireland, London. An attempt was made at a second volume in 1852, but only the first part, of 46 songs, appeared. Petrie himself had arranged a selection from the hitherto unpublished Petrie airs, and this edition, which appeared in Dublin, the Irish literary society, commemorated the publication. In 1862, of 'The Complete Petrel Collection of Irish Music,' exactly as found in the Petrel. The third part, completing the work, was published in 1863.)

1857, Leyce, J. 'The Dance Music of Ireland, collected and arranged by R. M. Leyce.' Two parts, 4to. London.

1857, Joyce, A. 'Ancient Irish Music, comprising one hundred airs, laments, ballads, and other songs, arranged for the harp, violin, &c.' Dublin.

1860, Ditto, 'Irish Songs and Ballads.' Novello, 1860.

(The words by A. P. Graves, music arranged by Sir C. V. Stanford. The airs taken from the Folk Song Society of London.)

1867, 'Irish Folk Songs,' the words by A. P. Graves, the airs arranged by Charles Wood. London, '1867.

1869, Ditto, 'The Irish Song Society,' edited by P. J. Joyce, Graves, etc., etc.

(Contains valuable original notes, bearing on the history of the songs and airs and their hitherto unpublished Irish airs.)

1901, 'Songs of Erin.' Bowlby, 1901, Graves & Wood.

The Journal of the 'Irish Folk-Song Society' and of the 'Folk-Song Society' contain Irish traditional airs.

The above list represents, it is believed, a very comprehensive bibliographical volume, wherein traditional Irish music appears for the first time in print, some of the works having a number of hitherto unpublished airs than others. The numerous 'Collections,' old and new, made up of airs published in other places, are excluded. Works bearing on the history of Irish music are included in this list are Hardiman's 'Irish Minstrelsy,' 2 vols., 1811; Conroy's 'National Music of Ireland,' 1859, and some others. Mr. W. H. Grifflin Flood has lately (1893) completed a History of Irish Music.)

ISAAC, HEINRICH.

The time and place of the birth of so great a man become of more than usual interest when upon their decision depends his claim to be called Germany's first great composer. If he was really a German, which all historians and the evidence of his works lead us to believe, it is certain that the beginning of the 16th century found him the central figure of the few musicians his country could then number. Neither Paul Hoffhaimer, the organist and composer, who, after a life of nearly ninety years (1449-1537) found his last resting-place at Salzburg, nor Thomas Stolzer, who, in his short time of thirty-six years made his name still more famous, nor even Heinrich Finck with his lovely lieder and hymns,—none of these were so great as Isaac. They had much in common with him, and their names may be found side by side with his in many books of German lieder, but whatever their genius may have been, they

1 Which, nevertheless, failed to move the heart of his royal master the King of Poland, and he was thrashingly replied to the composer's request for an increase of salary—

A little Finck (Finck within its cage
Sings all the year, nor asks for wages.)

P. K.
have not handed down such monuments of greatness as exist in the works of Isaac. In the higher forms of church composition they scarcely competed with him at all.

According to one tradition he was born at Prague, and Ambros 1 devotes a charming page of his history to showing the Bohemian character of some of the subjects used by the composer in his masses. He appears to have spent much of his time in Florence [where he was organist in the Medici chapel from 1477 to 1493] and here he was sometimes called by the grand title ‘Arrigo Tedesco’ in strange contrast to the modest, quaint ‘h. yace,’ another variation of his name. His position in Florence, and one date in his life, is shown by a MS. said by Dr. Rimbault to have been in the library of Christ Church, Oxford, but of which we can find no trace there at present. In The Musical World (August 29, 1844) Dr. Rimbault describes this MS. as containing the music composed in 1488 by Henry Isaac for the religious drama, ‘San Giovanni e San Paolo,’ written by Lorenzo de’ Medici for performance in his own family. He also states that Isaac was the teacher of Lorenzo’s children, which fact we presume he learnt from the same MS. Fétis shows that he was still, or again in Florence many years after 1488, for Aaron speaks of being intimate with Josquin, Obrecht, and Isaac in that city, and Aaron could not have been twenty years old (i.e. old enough for such friendship) until the year 1509; and that he must have died some years before 1531, according to a note made upon a MS. of that date in the Munich Library, containing a work begun by him and finished by his pupil Sunif. [Later researches, a summary of which is to be found in the Quellen-Leitzon, prove that he went to Vienna in 1496, and to Innsbruck in the following year, as composer to the Emperor. He remained there until 1515, then he returned to Florence with an annual pension of 150 florins.]

Of Isaac’s works, first in importance come twenty-three masses, ten printed, and thirteen in MS. (1) Missa Heinrici Iose, printed by Petrucci in 1506, containing five masses, ‘Charge de doul,’ ‘Missicordius Domini,’ ‘Quant jay au cour,’ ‘La Spagna,’ ‘Connue femme.’ (2) Rhaw’s ‘Opus decem missarum 4 vocum’ (Wittenberg, 1541) contains the two masses ‘Carminum’ and ‘Une Musique de Biscey.’ (3) Liber quintae decim missarum, etc. (Nuremberg, Petrucci, 1539) contains the mass, ‘O praecarea,’ one of the most remarkable of the composer’s works. It is composed on a subject of four notes reiterated without cessation throughout the mass. Some of the numbers, as the ‘Et in terra pac’ and the ‘Qui tollis,’ have the character of slow movements by the lengthening of the four notes over several bars, the simple accompaniments of the other parts being very beautiful. The subject is kept in the treble nearly throughout the mass, which is one of Isaac’s peculiarities. It is presented in various forms in the earlier movements, first announced in triple time, then in long notes with accompaniments in triple time, till in the Credo it bursts out Alla Breve, forming a majestic climax. The Mass exists in score in the Berlin Library amongst the MS. materials collected by Sonneleitner for a history of music. A copy is also in the Fétis Library at Brussels (No. 1807). (4) Ott’s collection, Missae 13 vocum (Nuremberg, 1539), contains two masses, ‘Salve nos,’ and ‘Fröhlich Wesen.’ One movement, ‘Pleni sunt,’ from the latter is scored in Sonneleitner’s MS.

The thirteen MS. masses are mentioned by Ambros in his History of Music (iii. 386)—in the Royal Library at Vienna, eight—Missa Solessmi, Magne Deus, Passchalis, De Confessoresibus, Dominicalis, Do B. Virgine, and two De Martyribus, all in four parts; and in the Munich Library, four six-part ones,—Virgo prudentissima, Solennis, one without name, and a four-part one, ‘De Apostolis.’ A MS. volume of Masses in the Burgundy Library at Brussels (No. 6428) contains the ‘Virgo prudentissima’ under the title ‘Missa de Assumptione B.V.M.,’ lihric yac.

Eitner’s Bibliographie der Musik-Sammlerwerke (Berlin, 1877) mentions upwards of forty collections between the years 1501 and 1564, which contain motets and psalms by Isaac. The Doerzendorfian of Glarean contains five, of which Burney (ii. 521-24), Hawkins (ch. 70), and Forkel, have printed in their Histories, Burney having copied them all in his notebooks at the British Museum. Wrysung’s Liber selectarum cantionum, etc. (Augsburg, 1528) contains five of the most important of Isaac’s works of this class, amongst them two six-part motets, ‘Optime pastor’ and ‘Virgo prudentissima,’ dedicated respectively to the Pope Leo X. and the Emperor Maximilian I. An excellent MS. copy of this work exists in the Fétis Library at Brussels (No. 1679). [See the list of extant works in the Quellen-Leitzon.] Of Isaac’s lieder, Ott’s collection of 115 guter novus Liederlein (Nuremberg, 1544) contains ten. One of them, ‘Es het ein baver ein tschterlein,’ is given in score by Forkel in his History. This collection has been reprinted by the Gesellschaft für Musikforschung (Berlin). Förster’s collection, Ein auszug guter Teutscher liederlein (Nuremberg, Petrucci, 1539) contains four of Isaac’s songs, and amongst them ‘Isbruck’ [Innsbruck], ich muss dich lassen,’ the words said to have been written by the Emperor Maximilian. The melody was afterwards sung to the hymns, ‘O Welt, ich muss dich lassen,’ and ‘Nun ruhen alle Wälder,’ and is one of the most beautiful of German chorales. It is introduced by Bach in the Passions-Musik (St. Matthew), in the

1 Geschichte der Musik, iii. 380-389.
scene of the Last Supper. Whether Isaac actually composed the melody, or only wrote the other parts to it, is doubtful, but it is remarkable that here, as in others of his works, the melody appears in the upper part, which was quite unusual in such compositions. It is in these Lieder that he shows his nationality. In them we have the music which the composer brought with him from his home, the trace of which is not lost in his greater compositions, but blending itself with the new influences of an adopted country, and of Netherland companions, gives to his music a threefold character, 'a cosmopolitan trait' not to be found in the works of any other composer of the time (Ambros, iii. 382).

ISABELLA. [See Girardeau.]

ISHAM (occasionally spelt ISUM), Joux, Mus. B. [born about 1650, and educated at MerTon College, Oxford ("Dict. of Nat. Biog."
), was for some years deputy-organist for Dr. Croft. On Jan. 22, 1711, he was elected organist of St. Anne's, Scho, on Croft's resignation. On July 17, 1713, he graduated as Bachelor of Music at Oxford, and on April 3, 1718, was elected organist of St. Andrew's Holborn, with a stipend of £50 per annum, upon which he resigned his place at St. Anne's, the vestry objecting to his holding both appointments. Shortly afterwards he was chosen organist of St. Margaret's, Westminster. He composed some anthems, two of which are in Croft's Divine Harmony, and joined with William Morley in publishing a joint-collection of songs, Isham's two-part song in which, 'Bury delights my roving eye,' was very popular in its day, and is reprinted by Hawkins in his History, ii. 799 (ed. 1853). He died in June 1726, and was buried on the 12th of that month in St. Margaret's church.

ISOUDA, or ISOAARD, NICOL, usually known as NICOL, born Dec. 6, 1775, at Malta, where his father was a merchant and secretary of the Massa Frumentaria, or government storerooms. He was taken to Paris as a boy, and educated at the Institution Bertaud, a preparatory school for the engineers and artillery. Much of his time was taken up with the study of the pianoforte under Pin, but he passed a good examination for the navy. He was, however, recalled before receiving his commission, and on his return to Malta in 1799 was placed in a merchant's office. His pianoforte-playing made him welcome in society; and encouraged by this he went through a course of harmony with Vellia and Azzopardi, and with Amendola of Palermo—where he passed several years as clerk to a merchant—and completed his studies under Sala and Guglielmi at Naples, where he was employed by a German banking firm. He now determined to become a composer, and abandoning commerce, much against his father's wish, produced his first opera, 'L'avviso ai Maritati,' at Florence in 1795. After this date he called himself simply Nicol, in order not to compromise his family, and it was under this name that he made his reputation. From Florence he went to Leghorn, and composed 'Artaserse,' an opera seria, which procured him the cross of San Donato of Malta. He succeeded Vincenzo Anfossi as organist of St. John of Jerusalem at Malta, and on the death of San Martino became maître de chapelle to the Order, retaining both posts until the occupation of the island by the French (June 10-13, 1798). During these early years he acquired that facility which was afterwards one of his most marked characteristics. There was not a branch of composition which he did not attempt, as a list of his works at this date will show:—nine cantatas; masses, psalms, and motets; vocal pieces for concerts; and eight or nine operas which it is not necessary to enumerate.

At this time he was strongly urged to go to Paris. On his arrival he found a useful friend in Rodolphe Kreutzer, and the two composed, conjointly, 'Le petit Page' (Feb. 14, 1806), and 'Flaminini a Corinthe' (Feb. 28, 1801). At the same time Delerue re-wrote the libretto of two of his Italian operas, which were performed under their original titles, 'L'imprévu de Campagne' (June 30, 1806), and 'Le Témérite' May 17, 1801). Isouard also made considerable mark in society as a pianist. To his friendship with Hoffmann and Etienne he owed not only sound advice, but a series of librettos upon which he was able to work with a certainty of success. Thus favoured by circumstances, he produced in sixteen years no less than thirty-three operas. The following list is in exact chronological order, which Petis has not been careful to observe:

1. "La Statue, ou la femme avare" (April 29); "Michel-Ange" (Dec. 13, 1822); "Les Confidences" March 31; "Le Balai et la Quittance" (June 17, 1819); "Le Kreutzer et Barthold" (Nov. 19, 1830); "L'intrigue aux fenêtres" (Feb. 24); "Le Jeune Henry et le Gars des Ponts" (May 15, 1820); "La Prise de Frossay" (Feb. 8); "Mala" (July 30, 1800); "Les Rendez-vous bourgeois" (May 9); "Les Créateurs" (Dec. 30, 1801); "Un Jour à Paris" (May 24); "Cimarcas" (June 28, 1800); "L'intrigue au Sérial" (April 28, 1800); "Cendrillon" (Feb. 22, 1801); "La Victoire des Arts" (Feb. 23), with Bula and Bertoni; "Le Fide du Village" (March 31); "Le Billet de Loterie" Sept. 14; "Le Magicien sous Magic" Nov. 4, 1837; "Les Enfants du Jubilé et M. Quinquaud" (Feb. 27, 1800); "Le Prince de Conde" (March 4); "Le Français à Venise" June 14, 1824); "Bayard a Mlle." (Feb. 13, with Cherubini, Cete, and Boieldieu); "Joséphine" (Feb. 26); "Joumou et Col" Oct. 17, 1814; "Les deux Meurs" (March 18); "L'usine pour l'usure" (May 11, 1800).

To this long list must be added 'Aladin, ou la Lampe merveilleuse,' which he did not live to finish, which was completed by Bennici, and produced Feb. 6, 1822; [also a one-act piece, 'Die Hassen in der Hassenbeide,' mentioned in the Quellen-Lexikon as existing in the Munich opera-house.]

Isouard had the gift of melody, and remark-

...
able skill in disposing his voices so as to obtain the utmost effect. Instances of this are—the quintet in ‘Michel-Ange,’ quite Italian in its form; the ensemble and trio in the ‘Rendez-vous bourgeois’; the quartet in the second act of ‘Joconde’; the trio in the same opera, and that of the three sisters in ‘Cendrillon;’ the finale in the ‘Intrigue aux fenêtres;’ the trio and the duet in ‘Jeannot et Colin,’ and many others. To these qualities must be added the originality and unadorned simplicity of his music, which gave it a kind of troubadour character. His later works, composed when Boieldieu was running him hard, are manifestly superior to the earlier ones, when he had no competitor. ‘Joconde,’ the favourite romance in which will never be forgotten, far surpasses ‘Cendrillon,’ though inferior to ‘Jeannot and Colin,’ which for finish, taste, sentiment, and charm of style will always be appreciated by musicians.

Another of Isouard’s good points is that his comedy never degenerates into vulgarity. In Boileau’s words, this composer—

Distingue le mas du plat et du buffon.

He strictly observed the proprieties of the stage, and thoroughly understood the French public. In his own way he continued Grétry’s work, but being no originator was eclipsed by Boieldieu and afterwards by Auber. The successes of his rival provoked him beyond control, and when Boieldieu was elected by the Institut in 1817 to succeed Mélhu in preference to himself, his mortification was extreme. It was, perhaps, to drown the remembrance of this defeat, and of the triumphs of his opponent, that, although a married man, he plunged into a course of dissipation which ruined his health and brought on consumption, from which he died in Paris, March 28, 1818.

There is a biography of Isouard, nor indeed any sketch at all adequate. Several portraits have been published, but are of no artistic merit. From one of them was executed in 1858 the marble bust now in the foyers of the Opéra Comique.

Isouard is little known in England. The only two of his pieces which appear to have been brought out on the London stage are ‘Les Rendez-vous bourgeois’ (St. James’s, May 14, 1849), and ‘Joconde,’ English version by Mr. Santley (Lyceum, Oct. 25, 1876). G. C.

ISRAEL IN EGYPT. The fifth of Handel’s nineteen English oratorios. The present second part was composed first. The autograph of it is headed ‘Moses song. Exodus Chap. 15. Intritus. Anfangen, Oct. 1, 1738,' and at the end ‘Fine Octob.’ 11, 1738, den 1 November, vüllig geendet.’ The present first part is headed ‘16 Octob. 1738. Act ye 24.' Three pages were written and erased; and on the fourth page begins the present opening recitative, headed ‘Part ye 2 of Exodus.’ At the end of the Chorus ‘And believed’ stands ‘Fine della Parte 24a d’Exodus. {Octob. 20} {October 28} 1738. The autograph is in the Royal Library at Buckingham Palace, and the two parts are bound in their present order, not in that of composition.

The title ‘Israel in Egypt’ appears in the announcements of the first performance, which was on April 4, 1739. On April 11 it was performed again ‘with alterations and additions.’ Elsewhere it is announced that ‘the Oratorio will be shortened and intermixed with songs’—four in number, all sung by Francesina. (See Rockstro, G. F. Handel, p. 220.) It was given a third time, April 1, 1740, with the Funeral Anthem as a first part, under the name of the ‘Lamentation of the Israelites for the Death of Joseph.’

Dr. Chrysander suggested that the adaptation of the Funeral Anthem as an introduction followed immediately on the completion of Moses’ Song, and that ‘Act ye 24’ followed on that adaptation; and it is difficult to resist the conclusion that he was right, though beyond the words ‘Act ye 24’ and the addition of a short overture to the Funeral Anthem there is no positive evidence. The use of the word ‘Act’ prevents our taking ‘Act the 24’ as ‘second’ in relation to ‘Moses’ Song;’ it was second in order of composition, but not in historic order, nor in order of performance— and ‘Moses’ Song’ contains the musical climax to the whole work.

The first subsequent performance in England of the work as composed, without additions or omissions, was probably that given by the Sacred Harmonic Society, March 16, 1838. In Germany it was first performed in any shape by the Sing-Akademie of Berlin, Dec. 8, 1831.

This oratorio is distinguished among those of Handel as much for its sustained grandeur as for the great number of allusions to, and quotations from previous compositions, both of Handel’s own and of other musicians, that it contains. Those which have at present been recognised are as follows:

1. They loathed.’ Shortened from Pagne in a minor in his own Six organ fugues.
2. ‘He spake the word.’ The voice parts from a Symphony for double orchestra in Stradella’s Serenata.
3. ‘Handsome is the firstborn.’ From Ina in a minor in his own Six organ fugues.
4. ‘But as for his people.’ From Stradella’s Sereneta.
5. ‘Egypt was glad.’ Almost note for note from an Organ canto in E minor by Kerl.
6. ‘And believed the Lord.’ From Stradella’s Sereneta.
7. ‘He is my God.’ Almost note for note from the opening of Ezra’s Magnificat.
8. ‘The Lord is my strength.’ From ‘Et exultavit in the Magnificat.
9. ‘The Lord is a man of war.’ From ‘Teeternum Patriem in Uri’s Te Deum, and ‘Quia factis’ in Magnificat.
10. ‘The depths have covered them.’ From Magnificat.
11. ‘Thy right hand.’ From dicto, ‘Quia factis’ respect!

1 The lower date is partly cut away by the binder, and is nearly illegible. See Rockstro’s G. F. Handel, p. 216.
2 See the Analysis of Uri’s Te Deum and Stradella’s Sereneta, by Professor Prince, in the Monthly Musical Record for Nov. and Dec. 1877.
3 Printed by Hawkins, Hist. of Music.
ISTESSO TEMPO

"Thou sentest forth." Almost note for note from Magnificat.

'Pecit potentiam.'

"And with the blast." From ditto, 'Dedum.'

'The earth swallowed' then. Almost note for note from 'Eruit erat' in ditto.

"Thou in Thy mercy." From ditto, 'Eulente.'

'I will sing unto the Lord." Repeated from beginning of Part II.

[The three works mainly appropriated in these numbers, are Nos. 1, 2, and 3 of Dr. Chrysander's Supplemente to his edition of Handel. See CHRYSANDEr, DENKMÀLER DER TONKUNST, and EREA.]

Notwithstanding this astonishing number of adaptations great and small, so vast is the fusing power of Handel's genius, and also perhaps so full of faith the attitude in which a great work of established reputation is contemplated, that few hearers suspect the want of unity, and even Mendelssohn, keen as was his critical sense, while editing the 'Israel' for the Handel Society, never drops a hint of any anomaly or inconsistency in the style of any of the pieces. (See Goethe and Mendelssohn, p. 138 ff.) Mendelssohn wrote organ accompaniments to the songs and duets, though, strange to say, they have seldom been used in public in England.

As to the compiler of the words of 'Israel' there is neither evidence nor tradition. It is therefore possible that they may have been selected by Handel himself. In the first part some of the words are taken from the prayer-book version of the Psalms. In other cases the ordinary Authorised version has been adopted, but not exactly followed.

ISTESSO TEMPO, L', 'the same time,' a caution in cases of change of rhythm or time-signature. It may mean that the measure remains as before while the value of the note changes—as in the change from 9-16 to 6-16 in Beethoven's op. 111, or from 2-4 to 6-8 in 'Bagatelle,' op. 119, No. 6; or that the measure changes while the note remains—as in op. 126, No. 1; or that neither note nor measure change—as in op. 111, 6-16 to 12-32, and op. 120, Var. 3. Or that a former tempo is resumed, as in his Sonata, op. 110—'L'istesso tempo di Arioso,' 'L'istesso tempo della fuga.'

ITALIAN SIXTH. See Sixth.

ITALIANA IN ALGIERI, L'. An Italian comic opera in two acts; words by Anelli, music by Rossini. Produced at San Benedetto, Venice, 1815; at Paris, Feb. 1, 1817; and in London, Jan. 27, 1819; in English, Dec. 30, 1844.

IVANHOE. Romantic opera in three acts, libretto by Julian Sturgis, music by Sir Arthur Sullivan; produced for the opening of the Royal English Opera House (now the Palace Theatre) Jan. 31, 1891. For another opera on the same subject, see TEMPLER UND JUDIN.

IVANOFF, or IVANHOFF, Nicholas, born in 1809, an Italianised Russian, appeared in England in the season of 1854. A pupil of E. Bianchi, he had a very beautiful tenor voice, 'a chaste and simple style of singing, but little execution' (Lord Mount-Egidembe). On the other hand, Mr. Chorley wrote: 'Nothing could be more delicious as to tone—more neat as to execution. No such good Rodrigo in "Otello," has been heard since I have known the opera'; and Moscheles, in his Diary, says, 'he attracted the public by his great flexibility of voice, but he displeased my German ear by using his head-voice too frequently, particularly when singing Schubert's Serenade. His sickly, sentimental style became so wearisome that some wag circulated a joke about him, declaring that his real name was "I've enough."' (Chorley). He reappeared in London in 1835 and 1837, but he never fulfilled the promise of his first season, and soon retired. With others of the Italian troupe he had taken part, but without effect, in the Festival at Westminster Abbey in 1834. He died at Bologna, July 8, 1880. J. M.

IVANOV, Michael Mikhailovich, musical critic and composer, born in Moscow, Sept. 28, 1849. On leaving the Technological Institute, St. Petersburg, in 1869, he studied for a year at the Moscow Conservatoire under Tchaikovsky (harmony), and Dubuque (piano). From 1870 to 1876 he lived chiefly in Rome, where he associated with Liszt and his pupils. On his return to Russia he took up musical criticism, and his name is now best known in connection with his weekly article in the Novoe Vremya. The majority of his compositions have been performed, but not published. They include—two operas; a requiem; a symphony, 'A Night in May'; three orchestral suites; several cantatas, songs, and pianoforte pieces. Ivanov has translated Hanslick's work, The Beautiful in Music, into Russian, and is the author of several volumes and pamphlets on musical subjects.

R. N.

IVE, or IVES, Simon, born at Ware in 1600 (baptized July 20) was a vicar choral of St. Paul's cathedral. In 1633 he was engaged, together with Henry and William Lawes, to compose the music for Shirley's masque, 'The Triumph of Peace,' performed at Court by the gentlemen of the four Inns of Court on Candlemas day, 1633-34, for his share in which he received £100. On the suppression of choral service he became a singing-master. [At the Restoration he was installed as eighth minor prebendary of St. Paul's (1661).] His elegy on the death of William Lawes, 'Lament and mourn,' appeared in separate parts at the end of H. and W. Lawes's Choice Psalms, 1648. It is given in score in J. S. Smith's Musica Antiqua. Many catches and rounds by Ives are printed in Playford's Select Ayres and Dialogues, 1669; Hilton's Catch that Catch can, 1652; and Playford's Musical Companion, 1672; 'Si Deus nosbiscum,' 3 in 1, is given in Hullah's Vocal Scores. Songs by him are to be found in various collections. (His instrumental works include
pieces in *Musick's Recreation*, 1652 and 1661, and in *Court Ayres*, 1655: fantasias in Brit. Mus. Add. MSS. 17,792, 31,423-4. A son, Simon Ive, was a student of Clare Hall, Cambridge, in 1644, and probably died young. One of the pieces in *Musick's Recreation*, above mentioned, is attributed to him. ([Dict. of Nat. Biog.; Quellen-Lexikon.]) The elder Ive died in the parish of Christ Church, Newgate Street, July 1, 1662.

IVRY, MARQUIS RICHARD D', born at Beaune, Feb. 4, 1829, was an enthusiastic amateur composer, whose works obtained more general recognition than generally falls to the lot of dilettante musicians. After various essays in operatic composition ('Fatma,' 'Quentin Matsys,' 'La Maison du Docteur,' 'Omphale et Pénelope') he wrote his best work, 'Les Amants de Véron,' in 1864, and brought it out under the *nom de plume* of 'Richard Yrvid' in 1867. Unluckily the opera of Gounod on the same subject, though written later, was performed in public before the Marquis D'Ivry's, and it was through the interest of Capoul, who was then director of the Salle Ventadour, that it was eventually presented in public, at that theatre, on Oct. 12, 1878. Capoul sang the principal part, and introduced the work to the English public at Covent Garden, on May 24, 1879. The composer made various improvements in the score for the purpose of the public production, thus showing that he had some power of self-criticism. A lyric comedy, 'Persévérance d'amour' was composed long after the other opera, and was in course of publication when the composer died at Hyères, Dec. 18, 1903. M.
JACHES, GALLICO, or JACOMO BRUMEL, famed not as a composer but as an organ player, was probably a son of Antonio Brumel. He was organist to the Duke of Ferrara, and had charge of the music in Modena and Reggio. Documents in the Modena Archives, dated from 1543 up till 1559, register payments to him ‘pro recompensa introitum capellarian Mutine et Reggi,’ and also for the keep of a horse used apparently for the journeys between Ferrara and Modena. He is named variously, ‘Domino Jaches, organiste gallico’; ‘Maestro Jacomo Brumello, detto Jaches, organista’; and ‘Domino Jaches, gallico, organiste ducali’ (Van der Straeten, La musique aux Pays-Bas, vi. 102).

Few references to Jaches Brumel are to be found in contemporary works, but Corsini in the dedication of his Primo libro motetti, 1571, to the Duke of Ferrara, mentions that himself had first studied music in Ferrara under Giaches Brumel: ‘io tengo ancora questo particolare con vostra eccellenza illustri, di haver appreso i primi semi della musica nella suo honora rata città di Ferrara e da Messer Giaches Brumel, suo servitore,’ etc. (Parisini, Catalogo, ii. 407). As Jaches da Ferrara he seems to have been better known. Dentice, in the second Dialogo della musica, Napoli, 1553, records hearing beautiful music, and that Giaches da Ferrara was among the performers. Cinciarino (Intro duttorio, Venice, 1555) quotes ‘Messer Jaches, organista dell’ eccell. et illustiss. Sig. Duca di Ferrara’ as an authority on the way to play the organ (Parisini, i. 175). A tribute to Jaches’s fine organ-playing is to be found in Bartoli’s Regio namenti acced. Venice, 1567, p. 38, where a query about ‘Jaches da Ferrara che è hoggi tenuto si raro e si eccellente,’ is answered ‘Io non hò lo conoscuto, ma Io hò ben sentito dire al Moschino che a tempi suoi non ha sentito sonatore alcuno che gli piacessi più di lui, parendoli che egli suoni con più leggadria, con più arte, e più musicalmente che alcuno altro, e sia qual si voglia.’

Jaches Brumel was apparently no longer living when this was written. c. s.

JACHT. A bewildering number of musicians, each and all commonly known by the Christian name of Jaches or Jachet, were living in the 16th century; bewildering because their identities became mixed and even the publishers of that time seem often to have been doubt ful as to which Jachet they were dealing with. Careful research on the part of Haberl and others has unravelled the tangle to a certain extent. It is possible to distinguish between Jachet da Mantua who dates from about 1527 to 1558; Jachet flammìngu, or Jacobus Buus, about 1589 to 1664; Jachet gallico, or Jacomò Brumel, about 1543 to 1558, also known as Jaches da Ferrara (see JACHES); Jachet Berchem (16th century) (see BERCHEN); Jacobus Vaet, in Vienna 1564-67 (see VAET); Jaches de Wert, born 1536, died 1596 (see WERT).

JACHT DA MANTUA was connected with the Cathedral of San Pietro, Mantua, from 1527 to 1558, at first as a singer and then as maestro di cappella. He is given the latter title in the volumes of his motets published in 1539, where mention is also made of his great reputation as a musician. Haberl (Kirchenmusikalisches Jahrbuch, 1891, p. 115) prints an interesting document found by Professor Davari in the Gonzaga Archives at Mantua, dated April 30, 1534, which gives Jachet’s surname and place of birth: ‘Jacobus Collebendi de Vitre Gallus Rheodensis dioecesis cognomento Jacobettus Cantor artis musicæ peritississimæ in civitate nostra Mantue,’ etc. This finally and negatively settles the question as to whether this particular Jachet is to be identified with Jachet Berchem. A comparison of their compositions also proves them to be different persons. Neither must Jachet of Mantua be confounded with Jacobus de Wert, organist at St. Barbara’s, Mantua, from 1565 to 1596. Jachet da Mantua must have died before the end of 1559 (see also Haberl: Buostine, iii. 119). He is variously described as in the service of the Cardinal or the Duke of Mantua.

There are many allusions to him in Italian 16th century treatises: Lanfranco, Scintille di musica, Brescia, 1533, includes ‘Jachetto’ among musicians then living. Zarlino, Le istituzioni armoniche, Venetia, 1558, pp. 264-265, 332, gives instances of the way in which ‘Jachetto’ used the Canto fermo in his motets. Cinciarino, Intro duttorio, Venetia, 1555, p. 13, writes: ‘Questa regola si usa in assai domi ... massime nel domo di Mantua e di questo dice Jachetto, huomo molto dotto, et eccellente et maestro di capella del detto domo e dell’ illustre et rev. Cardinale di detta città,’ etc. (Parisini, Catalogo, 1, 175). Bartoli, Regionesamenti acced. Venetia, 1567, Libro 3, p. 36 of dialogue: ‘Ma ditemi un poco havete voi conosciuto un certo Giachetto da Mantoua?’ Conobblò & quanto a me, la musica sua mi diletta grandemente, & mi pare ch’ ella habbia di quello andare delle composizioni di Adriano.’ This, of course, was written after Jachet’s death. In Lib. ii, p. 34, Delle lettere di M. Andrea Calmo, Venice, 1572, both Jachet da Ferrara ‘e quel de Mantoua’ are mentioned.

Jachet da Mantua was the ‘Jaquet’ or Jachet whose name constantly appears in the various collections of vocal music of that century. So early as 1532 motets by Jaquet were included in the second book of Motetti del fiore, for five voices, published by Moderne at Lyons. An
important series of masses, magnificats, and motets published in conjunction with Gombert and Morales commenced in 1540, including the masses by Jachet super: *Ave prima salute; In illo tempore; Non triste desplatisur;* and *Si bona suscipimus,* in 1542, this last republished in 1547; and the Magnificats Tertii and Octavii Toni in 1542, and Quarci Toni in 1562. The motets included those in Gombert's *Pentaphthongos harmonia,* 1541 and again in 1550, and the *Motetta trium vocum ab Jachetius Gallieus, Morales,* etc., 1543, and again in 1551. Some of his motets were also included in Cipr. de Rore's third book of *Motettii a cinque voci,* 1549, in the fourth book of *Motettii del Laberinto a cinque voci,* 1554, and in *Motetta Cipr. de Rore quatuor vocibus,* 1563.

In Willaert's *Hymnorum musica,* 1542, there were two compositions by Jachet; and in 1560 appeared: *Di Adrianus et di Jachet, I salmini appertinenti ai vesperi.* A similar work, *I sacri etanti salmini che si cantano nella sante Romana chiesa all'ora di Vespera,* in *Canto figurato.* Composti da Cipr. Rhore et Jachet da Mantua, was also published in Venice in 1554.

List of works:

- *Ave, Tenton et Basset,* 1550. This first print of the motets a quatro voci, of the excellent Jachet, maestro di musica of the chapel of the doge of the city. *Sc. Dei.* Basset. Obi., 1470. He was the Royal Librarian, etc., also published as *Hofbibliothek,* *La Musica.*
- *Jachetius musica celeberrimi aqque delectabilis, Chori Illustrissimi,* etc., published by *Ant. Garshe.* Venice, in 1540. The *Gardane edition* of 1513 is in the British Museum; two of the motets, *In illo tempore,* No. 2, and *In te Domine,* No. 34, are headed *Gachet樱桃er.* The others are headed *Jachet.*
- *Massa cum quatro vocum paribus. Ad institutionem Motetti. Quatuor motetti a quatro vocibus.* Venice, 1564, etc.
- *Il secondo libro delle Masse a cinque voci.* Composte da Jachet da Mantua. . . . Massa prima sopra Rex Balbionis; Massa seconda sopra Rex Cypriano; Massa terza sopra Rex Antonii; Massa quarta sopra Rex Ignatius; Massa quinta sopra Rex Roberto, a voci part. Venetia: Verden, 1558. Four books are in the *Bibl. di Roma.*
- *The three masses: *Si bona suscipimus; 'Surge Petre;' (by Gachettis).* Venice: Bologna, etc.
- *Voci maravigliose di Jachettis.* These four books were in the library of the *Bibl. di Roma.*

In the Bologna Royal Library are still some of the motets published in 1539, with the extremely early date, if correct, of June 30, 1538 (by *Car. II., 34., 31.*):

MS. copies of various motets are also in the *Librario di Bologna.*

Jachet Buus (1538-1564) was of Flemish extraction. *Van der Straeten (La musique aux Pays-Bas, vi. 270)* suggests that he originally came from Bruges, where at the beginning of the 16th century a "Meester Jacob Buus, orghelmaker" was living, and also *A Jacobus de /eueyto* musician and singer at the church of St. Saviour. The name of Jaques Buus first appears in his works published at Lyons by Jaques Moderne; two of his French songs for four voices are in the third book of *Le Paradis des Chansons,* 1538, others in the sixth, ninth, and tenth books, 1540-43; while a motet for five voices is in the *Quartier libri motettorum,* 1539. Like so many other Flemish musicians, Buus was drawn to music-loving Italy; on July 15, 1541, he was elected an organist at San Marco, Venice, in succession to Baldassare da Iomola, for a large majority of voices had decided *che uno maestro Jachet, Flamengo, sia il piu eccellente de tutti gli altri competitori in quell'arte.* 'Mistro Jaceth, famengo,' as he is also called in the same document, was to receive a yearly salary of eighty ducats. Among the papers of San Marco is one dated 1550, which gives his name in full: *Jaches Buus, Flamengus, sonor organi in ecclesia S. Marci.*

(Venice State Archives, *Van der Straten,* The years spent in Venice were important as regards Buus's development as a composer; the following works were published there:

- *Ricercari de Jachetius.* Published again in 1551.

In the first half of the 16th century instrumental music principally consisted of arrangements or adaptations from vocal compositions, the 1547 volume of Ricercari, one of the earliest books of organ music to be printed, is therefore of great interest, for it shows a distinct striving towards genuine instrumental composition. From the Ricercari were gradually to develop the Canzona, Fantasia, and Toccata, culminating in the *Sonatas* (see *Wasewerski, Gesch. der Instrumentalmusik im XVI. Jahrhundert,* 1878). The fourth Ricercari from lib. 1 is given in the *Musikbeilagen No. 18.* and: *R. Schlee, Gesch. der Kirchenmusik,* 1871: *Musikbeilagen No. 55.*
Ricerche di Jaques Bus' are mentioned in the Dialogo del Pietro Fontino. Parma, 1595, 2nd part, p. 48, and Cerone (El Melopeo, 1613; Lib. XII. p. 683) writes: 'Quios dessa ver Tientos & Ricerarios bien ordenados, vea los de Jaques Bas,' etc.

Doni (Dialogo della musica, Venice, 1544, pp. 36, 44) gives the two canto parts of a Canzona a otto di Jacobi: A teus jamais d'ung voloir, 'il quel pensa io chi vi sodisfera per essere una gran musica mirabile.' In the list of composers 'Jacques Bus' is entered, also 'Giaccheto Berchem,' which shows that Berchem, about whose life so little is known, is not to be identified with Bus. A madrigal 'Questi soavi fiori' for four voices by Bus is in the Primo libro di madrigali de div. autori, Venice, Gardane, in the 1542 and 1548 editions; the latter also included six madrigals by Berchem.

Towards the end of 1550 Bus obtained a four months' leave of absence; the time elapsed, but he did not reappear in Venice. The procurators of San Marco at last wrote (March 30, 1551) to the Venetian ambassador Federigo Badoer, at Vienna, where apparently they knew Bus was to be found, to ask if he intended to return or not. Badoer replied that Bus had spoken most affably of the happiness of those who served the glorious city of Venice, but that he would only return if his salary were raised to 200 ducati a year. This the procurators would not assent to, and they appointed Parabosco in his place. Bus remained in Vienna as organist to Ferdinand I., his name under the form of 'Jac. van Paus' appears in the list of the Court Kapelle from 1553 until 1564, when Ferd. I. died (Kochel, Die kaiserliche Hofmusikkapelle in Wien, 1869). Nothing more is heard of Bus after this date; he seems to have composed little in this later period. In the Tertius Tonus Evangeliarum, Noribergae, 1555, is a motet for four voices by him, also two motets by 'Jachet' and one by Jac. Vaet; this shows that neither Buus nor Vaet is to be identified with the Jachet or Jacquet, whose name so frequently appears as a composer at this date. The Sextus Tonus Evangeliarum also contains one motet by Buus and one by Jachet, while the Thesauri Musici tonus tertius, Noribergae, 1564, has a motet for six voices by Jacob. Buus and five motets by Jacob. Vaet.

Musical manuscripts in the Munich Royal Library include a motet for six voices (MS. 132), and a song 'Tant de travail' for five voices (MS. 295) by Giaches Buus.

The action of the harpsichord tribe of instruments the jack represents the Plectrum. It is usually made of pear-wood, rests on the back end of the key-lever, and has a movable tongue of holly working on a centre, and kept in its place by a bristle or metal spring. A thorn or spike of crow quill projects at right angles from the tongue. On the key being depressed the jack is forced upwards, and the quill is brought to the string, which it twangs in passing. The string is damped by the piece of cloth above the tongue. When the key returns to its level, the jack follows it and descends; and the quill then passes the string without resistance or noise. In some instruments a piece of hard leather is used instead of the quill in certain stops for special effects. In cutting the quill or leather great attention is paid to the gradation of elasticity which secures equality of tone. A row of jacks is maintained in perpendicular position by a rack; and in harpsichords or claviceles which have more than one register, the racks are moved to or away from the strings by means of stops adjusted by the hand; a second rack then enclosing the lower part of the jack to secure its position upon the key. We have in the jack a means of producing tone very different from the tangent of the clavichord or the hammer of the pianoforte. The jack, in principle, is the plectrum of the psaltery, adjusted to a key, as the tangent represents the bridge of the monochord and the pianoforte hammer the hammer of the dulcimer. We do not exactly know when jack or tangent were introduced, but have no reason to think that the invention of either was earlier in date than the 14th century. By the middle of the 16th century the use of the clavecin instruments with jacks had become general in England, the Netherlands and France; and in Italy, from whence they would seem to have travelled. They were used also in Germany, but the clavichord with its tangents asserted at least equal rights, and endured there until Beethoven's time. The first years of the 18th century had witnessed in Florence the invention of the hammer-clavier, the pianoforte; before the century was quite out the jack had everywhere ceded to the hammer. Although leather for the tongue of the jack has been claimed to have been the invention of Pascal Taskin of Paris in the 18th century (his much-talked of 'peau de buffle'), it has been found in instruments of the 16th and 17th; and it may be that leather preceded the quill, the introduction of which Scaliger (1484-1550) enables us to date approximately. He says (Poetices, lib. i. cap. lixii.) that when he was a boy the names clavicymsal and harpsichord had been appellations of the instrument.
vulnerably known as monochord, but that subsequently points of crowquill had been added, from which points the same instrument had become known as spinet—possibly from the Latin 'spina,' a thorn, though another and no less probable derivation of the name will be found under SPINET. In the oldest Italian jacks metal springs were used instead of bristles, and possibly metal plectra, of which an example is to be found in the upright spinet in the Donaldson Museum. 1 Royal College of Music.

Shakespeare's reference to the jack in one of his Sonnets is well known and often quoted—

Do I envy those jacks that nimble leap
To kiss the tender inward of thy hand;
but appears to mean the keys, which as the 'sweet fingers' touch them make 'dead wood more blest than living lips.' A nearer reference has been preserved by Rimbault (The Pianoforte, London, 1869, p. 57) in a MS. note by Isaac Reed to a volume of old plays. Lord Oxford said to Queen Elizabeth, in covert allusion to Raleigh's favour and the execution of Essex, 'When jacks start up, heads go down.' 2

JACKSON (Christian name unknown). The most noted composer of tunes for the Irish pipes during the 18th century. His melodies (of great excellence) were among the most popular tunes of the day both in Ireland and in England. They include 'Over the Water,' 'The Morning Brush,' 'The Maids in the Morning,' 'Jackson's Turret' (named from a tower he constructed), 'Welcome Home,' and others of merit. These were reprinted over and over again in collections of the period. Edmund Lee of Dublin issued, about 1790, an oblong folio collection of Jackson's Irish tunes. Practically nothing is known of his biography save that he was living in Ireland and composing at the middle of the 18th century. There is a passing reference to him in O'Keeffe's Reminiscences, 1826 (vol. i. p. 183), by which it appears that he was 'a fine gentleman of great landed property.' Bunting, Ancient Music of Ireland, 1840 (p. 109), states that Jackson lived in county Monaghan, and that his 'turret' (see above) in Ballingarry, county Limerick, was destroyed by lightning in 1826.

1 Description and History of the Pianoforte. A. J. Hitchin, Novello, 1896.
2 In some cathedrals the statutes do not specify an organist as an officer of the church. In such the custom is to assign to one of the vicarschorus the duty of organist.

JACKSON, William, known as Jackson of Exeter, son of a grocer in that city, was born May 29, 1730. He received a liberal education, and having displayed a strong partiality for music, was placed under John Silvester, organist of Exeter Cathedral, for instruction. In 1748 he removed to London and became a pupil of John Travers. On his return to Exeter he established himself as a teacher. In 1755 he published a set of Twelve Songs, which were so simple, elegant, and original, that they immediately became popular throughout the kingdom. He afterwards produced 'Six Sonatas for the Harpsichord,' 'Elegies for three male voices,' and a second set of Twelve Songs. These were followed by an anthem, a setting of Pope's ode, The Dying Christian, a third set of Twelve Songs,' and a setting of Warton's Ode to Fancy. In 1767 he composed the music for a dramatic piece called 'Lycidas,' altered from Milton's poem, on the occasion of the death of Edward, Duke of York, brother of George III., and produced at Covent Garden on Nov. 4, but never repeated. He next published 'Twelve Canzonets for two voices,' which were highly successful, and one of which, 'Time has not thinned my flowing hair,' enjoyed a long career of popularity. To these succeeded 'Eight Sonatas for the Harpsichord,' and 'Six Vocal Quartets' (1780). In 1777 Jackson received the appointments of subchanter, organist, lay vicar, and master of the choristers of Exeter Cathedral. In 1780 he composed the music for General Burgoyne's opera, 'The Lord of the Manor,' which was produced at Drury Lane, Dec. 27, with great success, and kept possession of the stage for more than half a century, mainly owing to Jackson's music. In 1782 Jackson published Thirty Letters on various subjects,—three of them relating to music, which were well received, and in 1795 reached a third edition. 'The Metamorphosis,' a comic opera, of which Jackson was believed to be the author as well as, avowedly, the composer, was produced at Drury Lane, Dec. 5, 1783, but performed only two or three times. In 1791 Jackson published a pamphlet entitled Observations on the present State of Music in London. In 1798 he published Four Ages, together with Essays on various subjects, intended as additions to the Thirty Letters. His other musical publications comprised a second set of Twelve Canzonets for two voices,' 'Twelve Pastorals,' a fourth set of Twelve Songs,' 'Hymns in three Service in C, in the choir-books of Wells, and four chants in a contemporary MS. organ part in the library of the Sacred Harmonic Society, are all his compositions that are to be found complete. The last-named MS. contains the organ parts of the Service in C and eight anthems, and in the choir-books at Wells are some odd parts of an anthem and a single part of a Burial Service.
parts, 'Six Madrigals,' and 'Six Epigrams,' (1786). His cathedral music was collected and published many years after his death (about 1829) by James Paddon, organist of Exeter Cathedral. He died of dropsy, July 5, 1803.\(^1\) Jackson employed much of his leisure time in painting landscapes in the style of his friend Gainsborough, in which he attained considerable skill. Whilst much of his music charms by its simplicity, melodiousness, refinement, and grace, there is also much that sinks into tameness and insipidity: his church music especially is exceedingly feeble. Notwithstanding this, 'Jackson in F' maintained its popularity in some churches through a great part of the 19th century.

W. H. H.

JACKSON, WILLIAM, known as Jackson of Masham, born Jan. 9, 1815, was son of a Miller, and furnishes a good instance of the power of perseverance and devotion to an end. His passion for music developed itself at an early age, and his struggles in the pursuit of his beloved art read almost like a romance in humble life. He built organs, learned to play almost every instrument, wind and string, taught himself harmony and counterpoint from books, until at length, in 1832, when he had reached the mature age of sixteen, the lord of the manor of Masham having presented a finger organ to the church, Jackson was appointed organist with a stipend of £30. Through the circulating library in Leeds, he was able to study the scores of Haydn, Mozart, Spohr, and Mendelssohn. In 1839 he went into business at Masham as a tallow-chandler, and in the same year published an anthem, 'For joy let fertile valleys ring.' In 1840 the Huddersfield Glee Club awarded him their first prize for his glee, 'The Sisters of the Sea'; and in 1841 he composed for the Huddersfield Choral Society the 102nd Psalm for solo voices, chorus, and orchestra. In 1845 he wrote an oratorio, 'The Deliverance of Israel from Babylon,' and soon afterwards another entitled 'Isaiah.' In 1852 he made music his profession and settled in Bradford, where, in partnership with William Winn, the bass singer, he entered into business as a music-seller, and became organist, first, of St. John's Church, and afterwards (in 1856) of Horton Lane Chapel. On Winn's quitting Bradford, Jackson succeeded him as conductor of the Choral Union (male voices only). He was chorus-master at the Bradford festivals in 1853, 1856, and 1859, and became conductor of the Festival Choral Society on its establishment in 1856. For the festival of 1856 he again set the 103rd Psalm, and for that of 1859 composed 'The Year,' a cantata, the words selected by himself from various poets. He compiled and partly composed a set of psalm tunes, and harmonized The Bradford Tune Book compiled by Samuel Smith, and Congregational Psalmody, 1863. Besides the works already mentioned, he composed a mass, a church service, anthems, glees, part-songs, and songs, and wrote a Manual of Singing, which passed through many editions. His last work was a cantata entitled 'The Praise of Music.' He died April 15, 1866. His son, William, born 1853, was bred to the profession of music, became organist of Morningside Parish Church, Edinburgh, and died at Ripon, Sept. 10, 1877.

W. H. H.

JACOB, BENJAMIN, born in London, April 1, 1778, was at a very early age taught the rudiments of music by his father, an amateur violinist. When seven years old he received lessons in singing from Robert Willoughby, a well-known chorus-singer, and became a chorister at Portland Chapel. At eight years of age he learned to play on the harpsichord, and afterwards studied that instrument and the organ under William Shirubsode, organist of Spa Fields Chapel, and Matthew Cooke, organist of St. George, Bloomsbury. At ten years of age he became organist of Salem Chapel, Soho, and little more than a year afterwards was appointed organist of Carlisle Chapel, Kennington Lane. Towards the latter end of 1790 he removed to Bentinck Chapel, Lisson Green, where he remained until Dec. 1794, when the Rev. Rowland Hill invited him to assume the place of organist at Surrey Chapel. In 1796 he studied harmony under Dr. Arnold. [In 1799 he became a member of the Royal Society of Musicians.] In 1800 he conducted a series of oratorios given under the direction of Bartleman in Cross Street, Hatton Garden. As he advanced in years he became more and more distinguished as one of the best organists of his time, and in 1808 and subsequently, with the co-operation of Samuel Wesley and Dr. Crotch, gave a series of performances at Surrey Chapel, of airs, choruses, and fugues played upon the organ alone, without any intercession of vocal pieces. In that and the following year Samuel Wesley addressed to him, as to a kindred spirit, a remarkable series of letters on the works and genius of John Sebastian Bach. These letters, now in the library of the Royal College of Music, were published in 1875 by Miss Eliza Wesley, the writer's daughter; as a consequence of his high reputation he was frequently engaged to open new organs and to act as judge on trials for vacant organists' seats.

In Nov. 1823 he quitted Surrey Chapel for the newly erected church of St. John, Waterloo Road. This led to a dispute between him and the Rev. Rowland Hill, resulting in a paper war, in which the musician triumphed over the divine. The excitement of the controversy, however, proved too much for Jacob; he was attacked by disease, which developed into pulmonary consumption, and terminated his existence, August 24, 1829. He was buried in Bunhill Fields. His compositions were not numerous,

\(^1\) Dates of birth and death from the monument in the vestry of St. Stephen's, Exeter [West's Cath. Org.]
consisting principally of psalm tunes, and a few
glosses. He edited a collection of tunes, with ap-
propriate symphonies, set to a course of psalms,
and published under the title of 'National
Psalmody' (1817).

**JACOBI, Georges,** was born on Feb. 13,
1810, in Berlin, where, at the age of six, he
commenced to study the violin under Edward
and Leopold Ganz. In 1849 he went to
Brussels, studying under De Bériot until that
master became blind, when he removed to Paris,
where Halévy heard him play, and sent him
to Auber, then director of the Conservatoire.
There he joined Massart's class, at the same
time studying harmony and composition under Réber,
Gevaert, and Chéri, and in 1861 obtained first
prize for violin-playing. On July 13 of that
year he played the 13th concerto of Kreutzer,
while the illness of two of the competitors
reduced their number to thirteen. These
occurrences dispelled any belief that M. Jacobi
might otherwise have had in the ill-luck
associated with the number thirteen. After playing
for two years in the orchestra of the Opéra
Comique he became, by competition, first
violin of the Grand Opéra, where he remained
nine years, and played, amongst many other
notable productions, in that of Wagner's
'Tannhäuser.' During this period he played at
many concerts in Paris and in the provinces.
He also formed a stringed orchestra of sixteen
members, and gave concerts, performing from a
platform in the centre of the room, in the
picture-gallery of the Société Nationale des
Beaux-Arts on the site of which now stands the
Théâtre des Nouveautés, and the success of
these was so great that the number of concerts
given, originally announced as six, was increased
to twenty in one winter. In 1869 he left the
Opéra and assumed the bâton at the Bouffes
Parisiens, where Offenbach was then the rage.
In the following year he came to England to
make arrangements for performances by the
company of that theatre (which proved abortive).
He was unable to return to Paris owing to its
investment by the Germans. After the war,
however, he did return, only to be recalled
immediately to London by John Bbaum's offer
of the conductorship of the Alhambra orchestra.
This he accepted, and during the twenty-six
years that he was associated with the theatre
composed no fewer than 103 grand ballets and
divertissements, many of which have been re-
produced in the cities of America, in Brussels,
Berlin, Munich, Rome, and Paris. Besides
these he composed comedy-operas, of which
'The Black Crook' had a run of 310 perform-
ances, and 'La Mariée depuis midi,' written for
Mme. Judic, was played by her all over Europe;
incidental music to Irving's productions at the
Lyceum of 'The Dead Heart' and 'Robespierre';
two concertos for violin; a concertino for viola;
many violin pieces, songs, and music to tab-
leaux vivants. Since leaving the Alhambra
(on April 30, 1898), where under his guidance
the orchestra became the best permanent one
of any theatre in the kingdom, M. Jacobi
directed that of the summer theatre at the
Crystal Palace and wrote two ballets for it.
At the opening of the London Hippodrome
he was appointed conductor, but gave up the post
after a short time, as the work was too fatiguing.
Of his most successful ballets may be mentioned
'Yolande,' 'The Golden Wreath,' 'Hawaya,' 'The
Swans,' 'Melusine,' 'Dressina,' 'The Seasons,'
'Antiope,' 'Irene,' 'Asmodaes,' 'Orriella,' 'Ali
Baba,' 'Titania,' 'Lochinvar,' 'Blue Beard,' and
'La Trigane.' M. Jacobi's compositions are always
full of melody, and display a complete know-
ledge of stage requirements. They are devoid of
the affectation, the vagueness, and the vulgarity
which characterise much theatre music in Eng-
land, and their colour always meets the de-
mands of the dramatic situation. As a teacher
M. Jacobi is in this direction unsurpassable,
and was appointed in 1896 a professor at the
Royal College of Music. He was twice elected
President of the Association of Conductors in
England, was made an 'Officier de l'Académie'
by the French government, and was presented
by the King of Spain with the order of Isabel
the Catholic, of which he is Knight Com-
mander.

**JACOTIN,** according to Burbure, Jacob
Goderehe or (latinised) Jacobus Godefridus,
was a chaplain-singer in Antwerp Cathedral
from 1479 to 1528. Mention, however, is
made of another Jacotin or Jacotino, who was
singer at the Ducale Court of Milan from 1473
to 1494, and Eitner suggests that some of the
compositions ascribed to the former may really
belong to the other. It is just possible the two
may be one and the same, since we know that
Flemish singers and composers were greatly
in request in Italy at that particular time,
and often continued to hold church benefices while
residing elsewhere. The period just before the
Reformation is notorious for the prevalence of
the abuses of pluralities and non-residence in
connection with church preferments. If, how-
ever, we are to distinguish between the two
Jacotins it would be natural to ascribe the
motets published by Petrucci in the Motetti
della corona, 1518, to the Italian Jacotin, while
the French chansons and other works published
by the French house of Attaignant would belong
to the Antwerp master. Ambros (Gesch. iii.
260) refers to a masterly 8-voice setting of
'Sancta Divinitus unus Deus' in Ulhardt's Collection
of 1546, as showing Jacotin to be a composer
of importance, also to the Psalm Credidi as
notable for the careful declamation of the text.
(Ambros misnames one of Jacotin's Motetti in
Petrucci; the Psalm Judica is by Caem, Jacotin's
other Motet is Michael Archangel, etc.; see
Eitner, Bibliographie.) French Chansons con-
stitute the larger part of Jacotin's works, of which only two are accessible in modern reprints, one in H. Expert's reprint of the Attaingnant collection of 1529, 'Trop dure m'est ta longue demeure,' another still more attractive, 'Mon triste cœur,' in Eitner's Selection of sixty chansons, 1899. Jacotin is one of the company of 'Joyeux musiciens' mentioned by Rabelais.

JACQUARD, Léon Jean, eminent violoncellist, born at Paris, Nov. 3, 1826; studied at the Conservatoire, where he obtained the second prize for violoncello in 1842, and the first prize in 1844. In 1876 he married Mlle. Laure Bedel, a pianist of distinction, and at the end of 1877 succeeded Chevillard as professor of his instrument at the Conservatoire. Jacqaud was eminently a classical player, with a pure and noble style, good intonation, and great correctness: he was somewhat cold, but his taste was always irreproachable, and his séances of chamber-music were well attended by the best class of amateurs.

He composed some Fantasias for the violoncello, but it is as a virtuoso and a professor that he will be remembered. He died in Paris, March 27, 1886.

JADASSOHN, Solomon, born at Breslau, Sept. 3, 1831. His years of study were passed partly at home under Hesse, Lustner, and Brosig, partly at the Leipzig Conservatorium (1848), partly at Weimar under Liszt, and again, in 1853, at Leipzig under Hauptmann. From that time he resided in Leipzig, first as a teacher then as the conductor of the Euterpe concerts, and lastly in the Conservatorium as teacher of Harmony, Counterpoint, Composition, and the Pianoforte. [In 1857 he received the honorary degree of D.Phil. from the Leipzig University, and in 1883 was appointed Royal Professor.] His compositions are varied and numerous, reaching to well over 100 opus numbers. [His skill in counterpoint is shown in an orchestral serenade in canon, op. 35; in two serenades for piano, opp. 8 and 125; in the ballet-music, op. 58 for piano duet; and in the vocal duets, opp. 9, 36, 38, and 43. Four symphonies, orchestral overtures, and serenades, two piano concertos, four trios, three quartets, three quintets, a sextet for piano and strings, two string quartets, are among his instrumental works; and of his choral works the following may be mentioned: Psalms xiii. and c. (8-parts), 'Vergebung,' 'Verheissung,' 'Tröstlich,' 'Johannistag,' and 'An dem Sturmwind.' As a private teacher Jadassohn was highly esteemed, and his many theoretical works have passed through many editions, and have been translated into many languages. The chief of these are his Harmonielehre (1853), Kontrapunkt (1854), Kanon und Fuge (1884), Die Formen in den Werken der Tonkunst (1889), and Lehrbuch der Instrumentation. All have been translated into English and published by Breitkopf & Härtel, the treatises on Harmony and Counterpoint have also been translated into French and Italian. Jadassohn died at Leipzig, Feb. 1, 1902.] g. c.; additions from Riemann's Lexikon.

JADIN, Louis Emmanuel, son, nephew, and brother of musicians, born Sept. 21, 1768, at Versailles, where his father Jean, a violinst and composer, settled at the instigation of his brother Georges, a performer on the bassoon attached to the chapel of Louis XV. As a child Louis showed great talent for music; his father taught him the violin, and Himmelmond the piano. After being 'page de la musique' to Louis XVI., he was in 1789 appointed second accompanist, and in 1791 chief maestro al cembalo at the Théâtre de Monsieur, then in the Rue Feydeau. This post gave him the opportunity of producing 'Jacobé' (Sept. 14, 1790), a comic opera in three acts. Jadin's industry was extraordinary. Though fully engaged as composer, conductor, and teacher, he lost no opportunity of appearing before the public. He composed marches and concerted pieces for the Garde Nationale; patriotic songs and pièces de circonstance such as 'Le Congrés des Rois,' in conjunction with others, 'L'Apotéose du jeune Barra,' 'Le Siège de Thionville' (1793), 'Agrioc Viola on le jeune héro de la Durance,' for the various fêtes of the Revolution; and thirty-eight operas for the Italians, the Théâtres Molière, and Louvois, the Variétés, the Académie, and chiefly the Feydeau. Of this mass of music, however, nothing survives but the titles of 'Jacobé' and 'Mahomet II.' (1803), familiar to us from the operas of Isouard and Rossini. This does not necessarily imply that Jadin was without talent, but as with many others his librettos were bad, and his music, though well written, was wanting in dramatic spirit, and in the style, life, passion, and originality necessary for success. In fact his one quality was facility.

In 1800 he succeeded his brother as professor of the pianoforte at the Conservatoire, and was 'Gouverneur des pages' of the royal chapel from the Restoration to the Revolution of 1830. He received the Legion of Honour in 1824. To the close of his life he continued to produce romances, nocturnes, trios, and quartets, string quartets, and other chamber-music. Of his orchestral works, 'La Bataille d'Austerlitz' is the best known. He was one of the first to compose for two pianos, and was noted as the best accompanist of his day. In private life he was a good talker, and fond of a joke. He died in Paris, April 11, 1853.

His brother Hyacinthe, born at Versailles, 1769, a pupil of Himmelmond's, and a brilliant and charming pianist, played at the Concerts Feydeau in 1789-97, and was a favourite with the public up to his early death, Oct. 1800. On the foundation of the Conservatoire he was appointed professor of the pianoforte, but had barely time to form pupils, and both Louis Adam
and Boieldieu excelled him as teachers. He composed much both for his instrument and the chamber, four concertos and sonatas for two and four hands for PF.; sonatas for PF. and violin; string trios and quartets, etc.; all now old fashioned and forgotten.

JÄHNS, FRIEDRICH WILHELM, born at Berlin, Jan. 2, 1809. His talent for music showed itself early, and strongly; but the first important event in his musical life was the first performance of 'Der Freischütz' (June 18, 1821), which not only aroused his enthusiasm for music, but made him an adherent of Weber for ever. After some hesitation between the theatre and the concert-room, he finally chose the latter, and became a singer and teacher of singing, in which capacity he was much sought after. In 1845 he founded a singing-society, which he led for twenty-five years. In 1849 he was made 'Königliches Musikdirektor'; in 1871 'Professor'; and was subsequently decorated with the orders of Baden, Saxony, Bavaria, and Hanover. He composed and arranged much for the piano, but the work by which he will live for posterity is his Thematic Catalogue of Weber's works (C. M. von W. in seinen Werken, 1871), imitated from Köchel's Catalogue of Mozart, but much extended in limits beyond that excellent work. It is in fact a repertory of all that concerns the material part of those compositions, including elaborate information on the MSS., editions, performances, Weber's handwriting, etc., etc.—a large vol. of 500 pages. [A biography of Weber was published in 1873, and in 1881 Jahns was appointed teacher of rhetoric in Scharwenka's Conservatorium in Berlin. He died in Berlin, August 8, 1888.]

JAELL, ALFRED, pianoforte player, born March 5, 1832, at Trieste. Began his career at eleven years old as a prodigy, and seems to have acquired his great skill by constant performance in public. He appeared at the Teatro San Benedetto, Venice, in 1843; in 1844 he was brought to Moscheles at Vienna, and in 1845 and 1846 he resided in Brussels, next in Paris, and then, after the Revolution of 1848, went to America for some years. In 1854 he returned to Europe. In 1862 he played at the Musical Union in London, and on June 25, 1866, at the Philharmonic Society; from that time he played frequently in England. He died in Paris, Feb. 27, 1882.

In 1866 Jaell married Frl. Marie Trautmann, a pianist of ability. His published works consist of transcriptions, potpourris, and other salon pieces. He always showed himself anxious to bring forward new compositions; and played the concertos of Brahms and of Raff at the Philharmonic, at a time when they were unknown to that audience.

JAHN, OTTO, the biographer of Mozart, a distinguished philologist, archaeologist, and writer on art and music, born June 16, 1813, at Kiel; studied at Kiel, Leipzig, and Berlin; took his degree in 1831; visited Copenhagen, Paris, Switzerland, and Italy; in 1839 settled in Kiel; in 1842 became professor of archaeology and philology at Greifswalde, and in 1847 director of the archaeological Museum at Leipzig; was dismissed for political reasons during the troubles of 1848-49, and in 1855 settled at Bonn as professor of classical philology and archaeology, and director of the university art-museum. Here he remained till 1869, when he retired during his last illness to Göttingen, and died on September 9. Jahn wrote important books on all the subjects of which he was master, but his musical works alone concern us. Foremost among these is his 'W. A. Mozart (Leipzig, Breitkopf & Hartel, 4 vols., 1856-59; 2nd ed. 2 vols., 1867, with portraits and facsimiles; 3rd ed. (by H. Deiters) 1889-91; English translation by Miss Pauline Townshend, 1882). His picture of the great composer is scarcely less interesting and valuable than his description of the state of music during the period immediately preceding Mozart, while the new facts produced, the new light thrown on old ones, and the thorough knowledge of the subject evinced throughout, all combine to place the work at the head of musical biographies.

Jahn intended to treat Haydn and Beethoven on the same scale, and had begun to collect materials, but these projects were stopped by his death. Jahn also published an essay on Mendelssohn's 'Paulus' (Kiel, 1842); and an accurate comparative edition, with preface, of Beethoven's 'Leonora' ('Fidelio') for PF. (B. & H., Leipzig, 1851). For the *Grenzboten* he wrote two spirited reports of the Lower Rhine Musical Festivals of 1855-56; an article on the complete edition of Beethoven's works, full of sound criticism and biographical information; and two controversial articles on Berlioz and Wagner. These and other contributions of the same kind were published as *Gesammelte Aufsätze über Musik* (Leipzig, 1868). His four collections of original songs (three and four from Groth's *Quickborn*, Breitkopf & Hartel), also evince the possession of that remarkable combination of a highly cultivated sense of beauty with scientific attainments, which places him in the first rank among writers on music.

Köchel's Catalogue of Mozart is with great appropriateness dedicated to Jahn. C. F.

JAELLE, ALFRED, pianoforte player, born March 5, 1832, at Trieste. Began his career at eleven years old as a prodigy, and seems to have acquired his great skill by constant performance in public. He appeared at the Teatro San Benedetto, Venice, in 1843; in 1844 he was brought to Moscheles at Vienna, and in 1845 and 1846 he resided in Brussels, next in Paris, and then, after the Revolution of 1848, went to America for some years. In 1854 he returned to Europe. In 1862 he played at the Musical Union in London, and on June 25, 1866, at the Philharmonic Society; from that time he played frequently in England. He died in Paris, Feb. 27, 1882.

In 1866 Jaell married Frl. Marie Trautmann, a pianist of ability. His published works consist of transcriptions, potpourris, and other salon pieces. He always showed himself anxious to bring forward new compositions; and played the concertos of Brahms and of Raff at the Philharmonic, at a time when they were unknown to that audience.
energy and interest of Dr. Chrysander, by whom it was edited and published, through Breitkopf & Hartel. Two volumes only appeared, and the place of the publication was ultimately taken by the Vierteljahrschrift für Musikwissenschaft, edited by Dr. Chrysander, Professor Spitta, and Heinrich Adler, which has been published quarterly since 1885. For pains and ability the papers leave nothing to be desired, but the severe polemic spirit which is occasionally manifested is much to be regretted.

JAMES, JOHN, an organist in the first half of the 18th century, noted for his skill in exuberant performance. After officiating for several years as a deputy he obtained the post of organist of St. Olave, Southwark, which he resigned in 1738 for that of St. George-in-the-East, Middlesex. He died in 1745. His published compositions consist of a few songs and organ pieces only.

JAMES, W. N., a flautist, pupil of Charles Nicholson, was author of a work entitled A Word or two on the Flute, published in 1826, in which he treats of the various kinds of flutes, ancient and modern, their particular qualities, etc., and gives critical notices of the style of playing of the most eminent English and foreign performers on the instrument. [He also wrote The inland Concert-H casa (1829), and The German Flute Magazine (1835).]

JANIEWICZ, FELIX, violinist, a Polish gentleman, born at Wilna 1762. He went to Vienna in 1784 or 1785 to see Haydn and Mozart, and hear their works conducted by themselves. Jahn (iii 297) considers that an article of Mozart's for violin and orchestra, dated April 1, 1785 (K. 470) was written for Janiewicz. He had nearly made arrangements to study composition under Haydn, when he availed himself of her protection in order to hear the best violinists of the period, such as Nardini, Pugnani, and others, as well as the best singers. After three years in Italy he went to Paris, and appeared at the Concerts Spirituels and Olympians. Madame de Genlis procured him a pension from the Duc d'Orléans as a musician on the establishment of Mademoiselle d'Orléans, but on the reduction of the expenses of the Duke's court in 1790 he left Paris, and probably returned to Poland for a time. In 1792 he came to London, and made his début in February at Salomon's Concerts. He also appeared at Rauzzi's Bath concerts, visited Ireland several times, and for many years conducted the subscription concerts at Liverpool and Manchester. In 1800 he married Miss Breeze, a Liverpool lady, and settled in Liverpool, residing in upper Birkett Street, St. Anne's. In 1803 he had embarked in the music-selling and publishing business, taking a shop in Lord Street, and living in Lime Street. He issued sheet music, some of it being compositions and arrangements by himself. In 1810 he was in partnership with a person named Green, but this lasted only about a couple of years. He was one of the thirty members who originally formed the London Philharmonic Society, and was one of the leaders of the orchestra in its first season. In 1815 he settled in Edinburgh, till retaining his Liverpool business, which with shortly afterwards a partner named W. G. Weiss was introduced. He added greatly to his reputation in Scotland, and was leader of the orchestra in the festivals of 1815, 1819, and 1824, took leave of the public at a farewell concert in 1829, and died in Edinburgh in 1848.

His style was pure, warm, and full of feeling, with that great execution in octaves which La Motte first introduced into England. Besides this, he was an excellent conductor. Parke in his Musical Memoirs, and G. F. Graham in his account of the Edinburgh Musical Festival in 1815, speak of the elegant and finished execution of his Concertos. Some of these were published in Paris; but he considered his best work to be a set of three Trios for two Violins and Bass, published in London.

[It may be mentioned that while in England he invariably spelled his name as Yaniewicz, and under this spelling all contemporary references to himself and his children will be found.]

V. DE P.; with additions by K. K.

JANITSCHAREN-MUSIK, i.e., Janissaries' music. A term used by the Germans for what they also call Turkish music—the triangle, cymbals, and big drum (see Nos. 3 and 7 of the Finale of Beethoven's Choral Symphony). The Janissaries were abolished in 1825. Their band is said to have contained two large and three small oboes and one piccolo flute, all of very shrill character: one large and two small kettledrums, one big and three small long drums, three cymbals, and two triangles.

JANKO, PAUL VON, born June 2, 1856, at Totis in Hungary, was educated at the Polytechnicum and Conservatorium of Vienna, and at the Berlin University (1831-82). The invention by which his name is known will be found described under KEYBOARD; it is a great
practical improvement on a keyboard devised at first by an Englishman, and patented in 1845, but in spite of the successful tours about 1886, in which it was brought before the public by various pianists who had taken the trouble to master its peculiarities, it does not seem to have found much permanent favour. Since 1892 the inventor has lived in Constantinople. (Riemann's *Lexikon; Zeitschrift of the Int. Mus. Ges.* vol. v. pp. 165 and 321.)

**M. JANNACONI**, or JANNACONI, GIUSEPPE, born, probably in Rome, 1741, learnt music and singing from Rinaldini, G. Carpani, and Pisati, under whom, and through the special study of Palestrina, he perfected himself in the methods and traditions of the Roman school. In 1811, on the retirement of Zingarelli, he became maestro di cappella at St. Peter's, a post which he held during the rest of his life. He died from the effects of an apoplectic stroke, March 16, 1816, and was buried in the church of S. Simone e Giuda. A Requiem by his scholar Basili was sung for him on the 23rd. Baini was his pupil from 1802, and the friendship thus began lasted till the day of his death. Baini closed his eyes, and all that we know of Jannaconi is from his affectionate remembrance as embodied in his great work on Palestrina. It is strange that one who is said to have been so highly esteemed at home should be so little known abroad. His name does not appear in the Catalogue of the Sacred Harmonic Society, or the Euing Library, Glasgow, and the only published piece of music by him which the writer has been able to find is a motet in the second part of Hullah's *Part Music*. 'The voice of joy and health," adapted from a 'Lactamini in Domino," the autograph of which, with that of a Kyrie for two choirs, formed part of the excellent Library founded by Hullah for the use of his classes at St. Martin's Hall. This motet may not be more original than the words to which it is set, but it is full of spirit, and vocal to the last degree. Jannaconi was a voluminous writer; especially was he noted for his works for two, three, and four choirs. The catalogue of the Landseb Library at Rome does not exhibit his name, but Santini's collection of MSS. contained a mass and four other pieces, for four voices; fourteen masses, varying from eight to two voices, some with instruments; forty-two psalms, and a quantity of motets and other pieces for service, some with accompaniment, some without, and for various numbers of voices. [An 8-part mass is at Bologna, and a 16-part mass at Amsterdam. (See the *Quellen-Lexikon.*)] A MS. volume of six masses and a psalm forms No. 1811 in the Fétis Library at Brussels; the other pieces named at the foot of Fétis's article in the *Biographie* seem to have disappeared.

**JANNEQUIN, CLEMENT**, composer of the 16th century, by tradition a Frenchman, and one of the most distinguished followers, if not actually a pupil, of Joquin des Prés. There is no musician of the time of whose life we know less. No mention is made of his holding any court appointment or of his being connected with any church. We may perhaps guess that, like many other artists, he went in early life to Rome, and was attached to the Papal Chapel; for some of his MS. masses are said to be still preserved there, while they are unknown elsewhere. But he must soon have abandoned writing for the church, for among his published works two masses, 'L'avengle Dien' and 'La Bataille' (the latter, occurring in a collection of 1555, is founded on his famous work—see below—which appeared in 1545), and a single motet 'Congregati sunt,' seem almost nothing by the side of more than 200 secular compositions. Later in life, it is true, he writes again with sacred words, but in a far different style, setting to music eighty-two psalms of David, and 'The Proverbs of Solomon' (selon la verité Hebraique), leading us to conjecture that he may have become, like Goudimel, a convert to the reformed church, as Fétis thinks, or that he had never been a Christian at all, but was of Jewish origin and had only written a few masses as the inevitable trials of his contrapuntal skill. But apart from these vague speculations, it is certain that Jannequin trod a very different path from his contemporaries. Practically confining himself to secular music, he exhibited great originality in the choice and treatment of his subjects. He was the follower of Gombert in the art of writing descriptive music, and made it his speciality. Among his works of this class are 'La Bataille,' written to commemorate and describe the battle of Marignan, fought between the French and Swiss in 1515, to which composition Burney directed particular attention in his *History*, and which he has copied in his *Musical Extracts* (Brit. Mus. Add. MS. 11, 588). The fifth part was added by Phil. Verdelot. The first occurrence of Jannequin's name seems to be in a collection of thirty-one 4-part songs printed by Attaingnant in 1529, containing five by Jannequin. (M. Henri Expert has published a new edition.) They seem to have been reprinted in 1537, together with 'Chanson de la guerre,' 'La chasse,' 'Le chant des oyseaux,' 'La Louette' (sic), and 'Le Rossignol.' The famous song on the street-cries of Paris appeared first, with 'La Bataille,' in 1545.]

A second edition of some of Jannequin's works was published in Paris (according to Fétis) in the year 1559, and the composer must have been living at that time, for they were 'revezet corrigez par lui meme.'

In the same year, according to the same authority, Jannequin published his music to eighty-two psalms, with a dedication to the Queen of France, in which he speaks of his poverty and age. Old indeed he must have been, for the year after, 1560, Ronsard the poet, an
amateur of music and intimately connected with the musicians of his time, in writing a preface for a book of chansons published by Le Roy & Ballard at Paris, speaks of Jannequin with reverence enough as one of Josquin's celebrated disciples, but evidently regards him as a composer of a bygone age. [See the Quellen-Lexikon for MSS. and copies of the printed works of Jannequin.]

Jansa, Leopold, violonist and composer, was born March 23, 1795, at Wildenschwert in Bohemia. Though playing the violin from his childhood, he entered the University of Vienna in 1817 to study law according to the wish of his father, but very soon gave up the law and devoted himself to music. After a few years he appeared successfully as a violinist in public; in 1824 became member of the Imperial Band, and in 1834 Conductor of Music at the University of Vienna. Jansa, though a good player and sound musician, was not a great virtuoso. In 1849 he lost his appointment in Vienna for having assisted at a concert in London for the benefit of the Hungarian Refugees. He then remained in London and gained a good position as teacher. He appeared for the last time in public, at the age of seventy-six, in 1871 at Vienna, and died there, Jan. 24, 1875.

The most eminent of his pupils is Lady Hallé. Jansa published a considerable number of works for the violin:—four concertos; a concertante for two violins; violin duets; eight string-quartets, etc.—all written in a fluent, musically style, but with no claim to originality. His duets are much valued by all violin-teachers.

P. D.

JAPANESE MUSIC. The patient and scholarly researches that have been made by modern travellers into the music of certain nations that were formerly supposed capable of nothing but ill-regulated noises, have brought to light the existence of a considerable degree of science in the music of many countries; in none more remarkably than in Japan, where it is fairly clear that the scale most commonly in use is built of intervals that are easily accepted by Western ears, while the compositions, whatever their origin or antiquity may have been, are evidently governed by rules of symmetry, balance, and design in general, that are surprisingly similar to those of European art. How far harmony in any real sense can be predicated of Japanese music seems at present a little uncertain; but the questions of the scales, the tuning of the various instruments, and the form and design of the music in use, have been thoroughly gone into in the admirable Music and Musical Instruments of Japan, by F. T. Piggott (1895). Upon that book the following information is based, and readers who are interested in the subject must be referred to it for more details than could find a place in a dictionary. It must suffice here to describe the chief instruments and the scales deducible from their tuning.

The most important instrument is the Koro, a thirteen-stringed instrument, having some analogies with the harp, but presenting many peculiarities in which it is quite unique. The strings are stretched along a narrow sounding-board, slightly convex, a form which no doubt originated in the natural shape of the tree from which it was cut. The sounding-board is hollowed out inside, and the strings are stretched between permanent bridges or nuts at each end of the instrument, all the strings being the same size and length. The difference in pitch is made by small movable bridges, one for each string, which raise them to a height of rather more than two inches from the sounding-board. The position of these bridges is sometimes rapidly changed during the performance, in order to obtain transposition from one of the scales to another. Besides this, the fingers of the performer's left hand are used to press the string on that side of the bridge which is furthest away from the end that is plucked by the fingers of the right hand. This raises the pitch by one or two semitones, as is required. It also enables the player to execute a characteristic little ornament almost exactly like the 'prall-triller' of the eighteenth-century music. The plucking of the strings is performed with the aid of small ivory or tortoise-shell appendages, or plecra, called tsunai, fixed to the performer's fingers, and the tone produced is remarkable for sonority and even solemnity. The length of the instrument is a little over six feet, it is laid on the ground, and the player squats near the upper end of it. The strings are tuned in a variety of ways, but the three commonest are all more or less accurately to be assigned to a pentatonic division of the octave. In the most usual tuning, that called Hirajoshi, the thirteen strings stand thus:—

\[c^\flat, g^\flat, a, c^\sharp, d^\flat, g^\flat, d', c^\sharp d', f^\flat g^\flat\]

and as a sign of proficiency, the owner of a 'third grade diploma' is permitted to tune the first string an octave lower, to \(c^\flat\). The first and second strings are the same in all tunings, but in the system called 'Knnoi,' strings 3, 4, and 6 are tuned to \(g, b,\) and \(d^\flat\) natural, while in that called 'Iwato' the fifth string becomes \(c^\flat\) natural (in spite of the \(c^\flat\) sharp of the first string), and the sixth is \(c'\). The \(g, a,\) and \(b\) of the 'Knnoi' tuning remain in this. Several other varieties are given by Mr. Piggott, some of which are formed by combining these.

The tuning of the Biwa, a four-stringed instrument of wood, rather like a heavy wooden lute, but with a flat back, with from two to five fixed frets, played with a 'bach' or broad wooden plectrum, varies considerably according to the different systems. The first string is generally tuned to \(B,\) but \(F\) sharp and \(G\) sharp
occur in certain modes; the second is generally e sharp, and the third and fourth nearly always f sharp and b.

The Genkin, another plucked instrument, has a circular body, a little like a banjo, but of wood; there are nine frets and four strings, tuned in pairs to the notes e and g'. The interesting peculiarity of this instrument is that the frets give the notes of the hexachord, or the first six notes of our major scale. The first and second strings thus give e', e'', f', g', a', c'; d', f''; the second and third strings give g', a', b', c', d', e', g', a', c''.

The Samisen is another plucked instrument, but without frets; it is on the principle of the lute in so far that it is hollowed out, and the belly is of snake or cat-skin; there are three strings, tuned so as to conform with the Hiraʃōji tuning of the Koto, as follows: e', f', g'; e', f', g'; e', f' sharp, c' sharp, f' sharp; e', f' sharp, g' sharp, c'' sharp; or g' sharp, c' sharp, f' sharp.

The Kôkyû, a smaller instrument than the Samisen, is very similar to it, except that it is played with a bow of loose hairs, and tuned normally to g', sharp, e' sharp, f'' sharp; there are four strings, the highest one being reduplicated.

As Mr. Pigott says in regard to the singing of Japanese musicians, the flutes are difficult to appreciate, owing to the presence of a sort of 'weird quarter-tones' which the musicians are specially taught to acquire; he gives us no particulars as to the compass or scale of the various flutes in use, but his description of the shô, an instrument nearly allied to the Chinese cheng, makes it clear that it possesses a scale similar to that of A major complete, together with a G and C natural near the middle of its compass. It is a kind of mouth-organ, in which bamboo pipes of various lengths are set in a wind-box held in the hands; through this the wind is inhaled, each pipe having a small metal reed in its base, which is silent until the finger-holes corresponding to it is closed. Thus it is possible to play three or even four notes together, and the existence of a series of chords, taken by Mr. Pigott from tables prepared by the Educational Department in Tokyo, shows that some idea of harmony is present. Of the varieties of drums and gongs used in Japan the author has much to say, but his description of the instruments already referred to is enough to establish his opinion that the normal scale of the Japanese is a good deal more closely assimilated to European scales than was formerly supposed.

It is strange that though most, if not all, of the instruments have their counterparts in China, and many of them came from China in the first instance, the Chinese music is far more difficult to analyse, and the system is far less logically developed than is the case in Japan.

M. JAPART, JEAN, a contemporary of Josquin des Prés, and said to have been a singer in the service of the Duke of Ferrara. His known compositions consist exclusively of Chansons, several of which appear in the earlier publications of Petrucci 1501-3; others are still in MS. in Roman Archives. He is fond of combining together different texts and melodies, as for instance 'Vrai dieu d'âmeurs' with the text and melody of a Church Litany. He sometimes makes his tenor consist of the constant repetition of one short motive, a practice of which there are several later examples in the Motets of Orlando Lassus. In the art of the Chanson Ambros and Eitner represent Japart as one of the best masters of the time. See Ambros, Geschichte der Musik, ii. pp. 269-81. J. N. JARNOWICK —whose real name, as he wrote it in Clement's Album, was Giovanni Mane Giornovich, though commonly given as above— was one of the eminent violin players of the 18th century; born at Palermo, 1745, and a scholar of the famous Lolli. He made his debut in Paris in 1770 at one of the Concerts Spirituels, and for some years was all the rage in that capital. Owing to some misbehaviour he left Paris in 1779, and entered the band of the King of Prussia, but his disputes with Japart drove him thence in 1782. He then visited Austria, Poland, Russia, and Sweden, and in 1791 arrived in London, where he gave his first concert on May 4. He had great success here, both as player and conductor. His insolence and conceit seem to have been unbounded, and to have brought him into disastrous collision with Viotti, a far greater artist than himself, and with J. B. Cramer—who went the length of calling him out, a challenge which Jarnowick would not accept—and even led him to some gross misconduct in the presence of the King and Duke of York. He lived at Hamburg from 1796 to 1802, and then went to St. Petersburg, where he died Nov. 21, 1804—it is said during a game of billiards. From the testimony of Kelly, Dittersdorf, and other musicians, it is not difficult to gather the characteristics of Jarnowick's playing. His tone was fine, though not strong; he played with accuracy and finish, and always well in tune. His bow-hand was light, and there was a grace and spirit about the whole performance, and an absence of effort, which put the hearer quite at ease. These qualities are not the highest, but they are highly desirable, and they seem to have been possessed in large measure by Jarnowick. In mind and morals he was a true pupil of Lolli. He wrote about eighteen violin concertos, three string quartets, and duet and solo for the violin. [Dragonetti is said to have declared that his violin-playing was the most elegant he ever heard before Paganini's, but that it lacked power. Jarnowick lived for some time in Edinburgh, and several of his compositions were published by the Gow family. One, on a single
sheet, is 'Mr. Jarnovici's Reel, composed by himself,' circ. 1800. 'Jarnovici's Hornpipe' was published in Gow's Fourth Collection of Strathspey Reels, 1800. F. K."

JAY, John George Henry, Mus.D., born in Essex, Nov. 27, 1770, after receiving rudimentary instruction from John Hindmarsh, violinist, and Francis Phillips, violoncellist, was sent to the continent to complete his education. He became an excellent violinist. He returned to England in 1800, settled in London, and established himself as a teacher. He graduated as Mus.B. at Oxford in 1809, and Mus.D. at Cambridge in 1811, and was an honorary member of the Royal Academy of Music. He published several compositions for the pianoforte, and died in London, Sept. 17, 1849. His eldest daughter was a harpist and his second a pianist. His son, John (born 1812, died May 31, 1889), was a good violinist. w. n. h. 

Jean de Paris. Opera-comique in two acts; music by Boieldieu. Produced at the Théâtre Feydian, April 4, 1812. c. 

Jeanie Deans. Opera in four acts, libretto by Joseph Bennett, music by Hanish MacCunn; produced at the Lyceum Theatre, Edinburgh, Nov. 15, 1894.

Jebb, Rev. John, D.D. [eldest son of Richard Jebb, the Irish judge, and nephew of Bishop Jebb of Limerick; he was born in Dublin, and was educated at Winchester and at Trinity College, Dublin. He graduated B.A. at Dublin University in 1826, and M.A. in 1829. After holding a living in Ireland he was appointed prebendary in Limerick Cathedral in 1831, and became rector of Peterstow, Herefordshire, in 1843; in 1858 he was appointed a prebendary in Hereford Cathedral, and became canon residentiary in 1870. He died at Peterstow, Jan. 8, 1886.] His works include Three Lectures on the Cathedral Service of the United Church of England and Ireland, delivered at Leeds in 1841, and published in 1843; The Choral Service of the United Church of England and Ireland, being an Inquiry into the Liturgical System of the Cathedral and Collegiate Foundations of the Anglican Communion, 8vo, 1849; The Choral Responses and Litaniées of the United Church of England and Ireland, 2 vols. fol. 1847-57 (an interesting and valuable collection); and Catalogue of Ancient Choir Books at St. Peter's College, Cambridge. He edited Thomas Causton's Venite exultemus and Communion Service in 1862. w. h. h.; additions from Dict. of Nat. Biog. and W. H. Grattan Flood, Esq.

Jedliczka, Ernst, an eminent pianoforte teacher, born at Poltava in South Russia, June 5, 1855; his father was his first teacher in music, and after finishing his general education at the St. Petersburg University, he entered the Moscow Conservatorium, and studied under Nicolas Rubinstein and Tschaikovsky. He was appointed professor at the Conservatorium, and held the post from 1881 to 1888, when he rejoined the staff of the Kindlworth Institute in Berlin, and in 1897 became pianoforte professor in the Stern Conservatorium of the same city. He had a rare gift of imparting knowledge, and was a remarkably successful teacher. He died at Berlin, August 6, 1901. m.

Jeffries, George, steward to Lord Hatton, of Kirby, Northamptonshire (where he had lands of his own), and organist to Charles I. at Oxford in 1643, composed many anthems and motets, both English and Latin, still extant in MS. Several are in the Aldrich collection at Christ Church, Oxford, and nearly one hundred—eighty of them in the composer's autograph—are in the library of the Sacred Harmonic Society. His son Christopher, student of Christ Church, was a good organist. [See Life and Times of Antony Wood (Oxford Historical Society), vol. i. p. 274.] w. n. h.

Jeffries, Stephen, born 1660, was a chorister of Salisbury Cathedral under Michael Wise. In 1680 he was appointed organist of Gloucester Cathedral. He composed a peculiar melody for the Cathedral chimes, printed in Hawkins's History, ch. 160. He died in 1712. w. h. h.

Jenkins, John, born at Maidstone in 1592, became a musician in early life. He was patronised by two Norfolk gentlemen, Dering (or Deerness) and Sir Hamon L'Estrange, and resided in the family of the latter for a great portion of his life. [From 1660 to 1666 or the following year he lived in the family of Lord North, to whose sons he taught music. His second of his pupils, Roger North, gives a long account of him in his Memoirs of Music (1846), and in his Autobiography (1887) are to be found many allusions to him. On p. 73 he says, 'He was a man of much easier temper than any of his faculty, he was neither conceited nor morose, but much a gentleman. . . He was an innovator in the days of Alphonso, Lupe, Coreperro, and Lawes, . . . and superinduced a more airy sort of composition, wherein he had a fluent and happy fancy.'] He was a performer on the lute and lyra-viol and other bowed instruments, and one of the musicians to Charles I. and Charles II. He was a voluminous composer of Fancies, some for viols and others for the organ; he also produced some light pieces which he called Rants. Of these 'The Mitter Rant,' an especial favourite, was printed in Playford's 'Musick's Handmaid,' 1678, and other publications of the period. Two others by him, 'The Fleece Tavern Rant,' and 'The Peterborough Rant,' are in Playford's 'Apollo's Banquet,' 1690. Another popular piece by him was 'The Lady Katherine Anley's Bells,' or, The Five Bell Concert,' first printed in Playford's 'Courtly Masqueing Ayres,' 1662. His vocal compositions comprise an Elegy on the death of William Lawes,
printed at the end of H. and W. Lawes's 'Choice Psalms,' 1648 ; 'Theophilia, or, Love's Sacrifice; a Divine Poem by Edward Enlowe,' Esq., several parts thereof set to fit airs by Mr. J. Jenkins, 1652; two rounds, 'A boat, a boat,' and 'Come, pretty maidens,' in Hilton's 'Catch that Catch Can,' 1652; some songs, etc., in 'Select Ayres and Dialogues,' 1659; and 'The Musical Companion,' 1672; and some anthems.

He published in 1690 'Twelve Sonatas for two Violins and a Base with a Thorough Base for the Organ or Theorbo' (reprinted at Amsterdam, 1664), the first of the kind produced by an Englishman. His numerous 'Fancies' were not printed. Many MS. copies of them, however, exist, a large number being at Christ Church, Oxford. J. S. Smith included many of Jenkins's compositions (amongst them 'The Mitter Rant' and 'Lady Audrey's Bells') in his Musica Antiqua (1812). Jenkins resided during the latter years of his life in the family of Sir Philip Wodehouse, Bart., at Kimberley, Norfolk, where he died Oct. 27, 1678. He was buried, Oct. 29, in Kimberley Church.

JENNY BELL. An opéra-comique in three acts; words by Scribe, music by Aubry. Produced at the Opéra Comique, Paris, June 2, 1855.

JENSEN, ADOLPH, composer, born Jan. 12, 1837, at Königsberg, was a pupil of Ehler and F. Marpurg. In 1856 he visited Russia; but returned the next year to Germany, and was for a short time capellmeister at Posen. He paid a two years' visit to Copenhagen (1858-60), where he became intimate with Gade. 1860 to 1866 were spent in his native place, and to this time a large proportion of his works (opp. 6-33) are due. From 1866 to 1885 he was attached to Tausig's school as teacher of the piano, and from that time resided, on account of his health, at Dresden, Graz, and other places in South Germany. He died at Baden-Baden, Jan. 26, 1879. The score of an opera, 'Turandot,' was found after his death; it was finished by W. Kienzl.

Jensen was an enthusiast for Schumann, and for some months before Schumann's death was in close correspondence with him. His genius is essentially that of a song-writer—full of delicate, tender feeling, but with no great heights or depths.

The list of Jensen's compositions is as follows:—

1. 'Jaglachen,' for pf.
2. 'Der bescheidene,' two romances for pf.
3. 'Wanderbilder,' for pf.
4. Three pf. duets.
5. Prozession and Romance for pf.
6. Four Impromptus, for pf.
7. Songs from the Spanisches Liederbuch. (Geibel and Heyse.)
8. Twelve Songs.
10. Sonata in F sharp minor, pf.
11. 'Jephthe's Todtcher,' for solo, choir, and orchestra.
12. 'Der Faschingsspiegel' (Mozart), for chorus and orchestra. (1812).
15. Song-cycle, 'Dolorosa,' from Chamisso's Thieren.
16. Three Valse-Caprices, for pf.
17. Etudes for pf.
18. Lieder, and Tanz, twenty little pieces for pf.
19. Alt Heidelberg, concert aria for bass or baritone.
20. Six Songs.
21. 'Deutsche Suite' in B minor for pf.
22. Impromptus for pf.
23. Two nocturnes, for pf.
24. Two Songs.
25. Song-cycle, 'Gundaurms' (from Scheffel).
27. Three pf. pieces.
28. Three 'Lustige' for pf. (solo or duet)
29. Seven pf. pieces, 'Kretztoni.'
30. Hochzeitstakten for pf.
31. Landler aus Berchtesgaden for pf.
32. 'Weil-Stift' scherzo for pf.
33. Erinnerungen, five pf. pieces.
34. Seven Songs from Surna.
35. Seven Songs from Moore.
36. Four ballads from Allan Cunningham.
37. Six Songs from Scott.
38. Six Songs from Teynong and Mrs. Hemans.
39. 'Donaldi Cariel set wieder da' (from Scott), for tenor solo, male choir, and orchestra.
40. Two Songs.
41. 'Solves carmenes,que,' for pf.
42. Six Songs.
43. Four Songs from Herder's Stimmen der Völker.
44. 'Abendmusik,' pf. duet.
45. Lebensbilder, for pf. duet.
46. Six Songs.
47. Silhouetten, for pf. duet.

Posthumously published.

48. Three Songs for female choir and pf.
49. Two Miscellanea, for tenor with accompaniment for strings and drums.
50. Two pf. pieces.

Without Opus-numbers.

Three sets of Songs.
51. Concert-variation in E minor.
52. Keisler's Toccatenstück (see above).
53. 'Ländliche Festmusik' for pf. duet.
54. 'Volkslieder,' for a quartette.
55. 'Adonis' (An Ode to Adonis, for solo, choir, and orchestra, edited by Gustave Jensen, performed by the London Violin Society).
56. 'Tannrodet,' opera (see above).

(The above list in taken from the monograph on Jensen, by Arnold Negel, published in 1900 in Berlin, as one of Hemans's series, Berühmte Musiker.)

JENSEN, GUSTAV, brother of the above, born Dec. 25, 1843, at Königsberg, was a pupil of his father and brother, subsequently studied with Dehn and Laub, and under Joachim's guidance became a capable violinist; he was appointed teacher of harmony and counterpoint at the Cologne Conservatorium, in 1872, and died there, Nov. 26, 1895. He wrote a good deal of concerted chamber music, and his useful editions of old violin music, under such titles as 'Classische Violinmusik,' are well known and generally esteemed.

JEPHTHA. (1) Oratorio by Giacomo Carissimi; first performed in England at St. Martin's Hall, London, under John Hullah's direction, May 21, 1851. (2) Handel's last oratorio. His blindness came on during its composition and delayed it. It was begun Jan. 21, and finished Aug. 30, 1751. The words were by Dr. Morell. Produced at Covent Garden, Feb. 26, 1752. Revived by the Sacred Harmonic Society, April 7, 1841. [See Quaver.] (3) 'Jefte
in Masfa' (Jephthah at Mizpeh) was the title of a short oratorio by Semplice, set by Barthélé- lemon at Florence in 1776; performed there, in Rome—where a chorus from it even penetrated to the Pope's chapel, and procured the composer two gold medals—and in London in 1779 and 1782. A copy of it is in the Library of the Royal College of Music. (4) 'Jephtha and his Daughter.' An oratorio in two parts; the words adapted from the Bible, the music by C. Reinh- thaler. Produced in England by Hullah at St. Martin's Hall, April 16, 1856. 6.

JERUSALEM. (1) Grand opera in four acts; music by Verdi, the words by Royer and Waez; being a French adaptation of LOM- BARDI. Produced at the Académie, Paris, Nov. 26, 1847. (2) A Sacred Oratorio in three parts; the words selected from the Bible by W. Sancroft Holmes, the music by H. H. Pierson. Produced at Norwich Festival, Sept. 23, 1852. 6.

JESSONDA. A grand German opera in three acts; the plot from Lenôtre's novel 'La Veuve du Malabar.' 1 Words by Edmond Gehe, music by Spohr. Produced at Cassel, July 28, 1823; in London, at St. James's Theatre (German company), June 18, 1840; in Italian, at Covent Garden, Aug. 6, 1853. 6.

JEUNE HENRI, LE. Opéra-comique in two acts; libretto by Bouilly, music by Méhul. Produced at the Théâtre Favart, May 1, 1797. The overture, 'La Chasse du Jeune Henri,' has always been a favourite in France. The piece was damned, but the overture was redesigned on the fall of the curtain, having been already encored at the commencement. 6.

JEUNE, LE. See LE JEUNE.

JEUX D'ANCHES. The French name for the Reed Stops of an Organ.

JEWESS, THE. See JUIVE, LA.

JEWETT, or JEWITT, RANDOLPH (or RANDALL) (1603-75). A church composer and organist of some eminence. He was probably born at Chester, where we find a 'Randall Jewet' as a chorister, from 1612 to 1615; or he possibly may have been a son of John Jewett, who was precentor's vicar at Christ Church, Dublin, in 1619.

In 1631 Randolph Jewett succeeded Thomas Bateson (ob. 1630) as organist of Christ Church Cathedral, Dublin, and in the same year was also appointed organist of St. Patrick's Cathedral, which post he held, with the organistship of Christ Church, until 1639. While organist of Christ Church he seems to have introduced orchestral music into the cathedral service. The rather puritanically inclined Bishop Bedell was much displeased with the pomposity service at that cathedral, which was attended and celebrated with all manner of instrumental music, as organs, sackbuts, cornets, viols, etc., as if it had been at the dedication of Nebuchadnezzar's
golden image in the plain of Dura.' This description is in part borne out by a chapter act of 1637, whereby the proctor was directed to pay 'to the two sackbuts and two cornets for their service and attendance in this Cathed- drall the sume of twenty nobles each at or before Easter next ensuing.'

In 1639 Jewett was succeeded in the post of organist of Christ Church by Dr. Benjamin Rogers. In the same year he was deprived of the choral vicarage which he held in St. Patrick's by the archbishop for not being in priest's orders. He was restored in 1641. In 1642 we find him at Chester, whither he was brought from Dublin in connection with some special services on the occasion of a visit from the King. In 1643-44 he was organist of Chester Cathedral, and as the cathedral accounts from 1644 to 1664 are missing, it is probable that he remained there until 1646, when he returned to Dublin, and was appointed a vicar choral of Christ Church. This appointment was made on a letter of recommendation from the Lord Lieu- tenant (Lord Ormonde), which begins 'Having understood how much this bearer, Randall Jewett, hath suffered for his good affections towards His Majesty's Service, and how ably he is qualified in his profession, and for the quire,' etc. In the same year he was also appointed vicar choral of St. Patrick's. He probably returned to England on the suppression of the cathedral establishments under the Common- wealth, as we next find him at St. Paul's, where he was almoner in 1660, and in 1661 minor canon and junior cardinal (an ancient office carrying no duties, and held by a minor canon). In 1666 he was appointed organist, master to the chori- sters, and lay vicar of Winchester Cathedral, where he remained until his death in 1675. His burying-place in the north transept of the cathed- ral is still marked by a stone bearing the following inscription:-

H. S. E.
RANDELE THOMAS JEWET
Generous
ob. Jul. 3 oct. 72 Don
1673.

He was succeeded at Winchester by John Reading (the composer of the tune 'Adeste Fideles,' and the 'Tulce Domnum' of Winchester College). Jewett is stated by Hawkins (Hist.) to have taken out his bachelor's degree in music at Trinity College, Dublin, but no evidence on the point is furnished by the college books. The words of five anthems by Jewett appear in the book of 'Anthems to be sung in the Cathedral Church of the Holy and United Trinity in Dublin,' printed 1662. (See Clifforcd, vol. i. p. 558.) Only one of these is now extant, a Funeral Anthem, 'I heard a Voice from Heaven,' for solo and chorus, preserved in Fulford's collection, vol. iii. pp. 91-93. Mr. J. S. Rumpus has an old cathedral book containing the bass voice parts only of some of these anthems, and
also of a short Evening Service by Jewett for men's voices. Hawkins describes Jewett as 'a Scholar of Orlando Gibbons,' and as 'having acquired great esteem for his skill in his profession.' His music was probably sung a good deal in the English cathedrals during the latter part of the 17th century, as the first edition of Cliffor's Anthem book (1662) contains two of his anthems, and the second edition (1664) contains four.

Legalities.—Chapter Acts of Christ Church and St. Patrick's Cathedrals, Dublin; Cotton's *Meditationes Hiberniae*; information from Drs. J. C. Bridge and A. H. Mann, Rev. Lewis Gilbertson, Rev. F. T. Madge, Messrs. J. S. Bampus, Wm. Prendergast, Mus.B., Charles Macquhren, and others. L. X'C. L. D.

JEWS-HARP, or ORS-TRUMP (the latter being the earlier name). In French it is called *Guimbardé,* and in German *Maultrommel,* *Muet-harmonica,* or *Brummeisen* (i.e. buzzing-iron). In Scotland, where it is much used, it is called *Trump* or trumpet, [agreeing with the French *tromp* (Littre), a name now mostly displaced by *guimbardé.* It has been conjectured that the instrument derived its name from being made and sold in England by Jews, or supposed to be so. See Notes and Queries, Oct. 23, 1897, p. 322, and Murray's *Dictionary.*] This simple instrument consists of an elastic steel tongue, riveted at one end to a frame of brass or iron, similar in form to certain pocket corkscrews, of which the screw turns up on a hinge. The free end of the tongue is bent outwards, at a right angle, so as to allow the finger to strike it when the instrument is placed to the mouth, and firmly supported by the pressure of the frame against the teeth.

A column of air may vibrate by reciprocation with a body whose vibrations are isochronous with its own, or when the number of its vibrations are any multiple of those of the original sounding body. On this law depends the explanation of the production of the sounds produced by the Jew's-harp. The vibration of the tongue itself corresponds with a very low sound; but the cavity of the mouth is capable of various alterations; and when the number of vibrations of the contained volume of air is any multiple of the original vibrations of the tongue, a sound is produced corresponding to the modification of the oral cavity. Thus, if the primitive sound of the tongue is C, the series of reciprocated sounds would be C, g, d, d', g', d', e, d", e", etc. On the usual Jew's-harp the first three cannot be produced, the cavity of the mouth being too small, but by using two or more instruments in different keys, a complete scale may be obtained, and extremely original and beautiful effects produced.

The elucidation of this subject is due to the ingenious researches of Professor Wheatstone, which may be found in the *Quarterly Journal of Science, Literature, and Art,* for the year 1828, first part, of which the above is a condensed account.

A soldier of Frederick the Great of Prussia so charmed the king by his performance on two Jew's-harps that he gave him his discharge, together with a present of money, and he subsequently amass a fortune by playing at concerts.

In 1827 and 1828 Charles Eulenstein (1802-1890) appeared in London, [see vol. i. p. 795], and by using sixteen Jew's-harps produced extraordinary effects.

V. D. F.

[The foregoing account is interesting, as being based upon Sir Charles Wheatstone's views. The underlying assumption, however, that the tongue of the Jew's-harp has a simple harmonic vibration, is probably erroneous. A light reed-tongue, or tuning-fork, vibrates in a manner departing from the simple harmonic, giving a wave-form compounded of harmonics. These various harmonic partials in the wave can each be reinforced by a tube or cavity of a suitable size to 'reciprocate' or give resonance to them.]

JHAN, MAESTRE or MESTRE JAN (1519-43), was maestro di cappella to the Duke Ercole of Ferrara, according to the title-page of his *Madrigali,* published 1541. The title-page of the *Symphonia,* 1543, has led to a supposition that Maestre Jan of Ferrara was the same person as Joannes Gallus. Fétis (Biog. Univ.) was of opinion that Maestre Jan was identical with Jhan Gero, but there seems to be no definite evidence on this point (see GERO). The following list of compositions has been largely taken from Eitner's *Musik-Sammlungwerke,* 1877, and Vogel's *Wöltliche Volckmusik Italens,* 1892.

1. Il primo libro de i Madrigali, di Maestre Jan, Maestro di Cappella, della corte di Ferrara; dedi a Signor Giovanni de Palma, de altri Excelentissimi Autori. Nuovamente posta in luce, 1641. Non sine privilegio. Raccolto Venetiis, apud Antonium Gardane, J. C. 4to. [See also Galitzin Catalogue, No. 1378.] It contains five madrigals for four voices by Maestre Jan:—"Amor non repress," 'Amor non refusero'; 'Amore non fermo'; 'Quando nascetti'; 'Madonna, la tua musica.' Four part-books in Vienna Musikothek, etc.

7. Di i madrigali di Verdoto et de altri eccell. autori a 5 voc. Lib. 2. Venetia: Scoctol, 1538. Maestro Jan:—'Altri non æ il tuo amore,' 'Amor cede ai Dio;' 'Madonna se d'amor e faceto;' 'Sperare boh.' 'Il mio amore.' The same work was published without date by Scotto, about 1537.

8. Veridotte è più bello di più bella musica... madrigali a 5 voce: Veneto: Ant. Gardane, 1641. Maestre Jan:—'Deh perché non vi voli;' 'Utrem di mia vita;' 'Madonna i prieghi miel;' 'Non vi lasse roe'; 'Quando nasceti.' The two last are here without composer's name, but are by Maestre Jan in the 1540 edition, which contains 'Madonna d'Amor vostro' and the same to Veridote. In the 1541 edition only three appear: 'Deh perché,' 'Non vi lasse re;' 'Quando nasceti.'

9. Trionfal et magnifici. Ferrara, 1588. Dedicated to 'Dona Ferrarina et Carissimu Ducis Herculi Estensi.' Contains three madrigali by Maestre Jan for four voices.
JOACHIM 533

JIG

Concert in Ernst's fantasy on 'Otello'; and in the following spring paid his first visit to England, appearing first at Drury Lane Theatre, March 28, 1844, at a benefit for Bunm, the impresario; and at a concert of Benedict's on May 19; and ultimately at the Philharmonic Concert of May 27. [He won the unqualified enlogies of the press and the public for the perfection of his technique, his wonderful tone, and the musical maturity and intelligence he revealed.] On Nov. 25 of the same year, he took part in a performance at the Gewandhaus, Leipzig, of Manner's Concertante for four violins with Ernst, Bazzini, and David, all very much his seniors. The wish of his parents, and his own earnest disposition, prevented his entering at once on the career of a virtuoso. For several years Joachim remained at Leipzic, continuing his musical studies under Mendelssohn's powerful influence, and studying with David most of these classical works for the violin—the Concertos of Beethoven, Mendelssohn, and Spohr, the solo sonatas, etc.—which remained the staple of his repertoire. At the same time his general education was carefully attended to, and it may truly be said that Joachim's character, both as a musician and as a man, was developed and directed for life during the years which he spent at Leipzic. He already envisaged that thorough uprightness, that firmness of character and earnestness of purpose, and that intense dislike of all that is superficial or untrue in art, which have made him not only an artist of the first rank, but a great moral power in the musical life of our days.

Joachim remained at Leipzic till October 1850, for some time side by side with David as leader of the Gewandhaus orchestra, but also from time to time travelling and playing with ever-increasing success in Germany and England. He repeated his visits to England in 1847, 1849, 1852, 1858, 1859, 1862, and annually ever since. His regular appearance at the Monday Popular, the Crystal Palace, and other concerts in London and the principal provincial towns was a regular feature of the musical life in England. His continued success as a soloist and quartet-player, extending now over a period of more than sixty years, is probably without parallel.

In 1849 Joachim accepted the post of leader of the Grand Duke's band at Weimar, where Liszt, who had already abandoned his career as a virtuoso, had settled and was conducting operas and concerts. His stay in Weimar was not, however, of long duration. For one who had grown up under the influence of Mendelssohn, and in his feeling for music and art in general was much in sympathy with Schumann, the revolutionary tendencies of the Weimar school could have but a passing attraction. [The history of Joachim's reunion of the tenets of the 'new school' of Liszt and his friends, and the courteous letters in which his own
JOACHIM

convictions are expressed, may be read in Moser's admirable Joseph Joachim.] In 1853 he accepted the post of Conductor of Concerts and Solo-Violinist to the King of Hanover, which he retained till 1866. During his stay at Hanover (June 10, 1863) he married Amalia Weiss, the celebrated contralto singer. [See Weiss.] In 1868 he went to Berlin to become the head of a newly established department of the Royal Academy of Arts—the 'Hochschule für ausübende Tonkunst' (High School for Musical Execution,—as distinct from composition, for which there was already a department in existence). Joachim entered heart and soul into the arduous task of organising and starting this new institution, which under his energy and devotion not only soon exhibited its vitality, but in a very few years rivalled, and in some respects even excelled, similar older institutions. Up to this period Joachim had been a teacher mainly by his example, henceforth he is surrounded by a host of actual pupils, to whom, with a disinterestedness beyond praise, he imparts the results of his experience, and into whom he instils that spirit of manly and unselfish devotion to art which, in conjunction with his great natural gifts, really contains the secret of his long-continued success. In his present sphere of action Joachim's beneficent influence, encouraging what is true and earnest, and disregarding, and, if necessary, opposing what is empty, mean, and superficial in music, can hardly be too highly estimated. [For the history and constitution of the famous JOACHIM QUARTET see the next article.] It will readily be believed that in addition to the universal admiration of the musical world, numerous marks of distinction, orders of knighthood from German and other sovereign princes, and honorary degrees have been conferred on Joachim. From the University of Cambridge he received the honorary degree of Doctor of Music on the 8th March, 1877. No artist ever sought less after such things, no artist better deserved them. [The fiftieth anniversary of his entry into public life was celebrated by various memorable performances in Berlin in March 1889; and the sixtieth anniversary of his first appearance in England was the occasion of a very interesting concert in the Queen's Hall on May 16, 1904, at which he played the Beethoven Concerto, and conducted his own overture to 'Henry IV.' His portrait, painted by J. Sargent, R.A., was presented to him by the Right Hon. A. J. Balfour.]

As to his style of playing, perhaps nothing more to the point can be said, than that his interpretations of Beethoven's concerto and great quartets and of Bach's solo sonatas are universally recognised as models, and that his style of playing appears especially adapted to render compositions of the purest and most elevated style. A master of technique, surpassed by no one, he uses his powers of execution exclusively for the interpretation of the best music. If in later years his strict adherence to this practice and consequent exclusion of all virtuoso-pieces has resulted in a certain limitation of répertoire, it must still be granted that that répertoire is after all richer than that of almost any other eminent violinist, comprising as it does the concertos of Bach, Beethoven, Mendelssohn, Brahms; four or five of Spohr's, Viotti's twenty-second, his own Hungarian, Bach's solos, the two romances of Beethoven, and in addition the whole range of classical chamber-music.

Purity of style, without pedantry; fidelity of interpretation combined with a powerful individuality—such are the main characteristics of Joachim the violinist and the musician. [An interesting and very able analysis of his playing is to be found in the Musical Gazette for March and July 1900, under the title 'Performance and Personality.]

As a composer Joachim is essentially a follower of Schumann. Most of his works are of a grave, melancholic character,—all of them, if need hardly be said, are earnest in purpose and aim at the ideal. Undoubtedly his most important and most successful work is the Hungarian Concerto (op. 11), a creation of real grandeur, built up in noble symphonic proportions, which will hold its place in the first rank of masterpieces for the violin. The following is a list of his published compositions:—

1. Andantino and Allegro Scherzo; Violin and Orchestra.
2. 5 Stücke (Romanze, Fantasietto, Prallrhythmus) for Violin and Piano, Concerto in minor; 'in einem Satze' for Violin and Orchestra.
3. Overture to 'Hamlet,' for Orchestra.
4. 3 Stücke (Liederetüten, Abendglocken, Rolladen) for Violin and Piano.
5. Overture to Grimm's 'Der Meister.'
6. Overture to 'Henry IV.'
7. Overture suggested by two comedies of Goethe.
8. Hebrew Melodies, for Violin and Piano.
9. Variations on 'Demetrius I,' and 'Henry IV,' and 'Abendglocken,' for Violin and Piano.
10. Variations on an original Theme for Violin and Piano.
11. Hungarian Concerto for Violin and Orchestra.
13. Overture, in commemoration of Kielce, for Orchestra.
14. Scene der Marta (from Schiller's unfinished play of Demetrius), for Contralto Solo and Orchestra.

[Joseph Joachim, ein Lebensbild, by Andreas Moser, was published in 1898; an English translation with additions by Lilla Durham appeared in 1901.]

JOACHIM QUARTET. This famous organisation was founded at Berlin in the autumn of 1869. Joachim was then at the zenith of his powers, and the possessor of ripe experience, not a little of which was gained on English concert platforms, as a quartet leader, and it occupied from the first, as by natural right, a supreme position in the world of chamber music. Various changes have since been made in the personnel of the Quartet, but one feature has remained constant. The colleagues of Joachim have invariably been chosen from among those
artists who, besides possessing technical mastery of their respective instruments, are in sympathy with the artistic ideals associated with his name. What these changes were is set forth in the following table:

First Violin. Joseph Joachim from 1869 till now.
Second Violin. Ernst Schiever, 1869-72.
    Carl Haer, from 1872 till now.
Viola. Heinrich de Ahna, 1869-72.
    Emanuel Wirth, from 1877 till now.
Violoncello. Wilhelm Muller, 1869-72.
    Robert Hausmann, from 1879 till now.

Since 1869 the annual series of concerts given by the Joachim Quartet has been one of the features of the musical life of Berlin. During the past ten years they have paid an annual visit to Vienna and given, besides, frequent performances in the leading German towns, in Budapest, London and provinces, Paris, Rome, etc., reining, however, from adopting the exclusively nomadic life which brings gold to the coffers, but squanders the energies of so many prominent artists, and refusing to entertain numerous proposals to visit America, Russia, and other countries more or less remote. But in Germany no musical festival of importance is considered complete without their presence. They take part regularly both in the Meiningen Festivals, and in those held at Bonn (in the Beethoven house), Basle, and Zürich. At Zwickau on the occasion of the unveiling of the Robert Schumann memorial, and at Mannheim during the inauguration of the Festival Hall, they were also present, acclaimed as representative figures of German art. In the spring of 1905 they visited Rome, giving the sixteen quartets of Beethoven in the Farnese Palace.

Their welcome in England has been no less warm, though their first visit was delayed till 1890: in 1897 and subsequently, Joachim, Kruse, Wirth, and Hausmann appeared together at the Popular Concert, but the identical personnel of the existing quartet did not visit England till 1900, in which year an influential London Committee organised a series of concerts in St. James's Hall, and secured for the quartet (Joachim, Haar, Wirth, Hausmann) a splendid reception. The first concert was given on April 25, the old Musical Union practice of placing the platform in the centre of the Hall being adopted and continued in the succeeding years (1901-4). This year (1905) they gave two series of concerts in Bechstein Hall, St. James's Hall being no longer available. By the success of these concerts London musical society has vindicated itself handsomely from the charge of lukewarmness towards chamber music, and given generous support to programmes suited to the most advanced taste, including the later quartets of Beethoven, as well as masterpieces of Haydn, Mozart, Schu-

bert, Schumann, Mendelssohn, and Brahms. In one instance only has a work from the pen of a living composer been given, the string quartet, op. 86, by Sir C. Villiers Stanford, in which Mr. Alfred Gibson co-operated as second viola. In Berlin their programmes have been more eclectic in character, the romantic as well as the classic element being represented. Dvořák's name appears frequently, and the following occasionally: Gade, Kiel, Vierling, Klughardt, Volkmann, Rubinstein, Taubert, Gernsheim, Von Herzogenberg, Bargiel, D'Albert, R. von Berger, W. Berger, Kahn, Barth, Schrattenholz, Dohnanyi, Heinrich XXIV., First Reuss, etc., from which it will be gathered that the Joachim Quartet has not incurred the reproach of neglecting modern musical literature. Some of the older classical writers also appear from time to time, amongst them Cherubini, Spohr, and Dittersdorf, but one looks in vain for examples of the French, Belgian, and Scandinavian schools.

It has become one of the commonplaces of musical criticism to praise the Joachim Quartet for their 'objective' readings of works of the great masters, and truly they appear to have the faculty of bringing to each its appropriate mood, depicting with equal fidelity the bubbling humour of Haydn, the classic serenity of Mozart, the force and the fatalness of Beethoven. Reverence for the composer's intention is the leading characteristic of their interpretations, and they bring out, as no other artists have done, the ethical significance of such movements as the Cavatina in the thirteenth, and the Heiliger Dankgesang in the fifteenth quartet of Beethoven. But their appeal is never to the lover of the sentimental, the exotic, or the theatrical; and there is some truth in the suggestion of a writer that appreciation of the Joachim Quartet is a measure of the culture of the audience.

Of their art there is something to be said on the subjective side. Joachim's conceptions, followed with quick sympathy and developed by his associates, are amazingly various. In him one perceives the original thinker as well as the faithful interpreter. The quartet repertoire is limited, but its limits widen perceptibly when old pages, often repeated, glow with new life, and fresh meanings quicken, at each performance, the familiar web of sound. Such interpretations are little short of creative. Nor has this freshness of conception even now deserted the veteran leader. A new mood is apparent, born of ripe experience, and strangely akin to that which informs the later compositions of Brahms. It is a mood of infinite beauty, and compensation more than enough for the decline of physical vigour inevitable in a man of his years.

Of his Brahms readings a special word needs to be said. He was not only the composer's
intimate friend but was entrusted by him with the recension of many of his chamber works. It follows that no such authoritative readings will ever be heard again. Thousands have realised for the first time through the medium of the Joachim Quartet how much of romantic beauty underlies the supposed austerity of the master. But, whatever the subject matter, this body of players has the power of investing it with sensuous as well as intellectual charm, thanks to a voice production (if the term be admissible) of rare perfection, and thanks partly to the instruments they play upon. Each of the present-day members of the quartet (see below) possesses a Stradivarius of the best period, and therefore the tone produced, besides being pure, is homogeneous in all the parts. In short, by travelling along all the ‘needed paths that lead to inspiration and high mastery’ they have reached undisputed pre-eminence over all organisation of the kind.

Halir, Carl, violinist, was born on Feb. 1, 1859, at Hohenelbe in Bohemia. Received his first lessons from his father, and was then sent to the Prague Conservatorium, where he studied under Bennewitz for six years. Completed his studies under Joachim (1874-76) at Berlin, where he received his first engagement as principal violin in Bilse’s orchestra (1876-1879). Held the appointment of concertmeister successively at Königberg (1879), Mannheim (1881), and Weimar (1884), making the latter town, in which he remained for ten years, a point of departure for numerous artistic tournées. On the death of De Ahna, in 1894, he was appointed leader at the Berlin Court Opera, and professor at the Hochschule. In 1886-97 he visited the United States, and upon his return joined the Joachim Quartet. Since then his artistic life has become very strenuous, and he was obliged to sever his connection with the Court Opera in 1904. Besides taking part in the numerous concerts given by the Joachim Quartet, he leads a Quartet of his own (Halir, Eener, Müller, Dechert), and is known all over the continent as a soloist of distinction. He helped to win from the public tardy acceptance of the Tchaikovsky Concerto, and has introduced other violin compositions for the first time. He has led quartets at the Popular Concerts, but is best known to English audiences as a member of the Joachim Quartet, of which he is one of the glories. He has found means of employing, without obtrusiveness, all the refinements of the soloist in the development of the beautiful ideas with which the great quartet writers have plentifully stocked the parts written for second violin.

He was married in 1888 to Therese Zerbst, a vocalist of distinction.

Wirth, Emanuel, violinist, was born on Oct. 18, 1842, in Lüditz, near Carlsbad. Studied under Mildner and Kittl at the Prague Con-

servatorium, receiving his first engagement as leader of the orchestra at Baden Baden. In 1884 he was appointed leader of the German Opera and Society concerts at Rotterdam, and also undertook the duties of professor at the Conservatoire. In 1877 he accepted an invitation from Joachim to settle in Berlin as teacher at the Hochschule, and as viola in the Joachim Quartet. Both of these appointments he holds at the present day, and is very popular with Berlinese audiences, who made much of him on the occasion of his Jubilee in 1902. The ‘Trio evenings,’ which he founded in conjunction with Professors Barth and Hausmann, are a feature of Berlin musical life. In these he takes the violin part, but it is as viola player in the Joachim Quartet that he will be best remembered. His penchant is for the violin, but seeing, in the larger and more cumbrous instrument, greater possibilities of usefulness, he has cultivated a quite remarkable viola technique. The ideal quartet needs very capable performers to fill the inner parts, and the abnegation of such artists as Halir and Wirth calls for the admiration of all serious musicians.

Notices will be found elsewhere of Scheyer, De Ahna, Kruse, Rappoldi, Müller (C. Müller Quartet), and Hausmann. W. W. C.

JOAN OF ARC. A grand historical opera in three acts; the words by A. Bunn, the music by Balfe. Produced at Drury Lane, Nov. 30, 1837.

JOANNA MARIA. [See Gallia.]

JOB. An oratorio; composed by Sir C. Hubert H. Parry, produced at the Gloucester Musical Festival of 1892.

JOCONDE, ou LES COUREURS D’AVENTURE. Opéra-comique in three acts; libretto by Etienne, music by Isouard. Produced at the Théâtre Feydeau, Feb. 28, 1814; in English, by the Carl Rosa Company (Santley’s translation), Lyceum, Oct. 25, 1876.

G. JÖDEL. See Tyrolienne.

‘JOHN BROWN’S BODY.’ One of the most popular of marching tunes, and possessing qualities in this respect of a high order. Its birth is American, and during the Civil War it was much in evidence, since which time it has inspired British troops in many of our own campaigns. Its melody and its ‘authentic’ set of words are as follows:—
JOHN THE BAPTIST, ST.

John Brown's body lies a-moulderling in the grave.

But his soul goes marching on.

(Three times.)

Chorus: Glory, Glory, Hallelujah! (Three times.)

His soul goes marching on.

He's gone to be a soldier in the army of the Lord,

His soul goes marching on.

John Brown's knapsack is number ninety-three,

As he goes marching along.

His pet lambs will meet him on the way,

And they'll go marching along.

We'll hang Jeff Davis on a sour apple-tree,

As we go marching along.

The tune, fitted to a hymn —

Say, brothers, will you meet us

On Canaan's happy shore?

made its appearance in the fifties in the camp meetings of the Southern States, and from thence travelled northwards; it is stated that the tune is the composition of one William Steffe. Its introduction into the Northern army was, according to Mr. Elson in his History of American Music, by reason of the singing of the hymn by a couple of homesick recruits while stationed at Fort Warren near Boston in 1861. The regiment adopted the melody as its own, and the words which required merely a simple statement without a corresponding rhyme, grew as 'claff' round a good-natured Scotchman named John Brown. The tune quickly became popular all throughout the Northern States, and was associated with the marches of its army. The 'John Brown' gradually grew to be recognised as the hero of Harper's Ferry, and a political meaning grew round the doggedly united to the tune. Many attempts have been made to vide respectable and consistent words to the air in place of those which have carried it along on the march and round the camp fire, but up to the present without the slightest effect. P. K.

JOHN THE BAPTIST, ST. An oratorio in two parts; the text selected from the Bible by Dr. E. G. Monk; the music by G. A. Macfarren. Produced at Bristol Festival, Oct. 23, 1873. G. J.

JOHNS, CLAYTON, an American composer, chiefly of works in the minor forms, was born in New Castle, Del., Nov. 24, 1857. He was destined at first for architecture, and studied that profession for four years in Philadelphia. In 1879 he definitely committed himself to music, and began his studies in Boston under John Knowles Paine in theory, and William H. Sherwood upon the pianoforte. With these he remained three years, going then to Berlin to continue his work under Kiel, Grabow, Raif and Rummel. In 1884 he returned to the United States, settling in Boston, which has since been his home. He has published a Berceuse and Scherzino for string orchestra, several pieces for violin and pianoforte and for pianoforte alone, and about one hundred songs, some of which have won popularity. R. A.

JOHNSON, EDWARD, is mentioned in Meres' Palladis Tamia (1598) as one of the leading English composers. It is not known if he was related to the other musicians of this name.

There is reason to think that he was employed to provide some of the music for the festivities on the occasion of the Queen's visit to Lord Hertford at Elvetham (Sept. 1591), as there exist five-part settings by him of two of the songs performed at the fourth day's Entertainment; these are 'Eliza is the fairest Queen,' for treble voice and instruments, and 'Come agayne,' for two treble voices and instruments.

This is the original music composed for the occasion, we are told that 'this spectacle and musicke so delighted her Majesty, that she desired to see and hear it twice over.' (See Nichols's Progresses of Q. Elizabeth, where the Description of the Entertainment is reprinted.) In 1592 he contributed three settings of tunes to Este's Whole Books of Psalmes, which shows that by that date he had made some reputation as a musician 'expert in the Arte'; his work, however, does not appear till the end of the Book, and it may be supposed that he was not included in Este's original scheme. (See Psalter, where his work is criticised.) In 1594 Johnson took his degree of Bachelor of Music at Cambridge from Gonville and Caius College. In his 'Supplicat' he speaks of his many years' study and practice in the Science of Music, and asks to be examined by Dr. Bull and Dr. Dollas. A six-part madrigal by him, 'Come, blessed byrd,' appeared in the Triumphs of Oriana, 1601. An unprinted madrigal in two parts, 'Ah, silly John,' and 'That I love her,' for three voices, is in the R. Coll. Mus. Library. Of his instrumental music, a paduan was printed in T. Simpson's Tafel Consort, Hamburg, 1621; and three Virginal pieces with his name are in the Fitzwilliam Virginal Book (a medley, and a pavane and galliard set by Byrd). G. E. P. A.

JOHNSON, JAMES, a famous Edinburgh music- engraver, who, for nearly forty years, held the bulk of the Scottish trade, engraving from 1772 to about 1790 practically every piece of music issued in Scotland. The son of Charles Johnson, born about 1750, he was probably apprenticed to James Read, an early Edinburgh music-engraver. Johnson's first known work is dated 1772; it is Six Consowes for two voices . . . dedicated to the Scots Ladies by Domenics Corri, Edinburgh, 1772, James Johnson, Edinburgh, oblong 4to.1 In this year or the following he engraved M'CLean's Scots Tunes, and in 1773 Daniel Dow's Twenty Minuets. These and others are all clearly cut in copper, but all his later work is stamped on pewter, a practice which the writer of his obituary notice in the Scots Magazine, 1811, foolishly credits him with being 'the first to attempt.'

In 1787 he published the first volume of The Scots Musical Museum, a notable work which

1 In the library of the present writer, probably now unique.

2 mo.
Robert Burns the poet, who largely contributed to its contents, said would remain the text-book of Scottish Song. The *Museum* contains 600 airs, and is comprised in six volumes issued as follows: 1st, 1787; 2nd, 1788; 3rd, 1790; 4th, 1792; 5th, 1797; 6th, 1803. To this work in a later reissue Wm. Stenhouse contributed historical notes to the songs and airs which have been bones of contention to musical antiquaries for the past half century. Johnson (previously living in Bell’s Wynd) in 1788 opened a music shop in the Lawnmarket, where he remained until his death on Feb. 26, 1811. Shortly before it occurred he had taken his apprentice John Anderson into partnership, who also continued a year or two with Johnson’s widow.

As before stated, Johnson engraved so much of the Scottish music of his time that a bibliography of his work would form almost a complete list of Scottish musical publications during this period. About 1790 George Walker came forward and supplied some portion of a rapidly increasing demand. He was, it is believed, another of Johnson’s apprentices, and Anderson went into partnership with him in 1816.

JOHNSON, John, one of Queen Elizabeth’s Musicians for the Lute, is named among the Musicians from as early as 1581 until his death in 1594-95 (Nagel, *Annalen*). His widow, Alice, was granted a lease in reversion for fifty years of Cranbourne Manor, Dorset, and other lands, in consideration of her husband’s services (Jan. 25, 1594-95). Compositions for the Lute by him are in the Cambridge University Library (D.4. iii. 18). He may perhaps be identified with a musician named John Johnson who was in the service of Sir Thomas Kitson at Hengrave Hall, Suffolk, in 1572, and in London in 1574, in which year he went to take part in the entertainments given by Leicester at Kenilworth (Gage, *History of Hengrave*, 1822). Rimbauld hastily assumed him to be the same as ‘Robert the musician’ also mentioned in the Hengrave accounts; but Sir T. Kitson kept several musicians in his service. Certainly this Johnson cannot be either of the Robert Johnsons of whom we know anything; and it is to be noted that John Johnson was father of Robert Johnson (II) who enjoyed the patronage of Sir George Carey, husband of Sir Thomas Kitson’s granddaughter.

JOHNSON, John, a London music-publisher of the middle of the 18th century. He was established at premises in Cheapside ‘facing Bow Church,’ at the sign of the Harp and Crown, before 1740.

He probably succeeded to the business previously carried on by Daniel Wright (*q.e.v.*) of St. Paul’s Churchyard; he certainly reissued some of Wright’s publications, including his two volumes of Country Dances. Johnson’s issues comprised the best music of the day in songs, and instrumental pieces by such composers as Geminiani, Felton, Garth, Nares, Gunn, Arne, Worgan, etc. His yearly sets and collected volumes of country dances are especially interesting to the musical antiquary of to-day. In many instances Johnson broke through the absurd unwritten law that printed music should remain undated, for we find a great number of his publications bear an engraved date of the year of issue. The engraving of his music and the quality of the paper were always remarkably good. Johnson appears to have died about 1762, for after that year to about 1771-72 most of the imprints are in the name of ‘Mrs. Johnson’ or ‘R. Johnson,’ presumably his widow, with the address as ‘110 Cheapside.’

The signature, ‘The Harp and Crown,’ is absent from these imprints, and for a time was at this period adopted by Longman, who was just then commencing business in another part of Cheapside, nearer St. Paul’s.

JOHNSON, Robert (I), often described as ‘Priest’ in old MSS., flourished in the middle of the 16th century. He was a Scottish priest, born in Dunse, who fled to England ‘long before the Reformation . . . for accusation of heresy;’ this is the account given of him by Thomas Wodde, Vicar of St. Andrews, whose MS. part-books (now in the Libraries of Edinburgh University; Trinity College, Dublin; and British Museum, Add. MS. 33,933) contain his ‘Domine in virtute.’ It is asserted by most historians that he was chaplain to Anne Boleyn (1533-36), but there seems to be no evidence for the statement, though it is to be found in Stafford Smith’s writing on more than one old MS. coming from his collection. In the Buckingham Palace Library is a MS. in which Robert Johnson ‘Priest’ is also described as ‘of Windsor’; as Baldwin, the writer of this MS. was a Windsor man, it is very likely that Johnson may have settled there.

Johnson, who was the most considerable composer born in Scotland until comparatively recent times, was chiefly a writer of sacred music. Of his music for the English Service three so-called Prayers are to be found in Day’s *Certaine Notes*, 1560, and *Morning and Evenynge prayer*, 1565; these, which may have been printed in Johnson’s lifetime, are ‘Relieve us, O Lord, that are weake and feble;’ ‘O eternal God;’ and ‘I gave you a new commandement’: the words of the two latter are in Clifford’s *Divine Services*, 1663; a Service in the Ely Cathedral Library is attributed to him in Dickson’s Catalogue: ‘O Lord, with all my heart,’ is in the Brit. Mus. Add. MS. 4900.

Of his settings of Latin words, his ‘Domine in virtute’ (referred to above) is most frequently met with, [Bodleian and Ch. Ch., Oxford]; Brit. Museum: St. Michael’s, Tenbury].

The following seem also to have been written
JOHNSTON 539

for the Latin Service, though not all have words, and some are only found in a late arrangement:—

'Ave Dei Patris,' on G. Bodl. MS. e 156, etc.

'Ave Deum salutis,' on G. Coll. of Music, MS. Michael's, Tenbury.

'Ave plena gratia,' R. M. Add. MS. 29240.

'Psalmus Domini,' R. M. Add. MS. 4003.

'Dona mensis,' R. M. Add. MS. 30340.

'Quisquit uis Judae,' two settings on A. Buckingham Palace.

'Drums' (printed, B. M. Add. MSS. 17262-5.

'Gauda Maria,' on a 4, ibid.

'Laudet Deus,' on B. Buckingham Palace.

'Sabbatum Maria' printed by Burney, Ch. Ch., Oxford.

Among his secular works, besides a number of 'In nomines' and pieces without words, are:

'Defled to be my name,' printed by Hawkins as a 'Complaint of Anne Boelyn,' though the MSS. from which he printed it do not call it so (B. M. Add. MS. 30313 and B. M. Add. MSS. 30314), "Come, pale-faced Death," in the last-named MS., and 'Ty the mare tomboy' (B. M. Harl. MS. 7578, a collection of old songs said to have been used 'in and about the Bishopric of Durham').

JOHNSTON, ROBERT (II), son of John Johnston the lutenist, was apprenticed to Sir George Carey in 1596 for seven years as 'allowes or covenants servant,' Sir George undertaking to have him taught and instructed in the art of music, and providing board, lodging and necessities (Mr. Barclay Squire in Musical Times, February 1897). It is not known if this Robert Johnson was related to the earlier writer of the name: Dr. Rogers told Anthony Wood in 1695 that he thought he was a Scotchman, but he undoubtedly confused the two (Wood's MS. Notes on Musicians, in Bodleian Library).

Johnson was appointed one of the King's Musicians for the Lute at Midsummer, 1604, with a salary of 20d. a day and £16 2s. 6d. for his livery, and his name recurs yearly in the Audit Office Declared Accounts until 1633. It appears from the list printed by Hawkins that he was one of Prince Henry's Musicians in 1611, with a salary of £40. In 1620 he is named as one of the musicians who were to provide music for the proposed Amphitheatre in London, which shows that he was then highly esteemed. He retained his appointment as Musician on the accession of Charles I., his salary being given as £40 a year, with £20 for strings: and his name occurs in various documents in which the Musicians are specified.

In 1628, on the death of Thomas Lupo, he applied for his place of composer to the Lutes and Voices. He died before April 30, 1634, when his successor Lewis Evans received his appointment.

Johnson contributed two compositions to Leighton's Teares or Lamentations, 1614: a consort song, 'Yeekle unto God' and a five-part 'Save me, O Lord'; and in his lifetime instrumental pieces by him were printed in Brade's Nove auctissimae Branden, etc., Lubeck, 1617, and in Simpson's Taffel Consort, Hamburg, 1621 (Ettner). His reputation lasted for many years after his death. Hilton printed catches by him in 'Catch that Catch can,' 1652. Walter Porter in 1657 quotes him as a famous musician. A song, 'As I walked forth,' was printed in Playford's Ayres and Dialogues (1653 and 1658) and in the Treasury of Music (1669), which later appeared in D'Urfe's Wit and Mirth, and has found its way into several modern collections. At the present day, however, it is to his association with the plays of the great dramatists that he owes his chief interest. His settings of 'Full fathom five' and 'Where the bee sucks' from 'The Tempest' (printed, in a three-part arrangement in Wilson's Chearful Ayres, 1660) are generally held to have been written for the production of the play: Rimbault (Who was Jack Wilson? 1846) also speaks of having 'recovered' some of Johnson's instrumental music for 'The Tempest,' but does not say where it was to be found. Johnson also set 'Care-charming sleep' from Beaumont and Fletcher's 'Valentinian'; and 'This late and cold' from the same authors' 'Mad Lover,' which are to be found with other songs by Johnson in Brit. Mus. Add. MS. 11,608. Rimbault printed as Johnson's the music to some of Middleton's 'Witch' (from the original MS. in the possession of the Editor, in his Ancient Vocal Music of England. He also is the authority for saying that Johnson's music to Ben Jonson's 'Masque of Gypsies' is in the Oxford Music School Collection, but no trace of it is now to be found in the catalogue.

Music by Johnson for virginals, lute, and viol, exists in MS. in the Fitzwilliam and University Libraries, Cambridge; the Music School and Christ Church, Oxford; Royal Coll. of Music, and British Museum.  

JOHNSTON, SAMUEL, a playwright and a composer with the reputation of having been half crazy. He was a native of Cheshire, and originally a dancing-master. He is only worthy of remembrance as the composer and author of an extraordinary musical play named 'Hurlothrumbo or the Supernatural,' acted at the Haymarket in 1729. In this piece he himself took the principal character, Lord Flame. The play had an immense success mainly due to its singularity, and probably also to the influence of Sir Robert Walpole, who greatly patronised it. The songs and music were published in folio for the author by Daniel Wright the elder in or near the year of its production. Johnson wrote other plays, and no doubt produced more music now forgotten.  

JOHNSTON, JOHN, a London music-publisher of the latter part of the 18th century. His first address (about 1768) was 'Corner of York Street, Covent Garden.' Some time shortly after 1770 he removed to the Strand, where his address or addresses are variously given as: 'Opposite Lancaster Court, Charing Cross,' 'Near Northumberland House,' 'Near Exeter
Change. About 1776 he again removed, to 97 Drury Lane, and soon after ceased business, his plates and stock being acquired by Longman & Lukey, who had already published in conjunction with him. His publications include the early works of Charles Dibdin: 'The Padlock,' 1768; 'The Stratford Jubilee Musical Works, 1768; 'The Waterman,' 1774; 'The Quaker,' 1776; and other pieces by Dibdin, 'Lionel and Clarissa,' 'The Deserter,' and Dr. Arne's adaptation of 'King Arthur,' 1773. Sonatas, country dances, and general sheet music also bear his imprint.

JOMMELLI, Niccolo, is the most conspicuous name in the long list of eminent composers who during the first half of the 18th century were the outcome and ornament of that Neapolitan school which had become famous under Alessandro Scarlatti. It was a period of transition in musical art all over Italy. It witnessed the abandonment of the old Gregorian modes in favour of modern tonality. Counterpoint itself, while pursued as ardently as ever, and still recognised as the orthodox form of expression for musical thought, was assuming to that thought a new and different relation. Ideas were subjected to its conditions, but it no longer constituted their very essence. The distinctive tendency of all modern Art towards individualisation was everywhere making itself felt, and each successive composer strove more and more after dramatic truthfulness as a primary object, while at the same time there was educated in the schools of Italy a race of great singers to whom individual expression was a very condition of existence. Pure contrapuntal Art—strictly impersonal in its nature, in that, while each part is in itself complete, all are equally subordinate to the whole,—was being supplanted by a new order of things. In the music destined to convey and to arouse personal emotions one melodions idea predominates, to which all the rest, however important, is more or less subservient and accessory. Nor is harmony, then, the final result of the superimposition of layer on layer of independent parts, but the counterpoint is contrived by the subdivision and varied time apportionment of the harmony, and partakes of the nature of a decoration rather than a texture—the work is in fresco and not in mosaic.

To the greatest minds alone it belongs to unite with intuition that consummate art which makes scholastic device serve the ends of fancy, and, while imparting form to the inspirations of genius, receives from them the stamp of originality. In the long chain connecting Palestrina, in whose works contrapuntal art found its purest development, with Mozart, who blended imagination with science as no one had done before him, one of the last links was Jommelli. Gifted with a vein of melody tender and elegiac in its character, with great sensibility, fastidious taste, and a sense of effect in advance of any of his Italian contemporaries, he started in the new path of dramatic composition opened up by Scarlatti, Pergolesi, and Leo, at the point where those masters left off, and carried the art of expression to the highest pitch that, in Italy, it attained up to the time of Mozart.

Born at Aversa, near Naples, Sept. 10, 1714, his first musical teaching was given him by a canon named Mozollo. At sixteen he entered the Conservatorio de' Poveri di Gesu Cristo as the pupil of Feo, but was transferred to that of La Pietà de' Turchini, where he learned vocal music from Prato and Mancini, and composition from Leo. It was the boast of these schools that young musicians on leaving them were adepts in all the processes of counterpoint and every kind of scholastic exercise, but it seems that a special training at Rome was judged necessary to fit Jommelli for writing church music, the chief object he is said at that time to have had in view. However this may have been, his first works were ballets, in which no indication of genius was discernible. He next tried his hand on cantatas, a style of composition far better suited to his especial gifts, and with so much success that Leo, on hearing one of these pieces performed by a lady, a pupil of Jommelli's, exclaimed in rapture, 'A short time, madam, and this young man will be the wonder and the admiration of Europe!' The young composer himself had less faith in his own powers. According to the notice of his life by Piccinini, he was so dreadfully cursed of the public that his first opera, 'L' Errore Amoroso,' was represented (at Naples, in 1737) under the name of an obscure musician called Valentino; the work, however, met with so encouraging a reception that he ventured to give the next, 'Odoro,' under his own name.

In 1740 he was summoned to Rome, where he was protected by the Cardinal Duke of York, and where his two operas 'Il Ricemio' and 'L' Astianatte' were produced, the latter in 1741. Thence he proceeded to Bologna, where he wrote 'Ezio' [1741, afterwards re-cast and produced at Naples in 1748]. During his sojourn there he visited that celebrity of musical learning, the Padre Martini, presenting himself as a pupil desirous of instruction. To test his acquirements, a fugue subject was presented to him, and on his proceeding to treat it with the greatest facility, 'Who are you, then?' asked the Padre; 'are you making game of me? It is I, methinks, who should learn of you.' 'My name is Jommelli,' returned the composer, 'and I am the maestro who is to write the next opera for the theatre of this town.' In later years Jommelli was wont to affirm that he had profited not a little by his subsequent intercourse with Martini.

After superintending the production of some important works at Bologna, Rome, and elsewhere, Jommelli returned to Naples, where his
opera 'Eumene' was given at the San Carlo in 1747 with immense success. A like triumph awaited him at Venice, where he aroused such enthusiasm that the Council of Ten appointed him director of the Scuola degli Incantabili, a circumstance which led to his beginning at last to write that sacred music which had been the object of his early ambition, and to become one chief source of his fame. Among his compositions of the kind at this time was a 'Laudate' for double choir of eight voices, which, though once celebrated, appears never to have been printed. In 1748 we find him at Venice, where he wrote successively 'Achille in Sciro' and 'Didone.' Here he formed with the poet Metastasio an intimate acquaintance. Metastasio entertained the highest opinion of his genius, and was also able to give him much useful advice on matters of dramatic expression and effect. Sometimes the accomplished friends amused themselves by exchanging roles; Jommelli, who wrote his native language with fluency and elegance, becoming the poet, and his verses being set to music by Metastasio. [In 1749 he went to Venice to superintend the production of 'Ciro' and 'Merope,' and returned soon afterwards to Vienna, for the production of 'Didone.']

In 1749, he went again to Rome, where he produced 'Artalesse.' He found an influential admirer and patron in Cardinal Albani, thanks to whose good offices he was, in 1750, appointed coadjutor of Bencini, chapel-master of St. Peter's. He quitted this post in Nov. 1753 to become chapel-master to the Duke of Württemberg at Stuttgart, where he remained in the enjoyment of uninterrupted prosperity for more than fifteen years. Through the munificence of his duke he lived in easy circumstances, with all the surroundings most congenial to his cultivated and refined taste, and with every facility for hearing his music performed. Here he produced a number of operas, an oratorio of the Passion, and a requiem for the Duchess of Württemberg. In these works German influence becomes apparent in a distinct modification of his style. The harmony is more fully developed, the use of modulation freer and more frequent, while the orchestral part assumes a greater importance, and the instrumentation is weightier and more varied than in his former works. There is no doubt that this union of styles gave strength to his music, which, though never lacking sweetness and refinement, was characterised by dignity rather than force. It added to the estimation in which he was held among the Germans, but was not equally acceptable to Italians when, his fame and fortune being consolidated, he returned to pass his remaining years among his own countrymen. The fickle Neapolitans had forgotten their former favourite, nor did the specimens of his later style reconquer their suffrages. 'The opera here is by Jommelli,' wrote Mozart from Naples in 1770. 'It is beautiful, but the style is too elevated, as well as too antique, for the theatre.' The rapid spread of the taste for light opera had accustomed the public to seek for gratification in mere melody and vocal display, while richness of harmony or orchestral colouring were looked on rather as a blemish by hearers impatient of the slightest thing calculated to divert their attention from the 'time.' "Armida," written for the San Carlo Theatre in 1770, and one of Jommelli's best operas, was condemned as heavy, ineffective, and deficient in melody. "Il Dermofoonte" (1770) and 'L'Ingenia in Ausilde' (originally produced in Rome, 1753) were ill executed, and were failures.

The composer had retired, with his family, to Aversa, where he lived in an opulent semi-retirement, seldom quitting his home except to go in spring to the Infinea di Napoli, or in autumn to Pietra bianca, pleasant country resorts near Naples. He received at this time a commission from the King of Portugal to compose two operas and a cantata. But his old susceptibility to public opinion asserted itself now, and the failure of his later works so plunged him in melancholy as to bring on an attack of apoplexy. On his recovery he wrote a cantata to celebrate the birth of an heir to the crown of Naples, and shortly after, the Miserere for two voices (to the Italian version by Mattei), which is, perhaps, his most famous work. This was his 'Swan's Song'; it was hardly concluded when he died at Naples, aged sixty, August 25, 1774.

Jommelli was of amiable disposition, and had the polished manners of a man of the world. Good-looking in his youth, he became corpulent in middle age. Burney, who saw him at Naples in 1770, says (Present State, France and Italy, p. 316) he was not unlike Handel, a likeness which cannot be traced in any portraits of him that are extant. The catalogue of his works contains compositions of all kinds, comprising nearly fifty operas, two oratorios ('Betulia liberata,' 1743, and 'L'Iscaco,' 1755), and a Passion music, 1749, besides masses, cantatas, and a great quantity of church music. As a contrapuntist he was accomplished rather than profound, and his unaccompanied choral music will not bear comparison with the works of some of his predecessors more nearly allied to the Roman school. His Miserere for five voices, in G minor (included in Rochlitz's collection) contains great beauties, the long diminuendo at the close, especially, being a charming effect. But the work is unequal, and the scholarship, though elegant and ingenious, occasionally makes itself too much felt. [The opening 'Kyrie' of Jommelli's Requiem in Eb (written at Stuttgart in 1756) was printed as Haydn's in some editions of the latter's mass in the same key.]

His ideas have, for the most part, a tinge of
mild gravity, and it is not surprising that he failed in ballets and other works of a light nature. Yet he has left an *opera buffa*, 'Don Trastullo,' which shows that he was not devoid of a certain sedate humour. This opera is remarkable (as are others of his) for the free employment of accompanied recitative. Jommelli was one of the earliest composers who perceived the great dramatic capabilities of this mode of expression, which has, in recent times, received such wide development. He saw the absurdity, too, of the conventional Du Cappo in airs consisting of two strains or movements, by which the sympathy of the hearer, worked up to a pitch during the second (usually Allegro) movement, is speedily cooled by the necessity for recommencing the Andante and going all through it again. He would not comply with this custom except where it happened to suit his purpose, but aimed at sustaining and heightening the interest from the outset of a piece till its close, — anticipating by this innovation one of Gluck's greatest reforms.

His invention seems to have required the stimulus of words, for his purely instrumental compositions, such as overtures, are singularly dry and unsuggestive. Yet he had a more keen appreciation of the orchestra than any contemporary Italian writer, as is evinced in his scores by varied combinations of instruments, by *obbligato* accompaniments to several airs, and by occasional attempts at such tone-painting as the part written for horns *con sordini* in the air 'Teneri affetti miei' in 'Attilio Regolo.' In his Stuttgart compositions the orchestra becomes still more prominent, and is dialogued with the vocal parts in a beautiful manner. The Requiem contains much pathetic and exquisite music; but intensity is wanting where words of sublime or terrible import have to be conveyed. In this work and the 'Passion' is to be found a great deal that is closely allied to composition of a similar kind by Mozart, and to the earlier master is due the credit of much which often passes as the sole invention of Mozart, because it is known only through the medium of his works. A comparison between the two is most interesting, showing, as it does, how much of Mozart's musical phraseology was, so to speak, current coin at the time when he lived. — The Miserere which was Jommelli's last production seems in some respects a concession to Italian taste, which possibly accounts for the comparatively great degree of subsequent popularity it enjoyed, and suggests the thought that, had his composer been spared a few more years, his style might once more have been insensibly modified by his surroundings. It possesses, indeed, much of the sympathetic charm that attaches to his other works, but the vocal parts are so florid as to be sometimes unsuitable to the character of the words.

He cannot, however, be said to have courted popularity by writing for the vulgar taste. Among contemporary composers of his own school and country, he is pre-eminent for purity and nobility of thought, and for simple, pathetico expression. His genius was refined and noble, but limited. He expressed himself truthfully while he had anything to express, but where his nature fell short there his art fell short also, and, failing spontaneity, its place had to be supplied by introspection and analysis. His sacred music depicts personal sentiment as much as to his operas, and whereas a mass by Palestina is a solemn act of public worship, a mass by Jommelli is the expression of the devotion, the repentance, or the aspiration of an individual. [In 1785 a project was started at Stuttgart for publishing a complete edition of his operas, but 'L'Olimpiade' was the only one published.]

The following works of Jommelli's have been republished in modern times, and are now accessible: —

\begin{itemize}
  \item Sulme (Miserere). Settings for two and four voices, with orchestra. (Breitkopf & Hirtel).  
  \item Victimae passim. Five voices, score (Schott).  
  \item Lux eterna. Four voices (Berliner, Schlesinger).  
  \item Hosanna (Hilo. Muslere house, and In Monte Oliveto. Four voices (Berliner, Schlesinger).  
  \item Requiem, for S.A.T.B. Accompaniment arranged for PF. by Ching (Granad).  
  \item Many other pieces of his are, however, included, wholly or in part, in miscellaneous collections, such as Latrobe's Sacred Music, the \textit{Bréniére: Music, Choral's Journal de Mont}, Rochut's \textit{Collection de Morceaux du Chant}, and Grevet's \textit{Les Olliers de l'Illtle, Fauré's Musique Sacré, etc.}
\end{itemize}

[For the complete list of works, see the \textit{Quellen-Lexikon}, from which many corrections and additions to the above article have been taken.]

F. A. M.

JONAS, ÉMILE, one of the younger rivals of Offenbach in opéra-bouffe, born of Jewish parents, March 5, 1827, entered the Conservatoire, Oct. 28, 1841, took second prize for harmony, 1845, and first ditto, 1847, and obtained the second 'grand prix' for his 'Antonio' in 1849. His début at the theatre was in Oct. 1855 with 'Le Duel de Benjamin' in one act. This was followed by 'Le Parade' (August 2, 1856); 'Le Roit boit' (April 1857); 'Les petits Prodiges' (Nov. 19, 1857); 'Job et son chien' (Feb. 6, 1863); 'Le Manoir des La Renardière' (Sept. 29, 1864); and 'Avant la noce' (March 24, 1865)—all at the Bouffes Parisiens. Then, at other theatres, came 'Les deux Arlequins' (Dec. 29, 1865); 'Le Canard à trois becs' (Feb. 6, 1869); 'Desiré, sire de Champigny' (1869). Many of his pieces have been given in London, such as 'Terrible Hymen' at Covent Garden, Dec. 26, 1866; 'The Two Harlequins' (adapted by A'Beckett) at the Gaiety, Dec. 21, 1866; and 'Le Canard,' also at the Gaiety, July 28, 1871. This led to his composing an operetta in three acts to an English libretto by Mr. A. Thompson, called 'Cinderella the younger,' produced at the Gaiety, Sept. 25, 1871, and reproduced in Paris as 'Javotte' at the Athlène, Dec. 22 following. 'Le Chignon d'or,' was brought
out in Brussels in 1874; 'La bonne Aventure' in 1852, and 'Le premier baiser' in 1883.

M. Jonas was professor of Solfège at the Conservatoire from 1847 to 1866, and professor of Harmony for military bands from 1859 to 1870. He was director of the music at the Portuguese synagogue, in connection with which he published in 1854 a collection of Hebrew tunes. He was also bandmaster of one of the legions of the Garde Nationale, and after the Exhibition of 1867 he organised the competitions of military bands at the Palais de l'Industrie, whereby he obtained many foreign decorations. He died at Saint-Germain, May 22, 1905.

JONCIÈRES, Victorin de, the adopted name of Félix Ludger Rossignol, born in Paris, April 12, 1839. The name by which he is known was adopted by his father, a journalist and advocate of the Cour d'Appel, who, under the Empire, was one of the principal contributors to the 'Patrie' and the 'Constitutionnel.' Victorin began by studying painting; but by way of amusement he composed a little opéra-comique adapted by a friend from Mollière's 'Sicilien,' which was performed by students of the Conservatoire at the Salle Lyrique in 1859. A critic who was present advised the composer to give up painting for music, and accordingly Jonciers began to study harmony with Elwart. He entered Leborne's counterpoint class at the Conservatoire, but left it suddenly on account of a disagreement with his master concerning Wagner, who had just given his first concert in Paris. From this time he studied independently of the Conservatoire. At the Concerts Musard he produced an overture, a march, and various orchestral compositions; he also wrote music to 'Hamlet,' produced by Dumas and Paul Meurice. A performance of this work was given as a concert at his own expense in May 1863, and a representation was given at Nantes on Sept. 21, 1867, under his direction, with Miss Judith of the Comédie Française in the principal part. The play was produced in Paris at the Gaité later in the following year, but for a performance of 'Hamlet' at the Français, Jonciers's music was rejected by M. Perrin. On Feb. 8, 1867, Jonciers made his real début as a dramatic composer at the Théâtre Lyrique, with a grand opera, 'Sardanapale,' which was only partially successful. In spite of this comparative failure, Carvalho was persuaded to produce a second grand opera, 'Le dernier jour de Pompéi' (Sept. 21, 1869), which was harshly received by the public. Shortly afterwards a violin concerto was played by his friend Danbé at the Concerts of the Conservatoire (Dec. 12, 1869). The Lyrique having come to an end after the war, Jonciers's dramatic career ceased for a long time, as he would not write for the Opéra Comique, and could not gain admittance to the Grand Opéra.

He wrote a Symphonie Romantique (Concert National, March 9, 1873), and various other pieces were produced at the concerts conducted by Danbé at the Grand Hotel. At length, on May 5, 1876, he succeeded in producing his grand opera 'Dimitri,' for the opening of the new Théâtre Lyrique at the Gaité, under the direction of Vízentini; and the work, although it did not attract the public, showed that the composer possessed a strong dramatic instinct, inspiration of some power, if little originality, and an effective style of orchestration. The opera was such a remarkable advance upon his earlier productions that hopes were formed which were not realised either by his 'Reine Berthe' (Dec. 27, 1878), given four times at the Opéra, nor by his 'Chevalier Jean' (Opéra Comique, March 11, 1885), which succeeded in Germany, though it had failed in Paris. Besides these dramatic works Jonciers had written numerous compositions for the concert-room: 'Scénède Hongroise,' 'La Mer,' a symphonic ode for mezzo-soprano, chorus, and orchestra, 'Les Nubiennes,' orchestral suite, a Slavonic march, a Chinese chorus, etc. His works, of which 'Dimitri' is by far the best, have the merit of being carefully orchestrated, and his vocal writing is marked by a just sense of the laws of prosody. As a critic—for from 1871 he was musical critic to 'La Liberté,' and contributed to it theatrical notices, etc., under the pseudonym of 'Jennius'—his opinions, like his music, are wanting in balance and unity, and have considerably injured his musical standing. In February 1877 M. Jonciers received the cross of the Légion d'honneur. He died Oct. 26, 1903.

JONES, Edward, was born at a farm-house called Henblas,—i.e. Old Mansion,—Llandref, Merionethshire, on Easter Day, April 2, 1752. His father taught him and another son to play on the Welsh harp, and other sons on bowed instruments, so that the family formed a complete string band. Edward soon attained to great proficiency on his instrument. About 1775 he came to London, and in 1783 was appointed bard to the Prince of Wales. In 1786 he published *Musical and Poetical Relicks of the Welsh Bard's, with a General History of the Bard's and Druids, and a Dissertation on the Musical Instruments of the Aboriginal Britons; a work of learning and research. Another edition appeared in 1794, and in 1802 a second volume of the work was issued under the title of *The Bardic Museum.* Jones had prepared a third volume, a portion only of which was published at his death, the remainder being issued subsequently. The three volumes together contain 225 Welsh airs. Besides this, he compiled and edited—

*Lyrical Airs; consisting of Specimens of Greek, Albanian, Welsh, Turkish, Arabian, Persian, Chinese, and Moorish National Songs; with a few Explanatory Notes on the Figures and

Besides his professional pursuits Jones filled a situation in the Office of Robes at St. James's Palace. He collected an extensive library of scarce and curious books, part of which, to the value of about £300, he sold in the latter part of his life, and the remainder was dispensed by auction after his death, realising about £800. He died (as he was born, on Easter Day,) April 18, 1824. W. H. H.

JONES, Edward, an early music typographer who for a time, after the death of John Playford, junior, printed the Playford publications. These include Harmonia Sacra, 1688-93; Apollo's Banquet, 1690-93; the eighth edition of the Dancing Master, 1690, etc. His printing office was in the Savoy, and he is perhaps the Edward Jones referred to by Thomas Mace in Musick's Monument, 1676, as possessing a valuable lute. F. K.

JONES, John, born 1728, became organist of the Middle Temple, Nov. 24, 1749; of the Charterhouse (following Dr. Pepusch), July 2, 1753; and of St. Paul's Cathedral, Dec. 25, 1755. He died, in possession of these three seats, Feb. 17, 1796, and was buried in the Charterhouse. He published several sets of harpsichord lessons, and 'Sixty Chants Single and Double' (1735) in the vulgar, florid taste of that time. One of these was sung at George III.'s state visit to St. Paul's, April 23, 1789, and at many of the annual meetings of the Charity Children. At the latter, in the year 1791, Haydn heard it, and noted it in his diary as follows (with a material improvement in the taste of the fourth line):—

``No music has for a long time affected me so much as this innocent and reverential strain.'

JONES, Richard, a fine violinist and composer for the instrument. He succeeded Stefano Carbonell as leader of the band at Drury Lane Theatre about 1730, and was in turn succeeded at that post by Richard Clarke and Michael Christian. Festing was one of his distinguished pupils. Jones wrote a book of 'Chamber airs' and one of 'Suites.' In Wm. Randall's list for 1776 he is noted as composer of some 'Lessons for the Harpsichord,' probably first issued by Walsh. A fine sonata for the violin by him is included in Alfred Moffat's Meister Schule. For his period his violin technique, as displayed in his sonatas, is distinctly advanced. F. K.

JONES, Robert [who took the degree of Mus.B. at Oxford, from St. Edmund's Hall in 1597], was a celebrated lutenist, published [and dedicated to the first Earl of Leicester] in 1600. 'The First Booke of Ayres,'—one of the pieces in which, 'Farewell deere love' (alluded to by Shakespeare in 'Twelfth Night'), is printed in score in J. S. Smith's Musica Antiqua—and 'The Second Booke of Songs and Ayres, set out to the Lute, the Base Violl the playne way, or the Base by tableture after the leero fashion' [dedicated to Sir Henry Lennard]; a song from which—'My love bound me with a kisse,' is likewise given in Musica Antiqua. He contributed the madrigal, 'Faire Oriana, seeming to wink at folly,' to 'The Triumphes of Oriana,' published in the same year. In 1607 he published 'The First Set of Madrigals of 3, 4, 5, 6, 7, 8 parts, for Viols and Voices, or for Voices alone, or as you please,' and in 1608 'Ultimam Vale, or the Third Book of Ayres of 1, 2, and 4 Voyces.' [An unique copy of this is in the Royal College of Music.] In 1609 appeared 'A Musically Dreme, or the Fourth Booke of Ayres; The first part is for the Lute, two voyces and the Viole de Gambo; The second part is for the Lute, the Viole and four voices to sing; The third part is for one voyce alone, or to the Lute, the Bass Viole, or to both if you please, whereof two are Italian Ayres.' In 1610 he published 'The Muses Gardin for delights, or the Fift Booke of Ayres only for the Lute, the basse Violl and the Voyce.' [The words of these airs were reprinted in 1901, edited by Mr. W. Barclay Squire, from a (probably unique) copy in the possession of the Earl of Eellsme.] He contributed three pieces to Leighton's 'Teares or Lamentacions' published in 1614. In 1616 Jones, in conjunction with Philip Rosseter, Philip Kingman, and Ralph Reeve, obtained a privy seal for a patent authorising them to erect a theatre, for the use of the Children of the Revels to the Queen, within the precinct of Blackfriars, near Puddle Wharf, on the site of a house occupied by Jones. But the Lord Mayor and Aldermen were opposed to the scheme, and procured from the Privy Council an order prohibiting the building being so applied, and by their influence Jones and his fellows were compelled to dismantle their house and surrender their patent. W. H. H. with additions from the introduction to Mr. Squire's edition of the poems.

JONES, Rev. William, known as 'Jones of Nayland,' born at Lowick, Northamptonshire, July 30, 1726, and educated at the Charterhouse and at University College, Oxford. He included music in his studies and became very proficient in it. In 1764 he was presented to the vicarage of Bethersden, Kent, and subsequently became Rector of Puckleby in the
same county, which he exchanged for the Rectory of Paston, Northamptonshire. He is said to have been presented to the Perpetual Curacy of Nayland, Suffolk, in 1776, but his name does not occur in the registers until 1784. In Jan. 1784 he published A Treatise on the Art of Music, which gained him considerable reputation. In March 1789 he published by subscription his op. 2, 'Ten Church Pieces for the Organ, with Four Anthems in score [a psalm tune and a double chant], composed for the use of the Church of Nayland in Suffolk, and published for its benefit.' This publication contained his well-known hymn tune 'St. Stephen.' In 1798 he became Rector of Hollingbourne, Kent. He was the author of many theological, philosophical, and miscellaneous works, which were published in twelve vols. in 1801 and in six in 1810. He died at Nayland, Jan. 6, 1800, and was buried in the vestry of the church on Jan. 14. A second edition of his treatise on music was published at Sudbury in 1827. [See the Dict. of Nat. Bio.]

JOESEFFY, RAFAEL, a distinguished and highly accomplished pianist, was born in Hunfal, Hungary, on July 3, 1852. His youth was spent in Miskolc, and there, when a boy of eight years, he began his study of the pianoforte. Although he was not in any respect an infant prodigy, his father made him continue his studies in Budapest, under Brauer, who years before had been the teacher of Stephen Heller. Joseffy entered the Conservatorium at Leipzig when he was fourteen years old; here he came under the instruction of E. F. Wenzel chiefly, though he also had a few lessons from Moscheles. He remained at Leipzig for only two years, and in 1868 went to Berlin to study with Carl Tausig, with whom he remained for two years, and whose influence upon his style and artistic ideals was decisive. Another potent influence was exerted upon the young man by Liszt, with whom in Weimar he spent the summers of 1870 and 1871.

Joseffy made his first public appearance in Berlin in 1872, where he was received with marked appreciation; he thereafter gave a number of concerts in Vienna, and in most of the continental musical centres, that brought him the reputation of a virtuoso of remarkable technical powers. His style at this time, as described by Hanslick, was of great brilliance, showing Tausig's influence in a thorough development of his technique, his clearly and sharply-chiselled phrasing, and the rich variety of his touch and tone; but it was lacking in some of the finer qualities of poetic insight. So it was when he went to the United States in 1879, where he has ever since made his home; but his extraordinary mastery of all the resources and nuances of this instrument won him the instant recognition of the New York public when he made his American debut in that city in 1879, with an orchestra under Dr. Damrosch. He soon after played with the Philharmonic orchestra, and subsequently made many appearances in New York and other American cities with Theodore Thomas and his orchestra, constantly enhancing his reputation, and making more secure his place as one of the foremost of modern pianists. With advancing years his artistic nature has ripened and deepened and he has put his transcendent technical powers at the service of a richer and mellower musical style. The breadth and catholicity of his taste and his wide sympathy with diverse schools have always been notable, and he plays Mozart, Beethoven, Schubert, Schumann, Chopin, Liszt,
Of the rest of Josquin's early life we know that he was for some time chapel-master at St. Quentin, and also that he was received as a pupil by Okeghem, who, himself the greatest living composer, was gathering round him such disciples as he thought worthy the trust of carrying on his labours after him. We can scarcely be wrong in assuming that Josquin stayed with Okeghem for some years. Long and patient labour could alone make him familiar with all the subtleties of that master's art, and that he had thoroughly learnt all that Okeghem could teach him before he came to Rome is apparent from his earlier compositions. Had he written nothing else these works by themselves would have entitled him to a name as great as his master's.

In 1471-1484 we find Josquin at the Papal court of Sixtus IV, already regarded as the most rising musician of the day, rapidly gaining the proud position of being the greatest composer which the modern world had yet produced, and making that position so secure, that for upwards of sixty years his title remained undisputed. Agricola, Brumel, Gombert, Clemens non Papa, Genet, Isaac, Goudimel, Morales, these are only a few of the names of the great musicians who flourished in this period, and yet where are they, when Bani thus describes the state of music in Europe before the advent of Palestrina? 'Jusqui

Josquin des Pres... l'idolo dell'Europa...

Si canta il solo Josquin in Italia, il solo Josquin in Francia, il solo Josquin in Germania, nelle Flandre, in Ungheria, in Boemia, nelle Spagne, il solo Josquin.' [In 1486 he entered the papal choir under Innocent VIII.

(Verdel, iii. 244-246.)

Though Josquin's stay at Rome was not a long one, the fruits of his labours there, in the form of several MS. masses, are still preserved and jealously guarded from curious eyes in the library of the Sistine chapel.

It is almost impossible to decide at what times of his life Josquin paid visits to, or received appointments at the respective courts of Hercules of Ferrara, Lorenzo of Florence, Louis XII. of France or the emperor Maximilian I. [See the various contradictory statements quoted in the Quellen-Lexikon, s.v. Prés. ] It is certain that all these princes were in their turn his patrons. For the first he wrote his mass 'Hercules dux Ferraria,' and his Miserere. Aaron tells us how Josquin, Obrecht, Isaac, and Agri
cola were his intimate friends in Florence. Various anecdotes are told of his stay at the French court. How he was anxious to obtain promotion from the king, but when the courier to whom he applied for help always put him off with the answer 'Lascia fare mi,' weary of waiting Josquin composed a mass on the subject.
La, sol, fa, re, mi, repeated over and over again in mimicry of the oft-repeated answer, and how the idea pleased the king's fancy so much that he at once promised Josquin a church benefice. How Louis nevertheless forgot his promise, and Josquin ventured to refresh the royal memory with the motets `Portio mea non est in terra viventium,' and `Memor esto verit tu.' Lastly, how Louis XII., admiring music from the respectful distance of complete ignorance, desired the great composer to write something expressly for him, and how Josquin wrote a canon, in accomplishment to which the `Vox regis' sustained throughout a single note. Whether Louis ever did give the promised benefice to Josquin is uncertain, though the motet `Bonitatem fecisti cum servo tuo' is generally supposed to have been a thank-offering for such an appointment. But we have proof that the last years of the composer's life were spent in the enjoyment of church preferment at Conde. He had probably passed from the service of Louis to that of Maximilian, who became possessed of the Netherlands in 1515, and may have presented Josquin with this position of retirement. Of his death at this place, a MS. at Lille gives the evidence in a copy of his epitaph, in the choir at Conde, as follows:—

Ohy gist sire Joasse Despres
Prevost de Cheens fut jalous
Priez Dieu pour les Trepassez qui leur dole son
paradis
Trepassez l'an 1521 le 27 d'Aoust
Spez mea semper fusti.

Josquin's printed compositions consist of 19 masses, about 50 secular pieces, and upwards of 150 motets with sacred words, a complete list of them being given in Etüner’s Bibliographie der Musik-Sammlerwerke (Berlin, 1877). Several composers of the same period have left more published works, but Glarean tells us that Josquin was very critical about his own compositions, and sometimes kept them back for years before he allowed their performance. Some evidence of the spread of his music is afforded by the fact mentioned by Burney (Hist. ii. 489) that Henry VIII.'s music book at Cambridge contains some of it, and that Anne Boleyn had collected and learned many of his pieces during her residence in France.

Of his masses, seventeen were printed in three books by Petrucci, in 1502, 1505, and 1514 respectively. The most beautiful of them are the 'La sol fa re mi,' the 'Ad fugam,' and the 'De Beata Virginie.' The first of these, if we credit the story of its origin, would be composed after the year 1498, when Louis XII. ascended the throne. Two other masses, 'Pange Lingua' and 'Da pacem,' not included in the above books, are probably of a still later date. These five masses are those in which Josquin shows the greatest advance on the school of his master.

Among the finest of the motets we may mention the settings of the genealogies in the gospels of St. Matthew and St. Luke, a five-part 'Miserere,' and the four-part psalms 'Planxit autem David' (the lament for Saul and Jonathan) and 'Absolon fili mi.' Some of the masses and many of the motets exist in MS. score, with modern notation, in the Petits library at Brussels. In their original form they can be found in all the great libraries of Europe.

Of the secular works, the most important collection is in the 7th book of Susato's songs published in 1545, which contains twenty-four pieces by Josquin. Here we find the beautiful dirge written on the death of Ogeghem, which is also printed in score by Burney in his History.

It must, however, be borne in mind, that in distinguishing works of these old composers, we are often more attracted by some historical interest, some quaintness in the choice of the text, or some peculiarity in the musical notation, than by the features of the music itself, and when we do try to separate one piece of music from the other we are naturally led at first to admire most whatever comes nearest to our modern ideas (those pieces for instance written in the modes most like our own keys), and to be disappointed when a mass or motet, which we know by tradition to be a masterpiece, fails to move us, and to lay it aside with the explanation that it is only a dry contrapuntal work. But it is not fair to study the music of this period simply to find out how much our modern schools owe to it. When Burney calls Josquin 'The father of modern harmony,' he does not perhaps give the title of which the composer would himself be proudest, 'for there are musicians alive now,' says Doni in his Musical Dialogues, 'who, if Josquin were to return to this world would make him cross himself.' We must regard these Netherland masters, not only in their relationship to succeeding generations, but as the chief lights of a school of religious music which had at that time reached so complete a form that any further progress without an entire revolution seemed impossible; a school of church music which, were we to consider alone the enormous demands it made on the industry and intellect of its followers, would excite our reverence, but which, when we consider the wonderful hold it had on popular feeling throughout Europe for nearly a century, kindles in us the hope that we may not be too far separated by our modern ideas from the possibility of once again being moved by the fire of its genius. [The widely spread dissatisfaction with the long-existing state of ecclesiastical music in Italy and elsewhere, and the mota proprio of the present Pope, Pius X.
(1903) make it extremely probable that in course of time we may hope to gain a more intimate knowledge of Josquin and his followers, than by grooping about libraries, copying MSS., or reading theoretical treatises. Fortunately the study of counterpoint is hardly a more necessary condition of appreciating the music of Josquin, than it is in the case of Bach. But the ear will have to accustom itself to many extraordinary combinations of sounds, meagre harmonies, unsatisfactory cadences, final chords which seem to have lost all character, before any of these works can be thoroughly enjoyed. In the meantime, and till we can hear them performed again in the churches for which they were written, there is much pleasure to be derived from the private study of them; and a real love for them, even with an imperfect understanding, grows up in us very quickly.

The reasons which the council of the church gave for suddenly abandoning the works of Josquin’s school were not founded on any want of admiration for their musical effect. One objection was the fact of the melodies which the composers took for their canto fermo being secular, and voice to which it was assigned singing the secular words, while the other voices sang the words of the mass. The other objection was that the excessively florid style in which the parts were often written made the words of so little importance that it was often impossible to trace their existence. The first objection was not a strong one, for the church had sanctioned the use of the secular melodies as the foundation of masses for more than a century, and some of the melodies had become almost hallowed to their purpose. The singing of the secular words might have been easily given up without forsaking the music.

But the second objection was stronger; for though Josquin began, and his followers, Gombert especially, tried still more to give expression to the general sense of the text, still we find often a few syllables scattered over a page to do service for a host of notes, as if the notes were everything and the words nothing. Still as the first objection applies entirely to the masses, so the second also applies to them much more than to the motets, and it is by these latter works, we venture to think, that their composers will be known, if their music is destined to live again.

Apart, however, from all considerations of the vitality of the school which he represents, of the reason of its downfall or the chances of its revival, ‘Josquin deserves to be classed as one of the greatest musical geniuses of any period.’ (Kiesewetter’s History of Music.) Fortune favoured him in appointing the time of his birth. He was the first composer who came into the world with the materials of his work thoroughly prepared for him. Masses written with counterpoint had been taken to Rome from the Netherlands towards the end of the 14th century, and Dufay, who was a singer in the Papal chapel in 1380 (or exactly 100 years before Josquin held the same position), was a contrapuntist of sufficient importance to be quoted as an authority by theoretical writers of a much later date, and whose art, though simple, was sufficiently perfect to suggest that he too must have had predecessors to prepare his way. But we cannot regard musicians from the time of Dufay to that of Ockeghem as composers in the sense that Josquin was one. Their genius was expended on the invention of counterpoint, which Josquin was the first to employ as a means to a higher end. They were but pilgrims to a promised land, which they may have seen from afar; but Josquin was the first who was to be allowed to enter it. ‘In Josquin,’ says Ambros (whose knowledge of and admiration for the old music surpasses that of any modern historian), ‘we have the first musician who impresses us as having genius.’

In another sense, a very practical one, Josquin stands first on the list of composers. He is the oldest writer whose works are preserved to us, if not entire, at least in such quantities as adequately to represent his powers. The invention of printing music by movable types, which gave such a wonderful impetus to publication, dates from 1498, the very time when Josquin was at the height of his power; and it is a testimony to the superiority of his music over that of his predecessors, that though Ockeghem is supposed to have been still living at the beginning of the 16th century, and perhaps as late as 1512, the publishers thought fit to print very few of his compositions, whilst few collections were issued to which Josquin did not largely contribute. [For the list of Josquin’s works the Quellen-Lexikon should be consulted.]

Commer, in his Collectio Operum Musistorum Batavorum (Berlin, Trautwein), has printed twelve motets and two chansons.

Rochlitz in his Sammlung (Schott) gives a hymn, ‘Tu pauperum refugium’; portions of a mass; and a motet, ‘Misericordias Domini,’ all for four voices. Choron, in his Collection générale, gives his Stabat Mater a 5; and Hawkins (chap. 72) a motet, a 4, ‘O Jesu fili.’ The eleven large volumes of Burney’s Musical Extracts (Add. MSS. 11, 581-91) contain many and valuable compositions of Josquin’s. His ‘Petite Camusette’ is in Arion, vol. iii.

In Van der Straeten’s La Musique aux Pays-Bas (Brussels, 1867) a portrait of Josquin is reproduced from a book published by Peter Opmeer at Antwerp in 1591. It seems to have been copied from a picture originally existing in the Brussels cathedral, and thence probably came the tradition that Josquin was buried there. Opmeer accompanies the portrait with the following words: ‘Conspectur Josquinus depictus Bruxellis in D. Gedulae [ecclesiâ], in
tabula arae dextrae ante chorum honesta sane facile ac blandis occult."

JOTA. One of the most popular of north Spanish dances, especially in the province of Aragon and in the villages of Navarre whose shores are bathed by the Ebro. Its origin dates from the 12th century, and is attributed to a Moor named Aben Jot, who, expelled from Valencia owing to his licentious singing, took refuge in a village of Aragon. There his effort was received with enthusiasm, while in Valencia the governor continued to impose severe punishments on its performance. Some authorities state that at that epoch it was called 'canario.'

The Jota is a kind of waltz, but with more freedom in the dancing, always in three-time. It is danced in couples, vis-a-vis, each couple independent of the other, but sometimes a circle is formed, and is generally accompanied with guitars, bandurrias, and at times with castanets, pandereta (a small tambourine), and triangle. In the north of Spain it is much sung and played, and in Aragon on every possible occasion. A Spanish writer says, that where the Jota is, there is always gaiety, and where there are Aragonese the Jota is never wanting. A good Aragonese has a répertoire of its 'coplas,' which is inexhaustible, for, should his memory fail, his facility for improvisation will not.

There are many Jotas, in fact almost every town in the north of Spain has its own, but the best known is the Jota Aragonesa of which both Glinka and Liszt have made use. The following from Glinka's orchestral overture or piece, 'Jota Aragonesa,' is the melody—

JOULE, BENJAMIN ST. JOHN BAPTIST, born at Salford, Nov. 8, 1817, studied the violin under Richard Cudmore, and the organ, singing, and theory, under Joseph John Harris. From May 8, 1846, to March 20, 1853, he was organist and choirmaster at Holy Trinity Church, Hulme, and from April 28, 1849, to Oct. 3, 1852, also held a similar position at St. Margaret's, Whalley Range, Manchester. On March 27, 1853, he became honorary organist of St. Peter's Church, Manchester. He was President of the Manchester Vocal Society, and author or compiler of The Hymns and Canticles pointed for Chanting, 1847; Directorium Chori Anglicanum, 1849; a very comprehensive Collection of Words of Anthems, 1859; a pointed Psalter, 1863; and other works connected with choral service, several of which have reached many editions. He lectured on Church Music, and contributed to various periodicals. He was musical critic to the Manchester Courier from 1850 to 1870. [He died in Manchester, May 21, 1895.]

JUBILATE—The first word of the Vulgate version—is the Psalm (100th) which is given as an alternative to the Benedictus, to follow the second lesson in the morning service of the Anglican Church. It did not appear in the Prayer Book of 1549, but was added in the revised edition of 1552. Consequently there is no chant given for it in MERbecke’s first adaptation of ancient chants to the English service called 'The Book of Common Prayer Noted,' which was published in 1550.

In the 16th century the Jubilate was much oftener used than the Benedictus. One of the most distinguished clerical writers on the choral service of the church, Jebb, has observed that the Benedictus is so infinitely preferable in every respect that it is impossible to attribute the preference which is given to the Jubilate to any other motive than its being shorter. In confirmation of this view it is interesting to note that while the enthusiasm of the Reformation was still hot, the great musicians of that time, Tallis, Byrd, and Farrant, chose the incomparably more beautiful and more appropriate, but longer, Benedictus; but when that enthusiasm was worn away hardly anything but the shorter Jubilate is to be met with. If we take, for instance, the most famous collections of the ancient service of the church in their order, we find no setting of the Jubilate in Day’s collection (1560 and 1565), three in Barnard’s collection (1611), eight in Boyce’s (1760), and no less than fifteen in Arnold’s (1790).

Handel set the Jubilate for the Thanksgiving service which was held after the Peace of Utrecht, which was concluded March 31, 1718. Mendelssohn also set the Psalm, which forms part of his service in A. C. H. F.; corrections, etc., by W. H. F.

JUBILEE OVERTURE, THE (in E), by C. M. von Weber; composed for the festival held at Dresden in commemoration of the fiftieth anniversary of the accession of Frederick Augustus I. of Saxony; op. 59. The autograph is dated Dresden, Sept. 11, 1818, and the first performance was at the Court Theatre on Sept. 20. The overture winds up with 'God save the King.' Weber had written a Jubel cantata for the occasion, but it was put aside, and the overture—an entirely independent work—performed instead.

JUDAS MACCABÆUS. The twelfth of Handel’s English oratorios, written by command of the Prince of Wales. Handel himself is said
to have suggested the subject (apropos of the Duke of Cumberland’s victories in Scotland) to Dr. Morell, who made the libretto. The music was begun July 9, and completed August 11, 1746, and it was produced at Covent Garden, April 1, 1747. It has always been a favourite. ‘See, the conquering hero comes’ was transferred to ‘Judas’ from ‘Joshua.’ The air ‘Wise men flattering,’ and the chorus ‘Sion now,’ were introduced several years after the production of the oratorio, and the latter is said to have been one of the last pieces composed by Handel.

JUDENKÜNIG, Hans, a famous lutensist of the 16th century, who lived at Vienna about 1523, and who is said to have died in old age on March 4, 1526. This last date appears in writing in a copy of his book in the court library, Vienna. The book apparently consists of a number of short sections, the first of which is Utilla et compendiaria introducto, ... instrumentorum et luteine, et quod autu Geygen nominant; this is followed by Harmoniae super odis Hortationis; ... ; An schöne künstliche vorderweisung in disem biechlein, leydlichtlich beygebruyden den rechten grund zu lernen auff der Lauten vn Geygen, mit vleiss gemacht durch Hans Judenkünig; ... ; and finally Item das ander puechlein zuwernehmen. ... Pieces for the lute are contained in the book, copies of which exist at Berlin and Brussels as well as in two libraries at Vienna. (See Quellen-Lezikon, and an excellent article by A. Kozizir in the Sammelbände of the Int. Mus. Ges., vi. p. 237, where the titles of the sections of this book are given in full.) Ambros reprints an arrangement of a volksspiel in his History, ii. 282.

JUDGMENT OF PARIS, THE. A masque by William Congreve the dramatist. At the close of the 17th century a number of gentlemen, among whom the then Lord Halifax was considered chief mover and contributor, raised a sum of two hundred guineas to be given in prizes for the musical setting of a masque or similar subject, the ‘Judgment of Paris’ being finally selected for the contest.

On March 21, 1699, the London Gazette inserted this following advertisement: ‘Several persons of quality having for the encouragement of music advanced 200 guineas to be distributed in 4 prizes, the first of 100, the second of 50, and the third of 30, and the fourth of 20 guineas to each master as shall be adjudged to compose the best. This is therefore to give notice that those who intend to put in for the prizes are to repair to Jacob Touson at Grays Inn-gate before Easter next day, where they may be further informed.’ No record appears to exist as to what other competitors entered the lists, but the four prizes went in the order named to John Weldon, John Eccles, Daniel Purcell, and Godfrey Finger. Editions of the masque with Eccles’s music and with Daniel Purcell’s were published in folio by John Walsh. Weldon’s settings and Finger’s do not seem to have been ever printed in their entirety, though Weldon’s fine song from the masque, ‘Let Ambition fire thy mind’ was for a century deservedly held in much esteem.

The contest was held at the theatre in Dorset Gardens early in the year 1701. Congreve, the author of the libretto, describes it in a letter to a friend as being a most remarkable sight. The whole fashionable world was there, the usual orchestra portion being ‘turned into White’s chocolate house, the whole family being transplanted thither with chocolate, cooled drinks, ratafia, portico, etc., which everybody that would, called for, the whole expense being defrayed by the subscribers.’ He also states that there were eighty-five performers besides the vocalists, and that the back of the stage was built into a cave with deal boards faced with tin to throw forward the sound. See Literary Relics, p. 325.

In addition to the above were other musical productions under the title ‘The Judgment of Paris,’ including a ballad opera acted at Lincoln’s Inn Fields in 1731, and a burletta acted at the Haymarket in 1765. Dr. Arne also set a piece under the name, and this was published by H. Waylett in or near the year 1740. This publication also included the first edition of ‘Rule Britannia’ as part of its contents.

JUDITH. 1. An oratorio; words by Huggins, music by Defesch. Produced in London 1733. 2. An oratorio by Dr. Arne (his second); the words selected and adapted by Isaac Bickerstaff. Produced at Drury Lane Theatre, Feb. 27, 1761, and at the Lock Hospital Chapel Feb. 29, 1764. 3. A biblical cantata in three scenes; words selected from the Bible by Chorley, music by Henry Leslie. Composed for the Birmingham Festival, and first performed Sept. 3, 1858; also at St. Martin’s Hall, March 8, 1859. 4. An oratorio; composed by Sir C. Hubert H. Parry, produced at the Birmingham Festival of 1888.

JÜNGSTE GERICHET, DAS, ‘The Last Judgment.’ Spohr’s first oratorio. Written for and produced at the Festival at Erfurt, August 15, 1812, in honour of Napoleon I. It was not successful; but Spohr’s naïf account of the performance, and of his own predilection for it, is highly amusing. It is an entirely different work from ‘Die letzten Dinge,’ known in England as ‘The Last Judgment.’

JÜRGENSEN, Peter, a famous Russian music-publisher, born at Reval in 1836, founded the business known under his name in Moscow in 1861 with the main object of promoting the interests of the Russian composers; he published various works by Gluck, Tchaikovsky, Rimsky-Korsakov, and others, and did much to forward the appreciation of Russian music in other countries. He died in Jan. 1904, at Moscow.

JUIVE, LA. Opera in five acts; words by \[^1\] Sabatiergraphie, i. 168.
Scribe, music by Halévy. Produced at the Académie, Feb. 28, 1835. In England by the Brussels troupe at Drury Lane in French, July 29, 1846; in Italian, 'La Ebreà, at Covent Garden, July 25, 1850; in English, adapted by Henri Drayton, at the Surrey Theatre under Miss Romer's management, June 21, 1854. Revived with a new libretto by W. Grist, at Belfast in Sept. 1888.

JULLIEN, JEAN LUCIEN ADOLPHE, born in Paris, June 1, 1845, was the son and grandson of distinguished literary men, his grandfather, Bernard Jullien (1752-1829) having held various professorships, and his father, Marcel Bernard Jullien (1798-1881) having been for some years principal of the College at Dieppe, and subsequently editor of the Revue de l'instruction publique, and having taken a prominent part in the compilation of Littre's Dictionary. Adolphe Jullien was educated at the Lycée Charlemagne in Paris, and having taken the degree of licentiate in law, he completed his musical studies under Bienaimé, retired professor at the Conservatoire. His first essay in musical criticism was an article in Le Ménestrel, on Schumann's 'Paradise and the Peri,' which had just been produced unsuccessfully in Paris (1869). In that article his pronounced opinions in favour of the advanced school of music are expressed as fearlessly as they are in his most recent writings. He has ever since fought valiantly for musical progress of every kind, and in the Wagnerian controversy he has taken a position which cannot be sufficiently admired. His life of that master is not only a monument of accurate and erudite information, but a complete and in most cases just review of all his works, while the collection of caricatures and the other illustrations make the book exceedingly amusing. The companion volume on Berlioz is even better. But before engaging in the great musical battle of our day, he had proclaimed his convictions with regard to Schumann, and other composers who were too little appreciated in France, with great vigour and exhaustive knowledge of his subject. He has at various times contributed to the Revue et Gazette musicale, the Ménestrel, the Chronique musicale, the Renaissance musicale, the Revue contemporaine, the Moniteur du Bibliotheque, the Revue de France, the Correspondant, the Revue Britannique, L'Art. Figaro, and other periodicals. He was critic to the Francez from May 1872 to Nov. 1887, when that paper was amalgamated with the old Moniteur universel; since that time M. Jullien has remained on the staff. In March 1875, he became musical critic of the Journal des Débats, thus succeeding to the post held by Berlioz and Reyer. Besides exercising the ordinary avocations of a musical critic, he has made an intimate study of the history of the 15th century, especially in connection with the theatrical affairs of the time; and most of his earliest books, which have become exceedingly difficult to procure, treat of this subject. His first books, L'Opéra en 1788 (1873), and La Musique et les Philosophes au XVIIIe siècle (1873), were followed by several which have no direct bearing on music. A complete list of his works since 1876 is appended:—Un Potentat musical, etc. (1876); L'Église et l'Opéra en 1785 (1877); Weber à Paris (1877); Airs variés, histoire, critique, biographies musicales et dramatiques (1877); La Cour et l'Opéra sous Louis XVI (1878); La Comédie et la Galanterie au XVIIIe siècle (1879); Histoire du Costume au Théâtre (1880); Goethe et la musique (1880); L'Opéra secret au XVIIIe siècle (1880); La Viled et la Cour au XVIIIe siècle (in which is embodied the second of the earlier works, 1881); Hector Berlioz (1882); La Comédie à la Cour (1883); Paris dielantée au commencement du siècle (1884); Richard Wagner, sa vie et ses œuvres (1886); Hector Berlioz (1888); Musiciens d'aujourd'hui (1892 and 1894); Musique (1896), historical studies, La Romantisme et l'éditeur Renduel (1867).

JULLIEN (originally JULLIEN), LOUIS ANTOINE, was born at Sisteron, Basses Alpes, April 23, 1812. His father was a bandmaster, and the boy was thus familiar with instruments and music from his cradle. At twenty-one he went to Paris and entered the counterpoint class of Le Carpentier at the Conservatoire, Oct. 26, 1833. Composition, however, and not counterpoint was his object, and after a year's trial he quitted Le Carpentier for Halévy, Dec. 16, 1834, but with no greater success; he refused to do the exercises, and insisted on presenting the Professor with dances as specimens of 'composition'—not perhaps quite to Halévy's annoyance if it be true, as it used to be said, that the waltz 'Rosita,' which became the rage in Paris as Jullien's, was written by his master. He did not obtain a single mention at the Conservatoire, and at the beginning of 1836 finally left it, and soon after appeared before the public as the conductor of concerts of dance music at the Jardin Turc. The 'Huguenots' was just then in all the flush of its great success, and one of Jullien's first quadrilles was made upon the motifs of that opera, the announcement of which, as quoted by M. Félix, is exactly in the style with which Londoners afterwards became familiar. To this enterprise he joined the establishment of a musical paper. No wonder that he was unsuccessful. In June 1838 he became insolvent, and had to leave Paris. His first appearance in London seems to have been as conductor, jointly with Elinson, of shilling 'Concerts d'Été' at Drury Lane Theatre, which opened June 8, 1840, with an orchestra of ninety-eight, and chorus of twenty-six. On the 15th of the following January he conducted 'Concerts d'Off' at the same theatre, with a band of ninety and chorus of eighty.
These were followed by 'Concerts de Société' at the English Opera House, Lyceum, Feb. 7 to March 18, 1842, at which Rossini's 'Stabat Mater' was produced for the first time in England. In Dec. 1842, began his 'annual series of concerts' at the English Opera House, and thenceforward continued them season after season, at the close of the year, now at one theatre, and now at another, till the Farewell series in 1859. 'His aim,' in his own words, 'was always to popularise music,' and the means he adopted for so doing were—the largest band; the very best performers, both solo and orchestral; and the most attractive pieces. His programmes contained a certain amount of classical music—though at the beginning hardly so much as that given by some of his predecessors, who announced a whole symphony on each evening. This was probably too much for a sniffing audience in the then state of musical taste, and Jullien's single movements and weaker doses just hit the mark. Later on in his career he gave whole symphonies, and even two on one evening. No doubt this judicious moderation did good, and should always be remembered to his credit, or that of his advisers. But the characteristic features of Jullien's concerts were, first, his Monster Quadrille, and secondly himself. He provided a fresh quadrille for each season, and it was usually in close connection with the event of the day. The 'Allied Armies Quadrille' during the Crimean war 1854; the 'Indian Quadrille, and Havelock's March,' during the Mutiny, 1857; the 'English Quadrille'; the 'French ditto'; and so on. These were written by himself, and though then considered noisy were always rhythmical, melodious, and effective. In some of them as many as six military bands were added to the immense permanent orchestra. In front of this 'mass of executive ability,' the 'Mons'—to adopt the name bestowed on him by Punch, whose cartoons have preserved his image with the greatest exactness—with coat thrown widely open, white waistcoat, elaborately embroidered shirt-front, wristbands of extravagant length turned back over his cuffs, a wealth of black hair, and a black moustache—itsd a startling novelty—wielded his baton, encouraged his forces, repressed the turbulence of his audience with inexpressible gravity and magnificence, went through all the pantomime of the British Army or Navy Quadrille, seized a violin or piccolo at the moment of climax, and at last sank exhausted into his gorgeous velvet chair. All pieces of Beethoven's were conducted with a jewelled baton, and in a pair of clean kid gloves, handed him at the moment on a silver salver.

Not only did he obtain the best players for his band, but his solo artists were all of the highest class. Ernst, Sivori, Bottezini, Wieeniawski, Santon; Arabella Goddard, Marie Pleyel, Charles Hallé, Vivier; Sims Reeves, Fisckel, and many others, all played or sang, some of them for the first time in England, under Jullien's baton. In fact he acted on the belief that if you give the public what is good, and give it with judgment, the public will be attracted and will pay. And there is no doubt that for many years his income from his Promenade Concerts was very large. His harvest was not confined to London, but after his month at Drury Lane, Covent Garden, or Her Majesty's, he carried off his whole company of players and singers through the provinces, including Scotland and even Ireland, and moved about there for several weeks—a task at that time beset with impediments to locomotion which it is now difficult to realise. If he had but confined himself to the one enterprise, and exercised a proper economy and control over that! But this was impossible. He had started a shop soon after his arrival, first in Maddox Street and then in Regent Street, for the sale of his music. In 1847 he took Drury Lane theatre on lease, with the view of playing English operas. Mr. Gye was engaged as manager, and Berlioz as conductor, with a host of other officials, including Sir Henry Bishop as 'inspector-superintendent at rehearsals,' and a splendid band and chorus. The house opened on Dec. 6, with a version of 'Lucia,' in which Sims Reeves made his operatic début, and which was followed by Balfe's 'Maid of Honour,' 'Linda,' and 'Figaro.' 'All departments, says a contemporary article by one who knew him well, were managed on the most lavish scale; orchestra, chorus, principal singers, officers before and behind the curtain, vying with each other in efficiency and also in expensiveness. The result might have been anticipated. The speculation was a failure, and though his shop was sold for £3000 to meet the emergency, M. Jullien was bankrupt' (April 21, 1848). He left the court, however, with honour, and, nothing daunted, soon afterwards essayed another and still more hazardous enterprise. In May 1849 he announced a 'Concert monstre et Congrês musical,' 'six grand musical fêtes,' with 400 instrumentalists, three distinct choruses, and three distinct military bands. The first two took place at Exeter Hall on June 1 and 15, and a third at the Surrey Zoological Gardens on July 20. The programme of the first deserves quotation. It was in three parts:—1. David's ode-sinfonie 'Le Desert'—Sims Reeves solo tenor. 2. Mendelssohn's Scotch Symphony. 3. A miscellaneous concert, with Anna Thillon, Jetty Trettz, Miss Dolby, Braham, Fisckel, Dreyổhock, Mohique, etc. etc. This project too, if we may judge from its sudden abandonment, ended disastrously. In 1852 he wrote the opera of 'Pietro il Grande,' and brought

1 An amusing account of Berlin's early enthusiasm, and its gradual evaporation, will be found in his Correspondance Intime (1875), letters xxxv, to lixiv.

2 Musical Word, March 24, 1860.
it out on the most magnificent scale at the Royal Italian Opera, Covent Garden, on August 17, at his own cost. The piece was an entire failure, and after five performances was withdrawn, leaving Jullien a loser of some thousands of pounds. Shortly after this he visited America and remained there till June 28, 1854. On his return he resumed the regular routine of his metropolitan and provincial concerts. But misfortunes pursued him. On March 5, 1856, Covent Garden Theatre was burnt to the ground, and the whole of his music—in other words, his entire stock in trade—was destroyed: an irreparable loss, since his quadrilles and other original pieces were in MS. In 1857 he became involved in the Royal Surrey Gardens Company, and lost between £5000 and £6000. This enabled him to add to his achievements by conducting oratorios, but the loss, the protracted worry and excitement attending the winding up of the Company, and the involved state of his own affairs, which had been notoriously in disorder for some years and were approaching a crisis, must have told severely on him. The next season was his last in England. He gave a series of Farewell Concerts at the usual date—this time at the Lyceum, with a band reduced to sixty—made a Farewell provincial tour, and then, probably forced thereto by pecuniary reasons, went to Paris. There on the 2nd of May 1859, he was arrested for debt and put in prison at Clichy, but on the 22nd of the following month was brought up before the court, heard, and liberated with temporary protection. Early in March following an advertisement appeared in the papers headed 'Jullien Fund,' stating that he was in an Insane asylum near Paris, and appealing to the public on his behalf. Scarcely, however, was the advertisement in type when the news arrived of his death on March 14, 1860.

No one at all in the same category with Jullien, at least in modern times, has occupied anything like the same high position in public favour. 'His name was a household word and his face and figure household shapes, during a period of nearly twenty years.' Whatever the changes in his fortune his popularity never waned or varied. Frequent allusions were made to him in the periodicals. And why so? Because, with much obvious charlatanism, what Jullien aimed at was good, and what he aimed at he did thoroughly well. He was a public amuser, but he was also a public reformer. 'By his frequent performances of the music of Mozart, Beethoven, Mendelssohn, and other great masters, and by the constant engagement of the most eminent performers, he elicited at first the unconscious attention, and then the enthusiastic appreciation, of the vast multitudes that besieged his concerts, and that not merely in London but all over the provinces of Great Britain and Ireland. This will probably tend to preserve his memory among us even more than his unrivalled energy and talent, or his unprecedented zeal and liberality as a public entertainer. To Jullien, moreover, is attributable in a large measure the immense improvement which our orchestras have made during the last fifty years, he having been the means not only of bringing over some of the greatest foreign instrumentalists, but of discovering and nurturing the promise of many English performers, who through the publicity he placed at their disposal, no less than through their own industry and ability, have since attained acknowledged eminence.'

JUNCK, BENEDETTO, born August 24, 1852, at Turin, his mother being an Italian, and his father a native of Alsace. After a mathematical training at Turin, he was sent into a commercial house at Paris. He would from the first have preferred to make music his profession, but although the Junccks were a wealthy family, his father objected to the choice of so precarious a career. His natural bias, however, proved too strong; and instead of applying himself closely to business, Benedetto Junck devoted his time chiefly to music. Such musical education as he brought with him to Paris was slight, and almost entirely confined to the pianoforte. Hence the orchestral works of the great masters which he first heard in Paris keenly stirred his artistic temperament; and his ambition to dedicate himself to music became deeply rooted. In 1870 he returned to Turin as required by law to perform a year of military service, and about this time his father died. He was now free to follow his own inclinations, and at the age of twenty-two he went to Milan, and put himself under Alberto Mazzucato (then principal of the Milan Conservatorio) for a course of study in harmony and counterpoint. He also worked a short time under Bazzini. He died in 1905.

The list of his published works is as follows:—

1. 'La Simona,' a set of twelve songs for Soprano and Tenor words by Fontana. 1872.
3. Two Songs words by Beene. 1883.
5. Sonata for P.F. and Violin in D. 1885.

Although the earliest of Junck's works, 'La Simona' still stands pre-eminent among them for originality and power; but some of the 'Otto Romanze,'—especially Nos. 2 and 4, entitled Dolce sora and Pibbol traverso l' animo mio, are also compositions of a high order. The melodies are graceful and flowing, and the accompaniments are worked out with care and taste.

It is, however, in chamber-music that Benedetto Junck may be said to have rendered the most valuable service, because this kind of music has been neglected in Italy, and is consequently a scarce product there.
Moscow, where his father is a prominent official. In 1888 he joined the Moscow Conservatoire and studied the violin under Hrimaly, and composition under Taneiev and Arensky. He completed his studies at the Hochschule in Berlin, under the direction of Woldemar Bargiel, and was awarded the Mendelssohn scholarship. After a short stay at Baku, where he obtained a teaching post, he settled down in Berlin, and had the good fortune to attract the attention of Herr Lienau, head of the publishing house of Schlesinger, which has brought out all his compositions to date. These include two symphonies, of which the second, op. 23, was produced in January 1903 at Meiningen, where it received a flattering reception from that highly critical audience, further a sextet for strings and piano, two string quartets, a piano trio, violin sonata, viola sonata, and some pieces for stringed orchestra. His piano compositions are entirely in the small forms, the best known being the concert pieces, op. 12; 'Satyrs and Nymphs,' op. 18; and preludes and capriccios, op. 26. His style is an interesting blend of Russian and German, the material being almost invariably Slav in character, whilst the treatment is thoroughly German, leaning now towards Brahms, now towards less recent German writers of chamber music. His powers of development are strong, and characterised by solidity of thought, whilst the danger of heaviness is cleverly avoided by the use of an exceptional rhythmical ingenuity, probably as Slav in its origin as the themes he uses. He relies for his construction to a large extent on contrapuntal device, at which he is an adept, but he occasionally allows himself to drift into sequential passages which are lacking in interest, and he has an inordinate love for the variation form. Nevertheless, works like the second symphony, the piano sextet and trio, the viola sonata, and the variations in the violin sonata are sufficient to reveal a strong inventive faculty, whilst the method displayed leaves no doubt as to the composer's excellent equipment. The symphony in A was played in London at the Promenade Concert of Sept. 6, 1904, and at the Philharmonic Concert of June 8, 1905.

JUPITER

A sobriquet bestowed—whether by J. B. Cramer or not is uncertain—on Mozart's 49th and last Symphony in C major (Kochel, 551), and now to some extent classical, since even the conservative Mendelssohn uses it in his letter of March 7, 1845. The title seems to have been first used in the programme of the Philharmonic Concert of March 26, 1821. The symphony is quoted in Mozart's autograph catalogue, with the date August 10, 1788. The autograph is an oblong paper, ninety-one pages of twelve staves each, and belongs to Julius André, Frankfurt. Mendelssohn was the first to notice the fact that a favourite passage near the close of the Andante was an afterthought. (See the letter above quoted.) The symphony was published as a PF. duet by Breitkopf & Hartel, with the Finale of the Quintet in C (composed 1787) substituted for its own last movement.

JUST INTONATION

is a term which is sometimes used, though quite incorrectly, as a synonym for singing or playing in tune. (See Stainer and Barrett's Dictionary of Musical Terms, etc.) It has a special meaning and use among musicians, although it is of the rarest occurrence in practical music. Before the introduction of equal temperament, the process by which all the keys became equally available for practical use, the scale of C major was usually tuned, on keyboard instruments, in what is called Just Intonation, that is to say, the intervals were accurate in so far as they affected the key of C, and approximately so for a very few other keys on each side of it. The inherent error which is one of the paradoxes of music, and for which the reader must be referred to the articles Comma, Scale, and Temperament, was accumulated, as it were, in the intervals that were most rarely used, so that the key of C could be made to sound quite pure, and those of F, G, and some others, nearly so. But reference to the article Scale will show that absolute purity was unattainable in any two scales on a keyboard instrument, unless the number of keys was so greatly multiplied as to add very materially to its player's difficulties. The diagram in that article shows the relations existing, in Just Intonation, between the successive intervals, and it is seen that these intervals, between adjacent notes of the scale, are actually of four kinds, not the simple whole tone and semitone to which the modern system of temperament has equalised them, but major and minor tones, diatonic and chromatic semitones. Since the last interval occurs in no natural scale, we may for the present consider only the other three, and see in what way the difference of a major and minor tone affects practical music. If the scale diagram already referred to be examined, it will be found that the accurate interval between the first and second notes of the major scale is a major tone, that between the second and third notes a minor tone. The scale may be divided into two tetrachords of apparently similar, but actually different, construction; for in the last four notes the intervals are successively a minor tone, major tone, and semitone. It follows, therefore, that if the simplest passage be referred first to one key and then to another, in the course of modulation, there must in Just Intonation be an appreciable difference between what appears to be the same interval. If the following passage be taken as in the key of C, rising to the fourth from the keynote, the first interval will be a major tone, and the second a minor; if it be taken as in the key of F, rising from the dominant to the tonic, it is clear that the first interval must be a minor tone, thesecond
a major. Thus, the position of the note D must

\[ \begin{align*}
\text{Key of C:} & \\
\text{Major} & \text{Minor} & \text{Semi-} \\
\text{tone} & \text{tone} & \text{tone} \\
\end{align*} \]

Key of F.

be slightly higher in the first case than in the second. Such a difference as this is only just appreciable by a trained ear, but on instruments or voices that are capable of performing in Just Intonation the beauty of an untempered chord is unmistakable. The instruments of the violin family, on which the notes are not fixed, can be played in Just Intonation, and choirs that are in the habit of practising without the aid of keyboard instruments can be made to realise the difference and to make the intervals really accurate. Occasionally solo singers are to be found who can adapt their voices to give the correct intervals, but as a matter of course, the frequent modulations in modern music, causing delicate adjustment of pitch to be made at every moment, make it more and more difficult to realise Just Intonation in practice. The one violin player who most constantly observes scientific truth in his intervals is Joachim.

Neither the keyboard of the piano, nor the ordinary notation, has any means of making clear such differences as have been here described; but the ‘modulator’ of the Tonic Sol-Fa system (see Tonic Sol-Fa) in its larger form, shows very clearly the difference of size in the successive intervals, the syllable Ray being represented as far nearer to Me than to Doh. The truths of Just Intonation do not appear to be emphasised as they might be by Sol-Fa teachers, but in the training of the ear much may be and no doubt is, done unconsciously.
KADE, Otto, was born May 6, 1819, at Dresden, and already as a pupil at the Kronzschule, showed a decided predilection for music. He received lessons in harmony and counterpoint from Julius Otto and Moritz Hauptmann, and in pianoforte and organ-playing from J. G. Schneider. On the completion of his studies in 1846, the generosity of an uncle enabled him to make a prolonged stay in Italy for the purpose of musical study, especially of the older vocal music. On his return he founded, and for several years conducted, a Caeciliens-Verein or mixed choir for the performance of older vocal works. In 1860 he received the first prize from the Maatschappij tot bevordering der Toonkunst in Amsterdam (Society for the Furtherance of Music) for his valuable monograph on 'Mattheus Je Maistre,' a former capellmeister to the Court of Saxony. In the same year he accepted the invitation from the Grand Duke of Mecklenburg-Schwerin, Friedrich Franz II., to be musical director of the Schloss-kapelle at Schwerin. The Schloss-chor, which was organised on similar principles to the Berlin Dom-chor, was brought by Kade to a high pitch of artistic refinement, which placed it among the leading institutions of the kind in Germany. During the same time he was entrusted with the musical editorship of the Cantionale für die evangelisch-lutherischen Kirchen in Grossherzogtum Mecklenburg-Schwerin, which appeared in parts from 1868 to 1887. Along with this Cantional he also published a 'Choralbuch' for four voices, harmonised on the strict diatonic system of the 16th century. The first edition of this 'Choralbuch' appeared in 1869, a second in 1886. It appears to have been Kade who gave the first impulse to the foundation by Eitner of the Gesellschaft für Musikforschung, which led to the publication of the Monatshefte für Musikgeschichte from 1869 up to the present. Kade edited for the Gesellschaft Johann Walther's Witttenberger geistlich Gesangbuch of 1524, and was joint-editor with Eitner and Erk of Ott's Liederbuch of 1544. In 1862 Kade had been commissioned by the firm of Lenckart, the publishers of Ambros's Geschichte der Musik, to edit a supplementary volume, containing specimens of the most celebrated masters of the 15th and 16th centuries. This volume only appeared in 1882, but represents the fruits of many years' research in the various libraries of Italy and Germany. Thirty-five composers are represented, many of them previously unknown. In 1892 he published a volume entitled Die älteren Passionsskompositionen bis zum Jahre 1621 (Gütersloh, 1892), which gives an account of the various compositions of the Passion in the 16th century, and gives the actual notes of the Obrecht, Walther, and Scandelli Passions. As part of his official work at Schwerin he published, in 1896, a Catalogue of the Grand-Ducal Musical Collection. Other works of Kade are Der Neuauffundene Lutheric-Codex (with facsimiles), 1871, and Die deutsche weltliche Liederdreie, 1872. He retired from active service in 1893, and died at Doberan near Rostock, July 19, 1900.

List of the pieces contained in Kade's supplementary volume to Ambros's Geschichte der Musik:—

1. Ockeghem. Sanctus and Benedictus from Missa 'Cujuscumque' a 4.
2. Chausson. 'Je n'ay deul,' a 4.
3. ... 'Lauder dantant,' a 3.
4. ... 'Ne se pas,' a 4.
5. ... 'Se vos content,' a 3.
6. ... Fuga 3 vocum in Ephesiusarem.
8. ... Chausson. 'Porselement,' a 4.
9. ... 'La Leyden,' a 4.
10. ... 'Se bien faut,' a 4.
11. ... Saive Regina, a 3.
12. ... Josquin des Præcis. Salve Mater, a 5.
13. ... Missa. 'Pange lingua,' a 4.
14. ... Chausson. 'J'ai bien cause,' a 6.
15. ... 'Je go bien,' a 4.
16. ... ... 'Adieu, ames amores,' a 4.
17. ... ... 'La Mouvement,' a 4.
18. ... Piere de la Rue. Sanctus from Missa 'Tous les regrets,' a 4.
19. ... Salve Regina, a 4.
20. ... Moritz A. Brunner. Missa Festiva, from Crucifixus to end, a 2, 3, 4.
21. ... Regina Coeli, a 4.
22. ... A. Agricola. Chausson. 'Coume Femne,' a 3.
23. ... Gaspar Werbcke. Motet. 'Virgo Maria,' a 4.
24. ... Lepetz Conpere. Chausson. 'Nous sommes de l'orde de St. Baboulin,' a 4.
25. ... Ohinlein. Chausson. 'La Alphonse,' a 3.
26. ... De Orto. Ave Maria, a 4.
27. ... Amon Sancto Missa. 'Mi-mi,' a 4.
28. ... Layolle. Salve Virginis singularia,' a 4.
29. ... 'Media vita in nempe somnus,' a 4.
30. ... A. Fevin. Motet. 'Descending in humbom morsa,' a 4.
31. ... Eleazar Genet. Lamentations, a 3 and a 4.
32. ... Nicolas Geembert. Ave Regina, a 4.
33. ... B. Dax. Geistliche deutsche Lieder, a 4.
34. ... Heinrich Finck. Missa. De Renta Virgine, a 3.
35. ... Thomas Stotter. Psalm 12. 'Hill, Herr,' a 4.
36. ... Paul Hoffweyers. 3 deutsche weltliche Lieder, a 4.
37. ... Beatrich Hassen. Motet. 'Himmels ornament melo,' a 3.
38. ... ... 'Virgo Prudentissima,' a 6.
39. ... ... 'In te confido,' a 5.
40. ... ... 'Vita et labora,' a 6.
41. ... ... 'Salve Regina,' a 3.
42. ... ... 'Deo gratus,' a 3.
43. ... ... 'Salve Regina,' a 3.
44. ... ... 'Vivite,' a 3.
45. ... ... 'Nun confiteor,' a 3.
46. ... ... 'Salve Regina,' a 6.
47. ... ... 'Salve Regina,' a 3.
48. ... ... 'Vivite,' a 3.
49. ... ... 'Nun confiteor,' a 3.
50. ... ... 'Quis me detestaret?,' a 3.
51. ... ... 'Vivite,' a 3.
52. ... ... 'Nun confiteor,' a 3.
53. ... ... 'Salve Regina,' a 3.
54. ... ... 'Vivite,' a 3.
55. ... ... 'Nun confiteor,' a 3.
56. ... ... 'Salve Regina,' a 3.
57. ... ... 'Vivite,' a 3.
58. ... ... 'Nun confiteor,' a 3.
59. ... ... 'Salve Regina,' a 3.
60. ... ... 'Vivite,' a 3.
61. ... ... 'Nun confiteor,' a 3.
62. ... ... 'Salve Regina,' a 3.
63. ... ... 'Vivite,' a 3.
64. ... ... 'Nun confiteor,' a 3.
65. ... ... 'Salve Regina,' a 3.
66. ... ... 'Vivite,' a 3.
67. ... ... 'Nun confiteor,' a 3.
68. ... ... 'Salve Regina,' a 3.
69. ... ... 'Vivite,' a 3.
70. ... ... 'Nun confiteor,' a 3.
71. ... ... 'Salve Regina,' a 3.
72. ... ... 'Vivite,' a 3.
73. ... ... 'Nun confiteor,' a 3.
74. ... ... 'Salve Regina,' a 3.
75. ... ... 'Vivite,' a 3.
76. ... ... 'Nun confiteor,' a 3.
77. ... ... 'Salve Regina,' a 3.
78. ... ... 'Vivite,' a 3.
79. ... ... 'Nun confiteor,' a 3.
80. ... ... 'Salve Regina,' a 3.
81. ... ... 'Vivite,' a 3.
82. ... ... 'Nun confiteor,' a 3.
83. ... ... 'Salve Regina,' a 3.
84. ... ... 'Vivite,' a 3.

Kuhn, Robert, born at Mannheim, July 21, 1865; studied with Lachner in his native town, with Kiel in Berlin, and Rheinberger in Munich, and afterwards profited by the society of Brahms in Vienna and of Joachim in Berlin, so that he has had exceptional opportunities for becoming acquainted with all the best influences in German Music. In 1890 he undertook the direction of a choir of ladies'
voices in Leipzig, a post which he held for three years, writing many compositions for female voices with and without orchestra. At the present time he is teacher of composition in the Hochschule of Berlin, and his chamber compositions are highly esteemed throughout Germany. They include a string quartet in A, two quartets for piano and strings (opps. 14 and 30), a trio in E major, two sonatas for piano and violin (one in G minor, op. 5, was played in March 1896 by Joachim at a Monday Popular Concert), many songs, duets, and pianoforte solos. 'Mahomet's Gesang,' for choir and orchestra, is Kahn's most important work in the larger forms.

M. KAHRRER-RAPPOLD, Mme. Sch.RAPPOLDI.

KALINNIKOV, BASIL SERGELTCH, composer, born Jan. 13, 1866, in the Government of Orlov; died at Yalta, Jan. 11, 1901 (Dec. 29, 1900 O.S.). He was the son of a police official, and was educated in the Orlowsky Seminary, where for a time he directed the choir. In 1884 he came to Moscow in great poverty, but succeeded in entering the Music School of the Philharmonic Society. He studied the bassoon, and also composition, under Iljin-sky and Blaramberg. Having completed a brilliant course at this school, Kalinnikov was appointed assistant conductor to the Italian Opera, Moscow, for the season 1893-94. Unhappily the privations he had undergone had told upon his health. Symptoms of consumption now began to show themselves, and he was ordered to relinquish his work and winter in the Crimea. The remaining years of his life were devoted entirely to composition. There seems no doubt that, but for his premature death, Kalinnikov would have won a high place among Russian musicians. His First Symphony is a spirited work, full of fresh and healthy inspiration, and very national in style. It has met with great success in Russia, and has also been heard in Vienna (1898), Berlin (1899), and Paris (1900). His principal works, published mostly by Jürgenson, include: cantata, 'St. John Chrysostom'; two symphonies (G minor and A major); two orchestral intermezzi; orchestral suite; two symphonic sketches; incidental music to A. Tolstoy's play, 'Tsar Boris' (1899); string quartet; 'The Roussalka,' ballad for solo, chorus, and orchestra; songs and pianoforte pieces.

KALKBRENNER, Friedrich Wilhelm Michael, pianist, and prolific composer for his instrument, was born about 1784 on a journey between Cassel and Berlin. His father, Christian Kalkbrenner (1735-1806), of Hebrew extraction and a musician of considerable ability, began his training early. In 1788 he entered the Conservatoire at Paris, and left it, after four years of assiduous study, with a prize for pianoforte playing and composition. In 1813 he played in public at Berlin and Vienna, heard Clementi, made Hummel's acquaintance, and was introduced by Haydn to Albrechtsberger, from whom he had lessons in counterpoint. From 1814 to 1823 he resided in London, much sought after as a player and fashionable teacher. [He was a champion of the system of Logier and the Chiroplast.] In 1824 he settled in Paris as a member of the pianoforte-making firm of Pleyel & Co. In Paris, too, his success as a performer and teacher was very great; he was a shrewd man of business and managed to amass quite a fortune. Madame Camille Pleyel was his best pupil. When Chopin came to Paris in 1831, Kalkbrenner's reputation was at its height: his compositions, mostly written for the market and now forgotten, were upon the desks of all dilettanti, and his playing was upheld as a model. Chopin, who was then only twenty-two years of age, but had already written his two Concertos, the Etudes, op. 10, the first Scherzo and Ballade, etc., called on him and played his Concerto in E minor, whereupon Kalkbrenner came forward with the astounding proposal that Chopin should bind himself to be his pupil for three years and thus under his guidance become a good artist! Chopin took no lessons, but attended certain class-meetings, and soothed Kalkbrenner by dedicating the Concerto to him. In a letter dated Dec. 16, 1831, Chopin speaks in high terms of Kalkbrenner's technique, praises his charming, equable touch and quiet self-possession, and says that Herz was a zero compared with him. Still Chopin seems from the first to have been of Mendelssohn's opinion, who said to him soon after, 'You had nothing to learn from Kalkbrenner; you play better than he does.'

Kalkbrenner was a man of great vanity, and far from scrupulous as to the means by which he strove to enhance his reputation. Professor Marx used to tell a story how Kalkbrenner called on him in 1834 at Berlin, anxious to make a good impression, as the Professor was then editor of the new Berliner Musikzeitung, and an influential personage. The visitor in moving terms deplores the decay of the good old art of improvisation, saying that since Hummel had retired he was the only one who still cultivated it in the true classical spirit. He opens the piano and improvises for a quarter of an hour with fluent fancy and great neatness, interweaving all manner of themes, even a little fugue, much to the Professor's edification. Next day a parcel of music just printed at Paris arrives for review. The critic attended the music and interpolated fresh praise for its appearance on the Paris stage. Sept. 17, 1865 (see Lajarte, Bibl. mus. de l'Opera, i. 8).
Professor, greatly interested, opens the topmost piece—'Effusio Musica', by Fred. Kalkbrenner: 'when lo and behold! he has yesterday's improvement before him, fugue and all, note for note!

An instruction-book with études belonging to it is the best thing Kalkbrenner left. His attainments as a musician are shown in four pianoforte concertos, one for two pianos, a septet, sextet, and quintet, and various sonatas; all correctly and well written for the instrument, but dull and trite, spite of the gliter of what was called a 'brilliant' style. [See Mendelssohn's Letters, and the Life of Moscheles, passim; Life and Letters of Sir Charles Hallé, p. 212.; and Niecks's Chopin, i. 232-240.]

Kalkbrenner died of cholera at Enghien, near Paris, on June 10, 1849.

KALLIWODA, JOHANN WENZELAUS, a violin player and popular composer, was born at Prague, March 21, 1800. From 1811 to 1817 he was a pupil of the Conservatorium, under Dionys Weber and Pixis, and from 1817 to 1825 a member of the orchestra of that town. During a visit to Munich he was introduced to Prince Fürstenberg, who took a lively interest in his talent, and appointed him conductor of his private band at Donaueschingen, which post Kalliwoda retained, in spite of various offers from more important places, for the rest of his professional life, till he retired on a pension in 1853. He died at Carlsruhe, Dec. 3, 1866.

Kalliwoda, as a violinist, is regarded as one of the best representatives of the Prague school under F. W. Pixis. Without possessing very startling qualities of execution or style, his performances showed a well-finished technique, a sympathetic but not large tone, and were altogether more remarkable for elegance and a certain pleasantness than for vigour or depth of feeling.

As he travelled but little, his reputation mainly rests on his compositions. They consist of seven Symphonies—F minor (1826); E♭; D minor; C; B minor (op. 106); G minor; and F—Overtures, Concertinos, and other Solo pieces for the violin and other orchestral instruments, especially the clarinet, Quartets for stringed instruments, Violin Duets, Pianoforte pieces, and a number of songs. Many of his works enjoyed for some time, and chiefly in amateur circles, a considerable popularity; and the index of the Leipzig Allg. Mus. Zeitung shows a long list of performances. The works are certainly not of much importance in an artistic sense, and show little originality; but on the other hand, they are free from laboured efforts and ambitious striving after startling effects, are written in a thoroughly musically, unpretentious, and unaffected style, easy to understand, pleasing and effective. Their day is now over, but Schumann (in his Gesamm. Schriften, iii. 278) speaks of Kalliwoda's fifth Symphony with enthusiasm, and mentions the interesting fact that only a few years previously Kalliwoda had put himself under Tomaseck of Prague for improvement in some branches of counterpoint in which he felt himself weak. Schumann further testified his esteem by dedicating his Intermezzi (op. 4) 'al Sign. Kalliwoda.' In the history of the music of the last century Kalliwoda occupies as an orchestral composer a position somewhat analogous to Onslow's as a composer of chamber-music.

His son William, born at Donaueschingen, July 19, 1827, was thoroughly well brought up by his father, and was for a short time a pupil of Mendelssohn's at Leipzig in 1847, and of Hauptmann's in 1848. He held various posts at Carlsruhe with credit to himself, and succeeded his father as conductor at Carlsruhe, but was compelled by ill-health to for sake work, in 1875, and died at Carlsruhe, Sept. 8, 1883. F. D. KAMMERTON. See Pitch.

KANDLER, FRANZ SALES, a musical historian, to whom we owe an admirable condensation of Bain's Palestrina; born August 23, 1792, at Kloster-Neuburg in Lower Austria. He belonged to the War Office, and was as interpreter with the army to Venice and Naples in 1817 and 1821. He died of cholera at Baden near Vienna, Sept. 26, 1831. His two works are Cenni storico-critici alla vita ed opere del . . . G. Ad. Hasse (Venice, 1820; 2nd ed., Naples, 1820), and that above mentioned, Ueber das Leben und die Werke des . . . Palestrina, etc. This was published after Kandler's death by Kiesewetter (Leipzig, B. & H. 1834). Another posthumous publication, collected from Kandler's contributions to musical periodicals, was Cenni storico-critici sulle vicende e lo statoattuale della musica in Italia (1836).

KAPELLE, or CAPELLE, a musical establishment, originally denoting a choir, as the 'Cappella Sistina,' etc., but now usually applied to an orchestra. The word was formerly used of the private band of a prince or other magnifico, but is now used to denote any band. Thus at Berlin, the Kaiserliche königliche Kapelle (ninety-seven musicians, called Kammermusiker) forms the regular orchestra of the Grand Opera, with two Kapellmeisters (Conductors), a Concertmeister (Leader or first Violin), and a Balettiradirettiro (Balletmaster). See Pitch.

KAPSBGER, JOHANN HIERONYMUS, a prolific composer and skilled musician, flourished at Venice about 1604, and elsewhere in Italy. He attained great skill on instruments of the lute family, and among his publications were three books of Intabolationi di Chitarre (1604, 1616, 1626); four of 'Villanelle' for voices, with chitar- rone accompaniment (1610, 1619, 1619, 1626); besides motets, arias, a wedding chorus (1627), and an Apotheosis of Ignatius Leyola (1622). He is mentioned with great eulogium by Kircher (Musurgia). He seems to have died about 1638.
as no work of his of later date is known. For list see the Quellen-Lexikon. [See Ambros, Gesch. d. Mus. vol. iv. p. 126.]

KARAJAN, THEODORE GEORG, RITTER VON, Dr. juris., philologist, and historian, born at Vienna, Jan. 22, 1810: clerk (1841) and customs (1854) in the court library, appointed vice-president (1851), and president (1859) of the Akademie der Wissenschaften; received the order of Leopold in 1870, and died April 28, 1873. His philological works are numerous and important; but his title to admission here is his pamphlet, J. Haydn in London, 1791 und 1792 (Vienna, Gerold, 1861). In addition to matter from the well-known pamphlets of Dries and Genzinger, it contains a number of Haydn's letters, chiefly from London and Estoril, to his friend Maria Anna von Genzinger, the wife of Leopold Peter, Edler von Genzinger, an esteemed physician, with four from the lady herself. She played the piano well, and even composed. Haydn wrote several sonatas for her, and whenever he was in Vienna spent much of his time at her house, where a pleasant musical society was generally to be found. Karajan also furnished his friend Otto Jahn with valuable material for his book on Mozart.

C. R. F.

KASKHIN, NICHOLAS DMITRIEVICH, born at Voronezh, Dec. 9, 1839. He received his first instruction in music from his father, a bookseller, who was self-taught in the art. As early as thirteen, Kashkin found himself obliged to give music lessons on his own account. In 1860 he went to Moscow, where he studied the piano under Dubuque. N. Rubinstein observed his talents, and offered him a post as teacher of pianoforte and theory at the classes of the Musical Society, which in 1866 developed into the Conservatoire. He retained this position until 1896, and was one of the most popular teachers in Moscow. Kashkin, an able writer, was musical critic of the Russky Vedomosti from 1877 to 1878, and again from 1886 to 1897. He was also on the staff of the Moscov Vedomosti. He is the author of several books and pamphlets, but is best known abroad by his Reminiscences of Tchaikovsky (1896), with whom he was long associated in intimate friendship.

R. N.

KASHPEROV, VLADIMIR NIKITICH, composer and teacher of singing, born at Simbirsk, 1827; died July 8, 1894. He first studied with Potta and Henselt in St. Petersburg, and in 1850 composed an opera, 'The Gipsies' ("Taisganer"), some scenes from which were performed. In 1856 he visited Berlin, where he worked under the celebrated theorist Dehn. From Germany Kashperev went to Italy. Here he made a special study of vocal art. His opera, 'Marie Tudor' (1859), was produced at Milan with some success. Other operas followed: 'Rienzi' (Florence, 1863), 'Consuelo' (Venice), 'The Storm' (St. Petersburg, 1867), libretto by Ostrovsky, was an attempt at national opera, as was also 'Taras Boulba' (Moscow, 1893). From 1866 to 1872 Kashperev was professor of singing at the Moscow Conservatoire. He did great service to the musical life of the town by organising gratuitous choral classes, which were very much appreciated.

R. N.

KASTNER, JOHANN GEORG, born at Strasbourg, March 9, 1810. He was destined to theology; but music conquered, and the successful performance of his operas, 'Die Königin der Sarmaten,' induced the town council of Strasbourg to grant him the means of going to Paris in 1835, where he finished his studies under BERTON and REICHA, and resided till his death there, Dec. 19, 1867. In 1837 he published his Treatise on Instrumentation, the first work of the kind in France, and the beginning of a long series of elementary treatises. He was not less fruitful as a composer of operas:—'Beatrice' (German), 1839; 'La Maschera,' at the Opéra Comique, 1841; 'Le dernier Roi de Jude,' his best work, given at the Conservatoire, 1844; 'Les Nonnes de Robert-le-Diable, 1845, and a number of vocal and instrumental compositions large and small, including his Livres-Partitions, half music, half treatises. Besides the numerous works enumerated below, Kastner was a voluminous contributor to the Gazette Musicale, the Ménestrel, and the Revue étrangère, as well as to the German periodicals, Iris, Ally, musikalische Zeitung, Neue Zeitschrift, Cecilia, and many others. Every spare moment was directed to the preparation of a vast Encyclopaedia of Music, which remained unfinished at his death. Such learned industry obtained its deserved reward, Kastner was made an Associate of the French Academy, and was also decorated by a very large number of institutions outside of France.

For the details of his honourable and useful life we must refer to the exhaustive biography by Hermann Ludwig (Breitkopf & Hartel, three vols. 1886), with complete Lists, Indexes, etc., a monument raised to Kastner's memory by the devotion of his widow. His library has been acquired by his native city.

List of Kastner's Works

STRAETNER, 1826-1855. Five Operas; three Symphonies; five Overtures; PF. Concertos; Marches; Choruses; Waltzes; tea Serenades for Wind Instruments.

Paris. Opera — Beethoven (1839); La Maschera (1841); Le dernier Roi de Jude (1844); Les Nonnes de Robert-le-Diable (1846). Hymns, Cantatas: La Reurrection (1846); Bastardenale (1850); Cantate Academica (1859). Sonnets for Voices and PF. Songs:— Les derniers moments d'un Artiste; Le veteran; Le negre; Ossianism; Judas Iscariote; etc., for voices in all. Fort songs, chiefly for various voices — Bibliothèque chorale, 72 nos.; Heures d'amour, 6 nos.; Les chants de la vie, 28 nos. (1844); Les chants de l'armée Française, 20 nos.; Les oracles, etc., etc., twenty-six more in all. Piano — Vailes and Galope de Strasbourg, three sets; Waltzes, Polkas, Marches, etc., twenty-one more in all. Orchestra — two Overtures of Festival, in Eb and C; three symphonies — two pieces for Saxophone and PF. Treatises:— Contra dire concours sans les rapports politiques, etc. 2. traité gén. d'Instrumentation (1837). 3. Grammaire musicale (1837). Théorie absolu du contrepoint et du Mélodie élementaire d'harmonie. 6. Supplements to Nos. 1, 2, and 3. 7. Méthodes élémentaires, de chant, piano, violon, harpe, lute, et cor anglais, etc. 8. Théorie générale de l'harmonie, etc. (1841). 9. Cours d'harmonie moderne. (1842). 10. Méthodes élémentaires d'harmonie, clavecin, cor, violon, etc. (1843). 11. Méthode . . . de Saxophone (1844).
Kastner's son GEORG FRIEDRICH EUGEN, born at Strasburg, August 10, 1852, devoted himself to physical sciences, especially to the law of vibrations. He was the inventor of the 'Pyrophone,' an instrument for the employment of 'singing flames.' He brought the subject before the Académie des Sciences, March 17, 1873; and issued a book, Le Pyrophone: Flamines chantantes, which reached its 4th edition in 1876. (See also Journal of Society of Arts, Feb. 17, 1875.) Shortly after this he was seized with serious illness, and expired April 6, 1882. His memoir occupies the concluding chapters of his father's life by H. Ludwig (B. & H. 1886). 6.

KEARNS, WILLIAM HENRY, a prominent figure in London musical life in the middle part of the 19th century. He was born at Dublin in 1794, and came to London in 1817, where he played the violin at Covent Garden Theatre. He wrote an operetta in that year, called 'Bachelors' Wives,' or the British at Brussels.' He soon, however, became the musical adviser to Arnold and Havas, and 'Der Freischütz,' 'Azor and Zemira,' 'Robert the Devil,' and many other foreign operas were brought out under his direction at Covent Garden. Kearns wrote the additional wind accompaniments to the 'Messiah' and 'Israel in Egypt,' for the Festival at Westminster Abbey in 1854, as well as for Handel's choruses at provincial festivals. In 1845 he assisted Gauntlett in editing the Comprehensive Tune-book. He died in Prince's Place, Kennington, Dec. 28, 1846. 6.

KEEBLE, John, was born at Chichester in 1711, and was brought up as a chorister in the cathedral under Thomas Kelway. He afterwards became a pupil of Dr. Pepusch, and was in 1737 appointed successor to Thomas Roseingrave as organist of St. George's, Hanover Square, allowing Roseingrave one-half of the salary until his death in 1750. Keeble was also organist at Ranelagh Gardens. In 1784 he published The Theory of Harmonics, or, an Illustration of the Geometric Harmonics, a work which attracted attention. He published five books of organ pieces, and, jointly with Kirkman, '40 Interludes to be played between the verses of the Psalms.' He was an excellent organist and able teacher. He died in London, Dec. 24, 1756.

KEEL ROW, THE. A melody adopted by Tynesiders and Northumbrians generally, as their own special tune, and frequently used by them on occasions of local gatherings and celebrations. The origin of the air is obscure. Under its own title it is said to appear in a manuscript volume of tunes which in one place is dated 1752. The MS. is in a private collection, but as to how far this date may go as establishing the period of the writing down of the whole volume, the present writer is unaware. Apparently the earliest occurrence of the tune in print is in a Scottish publication entitled A Collection of favourite Scots Tunes with Variations . . . by the late Chs. M'Lean and other Eminent Masters . . . Edinburgh, printed for and sold by N. Stewart at his Music Shop opposite the Tron Church, ob. folio. This imprint satisfactorily shows that the date of this publication is between 1770 and 1772. The version of the air is as under, the variations being here omitted—

\[\text{Well may the keel row.}\]

\[\text{Weel may the keel row.}\]

\[\text{As I went up Sandgate,}\]
\[\text{As I went up Sandgate,}\]
\[\text{Weel may the keel row,}\]
\[\text{Weel may the keel row,}\]
\[\text{That my laddie's in.}\]
\[\text{He wear a blue bonnet (etc.),}\]
\[\text{A dimple in his chin,}\]
\[\text{And weel may the keel row (etc.).}\]

Other early copies are in Shield's Thorough-Bass, circa 1510-16, and in Topliff's Melodies of the Tyne and Wear, circa 1812. The original words are printed in Joseph Ritson's Northumberland Garland, 1793:—

As I went up Sandgate,
As I went up Sandgate,
Weel may the keel row,
Weel may the keel row,
That my laddie's in.
He wear a blue bonnet (etc.),
A dimple in his chin,
And weel may the keel row (etc.).

In Cromek's Remarks of Northendale and Gallo-Way Song, 1810, there is a supposed Jacobite version beginning—

As I came down the Cannogate (etc.)—

with the refrain—

Merry may the keel row,
The ship that my love's in.

There is also a statement that the air is a 'popular bridal tune in Scotland.' The song, with a slow version of the melody, is repeated in Hogg's Jacobite Relics, second series, 1821. Another version of the song, evidently by Allan Cunningham, is in the latter's Songs of Scotland, vol. iii. 1825.

The Scottish or Northumbrian origin of the 'Keel Row' is a frequent bone of contention, and a newspaper warfare breaks out at intervals between the partisans of both parties. The word 'keel' is of Saxon origin, and is used in northern England to define a barge.

The theme of the first strain is common to many English country dances of the middle of the 18th century. One of these is in Johnson's
Choice Collection of 200 Country Dances vol. 4to 1748, London, ob. 8vo, as follows:

*Yorkshire Lad.*

Another, even more like, is named *'The Dumb Waiter'* in Rutherford's collection, circa 1751:

*Dumb Waiter.*

The above bears another name, *'The Dumb Glutton,*' in a later collection, *'Le Double Entendre,'* 1759; *'Smiling Polly,'* 1763; *'Shamboy Breeches;* 'Charlie is at Edinburgh,' are other 18th-century dances strongly resembling the *'Keel Row.'*

F. K.

**KEELEY, MRS. (MARY ANNE GOWARD),** was born at Ipswich, Nov. 22, 1805. Being endowed with a pure soprano voice of remarkable compass, she was apprenticed for seven years to the well-known teacher of music, Mrs. Smart (a sister-in-law of Sir George Smart and mother of Henry Smart), under whom she made her first appearance on the stage at Dublin in 1824. On July 2, 1825, she appeared in London at the Lyceum, then under the management of Arnold. The performance consisted of *'The Beggar's Opera,'* (with Thorne, Miss Stephens, and Miss Kelly), Shield's *'Rosina,'* and *'The Spoiled Child,'* in which last two pieces Miss Goward played. The event is thus chronicled in the *Times* (July 4):—'Miss Goward, the débutante, appeared as Rosina in the opera of that title. She is young, of a slender figure, and with intelligent features. Her voice is pretty, and after she had overcome the first embarrassments of her entrance, she went through the part very successfully. She sang the songs in a simple manner, which deserved the applause she received. It is dangerous to prophesy at first appearances, but we may, nevertheless, venture to say that this young lady promises to make a very fine actress. Miss Goward played Little Pickle in the *'Spoiled Child' very well indeed.' In the same season she sang Annetta in *'Der Freischütz'* with Brahms and Miss Paton. On April 12, 1826, on the production of Weber's *'Oberon'* at Covent Garden, she undertook the small but important part of the Mermaid, the music of which had been previously tried by Miss Love and Miss Hammeraley, both of whom declined to sing it owing to the difficulty of hearing the delicate orchestral accompaniments at the back of the vast stage where the Mermaid had to appear. 'Little Goward shall sing it,' said Weber, and she overcame this obstacle, as J. R. Planche states (Recollections and Reflections, vol. i.): 'She was even then artist enough to be entrusted with anything,' and her singing of the Mermaid's music earned for her the personal thanks of the composer. For the next few years Miss Goward continued to sing in English opera, but after her marriage with the well-known comedian, Robert Keeley (which took place on June 26, 1829), she devoted her talents entirely to comedy, in which she was one of the greatest artists of the English stage. In the present work it would be out of place to trace her dramatic career. Mrs. Keeley never formally left the stage, but for many years took the greatest interest in theatrical affairs, and was loved and respected as the *doyenne* of the profession. She died in London, March 12, 1889.

W. B. S.

**KEISER, REINHARD,** an eminent German opera-composer, born 1673 (baptized Jan. 12, 1674), at Teuchern near Weissenfels, Leipzig. He was grounded in music by his father, a sound church composer, and afterwards attended the Thomasschule of Leipzig, under Johann Schelle, at the same time coming frequently before the public at the many concerts renowned even then for their excellence. In 1692 he was commissioned to set a pastoral, *'Ismena,'* for the court of Brunswick, and its success procured him the libretto of *'Basilius.'* In 1694 he removed to Hamburg, and there remained for forty years a favourite with the public. *'Irene'* (1697) was the first of a series of 116 operas composed for the Hamburg theatre, each containing from 40 to 50 airs, besides operas in collaboration with others, and sacred music. Keiser was luxurious and self-indulgent, and led an adventurous life, but without sacrificing his love of art or his taste for intellectual enjoyments. In 1700 he opened a series of winter-concerts, which formed a remarkable combination of intellectual and sensual gratification; the most accomplished virtuosi, the finest and best-looking singers, a good orchestra, and carefully selected programmes, furnishing the former, and a banquet of choice viands and wines the latter. In 1703 he assumed the direction of the opera in conjunction with Drusiske, but his partner absconded, and the whole burden fell upon the shoulders of Keiser. He proved equal to the emergency, for in one
year (1709) he composed eight operas, married the daughter of a Hamburg patrician, and musician to the municipality ‘Oldenburg,’ and having completely reinstated his affairs, plunged into all his former extravagant indulgence. In 1716 he resumed his concerts; was at the court of Stuttgart from 1719 to 1721; in 1722 visited Copenhagen and was appointed capellmeister to the King of Denmark; in 1725 he was made cantor and canon of the Hamburg cathedral, and again turned his attention to sacred music. He composed operas up to the year 1738, and died Sept. 12, 1739. His wife and daughter are said to have been accomplished singers.

Keiser exercised an important though not a permanent influence on German opera. The perfection to which at first he raised the opera at Hamburg speedily degenerated into mere outward show and trivial if not vulgar farce; but the sensation he produced at first is described by his contemporaries as extraordinary. Mattheson, who was not likely to exaggerate the successes of a rival, in his life-like picture of the musical condition of Hamburg, calls Keiser the first dramatic composer in the world, and says that no other music than that of ‘dieser galante Componist’ was either sung or listened to. [See his Musikalische Patriot for list of operas given in Hamburg, and Mattheson’s other books for criticism on his music. Keiser contributed some remarks to Mattheson’s Neuer-eröffnetes Orchester.] His melodies were smooth and graceful, and full upon the ear ‘like charmed accents after the dull pedantries of the contrapuntists of the day.’ That his melody was spontaneous his facility itself proves, and he was the first who endeavoured to convey the sentiment of the character in the music. This was the secret of his success, and it was by this that he enabled German opera to hold its own against the declaration of the French, and the melody and fine singing of the Italians. In sacred music he shines chiefly in oratorio, which he treated dramatically, but with an earnestness and dignity surprising in a man of his character. In judging Keiser in this department we must not forget that Bach’s Passions, and Handel’s Oratorios were then not known, scarcely ever composed; yet notwithstanding his want of models, his works compare favourably with the insipid sacred music of the latter half of the 18th century, produced under far greater advantages than were open to him. His sacred compositions include ‘Der für die Sünde der Welt gemarterte und sterbende Jesus,’ 1712; ‘Der verurtheilte und gekreuzigte Jesus,’ published 1715 (poem by Brockes of Hamburg); a Passion according to St. Mark, and other historical oratorios, motets, cantatas, and psalms. He published extracts from the two first-named works, viz. ‘Auserlesene Solilooiq’ (1714), and ‘Selige Erlösungs-Gedanken’ (1715); airs from various operas, cantatas for a single voice, and several vocal collections with various titles, such as ‘Gemütseerg-xung’ (1698); ‘Divertiamenti serenissimi’ (1713); ‘Musikalische Landlust’ (1714); ‘Kaiserliche Friedenspost’ (1715), etc. Important portions of his operas and sacred works have been published by Lindner, in his Erste stehende deutsche Oper, ii. 3-15; Reissmann, in his Allg. Geschichte der Musik, iii. 54-73 and App. Nos. 7 and 8; and von Winterfeld in his Evangelische Kirchengesang, vol. iii. Examples are also to be found in the Oxford History of Music, vol. iv., The Age of Bach and Handel. Adam Hiller included an unaccompanied motet—’Kindlich gross’—in his Vierstimmige Motetten, etc. vol. ii.; and there is a fugue for four voices, ‘Gott ist offenbaret,’ in the Auswahl vorzüglicher Musikwerke. A full catalogue of his works is in the Vierteljahrschrift, vol. vi. pp. 196-203, and a condensed list in the Quellen-Lexikon.
KELLNER

KELLY 563

to 1874; then of Clarence Eddy and N. Ledochowski in Chicago for two years. He went now to Stuttgart, where he studied for four years under Seifriz, Krüger, Speidel, and Friedrich Finck. Mr. Kelley spent much of his time upon his return to America in California, acting as organist in San Francisco and Oakland, and as music critic, from 1895 to 1895, for the San Francisco Examiner. While there he devoted some attention to study of the music of the Chinese, who dwell in large numbers on the Pacific coast. The influence of these observations is seen in his 'Aladdin' suite, in which he has used Chinese motives. In 1890 he conducted a comic operetta company in the eastern States, and in 1892 he brought out a comic operetta of his own, entitled 'Puritania,' in Boston, where it had a success that was denied to it in other cities. Mr. Kelley's compositions, which are chiefly in manuscript, include, beside 'Puritania,' op. 11, and 'Aladdin,' op. 10, incidental music to 'Macbeth' for orchestra and chorus, op. 7; incidental music to the play of 'Ben Hur,' op. 17, for orchestra, solos, and chorus; a pianoforte quintet; an original theme with variations for string quartet, op. 1; a Wedding Ode for tenor solo, male chorus, and orchestra, op. 4; and a number of songs and pieces for the piano.

KELLNER, JOHANN PETER, born Sept. 24, 1795, at Grafenrode in Thuringia, received his musical instruction chiefly from J. C. Schmidt, the organist of Zella St. Blasii, by whom he was early introduced to the works of Sebastian Bach, for which he ever afterwards had the greatest admiration. In 1795 he obtained the post of cantor at Frankenhain, but exchanged it in 1728 for a similar post at his birthplace, where, in spite of many tempting offers elsewhere, he remained till his death in 1788. It was the pride of the old man in his later days to recall his personal acquaintance with Bach and Handel. For them and their works he always expressed the utmost veneration, and we owe the preservation of some of Bach's works to copies made by him. We are also told that once when Bach happened to come into the church where Kellner was playing, Kellner improvised in a masterly way a fugue on the theme b-a-c-h. From Kellner's manuscript of 1738 Spitta has printed Bach's Vorschriften und Grundsätze zum vierstimmigen Spielen des General-Bass oder accompagnement für seine Scholaren in der Musik (see Appendix xxii. Spitta's Bach, Eng. trans. vol. iii. pp. 315 ff.). Kellner's own published works are, 1. Certoamen Musicae, bestehend aus Frühliaden, Fugen, Altgemänten, etc., in six Suites, Arnstadt, 1739-49. Another edition in eight Suites, 1749-56. 2. Manipulus Musices oder eine Hand voll kurzweiliger Zeitvertreib vor Clavier, Arnstadt, 1753-56, four pieces partly Suites, partly Sonatas. 3. Two Choralbearbeitungen for two Clav. and Pedal. Other organ works and church Cantatas exist in MS. Seifert (Geschichte der Klaviermusik, Bd. l. pp. 361 ff.) expresses the opinion that Kellner's Clavier works have been most undeservedly neglected by modern collectors and editors of the older music. He reckons the Suites, more especially, as among the best of those produced after the form had been perfected by Muffat and Bach. Naturally, various reminiscences of Bach and Handel occur in Kellner's works.

J. R. M.

KELLOGG, CLARA LOUISE, though born in Sumterville, South Carolina, in July 1842, is of northern extraction. Her mother had considerable talent as a musician, and Clara was her only child. In 1856 they removed to New York, where she received the whole of her musical education. She made her first appearance there, at the Academy of Music (Opera), as Gilda in 'Rigoletto,' in 1861, and sang that season ten or twelve times. On Nov. 2, 1867, she made her début in London at Her Majesty's as Margherita, (and sang also as Violetta, Linda, Martha, and Zerlina ('Don Giovanni'), appearing in the last-named part on the night before the theatre was burnt down, Dec. 6. In 1868 she sang, with the company of Her Majesty's Theatre, at Drury Lane. Here she appeared in the 'Sonambula,' 'Gazza Ladra,' 'Figlia del Reggimento,' and 'Figaro' (Susanna). She sang at various important concerts in the same season, and at the Handel Festival. From 1868 to 1872 she was touring in the United States. On May 11, 1872, she reappeared in London at Drury Lane, Her Majesty's Opera, as Linda, and sang during that season also in some of the parts mentioned, and in 'Lucia.' On her return to the United States she continued to sing in Italian opera till 1874, when she organised an English troupe, herself superintending the translation of the words, the mise en scène, the training of the singers, and the rehearsals of the chorus. Such was her devotion to the project, that in the winter of 1874-75 she sang no fewer than 125 nights. It is satisfactory to hear that the scheme was successful. She reappeared at the rebuilt Her Majesty's Theatre in 1879, as Aida, and Philine in 'Mignon.' In 1881 she returned to America, singing principally in concerts. She married her manager, Carl Strakosch, in 1887, and soon afterwards retired. Her musical gifts are great. She is said to be familiar with forty operas. She has great conscientiousness as an artist, ardent enthusiasm, and a voice of great compass and purity.

G.; additions by A. C.

KELLY, MICHAEL, was born in Dublin [at Christmastide of the year 1762, the son of Thomas Kelly, wine merchant and dancing-master, of Mary Street, Dublin. When a lad he took part in the Fantoccini organised by Kane O'Hara at the theatre in Capel Street, and he was taught the piano by Morland (1770-72) and by Michael
Arne (1778-79),—his singing-masters being Passerini, Peretti, and St. Giorgio. He finished his piano lessons with Dr. Cogan, and had a short course of instruction from Rauzini. On May 1, 1779, he left Dublin for Naples. W. H. G. F.] Before quitting Dublin, however, a fortuitous circumstance led to his appearance on the stage as the Count in Pocciuni's ' Buona Figliuola,' and that again to his performing the hero in Michael Arne's 'Cymon,' and Lionel in 'Lionel and Clarissa.' At Naples he placed himself under the tuition of Finaroli, head of the Conservatorio of La Madonna di Loreto. He subsequently studied under Aprilis, with whom he visited Palermo, and then went successively to Leghorn, Florence, Bologna, Brescia, Verona, Gratz in Styria, and Venice, ultimately reaching Vienna, where he was engaged at the Court theatre. There he remained four years, enjoying the intimate friendship of Mozart, who on the production of his 'Nozze di Figaro' (May 1, 1786) allotted to Kelly (whose name he spells 'Oschely' in his MS. catalogue) the parts of Basilio and Don Curzio. Being anxious to visit England Kelly obtained leave of absence from the Emperor, and in Feb. 1787 quitted Vienna in company with Stephen Storace, his mother and sister—Signora Storace—and Attwood. He appeared at Drury Lane on April 20, as Lionel, in 'Lionel and Clarissa,' and continued there as first tenor until he quitted the stage. He also sang at the Concerts of Ancient Music, the HanDEL performances in Westminster Abbey, and in the provinces. In 1789 he made his first appearance as a composer by the production of the music to two pieces called 'False Appearances' and 'Fashionable Friends,' and from that date till 1820 furnished the music for sixty-two dramatic pieces, besides writing a considerable number of English, Italian, and French single songs, etc. In 1793 he was engaged at the King's Theatre, of which he was for many years acting manager. On Jan. 1, 1802, he opened a music-shop in Pall Mall adjoining the Opera House, but this promising speculation failed owing to his inattention, and in 1811 he was made a bankrupt. He also engaged in the wine trade, and this circumstance, combined with the suspicion that some of Kelly's compositions were derived from foreign sources, led Sheridan to propose that he should inscribe over his shop, 'Michael Kelly, Composer of Wines and Importer of Music.' On Oct. 1, 1811, at Dublin, Kelly made his last appearance on the stage [at his own benefit, when he sang 'The Bard of Egin,' composed by himself. W. H. G. F.] In 1826 he published his 'Reminiscences' in 2 vols. 8vo. This entertaining work, which reached a second edition in the same year, was written by Theodore Hook from materials furnished by Kelly. Its personal notices of Mozart are both interesting and important, and have been done justice to by Otto Jahn (Mozart, ii. 242, etc.). Kelly died at Margate, Oct. 9, 1826, and was buried in the churchyard of St. Paul's, Covent Garden. The following is a list of the pieces for which he composed the music:

- 'False Appearances' and 'Fashionable Friends,' 1789; 'A Friend in need,' 'The Last of the Family,' 'The Chimney Corner,' and 'The Castle Spectre,' 1797; 'Blue Beard,' 'The Outlaw,' and 'The Captive of Spindler' (with Dussek); and 'Arrelio and Miranda,' 1798; 'Feudal law' and 'Finaroli,' 1797; 'The Caxton,' 'Tom Thumb,' 'Mountfort,' and 'The Indians,' 1799; 'Deaf and Dumb,' 'Adelina,' 'La Grappolo,' 'The Outlaw,' and 'The Gipsy Family,' 1800; 'Giorgio,' and 'Harlequin and a House that fell down,' 1802; 'The Hero of the North,' 'The Marriage Promise,' and 'Love June' at Ladies'throw, 1803; 'Cinderella,' 'The Covent Garden,' 'The Hunger of the Alien,' 'The Gay Decisers,' 'The Bad Bargain,' and 'The Land we live in,' 1804; 'The Happy Monk' and 'The False Claim,' 1805; 'Deceivers,' 1806; 'Pollv,' 'Oak,' 'Harlequin Oak,' 'Rude Awake,' 1807; 'The Fall of Taranto,' 1817; 'The Bride of Abydos,' 1818; 'Abraham,' 1819; and 'The Lady and the Devil,' 1820.

[Of his many songs, 'The Woodpecker' is the only one that has survived until the present time.] W. H. R.; additions from Dict. of Nat. Biog.

KELWAY, THOMAS ALEXANDER ERKINE, SIXTH EARL OF. An amateur composer of some degree of celebrity, and a violinist. He was born Sept. 1, 1732, succeeded to the title in 1756, and died a bachelor in Brussels, Oct. 9, 1781. He studied music in Germany under Stamitz, and about the middle of the 18th century became famous for the composition of minuets, overtures, and symphonies. His overture to 'The Maid of the Mill,' 1765, was long a popular piece. Robert Brenner of London and Edinburgh published his earlier compositions, and his copyright grant for them for nineteen years is dated 1761. Afterwards Lord Kelly's compositions were issued by William Napier. In 1836 Charles Kirkpatrick Sharpe edited a small quarto publication of his minuets and other pieces, with a biographical notice and list of compositions. It is likely that Lord Kelly formed one of that group of musicians, among whom were James Oswald, Charles Burney, and Captain (afterwards General) Reid, who formed the 'Society of the Temple of Apollo.' The compositions of this Society were for a time published anonymously by James Oswald of St. Martin's Lane.

KELWAY, JOSEPH, a pupil of Geminiani, was organist of St. Michael's, Cornhill, about 1730, but resigned the post in 1736, on being appointed organist of St. Martin's-in-the-Fields vice Weldon deceased. Upon the arrival of Queen Charlotte in England in 1761, Kelway was appointed her instructor on the harpsichord. As a harpsichord player he was remarkable for neatness of touch and rapidity of execution, and for his ability in performing Scarlatti's pieces. As an organist he excelled in extemporaneous performance, of which he was such a master as to attract the most eminent musicians in London (amongst them Handel) to the church in order to hear him. Burney (iv. 665) char-
acterises his playing as full of a 'masterly wildness ... bold, rapid, and fanciful.' His published harpsichord sonatas are very inferior to his extemporaneous effusions. He died, probably in May 1782. [See Mrs. Delany's Letters, i. 579, ii. 61, and other books referred to in the Dict. of Nat. Biog.]

His elder brother, THOMAS, was educated as a chorister in Chichester Cathedral, and succeeded John Reading as organist there in 1726. Seven services and nine anthems by him are contained in a MS. volume in the library of Chichester Cathedral. His Evening Service in B minor is printed in Rimbault's Cathedral Music, and two others in A minor and G minor are published by Novello. He died May 21, 1749. [His epitaph may be read in West's Cath. Org.]

KEMBLE, Adelaide, younger daughter of Charles Kemble, the eminent actor, was born about 1814, and educated for a concert singer. She appeared first in London, [at a concert of Ancient Music on May 13, 1835] and afterwards at the York Festival, but with little success. She then went to Paris for improvement, and from thence in 1837 to Germany, and early in 1839 to Italy, when she had lessons from Pasta on the Lake of Como. In that year she made her appearance at La Fenice, Venice, as Norma with decided success. In 1840 she sang at Trieste, Milan, Padua, Bologna, and Mantua with increasing reputation. In 1841 she returned to England, and on Nov. 2 appeared in an English version of 'Norma' with marked success. In 1842 she sang in English versions of 'Le Nozze di Figaro,' 'La Sonnambula,' 'Semiramide,' and 'Il Matrimonio Segreto.' In 1843 she was married to Mr. Edward John Sartoris, and retired from the profession. In 1867 she published her delightful A Week in a French Country House, and she died August 4, 1879. [See her sister, Fanny Kemble's, Records of a Girlhood, and other reminiscences. Mrs. Sartoris's own recollections were embodied in Past Hours, 1880. Additions from Dict. of Nat. Biog.]

KEMP, Joseph, Mus.D., was born in Exeter in 1778, and was placed as a chorister in the cathedral under William Jackson, with whom he continued as a pupil after quitting the choir. In 1802 he removed to Bristol on being appointed organist of the cathedral. In 1809 he resigned his appointment and settled in London. In 1808 he took the degree of Mus. B. at Cambridge, his exercise being a War Anthem, 'A Sound of Battle is in the Land' (composed 1803). In 1809 he was, by special dispensation, permitted to proceed Doctor of Music; his exercise being an anthem entitled 'The Crucifixion.' On Oct. 25, 1809, 'The Jubilee,' an occasional piece by him, was produced at the Haymarket Theatre. In 1810 a melodrama called 'The Siege of Isca [Exeter], or, The Battles in the West,' written by Dr. Kemp, with music by himself and Domenico Corri, was produced at the theatre in Tottenham Street. In the same year he lectured on his 'New System of Musical Education,' probably the first method propounded in England for teaching music to numbers simultaneously. In 1814 he returned to Exeter, resided there till 1818, then went to France, remained until 1821, and again returned to Exeter. He died in London, May 22, 1824. Dr. Kemp published an anthem, 'I Am Alpha and Omega,' 'Twelve Psalmatical Melodies,' 1818; 'Twelve Songs,' 1799; 'Twenty Double Chants'; [a set of pianoforte sonatas, published at Exeter]; 'Musical Illustrations of the Beauties of Shakespeare'; 'Musical Illustrations of The Lady of the Lake'; The Vocal Magazine; The New System of Musical Education, Part I.; and numerous single glee, songs, duets, and trios.
made his first appearance in London, at the Hanover Square Rooms. Four concerts were given, and the programmes contained selections from 'The Gentle Shepherd,' 'Noces Ambrosi-ana,' etc., etc. The veteran, John Templeton, was present upon each occasion, and was one of the first to offer his warm congratulations. In December of the same year Kennedy gave a long series of concerts in the Egyptian Hall. After tours in the south of England and in Scotland he returned to London in the winter of 1864-65, to give a series of concerts in Store Street Hall, with fresh programmes, which included selections from 'Waverley,' and an entertainment called 'The Farmer's Inch.' His eldest daughter, Helen, scarcely in her teens, had now become his accompanist. At one time or another his eleven sons and daughters all assisted in the entertainments. In the summer of 1866 he visited Canada and the United States, and sang in every city of importance North and South. For the next twenty years he toured at home and abroad, travelling through Australia, New Zealand, South Africa, and India, and revisiting Canada several times. One of his first acts, when at Quebec in 1867, was to visit the grave of John Wilson, the Scottish vocalist, who died there in 1819. He had photographs taken of the tombstone, and arranged that the grave should be tended and cared for in perpetuity. Mr. Kennedy's last appearance in public was at a 'Burns Night,' in Sarnia, Ont., Oct. 4, 1886. The last concert given by the Kennedy Family was at Stratford, Ontario, on the following evening. Mr. Kennedy being too ill to appear, his daughters carried out the programme, the Mayor of Stratford taking the chair. Kennedy probably hastened his end by resolving to revisit the grave of Wilson with the shadow of death almost upon him. He went out of his way to do so, and in a few days breathed his last at Stratford, Ontario, on Oct. 12, 1886. The body was embalmed and brought to his native land by his widow; a public funeral took place from his own house in Edinburgh, to the Grange Cemetery. An interesting sketch, David Kennedy, the Scottish Singer, by his daughter Marjory (Mrs. Kennedy Fraser), was published in 1887. It contains also a condensation of three books, previously published, entitled Kennedy's Colonial Tour, Kennedy in India, and Kennedy at the Cape. Much sympathy was felt for him and his family in 1881, when one son and two daughters perished at the burning of the Théâtre des Italiens at Nice on March 23. His eldest son, David, born at Perth in 1849, died in Pietermaritzburg, Dec. 5, 1885. Only a few years before his death Kennedy was at Milan receiving valuable hints from Lamperti: a true lover of his art, he ever felt the necessity for constant application and study. [Among the Scottish singers who gave similar entertainments to those of Wilson and Kennedy, the Fraser family deserve mention. Its head was John Fraser (born in Renfrewshire, about 1794, died in March 1879). He and his daughters attained considerable merit in their line. F. K. J. W. H.

KENT, James, born at Winchester, March 13, 1700, son of a glazier, became a chorister of the cathedral there under Vaughan Richardson, from 1711 to 1714, but was shortly afterwards removed to London and entered as a chorister of the Chapel Royal under Dr. Croft. There he attracted the attention of the sub-dean, Rev. John Dolben, through whose influence he obtained, in 1717, the post of organist of the parish Church of Finelon, Northamptonshire, the seat of the Dolbens. He resigned his office at Finelon in 1731, on obtaining the organis-ship of Trinity College, Cambridge, which he held till 1737, when on Jan. 13, he succeeded John Bishop as organist of the Cathedral and College of Winchester. He married Elizabeth, daughter of John Freeman, a singer at the theatre in the time of Purcell, afterwards a member of the choirs of the Chapel Royal, St. Paul's, and Westminster, and who died Dec. 10, 1736. It was not until the decline of life that Kent could be induced to publish; he then printed a volume containing twelve anthems. In 1774 he resigned his appointments in favour of Peter Fussell, and died at Winchester, May 6, 1776, [or in October, according to his monu-ment in the cathedral]. After his death a volume containing a Morning and Evening Service and eight anthems by him was published under the editorship of Joseph Corfe. Kent assisted Dr. Boyce in the compilation of his 'Cathedral Music.' His anthems have been extravagantly extolled by some, and decried by others; in both cases unjustly. They are smooth and even productions, generally pleasing, but rarely rising above mediocrity. His 'Hear my Prayer' was at one time a great favourite, but it is a poor composition. He borrowed freely from Italian composers, without acknowledgment, as is shown by a volume full of his notes formerly in the possession of Sir F. A. G. Ouseley. [See BASSANI.] W. H. H. ; with additions from West's Cath. Org. etc.

KENT BUGLE, or ROYAL KENT BUGLE, a bugle fitted with keys covering side-holes, and said to have been thus named in consequence of a performance upon it before H.R.H. the Duke of Kent by Halliday in Dublin, shortly after its invention. Although Halliday took out a patent for this instrument in 1810, a similar application of keys to the trumpet was known fifty years earlier; but the bugle, by its proportions, was more suited for key-work than the trumpet. Therefore the key-bugle became a useful and popular instrument, though the key-trumpet was a failure. The Kent Bugle is now superseded by valve instruments. (See Bugle.) D. J. B.
KEOLANTHE

KEOLANTHE, or THE UNEARTHLY BRIDE. Grand opera in two acts; words by Fitzball, music by Balfe. Produced at English Opera House, March 9, 1841.

KEPER, JOHN, of Hart Hall, Oxford, who graduated as M.A. Feb. 11, 1569, produced in 1574 'Select Psalms in four parts.' W. H. N.

KERAULOPHON (from κεραυλόφων, a horn-blower, and φως, a voice). An 8-foot Organ Manual Stop, of a reedy and pleasant quality of tone. It was invented by Messers. Gray & Davison, and used by them for the first time in 1843 in the organ they made for St. Paul's Church, Wilton Place. An example was introduced by the French firm of Ducroquet into their organ at St. Eustache, Paris, erected in 1854.

KERL (KERLL, or CHERLL), JOHANN CASPAR, 1 celebrated organist, born in 1628, as is to be concluded from the Mortuorium of the old Augustine church of Munich, Matthessen's Eratoricum contains the only details known of his life. He came early to Vienna, and learnt the organ from Valentinii, then organist, afterwards capellmeister to the Court, on whose recommendation Ferdinand III. sent him to Rome to study under Carissimi. In all probability he also learnt from Frescobaldi, possibly at the same time as his countryman Froberger. Having returned to Germany he entered the service of the Bavarian Elector on Feb. 22, 1656, and in that capacity was present at the coronation of Leopold I. at Frankfort (July 22, 1658), where he is said to have been presented by Schmelzer, vice-court-capellmeister, to the Emperor, and invited to improvise on a given theme in presence of the court. Some doubt is thrown on this by the fact that Schmelzer did not become vice-capellmeister till Jan. 1, 1671; but he may well have been in attendance on the Emperor at Frankfort, and at any rate Kerl's reputation as an organist dates from the coronation. Kerl remained at Munich until 1674. For the Italian singers there he composed a 'Missa nigra,' entirely written in black notes, and a duet for two castrati 'O bone Jesu,' the only accompaniment of which is a ground bass passing through all the keys. Besides other church works, sonatas for two violins and a viol da gamba, and a 'Modulatio organica super Magnificat' (Munich, 1636), Matthessen mentions toccatas, canzonas, ricercars, and batailles of his composition for the organ. In 1674 he threw up his post and went to Vienna, where he subsisted by giving lessons at what was then a high scale of remuneration. [He was appointed Court Organist there in 1677, and seems to have retained the post until 1692, when it is supposed that he returned to Munich.] He died there on Feb. 13, 1693. His tomb, showing this date, was formerly in the Augustine church, but that is now the custom-house, and the tomb is no longer discoverable. [The epitaph is given in the Quellen-Lexikon.] His style is remarkable for the frequent introduction of discords resolved in a new and unexpected manner, in which respect he is deservedly considered a predecessor of Sebastian Bach. He wrote the music of the operas 'Oronte,' 1657; 'Eritno,' 1661; of the serenata in honour of the birthday of the Elector (Nov. 6, 1661), 'Le pretensioni del Sole'; and of 'I colori geniali' (1668). One of his canzonas has been preserved to the world in a singular but most efficient way—owing to its insertion by Handel in 'Israel in Egyjta' to the words 'Egypt was glad when they departed.' Hawkins gives the canzona in its original form in his History, chap. 124.

KES, WILLEM, violinist and conductor, was born at Dordrecht, Holland, on Feb. 16, 1856. Studied with many professors, at first under Tyssens, Nuthdurft, and Ferdinand Böhm, and then, provided with a stipend by the King of
Holland, with Ferdinand David at the Leipzig Conservatorium (1871), with Wieniawski at the Brussels Conservatoire, and finally (1876) with Joachim at Berlin. But his career has been rather that of conductor than violinist. For several years he divided his time between his native town and Amsterdam, accepting in the latter city the post of conductor of the Park Orchestra, and ‘Felix meritis’ Society (1876), the ‘Parkschouwburg’ Concerts (1883), and the ‘Concertgebouw’ Concerts (1890), directing also the ‘Society’ Concerts at Dordrecht. In 1895 he undertook the conductorship of the ‘Scottish Orchestra’ in Glasgow, and in 1898 was appointed conductor of the Moscow Philharmonic Society and director of the Moscow Conservatoire.

He returned to Leipzig in 1904 for a few months, and now lives at Blasewitz, near Dresden. Besides being a violinist, he is an accomplished pianist, though he does not make public appearances in that capacity. He has the all-round gifts which make the capable conductor.

W. W. C.

KETTEN, HENRI, born at Baja in Hungary, March 25, 1848, attained a rapid success as a pianist, being trained in Paris by Marmontel and Halevy. His compositions enjoyed a great vogue in their day, but are of essentially trivial quality. He died in Paris, April 1, 1883. M.

KETTERER, EUGENE, born at Rouen in 1831, entered the Paris Conservatoire, obtaining a second prize for solfège in 1847, and a premier accessit in 1852, under Marmontel. From that time until his death, which took place during the siege of Paris, Dec. 18, 1870, he appeared constantly as a pianist, and wrote multitudes of brilliant fantasias and drawing-room pieces, which obtained an immense and ephemeral popularity.

M.

KETTLE-DRUMS are copper or brass basins, with a skin or head that can be tuned to a true musical note. Used by the bands of cavalry regiments, and in orchestras. [Drum, vol. i. pp. 730-732.]

KÉUCHENTHAL, JOHANNES, described as ‘Pfarriiherr auf dem St. Andreasberge,’ published at Wittenberg in 1573 a comprehensive collection of liturgical music for the use of the Lutheran Church (Kirchengesang lateinisch und deutsch). It contains Plain-song melodies of the Introits, Sequences, Antiphons, Responsoria, and other parts of the Mass and other offices of the Church for all Sundays and Holydays, besides some Deutsche Lieder, and a German Passion-Music with the ‘Turbas’ set in falsobordone style for four voices. Otto Kade (Die aeltere Passionencompositionen, 1893) has proved this Passion to be based on an older arrangement by Johann Walther. Tucher (Schatz des evangelischen Kirchengesangs, ii. p. 322) mentions that this Kéuchenthal Passion continued to be used at Nuremberg, down to 1806. J. R. M.

KEY. A word of manifold signification. It means the scale or system in which modern music is written; the front ends of the levers by which the piano, organ, or harmonium are played; the levers which cover or uncover the holes in such instruments as the flute and oboe; lastly, an instruction-book or ‘Tutor.’ English is the only language in which the one term has all these meanings.

I. The systems of music which preceded the modern system, and were developed by degrees into it, were characterised by scales which not only differed from one another in pitch but also in the order of succession of the various intervals of which they were composed. In modern music the number of notes from which a scale can begin is increased by the more minute subdivision of each octave; but each of these notes is capable of being taken as the starting-point of the same scale, that is to say, of either the major or minor mode, which are the only two distinct scales recognised in modern music. This forms a strong point of contrast between the ancient and modern styles. The old was a system of scales, which differed intrinsically, and thereby afforded facilities for varying qualities of melodic expression; the modern is essentially a system of keys, or relative transposition of identical scales, by which a totally distinct order of effects from the old style is obtained.

The standard scale called the major mode is a series in which semitones occur between the third and fourth and between the seventh and eighth degrees counting from the lowest note, all the other intervals being tones. It is obvious from the irregularity of this distribution that it is not possible for more than one key to be constructed of the same set of notes. In order to distinguish practically between one and another, one series is taken as the normal key and all the others are severally indicated by expressing the amount of difference between them and it. The normal key, which happens more by accident than design to begin on C, is constructed of what are called Naturals, and all such notes in the entire system as do not occur in this series are called Accidentals. In order to assimilate a series which starts from some other note to the series starting from C, it is necessary to indicate the notes alien to the scale of C, which will have to be substituted for such notes in that scale as could not occur in the new series—in other words, to indicate the accidentals which will serve that purpose; and from their number the musician at once recognises the note from which his series must start. This note, therefore, is called the Keynote, and the artificial series of notes resulting from the arrangement is called the Key. Thus to make a series of notes starting from G relatively the same as those starting from C, the F immediately below G will have to be supplemented by an
accidental which will give the necessary semitone between the seventh and eighth degrees of the scale. Similarly, D being relatively the same distance from G that G is from C, the same process will have to be gone through again to assimilate the scale starting from D to that starting from C. So that each time a fifth higher is chosen for a keynote a fresh accidental or sharp has to be added immediately below that note, and the number of sharps can always be told by counting the number of fifths which it is necessary to go through to arrive at that note, beginning from the normal C. Thus C—G, G—D, D—A, A—E is the series of four-fifths necessary to be gone through in passing from C to E, and the number of sharps in the key of E is therefore four.

Conversely, if notes be chosen in a descending series of fifths, to present new keynotes it will be necessary to flatten the fourth note of the new key to bring the semitone between the third and fourth degrees; and by adopting a similar process to that given above, the number of flats necessary to assimilate the series for any new keynote can be told by the number of fifths passed through in a descending series from the normal C.

In the Minor Mode the most important and universal characteristic is the occurrence of the semitone between the second and third instead of between the third and fourth degrees of the scale, thereby making the interval between the keynote and the third a minor third instead of a major one, from which peculiarity the term 'minor' arises. In former days it was customary to distinguish the modes from one another by speaking of the keynote as having a greater or lesser third, as in Boyce's 'Collection of Cathedral Music,' where the Services are described as in 'the key of B with the greater third' or in 'the key of D with the lesser third,' and so forth. The modifications of the upper part of the scale which accompany this are so variable that no rule for the distribution of the intervals can be given. The opposite requirements of harmony and melody in relation to voices and instruments will not admit of any definite form being taken as the absolute standard of the minor mode; hence the Signatures, or representative groups of accidentals, which are given for the minor modes, are really in the nature of a compromise, and are in each case the same as that of the major scale of the note a minor third above the keynote of the minor scale. Such scales are called relatives—relative major and relative minor—because they contain the greatest number of notes in common. Thus A, the minor third below C, is taken as the normal key of the minor mode, and has no signature; and similarly to the distribution of the major mode into keys, each new keynote which is taken a fifth higher will require a new sharp, and each new keynote a fifth lower will require a new flat. Thus E, the fifth above A, will have the signature of one sharp, corresponding to the key of the major scale of G; and D, the fifth below A, will have one flat, corresponding to the key of the major scale of F, and so on. The new sharp in the former case falls on the supertonic of the new key so as to bring the semitone between the second and third degrees of the scale, and the new flat in the latter case falls on the submediant of the new key so as to bring a semitone between the fifth and sixth degrees. The fact that these signatures for the minor mode are only approximations is, however, rendered obvious by their failing to provide for the leading note, which is a necessity in modern music, and requires to be expressly marked wherever it occurs, in contradiction to the signature.

There is a very common opinion that the tone and effect of different keys is characteristic, and Beethoven himself has given some confirmation to it by several utterances to the point. Thus in one place he writes 'H moll schwarz Tonart,' i.e. B minor, a black key; and, in speaking about Klopstock, says that he is 'always Maestoso! B: major!' In a letter to Thomson of Edinburgh (Feb. 19, 1813), speaking of two national songs sent him to arrange, he says, 'You have written them in but as that key seemed to me unnatural, and so little consistent with the direction Amoroso that on the contrary it would change it into Barbarese (qu'au contraire il le changerait en Barbarese), I have set the song in the suitable key.' This is singular, considering his own compositions in the key of four flats, neither of which can justly be entitled Barbarese. Composers certainly seem to have had predilections for particular keys, and to have cast movements in particular styles in special keys. If the system of equal temperament were perfectly carried out, the difference would be less apparent than it is; but with unequal temperament, or when the tuner does not distribute the tempering of the fifths with absolute equality in instruments of fixed intonation, there is necessarily a considerable difference between one key and another. With stringed instruments the sonority of the key is considerably affected by the number of open strings which occur in it, and their position as important notes of the scale. Berlioz has given a complete scheme of his views of the qualities of the keys for violins in his Traité d'Instrumentation. With keyed instruments a good deal of the difference results from the position of the hands and technical considerations resulting therefrom. A real difference

1 In a sketch for violoncello Sonata, op. 102, No. 2, quoted by Mottebohm.
2 In a conversation with Kochitsch (Für Freunde der Tonkunst, 4v. 590).
3 Given by Thayer, iii. 45.
also is obvious in keys which are a good deal removed from one another in pitch, though inasmuch as pitch is not constant this cannot apply to keys which are near. See also TONALITY.

II. KEY (Fr. Touché; Ital. Tasto; Ger. Taste) and KEYBOARD of keyed stringed instruments (Fr. Clavier; Ital. Tastiera; Ger. Claviatur, Tastatur). A ‘key’ of a piano-forte or other musical instrument with a keyboard, is a lever, balanced see-saw fashion near its centre, upon a metal pin. It is usually of lime-tree, because that wood is little liable to warp. Besides the metal pin upon the balance rail of the key-frame, modern instruments have another metal pin for each key upon the front rail, to prevent too much lateral motion. A key is long or short according to its employment as a ‘natural’ or ‘sharp,’ and will be referred to here accordingly, although in practice a sharp is also a flat, and the written sharp or flat occasionally occurs upon a long key. Each natural is covered as far as it is visible with ivory: and each sharp or raised key bears a block of ebony or other hard black wood. In old instruments the practice in this respect varied, as we shall show presently. In English alone the name ‘key’ refers to the Latin Clavis, and possibly to the idea of unlocking sound transferred to the lever from the early use of the word to express the written note. The Romance and German names are derived from ‘touch.’

A frame or, technically, a ‘set’ of keys is a keyboard, or clavier according to the French appellation. In German Klavier usually means the keyed stringed instrument itself, of any kind. The influence of the keyboard upon the development of modern music is as conspicuous as it has been important. To this day C major is ‘natural’ on the keys, as it is in the corresponding notation. Other scales are formed by substituting accidental sharps or flats for naturals, both in notation and on the keyed instruments, a fact which is evidence of the common origin and early growth together of the two. But the notation soon outgrew the keyboard. It has been remarked by Huxley that the ingenuity of human inventions has been paralleled by the tenacity with which original forms have been preserved. Although the number of keys within an octave of the keyboard are quite inadequate to render the written notation of the four-and-twenty major and minor modes, or even of the semitones allied to the one that it was first mainly contrived for, no attempts to augment the number of keys in the octave or to change their familiar disposition have yet succeeded. The permanence of the width of the octave again has been determined by the average span of the hand, and a Ruckers harpsichord of 1614 measures but a small fraction of an inch less in the eight keys, than a Broadwood or Erard concert grand piano of 1905. We have stated under CLAVICORD that we are without definite information as to the origin of the keyboard. We do not exactly know where it was introduced or when. What evidence we possess would place the date in the 14th century, and the locality—though much more doubtfully—in or near Venice. The date nearly synchronises with the invention of the clavichord and clavecinbalo, and it is possible that it was introduced nearly simultaneously into the organ, although which was first we cannot discover. There is reason to believe that the little portable organ or regal may at first have had a keyboard derived from the T-shaped keys of the HURDY GURDY. The first keyboard would be Dystonic, with fluctuating or simultaneous use of the B♭ and B♮ in the doubtful territory between the A and C of the natural scale. [A primitive keyboard is exhibited in the HYDRATUS (see that article), of course without sharps.] Prætorius, 1619, speaks of organs with such keyboards as being still in existence, i.e. with B♭ and B♮ only, making three semitones in the octave (really four: e−f, a−b♭, b♭−b♮, b♮−c). When the row of sharps was introduced, and whether at once or by degrees, we do not know. They are, doubtless, due to the frequent necessity for transposition, and we find them complete in trustworthy pictorial representations of the 15th century. There is a painting by Memling in the Hospital of St. John at Bruges, whence it has never been removed, dated 1479, wherein the keyboard of a regal is depicted exactly as we have it in the arrangement of the upper keys in twos and threes, though the upper keys are of the same light colour as the lower, and are placed farther back. Another painting of the Flemish school may be seen at Holyrood Palace, Edinburgh, wherein a positive organ has a perfect chromatic keyboard beginning at B♭. This picture has been proved by the late Mr. Laing, F.S.A., to date about 1484. The instrument is ‘short octave,’ there being two pipes for the deep G and A. The keys are white naturals and black sharps.

The oldest keyed instruments we have seen with undoubtedly original keyboards are a Spinet3 in the museum of the Conservatoire at Paris, bearing the inscription ‘Francisci de Portalupis Veronae. opus, MDXXIII,’ the compass is four octaves and a half tone (from E to F) and the natural notes are black with the sharps white; and a very interesting Roman Clavicembalo, acquired by the Victoria and Albert Museum in 1879. The date is 1521, and it was made by Geronimo of Bologna; it has boxwood naturals, compass from E to d‴, nearly four octaves. There was a spinet in the

1 See a paper by Schumann, ‘Charakteristik der Tonarten,’ in his Germanische Schriften, l. 190.
2 In French, however, the keys of a flute or other wood wind instrument are called clé's.
3 No. 215 of Choquet’s Catalogue (1875).
loa collection of the Bologna Exhibition (1888),
made by Pasi of Modena, which was said to be
dated 1490. (See also SPINET. The Flemings,
especially the Ruckevers, oscillated between black
and ivory naturals. (We here correct the state-
ment as to their practice in CLAVICORD,
Vol. Ill. p. 549.) The clavichords of Germany
and the clavucins of France which we have seen have
had black naturals, as, according to Dr. Burney,
had those of Spain. Loosemore and the Hay-
wards, in England, in the time of Charles II.,
used boxwood for naturals; a clavichord of four
and a half octaves existing near Hanover in
1785 had the same—a clue perhaps to its date.
Keen and Slade in the time of Queen Anne,
used ebony. Dr. Burney writes that the Hitch-
cocks also had ivory naturals in their spinets,
and two of Thomas Hitchcock’s still existing
have them. But one of John Hitchcock’s, dated
1639, said to have belonged to the Princess
Amelia, and now owned by Mr. W. Dale, has
ebony naturals. All three have a strip of the
colour of the naturals inserted in the sharps,
and have five octaves—c’ to g”
seven-one keys! This wide compass for that
time—undoubtedly authentic—may be com-
pared with the widest Ruckers to be mentioned
farther on.

Under CLAVICORD we have collected what
information is trustworthy of the earliest com-
pass of the keyboards of that instrument. The
Italian spinets of the 16th century were nearly
always of four octaves and a semitone, but divided
into F and C instruments with the semitone E
or Bz as the lowest note. But this apparent
E or B may from analogy with ‘short octave ’
organs—at that time frequently made—have been
tuned C or G, the fourth below the next
lowest note. Another question arises whether
the F or C thus obtained were not actually of
the same absolute pitch (as near as pitch can
be practically said to be absolute). We know from
Arnold Schlick (Spiegel der Orgelmacher, 1511,
reprinted in Monatshefe Fur Musikgeschichte,
Berlin, 1869, p. 103) that F and C organs were
made on one measurement or pitch for the lowest
pipe, and this may have been carried on in
spinets, which would account for the old tradi-
tion of their being tuned in the fifth or the
octave,” meaning that difference in the pitch
which would arise from such a system.
The Antwerp (Ruckers) harpsichords appear
to have varied arbitrarily in the compass of their
keyboards. We have observed E—” fifty-four
notes, C—” forty-five notes, B, —” forty-two, C—”
fifty-three, C—” fifty-four, G, —” fifty-six, G, —”
fty-six, G,—” or A,—” fifty-eight F,—” sixty-one, and in two of
Hans Ruckers (the eldest) F,—” sixty-three
notes. In some instances, however, these key-
bords have been extended even, as has been
proved, by the makers themselves.

The English seem to have early preferred a
wide compass, as with the Hitchcocks, already
referred to. Kirman and Shudi in the next
century, however, in their large harpsichords
never went higher than g”, although the
latter, towards the end of his career, about
1770, increased his scale downwards to C. Here
Kirman did not follow him. Zumpe began
making square pianos in London, about 1766,
with the G,—” compass (omitting the lowest
G)—nearly five octaves—but soon adopted the
five octaves, F,—” in which John Broadwood,
who reconstructed the square piano, followed
him. The advances in compass of Messrs.
Broadwood and Sons’ pianofortes are as follows.

In 1783, to five and a half octaves, F,—”
In 1796, six octaves, C,—”
In 1804, six octaves F,—”
In 1811, six and a half octaves, C,—”
In 1844 the treble g” was attained, and in 1852 the treble
a” But before this the A,—” seven octave
compass had been introduced by other makers,
and soon after became general. The Broadwoods
were late in adding these extreme notes: Playel’s
semiground, used by Chopin in Paris, on his return
from Majorca, had C,—”, Liszt played on a
Erard C,—” in Paris in 1824, and in London
in 1825. Even c” appears in recent concert
grands, and composers have written up to it;
also the deepest G, which was, by the way, in
Broadwoods’ Exhibition grands of 1851. Many,
however, find a difficulty in distinguishing the
highest notes, and at least as many in dis-
tinguishing the lowest, so that this extreme com-
pass is beyond accurate perception except to a
very few.

The invention of a ‘symmetrical’ keyboard, by
which a uniform fingering for all scales, and a
more perfect tuning, may be attained, is due to
Mr. R. M. Bosanquet, of St. John’s College,
Oxford, who had constructed an enharmonic
harmonium with one. In An Elementary Trea-
tise on Musical Intervals and Temperament
(Macmillan, 1876), he has described this instru-
ment—with passing reference to other new key-
bords independently invented by Mr. Poole,
and more recently by Mr. Colin Brown. The
fingering required for Mr. Bosanquet’s keyboard
agrees with that usual for the A major scale,
and (p. 20) ‘any passage, chord, or combina-
tion of any kind, has exactly the same form
under the fingers, in whatever key it is played.’

In Mr. Bosanquet’s harmonium the number of
keys in an octave available for a system pro-
ceeding by perfect fifths is fifty-three. But in
the seven tiers of his keyboard he has eighty-four, for the purpose of facilitating the playing of a 'round' of keys. It is, however, pretty well agreed, even by acousticians, that the piano had best remain with thirteen keys in the octave, and with tuning according to 'equal temperament.'

In Germany a recent theory of the keyboard has sought not to disturb either the number of keys or the equal temperament. But an arrangement is proposed, almost identical with the 'sequential keyboard' invented and practically tried in England by Mr. William A. B. Lunn under the name of Arthur Wallbridge in 1843, in which six lower and six upper keys are grouped instead of the historical and customary seven and five in the octave. This gives all the major scales in two fingerings, according as a lower or upper key may be the keynote. The note C becomes a black key, and the thumb is more frequently used on the black keys than has been usually permitted with the old keyboard. The latest school of pianists, however, regard the black and white keys as on a level (see Preface to Dr. Hans von Bülow's 'Selection from Cramer's Studies,' 1868), and this has tended to modify opinions on the point. In 1876-77 the partisans of the new German keyboard formed themselves into a society, with the view of settling the still more difficult and vexed question of the reconstruction of musical notation. Thus, discarding all signs for sharps and flats, the five lines of the stave and one ledger line below, correspond to six black finger-keys for C, D, E, F♯, G♯, A♯, and the four spaces, including the two blanks, one above and one below the stave, correspond to six white finger-keys, C♯, D♯, F, G, A, B. Each octave requires a repetition of the stave, and the particular octave is indicated by a number. The keyboard and the stave consequently correspond exactly, black for black and white for white, while the one ledger line shows the break of the octave. And further the pitch for each note, and the exact interval between two notes, for equal temperament, is shown by the notation as well as on the keyboard. The name of the association is 'Chromaveren des gleichstiffigen Tonsystems.' It has published a journal, Die Tonkunst (Berlin, Stilke), edited by Albert Hahn, whose pamphlet, Zur neuen Klaviatur (Königsberg, 1875), with those of Vincent, Die Neuaklavieratur (Malchini, 1875), and of Otto Quanz, Zur Geschichte der neuen chromatischen Klaviatur (Berlin, 1877), are important contributions to the literature of the subject. The inventor appears to have been K. B. Schumann, a physician at Rhinow in Brandenburg, who died in 1865, after great personal sacrifices for the promotion of his idea. The pianoforte maker of the society is Preuss of Berlin, who constructs the keyboard with C on a black key; width of octave fourteen centimetres,¹ (5½ inches nearly), and with radiating keys by which a tenth becomes as easy to span as an octave is at present. About sixteen other pianoforte makers are named, and public demonstrations have been given all over Germany. In this system much stress is laid upon C being no longer the privileged key. It will henceforth be no more 'natural' than its neighbours. Whether our old keyboard be destined to yield to such a successor or not, there is very much beautiful piano music of our own time, naturally contrived to fit the form of the hand to it, which it might be very difficult to graft upon another system, even if it were more logically simple.

The last application of the principle (1887-88) is the invention of Herr Paul von Jankó of Totis, Hungary. In this keyboard each note has three finger-keys, one lower than the other, attached to a key lever. Six parallel rows of whole tone intervals are thus produced. In the first row the octave is arranged c, d, e, f♯, g♯, a♯, c; in the second row c, d, f, g, a, b, c. The third row repeats the first, the fourth the second, etc. The sharps are distinguished by black bands intended as a concession to those familiar with the old system. The keys are rounded on both sides and the whole keyboard slants. The advantage Herr von Jankó claims for his keyboard is a freer use of the fingers than is possible with the accepted keyboard, as the player has the choice of three double rows of keys. The longer fingers touch the higher and the shorter the lower keys, an arrangement of special importance for the thumb, which, unlike the latest practice in piano technique, takes its natural position always. All scales, major and minor, can be played with the same positions of the fingers; it is only necessary to raise or lower the hand, in a manner analogous to the violinist's 'shifts.' The facilities with which the key of Db major favours the pianist are thus equally at command for D or C major, and certain difficulties of transposition are also obviated. But the octave being brought within the stretch of the sixth of the ordinary keyboard, extensions become of easier grasp, and the use of the arpeggio for wide chords is not so often necessary. The imperfection of balance in the key levers of the old keyboard, which the player unconsciously dominates by scale practice, appears in the new keyboard to be increased by the greater relative distances of finger attack. On account of the contracted measure of the keyboard, the key levers are radiated, and present a fanlike appearance. Herr von Jankó's invention was introduced to the English public by Mr. J. C. Ames at the Portman Rooms on June 20, 1888. It has many adherents in Germany. His pamphlet Eine neue Claviatur, Wetzlar, Vienna, 1886, with numerous illustrations of fingering, is worthy of the attention of all students in pianoforte technique. [See JANKÓ; and for experiments in Just Intonation Keyboards see Temperament.]
[In the instruments which, like the organ and harpsichord, possess more than one keyboard, each of the rows is called a manual. Some writers speak of a 'pedal keyboard,' but the term pedal-clavier or pedal-board seems more suitable.]

The fact that the fingering of the right hand upwards is frequently that of the left hand downwards has led to the construction of a 'Piano à doubles claviers renversés,' shown in the Paris Exhibition of 1878 by MM. Mangot frères of that city. It is in fact two grand pianos, one placed upon the other, with keyboards reversed as the name indicates, the lower commencing as usual with the lowest bass note at the left hand; the higher having the highest treble note in the same position, so that an ascending scale played upon it proceeds from right to left; the notes running the contrary way to what has always been the normal one. By this somewhat cumbersome contrivance an analogous fingering of similar passages in each hand is secured, with other advantages, in playing extensions and avoiding the crossing of the hands, etc.

A. J. H.

III. KEYS (Fr. Clefs; Ger. Klappe; Ital. Chiave). The name given to the levers on wind instruments which serve the purpose of opening and closing certain of the sound-holes. They are divided into Open and Closed keys, according to the function which they perform. In the former case they stand normally above their respective holes, and are closed by the pressure of the finger; whereas in the latter they close the hole until lifted by muscular action. The closed keys are levers of the first, the open keys usually of the third mechanical order. They serve the purpose of bringing distant orifices within the reach of the hand, and of covering apertures which are too large for the last phalanx of the finger. They are inferior to the finger in lacking the delicate sense of touch to which musical expression is in a great measure due. In the Bassoon, therefore, the sound-holes are bored obliquely in the substance of the wood so as to diminish the divergence of the fingers. Keys are applied to instruments of the Flute family, to Reeds, such as the Oboe and Clarinet, and to instruments with cupped mouthpieces, such as the Key Bugle and the Ophicleide, the name of which is a compound of the Greek words for Snake and Key. [Ophicleide.] In the original Serpent the holes themselves were closed by the pad of the finger, the tube being so curved as to bring them within reach. [Serpent.]

The artistic arrangement of Keys on all classes of wind instruments is a recent development. Flutes, Oboes, Bassoons, and Clarinets, up to the beginning of the 19th century or even later, were almost devoid of them. The Bassoon, however, early possessed several in its bass joint for the production of the six lowest notes on its register, which far exceed the reach of the hand. In some earlier specimens, as stated in the article referred to, this mechanism was rudely preceded by plugs, requiring to be drawn out before performance, and not easily replaced with the necessary rapidity. [See Bassoon.]

The older Flutes, Clarinets, and Oboes only possess three or four keys at most, cut out of sheet metal, and closely resembling mustardspoons. The intermediate tones, in this deficiency of keys, were produced by what are termed 'cross-fingerings,' which consist essentially in closing one or two lower holes with the fingers, while leaving one intermediate open. A rude approximation to a semitone was thus attained, but the note is usually of a dull and muffled character. Boehm, in the flute named after him, entirely discarded the use of these 'cross-fingered' notes. [See Flute.]

Keys are now fashioned in a far more artistic and convenient form, a distinction in shape being made between those which are open, and those normally closed; so that the player may be assisted in performance by his instinctive sense of touch. [See Double Bassoon.] Besides the Bassoon, the Corno di Bassetto affords a good example of this contrivance, the scale being carried down through four semitones by interlocking keys, worked by the thumb of the right hand alone. W. H. S.

KEY-BUGLE. An improvement of the original bugle, which had no keys, and therefore could only yield certain restricted notes [see Bugle] by the addition of keys. It is said to have been made by Logier. The Kent Bugle is a further improvement of the same thing.

KEYNOTE. The note by which the key is named, and from which the scale commences, corresponding to the Final of the Ecclesiastical Modes: the Tonic. [See Key; Tonic.]

KIALMARK, George, born at King's Lynn, Feb. 1751; studied the violin under Barthélemon and Spagnaletti, and became leader in various orchestras. He wrote many songs which were popular in their day, and a great number of fantasias for the pianoforte. He died at Islington in March 1835. His son, George Frederick Kialmark, born at Islington, Nov. 7, 1804, studied the piano under Moscheles, Logier, and his father. Also at Paris under Kalkbrenner. He lived in London as a player and teacher, and died Dec. 13, 1887. [Brit. Mus. Biog.]

KIEL, Friedrich, born Oct. 7, 1821, at Puderbach on the Lahn; son of a schoolmaster, who taught him the pianoforte. At fourteen he began the violin under Schulz, Concertmeister to Prince Carl von Wittgenstein-Dörlberg, and soon entered the band of the reigning Prince, who sent him first to Caspar Kummer at Coburg, and in 1843 to Dehn at Berlin. While there he received a salary from King Frederick William IV. His first compositions were for the
pianoforte, 'Canons und Fugen' opp. 1 and 2; variations and fugue, op. 17; and several pieces for PF, and violoncello, of which the 'Reisebilder' are specially interesting. In 1882 his Requiem (op. 20), a remarkable work, was performed by Stern's Choral Society—also by the University Musical Society of Cambridge, May 21, 1878. In 1885 he composed a 'Missa Solemnis,' and in 1871-72 an oratorio 'Christus.' He was a member of the council of the Berlin Academie der Künste from 1889, and was professor of composition in the Hochschule für Musik, in which capacity he was much esteemed. Kiel was a distinguished teacher of counterpoint and fugue, and as such forms one of the race of musicians of whom the late Moritz Hauptmann may be considered the chief. His compositions are of the sound classical school, tempered with a due regard for the best modern tendencies. [A second Requiem (op. 90) was brought out a few years before his death, which took place in Berlin, Sept. 14, 1885.]

KIEZNZ, Wilhelm, born Jan. 17, 1857, at Waitekirk, in Austria, is the son of a lawyer. His father was elected in 1861 mayor of the town of Graz, where Kienzl has lived nearly all his life. He studied composition under Dr. W. Mayer, who has also had pupils Weingartner and Busoni. Later he attended the Conservatorium at Prague, and concluded his studies in Munich under Rheinberger. Encouraged by the advice of Adolf Jensen and the sympathy of Liszt, he began to compose, simultaneously continuing his abstract studies, his work in this direction finding expression in a highly interesting and valuable work on musical declamation, which attracted the attention of Wagner, to whom Kienzl felt himself drawn by the similarity of their musical opinions. Kienzl stayed for some time at Bayreuth on terms of intimacy with the family, until the proverbial narrow-mindedness of the Master, who would not tolerate Kienzl's outspoken admiration of Schumann, put an end to their amicable relations. Nevertheless, Kienzl remained, musically speaking, in the Wagnerian fold, and did not desert the tenets of Bayreuth. His first opera, 'Urvät,' which was produced at Dresden in Feb. 1886, attracted more attention by its melodic charm and the beauty of its orchestration than by the action of the drama, which was weak. His next opera, 'Heilmar der Nar,' was held in abeyance for some ten years owing to difficulties in the staging. In the meantime his third and best-known opera, 'Der Evangelimann,' which had a phenomenal success all over Germany and Austria, rivalling that of Humperdinck's 'Hänsel und Gretel,' appeared in 1894. It was given at Covent Garden, July 3, 1897. In 1896 another opera, on the subject of Don Quixote, was produced in Berlin. In all these works Kienzl, like Humperdinck, has retained the constructive features of the Wagnerian creed, but discarded the purely heroic drama, proving that the methods of Bayreuth are brought nearer to the people than their first propounder ever intended. His style, which is less intricat than that of Humperdinck, is full of musical interest, and is superior to most of the productions of modern Germany by the attractiveness of the material he uses. Besides his operas Kienzl has published over 100 songs, of which a representative selection exists, in the form of an album obtainable in the 'Universal Edition,' other interesting sets being op. 55, six songs, and op. 68, three songs. Further, some 150 piano pieces, amongst which the 'Dichterreise,' op. 45, and the 'Tanztbilder,' op. 41, the latter for piano duet, deserve mention. He has also contributed capriciously to orchestral and chamber music, and has published a large number of smaller choral works. His most important production in musical literature, besides the book mentioned above, is an interesting monograph on Wagner, which appeared in 1908. In the same year a marble relief monument in his honour was unveiled in his native town.

KIESEWETTER, Raphael Georg, edler von Wiesendrunt (uncle to Ambros the historian of music), Imperial councillor from 1855, and learned author on musical subjects, born at Holleschau in Moravia, August 29, 1773; settled in Vienna in 1794. In 1816 he began to form a collection of scores of the old masters, and made his house a rendezvous for the first musicians of Vienna. There also during Advent, Lent, and Holy Week, a first-rate amateur choir performed the principal works of the old Italian composers, and of Bach, Handel, etc. He died Jan. 1, 1850, at Baden, near Vienna, and was buried in the cemetery at Vienna, 'vor der Währinger Linie.' He was enabled for his services as an official in the Kriegsrat, taking his title from his estate. Innumerable societies elected him a member in acknowledgment of his services as a musician. He left his musical MSS. and his correspondence with musical men of letters to Aloys Fuchs, and to the Court library his invaluable collection of scores, with the condition that they should be kept together as the 'Fond Kiesewetter.' That he was a most prolific writer the following list of his principal works will show:—

1. Die Verdiente der Niederbinder um die Tonkunst (received the gold medal, Amsterdam, 1820). 2. Geschichte der renov- ...

The scores left to the Court library.
JOHANN FRIEDRICH, author of the words of 'Der Freischütz'; born at Leipzig, March 4, 1768; brought up to the law, but frequented the Thomasschule of his own accord. He began to practise literature as early as 1800, and after much success with novels and tales, settled in 1814 at Dresden, became a Hofrat, and definitely renounced the law for a literary life. Here Weber met him, at the house of von Nordstern. About Feb. 15, 1817, Kind read to him his Vampyß's Landleben, which so pleased the composer that he at once consulted him as to an opera-book. The choice of a source fell on Apel's Gespensterbuch (Ghost Stories). Weber had, several years before, been attached to the story of the Freischütz, and so entirely did his enthusiasm communicate itself to Kind, that by the evening of Feb. 23, he had completed the first act of the opera. This was the only important joint composition of the two, but Jahn's Catalogue contains eleven other pieces, the words of which were supplied by Kind. The chief of these is the 'Jubel Cantata,' another cantata called 'Natur und Liebe,' five songs, two part-songs, and a chorus. Some of these were taken from operas of Kind's— Der Weinberg an der Elbe, 'Der Abend am Waldbrunnen,' and 'Das Nachtlager in Granada.' The last of these was set to music by Conradin Kreutzer. Kind seems to have supplied Spanish materials for 'Preciosa,' and Weber had two librettos by him—'Alcindor,' 1819, and 'Der Cid,' 1821—under consideration, but 'Der Freischütz' is the one which Weber adopted in full. Kind's 'Holzleib' (Wood-thief) was composed by Marschner in 1824. He died at Dresden, June 25, 1843, having for many years quite forsaken literature. He is described by Weber's son as a small person, with a great opinion of himself and a harsh voice. Two volumes of his works were published, Leipzig, 1821.

AUGUST, born Feb. 6, 1817, at Berlin, began his career at the opera as a chorus-singer, received instruction from Meyer, and played both bass and baritone parts at Leipzig in 1839-1846, after which he was engaged at Munich, where he obtained a life engagement, and was always a great favourite, being a very versatile artist. He celebrated his twenty-fifth anniversary of his engagement there on June 15, 1871, as Figaro in 'Nozze,' the Cherubino being his older daughter Marie, then engaged at Cassel. He sang Titu!el at Bayreuth in 1882; and on Sept. 9, 1886, he celebrated the jubilee of his career, and the fortieth year of his engagement at Munich, playing the part of Stadinger in Lortzing's 'Waffenschmied.' He died at Munich, March 6, 1891. For his daughter Hedwig, see Reicher-Kindermann.

KINDERMANN, JOHANN ERASMUS, Nuremberg-organist, is said to have been born at Nuremberg in 1616, but some doubt is cast upon the accuracy of this date, since already in 1630 he held the important post of organist at the St. Aegidien Kirche at Nuremberg. He died April 14, 1655. His chief work is entitled Harmonia Organica in tabulaturam Germanicum composita, etc., first published in 1645, and republished in 1665. It is remarkable, as being one of the earliest specimens of German copper-plate engraving, and is also of importance in the history of organ-playing and organ composition. As the title indicates, the music is given in the old German tablature notation. A detailed description of the contents is given in Ritter's Geschichte des Orgelspiels, pp. 146-47. The work opens with fourteen preludes mainly in the church tones, followed by fugal fantasies on chorale-tunes, and concludes with some magnificent intonations and verses. The Pedal is treated obligato throughout. Ritter gives three examples from the work in modern notation. Kindermann's other works are partly sacred, partly secular compositions for voices with Basso continuo and occasional viol and violin accompaniment. He also composed a large number of chorale-tunes, harmonised for three voices, to the Nuremberg preacher Dilherr's Evangelische Schlussreimen und Göttliche Liebes-Gesänge, 1649-52. Some works for instruments only, partly viols, partly wind instruments, are also mentioned, but do not seem to exist complete. (See Eitner, Quellen-Lexikon.)

CHARLES, Mus.B., born at Bury St. Edmunds in 1887, became a chorister of St. Paul's under Dr. Blow and Jeremiah Clarke. He was next a supernumerary singer in the choir at the small annual stipend of £14. On July 12, 1797, he graduated as Mus.Bac. at Oxford. On the death of Clarke, whose sister he had married, he was appointed almoner and master of the choristers of St. Paul's. In 1798 he became also organist of St. Benet Fink, Royal Exchange. On Oct. 31, 1780, he was admitted a vicar choral of St. Paul's. King composed several services and anthems, some of which are printed in Arnold's Cathedral Music, and others in Page's Harmonia Sacra; and there are some in the Tewdwy Collection (Harl. MSS. 7341 and 7342). Although his compositions evince no originality they are vocal and not without spirit, they long continued in frequent use in choirs, and some of them, particularly his services in F and C, are still performed. They have justified the joke of Dr. Greene, that King was a servicable man. Six of them in all are published by Novello, besides five anthems. Hawkins intimates that his inferiority was the result rather of indolence than want of ability. He died in London, March 17, 1748. w. h. a.
KING, Matthew Peter, born in London, 1773, studied composition under Charles Frederick Horn. His first productions were 'Three Sonatas for the Pianoforte,' 'Eight Songs and a Cantata,' and three other sets of Pianoforte Sonatas. In 1796 he published Thorough-Bass made clear to every Capacity, and in 1800 A General Treatise on Music, etc., a work of repute, with second edition, 1809. In 1817 his oratorio, 'The Intercession,' was produced at Covent Garden. One of the songs in it 'Must I leave thee, Paradise?' (known as Eve's Lamentation) became very popular, and long found a place in programmes of sacred music. King was also the composer of several glees (among them the popular 'Witches'), and of numerous pianoforte pieces. He composed several dramatic pieces, chiefly for the English Opera House, Lyceum:—'Matrimony,' 1819; 'The Invisible Girl,' 1806; 'False Alarms' (with Brahman); 'One o'clock,' or The Wood Demon' (with Kelly); and 'Ella Rosenberg,' 1807; 'Up all night,' 1809; 'Plots' and 'Oh, this Love,' 1810; 'The Americans' (with Brahman), and 'Timour the Tartar,' 1811; and 'The Fisherman's Hut' (with Davy), 1819. He died in London in Jan. 1823.

His son, C. M. King, published in 1826 some songs which were favourably received.

KING, Robert, Mus.b., was one of the band of music to William and Mary and Queen Anne. [At Christmas, 1689, a licence was granted to him to establish a concert (Calendar of State Papers.)] He graduated at Cambridge in 1696. He was the composer of many songs published in 'Choice Ayres, Songs and Dialogues,' 1684; 'Comes Amor,' 1687-93; 'The Banquet of Musicke,' 1688-92; The Gentleman's Journal, 1692-94; and Theuwarus Musices, 1695-96. He composed the songs in Crowley's comedy, 'Sir Courtly Nice,' which were printed in The Theater of Music, Book ii. 1685. In 1690 he set Shadwell's Ode on St. Cecilia's Day, 'O Sacred Harmony.' In 1693 he set an Ode on the Rt. Hon. John Cecil, Earl of Exeter, his birthday, being the 21 of Sept.' commencing 'Once more 'tis born, the happy day,' the words by Peter Motteux. A collection of twenty-four songs by him entitled 'Songs for One, Two, and Three voices, composed to a Thorough-Basse for ye Organ or Harpsicord,' engraved on copper, was published by the elder Walsh. The date of his death has not been ascertained. He was living in 1711.

KING, William, born at Winchester, 1624, son of George King (died 1665) organist of Winchester Cathedral, was admitted a clerk of Magdalen College, Oxford, Oct. 13, 1648. He graduated B.A. June 5, 1649, and in 1652 was promoted to a chaplaincy at Magdalen College, which he held until August 25, 1654, when he became a probationer-fellow of All Souls' College. On Dec. 10, 1664, he was appointed successor to Pickhaver as organist of New College. He composed a service in Bb and some anthems [a setting of the Litany remained in use in Lichfield Cathedral, and was republished by Mr. J. Bishop of Cheltenham and Mr. J. B. Lott], and in 1668 published at Oxford 'Poems of Mr. Cowley [The Mistress] and others, composed into Songs and Ayres, with a Thorough Basse to the Theorbo, Harpsicon, or Basse Violl.' He died at Oxford, Nov. 17, 1680, and was buried in New College Cloister.

KING CHARLES THE SECOND. A comic opera in two acts; words adapted by Desmond Ryan from a comedy of Howard Payne's; music by G. A. Macfarren. Produced at the Princess's Theatre, Oct. 27, 1849. Payne's comedy had before been turned into a ballet-pantomime, 'Betty,' music by Ambrose Thomas, and produced at the Grand Opéra, Paris, July 10, 1846.

KING SAUL. See SAUL (2).

KING'S BAND OF MUSIC, THE. The custom of the kings of England to retain as part of their household a band of musicians, more or less numerons, is very ancient. We learn that Edward IV. had 13 minstrels, 'whereof some be trumpets, some with shalmes and smalle pypes.' Henry VIII.'s band in 1526 consisted of 15 trumpets, 3 lutes, 3 rebecks, 3 taborets, a harp, 2 viols, 10 sackbuts, a fife, and 4 drumsdades. In 1530 his band was composed of 16 trumpets, 4 lutes, 3 rebecks, 3 taborets, a harp, 2 viols, 9 sackbuts, 2 drumsdades, 3 minstrels, and a player on the virginals. Edward VI. in 1548 retained 8 minstrels, a player on the virginals, 2 lutes, a harper, a bagpipe, a drumsdade, a rebeck, 7 viols, 4 sackbuts, a Welsh minstrel, and a flute player. Elizabeth's band in 1581 included trumpets, violins, flutes, and sackbuts, besides musicians whose instruments are not specified; and six years later it consisted of 16 trumpets, 4 lutes, harps, a bagpipe, 4 minstrels, 2 rebecks, 6 sackbuts, 8 viols, and 3 players on the virginals. Charles I. in 1625 had in his pay 8 performers on the hautbois and sackbuts, 6 flutes, 6 recorders, 11 violins, 6 lutes, 4 viols, 1 harp, and 15 'musicians for the lute and voice,' exclusive of trumpeters, drummers, and lifers, Nicholas Laniere being master of the band; and in 1641 his band included 14 violins, 19 wind instruments, and 25 'musicians for the waytes,' besides a serjeant trumpet and 15 trumpeters. Charles II. in 1660 established, in imitation of Louis XIV., a band of 24 performers on violins, tenors, and basses, popularly known as the 'four and twenty fidlers.' This band not only played while the king was at meals, but was even introduced into the royal chapel, anthems being composed with symphonies and ritornels between the vocal movements expressly for them. After the death of Charles the band was kept up, but was somewhat
changed in its composition; it no longer consisted exclusively of stringed instruments, but some of its members performed on wind instruments. It is now constituted so as to meet the requirements of modern music, and consists of thirty members. Formerly, besides its ordinary duties it was employed, together with the gentlemen and children of the Chapel Royal, in the performance of the odes annually composed for the king's birthday and New Year's day; but since the discontinuance of the production of such odes, its duties have been reduced to attendance on royal weddings and baptisms, and other state occasions. The following is the successor of the 'Masters of the Musick':—Davis Mell and George Hudson, 1660; Thomas Baltzar, 1661 (?); John Banister, 1663; Louis Grabin, 1666; Thomas Purcell, 1672; Dr. Nicholas Staggs, 1682; John Eccles, 1705; Dr. Maurice Greene, 1735 (?); Dr. William Boyce, 1755; John Stanley, 1779; Sir William Parsons, 1786; William Shield, 1817: Christian Kramer, 1829; François Cratère, 1834; George Frederick Anderson, 1848; Sir William George Cusins, 1870; Sir Walter Parratt, 1893. Robert Cambert is sometimes said to have held the office of Master of the Musick, but this is doubtful.

KING'S THEATRE, THE. In the early part of the 18th century, Sir John Vanbrugh, the architect and dramatist, proposed to the performers at Lincoln's Inn Fields Theatre to build them a new and splendid theatre in the Haymarket, and, his offer being accepted, he raised a subscription of £30,000 in sums of £100 each, in return for which every subscriber was to have a free admission for life. The undertaking was greatly promoted by the Kit-Cat Club, and the first stone of the building, which was wholly from the designs of Vanbrugh, was laid in 1704 with great solemnity by the beautiful Countess of Sunderland (daughter of the great Duke of Marlborough), known as 'The little Whig.' Congreve, the dramatist, was associated with Vanbrugh in the management, and the theatre was opened on April 9, 1705, under the name of 'The Queen's Theatre,' which name was changed on the accession of George I. in 1714 to 'King's Theatre,' by which it continued to be called until the death of William IV. in 1837, after which it was styled 'Her Majesty's Theatre,' the reason for not resuming the name 'Queen's Theatre' being that the theatre in Tottenham Street at the time bore that appellation. [At the beginning of the present reign, the theatre which had been built on part of the old site was renamed 'His Majesty's Theatre.'] Vanbrugh's erection, although externally a splendid and imposing structure, was totally inadequate for its purpose, owing to the reverberations being so great as to make the spoken dialogue almost unintelligible, and to necessitate extensive alterations in order to prevent them. In the course of a few years the house became the established home of Italian opera. In it the greater part of Handel's operas and nearly all his early oratorios were first performed. On the evening of June 17, 1789, the building was burned to the ground. It was rebuilt in 1790 from designs by Michael Novosiecki, the lye-shaped plan being first adopted in England. When completed it was refused a licence for dramatic representations, but a magistrates' licence being obtained it was opened with a concert and ballet on March 26, 1791. [See Haym.] A regular licence was, however, soon afterwards granted. The interior of the theatre was the largest in England; there were five tiers of boxes, exclusive of slips, and it was capable of containing nearly 3300 persons. It was admirably adapted for conveying sound. On the east side was a large and handsome concert-room, 95 feet long, 46 feet broad, and 35 feet high, on a level with the principal tier of boxes. About 1817 an important alteration was made in the exterior of the theatre by the erection of the colonnades on the north, south, and east sides, and the formation of the western arcade. The northern colonnade was afterwards removed. (There is a good description of the pit, including the famous 'Pops' alley' in Lumley's Reminiscences, chap. vii.) The theatre was again destroyed by fire on Friday night, Dec. 6, 1867. It was rebuilt by April 1869, but not opened until 1875, and then not for operatic performances, but for the revivalist mission of Messrs. Moody and Sankey, who occupied it for about three months, after which it remained closed until April 25, 1877, when it was reopened as an opera house. No theatre, perhaps, has been under the management of so many different persons—Swiney, Collier, Aaron Hill, Heidegger, Handel, the Earl of Middlesex, Signora Venisei, Crawfurd, Yates, Gordon, Hon. J. Hobart, Brooks, O'Reilly, Le Texier, Sir John Gallini, Tranchard, Taylor, Goold, Waters, Ebers, Benvil, Laporte, Monck Mason, Lumley, E. T. Smith, and Mapleson, have by turns directed its affairs. To attempt only to name the compositions produced there, and the eminent artists who have been their exponents, would extend this notice to an unreasonable length; it would be, in fact, almost to write a history of the Italian opera in England. [With the history of the smaller theatre on part of the site, opened in 1897 under Mr. H. Beerbohm Tree, a musical dictionary is not concerned.]

KIRBYE, George, one of the best English writers of madrigals of the graver kind, may have been a native of Suffolk, where his life was chiefly spent. The first mention of his name occurs in 1592, when he contributed to Estée's Whole Book of Psalmes. As he furnished more settings of tunes to this book than any other of the composers employed, excepting John Farmer, it is to be assumed that he had
already made some reputation as a musician. In 1597 he published what he calls the ‘first fruit of my poor knowledge in Musicke,’ a set of twenty-four madrigals for 4, 5, and 6 voices, dedicated to two of the daughters of Sir Robert Jersey of Rashbrooke, near Bury St. Edmunds, in whose house he seems to have lived as music-master, or domestic musician. On Feb. 16, 1597-98, George Kirbye married Anne Saxey, at Bradfield St. George, near Rashbrooke.

In 1601 appeared the ‘Triumphs of Oriana,’ for which Kirbye wrote a 6-part madrigal. In some copies of the ‘Triumphs’ his composition appears to the words ‘With angel’s face and brightness,’ elsewhere to the words ‘Bright Phoebus greets most clearly,’ the music being the same in both cases. It may be conjectured that Kirbye wrote his music to the words ‘With angel’s face,’ to which it seems better suited, but that, as these words were also set by Daniel Narcome, the editor of the ‘Triumphs’ may have thought it advisable to supply new words to Kirbye’s composition.

In 1620 Kirbye was living in Bury St. Edmunds. On June 11 of that year the burial of his wife is recorded in St. Mary’s parish registers there, and in 1627-28 his name twice appears in the same registers, probably as one of the churchwardens. On Oct. 6, 1634, his burial is entered in St. Mary’s registers. His will, dated March 10, 1633, and proved Oct. 7, 1634, shows that he owned property in Whiting Street, Bury St. Edmunds, which he left to his servant, Agnes Seaman, kinswoman to his late wife, together with all his goods, chattels, and personal estate; excepting some legacies to his brother, Walter Kirbye; his sister, Alice Moore, widow; and a few others. There is a note in a set of MS. part-books, copied by Thomas Hamond, of Cressens, Hawkdon, near Bury St. Edmunds, between the years 1691 and 1660 (Boll. MS. Mus. f. 1-6), to the effect that the ‘Italian songs to 5 and 6 voices’ contained in them were ‘collected out of Master Geo. Kirbies blacke bookes wch were sold after ye decease of the said Geo. to the right worthy Mr. Jo. Holland in ye yeare 1634. And he paid as they said Kirbies maid, 40s.’ This note is of interest as showing that Kirbye possessed copies of motets, etc., by the best Italian composers of the day.

A large number of unpublished madrigals and motets by Kirbye exist in the Bodleian Library, and in the libraries of the Royal College of Music and of St. Michael’s College, Tenbury. Unfortunately they are all imperfect, excepting a 4-part madrigal, ‘Farewell, false love,’ in the R.C.M. Library. In the British Museum is an imperfect pavan for viols (Add. MSS. 30,826-8), and a 5-part hymn, ‘O Jesu, look’ (Add. MSS. 29,372-7). [See Arkwright’s ‘Old English Edition’ (published by Joseph Williams), Nos. 3, 4, 5, and 21.]  

KIRCHEN CANTATEN (Church Cantatas). The Kirchen Cantaten of the German Lutheran Church corresponded to a great extent with the Anglican anthems, but they were for the most part on a larger scale, and had a band accompaniment as well as the organ, which is rarely the case with anthems. They were used on the great festivals of the Church and on festal occasions, such as weddings of great people. They flourished especially in the time immediately before and with Sebastian Bach, and it is with his name that they are chiefly associated, both for the prodigious number and the great beauty of many of the examples of this form of composition which he produced. [It has been calculated that he wrote 295 cantatas, of which 206 are still extant.]

Among his predecessors, his uncles Michael and Johann Christoph, and the great organist Buxtehude, were composers of Cantatas of this kind, and Bach certainly adopted the form of his own from them at first, both as regards the distribution of the numbers and the words. With them as with him the words were sometimes complete religious songs, but they were also frequently taken from promiscuous sources, passages from the Bible and verses from hymns and religious songs being strung together, with an underlying fixed idea to keep them bound into a complete whole. In some cases they are mystical, in others they are of a prayerful character, and of course may be hymns of praise. In many there is a clear dramatic element, and in this form the dialogue between Christ and the soul is not uncommon, as in the well-known ‘Ich hatte viel Bekümmeriss,’ and in ‘Gottes Zeit,’ ‘Wachet auf,’ and ‘Selig ist der Mann,’ of J. S. Bach. The treatment of the subject is often very beautiful apart from the diction, and expresses a tender, touching kind of poetry of religion which is of the purest and most affective character, and found in Bach’s hands the most perfect possible expression in music.

The dramatic element points to the relationship of the Kirchenkantaten to the Italian Cantate da Camera, which formed an important section of the operatic department of music cultivated in Italy from the beginning of the 17th century. In composing the earlier cantatas, Buxtehude and Bach’s uncles do not seem to have had this connection very clearly in view, neither does it appear obviously in the earlier examples of John Sebastian. But from the year 1712 Bach began writing music to cantatas by a theologian and poet named Neumeister, a man of some importance in relation to church music; who wrote poems which he called Cantatas for all the great Festivals and Sundays of the year, following avowedly the dramatic manner of the Italians. Of Bach’s contemporaries, Telemann preceded him slightly in setting these Cantatas, as a
collection with his music was published in Gotha in 1711. This part of the history of Cantatas, which divides them into two periods in matter of form, is too elaborate to be treated here, but a very full account will be found in Spitta's J. S. Bach, Engl. tr., i. 40, 446; ii. 345, etc.

As regards the music, the form was extremely variable. In a great number of cases the work opened with a chorus, which in Bach's hands assumed gigantic proportions. This was followed by a series of recitatives, airs, arias, duets or other kinds of solo music, and in the greatest number of instances ended with a simple choral. In some cases the work opens with an aria or duet, and in others there are several choruses interspersed in the work, and occasionally they form the bulk of the whole. In one somewhat singular instance (viz. 'Ich will den Krenzstah gerne tragen') the Cantata consists of two long arias, and two recitatives, and an adagio, all for a bass voice, and ends with a choral. In 'Ich habe genug' the bass voice is alone throughout, and there is no choral. It is evident that the works were constructed with reference to the particular resources at the disposal of the composer for performance; and in this respect the band varied as much as the musical form of the work. Sometimes the organ was accompanied by strings alone, at others by a considerable orchestra of strings, wood, and brass. With developed resources the Cantata occasionally began, both in the older and the later forms, with an instrumental introduction which was called irrespectively a symphony or a sonata or sonatina, and evidently had some relationship to the instrumental Sonate da Chiesa which were common in Italy in the Roman Catholic churches. This practice appears to have been more universal before Bach's time than appears from his works, as instrumental introductions to Cantatas with him are the exception. In such an astonishing number of examples as Bach produced it is inevitable that there should be some disparity in value. A considerable number are of the highest possible beauty and grandeur, and a few may not be in his happiest vein. But assuredly the wealth stored up in them which has yet to become known to the musical public is incalculable. Their uncompromising loftiness and generally austere purity of style have hindered their universal popularity hitherto; but as people learn to feel, as they ultimately must, how deeply expressive and healthily true that style is, the greater will be the earnest delight they will find in music, and the greater will be the fame of these imperishable monuments of Bach's genius.

C. H. H. P.

KIRCHENMUSIK, AKADEMISCHES INSTITUT FÜR. This Institution was founded in Berlin (Hardenbergstrasse, Charlottenburg, No. 36), in 1822, and was placed under the direction of the Royal Academy of Arts in 1876, since when the Director of the Institution is a member of the Senate of the Academy. The Institution is devoted to the education of organists, cantors, and music-masters for high-grade schools and seminaries. There are five professors, giving instruction in the organ, pianoforte, violin, singing, harmony, counterpoint, and form, organ construction, and criticism of exercises. The first director was Bernhard Klein, and at present the post is held by Professor Radecke. w. d. s.

KIRCHER, ATHANASIUS, learned Jesuit, born May 2, 1602, at Geisa near Fulda; early became a Jesuit, and taught mathematics and natural philosophy in the Jesuit College at Würzburg, where he was professor in 1630. About 1631 he was driven from Germany by the Thirty Years' War, and went in 1635 to the house of his Order at Avignon, and thence by way of Vienna (1635) to Rome, where he remained till his death, Nov. 28, 1660. He acquired a mass of information in all departments of knowledge, and wrote books on every conceivable subject. His great work Musurgia universalis sive pars magni consilii et dissonit, two vols. (Rome, 1650), translated into German by Andreas Hirsch (Hall in Swabia, 1662), contains, among much rubbish, valuable matter on the nature of sound and the theory of composition, with interesting examples from the instrumental music of Frescobaldi, Froberger, and other composers of the 17th century. The second vol., on the music of the Greeks, is far from trustworthy; indeed Melchiorius (Musici antiqui) accuses Kircher of having written it without consulting a single ancient Greek authority. His Panurgia (Kempten, 1673), translated into German by Agathus Carione (apparently a nom de plume), with the title Neue Holl- und Thom-kunst (Nördlingen, 1684), is an amplification of part of the Musurgia, and deals chiefly with acoustical instruments. In his Mogus, sive de arte magnetica (Rome, 1641) he gives all the songs and airs then in use to cure the bite of the tarantula. His Edipus olympiacus (Rome, 1652-54) treats of the music contained in Egyptian hieroglyphics. [See J. E. Matthew's Literature of Music, p. 57.] e. g.

KIRCHGESSNER, MARIANNA, performer on the glass harmonica, born 1770 at Waghäusel near Rastatt, Baden. An illness in her fourth year left her blind for life, but this misfortune was compensated by a delicate organisation for music. She learned the harmonica from Schmitthauer of Carlsruhe, and made numerous successful concert-tours. Mozart heard her in Vienna (1791), and composed a quintet for her (Kochel, 617). In London, about 1794, Förchsel made her a new instrument, which in future she always used. Here also she recovered a glimmering of sight under medical treatment. Much as they admired her playing, musicians regretted that she failed to bring out the true qualities of the harmonica, through a wrong method of
execution. After living in retirement at Gohls near Leipzig, she undertook another concert-
tour, but fell ill and died at Schaffhausen, Dec. 9, 1809. C. F. P.

KIRCHNER, Theodor, one of the most gifted disciples of Schumann, a composer of
'genre pieces' for the pianoforte, was born Dec. 10, 1823, at Neukirchen near Chenmitz in
Saxony, and got his musical training at Leipzig, under C. F. Becker, from 1838. Having
completed his schooling at Leipzig and Dresden, he took the post of organist at Winterthur
in Switzerland in 1843, which town in 1852 he left for Zürich, where he acted as conductor
and teacher. In 1873 he became director of the 'Musikschule' at Würzburg, but after two
years he threw up that appointment and settled at Leipzig, until 1883 [when he moved to
Dresden as a teacher of ensemble in the Con-
servatorium. In 1890 he moved once more to
Hamburg, where he died, Sept. 19, 1903.]

Kirchner's works extend to over 100 opus
numbers. Except a string quartet, op. 20, a
'Gedenkblatt,' a 'Serenade,' and 'Novelletten,'
op. 59, for piano, violin, and violoncello, some
violin pieces, op. 63, and eight pieces for violon-
cello, op. 79, and a number of Lieder, they are
all written for pianoforte solo or duet, are mostly
of small dimensions, and put forth under sugges-
tive titles such as Schumann was wont to give
to his lesser pieces. The stamp of Schumann's
original mind has marked Kirchner's work from
the first; yet though sheltered under Schumann's
cloak, many minor points of style and diction
are Kirchner's own, and decidedly clever. At
best, his pieces are delicate and tender, fre-
quently vigorous, now and then humorous and
fantastic; at worst, they droop under a tint of
lachrymose sentimentality. They are always
carefully finished and well shaped, never redund-
ant, rarely commonplace. Among his early
publications, 'Albumblatter,' op. 9, became
popular as played by Madame Schumann; and
among his later, 'Still und bewegt,' op. 24,
and particularly 'Nachstücke,' op. 25, deserve
attention.

E. D.

KIRKMAN. The name borne by a family of
eminent harpsichord, and subsequently pian-
oforte makers. Jacob Kirkmann (afterwards
Kirkman), a German, came to England early in
the 18th century, and worked for Tabel, a Flemish
harpsichord maker, who had brought to London the traditions of the Ruckers of
Antwerp. [See RUCKERS.] Another appearance
of Tabel's was Shudi (properly Tschudi), who
became Kirkman's rival, and founded the house of
Broadwood. Tabel would have been quite
forgotten, but for these distinguished pupils,
and for the droll anecdote narrated by Dr.
Burney, of Kirkman's rapid courtship of Tabel's
widow, and securing with her the business and
stock-in-trade. He proposed at breakfast-time,
and married her (the Marriage Act being not
then passed) before twelve o'clock the same day,
just one month after Tabel's demise. [Jacob
Kirkman was organist of St. George's, Hanover
Square; he wrote several sets of pieces for organ
and pianoforte, and published them himself at
the sign of the King's Arms in Broad Street,
Carnaby Market, now No. 19 Broad Street,
Soho.] Dr. Burney places the arrival of Jacob
Kirkman in England in 1740, but that seems
to be too late; Shudi was probably established
by that time in Meard's Street, Dean Street,
Soho, whence he removed in 1742 to the pre-
mises in Great Pulteney Street. There is no
reason, however, to doubt the same generally
excellent authority that his death took place
about 1778, and that he left nearly £200,000.

Burney, in Rees's Cyclopaedia, gives Jacob
Kirkman's harpsichords high praise, regarding
them as more full in tone and durable than
those of Shudi. These instruments retained
certain features of the Antwerp model as late
as 1765, preserving André Rucker's keyboard of
G.—f" (nearly five octaves), with lowest G wanting.
This, as well as the retention of the rosette in
the sound-board, may be seen in the
Kirkman harpsichord of that year, which be-
longed to the late C. K. Salaman, and in which
we find King David playing upon the harp,
between the letters I and K. Dr. Burney met
with no harpsichords on the continent that could
at all compare with those made in England by
Jacob Kirkman and his almost life-long com-
petitor, Shudi.

Jacob Kirkman, having no children by his
marriage, was succeeded by his nephew Abraham,
whose son Joseph, the first Joseph Kirkman,
followed him. The piano was introduced in
Kirkman's workshops in the time of Abraham
Kirkman, as there is record of a square piano
inscribed Jacob and Abraham Kirkman, which
was dated 1775. A grand piano dated 1780
was also theirs, and the manufacture of both
kinds of instrument went on side by side for
some years, as there was a single harpsichord
in the possession of the firm, dated 1778, and
the double harpsichord, in the possession of the
Editor, is dated 1788; it is inscribed 'Josephus
Kirkman.' His son, the second Joseph, died
at the advanced age of eighty-seven in 1877,
his second son Henry, to whom the business
owes its present extension, having died some
years before. The warerooms were for many
years in Soho Square. In 1896 the business
was amalgamated with that of the Collards.
The Kirkmans were the English agents for
Signor Caldera's attachment known as the
Melopiano.

A. J. H.

KIRNBERGER, Johann Philipp, composer
and writer on the theory of music, born April
(baptized on) the 24th, 1721, at Saalfeld in
Thuringia; learnt the rudiments of music at
home, the organ from Keilner of Grünrode,
and the violin from Meil of Sondershausen.

580
Gerber, court organist there, taught him to play Bach's fugues, and recommended him to Bach, whose pupil he was from 1789 to 1794. Several years were passed at Leipzig, in Poland, and at Lemberg. On his return to Germany he resumed the study of the violin under Zickler of Dresden, and in 1751 entered the capelle of Frederick the Great at Berlin as violinist. In 1758 he became capellmeister to Princess Amalie, and remained with her until his death, in Berlin, after a long and painful illness, July 27, 1783. During these twenty-five years he formed such pupils as Schulz, Fasch, and Zelter, and devoted his leisure to researches on the theory of music. Of his many books on the subject, *Die Kunst des reinen Satzes*, two vols. (Berlin, 1771-76), alone is of permanent value. He also wrote all the articles on music in Salzer's *Theorie der schönen Künste*, in which he warmly criticises Marpurg's *Künstdiche Briefe*, [in which various charges had been brought against him. See the *Quellen- Lexikon*] He praised himself on the discovery that all music could be reduced to two fundamental chords, the triad and the chord of the seventh—which is obviously wrong; and invented a new interval bearing the relation of 4:7 to the keynote, and which he called I:—but neither of these has stood the test of time. Indeed in his own day the theory of the even temperament steadily gained ground. As a composer he had more fluency than genius; his most interesting works are his fugues, remarkable for their correctness. In 1777-74 he edited a large collection of vocal compositions by Graun, who was a kind friend to him, and 'Psalmus und Gesänge' by Leo (Leonhard) Hassler. The autograph scores of several motets and cantatas, and a quantity of fugues, clavier-sonatas, and similar works, are preserved in the Imperial Library at Berlin and elsewhere. [See *Quellen-Lexikon.*] Kernberger was of a quarelesmes, temper, and fond of laying down the law, which made him no favourite with his fellow-composers. F. C.

KISTLER, Cyrill, born at Grossaitingen, near Augsburg, March 12, 1848, displayed early taste for music, was a choir-boy at the age of eight, and could play the flute. At first intended for the church, he afterwards entered upon the career of a schoolmaster, and taught in various schools from 1867 to 1875, picking up musical instruction how and when he could. In 1876 he entered the Munich Conservatorium, and studied regularly under Wittner, Rheinberger, and Fr. Lachner. The last of these took him as a private pupil after his leaving the Conservatorium, and did all in his power to counteract the strong influence of Wagner which had even then declared itself. In 1883 he was appointed teacher of theory, etc., at Sondershausen, and in 1884 his most important work, an opera or music-drama, 'Kunihild,' was brought out at that place. It was not until its revival at Würzburg in 1893 that it was recognised by any large class of musicians as a piece of any great significance. Since that time it has excited a good deal of comment, which was stimulated by the polemical attitude adopted by the composer towards theatrical managers and others, and expressed in a series of *Musikalische Tagesfragen*, published between 1884 and 1894. The opera is constructed on purely Wagnerian principles, with numerous 'leading-motives' and other peculiarities of the Wagner school. Occasionally the composer declines into a style that is more akin to that of the usual German part-song, in choruses and such things, for, during his earlier life, he had written much music of a less ambitions aim. Since 1885 he has lived at Bad Kissingen, as principal of a private music-school, and as a publisher. In 1889 his comic opera, 'Endenspiegel' was brought out at Würzburg without much success, although in some ways it is more original than 'Kunihild.' 'Arm Ellein' was given at Schwerin in 1902, and 'Rislein im Hag' at Elberfeld in 1903. 'Baldens Tod' seems not to have been performed. Besides these dramatic works, Kistler has published many pieces for orchestra, among them an interesting 'Trauerklänge,' choruses, songs, organ pieces, etc., method of harmony on Wagnerian principles (Harmoionielehre, 1879 and 1903), a *Musikalische Elementarlehre, a Volksschullehre* (1880), a *Tonkünstler-Lexikon*, which reached its third edition in 1887, and *Der einfache Kontrepunkt* (1904). (Riemann's *Lexikon*, Baker's *Dict. of Mus., Masters of German Music, Musical Times* for April 1893.)
Spanish Liederspiel and eleven more, including app. 1 and 2. Chopin, P.F. Concerto E minor; Trio G minor; twelve Grandes Études and others. Goetz's Symphony, 'Francesca di Rimini,' 'Taming of the Shrew,' and 137th Psalm.

KIT, a tiny violin, which, before the general introduction of pianofortes, was carried by dancing-masters in their pockets. Hence the French and German names for it were 'pochette' and 'Taschengeige,' though pochette is also applied to an instrument of long and narrow form resembling a soudine. It was usually about 16 inches long over all: the woodcut shows its size relatively to that of the violin. Sometimes, however, as in Nos. 616 and 66 of the Special Exhibition of Ancient Musical Instruments, South Kensington Mus. 1872, the neck was longer and broader, for convenience of fingering, which gave the Kit a disproportioned look. The instrument is now practically obsolete.

The origin of the name has not yet been discovered, but it may be connected with the beginning of some form of the word Cithara. Murray's Dict. In Florio (1598 and 1611), Beaumont and Fletcher, Ben Jonson, and Drayton, it seems evident that it is used without reference to size, as a synonym for Crowd, Rebeck, or Pandora. Cotgrave (1611) defines it as 'a small Gitterne.' Grew, in 1631, speaks of 'a dancing-master's Kit,' and as dancing-masters' Kists would naturally be smaller than other Kists, the name gradually adhered to them, as that of viol or violin did to the larger sizes.

KITCHINER, WILLIAM, M.D. (Glasgow), the son of a coal merchant, from whom he inherited an ample fortune, was an accomplished amateur musician. He was born in London in 1775, and educated at Eton. He composed an operetta entitled 'Love among the Roses, or, The Master Key,' and was author of Observations on Vocal Music, 1821, and editor of 'The Loyal and National Songs of England,' 1823; 'The Sea Songs of England,' 1823; 'The Sea Songs of Charles Dickens,' 1824; and 'A Collection of the Vocal Music in Shakspeare's Plays.' He was also author of some eccentrically written but useful books, including The Cook's Oracle (1817), The Art of Invigorating and Prolonging Life (1822), The Housekeeper's Ledger (1825), The Ecology of the Eyes (1824), The Traveller's Oracle (1827). (The titles of other books are given in the Dict. of Nat. Eng.) Though an epicure, he was regular and even abstemious in his habits; but while practising the precepts he gave to others, he was unable to prolong his own life beyond the age of fifty, and died suddenly in London, Feb. 27, 1827. [In his fine musical library was the MS. collection of airs containing the supposed original of 'God save the King,' which, coming after Kitchiner's death into the possession of Richard Clark, was tampered with and has now totally disappeared. E. K.]

KITTEL, JOHANN CHRISTIAN, born at Erfurt, Feb. 18, 1732, one of the last pupils of J. S. Bach. His first post was that of organist at Langensalza (1751), which he left in 1756 for that of the Predigerkirche at his native place. His pay was wretched, and bad to be eeked out by incessant and laborious teaching. Even when nearly seventy he was forced to make a tour to Göttingen, Hanover, Hamburg, and Altona. In the latter place he stayed for some time, to the delight of the musicians there, and published a book of tunes for the Schleswig-Holstein Church (Neues Choräubuch, Altona, 1803). Thence he crept home to Erfurt, where he died, May 18, 1809, in great poverty, but saved from actual starvation by a small pension allowed him by Prince Primas of Dalberg. The fame of his playing was very great, but is hardly maintained by his works, which are not very important. The best are grand preludes for the organ in two books (Peters); six sonatas and a fantasia for the clavier (Breitkopf's); and an organ school (Der angehende praktische Organist, in three books, 1801-8; Erfurt, Beyer; third edition, 1831). His papers were inherited by his great pupil, C. H. Rink, one of many famous organists who perfected themselves under him. Féris tells us—and we may accept the story as true, since he was intimate with Rink—that Kittel had inherited a full-sized portrait of Bach, and that when satisfied with his pupils he drew the curtain, and allowed them a sight of the picture as the best reward he could afford them. It is a story quite in accordance with the devotion which Bach is known to have inspired in those who had to do with him.

KJERULF, HALFdan, was born at Christiania, Sept. 15, 1815, and became known as Mendel and some other German authorities give wrong dates.
a composer in Norway and the surrounding countries during the time of Norway's struggle for freedom, and the consequent renaissance of her intellectual and artistic spirit.

In 1834 he was a graduate of the Christiania University, and he had as a matter of course devoted himself to the study of jurisprudence, for his father's high post under Government would have ensured for him a good start in official life. There ensued the heartaches and the struggles of a born artist who cannot throw himself into what he feels to be the 'wrong direction for his energies.' His case was aggravated by the condition of 'the poor and cold country of Norway,' which possessed 'no hot-house to foster the arts.' Nevertheless, the blossom of Kjerulf's art was destined to raise its head in the chill desert. On the death of his father in 1840, a decided step was at last taken by Halfdan Kjerulf, and he began his professional career at the age of twenty-five. He settled down as a teacher of music, and published some simple songs even before he had been introduced to the theory of music by some resident foreigner. In 1850 or thereabouts Kjerulf had begun to attract public attention, the Government awarded to him a grant by which he was enabled to study for a year at Leipzig under Richter. On his return to Christiania he did his best to establish classical subscription concerts in that city, but with no lasting success. In 1860 he was in active cooperation with Bjornson, who wrote for him many poems; and it was during these years—1860 to 1865—that Kjerulf did his best work, resigned to a contemplative and lonely existence, and content to exercise a quiet influence upon those who sought him out. Grieg, amongst others, was very glad of the older master's moral support.

The portraits of Kjerulf represent him with a mild and pensive face, with traces of pain in the expression. He had indeed suffered for long from extreme delicacy in the chest, and death overtook him when he had withdrawn to a retreat at Greifen, near Christiania, on August 11, 1865. A wave of deep emotion and sympathy, the fervour of which would have astonished the composer himself, passed over the country he had loved and served so well.

The value of Kjerulf's stirring quartets and choruses for men's voices, as reflecting the national sentiment in the way most acceptable to his countrymen, has already been commented on. As absolute music they are of slight interest, but by their vigour and their straightforward simplicity they may be said to possess all the virtue which belongs to complete appropriateness to the subject. His few piano-forte pieces fully maintain the highly artistic standard to which Kjerulf was always faithful.

Consideration of the purely musical side of Kjerulf's songs shows the perfect genuineness of their inspiration, and also the limits of that inspiration in intellectual depth and power. The stream of melody, generally written with due effect for the voice, and with a varied and sometimes elaborate pianoforte accompaniment, in fact, with considerable instinct of just proportions, is saved from actual commonplace by the fresh fragrance and the refinement which make his music distinguished though not important. Its sadness never becomes morbid, but is stamped with the resignation of a noble nature. Among the Northern ballads and lyrics are to be found some really characteristic and quaintly fascinating ditties. Such are Bjornson's 'Symphonie's Song,' 'Ingrid's Song,' 'Young Venevit,' 'Evening Song,' and the Scotch 'Taylor's Song,' Munch's 'Night on the Fjord,' Theodor Kjerulf's 'Longing.' Several songs that spring from Kjerulf's sojourn at Leipzig most eloquently recall the influence of Schumann, while his treatment of some English poems is almost startling. The polished verses of Moore are made the vehicle of outpourings in which the gentle Kjerulf is seen in his most impassioned mood—for instance, 'Love thee, dearest, love thee.' 'My heart and lute,' on the other hand, has inspired the composer with an intensity of dreamy melancholy. Unfortunately a certain amount of licence has been taken in the settings, and where the poem as a whole gains by the suggestiveness of the music, the lines and words now and then suffer from false accentuation. This is especially the case with some familiar verses by the late Lord Houghton. It would be impossible to enumerate all that is worthy of note in the collection of more than one hundred songs by Kjerulf; but notice must be taken of the successful colouring of some Spanish subjects, and of the pleasing settings of Victor Hugo's Romances. Many of the songs are familiar to English amateurs through the compilation by T. Marzials, published by Messrs. Stanley Lucas, Weber & Co. Further testimony to the value of the Norwegian composer's work can be read in the Musikalisches Wochenblatt of Jan. 24, 1879, in an article from the pen of Edward Grieg.

KLAFSKY, Katharina, born Sept. 19, 1855, at Szé, Janos (St. Johann) in the county of Wieselburg, Hungary, the daughter of a poor shoemaker. Both her parents were musical, and as a child she showed vocal aptitude. In 1870 her mother died, and she left home for Oedenburg, where she had to beg her daily bread. Later she went to Vienna and entered service there as a nurserymaid. Her singing attracted the attention of her employers, who introduced her to Neuwirth the organist of the Elizabeth Kirche, who gave her instruction. She was

1 For a full account of Kjerulf as the representative of his country, and for extracts from his letters and details of his private life, the reader may be referred to the articles 'Halfdan Kjerulf,' by Henrik Sundt, in the Musical World of Oct. 1, 8, and 15, 1887.
engaged in 1874 as a chorus-singer at the Konische Oper. There her voice attracted the attention of the conductor, the younger Hollmesberger, who induced Mme. Marchesi to teach her gratuitously. She was engaged in 1875 at Salzburg as a chorus-singer. In 1876 she married a merchant of Leipzig, and for a very brief space of time retired from the stage, but circumstances compelled her to accept an offer of Angelo Neumann to play small parts at the Leipzig theatre. From 1876 to 1882 she gradually won recognition as Venus in 'Tannhäuser,' Alice, and Bertha, 1881, and especially, Jan. 2, 1882, Brangine, on the production of 'Tristan' at Leipzig. In this last part she made a great success, after a fortnight's study only under the tuition of Paul Geisler, then chorus-master at Leipzig. In the same year she accompanied Neumann on his 'Nibelungen' tour, still in an inferior capacity, and when the Trilogy was produced at Her Majesty's Theatre, Frau Klafsky's modest débuts were made, May 5 and 6, as Wellgunde ('Rheingold') and Waltraute ('Walküre'). While on tour in 1882, she played at Danzig and Berlin for the first time as Sieglinde and Brunnhilde, instead of some other artist, and on each occasion with success. After an illness of four months' duration, she was engaged at Bremen as principal singer, in the place of Fr. Reicher-Kindermann,1 who had died at Trieste, and she made her début, Sept. 21, for the first time as Fidelio. From 1883 to 1886 she played all the principal parts, and in 1885 played the title part in a revival of Geisler's 'Ingeborg.' On the usual leave of absence, she sang in opera and concerts at Barmen, Oldenburg, Hamburg, Vienna, and Berlin. From 1886 to 1895 she was the principal singer at Hamburg, and established her reputation as one of the greatest artists in Germany in an extraordinary number of parts. She also sang in opera and concerts at Stuttgart, the Rhenish Festival at Cologne, at St. Petersburg, etc. On May 12, 1892, she lost her second husband, Franz Grefe, a baritone singer engaged at Hamburg. On July 2 she appeared again in England at Drury Lane in 'Fidelio,' and made an immediate success as Leonora, as Brunnhilde in the 'Trilogy,' and as Isolde and Elizabeth, singing both at Drury Lane and Covent Garden. Her voice is a pure soprano, rather veiled in the lower register, but bright and penetrating in the upper notes (Athenaeum). Beyond all question Frau Klafsky is the finest representative of Brunnhilde that has yet appeared. In addition to a noble voice, beauty of face and form, and magnificent histrionic powers, she understands the art of posing to an extraordinary degree, and her attitudes were frequently enchantingly graceful (Ibid.). In 1894 she made A welcome reappearance at Drury Lane, and sang for the first time here as Elsa, and Agatha in 'Der Freischütz.' Later in the year she sang at the Lamoureux Concerts, Paris. On Jan. 2, 1895, she played Anita on the production of Massenet's 'Navarraise' at Hamburg, and on the 31st married Otto Lohse, the conductor there (Baker). In the autumn they went to North America as principal singer and conductor of the Danrosch German Opera Company. In August 1896 Frau Klafsky appeared at Hamburg as Elizabeth, and on Sept. 11 appeared on the stage for the last time as Fidelio. Immediately afterwards she was struck down with a brain disease, probably accelerated by a fall she had received in America. An operation was performed without effect, and she died Sept. 22. Her life was written by Ludwig O ndemann (Fuendeling, Hameln and Leipzig, 1903), and has been of material assistance in the preparation of this notice.

A. C.

KLAVIER-MUSIK, ALTE. The name of two collections of PF. music. I. Edited by E. Pauer, and published by Senff, Leipzig:—

1 One of the last acts of Frau Hedwig Reicher-Kindermann, who had been the Isolde to Klafsky's Brunnhilde, was to give Klafsky 200 lire when she was trying at Turin, hoping that they would meet again for their holiday at the Tegernsee as arranged.
one for clavier alone in 3-part harmony, the second part requiring the use of the pedals. There are in all 116 pieces, some with the names of their composers, consisting of a certain number of preludes in various keys, described as being in ut, re, mi, fa, sol with and without B flat, la with and without B flat, and a large number of fantasias and organ arrangements of sacred and secular songs. Ritter says, ‘The whole collection shows the South German organ-playing in a very advantageous light; it extends and completes the work begun by Schlick, on whose principles it is based.’ Seventeen preludes and a fantasia are given in modern notation in the Monatshefte für Musikgeschichte, 1888, and three other pieces by Ritter.

KLEEBERG, Clotilde, born in Paris, June 27, 1866, was educated at the Conservatoire under Mmes. Emile Réty and Mme. Massart, where she carried off the first piano prize at twelve years of age. Shortly afterwards she played Beethoven’s C minor concerto with phenomenal success at one of Pascleloup’s concerts, and from that time onwards she made annual appearances at all the most important Parisian concerts. In 1883 she came to England, and appeared at a recital at Mann’s benefit at the Crystal Palace, and elsewhere. In the following year she deepened the impression then made, and appeared at the Philharmonic Society, and at all the first-rate London concerts. Richter, hearing her play in a private house, engaged her forthwith for the Philharmonic Concerts at Vienna, where she made a great success, as she did in Berlin in 1887, where Von Bülow greeted her with enthusiasm. In 1894 she was elected an ‘officier de l’Académie,’ and shortly afterwards she married the sculptor, Charles Samuel. Her interpretative power is very remarkable, her touch and technique have nothing effeminate about them, and her vigorous, artistic, and unaffected playing is fully appreciated wherever she is heard. She is perhaps at her best in Bach and Schumann, but the works of the old French clavecinistes are a speciality of hers, and in all music that she plays she grasps the composer’s intention to the full.

KLEIN, Bernhard, a German composer, born at Cologne, where his father was a bass player, March 6, 1798. His early life was passed in the disturbances of the French occupation of the Rhine, but in 1812 he found means to get to Paris, where Cherubini’s advice, the hearing of fine performers, and the study of the library of the Conservatoire, advanced him greatly. On his return to the Rhine he conducted the performances in Cologne Cathedral, and profited by an acquaintance with Thibaut and his fine library at Heidelberg. His first important works were a Mass (1816) and a Cantata on Schiller’s ‘Worte des Glaubens’ (1817). In 1819 he was sent officially to Berlin to make acquaintance with Zelter’s system of teaching, and to apply it in Cologne Cathedral. He, however, found it more profitable to remain in Berlin, where he became connected with the Institut für Kirchenmusik, then recently established, and was made director of music and teacher of singing in the University. These occupations in no wise checked his productivity. He composed a mass of sonatas and songs, an oratorio, ‘Job’ (Leipzig, 1820), and two grand operas, ‘Dido,’ to Rollat’s text (1823), and ‘Priamie’ (1825). In 1828 he married, and went to Rome, where he enjoyed intercourse with Balmi, and copied from the ancient treasures of music there. On his return to Berlin he composed an oratorio, ‘Jephtah,’ for the Cologne Festival, 1833, and another, ‘David,’ for Halle, 1830. In 1832, Sept. 9, he suddenly died in Berlin. Besides the compositions already mentioned, he left a Mass in D, a Pater-noster for eight voices, a Magnificat and Responsoria for six voices, an opera, ‘Irene,’ and an oratorio, both nearly finished, eight books of psalms, hymns, and motets for men’s voices, and other pieces both sacred and secular. His vocal music was much used by singing societies after his death. Hollish reprinted one of the 4-part psalms, ‘Like as the hart,’ in his excellent collection called ‘Vocal Scores.’ It is sweet, dignified, religious music, very vocal in its phrases.

KLEINMICHEL, Richard, born at Posen, Dec. 31, 1846, received his first instruction from his father (Friedrich H. H., 1827-1894, a military and operatic conductor), and at an early age appeared in public as a pianist. In 1863-96 he completed his studies at the Leipzig Conservatorium, and settled at Hamburg, where he published many works of some importance, mostly for his own instrument. His second orchestral symphony was given at the Gewandhaus at Leipzig with success. In that town he held for some time the position of capellmeister at the Stadthteater, and subsequently held similar posts at Danzig and Magdeburg. He now lives in Berlin. His first opera, ‘Manon,’ was successfully produced at Hamburg in 1883, and his ‘Pfiefer von Dusenbach’ at the same place in 1891. He has also made ‘simplified’ arrangements of the pianoforte scores of Wagner’s later works.

KLEMM, or KLEEMME, Johann, born at Oederan near Zwickau in Saxony, some time before 1600, was received as a boy into the choir of the Electoral chapel at Dresden. He was afterwards sent, by the Elector Johann Georg I., for his further musical education, to Christian Erbach at Augsburg, with whom he remained from 1613 to 1615. Returning to Dresden he became the pupil of Heinrich Schütz for composition, and was appointed court organist in 1625. He died some time after 1651. 1

1 These two oratorios are in the Library of the Royal College of Music.
He deserves honourable mention in musical history as having generously undertaken the publication of several of the works of Schütz, when Schütz was unable to bring them out at his own expense. The work by which he himself is known as a composer is an instrumental work entitled, ‘Partitura seu Tabulatura Italica, exhibens 36 fugas, 2, 3 et 4 vocibus, ad duodecim consuetos tonos musicos compositas...’ 1841. On this work see Seiffert-Fleschcr, (geschic.tclier der Klaviermusik, Bd. 1, p. 101. For other works see the Quellen-Lexikon.

J. R. M.

KLEMM. This well-known Leipzig music-publishing firm, and circulating library, was founded in 1821 by Carl August Klemm in the house in which it now occupies, known as the ‘Hohe Lütie,’ 14 in the Neumarkt. Klemm succeeded Wieck, the father of Madame Schumann, who had for some time carried on a musical lending library on the premises. In 1847 the house opened a branch at Chemnitz, and in 1856 at Dresden. Among the original publications of the house are to be found the names of J. S. Bach, Dotzauer, F. Abt, Dreyerhoeck, Mendelssohn, Schumann (op. 34, 35), Lachner, F. Schneider, Julius Rietz, Marschner, etc. etc.

KLENGEL, August Alexander, born Jan. 27, 1783, at Dresden, son of a well-known portrait and landscape painter, first studied music with Milchmayer, inventor of a piano which could produce fifty different qualities of tone (see Crauer’s Magazin der Musik, i. 10). In 1803 Clementi visited Dresden, and on his departure Kengel went with him as his pupil. The two separated on Clementi’s marriage in Berlin, but the young wife dying shortly after, they went together to Russia, where Kengel remained till 1811. He then spent two years studying in Paris, returned to Dresden in 1814, went to London in 1815, and in the following year was appointed Court-organist at Dresden, which remained his home till his death on Nov. 22, 1852. During a visit to Paris in 1828 he formed a close friendship with Fétis, who with other musicians was much interested in his pianoforte canons. Of these he published only ‘Les Avant-coureurs’ (Paul, Dresden, 1841). After his death Hauptmann edited the ‘Canons et Fugues’ (Breitkopf & Härtel, 1854), with a preface, in which he says, ‘Kengel was brought up on Sebastian Bach, and knew his works thoroughly. It must not be supposed, however, that he was a mere imitator of Bach’s manner; it is truer to say that he expressed his own thoughts in the way in which Bach would have done had he lived at the present day.’ He left several concertos, and many other works. His visit to London was commemorated by the composition of a Quintet for Piano and Strings for the Philharmonic Society, which was performed Feb. 26, 1816, he himself taking the pianoforte. There is a pleasant little sketch of him in a letter of Mendelssohn’s to Eckert, Jan. 26, 1842.

KLENGEL, Julius, a distinguished violoncellist, was born Sept. 24, 1859, at Leipzig. He was a private pupil of Emile Hegar, whilst S. Jadassohn gave him lessons in harmony and composition, and in 1874 joined the famous Gewandhaus Orchestra, of which he is at the present day principal violoncello. His first appearance as a soloist was in 1875. In 1881 he received the appointment of teacher at the Leipzig Conservatorium, and the honorary title of ‘Royal Professor.’ Though a member of the so-called ‘Gewandhaus Quartet’ (Wollgantd, Hanemann, Hermann, Kengel) and a recognised classical player, he is better known outside his native town as a violoncello virtuoso, having toured in that capacity through all the principal towns of Germany, Holland, Russia, and England. America he has not yet visited.

As a performer he has sacrificed, to some extent, quality of tone to the acquisition of phenomenal powers of execution. In the matter of technique he is surpassed by no living violoncellist, playing harmonic notes, and passages lying in the upper register of the violoncello, with all the clearness and fluency of a violinist. He is distinguished as a teacher, having formed many good pupils, and also as a composer, amongst his works the following being worthy of mention: Four violoncello concertos, two string quartets, one violoncello sonata, one pianoforte trio, suites, and serenades for string orchestra, pieces for two and four violonceli, solo pieces and educational works.

KLENGEL, Paul, violonist, brother to the above, pianist and song-writer, was born at Leipzig on May 13, 1854. He was a pupil of the Conservatorium in 1868-72. He is a Dr. Phil., and an excellent all-round musician. Conducted the ‘Euterpe’ concerts at Leipzig, 1881-86, then filled the post, for several years, of second Hofkapellmeister at Stuttgart, returning to Leipzig in 1893 to conduct the Choral Society ‘Arion.’ From 1898 to 1903 was conductor of the ‘Deutscher Liederkranz’ in New York, and then returned once more to Leipzig, resuming the conductorship of the ‘Arion’ Society, which he retains to this day. He does a considerable amount of scoring and arranging for publishers and composers.

KLENOVSKY, Nicholas Semenovich, composer and conductor, born at Odessa, 1857, was a pupil of the Moscow Conservatoire, under Hubert and Tchaikovsky. He was selected by N. Rubinstein to assist him in organising the first performance of Tchaikovsky’s ‘Eugene Onegin’ (1879). Klenovsky was afterwards conductor of the University orchestra, and assistant conductor at the Imperial Opera, Moscow. Deeply interested in all that concerned racial
music, he was associated with Melgunov in collecting and harmonising the Russian folk-songs. (See Melgunov.) In 1893 he became director of the Music School at Tiffa, which gave him the opportunity of studying the music of the various Caucasian races. He was the first to organise 'Ethnographical Concerts' in Russia. In 1902 he was appointed sub-director of the Imperial Chapel. He has composed several successful ballets; incidental music to plays, 'Messaline,' 'Antony and Cleopatra,' etc.; cantatas and a 'Georgian Liturgy' a cappella (1902).

KLINKWORTH, Karl, born at Hanover on Sept. 25, 1830, was in early youth an accomplished performer on the violin. From his seventeenth to his nineteenth year he acted as conductor to a travelling opera troupe; then he settled in Hanover and took to playing the piano and composing. In 1852 he went to Weimar to study pianoforte-playing under Liszt, and had Hans von Bilsow, W. Mason, and Dionys Pruckner as his fellow-pupils. In 1854 he came to London, where he remained fourteen years, appearing in public at intervals as a pianist and conductor of orchestral concerts, but in the main living the quiet life of a student and teacher. [His first appearance here was at one of Ella's 'Musical Winter Evenings' on March 30, 1854, and he played Henselt's concerto at the New Philharmonic concert on July 4, 1855.] He organised two series of three chamber concerts in the spring of 1861 and 1862, and a series of three orchestral and vocal concerts in the summer of 1861, under the title of the 'Musical Art Union.' The most remarkable compositions brought forward at the latter were Rubinstein's 'Ocean' Symphony; Gade's 'Erl King's Daughter'; Cherubini's Requiem, No. 1; Schumann's PF. Concerto. They were well carried out, but met with the usual fate of such enterprises in London, and were discontinued for want of capital. In 1868 Klinkworth was appointed to the post of professor of the pianoforte at the Conservatorium of Moscow, and while there he brought out the works which have made his name famous, the pianoforte scores of Wagner's 'Der Ring des Nibelungen,' begun during Wagner's visit to England in 1855, and his critical edition of Chopin; the latter beyond all praise for rare insight into the text and minute care bestowed on the presentation of it; the former quite wonderful for the fidelity with which the transcript is contrived to reflect Wagner's complicated orchestration. [In 1882 he returned to Germany, and was conductor of the Berlin Philharmonic Concerts, jointly with Joachim and Willner, and was also conductor of the Berlin Wagner Society. He established a school of music in Berlin, which existed until 1893, when he retired to Potsdam, and has since devoted himself to private teaching. He visited London once again to conduct a concert given by Mr. F. Dawson, on May 15, 1898. See the Musical Times for 1898, p. 515.] His arrangement of Schubert's Symphony in C major for two pianofortes, and the four-hand arrangement of Tchaikovsky's Poeme symphonique, 'Francesca da Rimini,' as also, amongst his original compositions, a very difficult and effective Polonaise fantasia for pianoforte, should be particularly mentioned. The manuscripts of a masterly rescoring of Chopin's Concerto in F minor, and a condensation and orchestration of C. V. Alkan's Concerto in G minor (Etudes, op. 39), are well known to his friends. [The new version of Chopin's concerto has been often played, and in the opinion of a large class of musicians the work is improved thereby, though others consider that the slighther accompaniment designed by the composer is really more effective.]

KLOTHZ, the name of a numerous family of violin-makers, who lived at the little town of Mittlenwald, in the Bavarian Alps, and founded a manufacture of stringed instruments which makes Mittlenwald to this day only less famous than Markneukirchen in Saxony, and Mirécourt in the Vosges. A variety of the pine, locally known as the 'Hasel-tichte' (Bechstein calls it the 'harte oder spite Roth-tanne'), of delicate but strong and highly resonant fibre, flourishes in the Bavarian Alps. The abundance of this material, which the ingenious peasants of the neighbouring Ammerthal use for wood-carving, led to the rise of the Mittlenwald violin manufacture. For about two centuries there was held in the town a famous fair, greatly frequented by Venetian and other traders. In 1679 this fair was removed to Botzen, and the Mittlenwalders attribute the rise of the violin industry to the distress which therewith ensued. One Eostiudius Klothz had already made violins at Mittlenwald. Tradition says that he learned the craft from Stainer at Absam. He is more likely to have learned it from seeing Stainer's violins, which he imitated with success. His son, Matthias or Matthew Klotz (1653-1743), followed in the same path. He travelled, however, into Italy, sojourning both at Florence and Cremona. Tradition reports him to have returned to Mittlenwald about 1683, and to have at once begun to instruct many of the impoverished Mittlenwalders in the mystery of violin-making. The instruments found a ready sale. They were hawked about by the makers at the churches, castles, and monasteries of South Germany; and Mittlenwald began to recover its prosperity. Most of the instruments of Matthias Klotz date from 1670 to 1696. They are well built, on the model of Stainer, but poorly varnished. His son Sebastian surpassed him as a maker. His instruments, though Stainer-like in appearance, are larger in size, of flatter model, and better designed; and his varnish is often of a good Italian quality.
Another son of Matthias, named Joseph, still has a good reputation as a maker.

Until about the middle of the 18th century, a distinctive German style prevailed in violins, of which the above-mentioned makers are the best exponents. In several towns of Italy there were Germans working in their own style side by side with Italian makers. Teller worked thus in Rome, Mann in Naples, and the three Gottillers (Gottfried) in Venice. It is certain, too, that there was a demand for German violins in Cremona itself. Two Germans, named Pfitscher and Fricker, who made violins of their own ugly pattern, gained a subsistence there in the golden days of Stradivarius: and the famous Veracini always used a German violin. But this competition could not long endure. The superiority of the Italian violin was established in the earlier half of the century: and wherever stringed instruments were made, imitation of the Italian models began. It penetrated to Mittenwald, as it did to London and Paris. This stage of the art is represented by Georg Klotz, whose fiddles date from 1750 to 1770. They have lost their distinctive Tyrolean cut, without gaining the true Italian style, and are covered with a thin brittle spirit varnish, laid upon a coat of size, which keeps the varnish from penetrating the wood, and renders it opaque and perishable. Besides George, we hear of Michael, Charles, and a second Egidius. Nine-tenths of the violins which pass in the world as 'Stainers' were made by the Klotz family and their followers.

KLUGHARDT, August Friedrich Martin, born Nov. 30, 1817, at Cothen, was for twenty years a theatrical conductor before becoming court music-director, first at Weimar in 1869, then at Neustrelitz in 1873, and at Dessan in 1882. He died at the last-mentioned place, Aug. 3, 1902. Under Liszt's influence he threw himself into the modern school of music, but stopped short of the exaggerations into which many of Liszt's followers were led. Five overtures, five symphonies, two suites, concertos for oboe, violin, and violoncello respectively, the oratorios 'Die Grablegung Christi,' 'Die Zerbürung Jerusalem's' (his best-known work), and 'Judith,' two psalms for solo and chorus, and much chamber music, represent his chief work apart from the stage, to which he contributed 'Miriam' (Weimar, 1871), 'Iwein' (1879), and 'Gnaden' (1882, both at Neustrelitz), and 'Die Hochzeit des Mönchs' (Dessan, 1886), given as 'Astorre' at Prague in 1888. (Kienemann's Lexikon.)

KNABE & COMPANY, an eminent firm of American pianoforte manufacturers with headquarters in Baltimore. Its founder, William Knabe, was born in Kreutzburg, Saxe-Weimar, in 1797, and died in Baltimore in 1864. He began the business of making pianofortes in 1837, and some years later entered into partner-

ship with Henry Gaehle. In 1854, he bought the latter's interests, and associated his son, Ernst (1837-94), with him, as also another son William (1841-89) a little later, and a son-in-law Charles Keidel. The heads of the firm in 1903, are Ernest J. Knabe jun. (born July 5, 1869), and William Knabe (born March 28, 1872).

KNAPP, William, the author of a L.M. psalm tune called 'Wareham,' which was long a favourite in churches. He was born 1698, was parish clerk of Poole, and died 1765. He published a 'New Set of Psalms and Anthems in four parts' in 1738 (2nd edition, 1741, 3rd, 1747, all from engraved plates, 4th, 1750, and 7th, 1762, 8th, 1770, the latter from type). In 1753 appeared 'The New Church Melody' which was re-issued in 1756 and 1764, the last being the 5th edition. 'Wareham' is in both—in the former called 'Blandford,' and in common time, in the latter in triple time. Another tune by him is given by the Rev. Henry Parr, Church of England Psalmodist. (Information from Rev. H. Parr, the parish clerk of Poole, Messrs. J. F. R. Stainer, and F. Kidson.)

KNAPTON, Philip, was born at York in 1788, and received his musical education at Cambridge from Dr. Hague. He then returned to York and followed his profession. He composed several overtures, pianoforte concertos, and other orchestral works, besides arranging numerous pieces for the pianoforte and harp. He acted as one of the assistant conductors at the York Festivals of 1823, 1825, and 1828. He died at York, June 20, 1833. [His father, Samuel Knapton, was a music-publisher in Blake Street, and afterwards in Coney Street, York, at the end of the 18th century. Philip and others of the family, together with a York musician named White, kept on the business until about 1840, when it passed into the hands of a person named Banks. F. K.]

KNECHT, Justin Heinrich, born Sept. 30, 1875, at Biberach in Swabia, received a good education, both musical and general (Boeck was one of his masters), and filled for some time the post of professor of literature in his native town. [He combined with this the office of music-director from the year 1771.] By degrees he gravitated to music, and in 1807 became director of the opera and of the court concerts at Stuttgart; but owing to successful intrigues against him, in a couple of years he resigned the post and returned to Biberach, where he died Dec. 1, 1817, with a great reputation as organist, composer, and theoretician. In the last-mentioned department he was an adherent of Vogler. The list of his productions as given in the Quellen-Lexikon embraces many compositions, sacred and secular, vocal and instrumental, and eight theoretical and didactic works. Two of the former only have any interest for us, and that from an accidental
cause. The first (Bossler, Spire 1) is 'Le Portrait Musical de la Nature,' a grand symphony for two violins, viola, and bass, two flutes, two oboes, bassoons, horns, trumpets, and drums ad lib., in which is expressed.—1. A beautiful country, the sun shining, gentle airs, and murmuring brooks; birds twitter, a waterfall tumbles from the mountain, the shepherd plays his pipe, the shepherdess sings, and the lambs gambol around. 2. Suddenly the sky darkens, an oppressive closeness pervades the air, black clouds gather, the wind rises, distant thunder is heard, and the storm approaches. 3. The tempest bursts in all its fury, the wind howls and the rain beats, the trees groan, and the streams rush furiously. 4. The storm gradually goes off, the clouds disperse, and the sky clears. 5. Nature raises its joyful voice to heaven in songs of gratitude to the Creator' (a hymn with variations). The second (if it be not an arrangement of a portion of the preceding) is another attempt of the same kind with a German title—'The Shepherds' pleasure interrupted by the storm, a musical picture for the organ.' These are precisely the subjects which Beethoven has treated, and Fétis would have us believe that Knecht actually anticipated not only the general scheme of the Pastoral Symphony but some of its figures and passages. But this is not the case. The writer purchased the score and parts of Knecht's work at Otto Jahn's sale, and is able to say that beyond the titles the resemblances between the two works are obviously casual. Knecht's being in addition commonplace, entirely wanting in that 'expression of emotions' which Beethoven enforces, and endeavouring to depict the actual sights and sounds, which he deprecates. [See Pastoral Symphony.]

KNEISEL, FRANZ, violinist, chiefly player and leader of chamber concerts, born in Bucharest, Roumania, Jan. 26, 1865. His father, a native of Olmitz, Moravia, was the leader of a military band, and gave him his first musical instruction. He then studied at the Conservatorium in Bucharest, and had finished its courses and carried off the first prize for violin playing before he was fifteen years old. In 1879 he entered the Vienna Conservatorium as a special pupil of Grün and Hoffmeister, devoting himself under the latter chiefly to chamber music. On the completion of his academical studies he took the first prize for violin playing in July 1882, and on Dec. 31, of the same year, played Joachim's 'Hungarian' concerto at a Philharmonic concert. He was at once appointed solo violinist at the Hofburg Theater as successor of Jacob Doni. In 1884 he went to Berlin as Concertmeister of the Biele Orchestra, remaining in that position one year when, in the autumn of 1885, he went to America on the invitation of Wilhelm Gericke, conductor, to be principal and solo violinist of the Boston Symphony Orchestra. He performed the duties of that office uninterruptedly for eighteen years, resigning in May 1903 to devote himself thenceforward to solo work and the leadership of the Kneisel Quartet. (See Boston Musical Societies.) As a lad Mr. Kneisel conducted a Philharmonic Society of instrumentalists in Bucharest; in America similar duties of greater moment devolved upon him. In the absence of Arthur Nikisch he conducted the concerts of the Boston Symphony Orchestra at the World's Fair in Chicago in 1893, and also a concert tour through Western cities lasting three weeks, in the early summer of that year. In 1902 and 1903 he was associate conductor of the Worcester Festivals in Massachusetts, and in 1905 was appointed violin professor in the new Institute of Musical Art in New York. H. E. K.

KNELL, the Passing Bell (Fr. La Cloche des Agonisants; Germ. Der Todtenblick). A solemn cadence, tolled on the great bell of a parish church, to announce the death of a parishioner; or, in accordance with old custom, to give warning of his approaching dissolution. To indicate the decease of a man, or boy, the knell begins with three triple tolls, followed by a number of moderately quick single strokes corresponding to the age of the departed. The bell is then tolled, very slowly, for the accustomed time; and the knell concludes, as it began, with three triple tolls, sometimes, but not always, preceded by a repetition of the single strokes denoting the age of the deceased person.

For a woman, the knell begins, and ends, with three double, instead of three triple tolls. In other respects, the formula is the same as that used for a man.

Minute tolls denote the death of the Sovereign, or Heir Apparent to the Crown. W. S. R.

KNELLER HALL, Whitton, near Hounslow, Middlesex, the 'Military School of Music,' for the education of bandsmen and bandmasters for the regiments of the British army. At Queen Victoria's Jubilee, 1887, the prefix 'Royal' was added to the name of the institution. Until modern times bandmasters in the British army were mostly civilians, with no guarantee for their competence for the post, and bandsmen were instructed and practised in a casual and often imperfect manner by each regiment for itself. A bandmaster formed no integral part of the corps, and could not be compelled to accompany it in case of war or foreign service; and the status of bandsmen is even now so far anomalous that in action their duty is to rescue the wounded under fire and take charge of them in hospital. Each band was formed on its own model, and played what kind of instruments, and at what pitch, it liked. In

---

1 It is published at Spire by Bossler, with no year; but the date may very well be 1784, since the list on the back contains the three early sonatas of Beethoven, which were published by Bossler in 1786. But the coincidence is curious, Beethoven must have been familiar with Bossler's advertisement page, on which his own first sonata was announced, and which contains all the above particulars.
the Crimean war the evils of this state of things and the want of united systematic action were painfully apparent, and shortly afterwards, by command of H.R.H. the Duke of Cambridge, Commander-in-Chief, a plan was drawn up and submitted to the officers of the army, to which they readily gave their assent and subscription. In pursuance of this plan Kneller Hall, a building on the site of the house of Sir Godfrey Kneller, the painter (formerly the Government establishment for training schoolmasters), was taken, and opened as a school on March 3, 1857, with Col. H. S. Stephens as Commandant, and a systematic course of instruction, with a staff of professors, began, under the modest title of the 'Military Music Class,' and under the superintendence of H. Schallehn, the resident musical director till April 1859. Major (afterwards General) F. L. Whitmore, long known for a philanthropic interest and zeal in matters of music, was in August 1863 appointed Commandant, and reported annually to the Adjutant General of the Forces. The advantages of the plan proved so great that in 1875 the institution was adopted by Government, which had given the school a grant since 1872. Bandmasters now hold the rank of warrant officer in the army, and the musical department in each regiment consists of a bandmaster, a sergeant, a corporal, and nineteen men (cavalry fourteen), besides boys as drummers and fifers. General Whitmore was succeeded as Commandant in 1880, by Col. R. T. Thompson, who was followed by Col. T. B. Shaw-Heller in 1888. [He held the post until 1893, when he was succeeded by Col. G. Brook-Mearns, who was followed in the next year by Col. Farquhar Glennie, and he by Col. F. O. Barrington-Foote in 1900. The present musical director is Lieut. A. J. Stretton, M.V.O., appointed in 1896.]

The educational staff at Kneller Hall now comprises professors of the following subjects—Theory, Clarinet (3), Flute, Oboe, Bassoon, French Horn, Cornet, Trombone, Euphonium, and Basses, Violin (2), Violoncello, Pianoforte—and a schoolmaster from the Government Normal School for general education. The first-class students act as assistants to the professors. The length of term is two years, the hours of musical instruction are seven in summer, and six in winter daily. The number of pupils of all ages varies with circumstances. The average strength is about fifty non-commissioned officers, training for bandmasters, and forming the first class or 'students'; and 130 privates, boys and adults, training for bandmen, the second class or 'pupils'—180 in all. Lads are admitted at fifteen. [There are two classes of learners, called respectively students and pupils. The former are band-sergeants and non-commissioned officers sent by their respective regiments to qualify for the position of bandmaster. The entrance examination for this is severe, and it is necessary that the candidate should have had seven years' service as a musician. He is taught the art of teaching by having a number of 'pupils' put under him, and he learns by practical experience to conduct a band, a form of instruction in which Kneller Hall stands alone among the great London institutions. The 'pupils' are those who are being trained for the position of bandmen.] Both lads and men are taken into the school as vacancies occur, on the recommendation of the commanding officers of the regiments. A supply of the former is obtained from the Chelsea Hospital; the Royal Hibernian Military School, Dublin; the Metropolitan Poor Law Schools, etc. General instruction is given by the Normal schoolmaster, and there is a noble chapel in which service is regularly performed.

The great improvement, both in the moral conduct and the efficiency of the men, which has taken place since the foundation of Kneller Hall cannot be too warmly welcomed. By General Whitmore's efforts, and the enlightened sanction of H.R.H. the Commander-in-Chief, uniformity in instruments and in pitch has been obtained, and a general consolidation of the military music of the country brought about which is highly desirable. A bandmaster has now a recognised position in the army, and a fixed salary of £70 a year in addition to his regimental pay. The cost of the bands and the school is now borne entirely by the Government. [See an interesting article on Kneller Hall in the Musical Times of 1900, p. 513.]

KNIGHT, REV. JOSEPH PHILIP, youngest son of the Rev. Francis Knight, D.D., was born at the Vicarage, Bradford-on-Avon, July 26, 1812. His love for music began early, and at sixteen he studied harmony and thorough-bass under Corfe, then organist of Bristol Cathedral. When about twenty Knight composed his first six songs, under the name of 'Philip Mortimer.' Among these were 'Old Times,' sung by Henry Phillips, and 'Go, forget me,' which was much sung both here and in Germany. After this he used his own name, and in company with Haynes Bayly produced a number of highly popular songs, among which the most famous were 'Of what is the old man thinking?' 'The Veteran,' 'The Grecian Daughter,' and 'She were a wreath of roses.' He subsequently composed a song and a duet to words written for him by Thomas Moore—'The parting,' and 'Let's take this world as some wide scene.' In 1839 Knight visited the United States, where he remained two years. To this time are due, among other popular songs, his best song, 'Rocked in the cradle of the deep,' sung with immense success by Braham. [In Jan. 1841 he accompanied Liszt to Dublin, and appeared at a concert given in that city under Lavenu's direction.

1 A = 443 vibrations per second.
On his return to England he produced 'Venice,' 'Say what shall my song be to-night,' and 'The Dream,' to words by the Hon. Mrs. Norton—all more or less the rage in their day. Some years afterwards Knight was ordained by the Bishop of Exeter to the charge of St. Agnes in the Scilly Isles, where he resided two years. He then married and lived for some time abroad, doing very little in the way of composition, but on his return to England he again took up his pen, and wrote many songs which enjoyed great popularity. His songs, duets, and trios, number in all not less than two hundred. He was a good organist, with an unusual gift for extemporising. He died at Great Yarmouth, June 2, 1857.

KNORR, Iwan, composer and teacher, was born on Jan. 3, 1863, at Mewe in West Prussia, almost on the Russian frontier. When only four years of age, he was taken by his parents to Southern Russia, and soon began his musical training under his mother, a moderate pianist. In the various small Russian towns in which at this time the Knorr family lived, the opportunities for hearing good music were rare, and in consequence the lad Iwan had much to do for himself, all the while absorbing the influence of the Slavonic folk-music which was practically all he heard. His first efforts at composition were made when he was seven years of age, but it was not until 1868, when the family settled in Leipzig, that the real chance of hearing good music came, and with it a determination to adopt a musical career, to which the parents acceded. On entering the Conservatorium Iwan Knorr became a pupil, for pianoforte of Ignaz Moscheles, for theory of Riehert, and for composition of Carl Reinecke. After passing through the Conservatorium Knorr returned to Russia and became professor of music in the Imperial Institute for Noble Ladies. There he had ample time for composition, but, doubtful of his ability, he submitted some compositions to Brahms, at that time unknown to him, with a request for a judgment. The work submitted was the series of variations on an Ukrainisch Volkslied (op. 7) for orchestra, on which Brahms expressed so highly favourable an opinion that a few years later (1883) Knorr was appointed, on Brahms' recommendation, principal teacher of composition at the Hoch Conservatorium in Frankfort-on-Main, a position he still (1905) holds. There he has numbered among his 'most gifted pupils many who belong to the musically much-maligned English nation, Cyril Scott, H. Balfour Gardiner, Norman O'Neil, and Roger Quilter for example.'

Knorr's published compositions include: op. 12, a symphonic Phantasia for orchestra; and a quantity of songs and pianoforte music for two and four hands. In the mass of his manuscript music is 'Dunja'—a musical village-tale in two acts, which was successfully staged at Coblenz on March 25, 1904. As an author, too, Knorr has been busy. He is engaged upon a life of his friend Tchaikovsky, and has published Aufgaben für den Unterricht in der Harmonielehre. Knorr's services as a teacher are much sought after. He is very broad minded in musical matters, believes firmly in training the mind of each pupil individually, and acts up to his belief; and prefers the school of experience and the 'eternal laws' to the set 'rules' of composition. His text is that in harmony all is good that seems good to the thoroughly educated ear, whether it conform to the rules or not.

KNOTT, John, a composer and compiler of church melodies. Probably born at Sevenoaks, Kent, where his father was a Baptist minister. He became a chorister in Durham Cathedral, and in 1811 was precentor in the West Church, Aberdeen, and a teacher of singing. While he issued an interesting little oblong volume, Sacred Harmony, being a collection of Psalm and Hymn Tunes, 1814, 2nd ed. 1815. In 1824 he was in Edinburgh, and issued a Selection of Tunes in four parts, adapted to the Psalms and Paraphrases of the Church of Scotland. While in Edinburgh he was music-master at Heriot's Hospital, and precentor at the New North Church. He died there in 1837.

KNÜPFER, Sebastian, was born Sept. 7, 1633, at Asch in the Voigtdland, Saxony. He received his education, musical and otherwise, at Regensburg. Coming to Leipzig to pursue his philological as well as musical studies, he succeeded, in 1657, Tobias Michael as Cantor of the Thomasschule and General Director of the Town Music. He died in 1676. From the obituary notice contained in the so-called Leichenprogramm or Funeral Invitation issued by the rector of Leipzig University which is now reprinted in Eitner's Monatshfte für Musikgeschichte, 1901, pp. 207-218, we learn that amongst his contemporaries, Knüpfier was as much esteemed for his philological as for his musical attainments. He is said to have edited Kircher's Musurgia, and the treatises of Guido, Boetius, Berno, and others, although no traces of such works are now to be found. The only musical works published by him consist of a few Funeral Motets (Leichengesange) for four to eight voices; but the Royal Library at Berlin contains a collection of twenty-two of his Church Cantatas for three to eight voices, with instrumental accompaniment, which Winterfeld characterises as a valuable possession, and as showing Knüpfier to have been a serious, solid, thoroughly trained musician. None of
these works have yet appeared in modern times.

KNYVETT, Charles, born Feb. 22, 1752, descended from an ancient Norfolk family, was one of the principal alto singers at the Commemoration of Handel in 1784; he was also engaged at the Concert of Ancient Music. He was appointed a gentleman of the Chapel Royal, Nov. 6, 1786. In 1791 he, in conjunction with Samuel Harrison, established the Vocal Concerts, which they carried on until 1794. On July 25, 1796, he was appointed an organist of the Chapel Royal, and a few years later resigned his former post. He died in London, Jan. 19, 1822.

His elder son, Charles, was born in London in 1773. He was placed for singing under Mr. (afterwards Sir) William Parsons, and for the organ and piano under Samuel Webbe. In 1801 he joined his younger brother William, Greatorex, and Bartleman, in reviving the Vocal Concerts. In 1802 he was chosen organist of St. George's, Hanover Square. Besides this he taught the pianoforte and thorough-bass, wrote glees, etc., and published a Selection of Psalm Tunes, 1823. He died, after many years of retirement, Nov. 2, 1852.

William, the younger son of Charles the elder, was born April 21, 1779. In 1788 he sang in the treble chorus at the Concert of Ancient Music, and in 1795 appeared there as principal alto. In 1797 he was appointed gentleman of the Chapel Royal, and soon afterwards a lay-vice of Westminster. In 1802 he succeeded Dr. Arnold as one of the composers of the Chapel Royal. For upwards of forty years he was principal alto at the best London concerts and all the provincial festivals, being greatly admired for the beauty of his voice and his finished style of singing, particularly in part music. Callcott's glee 'With sighs, sweet rose,' was composed expressly for him. In 1832 he became conductor of the Concert of Ancient Music, which office he resigned in 1840. He conducted the Birmingham Festivals from 1834 to 1843, and the York Festival of 1835. He was the composer of several pleasing glees—one of which, 'When the fair rose,' gained a prize at the Harmonio Society in 1800—and some songs, and wrote anthems for the coronations of George IV. and Queen Victoria. He died at Ryde, Nov. 17, 1856.

Deborah, second wife of William Knyvett, and niece of Mrs. Travis, one of the Lancashire chorus singers engaged at the Concert of Ancient Music, was born at Shaw, near Oldham, Lancashire. In 1813 she was placed in the chorus of the Concert of Ancient Music, the directors of which, finding her possessed of superior abilities, soon withdrew her from that position, took her as an articled pupil, and placed her under Greatorex. In 1815 she appeared at the concerts as a principal singer with success. In 1816 she sang at the Derby Festival, in 1818 at Worcester, and in 1829 at Birmingham. From that time she was constantly in request, particularly as an oratorio singer, until 1845, when she retired. She married W. Knyvett in 1826, and died in Feb., 1878.

Koch, HeINRICII Christoph, born at Rudolstadt, Oct. 10, 1749, the son of a member of the ducal orchestra there. In 1748 he was admitted into the band as a violinist, having received instruction from G. Pfort of Weimar, and in 1777 obtained the title of 'Kammermusiker.' He composed various pieces of small importance for the court, but his fame rests upon his contributions to musical literature. His Versuch einer Anleitung zur Composition appeared in three parts between the years 1782 and 1793; and his Musikalisches Lexicon in 1802. This was republished in a condensed form in 1807 and 1828, but its complete revision dates from 1885, and is the work of Arrey von Dommer. [See Dommcr, vol. i. p. 713.] He wrote several other works of less importance on harmony and other subjects connected with the art, and died at Rudolstadt, March 12, 1816.

Kochetov, Nicholas Razoumnikovich, composer and musical critic, was born July 8, 1864, at Oranienbaum. He is chiefly a self-educated musician. In 1889 he began to write for the Novoe Vremya, The Artist, The Moscow Viedenosti, etc. His compositions include: An opera, 'A Terrible Revenge,' on a subject from Gogol; 'Arabian Suite' for orchestra, op. 3; Symphonies in E minor, op. 8 (1895); Valse Serenade for string orchestra; numerous pianoforte pieces, including 'In the Heart of Nature,' op. 11, and 'Eastern Sketches,' opp. 12, 13; and about twenty-four songs.

Koczalski, Raoul, born at Warsaw, Jan. 3, 1885, was taught by his father, and from the age of seven was allowed to display his exceptional abilities as a pianist in public and on various tours. He appeared in London in May 1893, and a composition of his written about that time was marked op. 46; in 1896 he celebrated the 1000th appearance in public, and after that he seems to have been withdrawn from the injurious career of a prodigy, so that it is quite possible that he may achieve something important, whether as player or composer, in the future.

KöCHEL, Dr. Ludwig, Ritter von, learned musician and naturalist, born Jan. 14, 1800, at Stein, near Krems on the Danube; tutor to the sons of the Archduke Karl (1828-42). From 1850 to 1863 he lived at Salzburg, and from the latter year to his death, on June 3, 1877, at Vienna. His work as a botanist and mineralogist does not concern us; as a musician he has immortalised his name by his Chronologisch-thematisches Verzeichniss of all W. A. Mozart's works, with an appendix of lost, doubtful, and spurious compositions (Breitkopf & Härtel, Leip-
KÖHLER

zig, 1862). As a precursor of that precious work, a small pamphlet should be named, Über den Umfang der musikalischen Produktivität W. A. Mozart (Salzburg, 1862). The complete edition of Mozart's works which Breitkopf & Hartel have published could scarcely have been made without his generous co-operation. In 1832 von Köchel was made an Imperial Councillor, and in 1842 he received the order of Leopold. Among his intimate friends was Otto Jahn, in whose work on Mozart he took an active interest. See Jahn's Mozart, second edition, p. XXX. His private character was most estimable. C. F. T.

KÖHLER. The name of an eminent family of military wind-instrument makers. The founder of the family was JOHN KÖHLER, a native of Volkenrode, a hamlet near Cassel. He came to England, acted as bandmaster to the Lancashire Volunteers, and in 1780 established himself as a musical instrument maker at 57 St. James's Street. Having no children, he sent for his nephew, JOHN KÖHLER, from Germany, who succeeded to his business in 1801. The latter was appointed musical instrument maker to the Duke of York, then Commander-in-Chief, and the Prince of Wales successively. He was succeeded by his only son, JOHN AUGUSTUS, who removed the business to Henrietta Street, and died in 1878. His inventions in brass instruments were many, and were successful in their day. He obtained prize medals at the Exhibitions of 1851 and 1862, and was favourably mentioned in the Report of the latter. His eldest son, AUGUSTUS CHARLES, now deceased, succeeded to his business.

KÖHLER, CHR. LOUIS HEINRICH, born Sept. 5, 1820 at Brunswick, was educated at Brunswick and Vienna, being in the latter capital from 1839 to 1843 as a pupil of Schetter for theory, and Becklet for piano. He filled the post of conductor at Marienburg and Elbing, before settling down at Königsberg, which was his home from 1847 until his death there on Feb. 16, 1886. He wrote three operas, one of which, 'Maria Dolores,' was performed at Brunswick in 1844, and a ballet, 'Der Zauberkomponist,' at the same place in 1846. His chief work as a composer was in the direction of educational pianoforte music, such as studies of all kinds, arrangements of popular works, fantasias, etc., things which have a great sale in their day, but are easily forgotten by later generations. Two books of his studies, opp. 112 and 128, have more value than most of his works. He was a valued contributor to the New Zeitschrift für Musik, in 1867-74, and to the Berliner Musik-Zeitung in 1871-76.

KÖLER, DAVID, was born at Zwickau in Saxony, in the first half of the 16th century. His first appointment was at Altenburg, whence in 1563 he was called to be chaplain at Güstrow in Mecklenburg. The town council of Zwickau afterwards called him back to his native town, giving him the post of cantor at St. Marien, the principal church. He only held this post a few months, dying comparatively young, in July 1565. His one published work consists of Ten Psalms with German words for four to six voices, composed throughout in several divisions ('Zehn Psalme Davids des Propheten mit vier, fünf und sechs Stimmen gesetzt durch David Köler von Zwickau,' Leipzig, 1554). The only known copy of this work is preserved in the public library at Zwickau. Otto Kade has the merit of first calling attention to this work, and rescuing its able composer from utter oblivion. Since then Dr. Georg Köhler of Leipzig has reprinted two of the Psalms, and conducted performances of them at Zwickau and elsewhere. In his preface to Psalm III, Dr. Köhler says, 'It may be considered as one of the most perfect pieces of contrapuntal art and genial interpretation of the text which we anywhere possess. . . . The realism of the musical drawing is as astonishing as the quite modern conception and presentation of the different parts of the text.' There is justification for this praise, and for the time at which it must have been written (before 1554); the melodious flow of the parts as well as the dramatic illustration of the text is surprising. In the Beilagen zu Ambros Kade printed from a MS. Köler's four-voiced setting of the Geistliches Lied, 'O du edler Brunn der Freuden,' which is also an excellent piece of work. Among the few other works of Köler in MS. there is a Mass for seven voices on Josquin's Motet 'Benedicta es coelorum regina.'

KÖMPFEL, AUGUST, a distinguished violinist, born August 15, 1831, at Brückenau, one of the best pupils of Spohr, whose quiet, elegiac style suited his talent precisely. His tone was not large but very pure and sympathetic, his execution faultless. He was for a time member of the bands at Cassel and Hanover (the latter in 1852-61), and from 1863 was leader of that at Weimar. He retired on a pension in 1884, and died at Weimar, April 7, 1891.

KÖNIG, JOHANN BALTHASAR, born 1691, died 1758, director of church music at Frankfort-am-Main, is best known as the editor of the most comprehensive chorale-book of the 18th century, Harmonischer Lieder-Schatz oder Allgemeines evangelisches Choralschick, Frankfort, 1738. It contains 1940 tunes, including those to the French Calvinistic Psalms, but the older tunes and the French Psalm-tunes have all been deprived of their original variety of rhythm, and the more modern tunes from the Freylinghausen and other hymn-books have all been simplified by the retrenchment of slurs and appoggiaturas and other superfluous ornaments. All the tunes have thus been reduced to a uniform pattern with notes of equal length, and while this simplification has been of advantage in the case of the Freylinghausen tunes, it has
rather spoilt the older melodies. The tunes are only provided with figured bass. J. R. M.

KÖNIGIN VON SABA, DIE. Opera in four acts, libretto by J. Mosenthal, music by Carl Goldmark; produced at Vienna, March 10, 1875. [See Queen of Sheba.]

KÖNIGSKINDER, DIE. Dramatised fairy-tale in three acts, written by Ernst Rosner, with music by Engelbert Humperdinck; produced at Munich, Jan. 23, 1897; in English at the Court Theatre, London, Oct. 13, 1897. The action is carried on in declamation through continuous music.

KÖNIGSPERGER, MARIAN (MARIANUS), born Dec. 4, 1708, at Roding in Bavaria, received his early education in the Benedictine Abbey of Prüfening near Ratisbon, where he afterwards took the vows, and spent the rest of his life as organist and director of the choir, and occupied in musical composition. He enjoyed great reputation in his time as an organ player, and composer of works for the church. Lotter, the music-publisher of Augsburg, acknowledged that he owed the foundation of his prosperity in business to his publication of Königspurger's works, and the profits which were obtained for the composer himself were all generously devoted by him to the benefit of the Abbey, providing it with a new organ, purchasing valuable books for the library, and furnishing the means for the publication of literary works by the other brethren. Königspurger died Oct. 9, 1769, much lamented by his brethren of the Abbey, and by all who knew him. His works are enumerated in the Quellen-Lexikon, and even more fully by Ernst von Werra in Haberl's Kirchen-musikalisches Jahrbuch, 1897, pp. 32-34. Both E. v. Werra and Eitner say that Königspurger wrote for the theatre as well as for the church, but the works, as they enumerate them, are all for the church, and consist of (1), a large number of Masses, Offertories, Vespers, Litanies, etc., all for voices with a considerable instrumental accompaniment—strings, horns, trumpets, and drums; (2) sonatas or symphonies for strings and other instruments with organ, evidently for church use; (3) various sets of preludes and Fugues or Versets in the church tunes for organ. Ritter (Geschichte des Orgelspiels, pp. 80, 161) considers the organ works to show good schooling, and to have more substance in them than similar works of his South German contemporaries. None appear to be reprinted in modern times. J. R. M.

KOLB, KARLMANN, born at Kostlarn in Bavaria in 1703, received his first musical instruction as a choir-boy in the Benedictine Abbey of Aschbach. Taking the vows at this Abbey in 1723, he was ordained priest in 1729, and acted as organist. Later on, with the permission of his superiors, he entered the service of a noble family in Munich as resident-tutor, and died there in 1765. His musical work, published at Augsburg in 1733, is entitled Certamen Amium id est, Lusus vocum inter se innociuza concertantium, etc., and consists of preludes, short fugues or versets, and cadences or concluding voluntaries, all intended for church use. Ritter (Geschichte des Orgelspiels) gives one of Kolb's preludes, and says of the work generally that it shows the composer to have been an original and capable musician, although it is also evident from extracts given in Seiffert (Geschichte der Klaviermusik) that many of the pieces are written in a somewhat ecclesiastical style, a style more suitable to the harpsichord or pianoforte than to the organ. There are some bold experiments in chromatic and enharmonic progressions. The whole work is characteristic of the lighter style of organ playing which, owing to Italian influence, was chiefly cultivated in Catholic South Germany and Austria. E. von Werra has reprinted three of Kolb's pieces in his 'Orgelbuch.'

KOLLMANN, AUGUST FRIEDRICH CHRISTOPH, of a musical family, his father an organist and schoolmaster, his brother, George Christoph, an organist of great renown at Hamburg; was born at Engelhostel, Hanover, about 1756, and thoroughly educated in music. He was appointed organist at Lune, near Luneburg, about 1781, and in 1784 was selected to be chapel-keeper and schoolmaster at the German Chapel, St. James's, London. In 1792 George III. presented a chamber organ to the chapel, which was played by Kolmann under the title of 'clerk' till his death on Easter Day, April 19, 1829. He was a person of much energy, and in 1809, during a large fire in the palace, is said to have saved the chapel by standing in the doorway and preventing the firemen from entering to destroy it. His works are numerous:—Essay on Practical Harmony, 1796; Essay on Practical Musical Composition, 1799; Practical Guide to Thorough Bass, 1801; Vindication of a Passage in Thorough Bass, 1802; New Theory of Musical Harmony, 1806; Second Practical Guide to Thorough Bass, 1807; Quarterly Musical Register, 1812 (two numbers only); Remarks on Logier, 1824 (some of these went through two editions); Analytical Symphony (for piano, violin, and bass), op. 3; First beginning on the PF., op. 5, 1796; 'Sinfonien,' i.e. trios for piano, violin, and violoncello, op. 7; Concerto for PF. and Orchestra, op. 8; Melody of the 100th Psalm, with 100 harmonies, op. 9; Twelve analysed Fugues, for two performers on piano and organ, op. 10; Introduction to Modulation, op. 11; Rondo on the Chord of the Dim. Seventh. He is also said to have published an orchestral symphony, 'The Shipwreck, or the Loss of the East Indianan Halsewell,' a piece of programme-music quite in the taste of the time; songs, sonatas, and an edition of Bach's Wohltemperirtes Clavier (see vol. i. p. 156). His son, GEORGE AUGUST, was a good organ player,
and on his father's death succeeded to his post as organist. On his death, March 19, 1845, his sister Johanna Sophia succeeded him; and on her death, in May 1849, the post was bestowed on F. Weber.

KONIUS, GEORGE EDWARDOVICH, born in Moscow, Sept. 30, 1862. He studied at the Conservatoire of his native town under Taneiev and Arensky. From 1891 to 1899 he held a professorship at this institution. In 1906 he transferred his services to the Music School of the Philharmonic Society. His chief works are: Orchestral Suite, 'Child-life,' op. 1; Cantata in Memory of Alexander III., op. 3; Symphonic poem, 'From the World of Illusion,' op. 28; Ballet, 'Dulta' (Moscow, 1896); about twenty pieces for pianoforte, opp. 3, 4, 6, 7, 13, 16, 17, 18, 24; over thirty songs, opp. 2, 5, 9, 12, 14, 20, 22. E. N.

KONTSKI, DON, a family of virtuosi, of which CHARLES, the eldest, born at Warsaw, Sept. 6, 1815, appeared as a pianist in public at the age of seven, but, like the majority of prodigies, did not fulfill the promises of childhood. He made his first studies in Warsaw, and continued them at Paris, where he settled as teacher, and died August 27, 1867.

ANTOINE, the second, born at Cracow, Oct. 27, 1817, a clever pianist, a pupil of Field at Moscow, with great delicacy of touch and brilliancy of execution, but a superficial musician, and composer of many 'pieces de salon,' of which the 'Reveil du Lion' (op. 115) became widely popular. He lived in Paris till 1851, then in Berlin till 1853, in St. Petersburg till 1867, when he settled in London, where an opera, 'Les deux drôtes,' was given in 1872. He was in the United States in 1885, and later, and in 1896-98, made a professional tour round the world, ending at Warsaw. He died at Nowogrod, Lithuania, Dec. 7, 1899.

STANISLAS, the third brother, born Oct. 8, 1820, pianist and pupil of Antoine, lived at St. Petersburg and in Paris.

APOLLINAIRE, a violinist, the youngest of the four brothers, was born Oct. 23, 1825, at Warsaw. His first master was his elder brother Charles, himself a clever violinist and pupil of the Warsaw Conservatorium. He showed the same precocity of talent as the rest of his family, performing in public concerts at an age of not much over four years. Later on he travelled a great deal, chiefly in Russia, but also in France and Germany, and made a certain sensation by his really exceptional technical proficiency, not unaccompanied by a certain amount of charlatanism. In 1837 he is said (see Mendel) to have attracted the attention of Paganini, then in Paris on his road back from England, and to have formed a friendship with the great virtuoso which resulted in his receiving some lessons by him (an honour which he shared with Sivori) and ultimately becoming heir to his violins and violin compositions. This, however, requires confirmation. He made tours in France and Germany in 1847, and in 1853 was appointed solo-violinist to the Emperor of Russia, and in 1861 Director of the Warsaw Conservatoire. He played a solo at one of the Russian concerts given in connection with the Exhibition at Paris in 1878. His compositions (fantasias and the like) are musically unimportant. He died at Warsaw, June 29, 1879. F. D.

KORBAY, FRANCIS ALEXANDER, born at Budapest on May 8, 1846, the son of parents distinguished as amateur musicians. He studied the piano under various masters, and composition, etc., under M. Morony and Robert Volkmann; he was trained as a tenor singer under Gustave Roger, and sang in grand opera at the National Theatre in Budapest from 1865 to 1868; the continued exertion was too much for his voice, and he took to the piano under the advice of his godfather, Franz Liszt. After touring in Europe as a pianist, he went to America in 1871, playing and teaching for two years. By this time his voice had recovered sufficiently to enable him to give song-recitals at which he accompanied himself, and to teach singing. He lectured and composed, besides singing and playing, during his residence in New York, and the most important of his works, an orchestral piece, 'Nuptiale,' was often played in the United States. A Hungarian overture has not yet been performed; a set of songs to Lenau's 'Schlieflieder,' and other single songs, have been published and often sung, but his arrangements of Hungarian songs, to English versions of his own, are the things by which his reputation was made in England. He has lived in London since 1894, and was a professor of singing at the Royal Academy of Music in 1894-1903.

KORESTCHENKO, ARSENE NICHOLAIEVICH, composer and pianist, born in Moscow, Dec. 18, 1870. At the Conservatoire—where he quitted in 1891—Korestchenko carried off the first gold medal for proficiency in two branches: pianoforte (Taneiev) and theory (Arensly). At present he is professor of harmony at the Conservatoire, and takes the classes for counterpart and musical form at the Synodal School, Moscow. He is a prolific composer, as will be seen from the following list of his works:

Orchestral Works:
- Barcarolle, op. 6.
- "A Tale," op. 11.
- "Roses Pedalas," op. 15.
- Two Symphonic Sketches, op. 14.
- "Armenian Suite," op. 20.
- "First Symphony Opus," op. 25.
- "Mystical Picture," op. 27.
- "Exhibition," op. 29.
- "Music's Mirror," op. 29.

Works for the Stage:
- "Balshams Feast," op. 7, opera in 4 acts (Moscow Opera, 1882).
- "Carmen," op. 16, in English, of "Thespis in Asia," op. 17.
- "The Ice Palace," op. 38, opera, subject from Jakochnikow (Moscow Opera, 1869).

This is corroborated by Handlick, Aus der Concertsaal, p. 429.
KOTO

Vocal and orchestral.

Cantata 'Don Juan,' op. 5.

'Armenian Songs,' opp. 18, 19.

Prologue for the twenty-fifth anniversary of the Moscow Conservatoire, op. 9.

'Georgian Songs,' op. 27v.

Miscellaneous.

Choruses, opp. 16, 29, 32, 37.

90 Songs, opp. 2, 6, 8, 10, 36.

Flautoforte pieces, opp. 1, 3 (Concert Fantasia with orchestra), 19, 22, 36, 38.

String quartet, op. 25.

Melody for violin and piano, op. 4.

Du. for violoncello and piano, on p. 34.

KOTZWARA (properly KOCZWARA), Franz, born at Prague, published six songs in London in 1785, was in Ireland in 1788, and was engaged in 1790 as tenor player in Gallini's orchestra at the King's Theatre. He returned to London in the latter year, and on Sept. 2, 1791 he hanged himself in a house of ill-fame in Vine Street, St. Martin's. He had been one of the band of the Handel Commemoration in the preceding May. Kotzwarz was the author of the 'Battle of Prague,' a piece for pf. with violin, violoncello, and drum, and 'libido, long a favourite in London. [A copy of John Lee's edition of this piece exists, bearing the MS. date 1788, so that it must have been published before the date usually given, 1789. (See Battle of Prague.) Information from W. H. Grattan Flood, Esq."

KOZELUCH (German KOZELJUH), JOHANN ANTON, Bohemian musician, born Dec. 13, 1738, at Welvärn; was choirmaster first at Rakonitz and then at Welworn. Desirous of further instruction he went to Prague and Vienna, where he was kindly received by Gluck and Gassmann, was appointed choirmaster of the Kreuzherrn church, Prague; and on March 13, 1784, capellmeister to the Cathedral, which he retained till his death on Feb. 3, 1814. He composed church-music, operas, and oratorios, of which very little was published. [The Quellen-Lexikon gives a cantata for soprano, op. 7, as published by Artaria of Vienna, and contains a list of MS. works.] Of much greater importance is his cousin and pupil,

LEOPOLD, born also in Welvärn in 1754, or, according to some, 1748. In 1765 he went to Prague for his education, and there composed a ballet, performed at the national theatre in 1771, with so much success that it was followed in the course of the next six years by twenty-four ballets and three pantomimes. In 1778 he went to Vienna, and became the pianoforte master of the Archduchess Elizabeth, and favourite teacher of the aristocracy. When Mozart resigned his post at Salzburg (1781) the Archbishop at once offered it with a rise of salary to Kozeluch, who declined it on the ground that he was doing better in Vienna. To his friends, however, he held different language—

'the Archbishop's conduct towards Mozart deterred me more than anything, for if he could let such a man as that leave him, what treatment should I have been likely to meet with! The respect here expressed was strangely at variance with his subsequent spiteful behaviour towards Mozart, the original cause of which is said to have been Mozart's reply to his remark on a passage in a new quartet of Haydn's—if I should not have written that so.' 'Neither should I: but do you know why? because the idea would never have occurred to either of us.'

See Jahn's Mozart, Engl. trans., ii. 347. This reproof Kozeluch never forgot. He used to say that the overture to 'Don Giovanni' was no doubt fine, but that it was full of faults; and of that to 'Die Zauberflöte,' 'Well! for once our good Mozart has tried to write like a learned man.' At the coronation of the Emperor Leopold II. at Prague (1781) even his own countrymen, the Bohemians, were disgusted with his behaviour to Mozart, who was in attendance as court composer. He nevertheless succeeded him in his office (1792), with a salary of 1500 gulden, and retained the post till his death on May 7, 1814 (not 1815). As to the date of death the authorities are at variance, the date 1814 being supported by Dilbacz and Wurzbach, as well as by the less trustworthy evidence of Fétis and Mendel. The testimony of the first is especially weighty, since his dictionary was begun in 1815, when the date of so important a musician's death must have been well known. Almost all the authorities give May 8 as the day; Dilbacz's May 3 is probably a misprint for 8. His numerous compositions include two grand operas, 'Judith' and 'Deborah and Sisera'; an oratorio, 'Moses in Ägypten'; many ballets, cantatas, about thirty symphonies, and much pianoforte music, at one time well known in England, but all now forgotten. [See the list in the Quellen-Lexikon.] His chief interest for us lies in his association with Mozart and Haydn. It should be added that he arranged some Scotch songs for Thomson of Edinburgh, in allusion to which, Beethoven, in a letter of Feb. 29, 1812 (Thayer, iii. 449), whether inspired with disgust at Kozeluch's underselling him, or with a genuine contempt for his music, says, 'Moi je m'estime encore une fois plus supérieur en ce genre que Monsieur Kozeluch (miserabilis).' He again calls him 'miserabilis' (Thayer, iii. 200). R. N.

KRAFT, ANTON, distinguished violoncellist, born Dec. 30, 1752, at Rokitsanz near Pilsen in Bohemia, son of a brewer and amateur, who had his son early taught music, especially the violoncello. He studied law at Prague, where he had finishing lessons from Werner, and at Vienna, where Haydn secured him for the chapel of Prince Esterhazy, which he entered on Jan. 1, 1

1 This is the date in the baptismal register, but 1753, or 1749, are usually given.
1778. On the Prince's death in 1790 he became chamber-musician to Prince Grassalkowitsch, and in 1785 to Prince Lobkowitz, in whose service he died August 28, 1829. On one of his concert-tours he was at Dresden in 1789, and with his son played before Duke Karl, and before the Elector the night after the court had been enchanted by Mozart. Both musicians were staying at the same hotel, so they arranged a quartet, the fourth part being taken by Teyber the organist. Haydn valued Kraft for his power of expression, and for the purity of his intonation, and in all probability composed (1781) his violoncello concerto (André) for him. According to Schindler the violoncello part in Beethoven's triple concerto was also intended for Kraft. As he showed a talent for composition, Haydn offered to instruct him, but Kraft taking up the new subject with such ardour as to neglect his instrument, Haydn would teach him no more, saying he already knew enough for his purpose. He published three sonatas with accompaniment, op. 1 (Amsterdam, Hummel); three sonatas, op. 2 (André); three grand duos concertantes for violin and violoncello, op. 3, and first concerto in C, op. 4 (Breitkopf & Härtel); grand duos for two violoncellos, opp. 5 and 6 (Vienna, Steiner); divertissement for violoncello with double bass (Peters). Kraft also played the baritone in Prince Esterhazy's chamber music, and composed several trios for two baritones and violoncello. His son and pupil NICOLAUS, born Dec. 14, 1778, at Esterház, early became proficient on the violoncello, accompanied his father on his concert-tours (see above), and settled with him in Vienna in 1790. He played a concerto of his father's at a concert of the Tonkünstler-Societät in 1792, and was one of Prince Karl Lichnowsky's famous quartet party, who executed so many of Beethoven's works for the first time. The others were Schuppanzigh, Sina, and Franz Weiss, all young men. In 1796 he became chamber-musician to Prince Lobkowitz, who sent him in 1801 to Berlin, for further study with Louis Duport. There he gave concerts, as well as at Leipzig, Dresden, Prague, and Vienna on his return journey. In 1809 he entered the orchestra of the court-opera, and the King of Wurttemberg hearing him in 1814, at once engaged him for his chapel at Stuttgart. He undertook several more concert-tours (Hummel accompanied him in 1818), but an accident to his hand obliged him to give up playing. He retired on a pension in 1834, and died on May 18, 1853. Among his pupils were Count Willhorsky, Merk, Birnbach, Wranitzky's sons, and his own son FRIEDRICH, born in Vienna, Feb. 12, 1807, entered the chapel at Stuttgart, 1824. Among Nicolaus's excellent violoncello compositions may be specified—a fantasia with quartet, op. 1 (André); concertos, opp. 3, 4 (Breitkopf), and 5 (Peters); scène pastorale with orchestra, dedicated to the King of Wurttemberg, op. 9 (Peters); 8 divertissements progressifs with second violoncello, op. 14 (André); three easy duos for two violoncellos, op. 15, and three grand duos for ditto, op. 17 (André).

KRAKOVIAC, CRACOVIAC, or CRACOVIENNE. A Polish dance, belonging to the district of Cracow. 'There are usually,' says an eye-witness, 'a great many couples—as many as in an English country dance. They shout while dancing, and occasionally the smart man of the party sings an impromptu couplet suited for the occasion—on birthdays, weddings, etc. The men also strike their heels together while dancing, which produces a metallic sound, as the heels are covered with iron.' The songs, which also share the name, are innumerable and, as is natural, deeply tinged with melancholy. Under the name of Cracovienne the dance was brought into the theatre about the year 1840, and was made famous by Fanny Elssler's performance. The following is the tune to which she danced it; but whether that is a real Krakoviak, or a mere imitation, the writer is unable to say:

It has been varied by Chopin (op. 14), Herz, Wallace, and others.
Lucrezia sang Giandval's, as Paris, Agatha, company period, Semiraraide, She entirety, as 1861. She in Petersburg the 1873, of the at Petersburg, in the efforts. on Saijns's 'Henry I', and being far from the 1884. Krauss, such deur style, in intelligence, and from Sebastian Bach, at that time concertmeister at Weimar. He was appointed organist at Buttelstäd about 1721, where he died sometime after 1728. He so thoroughly grounded his son in music, that when in 1796 he went to the Thomasschule in Leipzig, he was already sufficiently advanced to be at once admitted by Bach into the number of his special pupils. He enjoyed Bach's instruction for nine years (to 1735), and rose to so high a place in his esteem, that he was appointed to play the clavier at the weekly practices to which Bach gave the name of 'collegium musicum.' Punning upon his pupil's name and his own, the old Cantor was accustomed to say that 'he was the best crab (Krebs) in all the brook (Bach).'

At the close of his philosophical studies at Leipzig he was appointed organist successively at Zwickau (1737), Zeitz (1744), and Altenburg, where he remained from 1756 till his death in 1780. (He was buried on Jan. 4.) He was equally esteemed on the clavier and the organ, and in the latter capacity especially deserves to be considered one of Bach's best pupils. His published compositions include 'Klavier-Uebungen' (4 parts), containing chorales with variations, fugues, and suites; sonatas for clavier, and for flute and clavier; and trios for flute. [See the Quellen-Lexikon.] Several of these have been reprinted in the collections of Körner and others. Among his unpublished works a Magnificat and two Sanctuaries with orchestral accompaniments are highly spoken of. He left two sons, both sound musicians and composers, though not of the eminence of their father. The eldest, EHRENFRIED CHRISTIAN TRAUGOTT, succeeded his father as Court-organist and Musik-director at Altenburg, and on his death was succeeded by his younger brother, JOHANN GOTTFRIED, the last of whom wrote cantatas, songs, etc.

KREBS. A musical family of the 19th century. KARL AUGUST, the head, was the son of A. and Charlotte Miedcke, belonging to the company of the theatre at Nuremberg, where he was born Jan. 16, 1804. The name of Krebs he obtained from the singer of that name at Stuttgart, who adopted him. His early studies were made under Schible, and in 1825 under Seyfried at Vienna. In March 1827 he settled in Hamburg as head of the theatre, and there passed twenty-three active and useful years, till called to Dresden in 1850 as capellmeister to the court, a post which he filled with honour.
and advantage till 1871. From that date he conducted the orchestra in the Catholic chapel. He died May 16, 1850. His compositions are numerous and varied in kind—masses, operas ('Silva,' 1830, 'Agnes Bernauer,' 1835), a Te Deum, orchestral pieces, songs, and pianoforte works, many of them much esteemed in Germany. In England, however, his name is known almost exclusively as the father of Marie Krebs, the pianist, born Dec. 5, 1851, at Dresden. On the side of both father and mother (Alonzia Michalest, an operatic singer of eminence, born Aug. 29, 1826, married Krebs July 29, 1850), she inherited music, and like Mme. Schumann was happy in having a father who directed her studies with great judgment. Frh. Krebs appeared in public at the early age of eleven (Meissen, 1863). Her tours embraced not only the whole of Germany and England, but Italy, France, Holland, and America. She played at the Gewandhaus first, Nov. 30, 1865. To this country she came in the previous year, and made an engagement with Mr. Gye for four seasons, and her first appearances were at the Crystal Palace, April 30, 1864; at the Philharmonic, April 29, 1874; and at the Monday Popular Concerts, Jan. 13, 1875. [She enjoyed many years of great popularity in England and on the continent, and retired from the profession on her marriage with Herr Brenner. She died June 27, 1909.]

KREISLER, KREHBIEL

KREISLER, Fritz, violinist, was born in Vienna on Feb. 2, 1875. He displayed musical gifts of an uncommon order in earliest infancy. These were recognized by his father, an eminent physician and enthusiastic musical amateur, who instructed and encouraged him to such purpose that at the age of seven he appeared at a concert for children given in Vienna by Carlotta Patti, and entered the Vienna Conservatorium, where he studied under Helmesberger and Aubier. This was a special privilege, pupils being as a general rule ineligible for admission in that institution before the age of fourteen. He was in fact the youngest child who has studied there, and justified to the full the opinion formed of his exceptional talents by carrying off, in 1885, the gold medal for violin-playing at the age of ten. Passing on to Paris, where he studied at the Conservatoire under Massart (violin), and Delibes (theory), he there achieved at the age of twelve another remarkable success, gaining the gold medal (Premier Grand Prix) against forty competitors, all of whom had reached the age of twenty. After a few years of further study he visited America (in 1889), and made a successful tour of the States with Moritz Rosenthal, the pianist, at the conclusion of which he returned to his native town, and temporarily broke away from the musical life. Considering the position which youth holds, at the present day, in the world of music, it is of the utmost significance to note that this step proved ultimately favourable to his development as an artist. He entered the Gymnasium at Vienna to take up a course of medicine, studied art in Paris and Rome, prepared for and passed a very stiff army examination, and duly became an officer in a regiment of Uhlan (he is still in the Reserve). In short, he gave to other sides of his nature, besides the musical, a chance of development. During his year of military service he laid the violin completely aside, and, as a result of the training received, became physically the more fitted for a profession which makes serious calls upon the vitality of those who practise it. Then came a transition period, during which he made a few public appearances, but with so little success that he was moved to make a preliminary retirement into the country, during which he worked uninterruptedly at his violin for eight weeks, and emerged triumphant, having completely regained his command over the instrument. He was then able once more to shine as a solo player, making a brilliant début at Berlin in March 1899, in a programme which included concertos by Max Bruch and Vieuxtemps, and

"Wagner's Orational Drama (1891); The Philharmonic Society of New York; a Memorial published on the occasion of the Fiftieth Anniversary of the Founding of the Philharmonic Society (1892); How to Listen to Music (1897); Music and Manners in the Classical Period (1898)."

KREISLER, Henry Edward, an American critic and writer on music, was born at Ann Arbor, Michigan, U.S.A., on March 10, 1864. He studied law in Cincinnati, but soon turned to journalism, devoting himself especially to music. He was music critic of The Cincinnati Gazette from 1874 to 1880, and then entered upon the same office for The New York Tribune, which he still continues to fill. In authority and influence he ranks among the first American critics, and among the ablest champions of musical progress. Mr. Kreisbiel at the same time is a deep student of the classics, and stands for the highest in purity of taste. He has done much to advance the understanding and love of Wagner's later music dramas in America, and was among the earliest to welcome and appraise discriminatingly the music of Brahms, Tchaikovsky, Dvořák, and other modern composers, which has been made familiar in New York before it was widely known in most European capitals. Mr. Kreisbiel's activity has by no means been confined to newspaper criticism. He is widely known as a lecturer; has done a useful work for many years by means of the programme notes and analyses that he has prepared for most of the principal New York concerts; and has written a number of books, viz: Notes on the Cultivation of Choral Music and the Oratorio Society of New York (1884); Review of the New York Musical Season (five volumes, 1885-90); Studies in the Wag-
the 'Non più mesta' variations of Paganini. In the same year he revisited the United States. Strange, perhaps, as was the American public which first perceived in him the quality of greatness which is now universally attributed to him. In the course of this tour, which extended to the spring of 1901, he occasionally took part in pianoforte trios with Hoffmann and Gerardy, as well as in concertos and solos. Since then he has twice returned to America, his total visits to that country numbering, up to the present date, four. His appearances in all the continental musical centres have also been very numerous. In London he made his début at a Richter Concert on May 12, 1901. Since then his visits to England have been frequent. On May 19, 1904, he was presented at a Philharmonic Concert with the gold medal of the society, an honour richly deserved. His greatest glory is that his playing appeals with especial strength to the musicians among his audiences. The general public has not taken to him to the same extent, though, had he chosen, he might easily have developed into a popular player. Indeed, in the earlier stages of his career, his programmes indicated the ambition to become a Paganini player, a rôle he is technically quite competent to fill. But since the resumption of his musical career in 1899 he has continuously developed as an interpretative artist, and now unites his dazzling technique with higher musical qualities, taking, among the younger players of to-day, quite the foremost place as an interpreter of the great classical concertos. His style of playing cannot, however, be described as academic. It is full of glow and high courage, above all intensely individual, his readings and even his methods of fingering being quite his own. His programmes are more varied than those of any modern violinist, thanks to his own arrangements of certain pieces, ancient and modern, for violin solo. With Porpora and Chaminade, Pugnani and Dvóřák, and others whom the centuries divide, appearing in juxtaposition, great gaiety is given to the slighter portions of programmes which invariably include works of major importance, and so the critics, who as a rule look askance upon arrangements, are disarmed. But he has done little in the way of original composition beyond the writing of cadenzas to certain of the concertos, and to Tartini's 'Il Trillo del Diavolo.' Nor has he challenged criticism as a leader of string quartets. He is said to be hardly less accomplished as a pianist than as a violinist, and with his capacity for development bids fair to become one of the most remarkable figures in the annals of modern music. He has successively played upon a Stradivari of rather small pattern, a Gagliano, and now upon a Joseph Guarneri del Gesù, formerly the property of August Wilhelmj.

W. W. C.

KREISLERIANA, a set of 8 pieces for piano solo, dedicated to Chopin and forming op. 16 of Schumann's works. Kreisler is the capell-meister in Hoffmann's Fantasiestücke in Callots Manier, so much admired by Schumann. [See Börner and Hoffmann, K. T. A.] The pieces were written in 1868, after the Phantasietücke (op. 12) and Novelletten (op. 21), and before the Arabeske (op. 15). They are full of energy, variety, and character, and like the Novelletten are cast in the so-called Lied and Rondo forms. Schumann has added to the title 'Phantasien für das P.' The Kreisleriana were published by Haslinger of Vienna shortly after Schumann's visit there (1868-69).

KREISSELE VON HELLBORN, Heinrich, born in Vienna, 1812, Dr. juris, Imperial-Finance-Secretary at Vienna, and Member of the Direction of the Gesellschaft der Musikfreunde, finds a place here for his lives of Schubert, viz. F. Schubert, eine biographische Skizze, von Heinrich von Kreissle (small 8vo, Vienna, 1861), a preliminary sketch; and Franz Schubert ... with an Appendix by George Grove (giving a thematic catalogue of the nine symphonies, and mentioning other works still in MS.), 2 vols., 8vo, London, Longmans, 1869. It has also been condensed by Mr. E. Wilberforce, 8vo, London, Allen, 1866.

Kreiselle died April 6, 1869, aged sixty-six, much beloved for his amiability and modesty, and for his devotion to the subject of his biography.

C. F. P.

KRETSCHMER, Edmund, organist and dramatic composer, born August 31, 1830, at Ostritz in Saxony, where his father, the rector of the school, gave him his early musical education; studied composition under Julius Otto, and the organ under Johann Schneider at Dresden, where he became organist of the Catholic church in 1854, and to the court in 1863. He founded several 'Gesangvereine,' and in 1865 his composition, 'Die Geisterschlacht,' gained the prize at the first German 'Singerfest,' in Dresden. Three years later he took another prize in Brussels for a mass. His opera 'Die Folkenunger,' in five acts, libretto by Mesenthal, was produced at Dresden, June 1875. It was well received and had a considerable run, but has since disappeared; nor has 'Heinrich der Loewe,' to his own libretto (produced at Leipzig, 1877) met with more permanent favour, though it was given on many German stages with success. The music is correct, and shows both taste and talent, but no invention or dramatic power. His vocal part-writing has little life; and his duets, terzets, finales, etc., are too much like part-songs. [Another opera, 1 Waclawsky, 181.
'Der Flüchtling,' was produced at Ulm in 1881, and ' Schön Rosbrannt' in Dresden, Nov. 1887. Three later masses, ' Pilgerfahrt,' ' Sieg im Gesang,' for chorus and orchestra, and 'Musikalisches Dorfgeschichten,' for orchestra, may also be mentioned.

KRETSCHMAR, August Ferdinand Hermann, born at Olbernhau in Saxony, Jan. 19, 1848, after receiving some musical instruction from his father, attended the Kreuzschule at Dresden, where he was taught music by J. Otto, and was sent later to the Leipzig Conservatorium, where he was a pupil of Richter, Reinecke, Paul, and Pappertitz. He took the degree of Dr. Phil. with a thesis on musical notation before Guido, and became in the same year, 1871, a teacher in the Leipzig Conservatorium. He conducted several musical societies, and overworked himself to such an extent that he was forced to give up Leipzig altogether; in 1876 he undertook the conductorship of the theatre in Metz; in 1877 went to Rostock as music director at the University, and from 1880 as town music director. In 1887 he succeeded H. Langer as music director of the Leipzig University, and conductor of a male choir. He soon became a member of various important musical institutions, such as the Bach-Gesellschaft, and was made conductor of the Riedel-Verein in 1888. In 1890 he organised the Academic Orchestral Concerts, which had a successful career, with especial regard to historical programmes, until 1895. In 1898 he retired from his conductorships, but has retained his professorship, and has continued to give lectures on musical history. His compositions include only some organ works and part-songs. He is a distinguished critic, having contributed to the Musikalisches Wochenblatt, and the Gnomobaten; has published lectures on Choral Music, on Peter Cornelius, etc. One of his most useful undertakings is the Fieber durch den Konzertsaal, the equivalent of our own analytical programmes. These were first published in 1887, and have gone through many editions, being printed in separate portions in pamphlet form in 1888 and later. A monograph on the opera is not yet published, but various studies for it have appeared in the Vierteljahrsschrift für Musikwissenschaft.

KREUTZER, Conradin, German composer, son of a miller, born Nov. 22, 1780, at Messkirch in Baden; chorister first in his native town, then at the Abbey of Zwiefalten, and afterwards at Schussenried. In 1799 he went to Freiburg in Breisgau to study medicine, which he soon abandoned for music. The next five years he passed chiefly in Switzerland, as pianist, singer, and composer (his first operetta, 'Die ländliche Werbung,' was performed at Freiburg in 1800); and in 1804 he arrived in Vienna. There he took lessons from Albrechtsberger, and worked hard at composition, especially operas. His first opera was 'Conradin von Schwaben' (Stuttgart, 1812), and its success gained him the post of capellmeister to the King of Württemberg; thence in 1817 he went to Prince von Fürstenberg at Donaueschingen; but in 1822 returned to Vienna and produced 'Libussa.' At the Kärntnerthor theatre he was capellmeister in 1825, 1829 to 1832, and in 1837 to 1840. From 1838 to 1849 he was conductor at the Josephstädter theatre, where he produced his two best works, 'Das Nachtlager in Granada' (1838) and a fairy opera, 'Der Verschwender,' which have both kept the boards. In 1849 he was appointed capellmeister at Cologne, and in 1841 conducted the 23rd Festival of the Lower Rhine. Thence he went to Paris, and in 1846 back to Vienna. He accompanied his daughter, whom he had trained as a singer, to Riga, and there died, Dec. 14, 1849.

Kreutzer composed about thirty operas; incidental music to several plays and melodramas; an oratorio, 'Die Sendung Moses,' and other church works; chamber and pianoforte music; Lieder, and part-songs for men's voices in the Quellen-Lieder; Fétis speaks of a one-act drama ' Cordelia' as the most original of his works. The two operas already mentioned, and the part-songs, alone have survived. In the latter, Kreutzer displays a flow of melody and good construction; they are still standard works with all the German Liedertafeln, and have taken the place of much weak sentimental rubbish. 'Der Tag des Horn,' 'Die Kapelle,' 'Marzmacht,' and others, are universal favourites, and models of that style of piece. Some of them are given in 'Orpheus.' As a dramatic composer, his airs are better than his ensemble pieces, graceful but wanting in passion and force. His Lieder for a single voice, though vocal and full of melody, have disappeared before the more lyrical and expressive songs of Schubert and Schumann. A. M.

KREUTZER, Rudolph, violinist and composer, born at Versailles, Nov. 16, 1766. He studied first under his father, a musician, and according to Fétis had lessons on the violin from Stamitz, but he owed more to natural gifts than to instruction. He began to compose before he had learnt harmony, and was so good a player at sixteen, when his father died, that through the intervention of Marie Antoinette he was appointed first violin in the Chapelle du Roi. Here he had opportunities of hearing Mestrino and Viotti, and his execution improved rapidly. The further appointment of solo-violinist at the Théâtre Italien gave him the opportunity of producing an opera. 'Jeanne d'Arc,' three acts (May 10, 1790), was successful, and paved the way for 'Paul et Virginie' (Jan. 15, 1791), which was still more so.

The melodies were simple and fresh, and the musical world went into raptures over the new effects of local colour, poor as they seem to us.

1 His name has been often transmuted into Kretschke by Frenchmen, and appeared in the London papers of 1844 as 'Gretzer.'
The music of 'Lodoiska,' three acts (August 1, 1791), is not sufficiently interesting to counterbalance its tedious libretto, but the overture and the Tartars' March were for long favourites. During the Revolution Kreutzer was often suddenly called upon to compose *opéras de circonstance*, a task he executed with great facility. In 1796 he produced 'Imogène, ou la Gageure indiscrète,' a three-act comedy founded on a story of Boccaccio little fitted for music. At the same time he was composing the concertos for the violin, on which his fame now rests. After the peace of Campo Formio (Oct. 17, 1797) he started on a concert-tour through Italy, Germany, and the Netherlands; the fire and individuality of his playing, especially in his own compositions, exciting everywhere the greatest enthusiasm.

In 1798 Kreutzer was in Vienna in the suite of Bernadotte (Thayer's *Beethoven,* ii. 21), and we must presume that it was at this time that he acquired that friendship with Beethoven which resulted, eight years later, in the dedication to him of the sonata (op. 47) which will now be always known by his name—though he is said1 never to have played it—and that he became 'first violin of the Academy of Arts and of the Imperial chamber-music'—titles which are attributed to him in the same dedication. He had been professor of the violin at the Conservatoire from its foundation in 1795, and on his return to Paris he and Baillot drew up the famous 'Méthode de Violon' for the use of the students. He frequently played at concerts, his *duos concertantes* with Rode being a special attraction. On Rode's departure to Russia in 1801, Kreutzer succeeded him as first violin-solo at the Opéra, a post which again opened to him the career of a dramatic composer. 'Astyanax,' three acts (April 12, 1801); 'Arístippe' (May 24, 1808), the success of which was mainly due to Lays; and 'La Mort d' Abel' (March 23, 1810), in three poor acts, reduced to two on its revival in 1823, were the best of a series of operas now forgotten. He also composed many highly successful ballets, such as 'Paul et Virginie' (June 24, 1806), revived in 1826; 'Le Carnaval de Venise' (Feb. 22, 1816), with Persius; and 'Clari' (June 19, 1820), the principal part in which was sustained by Bigotini. He was appointed first violin in the chapel of the First Consul in 1802, violin-solo to the Emperor in 1806, maître de la chapelle to Louis XVIII. in 1815, and Chevalier of the Legion of Honour in 1824. He became vice-conductor of the Académie in 1816, and conductor in chief from 1817 to 1824. A broken arm compelled him to give up playing, and he retired from the Conservatoire in the year 1825. His last years were embittered by the decline of his influence and the impossibility of gaining a hearing for his last opera, 'Mathilde.' An apoplectic seizure affected his mind, but he lingered till June 6, 1831, when he died at Geneva.

Besides his thirty-nine operas and ballets, all produced in Paris, he published nineteen violin concertos; duos, and two symphonies concertantes, for two violins; études and caprices for violin solo; sonatas for violin and violoncello; fifteen trios, and a symphonic concertante for two violins and violoncello; fifteen string quartets; and several airs with variations. (See the *Quellen-Lexikon.*)

Kreutzer's brother Auguste, born at Versailles, 1781, was a member of the Chapelle de l'Empereur, and of the Chapelle du Roi (1804-1830); and succeeded his brother at the Conservatoire, Jan. 1, 1826, retaining the post till his death, at Paris, August 31, 1832. His son Léon, born in Paris, Sept. 23, 1817, died at Vichy, Oct. 6, 1868, was musical critic to La Quotidienne feuilletoniste of the Union and contributed a number of interesting articles to the *Revue contemporaine,* the *Revue et Gazette musicale,* and other periodicals.

Rodolphe Kreutzer is the third, in order of development, of the four great representative masters of the classical Violin-School of Paris; the other three being Viotti, Rode, and Baillot. His style, such as we know it from his concertos, is on the whole more brilliant than Rode's, but less modern than Baillot's. Kreutzer did not require Beethoven's dedication to make his name immortal. His fame will always rest on his unsurpassed work of studies—'forty Études ou Caprices pour le Violon'; a work which has an almost unique position in the literature of violin-studies. It has been recognised and adopted as the basis of all solid execution on the violin by the masters of all schools—French, German, or any other nationality—and has been published in numberless editions. In point of difficulty it ranks just below Rode's twenty-four Caprices, and is generally considered as leading up to this second standard work of studies. Kreutzer's concertos afford excellent material for the student, but are less interesting than those of Viotti, and Rode, and, with the exception of the 19th, in D minor, are now hardly ever played in public.

KREUTZER SONATA. The popular title in England of Beethoven's Sonata, for piano and violin, in A, op. 47, dedicated to 'his friend R. Kreutzer.' The work was first played by Beethoven and Bridge-tower at the Angarten at 8 A.M. May 17 or 24, 1803. The finale had originally belonged to op. 30, No. 1, but the first movement and the variations were only finished just in time, and the latter had to be played from the autograph without rehearsal. In the opening Presto, at the pause in the ninth bar, Bridge-tower introduced a Cadenza.

---

1 See Berlioz, *Populer,* i. 264, for this and for an amusing account of Kreutzer's difficulties over Beethoven's Second Symphony.
in imitation of that for the Piano in the eighteenth bar, fortunately to Beethoven's satisfaction (see Thayer, ii. 230). He gives it as follows:

\[\text{\textit{Laud voluta. (9)}}\]

\[\text{\textit{2do voluta. (18)}}\]

\[\text{\textit{Sun …….\quad}}\]

The sonata was published in 1805, by Simrock and Traeg, before May 18. Bridgetower averred (Thayer, ii. 231) that it was originally dedicated to him, and that the change was the result of a quarrel. Why Kreutzer was chosen is as yet a mystery. He was in Vienna with Berneuille in 1788, but no trace of his relations with Beethoven remains, though we may assume them to have been good, for Beethoven to designate him as his ‘friend.’ It has been alleged as a reason that the second theme of the Presto is a phrase of Kreutzer’s; but this has not been substantiated. Certainly no such passage appears in Kreutzer’s violin works. The dedication on the first ed. stands ‘Sonata per il Pianoforte ed un Violino obbligato, scritta in uno stilo molte concertante, quasi come d’un Concerto. Composta e dedicata al suo amico K. Kreutzer, Membro del Conservatorio di Musica in Parigi, Primo Violino dell’Accademia delle Arti, e della Camera Imperiale, per L. van Beethoven. Opera 47. A Born chez K. Simrock. 422.’ In a notebook of Beethoven’s in the Imperial Library at Berlin, the second sentence appears ‘in uno stilo molto brillante.’

KREUZ, Emil, violinist and composer, was born at Elberfeld, May 25, 1867. Began to play at the age of three, but did not commence to study for the profession (under Japha of Cologne) until his tenth year. In 1888 he gained an open scholarship at the Royal College of Music, where he studied for five years under Holmes (violin) and Stanford (composition). During the last two years made a special study of the viola, making his debut with that instrument on Dec. 11, 1888, in the ‘Harold in Italy’ solo at a Henschel concert. Soloist at Leeds Festival 1889, member of Gounopz Quartet 1888-1903, and of the Queen’s Band 1900-3. He also played frequently at the Popular Concerts. Amongst his compositions are a concerto for viola with orchestra, a trio for piano, violin, and viola, op. 21, a prize Quintet for Horn and String Quartet, op. 49, many songs, and numerous pieces useful for teaching purposes. Since 1903 musical assistant at the Covent Garden Opera. Acting under the advice of Richter, he joined the Hallé orchestra in 1903 with the view of studying under the great conductor. His present intention is to give up viola playing and composition, in order to devote his time to conducting and training vocalists in the art of dramatic singing, but it is to be hoped that he will continue the work of enlarging the literature of the viola.

KRIEGER, Adam, born Jan. 7, 1684, at Driesen in the Neumark, Prussia, died June 30, 1666, at Dresden, was a pupil of Samuel Scheidt and Heinrich Schutz, and after being for a time organist at St. Nicholas, Leipzig, was appointed court-organist to the Elector of Saxony. He appears to have made an unsuccessful application for the post of cantor at St. Thomas’s, Leipzig. He was poet as well a composer, and his compositions consist of so-called Arien on his own texts, songs for one, two, three, and five voices with three or five-part instrumental Ritornelli between each verse. The Arias themselves have only Basso Continuo accompaniment, but are written in regular Lied form, while the Ritornelli have no thematic connection with them. Specimens of these compositions may be found in the Monatshefte für Musikgeschichte, xxix.

J. R. M.

KRIEGER, Johann Philipp (apparently no relation to the above), was born Feb. 26, 1649, at Nuremberg, and died Feb. 6, 1725, at Weissenfels. He travelled in Italy, and was for a while pupil of Johann Rosenmüller at Venice. Returning to Germany he was ennobled by the Emperor at Vienna, and after various wanderings entered the service of the Duke of Saxe-Weissenfels, first as chamber-musician and organist at Halle, in 1677, and afterwards as kapellmeister at Weissenfels from 1712. For the Weissenfels Court he wrote a quantity of Singspiele, the Arias of which for one, two, and three voices were afterwards published with bass accompaniment only in two volumes published at Nuremberg, 1690, 1692. Specimens of them, with accompaniment written out, are given by Eitner in the Monatshefte für Musikgeschichte, xxix. Chrysander gives the titles of some operas of Krieger written for Brunswick-Wolfenbüttel in 1693, some of which were also performed in Hamburg in 1694. In 1693 Krieger published as his op. 2 an instrumental work consisting of twelve sonatas for violin and
viola da gamba with cembalo accompaniment. The second and third of these sonatas are given in full by Eitner, Monatshefte, xxix.-xxx. In 1704 there appeared also in Nuremberg 'Lustige Feld-Musik,' consisting of suites or partien (partitas) for four wind instruments (oboes and bassoons), or ad libitum for strings. Two of these partien are given in score by Eitner, who says of these compositions generally that they are so excellent in form and expression that one may unhesitatingly class them with similar works by Handel. Besides these published works of Krieger there exist in manuscript a quantity of sacred compositions, arias for one, two, three, and four voices, with various instrumental accompaniments, somewhat after the manner of Schütz, but of a lighter and more popular character. Some of these are also given by Eitner, Monatshefte. For a complete list see Quellen-Lexikon.

KRIEGER, JOHANN, younger brother of Johann Philipp, was born Jan. 1, 1662, at Nuremberg, died at Zittau, July 18, 1735. He was for a time the pupil of his brother, and in 1672 became court-organist at Bayreuth, which post, however, he gave up in 1677. After a transient connection with Weissenfels he finally settled at Zittau, where in 1681 he was appointed town music-director, and 1701 organist also at the church of St. Peter and Paul. Johann Krieger is of greater importance in the history of music than his brother Philipp. Mattheson praises him specially as a composer of double fugues, and puts him beside Handel. Handel himself confessed how much he owed to Krieger. (See below.) Eitner comments on his excellent gift of melodic invention, and the cleverness of his thematic work. His works are, (1) 'Neue musicalische Ergätzlichkeit,' 1684. Part 1. 'Geistliche Andacht,' thirty numbers. Part 2. Secular songs, thirty-four numbers. Part 3. Theatrical pieces performed in Zittau. (2) 'Sechs musicalische Partien,' Nuremberg, 1697. Suites for Clavier alone ('Nach einer Ariusen Manier ausgezetzet'). (3) Anmuthige Clavier-Uebung,' consisting of preludes, fugues, a chaconne, and a toccata for pedal, Nuremberg, 1699. It was this last work which Handel specially valued and recommended as a model for organ and harpsichord composers. It was one of the few musical works which he brought with him to England, his copy of which he gave to his friend Bernard Granville, who has recorded for us Handel's appreciation of the work (see Chrysander's Händel, Bd. iii. p. 211). Eitner considers the pedal toccata of this work as approaching the grand style of Sebastian Bach. (Monatshefte für Musikgeschichte, xxvii.) Besides these published works Johann Krieger has left in MS. various organ works (specimens given in Ritter, Geschichte des Orgelspiels, Nos. 80, 81), and a large number of sacred compositions for various combinations of voices and instruments, a full list of which is given in the Quellen-Lexikon.

KROMMER, JOHANN, composer, and assistant to Handel, was born June 22, 1759, at Bromberg; began with medicine, but finally devoted himself to music under the guidance of Liszt, whom he accompanying on some of his tours. He settled in Berlin, and was for some years a successful teacher. He edited the Waldemperiteris Clavier for the Bachgesellschaft (14th year, 1864)—with a Preface containing a list of MSS. and Editions, and an Appendix of various readings, a highly creditable work as regards care and accuracy in collation, which Spitta has selected for honourable mention (J. S. Bach, Eng. trans., ii. 166 note). He also published editions of Bach's chromatic fantasia, Mozart's pianoforte fantasies, and other important compositions. He was a thorough musician, and his style as a pianist was clear and eminently suggestive. He was a great sufferer for some years before his death, which took place in Berlin, May 28, 1877. F. G.

KROMMER, FRANZ, violinist and composer, born Dec. 5, 1759, at Kamenz in Moravia; learned music from an uncle, then choirmaster at Turas. From seventeen to twenty-five he acted as organist, and composed much church music, still unpublished. He next entered the band of Count Struyum at Simonturm in Hungary as violinist, and in two years was promoted to the capellmeistership. Here he became acquainted with the works of Haydn and Mozart; and composed his pieces for wind instruments, which are of lasting importance, and perceptibly influenced modern military music. After one or two more changes he at length became capellmeister to Prince Grassalkovitz, after whose death he lived comfortably in Vienna, enjoying a considerable reputation as a teacher and composer. The sinecure post of doorkeeper to the Emperor was conferred upon him, and in 1818 he succeeded Kozeluch as court capellmeister and composer, in which capacity he accompanied the Emperor Francis to France and Italy. He died suddenly Jan. 8, 1831, while composing a pastoral mass. As a composer he was remarkable for productiveness, and for a clear and agreeable style, most observable perhaps in his sixty-nine string-quartets and quintets, published at Vienna, Offenbach, and Paris. This made him a great favourite in Vienna at the close of the century. Schubert, however, who as a boy of eleven had to play his Symphonies in the band of the 'Convict,' used to laugh at them, and preferred those of Kozeluch. Both are alike forgotten. Krommer also composed a number of quartets and quintets for flutes, besides the pieces for wind instruments already mentioned. The only church works printed are two masses in four parts with orchestra and organ (André, Offenbach). Had he not been the contemporary of

1 Féls and Mendel call him Ayrum by mistake.
Haydn and Mozart he might have enjoyed more enduring popularity.

KRUMMHORN (i.e. crooked - horn), Cremona, Cremona, Clarionet, Corno-di-Bassetto. The various names given to an Organ Reed Stop of 8-foot size of tone. Modern English specimens, which are found under all the foregoing names except the first, are estimated in proportion as their sound resembles that of the orchestral Clarinet. The Cremonas in the organs built by Father Smith (1660) for the ‘Whitehall Banqueting House,’ etc., and those by Harris in his instruments at St. Sepulchre’s, Snow Hill (1670), etc., were doubtless ‘voiced’ to imitate the first named and now obsolete ‘crooked-horn.

They were never intended to represent the violin, into the name of which its own had nevertheless been corrupted. The pipes are of metal, cylindrical in shape, short, and of narrow measure, the CC pipe being only about 4 ft. 6 in. in length, and 1 1/4 in. in diameter.

KRUMMHORN, or CROMORNE. The obsolete ‘crooked-horn’ referred to in the foregoing article, was a wood-wind instrument of small cylindrical bore, played with a double reed, of the bassoon or bagpipe chanter type. The reed being enclosed with a cover, or cup, through which the air was directed, was not under the direct control of the lips, as in modern orchestral reed instruments. The lower end, or ball, was turned upwards in U form, hence the French name for the instrument, ‘Tournebont.’ The scale was obtained by means of seven finger-holes, supplemented in the case of some of the larger instruments by key-work to extend the compass downwards. The krumhmorns were made in ‘choirs’ or sets, from soprano to bass in compass, and were in very general use throughout Europe during the 14th, 15th, and 16th centuries. Mercenne stated that the best were made in England.

Krumpholz, Johann Baptist, celebrated harpist and composer, born about 1745 at Zlonitz near Prague; son of a bandmaster in a French regiment, lived in Paris from his childhood, learning music from his father. The first public mention of him is in the ‘Wiener Diarium’ for 1772; he had played at a concert in the Burg-theater, and advertised for pupils on the pedal-harp. From August 1773 to March 1776 he was a member of Prince Esterhazy’s chapel at Esterház, taking lessons from Haydn in composition, and already seeking after improvements in his instrument. He next started on a concert-tour, playing at Leipzig on an ‘organisirte Harfe.’ He then settled in Paris, where he was highly esteemed as a teacher and virtuoso. Nadermann built a harp from his specifications, to which attention was drawn by an article in the Journal de Paris (Feb. 8, 1786), and which Krumpholz described in a preface to his sonata, op. 14. His wife played some pieces on it before the Académie, Krumpholz accompanying her on the violin, and on the ‘Pianoforte contrebasse’ or ‘Claviercorde a marteau,’ another instrument made by Erard from his specifications. The Académie expressed their approval of the new harp in a letter to Krumpholz (Nov. 21, 1787). He drowned himself in the Seine, Feb. 19, 1790, from grief at the infidelity and ingratitude of his wife.

Gerber gives a list of his compositions, which are still of value. They comprise six grand concertos, thirty-two sonatas with violin accompaniment, preludes, variations, duets for two harps, a quartet for harp and strings, and symphonies for harp and small orchestra, published in Paris and London. (See the (quellen-Lexikon.)

His wife, née Meyer, from Metz, eloped with a young man to London. She was even a finer player than her husband, making the instrument sound almost like an Eolian harp. In London she gave her first concert at Hanover Square Rooms, June 2, 1788, and for many years appeared with great success at her own and Salomon’s concerts, at the oratorios in Drury Lane, and at Haydn’s benefit. She frequently played Dussek’s duos concertantes for harp and piano-forte with the composer. She is mentioned in 1802, but after that appears to have retired into private life.

Wenzel Krumpholz, brother of the former, born in 1750, became one of the first violins at the court-opera in Vienna in 1796. His name is immortalized by his intimacy with Beethoven, who was very fond of him, though he used to call him in joke ‘mein Narr,’ my fool. According to Ries 4 he gave Beethoven some instruction on the violin in Vienna. Krumpholz was one of the first to recognize Beethoven’s genius, and he inspired others with his own enthusiasm. Czerny mentions this in his Autobiography, 5 and also that he introduced him to Beethoven, who offered of his own accord to give him lessons. Krumpholz also played the mandoline, and Beethoven wrote a sonata in one movement (first published in this Dictionary, see Mandoline) for PF, and mandoline for him. 6 He died in Vienna, May 2, 1817, aged sixty-seven, and Beethoven must have felt his death deeply, since he composed on the following day the ‘Gesang der Mönche’ (from Schiller’s ‘Wilhelm Tell’), for three men’s voices, ‘in commemoration of the sudden and unexpected death of our Krumpholz.’ 7 Only two of his compositions have been printed—an ‘Abendunterhaltung’ for a single violin 7 (dances, variations, a short andante, etc. ; Vienna and Peith, Kunst & Industrie-Comptoir): and ‘Ein Viertelstunde für eine Violine,’ dedicated to Schuppanzigh (Joh. Traeg).

KRUSE, Johann Secundus, violinist, was

1 Or Ligo, according to Gerber and Belardini.
2 Not 1750, as commonly stated.
3 Biographische Nachrichten, p. 149.
4 He calls Krumpholz ‘an old man.’ He was then about fifty.
5 Biographische Skizze, by Artaria.
6 Compare Beethoven’s Thematic Catalogue, p. 161.
7 Czerny took No. 1, a contredanse, as the theme of his XX concert variations for PF. and violin. This, his op. 1 (Steiner, 2nd edit.), is dedicated to Krumpholz— a due trait of gratitude.
KUBELIK, born in Melbourne, Australia, of German parents, on March 22, 1859. He appeared in public when nine years of age, playing at the first desk in the Philharmonic concerts of his native town. In 1875 he went to Berlin to study with Joachim in the Hochschule, in which institution he was later appointed professor. In 1882 became principal violin and sub-conductor of the Berlin Philharmonic Society, and founded a string Quartet. In 1886 he visited Australia, but was called back by Joachim to relieve him of some of his work at the Hochschule, his activity as teacher continuing till 1891, when he relinquished the appointment to go to Bremen as leader of the Philharmonic orchestra. In Oct. 1892 he joined the Joachim Quartet as second violin though still resident in Bremen, where he also founded a Quartet of his own, travelling very constantly in Germany with the various organisations with which he was connected. In 1895 he revisited Australia for a short tournée, and in 1897 left Germany and the Joachim Quartet to live in London, where he once more founded a Quartet, and gave a series of concerts at St. James's Hall. In Oct. 1902 he took over the Saturday Popular Concerts, of which only ten were announced, and the following year restored them to their original number of twenty, besides reviving the twenty Monday Popular Concerts. During the same season he gave a series of orchestral concerts (conductor, Felix Weingartner), in 1903 a Beethoven Festival of eight concerts, and in 1904 a second festival of seven concerts, so that the English public owes much to his enterprise and energy. He is also favourably known as a performer of chamber music, a department of the art in which he has had extensive experience. As a violinist his staccato bowing and trill may be noted as of exceptional brilliancy. W. W. C.

KUBELIK, JAN, violinist, was born of Czech parents, on July 5, 1850, at Michle, a little village in the vicinity of Prague. Though his father was a simple market-gardener, his early life was spent in an atmosphere hardly less favourable to the development of his musical talents than that of a large city. In no country has the love of good music penetrated so deeply into the heart of the people as in Bohemia, and the gardener by profession was a musician by predilection, a genuine enthusiast, possessing qualities which would have secured him a good position in the world of music had he enjoyed reasonable opportunities of culture. A self-taught performer on many instruments, he conducted a little orchestra much in request at festive gatherings in the neighbourhood, and possessed the gift of imparting his knowledge to others. Consequently, when the young Karel at the age of five years expressed a desire to learn the violin, he received from his father a thorough training which laid an excellent foundation for the virtuosity exhibited in later years. In an incredibly short space of time he was able to play the earlier studies of Kreutzer, and in 1885 made his first appearance in public at Prague, playing a concerto of Vieuxtemps and pieces by Wieniawski. In 1892 he entered the Conservatorium, and was favoured by the circumstance that Ottakar Sevčík returned in the same year from Russia, where he had held teaching appointments at Kiev and Moscov, to Prague. Taking the youth in hand at the most receptive age, the professor saw his laboriously thought-out theories of violin teaching carried to a triumphant issue by his pupil, who, after six years devoted to hard practice under the Sevčík method, played the Brahms concerto, with his own cadenzas, at a student's concert given in the German theatre, and on the occasion of his final appearance as a student in 1898, gave a brilliant performance of the D major concerto of Paganini, with Sauret's cadenza, and was recognised by examiners and critics as a virtuoso player of the first rank. It is sad to chronicle that his father died at the hour of his first triumph, leaving to his son the onus of supporting his mother and her young family. Fortunately, by his success on the occasion of his first appearance away from home in the autumn of 1898, before a critical audience at Vienna, he was freed from anxiety on that score. He then went to Budapest, and later made a prolonged tour through Italy, receiving, when in Rome, the order of St. Gregory at the hands of Pope Leo XIII. In 1900 he visited many continental cities, including Paris, and on June 18 of the same year made his London début at a Richter concert, giving also, during the season, five concerts of his own at St. James's Hall.

The operating causes of his phenomenal success in this country were many. The public was not sated, as now, by displays of virtuosity. Willy Burmester and César Thomson, both Paganini players, had failed to capture the English public, and the moment was ripe for the appearance of such an artist as Karel, who came heralded by stories of his humble origin and marvellous technique, whilst his modest, almost demure appearance, predisposed audiences in his favour. Thus when it was perceived that he was able to execute the most dangerous flights of the virtuoso school, with consummate ease and precision, there was a scene of wild enthusiasm; it was pronounced that the mantle of Paganini had fallen on his shoulders, and from that day to this, he has secured crowded audiences whenever and wherever he appears. Such a success is outre mesure, and has its dangers. He would hardly have been human had he not stepped in to enjoy the fruit of his suddenly acquired popularity by accepting the many lucrative engagements offered him to play music of dubious value all over the world, but the passage from the
condition of virtuoso to that of interpretative artist of the highest rank has been delayed, and a wandering life adopted that is unfavourable to development of the reflective faculties. He has now a public of his own, but appeals to it mainly as a Paganini player and interpreter of works of the romantic, or pseudo-romantic school. Of one violin classic he gives an irreproachable rendering. He plays the Chaconne of Bach with splendid sonority, and brings out the parts in a way which must satisfy the most exigent musician. He is free from all mannerisms and affectation, and in cantabile playing has an ingenious mode of expression which is native to him. It is full of charm, if not of subtlety, and largely accounts for the hold he has over his audiences.

His trip to America in 1902-3 produced remarkable financial results. Since his return he has revisited London and the provinces, besides travelling extensively on the continent. He is less appreciated in Germany than elsewhere, but has been the recipient of honours and decorations at several European courts.

At Linz on the Danube he was unable to appear through hostile demonstrations made by the Anti-Czech population, but is at the summit of popularity in Hungary, where he married, in August 1903, the Countess Czaky Szell, daughter of an ex-President of the Senate at Debreczin, becoming at the same time a "Polgar" or naturalised Hungarian citizen. He visited Rome for the second time in 1905, and, in company with his wife, was received in audience by the present Pope, Pius X.

With regard to his technique, it may briefly be said that he possesses the complete equipment of the virtuoso player, but mention should be made of his exceptional facility in the playing of double harmonics.

KÜCKEN, FRIEDRICH WILHELM, born at Bleckede, Hanover, Nov. 16, 1810. His father, a country gentleman, was averse to the musical proclivities of his son, and the boy had to thank his brother-in-law, Lürhs, music-director and organist of Schwerin, for being allowed to follow his bent, which he did under Lürhs and Aron in Schwerin, and as flute, viola, and violin player in the Duke's orchestra there. His early compositions, 'Ach wie war's möglich dann' and others, became so popular that he was taken into the palace as teacher and player. But this did not satisfy him, and he made his way in 1832 to Berlin, where, while studying hard at counterpoint under Birnbauch, he gradually composed the songs which rendered him so famous, and have made his name a household word in his own and other countries. His opera, 'Die Flucht nach der Schweiz' (the Flight to Switzerland), was produced at Berlin in 1839, and proved very successful throughout Germany. In 1841 he went to Vienna to study under Sechter. In 1843 he conducted the great festival of male singers at St. Gall and Appenzel. Thence he went to Paris, where, with characteristic zeal and desire to learn, he studied orchestration with Halvry, and writing for the voice with Bordogni. His stay in Paris lasted for three and a half years; thence he went to Stuttgart, and brought out (April 21, 1847) a new opera, 'Der Prätendent' (the Pretender), with the greatest success, which followed it to Hamburg and elsewhere in Germany. In 1851 he received a call to Stuttgart as joint capellmeister with Lindpaintner, filling the place alone after Lindpaintner's death (August 21, 1856) till 1861, when he resigned. In 1863 he joined Abt and Berlioz as judges of a competition in Strassburg, and had an extraordinary reception. He composed sonatas for pianoforte and violin, pianoforte and violoncello, etc., but his immense popularity sprung from his songs and duets, some of which, such as 'Das Sternelein' and 'O weine nicht,' were extraordinarily beloved in their time. Almost exclusively, however, by amateurs and the masses; among musicians they found no favour, and are already almost forgotten. They were also very popular in England ('Trab, trab,' 'The Maid of Judah,' 'The Swallows,' duet, etc., etc.), and Kücken had an arrangement with Messrs. Wessel & Co. for the exclusive publication of them.

KÜHMSTEDT, FRIEDRICH, born at Oldisleben, Saxo-Weimar, Dec. 20, 1809. His gift for music appeared very early, and asserted itself against the resistance of his parents, so frequent in these cases. At length, when nineteen, he left the university of Weimar and walked to Darmstadt (a distance of full 150 miles) to ask the advice of C. H. Rinck. The visit resulted in a course of three years' instruction in theoretical and practical music under that great organist. At the end of that time he returned to his family and began to write. His career, however, was threatened by a paralysis of his right hand, from which he never recovered, and which but for his perseverance and energy would have wrecked him. During several years he remained almost without the means of subsistence, till in 1836 he obtained the post of music-director and professor of the Seminar at Eisenach, with a pittance of £30 per annum. This, however, was wealth to him: he married, and the day of his wedding his wife was snatched from him by a sudden stroke as they left the church. After a period of deep distress music came to his relief, and he began to compose. As he grew older and published his excellent treatises and his good music, he became famed as a teacher, and before his death was in easier circumstances. He died in harness at Eisenach, Jan. 10, 1858. His works extend to op. 49. His oratorios ('Die Auferstehung,' and 'Triumph des Göttlichen'), operas, and symphonies are forgotten, but his fame rests on his organ works—his Art
of preluding, op. 6 (Schotts); his Gradus ad Parnassum or introduction to the works of J. S. Bach, op. 4 (ibid.); his Fantasie eroica, op. 29 (Erfurt, Kirner); and many preludes, fugues, and other pieces for the organ, which are solid and effective compositions. He also published a treatise on harmony and modulation (Eisenach, Börnker, 1838).

KUHNNAU, JOHANN CHRISTOPH, was born Feb. 10, 1735 at Volkstädt near Eisleben. Coming to Berlin as school teacher in 1763, he took further lessons in harmony and musical composition from Kirnberger, and in 1788 was appointed cantor and director of the music at the Dreifaltigkeitskirche (Trinity Church) in Berlin. He did much to stimulate musical life in Berlin by conducting performances of the larger choral works. His death took place Oct. 13, 1805.

The only published work by which he has any particular claim to remembrance is his 'Vierstimmige alte und neue Choralgesänge mit Provinzial-Abweichungen,' the first part of which appeared 1786, and was followed by a second in 1790. His son, Johann Friedrich Wilhelm Kühnaun, republished this Choralbuch in various editions from 1817 onwards, and in a compressed form, containing altogether 336 chorales in four-part harmony. Eight of the tunes are by Christoph Kühnaun himself. He also collected and edited a book of choral-verseplays by various composers, including Emanuel Bach and Kirnberger.

KUFFERATH, HUBERT FERDINAND, born at Mühlheim on Ruhr, in Rhenish Prussia, June 10, 1818, was the youngest of eight brothers, all musicians, and grew up in musical surroundings. As a child of seven he was accustomed to tune the church organs of the neighbourhood, and played both piano and violin in public at a very early age. His eldest brother, Johann, director of the music-school at Utrecht, undertook to teach him, and eventually sent him to Cologne to complete his studies in violin playing and composition. At the Niederrheinische Festival of 1839 at Düsseldorf, he played a violin solo so much to Mendelssohn's satisfaction that the master urged him to go to Leipzig, where after studying the violin under David, Kufferath took up the pianoforte, studying composition under Mendelssohn and Hauptman. In the winter of 1840, he played his capriccio for piano and orchestra at a Gewandhaus concert, and the piece was noticed by Schumann in the Neue Zeitschrift für Musik. Kufferath was one of the famous band of brilliant students which included Bennett, Horsley, Verhulst, Eckert, and Gade. On returning to Cologne in 1841, he became conductor of the Münnergesangverein, and after spending some time as a travelling virtuoso, he settled in Brussels in 1844, where he was for some time conductor of the Choral Society, and, with Léonard and Servais, founded a regular series of chamber concerts, at which he played, alternately, pianoforte and viola. Schumann's concerted music was introduced to the Belgian public by this organisation, and Mme. Schumann occasionally took part in their concerts. The title of pianist to the King was conferred upon Kufferath by Leopold I. From 1872 until his death he held the post of professor of counterpoint and fugue at the Conservatoire, where he wrote an École du Choral which is in use in Belgium and France. Among his pupils may be mentioned Charles de Beriot, Edouard Lassen, Franz Servais, Léon Jahn, Arthur de Gref, and Edgar Tinel. Kufferath's works include a symphony, a piano concerto, a string quartet, a trio, many compositions for piano, books of songs, and an andante for violin and orchestra. He died at Brussels, June 23, 1896.

His son, MAURICE KUFFERATH, born at Brussels, Jan. 8, 1852, was a pupil of the two Servais for violoncello, took the degree of 'docteur en droit et en philologie' at the university, where a thesis on the theatre of Molière was rewarded with a prize. In 1873 he joined the staff of the Indépendance Belge and remained there until 1900. He was especially responsible for the articles on foreign politics, etc. Later on he contributed frequently to the Guide Musical, and eventually became its editor and chief proprietor. Under his control the paper became known for its championship of the best modern tendencies in music. For the exhibition at Brussels in 1880 he wrote a report on musical instruments, and subsequently was sent by the Belgian government to report upon the conditions of German and Austrian theatres. Among his literary works, the most famous are his interesting monographs on Wagner's later works, Les Maitres Chanteurs, Lohengrin, Walkyrie, Siegfried, Tristan et Isolde, and Parsifal. Most of them have gone through many editions, and all are of the utmost use to students, as they show the development of the legends in Wagner's hands, and take a far wider view of the subject than is to be found in the ordinary handbooks. Hector Berlioz et Schumann, and Henri Vieuxtemps are the subjects of two more volumes, and Kufferath has translated into French certain famous books of Wagner, Richter, etc., as well as Wagner's letters to Rœckel; he has written translations of the words of songs, etc., and of several operas, such as Mozart's 'Enlevement au Sérail,' etc. In 1900 he was appointed director of the Théatre de la Monnaie with Guillaume Guidé. Under their direction, the first complete performance of the Wagnerian trilogy in French took place, and the following operas were given for the first time: D'Indy's 'Étranger,' Ernest Chausson's 'Roi Arthus,' J. Albeniz's 'Pepita Jimenez,' and L'Ermitage fleuri,' 'L'Ermitage fleuri,' 'Gilson's 'Captive,' and Bloch's 'Fiancée de la Mer.' He was associated with Yasaye and Guillaume Guidé in founding the Yasaye con-
KUGELMANN

The daughter of H. F. Kufferath, Antonia, born Oct. 28, 1857, at Brussels, studied singing under Stockhausen and Mine. Viardot-Garcia; her fine soprano voice and pre-eminently artistic singing were much admired at the Schumann Festival at Bonn in 1880, by which date she had made herself a name as an interpreter of Schumann and of Brahms’s songs, etc., some of the latter of which were sung by her for the first time in public. She visited England in 1882, singing at the Popular Concerts, the Philharmonic, etc. On June 2, 1885, she married Edward Speyer, Esq., and retired from the regular exercise of her art.

KUGELMANN, Hans, said to have been born at Augsburg, was in 1519 trumpeter at Innsbruck in the service of the Emperor Maximilian, and afterwards as first trumpeter-major and then capellmeister at Königsberg in the service of Duke Albert of Brandenburg and Prussia. He died in 1542. In 1540 he brought out a harmonised Gesangbuch for liturgical use in the Lutheran Church, one of the earliest of the kind after Johann Walther’s book of 1524. Its title is Conventus novi trivium ecclesiastici, in Prussia praecipe accomodati... Nunc Gesang mit dreyen Stimmen dem Kirchen und Schulen zu nutz... auch attliche stick mit 8, 6, 5, 4 Stim. hinzugehalten... Augsburg, 1540. It contains thirty-nine pieces, eight of them with Latin texts, including a Missa and Magnificat, mostly for three voices, thirty of them being the composition of Kugelmann himself. Towards the end there are a few more elaborate pieces. A complete Psalm by Stoltzer for five voices, another by Hans Heugel for six voices, etc. Kugelmann’s book is the first source for the chorale-tanes, ‘Nun lob mein Seel’ den Herrn’ (of which there are three settings, a3, a5, and a8), and ‘Allein Gott in der H’hit’, this latter, however, being based on a Plainsong Gloria in Excelsis. Winterfeld, in his Evangelische Kirchenmusik, gives three of Kugelmann’s pieces.

KUHLAU

KUHLAU, Friedrich, a musician of some distinction in his day. He was born of poor parents at Uelsen in Hanover, Sept. 11, 1786, and had the misfortune to lose an eye at an early age. The loss did not, however, quench his ardour for music. During a wandering life he contrived to learn the piano and the flute, and to acquire a solid foundation of harmony and composition. He was, about 1800, in Hamburg, and previously in Brunswick. Germany was at that time under French rule, and to avoid the conscription he escaped to Copenhagen, where he became the first flute in the king’s band. He then settled in Denmark, acquired a house in Lyngby, near Copenhagen, to which he fetched his parents, composed half-a-dozen operas, was made professor of music and court composer, and enjoyed a very great popularity. In the autumn of 1825 he was at Vienna, and Seyfried\(^1\) has preserved a capital story of his expedition to Beethoven at Baden with a circle of choice friends, of the way in which the great composer dragged them at once into the open air, and of the jovial close of the day’s proceedings. Kuhlau, inspired by champagne and the presence of Beethoven, extemporised a canon, to which Beethoven responded on the spot, but thought it wise to replace his first attempt next morning by another, which is one

\(^1\) Beethoven’s Letters (Nohl, No. 656).
KUHNAU

reiterated joke on the name of his guest (and, whether intentionally or not, on the name 'Bach')—

and was accompanied by the following note:—

BADEN, September 3, 1825.

I must confess that the champagne got too much into my head last night, and has once more shown me that it rather confuses my wits than assists them; for though it is usually easy enough for me to give an answer on the spot, I declare I do not in the least recollect what I wrote last night. Think sometimes of your most faithful BEETHOVEN.

In 1830 Kuhlau suffered two irreparable losses—the destruction of the greater part of his manuscripts by fire, and the death of his parents. This double calamity affected his health, and he died at Copenhagen, March 12, 1832, leaving a mass of compositions, of which a few for flute and a few for piano are still much esteemed. [See Flute, p. 68.]

KUHNAU, JOHANN, a very remarkable old musician, Cantor of Leipzig, and one of the pillars of the German school of the clavier, born at Geising, on the borders of Bohemia, in April (baptized April 6), 1660. As a boy he had a lovely voice and a strong turn for music. He was put to the Kreuzschule at Dresden about 1669, where he became a 'Rathsdisisantist,' and obtained regular instruction in music. On the breaking of his voice he worked the harder, and in addition to his music learned Italian. The plague in 1680 drove him home, but Geising was no field for his talent, and he went to Zittau and worked in the school, till the excellence of a motet which he wrote for the Rathswahl, or election of the town council, procured him the post of Cantor, with a salary on which he could study at leisure. He began by lecturing on French. His next move was to Leipzig, in 1682, whither his fame had preceded him, and in that city of music he cast anchor for the rest of his life. In 1684 he succeeded Kuhnau as organist at St. Thomas's. [In 1688 he founded a 'Collegium Musicum,' or set of concerts.] At the same time he was studying law, and qualified himself for the rank of advocate. In 1700 he was made musical director of the University and of the two principal churches, and in 1701 Cantor. After this no further rise was possible, and he died June 25, 1722, admired and honoured as one of the greatest musicians and most learned men of his time. He left translations from Hebrew, Greek, Latin, Italian, and French, and wrote satirical poetry of no common order. Of his musical works the following are named:— _Jura circa musicos ecclesiasticos_ (Leipzig, 1688); _Der mu-

sickalische Quacksalber . . . in einer kurzzeitigen und angenommen Historie . . . beschrieben_ (Dresden, 1700); _Tractatus de intrachordo: Introductio ad compositionem; and Disputatio de triade_—the last three in MS. He wrote motets on chorales, and other sacred pieces; but his clavier music is his glory, and he is the greatest figure among German composers for the clavier before Bach, who obliterated all his predecessors. He was the inventor of the sonata as a piece in several movements, not dance-tunes—the first of which, 'Eine Sonata aus dem B,' in three movements, is found in his 'Sieben Partien' (Leipzig, 1695). He followed this with thirteen others—'Frische Clavier-Fröhliche, oder sieben Sonaten' (Dresden and Leipzig, 1696); _Biblishe Historien nebst Auslegung in sechs Sonaten_—the last a curious offspring of the springing of the musician and the divine, and a very early instance of Program music. Mr. J. S. Shedlock edited several of these quaint Bible sonatas for Novello & Co., and describes them fully in his _Pianoforte Sonata_. The whole set were published in the _Deutsch-Deutscher Tontext_, vol. iv, 1901, edited by K. Pasler. In addition to these he published 'Clavierbungen aus 14 Partien . . . bestehend' (Leipzig, 1689)—a collection of Suites, that is, of dance-tunes. Becker has republished two of Kuhnaus pieces in his 'Ausgewählte Tontücke'; and Pauer, who introduced several of them to the English public in his chronological performances in 1862 and 1883, printed a Suite in his 'Alte Claviermusik' (Senff), and a Sonata in his 'Alte Meister' (Breitkopf). [See the _Sammelbände_ of the _Int. Mus. Ges._ 1902, p. 473, and list of literary and musical works in the _Quellen-Lexikon._]

KULLAK, THEODOR, born Sept. 12, 1815, at Krotoschin, in the province of Posen, where his father held the post of 'Landgerichts-sekretär.' He was first intended for the law, but preferred to devote himself to music. He was a pupil of Hauck's from his eleventh year, having previously been under the tuition of Albert Agthe. In 1837 he went to Berlin to study medicine. In 1842 he became a pupil of Czerny, and in 1846 was made Hofpianist to the King of Prussia. He founded, in conjunction with Stern and Marx, a Conservatorium at Berlin in 1850; and in 1855, in consequence of some disagreement with his fellow-workers, he started a new institution under the name of 'Neue Akademie der Tonkunst' in the same city, where he resided until his death, March 1, 1882. He devoted his attention principally to the 'drawing-room' style of composition, and published many transcriptions and arrangements for the piano, which are very popular. Of his original works the following are the most remarkable:—Grand concerto in C minor for piano and orchestra (op. 55); Trio for piano and strings (op. 77); Duos for piano
and violin; Ballades, Boleros, etc., for piano solo; 'Les Étincelles,' 'Les Danaides,' 'La Gazette,' etc.; also collections of small pieces, such as 'Deux Portefeuilles de Musique,' 'Kinderleben,' two sets of pieces (op. 81), 'Les Fleurs animées.' Among his later works may be mentioned 'Ondine' (op. 112), 'Concert étude' (op. 121). In 1877 he published a second edition of his 'Octave-school,' which is very valuable as an instruction book.

His brother, ADOLF KULLAK, born Feb. 23, 1823, was a distinguished musical critic in Berlin, and wrote 'Das Musikalisch-Schöne' (Leipzig, 1858), and 'Aesthetik des Clavier-spiels' (Berlin, 1861). He died Dec. 25, 1862, at Berlin.

KUMMER, FRIEDRICH AUGUST, a great violoncellist, born at Meiningen, August 5, 1797. His father (an oboist) migrated to Dresden, where the lad learnt the violoncello under Dotzauer. It was his ambition to enter the King's band, but as there was then no vacancy for a violoncellist, he took up the oboe, and soon attained such proficiency as to obtain the desired appointment, in Nov. 1814. In 1817 he again took up his original instrument, and in time became known as the most accomplished virtuoso in Germany. With the exception of occasional musical tours, principally in Germany and Italy, his career was confined to Dresden. In 1864 he celebrated the fiftieth anniversary of his appointment as a member of the Dresden orchestra, after which he retired on a pension, and was succeeded by F. Gritzmacher. He died at Dresden, May 22, 1879. Kummer's tone was at once sweet and powerful, and his command over difficulties very great. His playing, however, was characterised in a remarkable degree by repose, and he is described as never having been excited even when playing the most passionate or difficult passages. Kummer was a voluminous writer for his instrument. 163 of his works have appeared in print, among which are Concertos, Fantasias, a good Violoncello School, etc. He has also composed some 200 extractes for the Dresden Theatre. Among his many distinguished pupils, Goltzmann of Stuttgart, and Cossmann of Wiesbaden may be named. [His grandson, ALEXANDER CHARLES, born 1850, at Dresden, and trained under David at the Leipzig Conservatorium, has lived for many years in London in high esteem as a violinist. A. C.]

KUNST DER FUGE, DIE. See ART OF FUGUE.

KUNTZEN. Three members of the family who bore this name, father, son, and grandson, distinguished themselves as musicians of some consequence in their day. The first, JOHANN PAUL KUNTZEN, was born August 30, 1698, at Leisnig in Saxony, where his father was a cloth manufacturer. While still attending the university of Leipzig in 1716, he was engaged at the Leipzig Opera, both as singer and instrumental performer. In 1718 he became kapellmeister at Zerbst, and in 1719 at Wittenberg, where he established regular concerts. In 1738 he was invited to Hamburg as opera composer. In 1732 he was appointed organist to the Marien-Kirche at Lübeck, which post he held till his death on March 20, 1757. At Lübeck he also established regular concerts which may be considered as a continuation of the Advent-Abend-musikenu of Buxtehude. Mattheson speaks highly of his compositions (opera, oratorio, etc.), none of which, however, appear ever to have been printed.

The second Kuntzen, ADOLPH KARL, son of Johann Paul, was born at Wittenberg, Sept. 22, 1720. He early distinguished himself as a performer on the harpsichord and clavier generally, and made several tours as a virtuoso, in the course of which he paid several visits to London. It was in London that his op. 1 appeared, 12 sonatas for the harpsichord, dedicated to the Prince of Wales. In 1749 he was appointed concert-meister to the Duke of Mecklenburg-Schwerin, and in 1757 succeeded his father as organist at the Marien-Kirche, Lübeck, where he continued till his death in 1781. In his official capacity at Lübeck, as also previously in Schwerin, he produced a large number of Passions, oratorios, and church cantatas, a full list of which is given in Eitner's Quellen-Lexikon. The library at Schwerin also contains a large number of instrumental works by him (concertos, symphonies) and birthday serenatas for members of the ducal family. Besides the few for the harpsichord already mentioned, the only other works published by him are three collections of songs with accompaniment of figured bass only, 1748-56 ('Lieder zum unschuldigen Zeitvertreib').

The third Kuntzen, FRIEDRICH LUDWIG AEMILIUS, son of Adolph Karl, was born at Lübeck, Sept. 24, 1761. He received his early musical instruction from his father, who in 1788 brought him to London, where, along with his equally talented sister, he appeared as a juvenile prodigy, playing in a concerto for two claviers. In 1781 he attended the university at Kiel for the study of law. There he made the acquaintance of Professor K. F. Cramer, a musical dilettante and writer, who encouraged him to devote himself to music. Giving up his legal studies in 1787, he obtained through Cramer's influence a minor post at the Copenhagen Opera, where in 1789 he produced his first Danish opera, 'Holger Danske' (Oberon), which the same year was also published in a piano score edited by Cramer. Shortly afterwards he went to Berlin, where, in conjunction with Reichardt, he edited a musical journal. In 1792 he was musical director of the theatre at Frankfort, and in 1794 held a similar post at Prague. In 1796 he successfully produced
his opera 'Das Fest der Winzer,' which also appeared in piano score. The same year he succeeded J. A. P. Schulz as director of the opera at Copenhagen, where he produced a large number of Danish operas, till his death in 1817. Most of these operas were published in piano score at Copenhagen. For list of these and other works see Quellen-Lexikon. J. R. M.

KUNTZSCH, JOHANN GOTTFRIED, one of those earnest, old-fashioned, somewhat pedantic, musicians, to whom Germany owes so much; who are born in the poorest ranks, raise themselves by unheard-of efforts and self-denial, and die without leaving any permanent mark except the pupils whom they help to form. The 'Baccalaureus Kuntzsch' was teacher of the organ and clavier at the Lyceum of Zwicau when Schumann was a small boy, and it was by him that the great composer was grounded in piano forte playing. Kuntzsch celebrated his jubilee at Zwicau in July 1852, when Schumann wrote him a charming letter,1 which his biographer assures us was but one of many. Schumann's studies for the pedal piano—six pieces in canon-form (op. 56), composed in 1845 and published in 1846—are dedicated to his old master, whose name is thus happily preserved from oblivion. Kuntzsch died at a great age in 1854.

KUPSFH, KARL GUSTAF, demands a few lines as having been for a short time Schumann's instructor in the theory of music2—apparently in the latter part of 1830, after his accident to his finger. Kupsh was an average German capellmeister, born in Berlin, lived and worked there and in Leipzig and Dresden as teacher, composer, and conductor, till 1838, when he settled in Rotterdam as Director of the Singing Academy, and one of the committee of the 'Erudito musica' Society. In 1845 he returned to Germany, became Director of the Theatre at Freiburg im Breisgau, and at Naumburg, where he died July 30, 1846.

KUSSE, See C outlier.

KYRIE (Gt. Kyrie eleison; Kyrie eleison; 'Lord, have mercy').

I. That portion of the Ordinary of the mass which immediately follows the Introit, and precedes the Gloria in excelsis. [It is, historically speaking, the fag end of the litany which preceded the mass. Originally Kyries were sung ad libitum, but in the early medieval period the number was reduced to nine, — a threefold Kyrie eleison, a threefold Christe eleison, and a threefold Kyrie eleison repeated. The primitive music, as this history suggests, was very simple: but with the change in form came a change of music and from the 9th or 10th century onward ninefold Kyries were composed, as St. Dunstan composed the Kyrie Rex Splendens, or else adapted from older melodies. The next step was that the elaborate melodies were farced, i.e. provided with a set of words written so that a syllable went to each note; and from the incipit of these words they took their name. Similar Tropes were inserted into other pieces of the services, but they disappeared almost entirely in the 14th and 15th centuries from all except the Kyries. The trooped or farced Kyries survived down to the Reformation.] (See TROPE.) The Kyrie of the Missa pro Defunctis, exhibited in the subjoined example, is peculiarly interesting, not only from its own inherent beauty, but, as will be presently shown, from the use to which it was turned by Palestrina, in the 16th century.

When, after the invention of figured music, these venerable melodies were selected as themes for the exercise of contrapuntal skill, the Kyrie naturally assumed a prominent position in the polyphonic mass; and at once took a definite form, the broad outlines of which passed, unaltered, through the vicissitudes of many changing schools. The construction of the words led, almost of necessity, to their separation into three distinct movements. Some of the earlier contrapuntists delighted in moulding these into canons, of maddening complexity. The great masters of the 16th century preferred rather to treat them as short, but well-developed real fugues, on three distinct subjects, the last of which was usually of a somewhat more animated character than the other two. Whether from a pious appreciation of the spirit of the words, or a desire to render the opening movement of the mass as impressive as possible, these earnest writers never failed to treat the Kyrie with peculiar solemnity. In the hands of Palestrina, it frequently expresses itself in a wailing cry for mercy, the tender pathos of which transcends all power of description. This is pre-eminently the case, in the Kyrie of his Missa brevis, a few bars of which have already been given, as an example, under the heading HEXACHORD [ante, p. 382]. The same feeling is distinctly perceptible throughout the Kyrie of the Missa Papae Marcelli; but associated, there, with a spirit of hopeful confidence which at once staves it as the nearest approach to a perfect ideal that has ever yet been reached. More simple in construction, yet scarcely less beautiful, is the opening movement of the same composer's Missa pro Defunctis, in which the plain-song Canto fermo given above is invested with a plaintive tenderness which entirely conceals the consummate art displayed in its contrapuntal treatment.

1 Wielandt's gives it, p. 10.
2 ibid, p. 97.
The effect of these pure vocal harmonies, when sung as they are intended to be sung, in immediate contrast to the stern unisonous plain chant of the Introit, is one which, once heard, can never be forgotten. The manner of singing them, however, requires careful consideration. One great difficulty arises from the fact, that, in the old part-books, no indication whatever is given as to the way in which the words and music are to be fitted together; and modern editors differ so much in their ideas on the subject, that no two editions are found to correspond. The following phrase from the Kyrie of the Missa Papae Marcelli only exhibits one instance of divergence out of a thousand.

In this case, Lassus is undoubtedly right in allotting a distinct note to each syllable of the word, Ky-ri-e; but nothing can justify his division of the penultimate semibreve into a dotted minim and crotchet. The second and third syllables of e-le-i-son can be perfectly enunciated, after the Italian manner, to a single note. In all such cases, the conductor must use his own judgment as to the best mode of procedure.

Without pausing to trace the progress of the polyphonic Kyrie through the decadence of the school to which it owed its existence, or the rise of that which followed—a school in which instrumental accompaniment first seriously asserted its claim to notice—we pass on to a period at which an entirely new phase of art had already attained its highest degree of perfection. The Kyrie of Bach's great Mass in B minor differs, tuttocalce, from its polyphonic predecessors, though moulded in the old tripartite form, its two stupendous fugues, and the melodious and elaborately developed duet, which separates them, have nothing but that division in common with the grave slow movements of the older masters, and are such, indeed, as Bach alone could ever have conceived. Too long for practical use, as a part of the church service, they unite in forming a monument of artistic excellence, representing a school, which, while it scorned to imitate anything which had gone before it, was able to defy the imitation of later composers.

The Kyries of Haydn and Mozart—legitimate descendants of those of Pergolesi and Jommelli—abound with beauties of a wholly different order. The well-known opening of Haydn's grand Missa Imperialis (in D minor) is a fiery allegro, in which bright passages of semiquavers, and short but telling points of fugal imitation, are contrasted together with striking effect, but with very little trace of the expression which we should naturally expect in a petition for mercy. That of the favourite mass commonly called ' Mozart's Twelfth,' is too well known to need more than a passing allusion. Neither Beethoven, in his Missa Solemnis, nor Cherubini, in his great Mass in D minor, can be said to have struck out a new ideal; though both infused into the Kyrie an amount of dramatic power previously unknown in church music. In the Kyries of Rossini and Gonnod, free use is made of the same forcible means of expression, notwithstanding the feigned return to an older style, in the Christe of the first-named composer's Missa Solemnelle.

In tracing the history of the Kyrie, from its first appearance as a polyphonic composition, to the latest development of modern times, we find that, apart from the idiosyncratic peculiarities of varying schools and individual composers, it has clothed itself in no more than three distinct ideal forms; of which the first depends, for its effect, upon the expression of devotional feeling, while the second appeals more strongly to the intellect, and the third, to the power of human emotion. Each of these types may fairly lay claim to its own peculiar merits; but, if it be conceded that devotional feeling is the most necessary attribute of true church music, it is certain that, whatever may be in store for the future, that particular attribute has never hitherto been reached, in its highest perfection, in the presence of instrumental accompaniment.

II. The Response. 'Lord, have mercy upon us, and incline our hearts to keep this law'; sung, in the service of the Church of England, after the recitation of the Ten Commandments.

As the custom of reciting the Commandments during the Communion Service is of later date than the First Prayer Book of King Edward the Sixth, in Merbecke's 'Book of Common Prayer Noted,' which was first published in 1550, the old ninefold Kyrie is found in a simple form,
borrowed from the Kyrie cited above. Mr. Dyce in his *Book of Common Prayer with Plain Tune* (1844) adapted this to the Kyrie of the present Prayer Book, and his adaptation is in general use. The Kyrie provided by Merbecke for a burial was taken with less alterations from the melody which was used in the lesser Litany as well as in the Mass, and is probably the primitive form of Kyrie.] The treatment of the English Kyrie by the early composers of the polyphonic School was extremely simple and dignified; indeed, some of these responses, as set by Tallis (in the Dorian Mode), Byrd, Farrant, Gibbons, and other old English writers, are perfect little gems of artistic beauty. With such examples—and many excellent ones, of later date—within their reach, it is strange that cathedral organists should ever have countenanced the pernicious custom of 'adapting' the words of the Kyrie to music which—however good in itself—was never intended to be sung to them. Not very long ago, the opening bars of a Chaconne, by Jommelli (an adaptation made by Wm. Hawes, and first sung at the coronation of George IV.) was heard in almost every church in which the responses were chanted: while, within the last few years, no Kyrie has been so popular as one 'adapted' to a passage occurring in 'Elijah,' and generally associated with a distribution of the voice parts which Mendelssohn would have condemned as utterly barbarous. w. s. r.; additions in square brackets by w. h. f.
A, the syllable used in solmisation for the sixth note in the scale, derived possibly by Guido from the sixth line of the well-known hymn to S. John—'Labii reaturn.' It is used by the French and Italians as a synonym for A (the sixth note of the scale of C)—'Sinfonie en la de Beethoven,' and they speak of the second string of the violin as 'corde en la.' 'La bémol' is A flat.

The number of vibrations per second for the $a$ is—Paris diapason 435, London Philharmonic pitch before 1806, 454. The $A$ proposed by the Society of Arts, and in use at the Opera, for many years before the general adoption of the lower pitch, was 444.

In 1896 the London Philharmonic Society adopted the pitch of 439 vibrations per second for $a$. This pitch is now very generally used in the best orchestras, and is commonly known as the 'flat pitch.' The difference between it and the Paris diapason 435 is due to a recognition of the fact that wind instruments rise in pitch with increase of temperature. The Paris $A$ 435 was fixed for a temperature of 15° C. (59° F.); the present Philharmonic $A$ 439 is defined to be 20° C. (68° F.), and the difference is about equal to that which takes place in the organ between the two temperatures named.

D. J. B.

LABIAL PIPES. Organ pipes possessing lips as distinguished from reeds.

LABITZKY, JOSEF, a well-known dance composer, born July 4, 1802, at Schönfeld, Eger, was grounded in music by Veit of Petzschau; in 1828 began the world as first violin in the band at Marienhaid and in 1821 removed to a similar position at Carlsbad. He then formed an orchestra of his own, and made journeys in South Germany. Feeling his deficiencies, he took a course of composition under Winter, in Munich, and in 1827 published his first dances there. In 1835 he settled at Carlsbad as director of the band, making journeys from Petersburg on the one hand, to London on the other, and becoming every day more famous. He lived at Carlsbad, and associated his son AUGUST (born Oct. 22, 1832) with him as director from 1853. His second son, WILHELM, an excellent violin player, settled at Toronto, Canada, and his daughter was a favourite singer at Frankfort. Labitzky's dances are full of rhythm and spirit. Among his waltzes, the 'Sirenen,' 'Grenzboden,' 'Anrora,' 'Carlsbader,' and 'Lichtensteiner' are good. In galops he fairly rivalled Lanner and Strauss, though he had not the poetry of those two composers. He died at Carlsbad, August 19, 1881. F. G.

LABLACIE, Luigi, was born at Naples, Dec. 6, 1794. His mother was Irish, and his father, Nicolas Lablache, a merchant of Marselles, had quitted that place in 1791 in consequence of the Revolution. But another Revolution, in 1799, overwhelmed him with ruin in his new country, and he died of chagrin. His family was, however, protected by Joseph Buonaparte, and the young Luigi was placed in the Conservatorio della Pietà de' Turchini, afterwards called San Sebastiano. He was now twelve years old. Gentilli taught him the elements of music, and Valesi instructed him in singing; while, at the same time, he studied the violin and violoncello under other masters. His progress was not at first remarkable, for he was wanting in application and regularity; but his aptitude was soon discovered by a singular incident. One day a contrabassist was wanted for the orchestra of S. Onofrio. Marcello-Perrino, who taught young Lablache the violoncello, said to him, 'You play the violoncello very well; you can easily learn the double bass!' The boy had a dislike for that instrument, in spite of which he got the gamut of the double bass written out for him on a Tuesday, and on the following Friday executed his part with perfect accuracy. There is no doubt, in fact, that, had he not been so splendidly endowed as a singer, he might have been equally brilliant as a virtuoso on any other instrument that he chose (Escudier). At this period his boy's voice was a beautiful contralto, the last thing that he did with which was to sing, as it was just breaking, the solos in the Requiem of Mozart on the death of Haydn in 1809. He was then fifteen, and his efforts to sing to the end of the work left him at last without power to produce a sound. Before many months were passed, however, he became possessed of a magnificent bass, which gradually increased in volume until, at the age of twenty, it was the finest of the kind which can be remembered, with a compass of two octaves, from E below to $c'$ above the bass staff.

Continually dominated by the desire to appear on the stage, the young Lablache made his escape from the Conservatorio no less than five times, and was as often brought back in disgrace. He engaged himself to sing at Salerno at 15 duets a month (40 sous a day), and received a month's salary in advance; but, remaining two days longer at Naples, he spent the money. As he could not, however, appear decently without luggage, he filled a portmanteau with sand, and set out. Two days later he was found at Salerno by the vice-president of the Conservatorio, while the Impresario seized the effects of the young truant in order to recompense him the salary he had advanced, but found, to his horror, nothing in the portmanteau... but what Lablache had put there! (Escudier). To these escapades was due,
however, the institution of a little theatre within the Conservatorio; and Lablache was satisfied for a time. A royal edict, meanwhile, forbade the Impresario of any theatre, under severe penalties, to engage a student of the Conservatorio without special permission.

Having at length completed his musical education, Lablache was engaged at the San Carlo Theatre at Naples, as *buffo Napoletano*, in 1812, though then only eighteen. He made his début in 'La Molinara' of Fioravanti. A few months later, he married Teresa Pinotti, the daughter of an actor engaged at the theatre and one of the best in Italy. This happy union exercised a powerful and beneficial influence over the life of Lablache. Quickly seeing his genius and capacity for development far beyond the narrow sphere in which she found him, his young wife persuaded Lablache, not without difficulty, to quit the San Carlo, a theatre in which two performances a day were given, ruining completely within a year every voice but that of her robust husband; to re-commence serious study of singing, and to give up the *patois* in which he had hitherto sung and spoken. Accordingly, a year later, after a short engagement at Messina, he went as *primo basso cantante* to the Opera at Palermo. His first appearance was in the 'Ser Marc-Antonio' of Pavesi, and his success was so great as to decide him to stay at Palermo for nearly five years. But it was impossible that he should remain there unknown; and the administration of La Scala at Milan engaged him in 1817, where he made his début as Dandini in 'Cenerentola' with great success, due to his splendid acting and singing, and in spite of the provincial accent which still marred his pronunciation. Over the latter defect he soon triumphed, as he had over his want of application a few years before. In fact, perhaps the most remarkable things about Lablache were the extent to which he succeeded in cultivating himself, and the stores of general knowledge which he accumulated by his own unaided efforts. It is said that at Naples he had enjoyed the great advantage of the society and counsels of Madame Méricofre, a banker's wife, known in Italy before her marriage as La Coltellini (see vol. i. p. 566), but then quite unknown in England, though described as one of the finest artists belonging to the golden age of Italian singing.

To such influence as this, and to that of his intelligent wife, Lablache perhaps owed some of the impulse which prompted him to continue to study when most singers cease to learn and content themselves with reaping the harvest; but much must have been due to his own desire for improvement.

The opera 'Elisa e Claudio' was now (1821) written for him by Mercadante; his position was made, and his reputation spread throughout Europe. From Milan he went to Turin; returned to Milan in 1822, then appeared at Venice, and in 1824 at Vienna, and always with the same success. At the last city he received from the enthusiastic inhabitants a gold medal bearing a most flattering inscription. After twelve years' absence he returned to Naples, with the title of singer in the chapel of Ferdinand I., and with an engagement at the San Carlo. Here he created a great sensation as Assur in 'Semiramide.' In 1829 we find him at Parma, singing in Bellini's 'Zaira.' Although Ebershad endeavoured, as early as 1822, to secure him for London, on the strength of his reputation as 'perhaps even excelling Zucchini,' Lablache did not tread the English boards till the season of 1830, when he made his début on March 30 in the 'Matri monio Segreto.' Here, as elsewhere, his success was assured from the moment when he sang his first note, almost from the first step he took upon the stage. It is indeed doubtful whether he was greater as a singer or as an actor. His head was noble, his figure very tall, and so atoning for his bulk, which became immense in later years: yet he never looked too tall on the stage. One of the boots of Lablache would have made a small portmanteau; 'one could have clad a child in one of his gloves' (Chorley). His strength was enormous. As Leporello, he sometimes carried off under his arm, apparently without effort, the troublesome Masetto, represented by Giubilei, a man of the full height and weight of ordinary men! Again, in an interval of tedious rehearsing, he was once seen on the stage to pick up with one hand a double bass that was standing in the orchestra, examine it at arm's length, and gently replace it where he had found it! The force of his voice exceeded, when he chose, the tone of the instruments that accompanied it and the noise and clamour of the stage; nothing drowned his portentous notes, which rang through the house like the booming of a great bell. On one occasion, indeed, his wife is said to have been woke up by a sound, in the middle of the night, which she took for the tocsin announcing a fire, but which turned out to be nothing more than Lablache producing in his sleep these bell-like sounds. It was during the great popularity of 'I Puritani,' when Grisi, accompanied by Lablache, was in the habit of singing the polaceca thrice a week at the Opera, and frequently also at concerts. After performing his *staccato* part in the duet thrice within nine hours, Lablache was haunted by it even in his sleep. This power was wisely used by the great artist on the right occasions, and only then—as the deaf and angry Geronimo, or as Oroveso in 'Norma'; but at other times, his voice could 'roar as sweetly as any sucking dove,' and he could use its accents for comic, humorous, tender, or sorrowful effects, with equal ease and mastery.

Like Garrick, and other great artists, Lablache shone as much in comic as in tragic parts. Nothing could exceed his Leporello; of that...
character he was doubtless the greatest known exponent. But he had, at an earlier date, played Don Giovanni. As Geronimo, the Podestà in 'La Gazza Ladra,' again, in 'La Prova d'un' Opera Seria,' as Dandini and the Barone di Montefiascone, he was equally unapproachable; while his Henry VIII. in 'Anna Bolena,' his Degein 'Marino Faliero,' and Oroveso in 'Norma,' were splendid examples of dignity and dramatic force. He appeared for the first time in Paris, Nov. 4, 1830, as Geronimo in the 'Matrimonio Segreto,' and was there also recognised immediately as the first basso cantante of the day. He continued to sing in Paris and London for several years; and, it may be mentioned that his terms were in 1828, for four months, 40,000 frs. (£1600), with lodging and one benefit-night clear of all expenses, the opera and his part in it to be chosen by himself on that occasion, as also at his début. The modest sum named above, in no degree corresponding with the value of Lablache in an operatic company, was a few years later (1839) the price paid by Laporte to Robert, to whom Lablache was then engaged at Paris, for the mere cession of his services to the London Opera.

In 1833 Lablache sang again at Naples, renewing his triumphs in the 'Eliaire d'amore' and 'Don Pasquale.' He returned to Paris in 1834, after which he continued to appear annually there and in London, singing in our provincial festivals as well as at the Opera, for many years. In 1852 he sang at St. Petersburg with no less éclat than elsewhere. Whether in comic opera, in the dramatic music of Spohr, or in that of Palestrina, he seemed equally at home. Let it be never forgotten that he sang (April 3, 1827) the bass solo part in Mozart's Requiem after the death of Beethoven, as he had, when a child, sung the contralto part at the funeral of Haydn; and let the former fact be a sufficient answer to those who say he had no notes lower than A or G. Be it recorded, at the same time, that he paid Barbaia 200 gulden for the operatic singers engaged on that occasion. He was also one of the thirty-two torch-bearers who surrounded the coffin of Beethoven at its interment. To him, again, Schubert dedicated his three Italian songs (op. 88), written to Metastasio's words and composed in 1827, showing thus his appreciation of the powers of the great Italian.

In 1856, however, his health began to fail, and he was obliged in the following spring to drink the waters of Kissingen, where he was met and treated with honour by Alexander II. of Russia. Lablache received the medal and order given by the Emperor with the prophetic words: 'These will do to ornament my coffin.' After this he returned for a few days in August to his house at Maisons-Lafitte, near Paris; but left it on the 18th, to try the effect of his native climate at his villa at Posilipo. But the bright, brisk air was too keen for him, and he had to take refuge in Naples. The relief, however, served only to prolong his life a short while, and he died Jan. 23, 1858. His remains were brought to Paris, and buried at Maisons-Lafitte.

Lablache had many children; one of his daughters married the great pianist, Thalberg. A Méthode de chant, written by Lablache, was published chez Mme. Vèe Canaux, at Paris; but it rather disappointed expectation.

Lablache died, as he had lived, respected by every one who knew him for his honourable, upright probity, as he was admired for his marvellous and cultivated talents.

He was Queen Victoria's singing-master, and the esteem and even affection which that intercourse engendered are expressed more than once in warm terms in Her Majesty's published Diaries and Letters.

J. M.

La Borde, Jean Benjamin de, born in Paris, Sept. 5, 1754, became a pupil of D'Aubervige for the violin, and of Rameau for composition, and ultimately attained great eminence as an amateur composer. He wrote nearly fifty operas of a more or less trifling kind, many songs for single voice, and several works on music, among which the Essais sur la Musique ancienne et moderne (1780) is the most important. The four volumes of his Choses de Chansons mises en Musique, with their charming illustrations, have become a bibliographical rarity. Some of the contents were edited separately by Miss L. E. Broadwood. De La Borde was guillotined July 22, 1794.

M.

Lachner, a prominent musical family of the 19th century. The father was an organist at Rain, on the Lech, in Bavaria, very poor and with a very large family, but not the less a man of worth and character. He was twice married. One of the first family, Theodon, born 1798, was a sound musician, but ambitious, who ended his career (May 22, 1877) as organist at Munich, and chorus-master at the Court theatre. The second family were more remarkable. Of the daughters, Thekla was organist of S. George's Church, Augsburg, and Christiane, born 1806, held the same post in her native place. Of the brothers, Franz was born April 2, 1803. He was solidly educated in other things besides music, but music was his desire, and in 1822 he prevailed on his parents to let him go to Vienna. He put himself under Stadler and Sechter, and was constantly in Schubert's company, with whom he became very intimate. In 1829 he was made vice-capellmeister of the Kärntnethor Theatre, and the next year, on the retirement of Weigl, principal capellmeister. He retained this post till 1834, and it was a time of great productivity. In that year he went to Mannheim to conduct the opera there, and in 1836 advanced to the top of the ladder as Hofcapellmeister—1852 general music director—at Munich, and there remained till 1865,

2 r
when he retired on a pension. He died there Jan. 20, 1890. In 1872 the University of Munich gave him the honorary degree of Doctor of Philosophy. Lachner's writings are of prodigious number and extent. Two oratorios, 'Moses' and 'Die vier Menschnealter'; four operas ('Die Bürgerschaft,' Pesth, 1828; 'Alinda,' Munich, 1839; 'Catarina Cornaro,' Munich, 1841; and 'Benvenuto Cellini,' Munich, 1849); a requiem; three grand masses; various cantatas, ensembles, and other pieces; many large compositions for male voices; eight symphonies —among them those in D minor (No. 3), in C minor (op. 52)—which won the prize offered by the Gesellschaft der Musikfreunde—and in D (No. 6), which Schumann finds twice as good as the prize one—seven suites, overtures, and serenades for orchestra, the orchestration of Schubert's 'Song of Miriam'; five quartets; concertos for harp and bassoon; a suite for wind instruments, trios, duos, pianoforte pieces of all dimensions; and a large number of vocal pieces for solo and several voices. All that industry, knowledge, tact, and musicianship can give is here—if there were but a little more of the sacred fire! No one can deny to Lachner the praise of conscientiousness and artistic character; he was deservedly esteemed by his countrymen almost as if he were an old classic, and held a similar position in the South to that of Hiller in the North. The next brother, Ignaz, was born Sept. 11, 1807, was brought up to music, and at twelve years old was sent to the Gymnasium at Augsburg, where he is said to have had no less a person than Napoleon III. (then Count St. Leu) as a schoolfellow. In 1824 he joined his brother at Vienna, in 1825 was made vice-capellmeister of the Kärntnertor Theatre; in 1831 a Court music-director at Stuttgart, and in 1842 rejoined his brother in a similar position at Munich. In 1853 he took the conduct of the theatre at Hamburg, in 1858 was made Court capellmeister at Stockholm; and in 1861 settled down for good at Frankfurt, where he filled many musical positions, and retired in 1875. He died at Hanover, Feb. 24, 1895. He also has produced a long list of works—three operas ('Der geistetum,' Stuttgart, 1837; 'Die Regenbrudner,' Stuttgart, 1839; and 'Loreley,' Munich, 1840); several ballets, melodramas, etc. etc.; with masses, symphonies, quartets, pianoforte works, and many songs, one of which—'Uberall Du'—was very popular in its day. The third brother, Vincenz, was born July 19, 1811, and also brought up at the Augsburg Gymnasion. He began by taking Ignaz's place as organist in Vienna in 1824, and rose, by the same course of goodness and indefatigable assiduity as his brothers, to be Court capellmeister at Mannheim from 1836 till 1878, when he retired on a pension. He was in London in 1842, conducting the German Company. After his retirement he settled at Carlsruhe, where he taught in the Conservatorium from 1884. He died there, Jan. 22, 1893. His music to Turandot, his Prize song 'In der Ferne,' and other pieces, are favourites with his countrymen.

LACHNITH, LUDWIG WENZEL, born July 7, 1746, at Prague, migrated to the service of the Duke at Zweibrücken, and thence to Paris, where he made his début at the Concert Spirituel as a horn player. He was a clever, handy creature, who wrote not only quantities of all kinds of instrumental music, but at least four operas, and several pastichios and other pieces. His most notable achievements, however, were his adaptations of great operas, by way of making them pleasant to the public, such as 'Les mystères d'Ibs,' for which both libretto and music of the 'Zaubermöwe' were 'arranged' into what Féris calls 'a monstrous compilation' (Grand Opéra, August 23, 1801). No wonder that the piece was called 'Les missées d'îch,' and that Lachnith was styled 'le dérangeur.' He was clever also at working up the music of several composers into one piece, and torturing it to the expression of different words and sentiments from those to which it had originally been set—as 'Le Laboureur Chinois,' in which the music of 'several celebrated composers' was 'arrange par M. Lachnith' (Feb. 5, 1813). In these crimes he had an accomplice in the elder Kalkbrenner, who assisted him to concoct two 'Oratorios in action'—'San' (April 6, 1803), and 'The Taking of Jericho' (April 11, 1805). We were as bad in England several years later, and many fine operas of Rossini, Ancher, and quasi-Weber were first made known to Londoners by much the same expedients as those of Lachnith, in the hands of T. P. Cooke, Lacy, and others. Lachnith died Oct. 3, 1820.

LACOMBE, LOUIS BROUILLON, born Nov. 26, 1818, at Bourges, entered the Paris Conservatoire under Zimmerman at the age of eleven, and at thirteen carried off the first piano prize. In 1832 he undertook a concert-tour with his sister, and in 1834 settled in Vienna, where he had lessons from Czerny, and studied theory, etc., with Sechter and Seyfried. From 1839 he lived in Paris, and devoted himself mainly to composition, writing numerous pieces for piano solo, studies, etc., a quartet for piano, violin, oboe, violoncello, and bassoon, and two trios, his best-known pieces of chamber music; two dramatic symphonies—soli, choir, and orchestra, 'Manfred' (1847), and 'Arva' (1850), as well as a melodrama with choruses, 'Sapho,' which received a prize in the Exhibition of 1878—became widely popular. The only operatic work performed in the composer's lifetime was 'La Madone,' in one act (Théâtre Lyrique, 1860); 1 See the account by J. Chin (Mozart, 2nd ed., ii. 307). The magic flute and all the comic music were omitted; Papageno was turned into a shepherd, male, while many pieces were left out, others were put in—as for instance 'Fin du du diel sing,' arranged as a duet! The opera opened with Mozart's finale, and the disorder must have been complete. And yet it ran forty-nine nights!

1
the four-act 'Winkelried' was given in 1892 at Geneva; the two-act 'Le Tonneller de Nuremberg' in Hugo Riemann's adaptation, as 'Meister Martin und seine Gesellen,' was given at Coblenz, March 7, 1897, and the three-act 'Korrigane' at Sondershausen in 1901. Lacombe died at St. Vaast-la-Hougue, Sept. 30, 1884, and a monument was erected to his memory in 1887 in his native town. In 1896 his treatise Philosophie et Musique appeared.

LACOMBE, PAUL, born at Carcassonne, July 11, 1837, was taught music at first by a former pupil of the Paris Conservatoire named Tesseyres, and was afterwards a pupil of Bizet's by correspondence. Lacombe is a serious musician, and holds a high position by his instrumental music. There are three violin sonatas, three trios, three suites, and other pieces for piano, an 'Ouverture symphonique,' three symphonies, a Divertissement and a Suite for piano and orchestra, a 'Sérénade,' 'Scène au camp,' and 'Suite pastorale' for orchestra, a 'Sérénade' for flute, oboe, and strings, as well as a mass, a requiem, and many songs. In 1889 he was awarded the Prix Chartier for his chamber music, and in 1901 he was appointed a corresponding member of the Institut, in succession to Peter Benoit.

G. F.

LACY, JOHN, bass singer, born in the last quarter of the 18th century, was a pupil of Rauzzini at Bath. After singing in London he went to Italy, where he became complete master of the Italian language and style of singing. On his return he sang at concerts and the Lenten oratorios, but although he possessed an exceptionally fine voice and sang admirably in various styles, circumstances prevented him from taking any prominent position. In 1818 he accepted an engagement at Calcutta, and, accompanied by his wife, left England, returning about 1826. Had he remained here he would most probably have been appointed successor to Bartleman. [He died in Devonshire about 1865.]

Mrs. LACY, his wife, was originally Miss Jackson, born in London, 1776, and appeared as a soprano singer at the Concert of Ancient Music, April 25, 1798. In 1800 she became the wife of Francesco Bianchi, the composer, and in 1810 his widow. In 1812 she was married to Lacy, and sang as Mrs. Bianchi Lacy in 1812, 1813, and 1814. She "was the best representative of the great and simple style as delivered by Mrs. Bates and Madame Mara, whilst her articulate delivery and pure pronunciation of Italian, rendered her no less generally valuable in other departments of the art." [She died at Éaling, May 19, 1858.] W. H. H.; additions from S. S. Stratton, Esq.

LACY, MICHAEL ROPHINO, son of an Irish merchant, born at Bilbao, July 19, 1795; learned music from an early age, and made rapid progress on the violin; [appeared in public at six years old in a concert by Jarnewick at a concert given at Bilbao by Andreossi.] In 1802 he was at college at Bordeaux, and in 1803 was sent to Paris to finish his education, and attained to considerable skill as a linguist. Kreutzer was his principal instructor in music. About the end of 1804 he performed before Napoleon at the Tuileries. He was then known as 'Le petit Espagnol.' He played in the principal Dutch towns on his way to London, which he reached in Oct. 1805. He soon gave concerts at Hanover Square Rooms, under the sobriquet of 'The Young Spaniard,' his name not being announced until May 1807, when an engraved portrait of him by Carndon after Smart was published. He next performed at Catalani's first concert in Dublin, [during a visit of Michael Kelly's opera company to Ireland,] and was afterwards engaged for Corri's concerts at Edinburgh at 20 guineas per night. A few years later he quitted the musical for the theatrical profession, and performed the principal genteel comedy parts at the theatres of Dublin, Edinburgh, Glasgow, etc. In 1818 he was appointed leader of the Liverpool concerts vice Janiewicz, and at the end of 1820 returned to London and was engaged as leader of the ballet at the King's Theatre. Lacly adapted to the English stage both words and music of several popular operas; and his adaptations display great skill, although gross liberties were frequently taken with the original pieces, which can only be excused by the taste of the time. Among them are 'The Maid of Judah' from 'Ivanhoe,' the music from 'Semiramis,' 1829; 'Cinderella,' the music from Rossini's 'Cenerentola,' 'Armida,' 'Maometto Secondo,' and 'Guillaume Tell,' 1830; 'Fra Diavolo,' 1831; and 'Robert le Diable,' under the title of 'The Fiend Father,' 1832. In 1833 he produced an oratorio entitled 'The Israelites in Egypt,' a 'pasticcio' from Rossini's 'Mosè in Egitto,' and Handel's 'Israel in Egypt,' which was performed with scenery, dresses, and personation. In 1839 he brought forward a re-adaptation of Weber's 'Der Freischütz,' introducing the whole of the music for the first time. He rendered great assistance to Schelcher in collecting the material for his Life of Handel. Hedied at Pentonville, Sept. 20, 1867. W. H. H.; additions from Dict. of Nat. Biol. etc.

LADY HENRIETTE, ou LA SERVANTE DE GREENWICH. A ballet pantomime in three acts; music by Flotow, Burgmüller, and Deldevez. Produced at the Grand Opéra, Paris, Feb. 1, 1844. Saint Georges, by whom the libretto was written, afterwards extended it into an opera, which was set by Flotow as MARTHA.

LANDER, LANDERER, or LÄNDER-ISCHE TANZ, a national dance popular in Austria, Bavaria, Bohemia, and Styria. It probably derives its name from the Landel, a district in the valley of the Ems, where the dance is said
to have had its origin; but according to some authorities the word simply means 'country dance,' i.e., a waltz danced in a country fashion. In fact the Ländler is a homely waltz, and only differs from the waltz in being danced more slowly. It is in 3–4 or 3–8 time, and consists of two parts of eight bars, each part being repeated two or more times. Like most early dances, it occasionally has a vocal accompaniment. Both Mozart (Köchel, No. 666) and Beethoven (Nottabohm's Cat. pp. 160, 151) have written genuine Ländler, but the compositions under this name of Jensen, Raff, Reinecke, and other modern musicians, have little in common with the original dance. The following example is the first part of a Styrian Ländler (Köhler, Volkstänze; Brunswick, 1854):

The little waltz so well known as 'Le Désir,' usually attributed to Beethoven, though really composed by Schubert, is a Ländler. To know what grace and beauty can be infused into this simple form one must hear Schubert's 'Wiener Damen-Ländler' or 'Belles Viennaises' in their unsophisticated form, before they were treated by Liszt.

La Fage composed much music of many kinds, both vocal and instrumental, sacred and secular, but it is as a historian and didactic writer that his name will live. His Cours complet de Plain-chant (Paris, 1855-56, two vols. 8vo) is a book of the first order, and fully justifies its title. It was succeeded in 1859 by the Nouveau Traité de Plain-chant roman, with questions, an indispensable supplement to the former. His Histoire générale de la musique is incomplete, treating only of Chinese, Indian, Egyptian, and Hebrew music, but it is a careful and conscientious work, and has been largely used by Petis. His learning and method appear conspicuously in his Extraits du Catalogue critique et raisonné d'une petite bibliothèque musicale (Rennes, undated, 120 pp. 8vo, 100 copies only), and in his Essais de Diphthéographie musicale (Paris, 1864, two vols. 8vo, one containing very curious musical examples). A perusal of these two books will amply corroborate every word we have said in praise of this erudite musician. He left a valuable library (the catalogue was published, Paris, 1862, 8vo), afterwards dispersed by auction; but his unpublished works and materials are in the Bibliothèque nationale, to which he bequeathed all his papers, with the MSS. of Choron and Bains in his possession.

M. C.

Lafont, Charles Philippe, an eminent violinist, was born at Paris, Dec. 1, 1781. Petis relates that he got his first instruction on the violin from his mother, a sister of Berthame, a well-known violinist of that period, whom he also accompanied on his travels through Germany, performing successfully, when only eleven years of age, at Hamburg, Oldenburg, and other towns. On his return to Paris he continued his studies under Kreutzer; and soon appeared at the Théâtre Feydeau, though not as a violinist, but as a singer of French ballads. After some time he again took up the violin, this time under the tuition of Rode, and soon proved himself a player
of exceptional merit. Fetis credits him with a perfect intonation, a pure and mellow, though somewhat feeble tone, great powers of execution, and a remarkable charm of expression. From 1801 to 1808 he travelled and played with great success in France, Belgium, Holland, Germany and Russia. In 1808 he was appointed Rode’s successor as solo-violinist to the Emperor of Russia, a position in which he remained for six years. In 1815 he returned to Paris, and was appointed solo-violinist to Louis XVIII. In 1816 he had a public contest with Paganini at Milan. In 1831 he made a long tour with Henri Herz, the pianist, which occupied him till 1839, when his career was suddenly ended by a carriage accident in the south of France, through which he lost his life, August 23, 1839.

Spohr in his Autobiography praises his fine tone, perfect intonation, energy, and gracefulness, but deplores the absence of deep feeling, and accuses him of mannerism in phrasing. He also relates that Lafont’s répertoire was confined to a very few pieces, and that he would practise a concerto for years before venturing on it in public,—a method which, although leading to absolute mechanical perfection, appears absurd from an artistic or even musical point of view. Lafont’s compositions for the violin are of no musical value; they comprise seven Concertos, a number of Fantasias, Rondos, etc. He wrote a number of Duos concertants in conjunction with Kalkbrenner, Herz, etc.; more than 200 ballads (romances), which for a time were very popular; and two operas.

LAGE (Germ. ‘position’), used (1.) of the positions in violin-playing (see FINGERING, ante, pp. 46-53) and (ii.) of the positions of chords in harmony which in English are called INVERSIONS. [See ante, p. 491 et.]

LAGUERRE, Jean, commonly called Jack, was the son of Louis Laguerre, the artist who painted the greater part of Verrio’s large picture in St. Bartholomew’s Hospital, the ‘Labours of Hercules’ in chiaroscuro at Hampton Court, the staircase at Wilton, etc., and is immortalised by Pope in the line

Where sprawl the saints of Verrio and Laguerre.

This painter came to England in 1683, and died in 1721, his son Jean having, as it is supposed, been born about 1700. The lad was instructed by his father for his own profession, and had already shown some ability; but, having a talent for music, he took to the stage, where he met with fair success. It must be he whom we find, under the name of Mr. Legar, playing the part of Metius in ‘Camilla’ (revised), 1726, which had formerly (1706 and 1708) been sung by Ramondon, a low tenor. Again, he is advertised (Daily Journal, March 13, 1731) as sustaining the added rôle of Corydon in ‘Acis and Galatea,’ for the benefit of M. Rochetti, at Lincoln’s Inn, Theatre Royal, on Friday 26th, his name being spelled as in the cast of ‘Camilla.’ In 1737 he sang in Capt. Brevia’s ‘Rape of Helen’ the part of Mercury, when his name was correctly spelled in the cast. He died in London in 1748.

LA HALE, ADAM DE. See HALE.

LAHBR, HENRY, born at Chelsea, April 11, 1826, studied under Sterndale Bennett, Goss, and Cipriani Potter, held the post of organist at Holy Trinity Church, Brompton, from 1847 to 1874, and was well known also as a professor and composer. His music is thoroughly English in character, and is influenced by the traditions of our old part-song writers. Mr. Lahae has been the victor in various prize competitions for glees and madrigals: in 1869 with ‘Hark, how the birds’ (Bristol); in 1878, with ‘Hence, loathed Melancholy’ (Manchester); in 1879, with ‘Away to the hunt’ (Glasgow); and in 1880 and 1884, with ‘Love in my bosom’ and ‘Ah! woe is me’ (London Madrigal Society). Equally good work can be seen in his other choral songs, such as ‘The Unfaithful Shepherdess,’ ‘Love me little, love me long,’ and the popular ‘Bells,’ and in his anthems no less than in his various songs and instrumental pieces.

Good taste is shown by this composer in the choice of his words, and he has found Longfellow congenial with his musical style. The cantata ‘The Building of the Ship’ was written in 1869 for the late Rev. John Curwen, who desired a work of moderate difficulty for the use of Tonic-Sol-faists. It was performed on a large scale in the Hanover Square Rooms, has since attained considerable popularity in the provinces, and has even made its way to Africa and America. The subject of another cantata, Tennyson’s ‘The Sleeping Beauty,’ afforded Mr. Lahae scope for a greater variety of treatment, and contains some graceful writing for female voices. It has been heard on the continent and in America.

LA HÉLE, or HELLE, GEORGE DE, was born at Antwerp some time after 1550. In his earlier years he was a chorister in the Royal Chapel at Madrid. The details of his later life as given by Van der Straeten and others are somewhat conflicting. This much is certain that in 1578 he was choir-master (Phonascus he is styled) at the Cathedral of Tournai. From 1580 to his death in 1589 he would seem to have returned to Madrid to preside over the choir of the Royal Chapel. In 1576 he obtained two prizes at a competition which took place yearly in connection with a Puy de Musique de la Sainte Cécile at Erevex in Normandy, the second prize of a silver harp for the second best motet a 5, and the first prize of a silver lute for the best chanson a 5. It was just the year before, in 1575, that Orlando Lassus had won the first prize of a silver organ with his motet a 5, ‘Domine
Jesu Christe qui cognoscis.' These competitions began in 1575, and continued to 1589. Besides the motet and chanson, the only other work of La Hêle's which ever appeared in print is a volume of Masses (Octo Missae, quinque, sex et septem vocum, etc. ... Antwerp, 1578). This work was dedicated to Philip II. of Spain, and it is in the title that La Hêle is styled Phonensus of Tournai Cathedral, while in the dedication he styles himself an 'alumnus' of the King. The work is otherwise remarkable. It is a large choir-book in folio, containing all the parts together. It was issued from the printing-press of Christophe Plantin at Antwerp, and is one of the most magnificent specimens of musical typography. A facsimile and further account of it may be seen in Goovaerts's Histoire et Bibliographie de la Typographie musicale dans les Pays-Bas, pp. 46 and 253. Goovaerts also gives a copy of the agreement between composer and printer. The work is remarkable for another reason. It consists of eight masses which are all 'Missae Parodiae,' the motives of which are borrowed from the most celebrated motets of the great Netherland masters. Thus there are two masses a 5, based on two motets of Lassus, a 5, 'Oculi omnium,' and 'Gustate et videte'; two masses a 6, based on the motets of Lassus, a 6, 'Quare tristis es,' and 'Fremuit Jesus'; two masses a 7, based on Josquin's celebrated motets 'Præter rerum seriem,' and 'Benedicta coelorum regina; two other masses a 5, based on Roe's 'In conversendo,' and Crecquillon's 'Nigra sum sed formosa.' The whole work is thus a homage paid by La Hêle to his greater predecessors. Other works of La Hêle are supposed to have perished in a fire at Madrid in 1734. J. M.

LAHOUSAYE, PIERRE, born in Paris, April 12, 1735, became a distinguished violinist much patronised by the nobility, and made a tour in Italy, where he was given a post by the Prince of Monaco. He spent the years 1770 to 1775 in London, as director of the Italian opera (Pohl's Mozart und Haydn in London, vol. ii. p. 370), and returned to Paris, where in 1779 he was given the direction of the Concert Spirituel, in 1781 that of the Comédie Italienne, and in 1790 that of the Théâtre de Monsieur, afterwards the Théâtre Feydeau. He was also professor in the Conservatoire. He died in Paris in the latter part of 1818. (Quellen- Lexikon.)

LAIDLAW, ROSENA ANNA,¹ a lady whom Schumann distinguished by dedicating to her his 'Fantasiestücke' (op. 15), was a Yorkshire woman, born at Breton, April 30, 1819, educated in Edinburgh at the school of her aunt, and in music by Robert Muller, a piano-forte teacher there. Her family went to Königsberg in 1830, and there her vocation was decided, she improved in playing rapidly, and in three or four years appeared in public at Berlin with great applause. In 1834 she was in London studying under Horz, and played at Paganini's farewell concert. In 1836 she returned to Berlin, and played at a Gewandhaus concert in Leipzig on July 2, 1837. Soon afterwards she received the dedication of the 'Fantasiestücke,' and made the acquaintance of the composer. [See the Zeitschrift der Int. Mus. Ges. vol. iii. pp. 188 ff.] After a lengthened tour through Prussia, Russia, and Austria, she returned in 1840 to London. [She was appointed in that year pianist to the Queen of Hanover. In 1852 she married a Mr. Thomson, and retired; she died in London, May 29, 1901.]

LAJARTE, THEODÈRE EDUARD DUFAYRE DE, French writer on music, born at Bordeaux, July 10, 1826, was a pupil of Lebore at the Paris Conservatoire, and in early life wrote a good many small operettas, etc., but is best known for his works on musical history. Besides contributing to various daily papers, he published La Bibliothèque musicale du Théâtre de l'Opéra (2 vols. 1876, etc.), a very important catalogue of the operas produced at the Opéra in Paris, with annotations based upon the archives of the institution; Instrumens Sax et fanfanes civiles (1867); a Traité de composition musicale (in collaboration with Bisson, 1880); a collection of 'Air à danser' from Lully to Méhul, and a number of old operas and ballets in vocal score, in nine series, comprising in all sixty-two compositions, under the title of Chefs-d'œuvre classiques de l'opéra français. He was made librarian of the Opéra in 1873, and died in Paris, June 20, 1890. G. R.

LAKMÉ. Opéra-comique in three acts, libretto by MM. Gounod and Gille, music by Léo Delibes; produced in Paris, April 14, 1883; in London, Gaity Theatre, June 6, 1885.

LALANDE, Désiré, a distinguished oboe player, born in Paris in 1867, being the son of a well-known bassoon player. After studying for two and a half years at the Conservatoire he obtained his first important engagement under Lamoureux in that conductor's famous band. He came to England in 1886, joining the Hallé orchestra, and playing in Manchester for five years. He next joined the Scottish Orchestra when conducted by Henschel, and subsequently became a member of the Queen's Hall orchestra, with which organisation he played till his death in London from pneumonia, Nov. 8, 1904. It was during this latter part of his career that he may be said to have completely established his reputation as one of the most gifted instrumental players of his time, possessing, as he did, a beautiful tone, great powers of refined expression, and a perfect technique. He was also constantly in request for Cor Anglais solos.

N. G.

LALANDE, HENRIETTE-CLÉMENTINE

¹ This is the original order of her names; they were transposed to 'Anna Rosena' at the suggestion of Schumann, as being more euphonious. (See Dr. Annie Patterson's Life of Schumann.)
Méric, the daughter of Lamiraux-Lalande, the chief of a provincial operatic company, was born at Dunkerque in 1798. Having been taught music by her father, she soon developed a fresh and ringing voice, and was endowed with excellent memory and intelligence; but the only teaching she really had was in the music of the parts entrusted to her. She made her début with success in 1814 at Naples; Fétis heard her, and admired her as an actress of opéra-comique, at Donau in the following year. She continued to sing till 1822, with equal success, in the principal towns of France, and was then engaged at the Gymnase Dramatique at Paris, Elers having made an unsuccessful attempt to engage her for London. Clever enough to perceive, however, after hearing the singers at the Italian Opera, how utterly she was without the knowledge of the proper manner of producing her voice, she took lessons of Garcia, and made her first appearance, April 3, 1823, in 'Les Folies amoureuses,' a pasticcio arranged by Castil-Blaze. About this time she became the wife of M. Méric, a horn player at the Opéra Comique. Rejecting the offer of an engagement at the latter theatre, on Garcia's advice, she went to Italy, and received additional teaching from Bončchi and Banderali at Milan. After singing with increased éclat at Venice, Munich, Brescia, Cremona, Venice (again), and other Italian cities, she at length appeared in London during the season of 1830. 'She had been for six years reported to be one of the best singers of Italy—much had been expected of her. . . . She had been compared with the best of the best; but she arrived in England too late, and her place, moreover, had been filled by women of greater genius. She was a good musician, and sang with taste; but her voice, a soprano, ere she came had contracted a habit of trembling, in those days a novelty (would it had always remained so!), to which English ears were then averse. She gave little satisfaction' (Chorley). Mme. Méric sang, however, again in London in 1831. In Paris she pleased no better in these latter years, and at length retired, in 1833, as it is said, to Spain. She died in Paris, Sept. 7, 1867. A biography, with a portrait, of Mme. Méric-Lalande was published in the musical journal, Teatro della Fenice, Venice, 1826. LALANDE, MARIOL RICHARD DE, Surintendant de la Musique under Louis XIV. and XV., the best French writer of church music of his day, was born in Paris, Dec. 15, 1667, and died in the same city, June 18, 1726, having spent forty-five years in the service of the court. He was the fifteenth child of a tailor, and was at first a chorister of St. Germain l'Auxerrois, where he studied music under Chaperon, and learnt, almost entirely by himself, to play the violin, bass viol, and harpsichord. When, on the breaking of his voice at the age of fifteen, he was obliged to leave the maitrise, he thought himself of turning his violin-playing to account, and applied for admission into Lulli's orchestra. He was refused, and swore out of pique never to touch the violin again. He gave himself up to the organ, and made such progress that he was soon appointed organist in four different churches in Paris—St. Gervais, St. Jean, Petit St. Antoine, and at the church of the Jesuits, who confided to him the composition of symphonies and choruses for several of the tragedies performed at their college. He soon afterwards applied for the post of organist to the King, but though Lulli pronounced him to be the best of the competitors, he was refused on account of his youth. He was recommended by the Marchal de Noailles, to whose daughters he taught music, to Louis XIV., and the King chose him to superintend the musical education of the princesses, afterwards the Duchesse d'Orléans and Madame la Duchesse. Lalande was so successful in this capacity that the King appointed him master of his chamber music; and in 1683, on the retirement of Dumont and Robert from the superintendence of the chapel, he obtained one of the appointments, for it was decided to appoint four officers to serve for three months by turns. Eventually the offices were united in the person of Lalande, who had now received several pensions and the cordeau of the order of St. Michel. In 1684 the King had given him a wife, Anne Rebel, said to be the best singer of the court, had paid the expenses of the wedding, and given a dowry to the bride. In 1722, having lost his wife, and two gifted daughters, who died of smallpox in the same year as the Dauphin (1711), Lalande begged the King to allow him to remit three-quarters of his salary, thus returning to the original arrangement. He presented as his substitutes and assistants Campra, Bernier, and Gervais. As a reward for his disinterested conduct the Regent granted him a pension of 3000 livres. In the following year he married again, Mlle. de Cury, daughter of one of the Princesse de Conti's surgeons, and died three years later at the age of sixty-eight. Lalande, though infinitely superior to the composers of church music of his time—Goupiljlet, Minoret, etc.—cannot of course be compared to Handel and Bach, who were almost his contemporaries. The cause of his superiority over his immediate rivals was that he knew how to adapt to French tastes the forms of concerted church music hitherto confined to the Italian school, and his compositions, besides possessing real imagination, show that, like the musicians of Lulli's school, he gave special attention to declamation and to the proper agreement between words and music. He wrote no fewer than forty-two motets for choruses and orchestra for the chapel at Versailles, which were published most luxuriously at the King's expense. They are contained in twenty books, and are usually found bound in ten volumes. [A copy in seven
Lallo Rookh

LALLO ROOKH.

Moore's poem has been the basis of a number of musical compositions.

1. Spontini wrote introductory and incidental music for a set of tableaux-vivants in Berlin, Jan. 27, 1821; and in the following year, brought out

2. A regular opera, called 'Nurmahal,' to a libretto by Herklot in two acts, Berlin, May 27, 1822.

3. An opera by C. E. Horn, Dublin, 1822.

4. Opera in two acts ('Lallo Roukh'), words by Lucas and Carré, music by Félicien David, produced at the Opéra Comique, May 12, 1862.

5. An opera in two acts by Anton Rubinstein (name afterwards changed to 'Féromors'), produced at Dresden, March 1869.

6. Cantata, by Frederic Clay, produced at the Brighton Festival, 1877.

For operas, etc. on the subordinate poems of 'Lallo Rookh,' see PARADISE AND THE PERI, VEILED PROPHET.

LALO, EDOUARD VICTOR ANTOINE, born at Lille, Jan. 27, 1823, studied the violin at the Conservatoire of that town under an excellent German professor named Bäumann. When he came to Paris he played the viola in the Armingaud-Jacquart quartet, and began to compose with activity. He competed at the concours at the Théâtre Lyrique in 1867 with an opera, 'Fiesque,' which took a third place, and has since been printed and partly performed at the Concert National, 1873. The ballet music from this work, under the title of a Divertissement, was given with great success at the Concert Populaire, Dec. 8, 1872. Lalo next composed a violin concerto in F, played by Sarasate at the Concert National, Jan. 18, 1874 (and at the London Philharmonic Society in the following May), and a Symphonie Espagnole, for violin and orchestra, played by the same artist at the Concert Populaire, Feb. 7, 1875. It was produced in England at the Crystal Palace, March 30, 1878. After these two great successes, which gave Lalo a first-class position as a composer for the concert-room, he produced an Allegro Symphonique, the overture to his opera, 'Le Roi d'Ys,' a violoncello concerto, played by Fischer, a scherzo for orchestra (all performed in Paris), a Serenade and a Fantaisie Norvégienne for violin and orchestra, first given in Berlin. His 'Rhapsodie Norvégienne' and his 'Concerto Russe,' played by Marsick, were the last important works for the concert-room written before his grand ballet, 'Namouna,' performed at the Opéra, March 6, 1882. This work has something of a symphonic style, and is orchestrated in a manner far superior to that of many more popular ballets, but it was coldly received by the public. 'Namouna' was only given fifteen times, but when transferred to the concert-room in the form of a grand Orchestral Suite in five movements, it achieved the success it deserved. An andante, and two other movements from the same, arranged for violin and orchestra, were also received with favour at the Concerts Modernes, and a serenade, arranged for four stringed instruments, was also successful. After this reparation for his former failure, Lalo again set to work and orchestrated the whole of his 'Roi d'Ys,' of which the general plan had been sketched some five or six years before, and wrote a Symphony in G minor, performed at the Concert Lamoureux, Feb. 13, 1887, which was much praised by musicians. The opera was produced at the Opéra Comique, May 7, 1889, with well-deserved success. It was not heard in England till 1901, when it was produced at Covent Garden on July 17. Thus far we have only spoken of Lalo's orchestral compositions. An allegro for piano and violoncello, a sonata for the same, a serenade and chanson villageoise for violin and piano, a sonata in three movements for the same, a trio in A minor for piano and strings (given at Hallé's recital, June 15, 1888), a string quartet in E, a 'Fantaisie Ballet' for violin and orchestra, [a piano concerto in C minor, a charming 'Aubade' for ten instruments, wind and string; 'Néron,' pantomime (Théâtre de la Porte-Denis, Paris, March 28, 1891); 'La Jacquerie,' an opera in four acts (finished by A. Coquard, and produced at Monte Carlo, March 8, 1895)], and more than twenty songs, complete the list of works by one who gained a reputation both in...
Germany and France, though his dramatic work has received but tardy recognition. His talent was of an extremely individual kind, and was formed, not by the discipline of the Conservatoire, nor by the influence of professors, but by the direct study of such masters as Beethoven, Schubert, and Schumann, for whom he had a special predilection. His chief characteristics were the expressive grace of certain ideas, the piquancy of some of his themes, and, above all, the richness and skill of his orchestration. Laé was one of the most distinguished of French composers, and fully deserved the decoration of the Légion d'Honneur conferred upon him in July 1880. He died in Paris, April 22, 1892.

LAMAR, See Lipsius.

LAMB, BENJAMIN, organist of Eton College in the first quarter of the 18th century, and also verger of St. George's Chapel, Windsor, was the composer of some church music. An evening 'Cantate' service and four anthems by him are in the Tudway collection (Harl. MSS. 7341-12). He was also a composer of songs.

LAMBERT, GEORGE JACKSON, son of George Lambert, organist of Beverley Minster, was born at Beverley on Nov. 16, 1794. He studied under his father until he was sixteen, then in London under Samuel Thomas Lyon, and finally became a pupil of Dr. Crotch. In 1818 he succeeded his father at Beverley. His compositions include overtures, instrumental chamber music, organ fugues, pianoforte pieces, etc. In 1874 ill-health and deafness compelled him to relinquish his post and retire from active life. He died Jan. 24, 1880.

The two Lamberts successively held the office of organist of Beverley Minster for the long period of ninety-six years, the father for forty and the son for fifty-six years, and but for the latter's deafness would have held it for a century, a circumstance probably unparalleled.

LAMBERT, LUCIEN, French pianist and composer, born in Paris in 1859, began his musical studies with his father, and had a successful career as a pianoforte virtuoso in America and on the continent. On returning to Paris he worked with Massenet and Théodore Dubois, and produced 'Prométhée enchâiné,' a scène lyrique which gained the prize of the Institut (Conservatoire, April 19, 1885); 'Sire Olaf,' incidental music for a play by A. Alexandre, given at Lille in 1887 and in Paris in 1889; 'Broceliande,' a four act opera, Rosen, 1893, the overture to which became widely popular; 'Le Sphynx,' in four acts, Opéra Comique, Oct. 18, 1887; 'La Flamenc,' in four acts, at the Théâtre de la Gaîté, Paris, Oct. 30, 1903; two more operas, 'Pentécosta' and 'La sorcière' have not yet been given. In the concert-room, Lambert is represented by an ' vadante et fantastie tzigane,' for piano and orchestra, 'Tanger le soir,' a Moorish rhapsody for orchestra; and other things, most of which were heard for the first time at the 'Société nationale de musique.' He has also published songs, piano pieces, etc.

LAMBETH, HENRY ALBERT, born at Hardway, near Gosport, Jan. 16, 1822, studied for some time under Thomas Adams, went to Glasgow about 1853 as city organist, on the recommendation of Henry Smart, and in 1859 was appointed conductor of the Glasgow Choral Union. This post he held till 1880. In 1874 he formed a choir of from twenty to thirty selected voices, and in the department of Scotch music their concerts met with great success under the name of the Glasgow Select Choir. Lambeth left this society in 1878. Lambeth harmonised several of the best Scottish melodies in a most effective manner. He composed several songs and pianoforte pieces, also settings of Psalms 86 and 137, both of which were performed by the Glasgow Choral Union. He was organist and choir-master successively at St. Mary's Episcopal Church, and at Park Church. He died at Glasgow, June 27, 1895. He edited the Scottish Book of Praise with D. Bapte in 1876.

LAMENT. In Scottish and Irish folk music are melodies named as 'Lament' or 'Lamentations.' In Scottish music these were mainly confined to the Highlands, and were generally purely bagpipe tunes, consisting of an air, sometimes set vocally, with a number of more or less irregular variations or additional passages. Each of the clans or important families had its particular 'lament,' as well as its 'gathering,' and the former was played on occasions of death or calamity. Many of the laments are of wild and pathetic beauty: 'McGregor a ruaro' and 'Mackrimmon's lament' are among those which have become more widely familiar.

The latter, Sir Walter Scott says, 'is but too well known from its being the strain which the emigrants from the West Highlands and Isles usually take leave of their native shore.' The burden of the original Gaelic words is 'we return no more.' Of the same class is 'Lochaber no more' (q. v.) which is a true 'Lament' to the Highlander. The melody in one of its earlier forms is entitled 'Limerick's Lamentation' or 'Irish Lamentation,' and there seems to be but little doubt that the song has been written to an air then generally recognised as a 'Lamentation.' For examples of the Gaelic laments the reader is referred to Patrick McDonald's Highland Vocal Airs, 1783; Albyn's Anthology, 1816-18; and other collections of Highland airs.

Bunting supplies several current in Ireland, and in the Aria di Camera, cir. 1727, are some of the earliest in print, viz. 'Limerick's,' 'Irish,' 'Scott,' 'Lorn Galloway's,' and 'MacDonagh's' Lamentations.
LAMENTATIONS

Hieremiae. On the Thursday, Friday, and Saturday, in Holy Week the three First Lessons appointed in the Roman Breviary for the Office of Mattins (commonly called Tenebrae) are taken from the Lamentations of Jeremiah; and the extraordinary beauty of the music to which they are sung, in the Sistine Chapel, and other large Churches, contributes not a little to the impressive character of the service. [See Tenebrae.]

It is impossible to trace to its origin the Plain-song melody to which the Lamentations were anciently adapted. The most celebrated version—though not, perhaps, the purest—is that printed by Guidetti, in his 'Directorium Chori,' in 1582. The best modern editions are those of Solesmes, e.g. the Officium ultimae tridui majoris hebdomadis; in which the Lessons are given, at full length, in Gregorian notation, although the music is really no more than a simple chant in the Sixth Mode, repeated, almost notation, not only to each separate verse of the Sacred Text, but even to the prefatory 'Incipit Lamentatio Hieremiae Prophetae,' and the names of the Hebrew letters with which the several paragraphs are introduced.

In-cipit Lamentatio Hieremiae prophetae. A. lephest.

Early in the 16th century, the use of the Plain-song Lamentations was discontinued, in the Pontifical Chapel, to make room for a polyphonic setting, by Elizario Genet—more commonly known by his Italian cognome, Carpentraso—who was attached to the papal court in 1508-18. These compositions remained in constant use, till the year 1587, when Pope Sixtus V. ordained that the First Lamentation for each day should be adapted to some kind of polyphonic music better fitted to express the mournful character of the words than that of Carpentraso; and, that the Second and Third Lessons should be sung, by a single Soprano, to the old Plain-song melody as revised by Guidetti. The disuse of Carpentraso's time-honoured harmonies gave great offence to the Choir; but, the Pope's command being absolute, Palestrina composed some music to the First Lamentation for Good Friday, in a manner so impressive, that all opposition was at once silenced; and the Pope, himself, on leaving the Chapel, said, that he hoped, in the following year, to hear the other two First Lessons sung in exactly the same style. The expression of this wish was, of course, a command: and, so understanding it, Palestrina produced, in Jan. 1588, a volume, containing a complete set of the nine Lamentations—three, for each of the three days—which were printed, the same year, by Gardian, under the title of Lamentationum liber primus. The work was prefixed by a formal dedication to the Supreme Pontiff, who, though he still adhered to his resolution of having the Second and Third Lessons sung always in Plain-song; expressed great pleasure in accepting it: and in 1589 it was reprinted, at Venice, in 8vo, by Girolamo Scoto.

More complex in construction than the great composer's 'Improperia,' though infinitely less so than his masses and motets, these matchless 'Lamentations' are written, throughout, in the devout and impressive style which produces so profound an effect in the first-named work, and always with marked attention to the mournful spirit of the words. They do not, like the Plain-song rendering, embrace the entire text: but, after a certain number of verses, pause on the final chord of a prolonged cadence, and then pass on to the Strophe, Jerusalem, Jerusalem, with which each of the nine Lessons concludes. In the single Lesson for Good Friday—which, though not included in the original printed copy, is, undoubtedly, the most beautiful of all—the opening verses are sung by two sopranos, an alto, and a tenor; a bass being added, in the concluding strophe, with wonderful effect. A similar arrangement is followed in the third Lamentation for the same day: but the others are for four voices only, and most of them with a Tenor in the lowest place; while in all, without exception, the introductory sentences, 'Incipit Lamentatio,' or, 'De Lamentatione,' as well as the names of the Hebrew initial letters, are set to harmonies of infinite richness and beauty—

Feria VI. in Parasceve. Lectio I.

Centus 1.

Beth. Beth. Beth.

Since the death of Palestrina, the manner of singing the Lamentations in the Pontifical Chapel has undergone no very serious change. In accordance with the injunction of Pope Sixtus V., the Second and Third Lessons for each day have always been sung in Plain-song: generally, by a single soprano; but, sometimes, by two. The perfection of whose unisonous performance has constantly caused
it to be mistaken for that of a single voice. Until the year 1640, the First Lesson for each day was sung from Palestrina’s printed volume. In that year, the single unpublished Lesson for Good Friday, composed in 1587, was restored to its place, and the use of the published one discontinued; while a new composition, by Gregorio Allegri, was substituted for Palestrina’s Lesson for Holy Saturday. The restoration of the MS. work can only be regarded as an inestimable gain. Allegri’s work will not bear comparison with that which it displaced; though it is a composition of the highest order of merit, abounding in beautiful combinations, and written with a true appreciation of the spirit of the text. It opens as follows:—

It will be seen that Allegri has here not only adopted the tonality in which nearly all Palestrina’s Lamentations are written—the Thirteenth Mode, transposed—but has also insensibly fallen very much into the great master’s method of treatment. Unhappily, the same praise cannot be awarded to another work, which he produced in 1651, a few months only before his death, and which, though it bears but too plain traces of his failing discernment, was accepted by the College, as a mark of respect to the dying composer, and retained in use until the Pontificate of Benedict XIII. This Pontiff inaugurated a radical change, by decreeing that the First Lessons should no longer be sung in this shortened form, but, with the entire text set to music. To meet his desire, three Lamentations, by modern writers, were submitted for approval, but unanimously rejected by the College, who commissioned Giovanni Biordi to add to the compositions of Palestrina and Allegri whatever was necessary to complete the text. Biordi was, perhaps, as well fitted as any man then living to undertake this difficult task: but it is to be regretted that he did not more carefully abstain from the use of certain forbidden intervals, and unlicensed chords. At the word, lacrymis, in the Lesson for Good Friday, he has made the first soprano move a chromatic semitone, thereby producing, with the other parts, the chord of the augmented sixth. No doubt, his object in doing this was to intensify the expression of the word; but, neither the semitone, nor the chord, would have been tolerated by Palestrina. Again, in the Lesson for Holy Saturday, he has used the diminished fourth in disjunct motion, and broken many other time-honoured rules. Nevertheless, his work—which is, in many respects, extremely good—was unhesitatingly accepted, and retained in use till the year 1731, when Pope Clement XII. restored the Lamentations to their original shortened form. In this form they were suffered to remain, till 1815, when the indefatigable Baini restored Palestrina’s printed Lamentation for the first day, retaining the MS. of 1587 for the second, and Allegri’s really beautiful composition for the third; while the last-named composer’s inferior work was suffered to fall into disuse—an arrangement which left little to be desired, and which has not, we believe, been followed by any further change.

Besides the printed volume already mentioned, Palestrina composed two other entire sets of Lamentations, which, though written in his best and purest style, remained, for two centuries and a half, unpublished. One of them was prepared, as early as the year 1560, for the use of the Lateran Basilica, where the original MS. is still preserved. The other reaches us only through the medium of a MS. in the Alteanups Ortlubonti collection, now in the Vatican library. In the year 1842, Alferi printed the three sets, entire, in the fourth volume of his Raccolta di Musica Sacra, together with the single Lamentation for Good Friday, to which he appended Biordi’s additional verses, without, however, pointing out the place where Palestrina’s work ends, and Biordi’s begins. The three single Lamentations, sung in the Pontifical Chapel, are given, with Biordi’s now useless additions, in a volume of the same editor’s Excerpta, published in 1840; and, without Biordi’s verses, in Choron’s Collection des pièces de Musique Religieuse. Both these editions are now out of print, and difficult to obtain; but a fine reprint of the nine pieces contained in the original Lamentationum liber primus will be found in Proske’s Musica Divina, vol. iv. Mr. Capes, in his Selectior, from the works of Palestrina (Novello), has given the first Lamentation in Coenà Domini, and the first in Sabb. Saneto, from the lst book (1586), and has introduced between them the single Lesson for Good Friday (1587) already mentioned.

Though the Lamentations of Carpentraso,

---

1 Alferi has published two editions of this work; and, in both, he has inserted Biordi’s additional verses, without mentioning any sign or signal that afforded by external evidence to indicate that they are not the genuine work of Palestrina himself. We mention this circumstance, in order to show the danger of trusting in doubtful cases, to the authority of any modern edition whatever. Alferi’s volumes may, some day, lead to the belief that Palestrina permitted the use of the chromatic semitone in his Ecclesiastical music.
Palestrina, and Allegri, are the only ones that have ever been actually used in the Pontifical Chapel, many others have been produced by composers of no small reputation. As early as the year 1506, Ottaviano dei Petrucci published, at Venice, two volumes, containing settings by Johannes Tinctoris, Yaer, De Orto, Francesco (d'An) da Venzia, Johannes de Quadris, Agricola, Bartolomeo Tromboncino, and Gaspar and Erasmus Lapicida. All these works were given to the world before that of Carpentrasso, which, with many more of his compositions, was first printed, at Avignon, by Johannes Channay, in 1582. But the richest collection extant is that entitled *Missimeae ac sacratissimae Lamentationes Jeremiæ Prophetæae*, printed, in Paris, by A. le Roy and Robert Ballard, in 1557, and containing, besides Carpentrasso's *canto d'opera*, some extremely fine examples by De la Rue, Fevin, Arcadelt, Festa, and Claudin le Jeune.

‘Lamentations’ by English composers are exceedingly rare: hence, quite an exceptional interest is attached to a set of six, for five voices, by R. Whyte, discovered by Dean Aldrich, and preserved, in MS., in the Library of Christ Church, Oxford. [See Whyte, Robert.]

LAMOND, Frederick A., born in Glasgow, Jan. 28, 1868, was at first a pupil of his brother, David Lamond, and in 1880 obtained the post of organist at Lauriston parish church. He studied the violin with H. C. Cooper, and in 1882 went to Frankfort to the Raff Conservatorium, where Heermann was his master for the violin, Max Schwarz for the piano, and Urspruch for composition. Here he laid the foundation of his wide musical culture, and his pianoforte studies were completed under Von Bülow and Liszt. His first important appearance as a mature pianist took place at Berlin, Nov. 17, 1885, when he made a great success, and appeared at Vienna soon afterwards. His first piano recital in Great Britain took place in Glasgow, March 8, 1886, and soon afterwards he gave a set of recitals at Princes Hall, London. For the fourth of these, on April 15, St. James's Hall was taken, and Liszt's presence set the seal on the young player's reputation. The recitals showed the depth of Lamond's interpretations of Beethoven, a master in whom he takes especial delight. During the next few years he played much in Germany, but appeared occasionally in London. On April 5, 1890, he played Saint-Saëns's C minor concerto at the Crystal Palace, when his own symphony in A was given (it was first played at the Glasgow Choral Union, Dec. 28, 1889). His first appearance at the Philharmonic Society took place on May 14, 1891, when he played Brahms's second concerto with great skill. The same society performed his overture, 'Aus dem Schottischen Hochlande,' on March 7, 1895. In 1896 Lamond played in Russia, and in 1897 gave a series of recitals in London, at one of which a couple of piano pieces of his own were played. Since that time he has made occasional appearances in England, winning always the esteem of musicians, even though the rarity of his appearances prevents his taking the high place he deserves among the best contemporary pianists. Among his other compositions may be mentioned a trio for piano and strings, and a sonata, op. 2, for piano and violoncello. (Brit. Mus. Biog.)

LAMOUREUX, Charles, born at Bordeaux, Sept. 21, 1834, began his violin studies under Beaudoin, and was then sent to the Paris Conservatoire, where he was in Girard's class. He obtained in 1852 a second *accessit* for the violin, the second prize in the following year, and the first in 1854. He also studied harmony under Tolbecque, and attended the counterpoint course of Lefebvre at the Conservatoire, where he finished his theoretical studies under the famous organist Alexis Chanut. He was solo violinist in the Gymnase orchestra (1850), and afterwards joined that of the Opera, where he played for many years. He was admitted a member of the Société des Concerts du Conservatoire, and, like all the members of these orchestras, gave private lessons. But these insignificant posts were not sufficient for the activity of Lamoureux, who dreamt of great undertakings in the musical art of France. Together with Colonne, Adam, and A. Pilet, he founded in 1860 a society for chamber music of a severe character, in which he showed a taste for new works by producing compositions hitherto unnoticed. He had also the honour of first performing in France Brahms's sextets. He was not content with this, for having travelled in Germany and England, he was anxious to organise performances on a large scale, such as he had heard under Hiller and Costa, of the masterpieces of Handel, Bach, and Mendelssohn. After several preliminary trials at the Salle Pleyel, where he performed among other things the 'Strid zwischen Phæbus und Pan' of Bach, he succeeded by his own energy and resources in founding the 'Société de l'Harmocie sacrée' on the model of the Sacred Harmonic Society of London. The first festival was given at the Cirque des Champs Elysées, Dec. 19, 1873. The success of an admirable performance of the 'Messiah' was such that amateurs came in crowds to the following performances. Lamoureux then produced Bach's Matthew Passion, March 31, 1874, and 'Judas Maccabæus,' Nov. 19, 1874. Not content with confining himself to well-known masterpieces, he produced Massenet's 'Eve,' then unpublished, March 18, 1875. These great performances showed that Lamoureux was a conductor of great merit, who succeeded in obtaining from his orchestra a matchless precision of attack and regard to expression. When
Carvalho became director of the Opera Comique in 1876, he offered Lamoureux the post of conductor, but in less than a year the latter resigned, owing to some difficulties arising out of the rehearsal of Chausson's 'Bathyle' in May 1877. In December of the same year Lamoureux was appointed conductor of the Opera by Vaucorbeil, and gave up the sub-conductorship of the Concerts du Conservatoire, which he had held since 1872. In 1878 he was decorated with the Légion d'Honneur, and in the following year he resigned his post at the Opera on account of a dispute with Vaucorbeil as to the tempo of one of the movements in 'Don Juan.' From that time he determined to be self-dependent, and after having carefully prepared the undertaking, he founded on Oct. 23, 1881, the Nouveaux Concerts, called the Concerts Lamoureux, which were held for some years in the theatre of the Château d'Eau, and afterwards at the Eden Théâtre (1885) and the Cirque des Champs Elysées (1887), where their success is constantly on the increase. In the year of their foundation, he appeared as a conductor in London, giving two concerts in St. James's Hall, on March 15 and 22, 1881. Not only did Lamoureux develop as a conductor a precision and firmness, a care for the perfection of the smallest details, without excluding passion and warmth of expression; he also gave a welcome to the works of French composers of the new school, such as Reyer, Lalo, d'Indy, and Chabrier, and succeeded in placing himself at the head of the Wagnerian movement in France. He gave excellent renderings of selections from Wagner's operas to a public that had been too long deprived of these fine compositions. The first Act of 'Lohengrin,' Acts I. and II. of 'Tristan,' and Act I. of 'Die Walküre' were given in their entirety, and excerpts from the other works have been heard. Encouraged by the warmth of the applause and the moral support of his audience, Lamoureux decided to give a performance in a Paris theatre of 'Lohengrin,' a work unknown in France, less by reason of patriotic susceptibilities than of commercial intrigues. After a whole year of preparation a perfect performance was given at the Eden Théâtre (May 3, 1887), which was not repeated. It is true that it took place at a time of unfortunate political relations; but if Lamoureux had to give in, it was because he received no support from the ministry with which he believed himself to be in perfect agreement. Those who protested against Wagner used the word patriotism as a pretext. The violent manifestations were, however, directed by unseen agents, and governed by far meaner motives, among which the love of money was supreme. [He lived to see the ultimate triumph of Wagner in Paris. In April and Nov. 1886, in March and Nov. 1897, and in the spring of 1898, he gave concerts with his orchestra in the Queen's Hall, London; and in May 1899 he and his band were chief attraction of a 'London Musical Festival' in the Queen's Hall. He died in Paris, Dec. 21, 1899, being succeeded as conductor by his son-in-law, Camille Chevillard.] A. J.

LAMPE, JOHN FREDERICK, a native of Saxony, born 1703, came to England about 1725, and was engaged as a bassoon player at the Opera. In 1732 he composed the music for Carey's 'Amelia,' produced March 13. In 1737 he published A Plain and Compositions Method of teaching Thorough-Bass, etc., and also furnished the music for Carey's burlesque opera 'The Dragon of Wantley,' which met with remarkable success. It is an admirable example of the true burlesque, and is said to have been an especial favourite of Handel's. In 1738 he composed music for the sequel, 'Margery; or, A Worse Pлагe than the Dragon.' In 1740 he published The Art of Music, and in 1741 composed music for the masque of 'The Sham Conjurer.' In 1745 he composed 'Pyramids and Thsibe, a mock opera, the words taken from Shakspeare.' [A composition to celebrate the repression of the Stuart rebellion of 1745 was performed in the Chapel Royal, Saxony, Oct. 9, 1746, and published.] Lampe was the composer of many single songs, several of which appeared in collections, as 'Wit musicaly embellish'd, a Collection of Forty-two new English Ballads'; 'The Ladies Amusement' and 'Lyra Britannica.' Many songs by him were included in 'The Vocal Musical Mask,' 'The Musical Miscallany,' etc. Lampe married Isabella, daughter of Charles Young, and sister of Mrs. Arne; she was a favourite singer, both on the stage and in the concert-room. In 1748 he went to Dublin, and in 1750 to Edinburgh, where he died, July 25, 1751, leaving behind him the reputation of an accomplished musician and excellent man. He was buried on the 28th in the Canongate Churchyard. Charles Wesley, whose hymns he set to music in Hymns on the Great Festivals, etc. (1746), often mentions him with great affection, and wrote a hymn on his death—'Tis done! the Sovereign Will's obeyed!' Charles John Frederick, his son, succeeded his grandfather, Charles Young, as organist of Allhallows, Barking, in 1758, and held the appointment until 1769. A catch by him is in a 'Second Collection of Catches' (Welcker, 1766).

LAMPERTI, FRANCESCO, teacher of singing. Born at Savona, March 11, 1813. His father was an advocate, and his mother a prima-donna of considerable repute. As a child he showed great talent for music, and was placed under Pietro Rizzi of Lodi. In 1820 he entered the Conservatorio at Milan, and there studied the pianoforte and harmony under Sommaruga d'Appiano and Pietro Ray. Devoting himself
afterwards to the teaching of singing, he became associated with Masini in the direction of the Teatro Filodrammatico at Lodi. Selecting many of the members of his company from the natives of the surrounding country, he educated and brought out at his theatre many famous singers, such as La Tiberini, whose reputation otherwise would never have extended beyond their native village.

Attracted by their success pupils flocked to him from Bergamo, Milan, and other parts of Europe, and he trained many of the most distinguished operatic vocalists; amongst whom may be named Jeanne Sophie Löve, Crucelli, Grua, Brambilla, Hayes, Artôt, Tiberini, La Grange, and others equally distinguished.

Appointed in 1850 by the Austrian government professor of singing to the Conservatorio at Milan, he brought out amongst others Angelica Moro, Paganini, Galli, Risarelli, Angeloni, Peralta; and as private pupils, Albanì, Sembrich, Stoltz, Waldmann, Alighieri, Campanini, Vialletti, Dereeis, Mariani, Palermi, Everardi, and Shakespeare. After twenty-five years' service he retired from the Conservatorio upon a pension in 1875, and henceforward devoted himself entirely to private pupils.

A friend of Rubini and Pasta, and associated with the great singers of the past, Lamperti followed the method of the old Italian school of singing, instituted by Farinelli and taught by Crescentini, Velluti, Marchesi, and Romani. Basing his teaching upon the study of respiration, the taking and retention of the breath by means of the abdominal muscles alone, and the just emission of the voice, he thoroughly grounded his pupils in the production of pure tone. His memory and his intuition were alike remarkable, and enabled him to adapt to each of his pupils such readings of the music and cadenzas as are warranted by the traditions of the greatest singers and are best adapted to their powers. Mme. Albanì, writing in 1875 of his published treatise on singing, says: 'To say that I appreciate the work, it is sufficient for me to state that I am a pupil of the Maestro Lamperti, and that I owe to him and to his method the true art of singing, so little known in these days.'

He was Commendatore and Cavaliere of the order of the Crown of Italy, and a member of many academies and foreign orders. He wrote several series of vocal studies and a treatise on the art of singing (Ricordi & Co.), which has been translated into English by one of his pupils. He died at Como, May 1, 1892.

J. C. C.

LAMPUGNANI, Giovanni Battista, born at Milan about 1700, came to London in the autumn of 1743 as conductor and composer to the opera in the place of Galuppi. In Nov. of that year his 'Roxana' was given, on Jan. 3, 1744 his 'Alfonso,' on April 28 his 'Aloeste,' and in 1755 his 'Siroe.' Burney, in the fourth volume of his History, refers to these successive operas, and to various pasticcios to which he contributed, in terms which imply that his music was considered of very light, flimsy quality. He was a clever craftsman in the concoction of the pasticcios that were in fashion at the time, and his recitative was unusually expressive. In many of his pasticcios Hasse collaborated; and after his return to Italy, where he lived at Milan and held the post of maestro al cembalo in the theatre from 1779 until 1879, he seems to have written two more operas, 'Semiramide,' given at Milan in 1762 (the score printed by Walsh), and 'L'Amore contadino,' given at Lodi in 1766 (score in the Fitzwilliam Museum, Cambridge). His name is not found after 1789. (Quellen-Lexikon, etc.)

LANDI, Camilla, born 1866 at Geneva, of Milanese parents, both of them singers, from whom she received her instruction in singing. She was taught the pianoforte by Buonamici of Florence. On Dec. 8, 1884, she made her début at a concert given by Servais at the Sala Filarmonica, Florence, and she made a very favourable impression in songs of Tosti and Marchetti. From 1886 to 1892 she lived in Paris, and made a great success at the Larmoureuex Concerts, and at Rouen, Bordeaux, etc. On Oct. 1, 1888, she played for one night at the Opéra, Paris, as Amneris in 'Aïda'; and on June 5, 1890, at the Odéon as Ursula on the production in Paris of Berlioz's 'Béatrice et Bénédict' by the Société des Grandes Auditions. On that and subsequent evenings the success of the performance was her singing with Mlle. Levasseur (Hero) of the well-known Duo Nocturne. 'Vous
LANDOLFI

soupiré, Madame.’ On Nov. 10, 1892, she made her début in this country, under Hallé at Manchester, and became an immediate favourite there at subsequent concerts under him in that city and elsewhere. On Feb. 22, 1883, under Hallé, she made her début at an orchestral concert at St. James’s Hall, when she sang ‘La Captive’ of Berlioz. On March 25, at the Crystal Palace, she confirmed the favourable impression she had made, and later in the autumn she sang at the Bristol Festival. For the next few years she lived in London, where her mother had established herself as a teacher, and became a great favourite at the above concerts, the Philharmonic, Ballad Concerts, and elsewhere. In 1897 and 1898, announced as from London, Mlle. Landi sang in Germany and Austria-Hungary, with the greatest success, her singing of Handel’s ‘Ombra mai fu’ from ‘Serse’ being particularly appreciated. Her German engagements were principally at Berlin, her mother having settled for the time at Leipzig, where she had made her German début. In 1899 she sang in Holland, Belgium, Russia, and Poland, and in 1900 again in Germany, etc. In 1901 and 1905 she appeared in London, giving vocal recitals at the Bechstein Hall and elsewhere. The voice of Mlle. Landi is of large compass, from the low d to &quot;e&quot;; its quality is of infinite charm. She is the possessor of that personal magnetism which is of paramount importance for the modern lieder. She has a very large repertory of old Italian airs, and songs of Bach, Handel, Gluck, Schubert, Schumann, Brahms, Franz, Tchaikovsky, Berlioz, as well as many modern writers. She often accompanies herself at concerts, being an excellent pianist. She is a proficient linguist, and sings in French, and German, besides her native Italian, with the greatest ease. At the present time, Mlle. Landi lives in her native town, Geneva.

A. C.

LANDOLFI, CARLO FERDINANDO (LANDOLPHI), a reputable violin-maker of Milan, where he lived in the Street of St. Margaret, 1759-60. He lived in an age when it had become expedient to copy rather than to invent. He occasionally copied Joseph Guarnerius so closely as to deceive experienced judges; and many of his works consequently cut a figure in the world even above their high intrinsic merits. Landolfi’s patterns, in the midst of much excellence, exhibit that occasional adulteration which too surely betrays the copyist; and his varnish is less solid, and possesses more of the quality known as ‘sugariness,’ than the makers of the golden age. Often it is thin and hard, especially when yellow in colour. Many red instruments, however, exist, which are covered with a highly transparent varnish; and these are the favourites. The Landolfi violoncellos are especially striking in quality and appearance, and are in greater demand than the violins. Good specimens realised from £50 to £50; common and undersized ones may be bought cheaper.

E. J. P.

LANDSEBERG, Ludwig, a German musician, native of Breslau, who went to Rome and remained there for twenty-four years, teaching the piano and amassing a wonderful collection of music, both printed and MS. On his death, at Rome, May 6, 1858, his library was taken, part to Berlin and part to Breslau, and a catalogue of the ancient portion was printed (Berlin, 1859, imprime chez Ernst Kuhn)—whether the whole or a part, does not appear. It contains compositions by more than 150 musicians of the old Italian and Flemish schools, down to Casali. M. Fétis, however, who had received a MS. catalogue of the collection from Landseberg during his life, insists upon the fact that many of the most important works have disappeared. The catalogue itself does not appear to be any longer in the Fétis Library, which is now at Brussels.

G.

LANG, BENJAMIN JOHNSON, an American pianist, conductor, organist and teacher, was born Dec. 28, 1837, in Salem, Mass. His father was a well-known teacher of the pianoforte in that city, and he began his studies under him, continuing them under Francis G. Hill of Boston. By the time he was fifteen years old he held a post as organist of a Boston church. In 1855 he went to Europe to study composition in Berlin and elsewhere in Germany, and pianoforte with Alfred Jaell; he also had some intercourse with Liszt. On his return to Boston he made his first public appearance as a pianist in 1858. About this time he came under the influence of Gustav Satter who was then playing in the United States. A sudden illness of his father’s compelled Mr. Lang to take over the former’s pupils in 1852, and he has continued to give instruction with uninterrupted activity ever since. He has also been almost constantly in service as an organist during the same period, occupying posts successively in a number of the most prominent of Boston churches. He was appointed organist of the Handel and Haydn Society in 1859, and continued to serve in that capacity till 1895. His first appearance as a conductor was made in Boston in May 1882, when he gave the first performance in that city of Mendelssohn’s ‘Walpurgisnacht.’ The next year he shared with Carl Zerrahn the direction of the music at the jubilee concert in honour of President Lincoln’s Emancipation Proclamation, and from that time forth he figured more and more extensively in Boston as a leader. He was appointed conductor of the Apollo Club, a men’s singing society, at its formation in 1871, and remained as such until 1901. He has also been the conductor of the Cecilia, a mixed chorus, since its establishment in 1874, and was conductor of the Handel and Haydn Society for two seasons, 1895-97. He has given several complete performances of ‘Parish’ in concert form.

In the early sixties Mr. Lang became more
and more prominent as a concert pianist in Boston, playing frequently at the concerts of the Harvard Musical Association, at chamber concerts of his own, and with the Mendelssohn Quintette Club. As pianist as well as conductor he has been noted for his energy in bringing new works into notice; in fact, in all the departments of musical activity his indefatigable industry and aggressive personality have made him one of the most potent forces working for progress in Boston; outside of the New England capital and its immediate environs, however, his influence has been little felt. His labours as a composer have been less important than as an interpreter; yet he has written an oratorio, 'David,' symphonies, overtures, chamber music, pieces for the pianoforte, church music and many songs, most of which compositions remain in manuscript. In 1903 Yale University conferred on him the degree of Master of Arts. (See Boston Musical Societies.)

His daughter, Margaret Ruthven, was born in Boston, Nov. 27, 1867. She began the study of the pianoforte under one of her father's pupils, and later continued it under his own direction. She also began the study of the violin with Louis Schmidt in Boston, and continued it under Dresdener and Abel in Munich in 1886-87. While in Munich she studied composition with Victor Ginth. Returning to America she went to George W. Chadwick for composition and orchestration. Among her works in the larger forms are a 'Dramatic Overture,' Op. 12, performed by the Boston Symphony Orchestra in 1893; an overture, 'Witchis,' Op. 10, performed in Chicago by Theodore Thomas in the same year. These, and a third overture, 'Totila,' Op. 23, are still in MS. She has also written 'Sappho's Prayer to Aphrodite,' an aria for contralto and orchestra, performed in New York in 1896; 'Armida' for soprano solo and orchestra, performed at a Boston Symphony concert in 1896; 'Phoebus,' aria for baritone; a cantata for solos, chorus, and orchestra; a string quartet; several works for violin and pianoforte, and a number of songs and pianoforte pieces which have been published.

R. A.

LANG. A family of German musicians originally from Mannheim, but settling at Munich, and mentioned here for the sake of Josephine Lang (the second of that name), born at Munich, March 14, 1815, a young lady of very remarkable musical gifts and personality, who attracted the notice of Mendelssohn when he passed through Munich in 1839 and 1841. There is an enthusiastic account of 'die kleine Lang' in his letter of Oct. 6, 1831; in writing to Bärmann (July 7 and Sept. 27, 1834), he inquires for her, and in a letter, seven years later (Dec. 15, 1841), to Professor C. F. Köstlin of Tübingen, to whom she was married in 1842, he shows how deeply her image had impressed itself on his susceptible heart. She published several books of songs (up to Op. 38), which from the reviews in the Allg. mus. Zeitung, appear to be full of imagination, and well worthy of the warm praise bestowed on them by Mendelssohn in the letters just mentioned. Hiller tells the story of her life at length in his Tonleben (II. 116), and selects her songs, opp. 12 and 14, as the best. She died at Tübingen, Dec. 2, 1856. Connected with the same family at an earlier date was REUTSCHIUS LANG, a singer whose name was originally Hitzelburg, born at Wurzburg, 1798, educated at Munich by Winter, Cannabich, and Vogel, and appointed chamber singer at the Bavarian Court. When Napoleon I. was at Munich in 1806 she sang before him in Winter's 'Interrupted Sacrifice' and Mozart's 'Don Giovanni,' and so pleased him that he is said to have urged her to come to Paris (Mendel). She, however, remained in Munich, and married Theobald Lang, a violinist in the Court band. In 1812 or 1813 she was at Vienna, and Beethoven wrote in her album a song 'An die Geliebte,' to Stoll's words, 'O dass ich dir vom stillen Anges,' which was published about 1840 in a collection called 'Das singende Deutschland.' It is his second version of the song—the former one being dated by himself December 1811, and having been published in 1814. See Netzebohm's Thematischer Catalogue, p. 183. c.

LANGDON, Richard, Mus.B., grandson of Rev. Tobias Langdon, priest-vicar of Exeter Cathedral, graduated as Mus.Bac. at Oxford in 1761. In 1758 he received the appointments of organist and sub-chanter of Exeter Cathedral, but resigned them in 1777, when he became organist of Ely Cathedral. This post he held only for a few months, being appointed to Bristol Cathedral in 1778. He quitted Bristol in 1782 to become organist of Armagh Cathedral, a post he resigned in 1794. In 1774 he published 'Divine Harmony, a Collection, in score, of Psalms and Anthems.' His published compositions include 'Twelve Glees,' 1770, two books of songs, and some canzonets. Two glees and a catch by him are contained in Warren's 'Vocal Harmony.' He died at Exeter, Sept. 8, 1803. Langdon in F is still a favourite double clant.

W. P. H.

LANGE, or LANGIUS, Hieronymus Gregor, born at Havelberg in the Mark Brandenburg about the middle of the 16th century, obtained in 1574 the post of school-cantor at Frankfort on the Oder, but becoming paralysed in his hands and feet he removed to Breslau in 1583, where he was received into a charitable institution, and in spite of his infirmity continued to devote himself to musical composition till his death in 1587. He was highly esteemed as a musician in his own time and for some time afterwards. Lange and Lechner were thought to be no
unworthy compeers of Lasius. Various friends, citizens of Breslan, encouraged and helped him in the publication of his works, which, however, are not numerous. There are two Books of 'Cantiones Sacrae,' published 1586 and 1584 respectively, containing thirty-five Latin motets for four, five, six, eight, and ten voices; and two books of Deutsche Lieder, 1584, 1586, containing forty German secular songs for three voices. Besides these, there are only a few occasional compositions published separately, chiefly 'Epithalamia' or wedding-songs in the form of motets, the composition of which was no doubt a source of income to Lutheran Cantors of former days. The Deutsche Lieder for three voices were frequently reprinted, and in 1615 Christoph Demantius rearranged them for five voices. Although highly thought of in their time, Eitner says, these songs are less attractive than those of Regnart, being somewhat stiff and wanting in melody. The rearrangement by Demantius is of greater merit. But Lange's Latin motets stand upon a higher level. In 1899 Reinhold Starke edited for the Gesellschaft für Musikforschung a selection of twenty-four of these motets (Publikation, Jahrgang 29), among which are several very interesting numbers. 'Vae misero mihi,' with its second part, 'O vos omnes qui transitis,' is very remarkable, on account of its unusual chromatic modulations. A motet, 'Media vita,' composed on the occasion of the death of the General Superintendent, Museulius, one of Lange's chief Frankfort patrons, the editor considers as being quite in the mood of Sebastian Bach. These motets must have enjoyed considerable favour, as some of them were also transcribed for the lute. Besides the published works Starke enumerates a considerable number of works which have remained in MS., among which are two masses and thirty other Latin motets, and twenty German songs for four and five voices, partly sacred. See his Monograph on Lange contributed to the Monatshefte für Musikwissenschaft, 1899, pp. 101-122. J. R. M.

LANGÉ, DE, an eminent Dutch family of musicians and organists; the father, Samuel, born June 9, 1811, died May 15, 1884, at Rotterdam, was organist of the church of St. Lawrence there, and an eminent teacher, as well as a composer of pieces for the organ. He was the teacher of his elder son, Samuel, who was born at Rotterdam, Feb. 22, 1840, and studied with Verhulst, eventually going to Vienna for further instruction from A. Winterberger. After travelling as a virtuoso in Galicia in 1858-59, he settled at Lemberg for four years, and in 1863 was appointed organist at Rotterdam, and given a teaching appointment in the music school of the Maatschappij tot bevordering van Toonkunst, making occasional concert-tours in Switzerland, Germany, France, etc. From 1874 to 1876 he taught at the music school at Basle, and in 1877 was called to Cologne to teach in the Conservatorium. While there he directed the Kolner Mannergesangverein and the choir of the Girzenich concerts. In 1885 he went to the Hague as rector of the Oratorio society, and remained there until 1893, when he went to Stuttgart as substitute for Inmanuel Ensat, on whose death in 1894 he became professor of the organ and counterpoint in the Conservatorium. Various choral societies took advantage of his residence in Stuttgart, and engaged him as conductor. In 1900 he was appointed director of the Conservatorium. His compositions include eight organ sonatas, a piano concerto, three quartets, a trio, a quintet, four sonatas for violin and two for violoncello, a concertstück for violoncello, and many part-songs for male voices, besides three symphonies, and an oratorio, 'Moses,' performed while he was at the Hague.

His brother, Daniel, born July 11, 1841, at Rotterdam, was a pupil of Ganz and Servais for the violoncello, and of Verhulst for composition. He taught at the music school at Lemberg in 1860-63, and then went to Paris to perfect his pianoforte and organ-playing. While there he was organist of the Protestant church at Montrouge, and remained there until the outbreak of the war, when he went back to Holland, taking up his abode at Amsterdam, as teacher in the music school, which afterwards became the Conservatorium. He was made secretary of the Maatschappij tot bevordering van Toonkunst. He conducted several choral societies with great distinction, and formed a party of eminent solo-singers with which he performed old Netherlandish music. They gave concerts in the Albert Hall, London, during the Music and Inventions Exhibition of 1885, and created a great sensation by the exquisite finish of their performances. De Lange became director of the Amsterdam Conservatorium in 1895. His works include two symphonies, cantatas, an oratorio, 'De val van Kullenburg'; an overture 'Willem van Holland'; music to 'Hernani'; a mass, a requiem; a setting of Ps. xxii., for solos, choir, and piano; a violoncello concerto, etc. (Riemann's Lexikon.) M.

LANGHANS, FRIEDRICH WILHELM, author, composer, and violinist, was born at Hamburg on Sept. 21, 1832. His early general education was received at the Johanneum in Berlin, and in 1849 he entered the Leipzig Conservatorium, where his violin-teacher was David and his composition-master Richter. On leaving Leipzig Langhans went to Paris to study the violin further under Alard. For five seasons, 1852-58, he played first violin in the Gewandhausorchester in Leipzig; from 1857 to 1860 was concertmeister at Düsseldorf; and then settled temporarily, as teacher and violinist, in Hamburg, Paris, and Heidelberg. From 1874 to 1881 he was professor of the history of music at Kullak's Neue AkademiederTonkunst, when he joined Scharwenka's newly founded Conservatorium, and ultimately

28
acted as its director. In 1571 the University of Heidelberg conferred the degree of Doctor upon Langhans, who was an honorary member of the Liceo Filarmonico of Florence and of the St. Cecilia at Rome. He visited England in 1581, and subsequently, after hearing some open-air music in Glasgow, the Worcester Festival and ‘Patience’ in London, wrote articles on music in England for the Musikalisches Centralblatt. He died in Berlin, June 9, 1892. Langhans's compositions, which include a string quartet that gained a prize offered by a Florentine gentleman in 1864, a violin sonata, and a symphony, are quite unimportant; but his literary work has been more prized. It includes Das musikalische Urtheil (1872); Die Musikgeschichte in 12 Forttraegen (1878); a Geschichte der Musik des 17. 18. und 19. Jahrhunderts in continuation of Ambros, and a history of the Berlin Hochschule. In 1858 he married the pianist Luise Japha, a pupil of Robert and Clara Schumann.

E. H. L.

LANGSAM, i.e. slow, the German equivalent for Adagio. ‘Langsam und sehnsuchtsvoll’ is Beethoven's direction to the third movement of the piano Sonata, op. 101, equivalent to Adagio con molto di sentimento. See also the opening song of the Liederkreis, op. 98. Schumann employs it habitually; see the first movement of his Symphony in E♭.

LANGSHAW, JOHN, was employed about 1761, under the direction of John Christopher Smith, in setting music upon the barrels of an organ, of much larger size than had been theretofore used for barrels, then being constructed for the Earl of Bute, which he did ‘in so masterly a manner that the effect was equal to that produced by the most finished player.’ In 1772 he became organist of the parish church of Lancaster, and died in 1798.

His son, JOHN, was born in London in 1763, in 1779 became a pupil of Charles Wesley, and in 1798 succeeded his father as organist at Lancaster. He composed many hymns, odes, organ voluntaries, pianoforte concertos, songs, and duets, and made numerous arrangements for the pianoforte.

W. H. H.

LANIERE (LANIER, LANEIR, LANYER, LANEER, LANEARE, LANEARE), the name of a family of musicians at the English court in the 17th century. For details of the less eminent members, their relationship to each other, and dates of their appointments, etc., the reader must be referred to Willibald Nagel's Annalen der Englischen Hofsmusik, and Geschichte der Musik in England. The head of the family, or rather of the English branch of the family, was John Lanier, described as a native of Rouen, who had property in Crutched Friars, and died in 1572 (Dict. of Nat. Biog.). A player of the sackbut, named John Lanier, from 1565 to 1605, was no doubt identical with the John Lanyer who, on Oct. 12, 1585, married, at

Holy Trinity, Minories, the daughter of Mark Antony Galliardello, another court musician. He had property at East Greenwich, and the registers of Greenwich mention several of the family. This John Lanier was the father of Nicholas, the most distinguished of the family, who must not be confused with two other bearers of the same name. One of these two owned property at East Greenwich, and seems to have been another son of John of Rouen; he was musician to Queen Elizabeth in 1581, and died in 1612, leaving six sons and four daughters. The sons were all court musicians, and one of them Jerome, had two sons, Jeremy and William, who were musicians in 1634-35. Another Nicholas Lanier published some etchings from drawings by Parmigianino, and in 1638 a set after Giulio Romano; he is, no doubt, identical with the Nicholas Lanier who was buried in St. Martin's-in-the-Fields, aged seventy-eight, Nov. 4, 1646. (Nichol's Progressa, ii. 710.)

Coming now to the most eminent of the family, Nicholas Laniere (as he was generally called), was born in 1558, and baptized on Sept. 10. It is probable that he, rather than either of his namesakes, was the musician for the flutes in 1604; he was attached to the household of Henry Prince of Wales, and it is assumed to be that he is the ‘Lanier’ alluded to by Herrick in a poem to Henry Lawes. In 1613 he joined Copervario and others in the composition of Campion's masque for the marriage of Robert Carr, Earl of Somerset, and Lady Frances Howard, performed at Whitehall, St. Stephen's night, 1614. The first song, 'Bring away the sacred tree,' is reprinted in Stafford Smith's Musica Antiqua. He composed the music for Ben Jonson's masque, 'Lovers made Men,' at Lord Haye's house, Feb. 22, 1617, and is described as introducing the 'stylo recitativo' apparently for the first time in England. He sang in the piece and painted the scenery. He also wrote the music for the same poet's masque, 'The Vision of Delight,' in 1617. His skill in the art of painting was turned to account in 1625, when he was sent to Italy by Charles I. to buy pictures for the royal collection (see Bertolotti's Musici alla corte dei Gonzaga in Mantova). He remained in Italy about three years, and stayed with Daniel Nys at Mantua, the agent through whom the King acquired Mantegna's 'Triumph of Caesar' now at Hampton Court, Correggio's 'Mercury instructing Cupid' in the National Gallery, was another of the pictures bought through Laniere (see Dict. of Nat. Biog. for other details unconnected with music). The patent of his appointment as Master of the King's Musick at a salary of £200 a year, is dated July 11, 1626. In 1630 he set Herrick's poem on the birth of Prince Charles. He was appointed keeper of the king's miniatures, and in 1636 the King granted to Laniere and others
a charter, incorporating them as 'The Marshal, Wardens, and Cominalty of the Arte and Science of Musick in Westminster,' and appointed Laniere the first Marshal. At the outbreak of the civil war, Laniere lost his appointments, and seems to have spent much of his time abroad. There are passes among the State Papers, for him to journey with pictures and musical instruments between Flanders and England. In Jonckbloet and Land's "Musique des Musiciens au XVIIe siècle," p. xxi, is a letter from Laniere (as he spells it), dated March 1, 1645, and in 1646 he begs Huygens to get him a passport to go to Holland. In 1655 the Earl of Newcastle gave a ball at the Hague at which a song set to music by Laniere was sung. At the Restoration he was reinstated in his post as master of the king's music and marshal of the corporation of music. He composed New Year's Songs in 1663 and 1665, and died in Feb. 1666. The entry in the Greenwich registers is dated Feb. 24, 1665-66, 'Mr. Nicholas Laniere buried away' (i.e. elsewhere). Songs and other pieces by him are contained in 'Select Musicall Ayres and Dialogues,' 1653 and 1659; 'The Musical Companion,' 1667; 'The Treasury of Music,' 1669; and 'Choice Ayres and Songs,' book iv. 1685. Several songs and dialogues by him are in the British Museum, Add. MSS. 11,608, 29,396; Eg. MS. 2013. A cantata, 'Hero and Leander,' in Add. MSS. 14,399, 33,236. Other music is in MS. in the Music School and Christ Church Library, Oxford. Vandyck painted Laniere's portrait for Charles I., and at the dispersal of the royal collection it was bought by Laniere himself. Another portrait is in the Music School at Oxford, both painted and presented by Laniere. (Dict. of Nat. Bio, Quellen-Lexikon, Nagel's Annalen, etc.; information from Sir A. S. Scott-Gatty, Garter King of Arms.)

M. LANNER, JOSEPH FRANZ KARL, born at Oberdöbling, near Vienna, April 11, 1801; son of a glove-maker; early showed a talent for music, taught himself the violin, and by means of theoretical books learned to compose. Next came the desire to conduct an orchestra; and in the meantime he got together a quartet party, in which the viola was taken by Strauss, his subsequent rival. They played potpourris from favourite operas, marches, etc., arranged by Lanner. He next composed waltzes and Ländler, first for a small, then for a full orchestra, and performed them in public. His popularity increased rapidly, and important places of amusement eagerly competed for his services. He also appeared in most of the provincial capitals, but declined all invitations abroad. He conducted the dance music in the large and small Redoutensaal, and also that at the court balls, alternately with Strauss. As a mark of distinction he was appointed capellmeister of the second Burger-regiment. When thus at the height of prosperity he died, April 14, 1843; and was buried in the churchyard of Döbling, near Vienna. A memorial tablet was placed on the house in which he was born, May 15, 1879.1 Lanner may be considered the founder of our present dance-music. His galops, quadrilles, polkas, and marches, but especially his waltzes and Landler, bear traces of the frank, genial disposition which made him as beloved. All his works, from op. 1 ('Neue Wiener Ländler') to his sway-song ('Die Schönbrunner') are penetrated with the warm national life of Vienna. The titles often contain allusions to contemporaneous events and customs, and thus have an historical interest. His printed works amount to 208, and he left others unpublished. The following numbers are dedicated to crowned heads, and distinguished persons—op. 74, 81, 85, 91, 101, 110-12, 115-16, 120, 128, 131-32, 138 ('Victoria-Walzer' dedicated to Queen Victoria), 113, 116, 155, 161-62. The 'Troubadour-Walzer,' op. 197, are dedicated to Donizetti, and the 'Norwegische Arabesken,' op. 145, to Ole Bull. Diabelli published opp. 1-15; Haslinger 16-32, and 170-205; Mecchet 133-169.

Of Lanner's three children, August, born 1834 in Vienna, a young man of great promise, followed his father's profession, but died Sept. 27, 1855. Katharina, born in Vienna, 1831, is a well-known dancer, who since her debut at the court opera in Vienna in 1846, has appeared at all the important theatres in Europe. She has also written several admired ballets, and in 1858 formed a children's ballet in Hanburg, which gave forty-six performances in Paris with great success. At a later date she was engaged also at the Italian Opera in England, and under her admirable management a high standard of dancing has been maintained at the Empire Theatre in London.

LAPICIDA, ERASMUS, nearly contemporary with Joquin des Prés, is mentioned by Ornitophonius as one of the approved composers of his time, and is also referred to as an authority in musical theory in certain correspondence between Spataro and Giovanni del Lago. Petrucci printed some Lamentations by him with the Plain-song melody in the tenor, also three motets. In Forster's Liederbuch, 1539, seven German songs bear his name, which Ambros thought to be adaptations of other compositions of Lapicida to German words; but Eiter claims to have proved them to be original settings of the German texts since the Canus Firmus is in each case the original melody to the text. None of Lapicida's compositions have been reprinted in modern times.

J. R. M.

LAPORTE, PIERRE FRANÇOIS, an eminent French comedian, came to London as a member and joint manager of a company who, in Jan. 1824, commenced performing French plays at

1 Owing to a curious error in the entry of his baptism, his name was for long overlooked in the register.
the theatre in Tottenham Street. On Nov. 18, 1826, he appeared on the English stage, as a member of the Drury Lane company, as Sosia in Dryden's 'Amphitryon,' and afterwards played a variety of parts, mostly original, and amongst them W ormwood in 'The Lottery Ticket.' He next joined the Haymarket company, in which he first appeared June 15, 1827. In 1828 he became manager of the King's Theatre, and continued such until 1831. In 1832 he was lessee of Covent Garden Theatre, and actor as well as manager, but was compelled to retire, with heavy loss, before the end of the season. In 1833 he resumed the management of the King's Theatre, and retained it until his death, which occurred at his château near Paris, Sept. 25, 1841. A notable feature of his last season was the 'Tamбурini Row,' a disturbance of the performance occasioned by the admirers of Tamбурini, who resented his non-engagement for that season, and by their tumultuous proceedings for two or three evenings forced the manager to yield to their wishes. Another curious feature of this year was the reappearance of Laporte in his original capacity as an actor, with Rachel, on three nights of her first London season. Laporte first introduced to the English public, amongst other operas, Rossini's 'Comte Ory' and 'A ssedio di Corinto'; Bellini's 'Pirata,' 'Sonnanbula,' 'Norma,' and 'Puritani'; Donizetti's 'Anna Bolena,' and Costa's 'Malek Adel'; and amongst singers, Montagner, Frére- Lalande, Persiani, Sassabrelli, Albertazzi, Pisaroni, Donzelli, David, Jun., Ivanoff, Mario; and, above all, the famous quartet who so long held supremacy on the opera stage, Grisi, Rubini, Tamburini, and Lablache. Though his dilatory and unbusinesslike habits ruined his management, Laporte was not without good qualities. Amongst others his tact and coolness were great, and many of his *boss notes* were current at the time. When Corio returned the ticket of a box on the upper tier with the remark that she was much too young to be excated to the skies before her time, Laporte—having already given a box on the same tier to Taglion—replied that he 'had done his best, but that perhaps he had been wrong in placing her on the same level with Mile. Taglion.'

W. H. H.

LARGE (Lat. *Maxima*, Old Eng. *Maxim*). The longest note used in measured music. In ancient MSS., the Large appears as an oblong black note, corresponding with the Double-Long described in the *Ars Cantus Mensurabilis* of Franco-Cologne. Franchinus Gaffurius, writing in 1496, figures it as an oblong white note, with a tail descending on the right-hand side; which form it has retained, unchanged, to the present day. In the Great Mode Perfect, the Large is equal to three Longs; in the Great Mode Imperfect,

---

1 In modern reprints, the tail is sometimes made to ascend; but it is indispensable that it should be on the right-hand side. See innumerable examples in Proke's *Musica Divina*.

---

to two. [See Moon.] The Rest for the Perfect Large stretches, in a double line, across three spaces; that for the Imperfect Large, across two.

In polyphonic music, the final note is always written as a Large: and, in that position, its length is sometimes indefinitely prolonged, in the Canto fermo, while the other voices are elaborating a florid cadence. In Plain-song, the Large—or, rather, in that case, the Double-Long—is sometimes, but not very frequently, used, to indicate the reciting-note. w. s. r.

LARGHETTO, partaking of the broad style of Largo, but about the same pace with Andante. Well-known instances of its use are the slow movements in Beethoven's second Symphony and Violin Concerto.

c.

LARGO, i.e. broad, an Italian term meaning a slow, broad, dignified style. Handel employs it often, as in the 'Messiah' in 'Behold the Lamb of God,' 'He was despised,' and 'Surely He hath borne our griefs.' Haydn uses it for the Introduction and first Chorus in the 'Creation,' as well as in the Introduction to the third Part. Beethoven employs it only in P.F. works, and it is enough to mention some of the instances to show what grandeur and deep feeling he conveyed by this term,—op. 7; op. 10, No. 3; op. 37; op. 70, No. 1; op. 106. He often accompanies it with *passionate*, or some other term denoting intense expression. Mendelssohn uses it for 'broad' in the Andante of his string quartet in E flat, op. 12.

The term *Largamente* has come into use to denote breadth of style without change of *tempo*. Largo implies a slow pace, but the very varying metronome marks applied to it show conclusively that style and not pace is its principal intention. [In the Brit. Mus. Add. MS. 31,424, fol. 46, 536 are two gaggis marked Largo, the others in the same set being marked vivace or allegro.]

c.

LARIGOT (from an old French word, *l'ariot*, for a small flute or flageolet, now obsolete), the old name for a rank of small open metal pipes, the longest of which is only 1½ ft. speaking-length. Its pitch is a fifth above that of the fifteenth, an octave above the twelfth, and a nineteenth above the unison. It is first met with, in English organs, in those made by Harriss, who passed many years in France, and who placed one in his instrument in St. Sepulchre's, Snow Hill, erected in 1670. E. J. H.

LAROCHE, HERMAN AUGUSTOYICH, musical critic, born in St. Petersburg, May 25, 1845. He received his musical education at the Conservatoire, where he was a contemporary of Tchaikovsky (1862-65). In 1867 he was appointed to a professorship at the Moscow Conser-
vatoire. He returned to St. Petersburg in 1871, and most of his life has since been spent in this town. Laroche has been a voluminous contributor to many of the leading Russian newspapers and periodicals, and is regarded as the chief representative of conservative principles in music. His writing is distinguished for its excellence of style, erudition, and flashes of original thought; but his work as a whole lacks system, and shows more personal bias than reasoned conviction. Laroche translated Hanslick's Von musikalisch Schonen into Russian. He was one of the first to appreciate the genius of Tchaikovsky, and devoted many articles to his personality and his works.

R. N.

LAROCHE, JAMES, better known as Jenny Laroche, or Laroche, was a popular singer in London, though probably French by origin or birth, at the end of the 17th and beginning of the 18th centuries. He played, as a boy, the part of Cupid in Motteux's 'Loves of Mars and Venus,' set to music by Eccles and Finger, in which the part of Venus was played by Mrs. Bracegirdle, in 1696. He was, therefore, born probably about 1680-82. His portrait appears on a very rare print, called 'The Raree Show.' Song by Jenny Laroche in the Musical Interlude for the Peace, with the Tune Set to Musick for the Violin. Ingraved Printed Cured and Sold by Sutton Nicholls next door to the Jack, etc. London,' fol. It was afterwards published by Samuel Lyne. There are thirty-three verses beginning 'O Raree Show, O Brave Show' below the engraving, which represents Laroche with the show on a stool, exhibiting it to a group of children; and at foot is the music. The Peace of Utrecht was signed in April 1713, and this interlude was played in celebration of it, at the Theatre in Little Lincoln's Inn Fields, the music being written by John Eccles. The portrait of Laroche was also engraved by M. Laroon in his Cries de London.

J. M.

LA RUE, PIERRE DE, also known as Pierchon, Perisson, Pierison, Pierzon, and Petrus Platensis, born in Picardy about the middle of the 15th century and fellow-pupil of Josquin des Prés in the school of Okeghem. State records prove that he was in the service of the court of Burgundy in the years 1477, 1492, 1496, 1499, 1500, and 1502. In 1501 he was a prebend of Courtrai, and later held a similar benefice at Namur, which he resigned in 1510. [He was in the service of Charles V. until 1512, when he entered that of Margaret of Austria, governante of the Netherlands. He died at Courtrai, Nov. 20, 1518.] Most writers on music accord him a position as a contrapuntal composer scarcely second to that of Josquin, and the magnificent copies of his masses made by order of the Princess Margaret of Austria, and now in the libraries of Vienna and Brussels, testify to the value set upon his works by those he served. Indeed, considering his great reputation, it is somewhat surprising that so little is known of the events of his life, and that so little of his music has been printed. Of the thirty-six masses now existing Petrucci printed five in the composer's lifetime (‘Missa Petro de la Rue’; Venetia, 1503), and a few more in later collections. Of motets only twenty-five, and of secular pieces no more than ten, are to be found in the publications of the 16th century—a small result compared to the long catalogue of Josquin's printed works. Burney, Forkel, and Kiesewetter give short examples from Pierre de la Rue's compositions. [See the Quellen-Lexikon for list of works in MS.] J. n. s.-u.

LASSALLE, JEHAN, was born Dec. 14, 1847, at Lyons, the son of a silk-merchant there, was intended for the same business, and studied in the Beaux-Arts, Lyons, and later in Paris. He abandoned the idea of a mercantile career, and for a time studied painting in Paris, but renounced art in turn for singing. For this purpose he studied for a time at the Conservatoire, but making little progress under an indifferent master he left the school and studied privately under Novelli (Lavessiere). In Nov. 1860 he made his début at the opera in Lille as St. Bris. He sang next at Lille, Toulouse, the Hague, and Brussels, where on Sept. 5, 1871, he made his début, with great success, as De Nervas, and was heard during the season as Ashton in 'Lucia,' Nelmako, Telramund, etc., on June 7, 1872, he made a successful début at the French opera as Tell. With the exception of visits, on leave of absence, to London, Russia, Madrid, Milan, Vienna, Prague, Warsaw, etc., the United States, etc., M. Lassalle remained at the Opéra for twenty-three years, and became principal baritone singer on the retirement of Faure. His parts included Don Juan, played by him in 1887 at the centenary performance; Pietro ('La Muette'); Lucignan ('Reine de Chypre'); Hamlet, 1885; Rigoletto on production of Verdi's opera there. He created the parts of Scindia (Massenet's 'Roi de Lahore'), April 27, 1877; Sévère (Gounod's 'Polyeucte'), Oct. 7, 1878; Biis Said (J. 6. 'Tribut de Zamora'), April 1, 1881; Lanciotti Malatesta (Thomas's 'Françoise de Rimini'), April 14, 1882; Henry VIII. (Saint-Saëns), March 5, 1883; Gunther (Reyer's 'Sigurd'), June 12, 1885; De Ruyssor (Paladilhe's 'Patrie'), Dec. 20, 1886; Benvenuto Cellini ('Ascanio'), March 21, 1890; the High Priest ('Sonsan and Dalila'), Nov. 23, 1892; these last two both by Saint-Saëns. On May 5, 1876, on leave of absence he played at the Lyric as the Count de Lusace in Joncier's 'Dimitri.' On Dec. 11, 1890, he played Escamillo in 'Carmen' at the Opéra Comique with Mesdames Galli-Marié and Melba, and M. J. de Reszke, in aid of the Bätz memorial. On June 14, 1879, he made his début at the Court Garden Theatre, under Gye, as Neluko, and played there for three seasons with great
success as Renato, De Luna, Hoel, etc., June 28, 1879; Scinda in Massenet’s opera above-mentioned, and June 21, 1881, the Demon in Rubinstein’s opera of that name, on the production of these works in England. From 1888 to 1893 he played at the same theatre, under Harris with unvarying success a great variety of parts, notably the Dutchman, Telramund, Escamillo; July 13, 1889, Hans Sachs on production of ‘Meistersinger’ in Italian, and in some operas new at that theatre, the most important being Claude Frollo (Goring Thomas’s ‘Esmeralda’), July 12, 1890. In 1890 and 1897 he played with great success in Germany. Since 1901, M. Lassalle has devoted himself to teaching at Paris, and in Nov. 1903 was appointed a Professor at the Conservatoire. In 1905 it was his intention to produce at a private theatre of his own a new opera of a French composer of great promise, M. Nériti, written expressly for himself and his pupils. Excellent alike, both as a singer and an actor, the possessor of a beautiful voice, an indefatigable worker, M. Lassalle was one of the finest artists heard in England during the last quarter of the 19th century. A. C.

LASSEN, EDWARD, though a native of Copenhagen, where he was born April 13, 1830, was virtually a Belgian musician, since he was taken to Brussels when only two, entered the Conservatoire there at twelve, in 1844 took the first prize on PE player, in 1847 the same for harmony, and soon afterwards the second prize for composition. His successes, which were many, were crowned by the ‘prix de Rome’ in 1851, after which he started on a lengthened tour, through Germany and Italy. Disappointed in his hopes of getting a five-act opera performed at Brussels, he betook himself to Weimar, where in 1857 it was produced, as ‘Landgraf Ludwig’s Brautfahrt,’ under the care of Liszt, with great success. In the following year he was appointed court music-director, and on the retirement of Liszt in 1861, succeeded him as conductor of the opera. A second opera, ‘Fahrenheit,’ was given in 1861, and a third, ‘Le Captif,’ was brought out in Brussels in 1868. At Weimar Lassen had the satisfaction to produce ‘Tristan and Isolde’ in 1874, at a time when no other theatre but Munich had dared to do so. He there published a Symphony in D, a Beethoven overture, and a Festival ditto, music to Sophocles’ ‘Edipus,’ to Hebbel’s ‘Nibelungen,’ Goethe’s ‘Faust,’ ‘Parts I and 2,’ to Devrient’s version of Calderon’s ‘Circe,’ and to Goethe’s ‘Pandora’ (1886). His works include a second symphony in C, op. 78, cantata, a Fest-Cantate, a Te Deum, a set of ‘Biblische Bilder,’ for voices and orchestra, a large number of songs, and other pieces. In 1881 he was decorated with the order of Leopard. His ‘Faust’ music has kept the stage all over Germany. He died at Weimar, Jan. 15, 1904.

LASERRE, JULES, eminent violoncellist, was born at Tarbes, July 29, 1858, entered the Paris Conservatoire in 1852, where he gained the second prize in 1853 and the first prize in 1855. When the popular concerts of Pasdeloup were first started, he was appointed solo violoncellist; he has also played with great success in the principal towns of France. During 1859 he was solo violoncellist at the Court of Madrid, and travelled through Spain. In 1869 he took up his residence in England, and played principal violoncello under Sir Michael Costa and at the Musical Union. Lasserre has written various compositions both for his own instrument and for the violin - Etudes, Fantasies, Romances, Tarantelles, Transcriptions, a violoncello ‘Method,’ etc., etc. He now lives at his native place.

LASSUS, ORLANDUS, born at Mons in the first half of the 16th century. His real name was probably Roland Delatte, but the form de Lassus seems to have been constantly used in Mons at the time, and was not his own invention. He had no fixed mode of writing his name, and in the prefaces to the first four volumes of the Petrocinnim Musices, signs himself differently each time — Orlandus de Lasso, Orlandus di Lasso, Orlandus di Lassus, and Orlandus Lassus; and again in the ‘Legiciones Histro,’ 1532, Orlandus de Lasso. In the French editions he usually find the name Orlande de Lassus, and so it appears on the statue in his native town. Adrien Le Roy, however, in some of the Paris editions, by way perhaps of Latinising the de, calls him Orlandus Lassiusisus.

The two works usually referred to for his early life are Vivchaut’s Annals of Hainault: 1 and a notice by Van Quickelberg in 1565, in the Heroua Prosopographia, a biographical dictionary compiled by Fantaleon. Vivchaut, under the year 1520, writes as follows: —

Orland dit Lassus was born in the town of Mons, in the same year that Charles V. was proclaimed Emperor at Aix-la-Chapelle (1500). . . . He was born in the Rue de Guinette near the passage leading from the Black Head. 2 He was chorister in the church of S.

1 The original MS. is now in the Mons library. The author lived between 1500 and 1535.
2 "A lisse de la maison, portant l'ennoigne de la noire teste." Delmonte (in his Life of Lasso, Valenciennes, 1880 thinks "the Black Head" was situated in the Rue Grande, No. 92. Counting the number of houses between the "Poids de fer" (town weighing-house) and the "Maison de la noire teste" in the old records of the town, he found it to correspond with the distance from the former building. Moreover, No. 92 bore, in Delmonte’s time, the sign of a helmet, which he thinks might, in olden time, have been pointed black to imitate iron, and thus have been called the ‘noire teste.’ He goes on to say, but without stating his authority, that this house, No. 92, had formerly a passage leading into the Rue des Grands Guirlande (afterwards Rue des Capucins) by the houses Nos. 57 and 50. If so, it must have been a house of importance, with back premises stretching behind the whole length of the Rue des Capucins. Nos. 57 and 59 are at the time of writing (1879) large new houses, each with a passage between them leading to No. 59, a private house, and the street. If this passage marks the site of the original ‘issu’ spoken of by Vivchaut, then the house in which Lassus was born must have been on one side of it, at the corner of the Rue de Cantimpol. Curiously enough, Matthiass, in his Life of Lasso, says that the Orlandus Lassus lived in the Rue de Cantimpol, Quarter Guirlande, which adds to the probability that a house situated at the corner of the two streets may have been occupied by the composer.
ORLANDUS LASSUS
LASSUS

Nicolas 1 in the Rue de Harvcre. After his father was condemned for coin ing false money, etc., the said Orlandus, who was called Roland de Lattre, changed his name to Orlandus de Lassus, left the country, and went to Italy with Ferdinand de Gonzague.

Van Quicke!berg 2 dates his birth ten years later. —

Orlandus was born at Mons in Hainault in the year 1530. At seven years old he began his education, and a year and a half later took to music, which he soon understood. The beauty of his voice attracted so much attention, that he was thrice stolen from the school where he lived with the other choristers. Twice his good parents found him, but the third time he consented to remain with Fortunand Gonzague, viceroy of Sicily, at that time commander of the emperor's forces at St. Didier. The war over, he went with that prince next to Sicily, and then to Milan. After six years his voice broke, and at the age of eighteen Constantia Castriotto took him to Naples, where he lived for three years with the Marquis of Terras. Thence to Rome, where he was the guest of the archbishop of Florence for six months, at the end of which time he was appointed director of the choir in the church of St. Giovanni in Laterano, far from the most celebrated in Rome. . . . Two years afterwards he visited England and France with Julius Caesar Brancaccio, a man and an amusing musician. Having returned to his native land, he resided in Antwerp for two years, where he was called to Munich by Albert of Bavaria in 1557. (The authority of the epitaph is cited by Habert [Huber, 1854] to support the date 1552 as that of the birth.)

It is difficult to decide between the three birthdates, but the best authorities seem now agreed that 1520 must be abandoned. Boini places the Roman appointment in 1541, Van Quicke!berg in 1551. That Lassus left Rome about 1553, as Van Quicke!berg says, is also to be inferred from the preface to his first Antwerp publication (May 13, 1555), where he speaks of his removal from the one city to the other as if recent. Assuming that his life in Rome lasted either two years or twelve, we may ask whether it is likely that one of the most industrious and prolific composers in the whole history of music should obtain so high a position as early as 1541, without being known to us as a composer till 1555; 3 or is it, on the contrary, more likely that a reputation which seems to have been European by the time he went to Munich (1557), could have been gained, without some early and long career as a composer of works which may yet be lying undiscovered in some Italian church or library?

Vinchant alludes to Lassus' father having been condemned as a counter of false money.

Matthieu 4 has worked hard to refute this, and his examination of the criminal records of Mons casts great improbability on the story. At the same time, and from the same sources, he has brought to light other namesakes of the composer, who, if they belonged to his family, did little credit to it, and need not be mentioned here. It would be more interesting to find some tie between Orlando and two other contemporary composers, Olivier Delatre, and Claude Petit Jean Delatte, the second a man of considerable eminence.

Of Lassus' education, after he left Mons, we know nothing, but his first compositions show him following the steps of his countrymen, Wilhaert, Verdelot, Arcadelt, and Bore, in the Venetian school of madrigal writing; his first book of madrigals (a 5) being published in Venice in 1552 soon after he had himself left Italy and settled in Antwerp. This book in its time went through many editions, but copies of it are scarce.

The visit to England must have taken place about 1554. We have been unable to find any account of the nobleman whom Orlando accompanied, but many of his family had been dignitaries of the church of Rome, and by him Orlando was probably introduced to Cardinal Pole, in whose honour he wrote music to the words

Te spectant Regnume poli, tibi sidera revinent, Exultantes motet, personal Oceubus, Anglia dom plastid quos fastuos execues ignes Elicis et iachimae ex amante nascu.

This was published in 1556, and the incidents to which it refers could not have taken place before 1554, so it gives an additional clue to the time of the composer's visit to this country, corroborating the statement of Van Quicke!berg. It is curious that in the year 1554, a Don Pedro di Lasso attended the marriage of Philip and Mary in England as ambassador from Ferdinand, King of the Romans.

By the end of 1554, Orlando is probably settled at Antwerp, for in the Italian preface to a book of madrigals and motets printed in that city (May 18, 1555),' he speaks of their having been composed there since his return from Rome. 'There,' says Van Quicke!berg, 'he remained two years, in the society of men of rank and culture, reposing in them a taste for music, and in return gaining their love and respect.' The book referred to contains eighteen Italian canzones, six French chansons, and six motets "à la nouvelle composition d'aucuns d'Italie." Of the Italian ones five are published by Van Maldeghem. 5 This is our first introduction to the great composer, and we get over it with little formality. If Orlando ever wrote any masses for his composer's diploma; if the old tune 'Tomme armée,' was tortured by any

1 Roland de Lattre, par Adolphe Matthieu. Gand, no date (1838).
3 Aaccording to Dehia, an edition of motets, dated 1521, is in the library at Belasco, but Vinchantu's date is supported by so many other considerations that we think Dehia's copy and Autun's are not worth the trouble. The MS. catalogues of the Italian libraries, in Dehia's possession, some of which are in the Riga library at Brussels, are not likely to be entirely free from error.
fresh contrapuntal devices of his pen, it is plain that he left such tasks behind him when he gave up school, and 'roused the musical taste' of his Antwerp friends by music which errs, if at all, on the side of simplicity. We pass with regret from the graceful 'Madonna ma pieta' and the almost melodious 'La cortesina,' to the Latin motets—three sacred, two secular—in the same volume. One of the latter is the 'Alma nemen' which Burney gives in his History (iii. 317), pointing out the modulation on the words 'novumque melos,' as a striking example of the chromatic passages of the school in which Lassus and Bona were educated. Burney couples the two together, and regards Lassus chiefly as a secular composer. He seems to know but little of the great sacred works of his later life, and likens him to a 'dwarf upon stilts' by the side of Palestrina. But though this unfortunate comparison has brought the great English historian into disrepute with Fétis and Ambros, still Burney's remarks on Lassus' early works are very interesting and certainly not unfair. It is only strange that, knowing and thinking so little of Lassus, he should have compared him to Palestrina at all.

The other work belonging to this period (Antwerp, 1556) is the first book of motets—12 nos. a 5, and 5 nos. a 6. Here the composer recognises the importance of his first publication of serious music, by opening it with an ode to the Muses, 'Deltiae Phoebei,' a 5, in which the setting of the words 'Sustine Lassum,' is the principal feature. Other interesting numbers are the 'Gustate, videte,' which will be referred to again when we follow Lassus to Munich, the motet 'Te spectant Reginae poli,' and 'Heronum soles,' in honour of Charles V., the second being in the strict imitative style, the last in simpler and more massive harmony (a 6), as if designed for a large chorus at some public ceremonial.

The sacred numbers, such as the 'Mirabile mysterium'—an anthem, we suppose, for Christmas day—show no signs of any secular tendency or Venetian influence. They are as hard to our ears as any music of the Josquin period. They give us our first insight into Orlando's church work, and it is interesting to find him drawing so distinct a line between compositions for the church and the world, and not, as Burney implies, too much petted in society and at court, to be grave and earnest in his religious music. We have a good example here that the contrary is the case. The Muses and Cardinal Pole are much too serious subjects to be in the slightest degree trifled with, and the Ode to Charles V. alone exhibits any originality of treatment.

On the strength of a reputation as a composer both for the chamber and the church, and of a popularity amongst men of rank and talent, gained as much by his character and disposition and liberal education, as by his musical powers, he was invited by Albert V., Duke of Bavaria, in 1556 or 1557 to come to Munich as director of his chamber music. Albert was not only the kind patron of Lassus, but seems to have exercised considerable influence on the direction of his genius. He was born in 1527, was a great patron of the arts, founded the royal library at Munich, acquired considerable fame as an athlete, and was a man of the strictest religious principles, the effect of which was not confined to his family, but extended to his people by severe laws against immorality of every kind. Of the exact state of music at Munich when Lassus first reached it, we cannot speak precisely. The head of the chapel, Ludovico d'Ascro, or Ludwig Daser, was a distinguished composer in his time.1 Being an old man, he would probably have retired in favour of Lassus, as he did a few years later, but it was thought better for the newcomer to acquire the language of the country before undertaking so responsible a post, and he was therefore appointed a chamber musician [although his salary exceeded that of Daser by fifty guldens. He contributed nineteen pieces to a 'Secondo libro delle Muse, a 5 voce,' published by Barri in Rome in 1559]. He seems to have settled at once into his new position, for the next year (1558) he married Regina Weckinger, the daughter of a lady of the court. The marriage proved a very happy one, and Vau Quickelberg speaks of the children, whom he must have known at a very early age (1555), as 'elegantissimi.' At any rate they did very well afterwards. The four sons, Ferdinand, Ernest, Rudolph, and Jean, all became musicians, and the two daughters were married—one of them, Regina, to the Seigneur d'Ach, one of the court painters.

In his subordinate position Lassus did not publish much, though, as the next paragraph shows, he wrote continually. The next two or three years produced a second book of twenty-one madrigals (a 5), a book of madrigals (a 4), and a book of chansons (a 4, 5, 6), the latter containing the 5-part chanson 'Susanne un jour.' to which Burney refers in his History (iii. 262) as well as a 6-part setting of the 'Titre, tu patule,' which is quite simple in effect, and has a very beautiful last movement. We observe at once the great care which Orlando takes of the quantities of the Latin words.

In the year 1562 Daser is allowed to retire on his full salary, and

The Duke seeing that Master Orlando had by this time learnt the language, and gained the good will and love of all, to the propriety and gentleness of his behaviour, and that his compositions (in number infinite) were universally liked, without loss of time elected him master of the chapel, to the evident pleasure of all. And, indeed, with all his distinguished colleagues, he lived so quietly and peacefully, that all were forced to love him, to respect him in his presence, and to praise him in his absence.

1 See the notice in Etienne's Bibliographie (Berlin, 1877), p. 292, and in the quotien lexicon.
From this time Lassus appears principally as a composer for the church, and it is worth remarking that in this same year the subject of music was discussed by the Council of Trent, and a resolution passed to reform some of the glaring defects in the style of church composition. Lassus' great works, being of a subsequent date, are as entirely free from the vagaries of his predecessors as are the later works of Palestrina. [See Josquin.]

The new chapel-master, in the June of the same year, prints his first book of entirely sacred music—Sacrae Cantiones, a 5 (25 nos.), of which Veni in hortum has been published by Commers, Angelus ad pastores by Rochlitz, and Benedicam Dominum by Frohse.

But it was not alone as a church composer that Lassus was anxious at once to assert his new position. He soon showed special qualifications as conductor of the choir. "One great quality," says Massimo Trojano, "was the firmness and genius he evinced when the choir were singing, giving the time with such steadiness and force, that, like warriors taking courage at the sound of the trumpet, the expert singers needed no other orders than the expression of that powerful and vigorous countenance to animate their sweetly sounding voices."

The portrait which we here give, and which was engraved for the first time in the first edition of this Dictionary, has been photographed.

5 Special thanks due to Professor Haim, the Director of the Royal State Library, for the prompt kindness with which he granted permission and gave every facility for the photographing of the portrait. Another portrait from the same MS, on a smaller scale, full length and in a long gown, is lithographed and given in Den Helders Levensb. van Lassus.
and their life was made so pleasant, that, as Massimo Trojano says, 'had the heavenly choir been suddenly dismissed, they would straightway have made for the court of Munich, there to find peace and retirement.'

For general purposes the wind and brass instruments seem to have been kept separate from the strings. The former accompanied the mass on Sundays and festivals. In the chamber music all took part in turn. At a banquet, the wind instruments would play during the earlier courses, then till dinner was finished the strings, with Antonio Morari as their conductor, and at dessert Orlando would direct the choir, sometimes singing quartets and trios with picked voices, a kind of music of which the Duke was so fond, that he would leave the table to listen more attentively to 'the much-loved strains.' He and all his family were intensely fond of music, and made a point of attending the musical mass every day. They took a keen interest in Lassus' work, and the Duke and his son William were continually sending him materials and suggestions for new compositions. The manuscript of the music to the 'Penitential Psalms,' already noticed, remains to this day a witness of the reverence with which the Duke treated the composer's work.

These seven psalms were composed, at the Duke's suggestion, before the year 1565, the date of the first volume of the MS., but were not published till nineteen years after. The music is in five parts, one, and sometimes two separate movements for each verse. The last movement, 'Sicut erat,' always in six parts. Duets, Trios, and Quartets appear for various combinations of voices. The length of the Psalms is considerable, and though no reliance can be placed on modern ideas of their tempus, the longer ones would probably occupy nearly an hour in performance.

'When we think,' says Ambros, 'of the principal works of the 16th century, these Psalms and Palestrina's Missa Papae Marcelli always come first to our minds.' One reason for this is, perhaps, that these works have each a little story attached to them which has made them easy to remember and talk about. It is not true that Lassus composed the 'Penitential Psalms' to soothe the remorse of Charles IX., after the massacre of St. Bartholomew, but it is more than probable that they were sung before that unhappy monarch, and his musical sense must indeed have been dull, if he found no consolation and hope expressed in them. This is no everyday music, which may charm at all seasons or in all moods; but there are times when we find ourselves forgetting the antique forms of expression, passing the strange combinations of sounds, almost losing ourselves, in a new-found grave delight, till the last few movements of the Psalm—always of a more vigorous character—gradually recall us as from a beautiful dream which 'waking we can scarce remember.' Is this indefinite impression created by the music due to our imperfect appreciation of a style and composition so remote, or is it caused by the actual nature of the music itself, which thus proves its inherent fitness for the service of religion? So unobtrusive is its character, that we can fancy the worshippers hearing it by the hour, passive rather than active listeners, with no thought of the human mind that fashioned its form. Yet the art is there, for there is no monotony in the sequence of the movements. Every variety that can be naturally obtained by changes of key, contrasted effects of repose and activity, or distribution of voices, are here; but these changes are so quietly and naturally introduced, and the startling contrasts now called 'dramatic,' so entirely avoided, that the composer's part seems only to have been, to deliver faithfully a divine message, without attracting notice to himself.

The production of such a masterpiece at an early date in his Munich life, seems to point clearly, through all the contested dates of birth, positions, or appointments, to some earlier career of the composer. To obtain a style at once great and solemn, natural and easy, it seems almost indispensable that Lassus had occupied for several years the post to which Baini says he was first appointed in 1544, had spent these years in writing the great curious works which had been the fashion of his predecessors, and then, like Palestrina—whom, if he really lived at Rome all this time, he must have known—gradually acquired the less artificial style, by which his later works are characterised.

In the years 1565-66 Lassus adds three more volumes of 'Sacrae Cantiones' (several numbers of which are scored by Commer), and the first set of 'Sacrae Lectiones, 9 ex propheta Job.' The first editions of these all hail from Venice, perhaps because Jean de Berg of Nuremberg, who had published the first volume, had died in the meanwhile. His successor Gerlach, however, publishes an edition of them in 1567, as well as a collection of twenty-four Magnificats. In the latter the alternate verses only are composed—a contrapuntal treatment of the appointed church melodies—the other verses being probably sung or intoned to the same melodies in their simple form.

The year 1568 is full of interest. In Feb. the Duke William marries the Princess Renata of Lorraine; there is a large gathering of distinguished guests at Munich, and music has a prominent place in the fortnight's festivities. Among the works composed specially for the occasion was a 'Te Deum' (a 6), and three masses (a 6, 7, and 8 respectively), also two motets 'Gratia sola Dei' and 'Quid trepides, quid musa times?' But here we must stop, for though it has a real interest to read how 'their Highnesses
and Excellencies and the Duchess Anna attended by Madame Dorothea returned home greatly pleased with the sweet and delightful mass they had heard, and to follow all the occurrences of fourteen consecutive days of Orlando's life, still we must refer the curious reader to the pages of Massimo Trojano, and can only stop to mention that, towards the end of the time, he was the life and soul of an impromptu play suggested by the Duke, in which he not only acted one of the principal parts, but introduced various pieces of music on the stage with the aid of a band of picked singers.

In the same year we have two most important publications: (1) 'Selectissimae Cantiones a 6 et pluribus' and (2) the same a 5 et 4. The first book opens with a massive work in four movements, 'Jesu nostra redemptio,' in the grand gloomy style of the old masters, followed by shorter and simpler pieces, such as the prayer in the garden of Gethsemane, with a melodious prelude on the words 'In monte Oliveti oravit ad patrem,' followed by a simple strain of devotional music carrying the hearer quietly and expressively, but not dramatically, through the Saviour's agony and resignation. The volume is not confined to religious music. There are some pieces with secular words, such as an ode to Albert 'Quo properas facunde nepos Atlantis,' but there are also some capital drinking-songs, and the 'Jam lucis orto sidere,' with its second part 'Qui ponit aquam in Falerno,' is a fine specimen of a part-song for two choirs singing alternately, a kind of music much in vogue at the time, the introduction of which is said to be due to Adrian Willaert.

The other volume is confined to music a 5 and a 4, and is proportionately simpler. Commes er printed eight or nine of the sacred numbers in score and they are not difficult either to understand or to appreciate. Among the secular pieces there is a comic setting of the psalm 'Super flumina Babylonis,' each letter and syllable being sung separately as in a spelling lesson:

```

at which rate it takes two long movements to get through the first verse. This might well be a parody on the absurd way in which the older masters mutilated their words. But there are beautiful as well as curious numbers among the secular part-songs in this book, and the 'Forte sopotoria ad Baias dormivit in umbra, blandus Amor, etc.' is one of the quaintest and prettiest songs that we have come across in the old music world. In this book is also a very characteristic, though rather complicated and vocally difficult setting of the well-known song of Walter Mapes—if1 Walter Mapes's it be—'Si bene perpendi, causae sunt quinque hibendi.'

Dean Aldrich may have taken the words from this very book (for he had a library of Lassus' works) when he made his well-known translation:—

If all be true that I do think, There are five reasons we should drink: Good wine, a friend, or being dry, Or lest you should be by and by, Or any other reason why.

In a subsequent edition of the same 'Cantiones,' appears another portion of the same work, 'Fortun in convivis,' a 4, in five movements set to music full of character and effective contrasts. The music was so much liked that other words were twice set to it, once in a French edition which aimed at rendering the chansons 'honestes et chrestiennes' to the words 'Tristis ut Etruric Orphnus ab orco'—though how the adapter succeeded in his object by the change is not very apparent; and again a second time after his death in the edition of his works by his son, to the stupid words 'Volo numquam,' which aimed at turning it into a temperament song by the insertion of a negative in each sentiment of the original. The old edition has fortunately survived, and the words of the last two verses, beginning 'Mihi est propitium,' are still used for their original purpose. These spirited words, of which Orlando was evidently so fond, and to the quantities of which he paid such careful regard, seem to have inspired him with a marked rhythm and sense of accent, which is very exceptional in works of the time.

In the year 1569, Adam Berg, the court publisher at Munich, brings out 'Cantiones aliquot a 5,' containing fourteen numbers, and two books of 'Sacrae Cantiones,' partly new, are issued at Louvain. The year 1570 is more productive, twenty-three new Cantiones a 6; two books of chacones containing eighteen new ones; and a book of twenty-nine madrigales, published in Munich, Louvain, and Venice respectively; while France is represented by an important edition of chansons—'Mellange d'Orlande de Lassus'—often quoted but containing little new matter. At the close of the year, at the dict of Spires, the Emperor grants letters of nobility to Lassus.3 At the time this honour was conferred upon him, Lassus was probably on his way to the court of France, where we find him during the greater part of the year 1571. Some circumstances of his stay there may be gathered

---

1 Some doubt has been thrown on the authorship of these words.
2 A facsimile copy of this grant is kept in the Brussels library (Bibl. de Bruxelles, 1446). The part referring to the coat-of-arms is worth quoting:—'Lutrecht aeterna Illa simulans aeternas, quaemodo sectus, arma consunt, ordine recto collumit hanc singula musica, aurea colori tintas, quemque prius oric Dilettus vulgo suscepit, quotam adhibebat vocis instinmum est, dextrae uterum vertit durum collecta sinistrum illius partem, tertiam autem videtur e male centum clipeo occupat.' Delimatte in copying this in his book, has substituted the word 'beaver' for the sign L, which is curious, because the intent of the quotation seems to demand a symbol which appears in the composer's coat-of-arms, but seldom appears in his music. He generally contradicted his facts with sharp, and wise reasons.
from the ‘Primus liber modulorum a 5,’ published by Adrian Le Roy, in whose house he lodged during the visit (Paris, August 1571). The publisher’s dedication to Charles IX. states that—

When Orlando di Lassus lately entered your presence, to kiss your hand, and modestly and deferentially greet your majesty, I saw, plainly as eyes can see, the honour you were conferring on music and musicians. For to say nothing of the right royal gifts which you have bestowed on Orlando—the book, the countenance, the words with which you greeted him on his arrival (and this I was not the only one to notice) were such, that he may truly boast of your having shown to few strangers presented to you this year, the same honour, courtesy, and kindness you showed him. And even I, Adrian, your subject and royal printer, did not fail to share with him some of that courtesy and consideration on your part. For inasmuch as I accompanied him into your presence, (because he was my guest), you, seeing me constantly by his side all the time we were in your court, asked me more than once about music, etc., etc.

Ronsard, the French poet, also speaks of the special welcome with which the King received the composer. Delmotte suggests that the visit to Paris may have had to do with a new Academy of Music, for the erection of which Charles had issued letters-patent in Nov. 1570. Several editions of Orlando’s former works were issued at Paris during his stay there with Le Roy, but the only new work of the year he does not design for his newly-made French friends. He sends it home to his kind master Duke Albert, and thus addresses him (May 1571):—‘When I reached Paris, the city which I had so long, and so ardently wished to see, I determined to do nothing, until I had first sent to you from this, the capital of France, some proof of my gratitude.’

This book was the ‘Moduli quinis vocibus,’ which, however, was written at Munich before his departure, and only published at Paris. His travels naturally interrupted his composition, and there is nothing ready to print in the next year (1572) but another set of fifteen German songs.

Once again settled in Munich, Lassus is soon at work, Adam Berg is busy providing ‘specially large and entirely new type,’ the Dukes are full of grand ideas to bring honour on themselves, and make the most of their renowned Chapel-master, and July 1573 sees the result in the issue of the first volume of the Patriocinium Musices. [See BERG, ADAM.] The work was undertaken on the responsibility of Duke William, and a portrait of that handsome prince, afterwards known as ‘William the Pious,’ appears as a front-piece.

The originators of this publication appear to have intended to continue the series until it became a selection of all the best music necessary for the services of the church. Orlando, in the preface to the first volume, hints at the work being undertaken in emulation of the service lately rendered to the church by Philip of Spain in bringing out a new edition of the Scriptures, and speaks half apologetically of the first volume (which contains only motets), as if it scarcely came up to the object of the publication. The books might almost be called ‘scores,’ the separate parts appearing together on the two opposite pages. Few publications of this kind had as yet appeared. The music takes up a great deal more space than it would if printed in separate part-books, and on this account, as well as by reason of the magnificent type, the volumes hold less than many a smaller and less pretentious edition. The series stops short in 1576, and of the second series (1589-90) Orlando contributes only the first volume. With the exception of the ‘Vigiliae Mortuorum’ in the fourth volume—which had already appeared in 1566 under the title ‘Lectiones ex prophetâ Job,’—and some of the Magnificats in vol. 5, all the contents of the volumes appear for the first time.

The second volume is dedicated (Jan. 1, 1574) to Gregory XIII. ; and it is no doubt in return for this mark of respect that Orlando receives from the Pope, on April 7, the knighthood of the Golden Spur. The fourth volume contains an interesting setting of the ‘Passion’ according to St. Matthew, in forty-one very short movements, part of the narrative being recited by the priest, and the individual utterances sung as trios or duets.

In the year 1574 Lassus started on another journey to Paris. Whether the French King had invited him for a time to his court, or whether Lassus actually accepted a permanent position there, we do not know, but whatever the object of the journey, it was frustrated by the death of Charles (May 30), and Lassus hearing of this when he had reached Frankfort, returned at once to Munich.

The year 1576, besides finishing the first series of the Patriocinium Musices, sees the publication of the third part of the ‘Tentische lieder,’ containing twenty-two nos., and the ‘Thresor de musique,’ a collection of 103 chansons, most of which had been printed in the Mellange (1570), but appear here with new words to satisfy the growing taste for psalm-singing in France. 1577 brings a small work of interest, a set of twenty-four cantiones (a 2), twelve being vocal duets, and the other twelve for instruments. The style of music is precisely the same in both cases, the absence of words in the latter twelve alone making any difference; and this proves, if there be any doubt on other grounds, that the notice frequent on title-pages of this period, ‘apt for viols and voyces,’ did not mean that the voices and instruments were to perform them together, though this they undoubtedly did at times, but that the music of the chansons and motets formed the principal repertory of the instrumentalists, and that they

1 The so-called ‘Antwerp Polyglot Bible,’ published in 1569-72 at the expense of Philip.
converted them into 'songs without words' with the concurrence of the composer. What other kinds of music the instrumentalists at Munich performed, it does not come within our province to discuss, since Lassus took no part in the direction of it. The duets having apparently found favour, Orlando goes on to publish a set of trios for voices or instruments, and as if this was a new and special idea, the first one is set to the words 'Haece quae ter triplici,' and the book dedicated to the three Dukes, William, Ferdinand, and Ernest. The most important publication of the year is 'Missae variae concentibus ornatae,' a set of eighteen masses, of which thirteen are new, printed at Paris by Le Roy, in score.

During the years 1578-80 we know of no important publications [beyond the book of Magnificats c. 5, published in Paris, 1578; he was in Italy again in May]. The illness of Duke Albert, and his death (Oct. 1579), are probably sufficient to account for this. He had done a last act of kindness to Lassus in the previous April by guaranteeing his salary (400 florins) for life. We like to think that the new set of 'Vigilae Mortuorum'—to the words of Job as before—were Lassus' tribute to the memory of his master. They were published a year or two after the Duke's death as having been recently composed. They are more beautifull than the earlier set, in proportion as they are simpler; and so simple are they, that in them human skill seems to have been thrust aside, as out of place for their purpose. Such music as this might Handel have had in his mind, when he set the words 'Since by man came death.' [In Feb. 1580 Lassus was offered, but declined, an appointment to succeed Scandelli at the court of Dresden.]

Passing on to the year 1581 we find a 'Liber Missarum,' printed by Gerlaes, containing four new masses. Of these Commer has printed one on the tune 'La, la, Maistre Pierre.' To the same date belongs a 'Libro de Villanelle, Morresche, et altre Canzonii' (a 4, 5, 8), from Paris, containing 23 numbers. [See Lechner, p. 660.]

There is much new music ready for 1582, and on Jan. 1 Orlando dedicates a book to the bishop of Würzburg, containing the second set of 'Lectiones ex libris Hiob,' already referred to, and eleven new motets. At the end of the book, and without connection with its other contents, a short tuneful setting of the curious words

Quid factes, facies Veneris cum veneris ante, Ne sedes sed eas, ne peces per eas.

Then again, on Feb. 1, 'jampridem summa diligentia compositum,' twenty-six Sacrae cantiones a 5; of which, however, we only know the last; a beautiful setting of the hymn to John the Baptist, 'Ut queant laxis,' the tenor
singing the notes of the scales with their names, and the other parts taking up the remaining words of each line, the music very interesting as a specimen of an old treatment of the scale, though scarcely so old-fashioned as might be expected. The next month, March, brings a set of Motets (a 6), 'singulari authoris industria,' for voices or instruments. These books which follow so closely on each other are not collections of old work, but, as we learn from the title-pages, had all been recently composed. The last set exists also in modern notation in the Brussels library among many such scores, prepared by the 'singular industry' of another native of Mons, M. Fétis, who was appointed by the Belgian government to bring out a complete edition of his fellow-townsmen's works, but was stopped by death from carrying out one more of the many great tasks he had accomplished and was intending to accomplish.

The successful adaptation of German words to some of Orlando's earlier French chansons leads him in the following year, 1583, to write thirty-three original ones to sacred and secular German words, 'Newe teutsche Lieder, geistlich und weltlich'—short pieces of great beauty in four-part counterpoint. Several of them have been printed by Commer. The most important publication of 1584 is the 'Penitential Psalms.' This is the work we have already spoken of under the year 1562.

A violent storm occurred at Munich on the Thursday of the Fête-Dieu in this year, and the Duke gave orders that the customary procession round the town from the church of St. Peters should be confined to the interior of the building. But no sooner had the head of the procession reached the porch of the church, and the choir was heard singing the first notes of Lassus' motet 'Gustate, videte,' than a sudden hurricane occurred in the storm, and the ceremony was performed as usual. This was looked upon as a miracle, and the people of Munich 'in their pious enthusiasm looked upon Lassus as a divine being.' Afterwards, whenever fine weather was an object, this motet was chosen. 1585 brings a new set of madrigals a 5, and a book containing, besides motets, the 'Hieremiae prophetae Lamentationes.' Besides these we have a volume of 'Cantica sacra' (24 nos.), and another of 'Sacrae cantiones' (52 nos.), both, according to the title-pages, recently composed. The first contains a setting of the 'Pater noster' a 6, and an ode to Duke Ernest, Archbishop of Cologne, and the latter a 'Stabat mater' for two four-part choirs singing alternate verses. [In Sept. and Oct. 1555 he made a pilgrimage to Loreto.]

For some years back, all the editions bear on the frontispiece some testimony to the wonderful industry of the composer. 1586 seems to bring the first warning of declining strength. It is a blank as far as publications are concerned, and the opening of 1587 brings with it the gift from Duke William of a country house at Geising on the Ammer, probably as a place of occasional retirement. Then he comes back to work, and in gratitude, no doubt, for better health, on April 15 dedicates twenty-three new madrigals to the court-physician, Dr. Merrmann. In August a new volume of the Patrocinium Musices appears, containing ten magnificats. Two masses, a 'Locutus Sum' and 'Beatus qui intelligit,' bear the same date. Towards the close of the year Orlando is begging for rest from his arduous duties as chapel-master. Portions of the Duke's decree in answer to this request are interesting—

The good and loyal services of our well-beloved and faithful servant Orland de Lassus, . . . lead us to show our favour and gratitude to him, by allowing his honourable retirement from his duties as master of our chapel, seeing that such duties are too onerous for him, and we permit him to pass some portion of each year at Geising with his family. . . . In consideration of this his appointment will be reduced 200 florins annually. . . . But, on the other hand, we appoint his son Ferdinand as a member of our chapel at a salary of 200 florins, and at the same time his other son, Rudolph, who has recently humbly asked our permission to marry, we grant his request and confer upon him the place of organist with a salary of 200 florins, on condition that he undertake the education in singing and composition of the young gentlemen of the choir.

The composer does not seem to have been satisfied with this arrangement, and again returns to his post. In 1588, in conjunction with his son Rudolph, he brings out fifty 'Teutsche Psalmen.' Commer prints the 25 nos. contributed by Orlando—and very beautiful and interesting they are—three-part hymns, the melody occurring, according to his fancy, in either of the three parts.

The volume of the Patrocinium Musices for 1589 contains six masses, the last number being the 'Missae pro defunctis,' which we may consider the last important publication of his life. Its lovely opening is an inspiration which finds no parallel in any other of his compositions.
that we have seen. As his end approaches, he has here one of those glimpses into the coming world of music which Ambros (Geschichte, iii. 356) traces in others of his works. It is, however, only in the first page or two that we find the music so astonishingly near our own idea of the opening of a Requiem.

And here his life's work seems to end; in the next volume of the Potestatem Musices we find other names, and nothing bears Orlando's but twelve German part-songs. Then an utter blank. The fresh effort to work had completely prostrated him, but death did not come at once to his relief. His wife Regina finds him one day so ill that he fails to recognise her. The Princess Maximiliana sends Dr. Meremann, at once, and there is a temporary recovery, but the mind is still at fault. 'Cheerful and happy no longer,' says Regina, 'he has become gloomy and speaks only of death.' Promises of the Duke's further bounty have no effect upon his spirits. He even writes to his patron, complaining that he has never carried out his father Albert's intentions towards him, and it needs all that Regina and the Princess Maximiliana can do to soften the effect of this act. He died at Munich on June 14, 1594. This date is taken from a letter written afterwards by his wife. The two publications 'Lagrimae di S. Pietro,' signed May 24, 1594, and 'Cantiones Sacrae' (Feast of S. Michael, 1594), may imply that his death did not take place till 1595, and that he had so far temporarily recovered as to take an interest in the publication of some old works, or perhaps even to write new ones; but it is natural to prefer the date given by his wife, in which case we must suppose these works to have been edited by other hands. He was buried in the cemetery of the Franciscans at Munich. When the monastery was destroyed, the monument which had been erected over his grave was removed, and kept in the possession of a private family. It was set up in the 19th century in the garden of the 'Académie des Beaux-Arts,' at Munich. Many more details of all these things are given by Delmotte, to whom we refer the reader.

After Orlando's death his sons edited many of his works. Thus Rudolph, the organist edited 'Propetae Sibyllarum (a 4) chroniatico moro' in 1600, and Ferdinand the chapel-master printed four of his own Magnificats with five of his father's in 1602. In 1604 they together issued 'Magnum opus musicum O. de Lasso,' by which work they have immortalised themselves, preserving in six volumes of a moderate size, most clearly and beautifully printed, no less than 516 sacred and secular motets. The addition of bars is all that is required to give the work a completely modern form. Dehn is said to have transcribed the whole of it. Ferdinand, the elder brother, died in 1609 at about fifty years of age, leaving several children, one of whom, also called Ferdinand, was sent to Italy for his musical education, and was afterwards Chapel-master to Duke Maximilian I. Rudolph, after his brother's death, edited 'sex Missae posthumae O. di Lasso' (1610) and 100 Magnificats (1619), most of them before unpublished. The two Ferdinands and Rudolph were all eminent composers, and it is said that when the King of Sweden, Gustavus Adolphus, entered Munich in 1632, he visited Rudolph at his house and ordered compositions from him.

We have mentioned the principal works published by Lassus in his lifetime or edited afterwards by his sons. Counted in separate numbers Eitner 1 brings their total to over 1500. This does not include many detached pieces published in collections of music by various composers. Again, the unpublished MSS. are very numerous. When all these are counted, the sacred and secular works are said to amount to about 1600 and 800 respectively, the chief items being 51 masses, about 1200 sacred motets and cantiones, 370 chansons, and over 250 madrigals. Of such works as have appeared in modern notation by the labours of Commer, Proske, Dehn, Van Maldeghem, etc., we may say, roughly, that they represent about an eighth part of the composer's complete works. A complete edition of Breitkopf & Härtel, begun in 1894, extends to sixteen volumes, and is expected to be finished in sixty.

Lassus was the last great Netherland master. His native land for 200 years had been as prominent in music as Germany has been in later times. Italy, a second home to every great Belgian musician since the time of Dufay, was at length to receive the reward for her hospitality, and to produce a composer to compete with the proudest of them. Josquin and Orlando were to find their equal in the Italian pupil of their countryman (Goudiuel).

Palestrina is often said to have overturned the whole fabric of existing church music in a few days by writing some simple masses for Pope Marcellus. For the truth of this story we refer the reader to the article on PALESTRINA. It serves well enough as a legend to illustrate the reformation which music had been undergoing since Josquin's time. The simpler church music did not indeed take the place of the older and more elaborate forms of the Josquin period

---

1. Forschungen der gedruckten Werke von O. de Lasso (Trutwein, 1874).
at a few strokes of Palestrina's pen. Even in the writings of Josquin himself the art can be seen gradually clearing itself from meaningless and grotesque difficulties; and there were plenty of good composers, two very great ones, Gombert and Clement, coming between Josquin and Lassus or Palestrina. The simplicity of Lassus' church music as early as 1565 shows that the story of the causes of Palestrina's revolution must not be accepted too literally. The Belgians brought up in Italy, and the Italian pupil of a Belgian, were by no means so widely separated as their too eager friends sometimes try to prove them.

Side by side in art, they laboured alike to carry on the work of the great Josquin, and make the mighty contrapuntal means at their disposal more and more subservient to expressive beauty. It seems that the simple forms of expression which Lassus and Palestrina were so often content to use, owed something to the influence of secular music, even though the composers may not have been conscious of drawing directly from such a source. But a stronger influence acting on the two musicians is to be found, we think, in the history of the religious movements of the time. Palestrina lived in Rome at a time when zealous Catholics were engaged in vigorous internal reforms as a defence against the march of Protestantism. Lassus, too, was at a court the first in Europe to throw in its lot with this counter-reformation. The music of the two composers breathes a reality of conviction and an earnestness which is made necessary by the soul-stirring spirit of the time. To Lassus, it is said, strong offers were made by the court of Saxony to induce him to come over to the work of the Protestant church. Fortunately for the art he remained true to his convictions, and was spared from being spoilt, as many of his fellow-countrymen were, by devoting themselves to those slender forms of composition which were thought suitable to the reformed religion.

Lassus himself saw no violent break separating his music from that of his predecessors, as we may infer from the list of composers whose works were performed in the Munich chapel. In that list the name of Josquin appears in capital letters, for it meant then what the name of Bach means now; and Lassus, with his softer and more modern grace, looked up with reverence and imitated, as well as his own individuality would allow him, the unbending beauty of the glorious old contrapuntist in the same way as Mendelssohn in later times looked up to and longed to imitate the Cantor of the Thomasschule.

Orlando spent his life in Germany, then by no means the most musical country or the one most likely to keep his memory alive. Palestrina, whose life of suffering and poverty contrasts strongly with Orlando's affluence and position, had at least the good fortune to plant his works in the very spot where, if they took root at all, time would make the least ravages on them. The name and works of Palestrina have never ceased to live in the Eternal City; and while the name of Lassus is little known among musical amateurs, every one is acquainted with the works of his contemporary. How much is really known of Palestrina's music we do not venture to question, but the more the better for Lassus. As soon as the world really becomes familiar with the music of the Italian, the next step will lead to the equally interesting and beautiful works of the Netherlander. Then by degrees we may hope for glimpses into that still more remote period when the art of contrapuntal music, in the hands of Josquin, first began to have a living influence on the souls of men.

[The earlier biographies of Lassus are mentioned above; those of J. Declève (1894) and E. Destouches (1894) may be referred to, as well as Adolf Sandberger's Beiträge zur Geschichte d. hayr. Hofkapelle wahr D. di Lassus (1894-1895). The author last named contributed an interesting article to vol. i. of the Riv. Mus. Ital., p. 678; and treated of Lassus' relations to Italian literature, in the Sammlungen of the Int. Mus. Ges. vol. v. p. 402.] J. R. S. B.

LAST JUDGMENT, THE. The English version, by Prof. Taylor, of Spohr's 'Die letzten Dinge,' an oratorio in two parts; text by Rochlitz, music by Spohr. Composed in the autumn of 1825, and produced in the Lutheran church, Cassel, on Good Friday, March 25, 1826. Produced in England at the Norwich Festival, Sept. 24, 1830. Given by the Sacred Harmonic Society, July 11, 1838, also July 23, 1847, Spohr conducting. This oratorio must not be confounded with 'Das jungste Gericht,' an earlier and less successful work.

G.

LAST ROSE OF SUMMER, THE. A song written by Thomas Moore to the tune of 'The Groves of Blarney'; this again being possibly a variation of an older air called 'The Young Man's dream,' which Moore has adapted to the words 'As a beam on the face of the waters may glow.' Blarney, near Cork, became popular in 1788 or 1789, and it was then that the words of 'The Groves of Blarney' were written by R. A. Millikin, an attorney of Cork. Thetune may be older, though this is not at all certain: it is, at all events, a very beautiful and characteristic Irish melody. We give it in both its forms, as it is a good example of the way in which Moore, with all his taste, often destroyed the peculiar character of the melodies he adapted. 2

1 See the account in Spohr's Selbstdiographie, II. 172.
2 The writer is indebted to Mr. F. W. Joyce for the above information. See, too, Mr. and Mrs. G. Hall's Ireland, i. 49, and Lover's Lyrics of Ireland.

The Groves of Blarney.
LAST ROSE OF SUMMER

The Last Rose of Summer.

Tis the last rose of summer Left blooming a - lone; All her lovely com-

The song 'The Groves of Blarney' was sung, and copies of the first-named melody are found in Fitzsimon's Selection of Original Melodies of Erin, folio, circa 1816, and in R. A. Smith's Irish Minstrel, circa 1825. The ballad of 'Castle Hyde,' which is unintentionally quite as comic as its parody, does not appear to have been reprinted in any collection, but copies are found on broadsides issued by the ballad printers of the Catena period. A traditional version of the air, set to a poem by Lord Byron, 'The kiss, dear maid,' and harmonised by Beethoven, is included in George Thomson's Collection of Irish Melodies, vol. ii. 1816. The copy of the 'Groves of Blarney' above printed is from Holden's Collection of Old Established Irish Slow Airs, book i. circa 1806, where the melody apparently first appears in print. At the end of the tune is a beautiful 'Ullogaun,' or lament, as a burden.

O. C. Latilla

Ullogaun to Groves of Blarney.

Holden's Airs, circa 1806.

Charles Latilla, his son, studied church music under Philip Hayes of Oxford, in which city both father and son resided, and had some degree of fame as a performer on the organ and the pianoforte. He published some sonatas for the pianoforte and other works. Date of birth and death not ascertained; the latter probably about 1810.

2 t

Lutes, John James, an English violinist and composer of the early 18th century. He studied under the best Italian masters of that day, and became leader of the concerts at Oxford. His patron, the Duke of Marlborough, gave him a professional position at Blenheim. He died in or near Oxford in 1777. His published works include violin solos, duets, and trios.

Charles Latilla, born at Bari about 1713, was a choir boy in the cathedral there, and was, later, educated at the Conservatorio di San
Onofrio in Naples, where he was a pupil of Domenico Gizzi. In 1732 his first opera, ‘Li mariti a farza’ had a great success, and was followed by many others, among which the most popular was ‘Orazio,’ brought out in Rome, 1738. On the last day of that year he was appointed vice-maestro di cappella at Santa Maria Maggiore. Incapacitated by illness, he returned to Naples in 1741, and in 1756 he went to Venice as choir director at the Conservatorio della Pietà, and in 1762 was made second conductor at St. Mark’s. In 1772 he once more returned to Naples, where his ‘Antigono’ was performed at the San Carlo in 1775; he died there in 1789, having written some thirty-six operas, much church music (preserved at the Conservatorio della Pietà and elsewhere), six string quartets published in London, and many arias and duets. Seven operas and two intermezzi are all that are now known to exist of his dramatic compositions (see Quellen-Lexikon).

M. LATROBE, REV. CHRISTIAN IGNATIUS, eldest son of Rev. Benjamin Latrobe, superintendent of the congregations of the United (Moravian) Brethren in England, was born at Fulneck, Leeds, Yorkshire, Feb. 12, 1757. In 1771 he went to the college of the United Brethren at Niesky, Upper Lusatia, returned to England in 1784, took orders in the same church, came in 1787 secretary to the Society for the Furtherance of the Gospel, and in 1795 was appointed secretary to the Unity of the Brethren in England. Although Latrobe never followed music as a profession he cultivated it assiduously from an early age. His earlier compositions were chiefly instrumental; three of his sonatas, having met with the approval of Haydn, were published and dedicated to him. His other published compositions include Lord Roscommon’s translation of the ‘Dies Irae,’ 1799; ‘The Dawn of Glory,’ 1803; Anthem for the Jubilee of George III., 1809; Anthems, by various composers, 1811; Original Anthems, 1823; ‘Te Deum, performed in York Cathedral’; ‘Miserere, Ps. 51’; and ‘Six Airs on serious subjects, words by Cowper and Hannah More.’ He edited the first English edition of the Moravian Hymn Tunes. But his most important publication was his Selection of Sacred Music from the works of the most eminent composers of Germany and Italy, six vols. 1806-25, through the medium of which many fine modern compositions were first introduced to the notice of the British public. He died at Fairfield, near Manchester, May 6, 1836.

REV. JOHN ANTEST LATROBE, M.A., his son, born in London in 1799, was composer of several anthems. He was educated at St. Edmund Hall, Oxford, was B.D. in 1826 and M.A. in 1829, took orders in the Church of England, and was incumbent of St. Thomas’s, Kendal, from 1840 to 1865, and honorary canon of Carlisle from 1858. He was author of The Music of the Church considered in its various branches, Congregational and Choral, London, 1831, and Instructions of Chenanchia, a book of directions for accompanying chants and psalm tunes (1832). He died at Gloucester, Nov. 19, 1878.

The following are the contents of Latrobe’s valuable selection, arranged alphabetically. The pieces are all in vocal score, with compressed accompaniments; some to the original text, some to translated words.

LAUB, FERDINAND, one of the most remarkable violin players of his day, was born Jan. 19, 1832, at Prague, where his father was a musician. His talent showed itself very early; at six he mastered Variations by De Bériot, and at nine performed regularly in public. He was a pupil of the Prague Conservatorium under Minkler, and at eleven years old he attracted the notice of Berioz and Ernst, and shortly after was taken up by the Grand Duke Stephen, and by him sent to Vienna in 1847. After this he visited Paris, and, in 1851, London, where he played at the Musical Union, and in
whole concludes with an Amen. Alleluia, of unusual beauty.

The poetry of the Lauda Sion has been many times subjected to polyphonic treatment of a very high order. Palestrina has left us two settings of the Sequence for eight voices, arranged in a double choir, and a shorter one for four. The first, and best known, was printed, in 1575, by Alex. Gardamus, in the Third Book of Motets for five, six, and eight voices; and is one of the earliest examples of that peculiar combination of two choirs, consisting of unequally balanced voices, which Palestrina has made so justly famous—the voices selected being, in this case, Cantus I. and II., Altus, and Bassus, in the first choir, and Altus, Tenor I. and II., and Bassus, in the second. Its style is, in many respects, analogous to that of the celebrated Stabat Mater. As in that great work, several of the verses—from Bone Pastor, to In terra viventium, inclusive—are written in triple measure. But—as may be seen from the following example—the Lauda Sion is also remarkable for its close adherence, as a general rule, to the Plain-song melody.

A reprint of this beautiful composition will be found in vol. iii. of the complete edition of Palestrina’s works published by Breitkopf & Härtel. The other eight-part setting, in triple measure throughout, formerly known only through the medium of a MS. in the Library of the Collegio Romano, at Rome, has been published in vol. vii. of the same series.

Mendelssohn has also chosen the text of the Lauda Sion as the framework of a delightful Cantata, for four solo voices, chorus, and orchestra, composed in 1846, and first performed, in that year, at Liège, on the Feast of Corpus Christi (June 11). Though less elaborate in form than the ‘Lobgesang’ and some of its fellow cantatas, this fine production is strikingly characteristic of its author’s best style. It would be difficult to find a happier example of his treatment of the Arioso than that exhibited in Caro cibus. In Sì tuus plecta every phrase dictated by the soprano solo is immediately repeated in chorus, in a way which forcibly reminds us of the well-known movement, ‘The enemy shouteth,’ from ‘Hear my prayer.’ In Docti sacris, a fragment of the Plain-song is treated after the manner of a Chorale,—but changed from the Eighth into the Tenth Mode, and, therefore, invested with a totally new character. In Sì tuus unus the dramatic element is introduced, with almost startling effect; and the whole concludes with a noble chorus, adapted to the words Bone Pastor, and the concluding verses of the hymn. The student will find it interesting to compare this essentially modern adaptation of the text with the purely ecclesiastical treatment adopted by Palestrina. W. S. R.

LAUDI SPIRITUALI. A name given to certain collections of Devotional Music, compiled for the use of the ‘Laudisti’—a Religious Confraternity, instituted, at Florence, in the year 1310, and afterwards held in great estimation by S. Charles Borromeo, and S. Philip Neri.

The poetry of the ‘Laudi’—some ancient specimens of which are attributed, by Crescimini, to S. Francis of Assisi—was originally written entirely in Italian, and bears no trace of classical derivation. The music to which it is adapted—inclining rather to the character of the Sacred Canzonet, than to that of the regular Hymn—was, at first, unisonous, and extremely simple; though, after a time, the Laudisti cultivated part-singing with extraordinary success.

A highly interesting MS. volume, once belonging to a company of ‘Laudisti,’ enrolled, in
the year 1336, at the Chiesa d'Ogni Santi, at Florence, is now preserved in the Magliabechi Library: and, from this, Burney (Hist. ii. 328) quotes a very beautiful example—' Alle Trinità beata'—which, of late years, has become popular in this country, though, in all the English editions we have seen, the melody is sadly mutilated, and strikingly inferior in character to the original reading. The earliest printed collection is dated 1485. This, however, would seem to have been either unknown to, or unrecognised by, the disciples of S. Philip Neri; for, in 1565, Giovanni Animuccia, who acted as his Maestro di Capella, published a volume entitled 'Il primo libro delle Laudi,' followed by a 'Secondo libro,' of more advanced character, in 1570. These sacred songs, which formed the germ of the performances afterwards called Oratorios, became so popular among the youths who flocked to S. Philip for instruction, that, in 1588—seventeen years after the death of the saintly Animuccia—P. Soto thought it desirable to edit a third volume, containing unacknowledged works, for three and four Voices, by some of the greatest composers of the age. In 1589, the same zealous editor published an amended reprint of the three volumes, consolidated into one; succeeded, in 1591, by a fourth volume, dedicated to the Duchess d'Aquasparta. Serafino Razzi published a large collection, in 1563, and many others followed—for, at this period, almost every large town, and even many an important parish, had its own Company of Laudisti, who sang the poetry of Lorenzo de' Medici, Poliziano, Pulci, Bembo, Ludovico Martelli, Giambellari, Filicida, and other celebrated writers, with undiminished interest, though, as time progressed, the character of the music sensibly deteriorated.

In the year 1770, Burney heard the Company of Laudisti attached to the Church of S. Maria Maddalena de' Pazzi, in Florence, sing, with excellent effect, in some street processions, as well as in some of the churches, from a book then just published for their use; and, however true it may be that part-singing in Italy is not what it was some centuries ago, representatives of the confraternity are said to be still in existence, striving to do their best in a more modern style.

LAUDS (Lat. Laudes). The name given to that division of the Canonical Hours which immediately follows Matins.

The Office of Lauds opens, according to the Ritual of the Western Church, with the series of Versicles and Responses beginning, 'Deus in adjutorium meum intende,' followed by select Psalms and a Canticle, sung in five divisions, with five proper Antiphons. These are succeeded by the 'Capitulum' (or 'Little Chapter'); the Hymn for the Day, with its proper Versicle and Response; and the 'Benedictus.' On festivals this, with its Antiphon, is sung while the Officiating Priest and his Ministers are engaged in ceasing the Altar. The Service then concludes with the Collect for the Day; the Commemonations (as at Vespers); and the 'Antiphon of the Blessed Virgin,' proper for the Season.

On certain Festivals, the Antiphons, at Lauds, are doubled, as at Matins. The Plain-song music adapted to it will be found in the Antiphon. [See MATINS; ANTIPHON.]

In the Prayer-Book the name of 'Mattins' is given to the English service which was made up out of the combined Offices of Matins, and Lauds.

LAUFENBERG (LOUENBERG), HEINRICH von, medieval ecclesiastic and poet, was, in 1434, dean at Zofingen between Basle and Lucerne, later at Freiburg-im-Breisgau, and in 1446 entered the Johanniter-kloster at Strasbourg. He desires mention as being one of the first to adapt German sacred words to old secular tunes, so as to save the beautiful tunes while rejecting the objectionable words with which they were at first associated, a practice which was afterwards so much in vogue at the time of the Reformation. His poems may be found in Wackenagel, Das deutsche Kirchenlied, Bd. II. Nos. 701-798. Ambros (Geschichte der Musik, ii. pp. 256-59) quotes his German paraphrase of the Salve Regina, words and music, but mistakenly attributes the melody to Laufenberg, though he afterwards so far corrects himself as to describe it as 'eine volksthümliche Umbildung der kirchlichen Melodie.' R. von Liliencron (Monatschrift für Gottesdienst und Kirchliche Kunst, 1896, p. 265) has shown that the melody is nothing else but that of the Plain-song Salve Regina, the text of which Laufenberg has so paraphrased in German verse, that every note of the plain-song melisma is sung to a separate syllable. The whole piece is an interesting example of the practice by which the originally textless melismata on the final syllable of the Gradual Alleluias were developed into the Proses and Hymns called Sequences. For the use of his choir at Leipzig, Carl Riedel edited several 'Altdeutsche Geistliche Lieder' by Laufenberg, arranged for four voices, and published by E. W. Fritzsch.

LAUTE. Germ. für LUTE, q.v.

LAUTENCLAVERYMBEL, ' lute -harpsichord,' invented by J. S. Bach in 1740, strong with gut strings for the two 'unison' stops, and with an octave stop of wire. Its tone, when checked by a damper of cloth, was so like a lute as to deceive a lute-player by profession. (See HARPISCHORD, p. 332, and Adlung's Mos. Mev. ii. 139; Spitta's J. S. Bach, Engl. transl. ii. 47.)

LAUTERBACH, JOHANN CHRISTOPH, distinguished violonist, was born July 24, 1832, at Culmbach in Bavaria. His education he received at the school and gymnasium of Würzburg, where he also learnt music from Bratsch and Prof. Frohlich. In 1850 he entered the
Conservatoire at Brussels as pupil of De Bériot and Pétis; in 1851 received the gold medal, and during Léonard's absence took his place as Professor of the violin. In 1853 he became Concertmeister and Professor of the violin at the Conservatorium of Munich; in 1861, on the death of Lipinski, was appointed second Concertmeister of the royal band at Dresden, and in 1873 succeeded to the first place. From 1861 to 1877 he also held the post of principal teacher of the violin in the Conservatorium of Dresden, with great and increasing renown. He has travelled much, and always with success. He spent the seasons of 1864 and 1865 in England, appearing at the Philharmonic on May 2 of the former, and May 15 of the latter year, and playing also at the Musical Union. In Paris he played at the last concert at the Tuileries before the war; and received from the Emperor Napoleon a gold snuff-box set with diamonds. He is decorated with many orders, both of North and South Germany. In the summer of 1876 he met with a serious mountain accident in Switzerland, by which several of his companions were killed and he himself severely injured. He, however, completely recovered. Lauterbach's style unites the best peculiarities of the Belgian school, great polish and elegance, with the breath of tone and earnestness of the Germans. p. d.

LAVENU, Lewis, an important London music-publisher, who was in business in 1796 at 23 Duke Street, St. James's. About 1800 he had removed to 29 New Bond Street, and in 1803 he entered into partnership with Mitchell. In 1809 Mitchell dropped out of the firm, and L. Lavenu was sole proprietor.

Elizabeth Lavenu, probably a relative, was in business on her own account about 1820 at 24 Edwards Street, Manchester Square, but she appears shortly before 1822 to have succeeded to the business at 28 Bond Street, where in 1838 Louis Henry Lavenu was in partnership with Nicholas Mori the violinist.

The Lavenu family issued great quantities of sheet music, vocal and instrumental, almost always printed on coarse, blue-tinged paper. F. K.

Louis Henry Lavenu, son of a lautist and music-seller, born in London in 1818. He was a pupil of the Royal Academy of Music, where he studied composition under Bochsa and Potter. Before leaving the Academy he was engaged as a violoncellist at the Opera and the Westminster Abbey Festival of 1834. He was also in business as a music-seller in partnership with his stepfather, Nicholas Mori, the eminent violinist, after whose death, in 1839, he continued the business alone for a few years. During this time he published a few songs and short pianoforte pieces composed by himself. His opera, 'Loretta, a Tale of Seville,' words by Bunn, was produced at Drury Lane, Nov. 9, 1846, with success. Dissatisfied with his position, Lavenu emigrated to Australia, obtained the post of director of the music at the Sydney Theatre, and died at Sydney, August 1, 1859. W. H. H.

LAVIGNAC, Alexandre Jean Albert, was born in Paris, Jan. 22, 1846, and was a pupil of the Conservatoire, carrying off the first prize for solfège in 1857, the first prize for piano in 1861, the first for harmony and composition in 1863, the second for organ in 1865, and the first for counterpoint and fugue in 1864. He was appointed professor of solfège in 1882, and in 1891 professor of harmony; he is now the dean of the teaching staff. His educational works are Solfèges (six volumes); a Cours complet théorique de dictée musicale, a work which suggested to many French conservatoires the practical value of musical dictation; Cinquante leçons d'harmonie, L'Ecole de la Palais (for pianists), piano pieces for four hands, ten preludes, and many pianoforte solos, and pieces for various instruments. His works in musical literature have made his name famous outside France; they are La Musique et les Musiciens (1895) and Le Voyage artistique à Bayreuth (1897). The latter, expanded from the original, and translated by Esther Singleton, was published in London in 1898 as The Music Drama of Richard Wagner, and is considered one of the most useful of the many handbooks to Wagner's works. C. F.

LAVIGNE, Antoine Joseph, born at Bézangon, March 23, 1816, received his early musical education from his father, a musician in an infantry regiment. On Jan. 24, 1830, he was admitted a pupil of the Conservatoire at Paris, where he studied the oboe under Vogt, but was obliged to leave on May 3, 1835, on account of his father's regiment being ordered from Paris. He resumed his position on Oct. 17, 1836, and obtained the first prize in 1837. He was for several years principal oboe at the Théatre Italien at Paris. In 1841 he came to England, and appeared as oboe soloist at the Promenade Concerts at Drury Lane, and was for many years a member of Hallé's orchestra at Manchester. [He fell into great poverty and distress, and was admitted into the infirmary of St. Saviour's, Southwark, in 1885, and removed thence to the Royal Infirmary, Manchester, where he died Aug. 7, 1886. W. H. H.] He addressed himself with great earnestness to applying to the oboe the system of keys which Boehm (or Gordon) had contrived for the flute, and devoted several years to perfecting the instrument. This admirable player had great execution and feeling; but what was most remarkable was his power and length of breath, which, by some secret known to himself, enabled him to give the longest phrases without breaking them. W. H. H.

LAVOIX, Henri Marie François (known as Lavoix fils, to distinguish him from his
father, the conservatore of the collection of coins in the Bibliothèque Nationale), eminent writer on music, was born in Paris, April 26, 1816, was educated at the university of the Sorbonne, where he took the degree of bachelor, while studying harmony and counterpoint with H. Cohen. His writings on musical history are as follows:—Les Traducteurs de Shakespeare en musique (1869); La Musique dans la Nature (1873); La Musique dans l'imagerie du moyen-âge (1875); Histoire de l'instrumentation (1878, crowned by the Academy): Les principes et l'histoire du chant (with Th. Lemaire): La Musique au siécle de Saint-Louis; Histoire de la Musique; Histoire de la Musique française; and many articles in magazines, etc. He was appointed librarian of the Bibliothèque Nationale in 1865, and died in Paris, Dec. 17, 1897. G. F.

LAWES, HENRY, son of Thomas Lawes [who was probably identical with a vicar-choral of Salisbury of that name] was born at Dinton, Wiltshire, probably in Dec. 1595, as he was baptized Jan. 1, 1595-96. He received his musical education from Giovanni Coperario. On Jan. 1, 1625-26, he was sworn in as epistleter of the Chapel Royal, and on Nov. 3 following, one of the gentlemen, and afterwards became clerk of the choir. In 1633 he furnished music for Thomas Carew's masque, 'Colum Britannicum,' performed at Court, Feb. 18, 1633-34. In this masque the Earl of Bridgewater's two sons took part, and this circumstance

very probably led to his being employed as music-teacher in the family, and so to the production of Milton's masque, 'Comus,' produced at Ludlow Castle on Michaelmas night. Lawes performing the part of the Attendant Spirit. Both Hawkins and Burney have printed 'Sweet Echo,' one of the songs in 'Comus.' The whole of the songs are in the British Museum, Add. MS. 11,518, [and the music was published entire by the Mermaid Society in 1904. In Peck's New Memoirs, etc., p. 12, it is stated that the choice of Milton to write the masque origi-

nated with Lawes.] In 1637 appeared 'A Paraphrase vpon the Psalmes of David. By G[eorge]S[andys]. Set to new Tunes for private Devotion. And a thorow Base, for Voice or Instrument. By Henry Lawes'; and in 1648 'Choice Psalmes put into Musick for Three Voices. . . . Composed by Henry and William Lawes, Brothers and Servants to His Majestie. With divers Elegies set in Musick by several friends, upon the death of William Lawes. And at the end of the Thorough Base 1 are added nine 2 Canons of Three and Four Voices made by William Lawes.' A copper-plate portrait of Charles I., believed to be the last published in his lifetime, accompanies each part, and amongst the commendatory verses prefixed to the work is the sonnet, addressed by Milton to Henry Lawes in Feb. 1645-46, beginning 'Harry, whose tuneful and well-measured song,' [As to the difficulties connected with this date, and the original title, see Notes and Queries, 2nd ser. vi. 337, 395, 492.] Lawes composed the Christmas songs in Herrick's 'Hesperides,' and the songs in the plays and poems of William Cartwright, Comedies, and tragico-Comedies, with other poems by Mr. William Cartwright. . . . The Ayres and Songs set by Mr. Henry Lawes . . . London, 1651. It contains no music, however. In 1652 some of his songs appeared in Playford's 'Select Musical Ayres,' and in 1653 Lawes published 'Ayres and Dialogues for One, Two and Three Voyces,' with his portrait, from which the above is taken, finely engraved by Faithorne on the title. This was received with such favour as to induce him to issue two other books with the same title in 1655 and 1658. In 1656 he was engaged with Capt. Henry Cooke, Dr. Charles Colman, and George Hudson in providing the music for Davenant's 'First Day's Entertainment of Musick at Rutland House.' On the Restoration in 1660, Lawes was reinstated in his Court appointments. He composed the anthem 'Zadok the Priest,' for the coronation of Charles II. He died Oct. 21, 1662, and was buried Oct. 25 in the cloisters of Westminster Abbey. Many of his songs are to be found in 'Select Musical Ayres and Dialogues,' 1652, 1653, and 1659, and 'The Treasury of Musick,' 1669.

Henry Lawes was highly esteemed by his contemporaries, both as a composer and performer. Milton praises him in both capacities, and Herrick in an epigram places him on a level with some of the most renowned singers and players of his time; but later writers have formed a lower estimate of his abilities as a composer. Burney declares his productions to be 'languid and insipid, and equally devoid of learning and genius'; and Hawkins speaks of his music as deficient in melody and 'neither recitative nor air, but in so precise a medium between both that a name is wanting for it.'

1 The work is in separate parts. 2 Really ten.
But both appear to judge from a false point of view. It was not Lawes's object to produce melody in the popular sense of the word, but to set 'words with just note and accent,' to make the prosody of his text his principal care; and it was doubtless that quality which induced all the best poetical writers of his day, from Milton and Waller downwards, to desire that their verses should be set by him. To effect his object he employed a kind of 'aria parlante,' a style of composition which, if expressively sung, would cause as much gratification to the cultivated hearer as the most ear-catching melody would to the untrained listener. [His songs, by a natural consequence, appeal forcibly to modern ears.] Lawes was careful in the choice of words, and the words of his songs would form a very pleasing volume of lyric poetry. Hawkins says that notwithstanding Lawes was a servant of the church, he contributed nothing to the increase of its stores; but, besides the coronation anthem before mentioned, there are (or were) in an old choir book of the Chapel Royal fragments of eight or ten anthems by him, and the words of several of his anthems are given in Cliffor'd's 'Divine Services and Anthems,' 1664. A portrait of Henry Lawes is in the Music School, Oxford. [Another painted in 1622, is in the bishop's palace at Salisbury. See a reference to him in Aubrey's Miscellanies, ed. 1890, p. 139.]

John Lawes, a brother of Henry, was a lay vicar of Westminster Abbey. He died in Jan. 1654-55, and was buried in the Abbey cloisters.

Thomas Lawes, probably the father of William and Henry Lawes, was a vicar choral of Salisbury Cathedral. He died Nov. 7, 1640, and was buried in the north transept of the cathedral.

William Lawes, elder brother of Henry, received musical instruction from Coperario at the expense of the Earl of Hertford. He became a member of the choir of Chichester Cathedral, which he quitted in 1602, on being appointed a gentleman of the Chapel Royal. He was sworn in Jan. 1, 1602-3. On May 5, 1611, he resigned his place in favour of Ezekiel Waud, a lay vicar of Westminster Abbey, but on Oct. 1, following, was readmitted 'without pale.' He was also one of the musicians in ordinary to Charles I. In 1635 he joined Simon Ives in the composition of the music for Shirley's 'Triumph of Peace.' [In 1635 he wrote the music for Davenant's masque, 'The Triumph of the Prince d'Amour,' preserved in the Bodleian (Music Sch. MSS. B, 2, 3, and D, 229.)] An anthem by him is printed in Boyce's 'Cathedral Music'; songs and other vocal compositions in 'Select Musical Ayres and Dialogues,' 1653 and 1659; 'Catch that catch can,' 1652; 'The Treasury of Musick,' 1669; and 'Choice Psalms,' 1618; and some of his instrumental music in 'Courtly Masquing Ayres,' 1662. His portrait is in the Music School, Oxford. 'The Royal Consort' for viols, consisting of sixty-six short pieces, and some 'Airs' for violin and bass are in the British Museum, Add. MSS. 10,445, 31,431-2; [the latter MS. contains also a canon, 'Tisjoy to hear,' and fifty-five vocal compositions. Add. MSS. 29,410-4, and 17,798 contain more of his pieces, and in the Christ Church Library are his 'Great Consorte' (I. 5. 1-6) and other works (I. 4, 79-82, 91-3, K. 3, 32, and H. I. 12 and 18). Canons and MS. songs are contained in Brit. Mus. Eg. MS. 2013, Add. MSS. 29,396-7, 30,273, 31,423, 31,433, 31,462. His best-known work is the part-song 'Gather ye rose-buds while ye may.' On the breaking out of the Civil War he joined the Royalist army, and was made a commissary by Lord Gerrard, to exempt him from danger, but his active spirit disdaining that security, he was killed by a stray shot during the siege of Chester, 1645. W. H. Lawrowska, Mme. Elizabeth Andrejewna Lawrowska, well known as Mme. Lawrowska, was born Oct. 12, 1845, at Kaschin, Tver, Russia. She was taught singing by Feni, at the Elizabeth Institute, and by Mme. Nissen-Saloman at the Conservatorium, St. Petersburg. In 1867 she made her début as Orpheus at three performances of Gluck's opera, given by the students of the Conservatorium under Rubinstein, at the Palace of the Grand Duchess Helena, thanks to whose kindness she was enabled to study abroad. From 1868 to 1872 she was engaged at the Russian Opera- The Theatre Marie, and on July 31, 1871, she married the Prince Zeretew at Odessa. In 1868 she was announced to sing at the Italian Opera, Covent Garden, but did not appear. She left the opera for a time and sang in concerts all over Europe, having received further instruction from Mme. Viardot-Garcia. She visited this country in 1873, and made her first appearance, Feb. 24, at the Monday Popular Concerts, and March 1 at Crystal Palace. During her stay she made a great impression by her grand mezzo-soprano voice and fine declamatory powers of singing in operatic airs of Handel and Glinka, and in the Lieder of Schubert, Schumann, etc. In 1881 she reappeared in England in concerts, but for a very short period. In 1878 she returned to the St. Petersburg Opera. The principal Russian operas in which she has performed are 'La Vie pour le Czar' and 'Russian and Ludmila' of Glinka, 'Rusalka' of Dargomjjsky, and 'Wrazyja Silow' of Serov. A. c.

Lay. A Provençal word, originally probably Celtic, meaning at first a sound or noise, and then a song, especially the tune, as the quotations from Spenser, Milton, and Dryden in Johnson's Dictionary prove. Beyond this general sense the term has no application to music. The German 'Lied' is another form of the word. c.

Lay Vicar or Lay Clerk, a singer in Cathedral Choirs. [See Vicar Choral.]
LAYOLLE

LAYOLLE, Francisq uis de, or Francesco dell' Aiolle, a French composer of the earlier part of the 16th century, who settled as organist at Florence about 1540, and was Benvenuto Cellini's teacher in music. He edited, for the Lyons music-printer, Jacques Moderne or Modernus, a book of ten Masses ('Liber deum Missarum,' 1532-40), among which are three masses and three motets by himself. His mass 'Adieu, mes amours' Ambros describes as a remarkable work. His other works are canzoni a 5 and a 4 published by Modernus, 1540 and later, and other madrigals and motets in various collections. From a rare work entitled 'Contrapunctus seu figurata musica super plano Cantu, etc., Lyons, 1528, Kade in his 'Beilagen zu Ambros' has reprinted two motets by Layolle, 'Salve Virgo singularis' and 'Media vita,' both a 4, which, as the title of the work indicates, are contrapuntal studies on a plain-song tenor. From this connection of Layolle with works printed in Lyons, it would seem as if Lyons had been his birthplace, and it appears that Aleman Layolle, his son, was for a while organist at Lyons, but afterwards returned to Florence, and was music-teacher to a daughter of Benvenuto Cellini.

LAYOLS, Francois, a famous French singer, whose real name was Lay, born Feb. 14, 1755, at La Barthe de Nesteis in Gascony. He learned music in the monastery of Guarison, but before he was twenty his fame as a singer had spread, and in April 1779 he found himself at Paris to be tried for the Grand Opéra. His name first appears in Lajarte's catalogue of first representations, as Pétrarque, in a 'pastoral héroïque' by Candille, called 'Laure et Pétrarque,' July 2, 1759, and is spelt Luis. His next mention is in the 'Iphigenie en Tauride' of Ficinj, Jan. 28, 1781, where he has the rôle of a corayphée. After that he appears frequently in company with Mlle. Saint-Hubert, a famous soprano of that day; he was also attached to the concerts of Marie Antoinette, and to the Concert Spirituel. He was a poor actor, unless in parts specially written for him; but the splendour of his voice made up for everything, and he preserved it so well as to remain in the company of the Grand Opéra till Oct. 1822. Lays was a violent politician on the popular side, which did not please his colleagues, and some quarrels arose in consequence, but with no further result than to cause him to write a pamphlet, and to force him, after the 9th Thermidor, to appear in parts distasteful to him, and to sing before the Bourbons after the Restoration. He was professor of singing at the Conservatoire from 1796 to 1799, when he retired from the post; and from 1819 to 1826 held the same office in the 'École royale de chant et de déclamation.' He had been principal singer in the chapel of Napoleon from 1801 till the fall of the Emperor, but was cashiered by Louis XVIII. After leaving the École he retired to Ingrandre near Angers, where he died March 30, 1831. We have said that he was not a good actor, but Fétis pronounces him not even a good singer, saying that his taste was poor, and that he had several bad tricks; but he had warmth and animation, and the beauty of his voice so far atoned for all, that for a long time no opera could be successful in which he had not a part.

LAZARUS, Henry, born in London, Jan. 1, 1815, commenced the study of the clarinet when a boy under Blizard, bandmaster of the Royal Military Asylum, Chelsea, and continued it under Charles Godfrey, sen., bandmaster of the Coldstream Guards. After fulfilling engagements in various theatrical and other orchestras he was, in 1888, appointed as second to Willman at the Sacred Harmonic Society. On the death of Willman in 1840 Lazarus succeeded him as principal clarinet at the Opera and all the principal concerts, festivals, etc. in London and the provinces, a position he retained for many years with great and ever-increasing reputation. In both orchestral and solo-playing the beauty and richness of his tone, his excellent phrasing, and his neat and expressive execution, were alike admired. He was a professor of his instrument at the Royal Academy of Music from 1854, and at the Military School of Music, Kneller Hall, near Hounslow, from 1858. [He gave a farewell concert in St. James's Hall, May 31, 1892, and died in London, March 6, 1895.]

LAZZARI, Silvio, though born at Botzen, Tyrol, Jan. 1, 1858, ranks as a French composer, for after studying law at Innsbruck and Munich, he entered the Paris Conservatoire in 1882, but his chief studies were carried on under César Franck. The following works have been publicly performed:—The perennial 'Luth' brought out in 1887; the musical drama, 'Armour,' at the Landestheater in Prague in 1898, and 'L'Encores;' in Paris in 1903. For orchestra he has written a 'Rhapsodie espagnole,' 'Ophélie,' a symphonic poem; 'Impressions'; 'Effet de Nuit;' 'Marche de Fête,' a fantasy for violin and orchestra, and a concertibile for piano and orchestra. His chamber compositions include a sonata for piano and violin, a trio, a string quartet, an octet for wind instruments, duets and choruses for female voices, and numerous songs and piano pieces.

LAZZARINI, Gustavo, was born (as some biographers say) at Padua, or (according to others) at Verona, about 1765. His début was made at Lucca in 1789, in Zingarelli's 'Ifigenia in Aulide,' with great éclat. In the two following years he appeared in London, singing both in serious and comic operas, such as Bertoni's 'Quinto Fabio' and the 'Locanda' of Paisiello, in the former with Pacchierotti, but taking the principal rôle in the latter. Lord Mount-

VOL. II
Edgcumbe thought him 'a very pleasing singer with a sweet tenor voice.' During the Carnival of 1794 he sang at Milan, with Grassini and Marchesi, in Zingarelli's 'Artaserse' and the 'Demofoonte' of Portogallo, and bore the comparison inevitably made between him and those great singers. He sang there again in 1795, and once more in 1798, appearing on the latter occasion in Cimarossa's 'Orazii' and Zingarelli's 'Meltegro,' with Riccardi and Crescimini. In 1801 he was one of the Opera Buona troupe at Paris, where he was again heard to advantage by Lord Mount-Edgcumbe (1502), singing in company with La Strinascici and Georgi Bellin. But his voice had now lost much of its freshness, though the great style remained. Lazzarini published two volumes of Italian airs, and a Pastoral, both at Paris (Carli). His portrait was engraved there by Nlot Dufrene, an operatic singer.

LEACH, JAMES, born at Wardle, near Rochdale, Lancashire, in 1762, was at first a handloom weaver. From 1789 he was a tenor singer and teacher in Rochdale, and at Salford a few years later. He published a 'New Set of Hymn and Psalm Tunes, etc.' (Preston, London, 1789); and a 'Second Set of the same, probably about 1794. His tunes are found in several of the American collections, as the Easy Instructor (Albany, New York, 1798), and the Bridgewater Collection (Boston, 1802). The David Companion or Methodist Standard (Baltimore, 1810) contains forty-eight of his pieces. For more details see a letter signed G. A. C. in the Musical Times for April 1878, p. 226. In the Rev. H. Parr's 'Church of England Psalmody' will be found Mount Pleasant, Oldham, and Smyrna, by him, which used to be favourites in certain congregations. His 'Psalmody' was brought out in 1886, with a biographical sketch by Thomas Newbigging. Leach died from a stage-coach accident, near Manchester, Feb. 8, 1798, and is buried at Rochdale.

LEAD, TO, in fugues or imitative music is to go off first with a point or subject, which is afterwards taken up by the other parts successively. Thus in the Amen Chorus in the Messiah' the bass 'leads,' the tenor taking up the subject at the sixth bar, the alto at the tenth, and so on. In the separate voice parts the fact is often stated ('Tenors lead,' etc.), that the singers may be on their guard, and the part is then said 'to have the lead.'

LEADER. The chief of the first violins is the leader of the orchestra, the Concertmeister of the Germans, and Chef d'attaque of the French. He is close to the conductor's left hand. The position is a most important one, as the animation and 'attack' of the band depend in great measure on the leader. The great precision and force of the Gewandhaus orchestra, for instance, is said to have been mainly due to David being for so long at the head of them. It is the leader's duty to play any passages for solo violin that may occur in works other than violin concertos; and in orchestras that are not organised institutions the leader often makes the engagement with the individual members.

LEADING NOTE (Fr. Note sensible; Germ. Leitton). In modern music it is absolutely indispensable for all harmonic progressions to have an appreciable connection with a tonic or keynote, and various lines converge to indicate that note with clearness; among these an important place is occupied by the Leading Note, which is the note immediately below the keynote, and separated from it by the smallest interval in the system, namely a semitone. Helmholtz has pointed out that in actual relationship to the tonic it is the remotest of all the notes in the scale, since the supertonic, which also appears to be very remote, at least comes nearer in being the fifth to the dominant, while the leading note is only the third. For this reason, and also from its not being capable of standing as a root note to any essential diatonic chord in the key, it seems to have no status of its own, but to exist merely as preparatory to the tonic note, for which, by reason of its close proximity, it seems to prepare the mind when it is heard; and the melodious tendency to lead up to the most important note in the scale is the origin of its name.

In many scales, both of civilised and barbarous peoples, it has found no place. In many of the medieval ecclesiastical scales, as in the Greek scales from which they were derived, the note immediately below the tonic was separated from it by the interval of a whole tone, and therefore had none of the character of a leading note; but as the feeling for tonality gained ground in the Middle Ages hand in hand with the appreciation of harmonic combinations, the use of the leading note, which is so vital to its comprehension, became more common. Ecclesiastics looked upon this tampering with the august scales of antiquity with disfavour, and Pope John XXII. passed an edict against it in 1322; consequent the accidental which indicated it was omitted in the written music; but the feeling of musicians was in many cases too strong to be suppressed, and the performers habitually sang it, wherever the sense of the context demanded it, nor do we learn that the ecclesiastics interfered with the practice as long as the musicians did not let the world see as well as hear what they were doing. Notwithstanding this common practice of performers, the scales maintained their integrity in many respects, and there resulted a curious ambiguity, which is very characteristic of medieval music, in the frequent interchange of the notes, a tone and a semitone below the tonic. Musicians were long beguiled by the feeling that the true scales should have the note below the tonic removed from it by the interval of a tone, and
that it was taking a liberty and pandering to human weakness to sharpen it; and the clear realisation of those principles of tonality upon which modern music is based was considerably retarded thereby, so that works both vocal and instrumental are characterised by a vagueness of key-relationship, which the use of the leading note alone can remove, till far on into the 17th century; by the time of Bach and Handel, however, the ancient scales had been fused into the major and minor modes of the modern system, and the leading note assumed the office it has ever since occupied. The gradual realisation of the importance of the leading note and the influence it had upon the development of modern music is traced in the article Harmony, and reference may also be made to chap. xiv. of the Third Part of Helmholtz's The Sensations of Tone, etc. [In some modern treatises the melodic fall of a semitone to the key-note is called a 'downward leading note.]

C. H. P.

LEBERT, SIGMUND (real name Levy), the virtual founder of the Stuttgart Conservatorium, was born at Ludwigsburg, in Württemberg, Dec. 12, 1822, and got his musical education from Tomaschek and D. Weber at Prague. He settled in Munich as a pianoforte teacher for some years before 1856, where with Faisst, Stark, and others, he started the music school. He was a very accomplished and successful teacher, though the merit of his system—the percussive one, which often leads to thumping—may be questioned. [The Grosse Pianoforte Schule which he edited with Stark, was published by the house of Cotta, and afterwards revised by Max Paner (1904); the famous edition of Beethoven's sonata, issued by the same firm, was begun by these editors and continued by Hans von Bülow. Lebert died at Stuttgart, Dec. 8, 1884.]

LEBHAFT, i.e. lively, the German equivalent for l'èvoc. Beethoven used it, during his temporary preference for German terms, in the pianoforte sonata op. 101, where we find the two directions 'Etwas lebhafter' etc. and 'Lebhaft, marschmässig,' which is exactly equivalent to 'Vivace à la marcia.' Schumann uses it constantly; 'allerst lebhaft' is l'èvocissimo.

LE BORNE, FEARN, born March 10, 1862, is of Belgian origin, but ranks as a French composer, having been a pupil of Massenet, Saint-Saëns, and César Franck, so that he has passed under varied influences. He has brought out the following works for orchestra:—'Scenes de Ballet,' 'Suite intime,' 'Symphonie dramatique,' 'Aquarelles,' 'Temps de Guerre' (Concerts de l'Opéra, 1896), 'Fête Bretonne,' 'Marche solennelle,' 'Ouverture guerrière,' 'Ouverture symphonique,' and a 'symphonie-concerto' for piano, violin, and orchestra. His chamber music includes a string quartet, a trio, and a violin sonata. A mass in A, and some motets, represent his work for the Church, and numerous songs ("L'Amour de Myrto," 'L'Amour trahi,' etc.), pianoforte pieces, etc., have become popular. Le Borne's dramatic works are as follows:—'Daphnis et Chloé,' a pastoral drama (Brussels, May 10, 1885); 'Hedda,' symphonic legend in three acts (Milan, 1888); 'Mudarra,' lyric drama in four acts (Berlin, April 18, 1899); incidental music for G. Mitchell's 'L'Absente' (Odéon, 1908); 'Les Girondins,' lyric drama in four acts (Lyons, March 25, 1905). Another three-act opera, 'Le Maître, has not yet been performed. In 1901 Le Borne obtained the Chartier prize of the Institut, for his chamber music. He contributes musical criticisms to the Monde artiste.

LEBRUN, FRANCESCA, the daughter of Danzi the violoncellist, was born at Mannheim in 1756. Endowed by nature with a voice remarkable alike for its purity and extent, ranging as high as f‴ without difficulty, she improved her natural advantages by careful study, and became one of the best singers that Germany has produced. She made her first appearance (1771) when scarcely sixteen years old, and charmed the court; in the next year she was engaged at the Mannheim Opera. Féris says that in 1775 she became the wife of Lebrun the oboist, whom she accompanied to Italy, singing first at Milan (1778) in Salieri's 'Europa riconosciuta.' The Milanese were delighted with her clear and beautiful voice and easy vocalisation, in spite of the intrigues of La Baldacci, the prima donna of La Scala, who endeavoured to set them against her young rival. This account must, however, be corrected; for, whereas Féris says that she only came to England in 1781, there is no doubt that she was here five years earlier, then unmarried, arriving with Romcgia, with whom she sang in Sacchini's 'Creso.' It is clear that she did not marry Lebrun until after 1777.

She reappeared in London as Mme. Lebrun in 1779, being again the prima donna for serious opera, and continued with Pachierottio to sing in London for two or three seasons.

She sang in 1785 at Munich, after which she returned to Italy, achieving the same brilliant success at Venice and Naples as elsewhere. In 1788 and 1789 she appeared at Munich in Mozart's 'Idomeneo,' Pratti's 'Armida,' and the 'Custor and Pollux' of Vogler. She started for Berlin in Dec. 1790 to fulfil an engagement, but on her arrival lost her husband, and herself died May 14, 1791.

Mme. Lebrun, besides being a great singer, was an accomplished pianist, and published at Offenbach (1783) some sonatas with violin accompaniment, and some trios for piano, violin, and violoncello, which contain pretty melodies, and are written with facility.

Of her two daughters, the older, Sophie, better known as Mme. Dulcken,1 was born in London, June 20, 1781, and became celebrated as a

1 Not to be confounded with the later artist of that name.
pianist. She was remarkable for quick and true feeling, as well as a good style of execution, and made successful concert-tours through France, Italy, and Germany. On April 18, 1799, she married Dulken, a famous maker of pianos at Munich. She composed, but never published, some sonatas and other pieces for the piano.

Rosine, her younger sister, was born at Munich, April 13, 1785. She was at first taught by Streicher for the piano, but afterwards studied singing under her uncle, Danzi, the capellmeister. She made a successful début; but, having married Stenzsch, an actor of the Court Theatre, Nov. 30, 1801, gave up the opera to play in comedy, in which she displayed a fair amount of talent.

J. M.

LECHNER, LEONHARD, was born before 1550, somewhere in the Etschthal of the Austrian Tyrol, hence the designation Athesinus, which usually appended to his name. He was brought up as a chorister in the Bavarian Court Chapel at Munich under Orlando Lassus, of whose works he always remained an ardent admirer. In 1570 he held some post as school-master in Nuremberg, and while still there, began to be known as a diligent composer of motets and German songs in the madrigal or villanella style, also as editor of various collections of music. Thus in 1579 he introduced some degree of order into the chaos of the frequent republications of earlier works of Lassus, by bringing out, evidently in concert with the composer himself, a revised and enlarged edition of his two books of motets of 1568, one a 4 and 5, the other a 6-10, incorporating more of Lassus' earlier work of the same kind. In 1581 he brought out a book of five previously unpublished masses by Lassus; and in 1583, a collection entitled Harmoniae Miscellae, containing motets a 5 and 6, mostly by composers connected at one time or another with the Bavarian chapel. Dehn in his Sammlung aelterer Musik, published a selection from this latter work, including a good motet by Lechner himself, Ne intres in judicium. In 1584, probably on the recommendation of Lassus, he was appointed capellmeister at Hechingen to Count Eitel Friedrich of Hohenzollern, but suddenly gave up his post in 1585, without any ostensible reason. Religion may have been the determining motive, as we know that he was succeeded at Hechingen by Ferdinand Lassus, the son of Orlando; and it was also in 1585 that Orlando dedicated to Count Eitel Friedrich a book of motets, and meanwhile Lechner, after an unsuccessful application for the post of capellmeister at Dresden to the then Lutheran court of Saxony, in 1587 became capellmeister at Stuttgart to the court of Württemberg, where he remained till his death in 1604. It would almost appear as if he continued to cherish a hankering after the Saxon court, and endeavored to keep up some relation with it, since his last work was the composition of a wedding-motet ('Landate Dominum,' for fifteen voices) for the marriage of the Elector Johann Georg I. of Saxony. Besides his editorial work already referred to, Lechner's own works may be summarised as follows:

1. Two books of Motetten or Sarae Cantiones a 4-6, containing eighty-six motets, 1576, 1591.
2. Libri Musaeum 6 et 8 voc. 1584, containing three masses and ten motets.
3. Magnificat sec. ooto tonos, 1578, eight numbers.
4. Reptio Paeino Reuss, entitled, etc., 6 v., 1597.
5. Various collections of Teutsche Lieder, geistliche und weltliche a 3, 4, and 5, 1575-89.

F. Commer, in his volume of 'Geistliche und Weltliche Lieder,' republished four good specimens of Lechner's work: two geistliche lieder, 'Christ ist erstanden,' a 4, and 'Herr Jesu Christ dir leibeich,' a 5; two weltliche, 'Wol komt der Mey,' a 4, and 'Will uns das Meidlein nimmer han,' a 5. Also in the Publication der Gesellschaft für Musikforschung, Bd. xix. 1895, Bäcker has republished Lechner's lieder, 1579, containing his rearrangement, a 5, of twenty-one lieder a 3, from Regnart's Prædicitia, and three Italian madrigals of Lechner's own.

J. R. M.

LECLAIR, JEAN-MARIE, played (so called to distinguish him from his brother Antoine-René), an eminent violin player, and composer for his instrument, was born in Paris, May 10, 1697. He began his public life not as a musician but as a dancer at the Rouen theatre. In 1722 he went to Turin, as ballet master, where he composed some interludes for the 'Semiramide' of Orlandini, and where Somis was so much pleased with some ballet music of his, that he induced him to take up the violin, which up to this time he had cultivated as a secondary pursuit only, and to place himself under his tuition for two years. At the end of that period Somis declared that he had nothing more to teach him. Nevertheless Leclair appears to have continued his studies for a considerable time before going to Paris in 1728. In Paris his success was never great; whether from want of ambition and a retiring disposition, or, as has been suggested, owing to the jealousy of the violinists of the French school, we have no means of deciding. As a fact we know that Leclair, although he can hardly have had a worthy rival among the players of that time, got nothing better than the insignificant post of ripieno-violinist at the Opera. During this period he studied composition under Chérion. In 1734 he became a member of the royal band, but owing to a dispute with Guignon as to the leadership of the second violins, gave up his post again, and about 1735 retired from the Opera. [His name ceases to appear in the programmes of the Concerts Spirituels about 1736.] For the rest of his life he appears to have been exclusively occupied with the composition and publication of his works, and with teaching. He was

1 But see, with regard to the whole of Leclair's early life, the article by L. de la Laurencie, in the Sammlungen of the Int. Mus. Gen. vi. 256.
already an old man when he made a journey to Holland at the invitation of the Princess of Orange, for the purpose of hearing and meeting Locatelli, of whose powers as a violinist he, led by the extraordinary and novel difficulties presented in the caprices of that artist, had probably formed a great idea. [On his return he visited the court of Don Philip of Spain at Chambéry, in 1743-44. His opera, "Scylla et Glaucus," was performed in 1746, and in 1748 the Duc de Gramont appointed Leclair first violin in his private orchestra at Puteaux. Here he wrote various ballets and divertissements.] On Oct. 22, 1764, soon after his return from Holland, he was assassinated, late at night, close to the door of his own house. Neither motive nor author of the crime has ever been discovered.

Owing to the merit of his compositions for the violin, Leclair occupies a prominent place among the great classical masters of that instrument. As to his powers as a performer we have but the indirect evidence of the difficulties presented in his compositions. These are very considerable; and, barring Locatelli's eccentricities, greater than any that we find in the works of his predecessors or contemporaries. He very freely employs—in fact not seldom writes whole movements in—double-stops; and altogether, even according to the modern standard of technique, his music is exacting both for the left hand and the bow. [In one instance he directs a note to be stopped with the left thumb.] As a composer, judging him after his best works, Leclair must be accorded the first place among French writers for the violin. It has been justly remarked, that a great deal of what he wrote is antiquated; but much remains that is truly charming. He is no mere imitator of the Italians, but there is a distinct individuality in many of his movements; and also a definite national French element. On the whole, gracefulness and vivacity are more prominent than depth of feeling; his frequent employment of double-stops, already mentioned, giving much richness and brilliancy of sound.

The two Sonatas of his, edited by Ferd. David ("Hohe Schule des Violinspiels"), are good examples of his higher powers, especially the pathetic one, named "Le tombeau." On the other hand, a Saraband and Tambourin, often played with great success by Joachim and others, are good specimens of his lively style. This is a list of his works, as appended to his op. 12:

Op. 1. Sonatas for violin with a bass

Op. 6. Trios (feuilles), two violins and bass

As a rule his works were engraved by his wife, [whose name was Louïse Roussel, and whom he married in 1730.] P. d.; with additions and corrections from an article by L. de la Laurencie, in the Sämmlungen der Int. Mus. Ges., vi. 250.

LECOQ, ALEXANDRE CHARLES, born in Paris, June 3, 1832; entered the Conservatoire in 1849, and in 1850 obtained the first prize for harmony and accompaniment. He took the second prize for fugue in Halévy's class in 1852, and at the same time greatly distinguished himself in the organ class. After this, however, he obtained no further scholastic distinctions, and either because he tired of Halévy's want of method, or because he was anxious to come before the public, left the Conservatoire towards the close of 1854. He found the usual difficulty in obtaining access to the stage, and would probably have had to wait a long time, but for a competition for an operetta opened by Offenbach in 1856. He was bracketed with Bizet, and "Le Docteur Miracle" was produced at the Bouffes Parisiens, April 8, 1857. The operetta was evidently the work of a clever musician, who understood how to write for the voice. Notwithstanding this good beginning the small theatres still closed their doors to him, and Lecocq was driven to teaching for a livelihood. He then tried a different line, publishing, in conjunction with Besozzi, a collection of sacred songs for women's voices called "La Chapelle au Couvent" (1865)—less incongruous when we remember that he was a good organist; but the stage was irresistible, and after the failure of "Huis Clos" (1859), a little one-act piece "Le Baiser la Porte" (1864) was followed by "Liliane et Valentin" (1864), "Les Ondines de Champagne" (1865), "Myosotis" (1866), "Le Cabaret de Kamponneau" (1867), and "Fleur de Thè," three acts (1868). This last piece was a brilliant success. Lecocq at last found himself established with the public, and produced in rapid succession "L'Amour et son carquois," two acts (1868); "Gandolfo" and "Le Rajab de Mysove," both in one act (1859); "Le beau Dunois," one act (1870); "Le Barbier de Trouville" and "Le Testament de M. de Crac," both in one act (1871); "Sauvons la cage," one act, and "Les Cent Vierges," three acts (Brussels, 1872); "La Fille de Mme. Angot," three acts (Brussels, 1872), which ran for 500 nights consecutively; "Les Prés St. Gervais" and "Giroflé-Girofía," both in three acts (1874); "Les Jumeaux de Bergame," one act, and "Le Fomion," three acts (1875); "La petite Mariée," three acts (1876); "Kosakî."
and 'La Marjolaine,' both in three acts (1877); 'Le petit Dnc' and 'Camargo,' both in three acts (1878); 'La jolie Pansane,' 1879; 'La petite Mademoiselle,' three acts (1879); 'Le Grand Casimir,' 1879; 'Le Marquis de Windsor,' Janot's 'La Roussotte,' 'Le Jour et la Nuit,' 1881; 'Le Coeur et la Main,' 1882; 'Le Princesse des Canaries,' 1883; 'L'Oiseau bleu' (1884). An attempt at a higher class of music, 'Plutus,' produced at l'Opéra Comique, Paris, March 31, 1886, failed and was withdrawn after eight representations; the earlier style was returned to in 'Les Grenadiers de Montes-Cornette' (Paris, 1887); 'Ali-Baba' (Brussels, 1887); 'La Violeir' (Paris, 1888); 'L'Egyptienne' (Paris, 1890); 'Nos bons Chasseurs' (ib. 1894); 'Ninette' (ib. 1896); 'Ruse d'Amour' (1897); 'Barbe-Bleue' (1898); 'Le Cygne' (Opéra Comique, 1899), and 'La Belle au Bois Dormant' (1900). To this long list must be added detached songs and other trifles thrown off by his rapid and untiring pen. Leccq has profited by the false system momentarily in the ascendant among French musicians. Our learned composers, encouraged by some of the managers, overload their operas with orchestral writing, and substitute the lyric for the dramatic element—to the ruin of French opera-comique. But Leccq realises that what the public really like are light, gay, sparkling melodies. His aim has been to dethrone Offenbach, and as he has the advantage of writing correctly, he has had little trouble in attaining a popularity even greater than that formerly possessed by the composer of 'Orphée aux Enfers.' His style is not a very elevated one, and makes no demand on the poetry or the intellect of the composer; but it requires tact, ease, freedom, and, above all, animation. These qualities are conspicuous in Leccq's operettas, which have become universally popular, owing to the life, briolii, and easy gaiety which pervade them. 6. c.; additions by A. c. and G. F.

LE COUPPEY, Félix, born in Paris, April 14, 1811, was a pupil of the Conservatoire, where, in his seventeenth year, he was an assistant teacher of harmony. In 1837 he became a regular teacher, and in 1843 succeeded his master, Dourlens, as professor of harmony. In 1848 he took the place of Henri Herz as pianoforte teacher, and in this capacity wrote many studies and similar things, for his instrument, some of which are still in use. He died in 1887. (Riemann's Lexikon.)

LEDOUCER. LINEAL are the short lines drawn above and below the staff for those notes which exceed its limits. The origin of the term is not known. It is proposed to derive it from the French ligne, light, or from the Latin ligere, to read, or as if it were equivalent to layer—additional lines laid on above or below; but neither of these is quite satisfactory. The term came into use in the year 1700 (see Mr. C. J. Evans in the Musical Times for June 1879, and the Oxford Dictionary, s. v.). The analogous use of the word ledger, as 'a horizontal timber in scaffolding, lying parallel to the face of the building,' is interesting. In French they are called 'lignes postiches,' or 'supplémentaires'; and in German 'Hilfslinien,' or 'Nebenlinien,' a, c, etc. being said to be 'durch den Kopf,' and b, d, etc., 'durch den Hals.'

LEDUC, a music-publishing firm in Paris, founded in 1841; in 1868, Alphonse Leduc succeeded to his father as head of the business, and after his death in 1892, his widow (née Ravina) carried it on. Since 1904, the firm has been directed by E. Leduc and F. Bertrand. Besides the publication of methods and educational music of all kinds, the firm has brought out numerous works by the younger French and Russian composers, such as Hillemacher, Hué, Leroux, Pierné, and Cui, Borodine, Liadov, Rimsy-Korsakov, etc. The important collection, Les Maîtres Musiciens de la Renaissance Française, edited by H. Expert, is one of the most interesting of the publications of the house. L'Orgue moderne, a quarterly magazine, edited by Widor and Guilmant, is mainly devoted to the praiseworthy task of making known the work of the younger men; and L'Art musical, a periodical founded by the firm in 1860, was amalgamated with Le Guide Musical of Brussels in 1895.

LEE, GEORGE ALEXANDER, son of Harry Lee, a pugilist and landlord of the Anti-Gallican tavern, Shire Lane, Temple Bar, was born in 1802. When a boy he entered the service of Lord Barrymore as 'tiger,' being the first of the class of servants known by that name; but on the discovery that he had a fine voice and a natural taste for music, he was withdrawn from that position and placed under a master for instruction. In 1822 he appeared as a tenor singer at the Dublin theatre [where he acted as conductor for a year], and in 1826 in London at the Haymarket Theatre [where he became conductor in 1827], and soon afterwards commenced business as a music-seller in the Quadrant. In 1829, with Melrose, the tenor singer, and John Kemble Chapman, he entered upon the management of the Tottenham Street Theatre, and gave performances of popular English operas. Lee succeeded in 1830 [on account of the heavy penalties incurred through the infringement of the right of the 'patent theatres'], and became lessee of Drury Lane Theatre. He was soon afterwards joined by Captain Polhill, but at the end of the season he withdrew, leaving Polhill sole manager. In 1831 he undertook the management of the Leaden oratories at both Drury Lane and
Covent Garden. In 1832 he was composer and music director at the Strand Theatre, and in 1845 the same at the Olympic. [He had a music shop at 58 Frith Street, Soho, in 1835-36.] Lee composed the music for several dramatic pieces, amongst which were 'The Sublime and Beautiful,' and 'The Invincibles,' 1828; 'The Nymph of the Grotto' and 'The Witness,' 1829; 'The Devil's Brother' (principally from Anber's 'Fra Diavolo') and 'The Legion of Honour,' 1831; 'Waverley' (with G. Stansbury), 1832; 'Love in a Cottage,' 'Good Husbands make good Wives,' 'Sold for a Song,' 'The Fairy Lake,' and 'An Old Robin Gray,' the last composed about 1838 but not performed until 1855. He was also composer of many songs and ballads, highly popular in their day ('Away, away to the mountain's brow,' 'Come where the aspens quiver,' 'The Maggrogens' Gathering,' etc.) and author of a 'Vocal Tutor.' [As other publishers brought out his works, it would appear that the business referred to above, was either of short duration or very unimportant. He must not be confounded with Leoni Lee of Albemarle Street, who had a large publishing business.] Lee married Mrs. Waylett, the popular singer and actress, whose death (April 26, 1851) so seriously affected him that he died on the 8th of the following October. W. H. H.; additions from W. H. G. F. and F. K.

LEE, SAMUEL, a distinguished Irish violinist and musical director, who flourished during the second half of the 18th century. Handel often visited his house in 1742, and employed him as copyist. In 1751 he was appointed conductor of the 'City Music,' or Corporation Band, and in 1753 his salary was increased from £40 to £60 a year ('Calendar of Ancient Records of Dublin'). In the autumn of 1750 he opened a music-shop at the Little Green, off Bolton Street, and printed much music, including 'Lee's Masque, a collection of popular songs,' four in each number, 'price a British sixpence each' (1753-56). In July 1751, he was one of the syndicate (the others being Signor Marella, Joseph de Boeck, Daniel Sullivan, and Stephen Storace) that took a lease of Crow Street Music Hall, for six years, at an annual rent of £113:15s. He led the band at Marlborough Green from 1752 to 1756, and in 1758 was appointed musical director of Crow Street Theatre. In 1761 he removed his music-shop to No. 2 Dame Street, and published a miscellaneous lot of music. Ten years later he opened a coffee-house in Essex Street, which was largely patronised by theatrical folk. He died Feb. 21, 1775. See O'Keele's Recollections, i. 320. W. H. G. F.

LEEDS MUSICAL FESTIVAL. The first of these important meetings took place on Sept. 7-10, 1858, and formed part of the ceremony connected with the opening of the Town Hall by Queen Victoria. Sterndale Bennett was the conductor, and his 'May Queen' was the chief novelty of the festival. In spite of the great success (£2600 was given out of the profits to the Leeds medical charities) there were difficulties in the way of establishing the festival as a triennial event; and the second did not take place until 1874, Oct. 14-17, when Sir Michael Costa conducted. At the third festival, Sept. 19-22, 1877, Costa was again the conductor, and Macfarren's 'Joseph' was the most important new work. From 1880 (Oct. 13-17) until 1898 inclusive, Sir Arthur Sullivan was the conductor. In the former year, Sullivan's 'Martyr of Antioch' and J. F. Barnett's 'Building of the Ship' were commissioned. Oct. 10-13, 1882, was the date of the fourth meeting, at which Macfarren's 'David,' Alfred Collier's 'Gray's Elegy,' Barnby's 'Psalm xcvii.,' were commissioned, and Rall's 'End of the World' was performed for the first time in England. In 1886 (Oct. 13-17) Sullivan's 'Golden Legend,' Stanford's 'Revenge,' Mackenzie's 'Story of Sayid,' and Dvořák's 'Saint Ludmilla' were commissioned, and a memorable performance took place of Bach's B minor Mass. In 1889, (Oct. 9-12) the profits of the festival rose to the high figure of £3142; the new works were Parry's 'Ode on St. Cecilia's Day,' Stanford's 'Voyage of Maeldune,' Corder's 'Sword of Argantyr,' and Creser's 'Sacrifice of Freya.' In 1892 (Oct. 5-8) two new works only were given, Alan Gray's 'Arthusa,' and a symphony by Frederick Cliffe. Instead of the choir being drawn only from Leeds, the influence was extended this year (and until 1898) by obtaining singers from different centres in the West Riding of Yorkshire, who were trained in their separate towns, and met occasionally at Leeds for general rehearsals. In 1895 (Oct. 2-5) Parry's 'Invocation of Music,' Somervell's 'Forsaken Man,' and orchestral pieces by Massenet and Edward German, were the new works. In 1898 (Oct. 5-8) Stanford's 'Te Deum,' Elgar's 'Caractacus,' Cowen's setting of Collins's 'Odeon the Passions,' Otto Goldschmidt's 'Music,' Alan Gray's 'Song of Redemption,' and a symphonic poem by Humperdinck, were the novelties, and the diapason normal was employed for the first time. For the festival of 1901 (Oct. 9-12) Sir C. V. Stanford was appointed in succession to Sir Arthur Sullivan, and the programme was commemorative of the music of the 19th century. Among actual novelties were Coleridge Taylor's 'Blind Girl of Castel-Cuèille,' and a Memorial Cantata by Glazounov; a most interesting performance of Beethoven's Mass in D took place, in which Dr. Joachim took part, as well as playing a concerto of Mozart. In 1904 (Oct. 5-8) Sir C. V. Stanford was again the conductor, and the new works were Mackenzie's 'Witch's Daughter,' Wallford Davies's 'Everyman,' Stanford's 'Songs of the Sea,' Charles Wood's 'Ballad of Dunlee,' Joseph Holbrooke's 'Queen Mab,'
and Stanford's violin concerto (played by Kreisler. A History of the Leeds Festivals (1858-89) by Joseph Bennett and F. R. Spark, was published by Novello in 1892.

LEEVES, REV. WILLIAM, born at Kensington, June 11, 1748, [entered the first regiment of Foot-Guards in 1769, and was promoted lieutenant 1772. After taking holy orders he was appointed in 1779 rector of Wrington, Somerset, the birthplace of John Locke, the philosopher, and the home of Hannah More. He was a good violoncellist, and composed much sacred music, but will be remembered only as the author of the air of 'Auld Robin Gray' (words by Lady Anne Barnard, born Lindsay of Balcarres), written in 1772 ([autograph in the Brit. Mus. Add. MS. 29,387], published by Corri and Sutherland in 1783, but not publicly acknowledged by the composer until 1812, when in the dedication of 'Six Sacred Airs,' he admitted the authorship of 'Auld Robin Gray.' He died at Wrington, May 28, 1828. w. n. h.; additions from the Dict. of Nat. Biog., w. n. f., etc.

LEFEBURE-WELY, LOUIS JAMES ALFRED, born in Paris, Nov. 18, 1817, son of Antoine Lefebvre, organist and composer, who took the name of Lefebure-Wely, and died 1831. He learned his notes before the alphabet, and as soon as he could speak showed a marvellous aptitude for music. At eight he was his father's deputy at the organ, accompanying the plain-song and playing short pieces. Though only fifteen when his father died, he was appointed his successor at St. Roch through the influence of Queen Marie Amélie. Feeling the need of solid study, he entered the Conservatoire in 1832, and obtained the second prizes for pianoforte and organ in 1833, and the first for both in the following year. He then took lessons in counterpoint from Halévy, and in composition from Berton, but, not satisfied with these professors, studied privately with Adolphe Adam, and with Séjan, the organist, who initiated him in the art of improvising and in the management of the stops. He told the author of this article that he owed much to both these men, widely different as they were, and he often sought their advice after he had left the Conservatoire in order to marry. To support his young family he took to teaching, and composed a quantity of pianoforte pieces, some of which were popular at the time. But it is as an organist that he will be remembered. His improvisations were marvellous, and from the pliancy of his harmonies, the unexpectedness of his combinations, the fertility of his imagination, and the charm which pervaded all he did, he might justly be called the Auber of the organ. The great popularity in France of the free-reed instruments of Debain and Mustel is largely owing to him; indeed, the effects he produced on the instruments of the harmonium class were really astonishing. Endowed with immense powers of work, Lefebure-Wely attempted all branches of composition—chamber music; symphonies for full orchestra; masses; an opéra-comique in three acts, 'Les Recruteurs' (Dec. 13, 1861); etc. Among his best works are his 'Cantiques,' a remarkable 'O Salutaris,' his 'Offertories,' many of his fantasies for harmonium, and his organ-pieces. He received the Legion of Honour in 1859, being at the time organist of the Madeleine, where he was from 1847 to 1858. After this he had for some time no regular post, but in 1863 accepted the organ of St. Sulpice, so long held with success by his friend and master Séjan. Here he remained till his death, which took place, of consumption, in Paris on Dec. 31, 1869.

LEFEBVRE, CHARLES ÉDOUARD, born in Paris, June 19, 1843, was a pupil of the Conservatoire, and gained the first Prix de Rome with his cantata, 'Le Jugement de Dieu.' A composer of sincere and delicate accomplishment, he has written music in many forms. His church music includes a setting of Psalm xxiii. and some motets; his 'Judith,' of which portions had been given at concerts of the Conservatoire, was brought out as a whole at the Pasdeloup concerts in 1879, being later heard in many other French towns, as well as in Belgium and Germany; an 'Ouverture dramatique' was played at the Colonne Concerts; and 'Dalila,' orchestral scenes, and a symphony in D are important works for orchestra. For the stage Lefebvre has written, 'Lucrèce,' three-act opera, not performed; 'Le Trésor' a one-act opéra-comique, (Angers, 1883); 'Zaire,' four-act opera (Lille, 1887); 'Djelma,' three-act opera (Paris, Opéra, May 25, 1904); 'Singeolla,' three-act opera, unperformed. 'Eloa,' a poème lyrique; 'Melka,' a 'legend' given at the Lamoureux Concerts; 'Sainte Cécile,' for solo, chorus, and orchestra, (Concerts de l'Opéra, 1896); 'La Nesse du Fantôme,' for voice and orchestra (Colonne Concerts); a Serenade, an Overture, 'Toggenburg' (Colonne Concerts, 1904); sonatas, trios, quartets, suites, etc. for various instruments, a suite for wind instruments, etc. In 1884 he obtained the Prix Chartier for his concerted compositions, and in 1895 he succeeded Benjamin Godard as professor of the instrumental ensemble class in the Conservatoire.

LEFFLER, ADAM, born in London, 1808, son of James Henry Leffler, bassoon player and organist of St. Katherine's Hospital by the Tower, the German Lutheran Church in the Savoy, and Streatham Chapel, who died suddenly in the street in 1819—was soon after his father's death admitted a chorister of Westminster Abbey. On attaining manhood he was endowed with a bass voice of exceptionally fine quality and extensive compass, from E below the stave to f above it,—and a natural gift for singing. He first attracted notice in October 1829 at a Festival at Exeter, when the casual absence of
another performer gave him the opportunity of appearing as a principal singer. He acquitted himself so satisfactorily that he was immediately appointed a deputy at Westminster Abbey, and shortly afterwards took and maintained a good position on the English operatic stage and in the concert-room. But for a constitutional carelessness and neglect of close study he might, with his natural and acquired qualifications, have occupied the highest place in his profession. He died of apoplexy in London, March 28, 1857.

LEGATO (Ital., sometimes written legato; Ger. gebunden; Fr. lié), 'connected'; the sound of each note of a phrase being sustained until the next is heard. In singing, a legato passage is vocalised upon a single vowel, on stringed instruments it is played by a single stroke of the bow, and on the pianoforte or organ by keeping each finger upon its key until the exact moment of striking the next. On wind instruments with holes or keys, a legato passage is played in one breath, the notes being produced by opening or stopping the holes; but a wind instrument on which the different sounds are produced by the action of the lips alone, as the horn, trumpet, etc., is incapable of making a true legato, except in the rare cases in which one of the notes of the phrase is produced by stopping the bell of the instrument with the hand, as in the following example from the Scherzo of Beethoven's Seventh Symphony—

The sign of legato is a curved line drawn above or beneath the notes. In music for wind or stringed instruments the curve covers as many notes as are to be played with a single breath, or a single stroke of the bow; thus—

**Beethoven. Symphony No. 5.**

**Beethoven. Symphony No. 9.**

In vocal music the same sign is often used, as in Handel's chorus, 'And he shall purify,' but it is not necessary, since the composer can always ensure a legato by giving a single syllable to the whole passage, and it is in fact frequently omitted, as in the air 'Every valley.'

In pianoforte music, all passages which are without any mark are played legato, inasmuch as the notes are not detached; the curved line is, therefore, used more for the sake of giving a finished appearance to the passage than from any practical necessity. Nevertheless, passages are sometimes met with in which it appears to have a special significance, and to indicate a particularly smooth manner of playing, the keys being struck less sharply than usual, and with a slightly increased pressure. Such a passage occurs in the Allegro of Beethoven's Sonata in A♭, op. 26, in which the quavers alone are marked legato, the semiquavers being left without any mark, thus—

![Musical notation](image)

The same plan is followed on each recurrence of the phrase throughout the movement, and since this regularity can scarcely have been accidental, it appears to indicate a corresponding variety of touch.

Instead of the sign, the word legato is sometimes written under the passage, as in Beethoven's Bagatelle, op. 119, No. 8, or Variation No. 30 of op. 120. When the word is employed it generally refers to the character of the whole movement rather than to a single passage.

In playing legato passages wholly or partly founded upon broken chords, some masters have taught that the principal notes of the harmony should be sustained a little longer than their written length. Thus Hummel, in his Pianoforte School, gives the following passages (and many others) with the intimation that the notes marked with an asterisk are to be sustained somewhat longer than written, 'on account of the better connection—

![Musical notation](image)

This method of playing passages, which is sometimes called legatissimo, would doubtless add to the richness of the effect, especially upon the light-toned pianofortes of Hummel's day, but it is not necessary on modern instruments, the tone of which is so much fuller. Nevertheless it is sometimes of service, particularly in certain passages by Chopin, which without it are apt to sound thin. Klindworth, in his edition of Chopin, has added a second stem, indicating a greater value, to such notes as require sustaining, and a comparison of his version with the
original edition will at once show the intended effect; for example—

Chopin, 'Valses,' Op. 64, No. 2, Original Ed.

An example of legatisimmo touch, in which the notes are written of their full value, may be found in No. 5, bk. ii. of Cramer's Studies.

The opposite of legato is staccato—detached [see Staccato], but there is an intermediate touch between legato and staccato, in which the notes, though not connected, are separated by a barely perceptible break. When this effect is intended the passage is marked non legato. An example occurs in the first movement of Beethoven's Sonata in C minor, op. 111, in the passage immediately following the first appearance of the short Adagio phrase. [See Phrasing.]

LEGGIERO (Ital. also Leggeramente), lightly. The word is usually applied to a rapid passage, and in pianoforte playing indicates an absence of pressure, the keys being struck with only sufficient force to produce the sound. Leggero passages are usually, though not invariably, piano, and they may be either legato or staccato; if the former the fingers must move very freely and strike the keys with a considerable amount of percussion to ensure distinctness, but with the slightest possible amount of force. Examples of legato passages marked leggeramente are found in the twenty-fifth variation of Beethoven's op. 120, and in the finale of Mendelssohn's Concerto in G minor (which also contains the unusual combination of forte with leggero); and of staccato single notes and chords in the finale of Mendelssohn's Concerto in D minor.

On stringed instruments leggiero passages are as a rule played by diminishing the pressure of the bow upon the strings, but the word generally refers rather to the character of the movement than to any particular manner of bowing. The Scherzo of Beethoven's Quartet in E♭, op. 74, is marked leggieramente, although it begins forte, and the same indication is given for the second variation of the Andante in the Kreutzer Sonata, which is piano throughout.

LEGRENZI, GIOVANNI, composer and conductor, born about 1625 at Clusone near Bergamo; in which town he learned music, and received his first appointment, that of organist to the church of St. Maria Maggiore. He next became maestro di cappella of the church of the Spirito Santo at Ferrara, where he still was in 1664. When Krieger, capellmeister to the Duke of Weissenfels, visited Venice in 1672, he found Legrenzi settled there as director of the Conservatorio dei Mendicanti. In 1681 he became vice-maestro, and in 1685 maestro di cappella of St. Mark's, and exercised both functions till his death, July 26, 1690. He entirely reorganized the orchestra of St. Mark's, augmenting it to thirty-four performers, thus disposed—eight violins, eleven viola, two viole da braccio, two viole da gamba, one violone, four theorboes, two cornets, one bassoon, and three trombones. He composed industriously, and left specimens of his skill in most departments of music—church sonatas, 1654, 1655, 1663, and 1677, motets [1655, 1660, 1670, 1692], masses, psalms [1657, 1667], instrumental music of various kinds, and seventeen operas, of which the most remarkable are 'Achille in Sciro,' his first (1684); 'La Divisione del Mondo' (1676); 'I due Cesari' (1683), mentioned in the Paris Mercure Galant (March 1683); and 'Pertinace' (1684), his last. [The number in the Quellen-Lexikon is 14.] They were nearly all produced in Venice. Like Scarlatti, and other composers of his time, he did not attempt to banish the comic element from his serious operas. One of his orchestral compositions is in seven real parts, and all are important. His best pupils were Lotti and Gasparini.

Legrenzi's name will be handed down to posterity by Bach and Handel, both of whom have treated subjects from his works, the former in an organ fugue in C minor on a 'Thema Legrenzianum elaboratum cum subjecto pedaliter' 1 (B. G. xxxviii. p. 94); and the latter in the phrase 'To thy dark servant light and life afford,' in the Chorus 'O first-created beam' from 'Samson.' This is taken from a motet of Legrenzi's—'Intret in conspectu,' of which a copy in Handel's handwriting is to be found among the MSS. at Buckingham Palace (Chrysander, Händel, i. 179).

LE HUARTREUR, Guillaume, a French composer in the earlier part of the 16th century, was a canon in the Church of St. Martin at Tours. His works appeared chiefly in Attainment's collections from 1530 to 1548, among them four masses, which Ambros ranks with those of Sermisy, a few magnificats and motets, and a number of chansons. Two of the chansons are given in Eitner's Selection of Chansons, 1899, Nos. 28, 29. Fétsis mentions some independent works of Le Hurteur, which, however, Eitner has not been able to verify. (See Quellen-Lexikon.)

LEHMANN, ELIZABETTA NINA MARIA FREDERIKA, known as Liza Lehmann, born July 11, 1862, in London; daughter of the late Rudolf Lehmann, the painter, by his wife Amelia, daughter of Robert Chambers of Edinburgh, the author and publisher. She was first taught singing by her mother, a highly cultivated amateur,

1 This is the furore about the autograph of which Mendelssohn writes, June 18, 1839.
and well known in the musical world, both as a composer and arranger of old classical songs under the initials ‘A. L.’ Later she studied singing with Raunderger, and composition with Raunikilde at Rome, Freudenberg at Wiesbaden, and Hamish MacCunn. On Nov. 23, 1885, she made her début at the Monday Popular Concerts with great success, and was a favourite at these concerts during the nine years she remained in the vocal profession. She also appeared at the Crystal Palace, Philharmonic, Novello’s Oratorio Concerts, Norwich Festivals, and all the chief concerts in the kingdom, receiving special encouragement from Frau Clara Schumann and Dr. Joachim.¹ On July 14, 1894, she gave a farewell concert at St. James’s Hall, previous to retiring from the vocal profession on her marriage to Mr. Herbert Bedford ² in October of the same year. Her voice is a light soprano, not large, but with an extensive compass from the low A to B in alt, and of a carrying nature—always perfectly produced. She created a distinctive position for herself by her varied répertoire in four languages, and by her revival of many fine old songs, notably by the early English composers. Since her retirement, Madame Liza Lehmann has devoted herself to composition, and with conspicuous success. In 1896 her song-cycle, ‘In a Persian Garden,’ the words taken from Fitzgerald’s translation of Rubaiyat of Omar Khayyam, was introduced in private at a concert in the house of Mrs. E. L. Goetz, by Mesdames Albani and Hilda Wilson, Mr. Ben Davies and Mr. Bispham. It was afterwards produced publicly at the Monday Popular Concerts and elsewhere, being received with remarkable enthusiasm, both in America and England.

Several other song-cycles followed: ‘In Memoriam’ (from Tennyson), ‘The Daisy-Chain,’ ‘More Daisies,’ ‘Songs of Love and Spring,’ etc.

Madame Liza Lehmann may be said to have established a vogue for song-cycles in England. She was the first woman to be commissioned to undertake the composition of a Musical Comedy, ‘Sergeant Bruce’ (book by Owen Hall), produced at the Strand Theatre, June 14, 1904, transferred to the Prince of Wales’s Theatre, and later retransferred to the Strand. She has also written incidental music for plays, ballads for voice and orchestra, and many songs and pianoforte pieces, several of which have gained considerable popularity.

LEHMANN, Lilli, born May 15, 1845, at Witzburg, was taught singing by her mother, Marie Lehmann, formerly a harp player and prima donna at Cassel under Spohr, and the original heroine of some of the operas of that master. The daughter made her début at Prague as the First lloy (‘Zauberflöte’), and was engaged successively at Dantzic in 1868 and at Leipzig in 1870. She made her début at Belin as Vielka (Meyerbeer’s ‘Feldlager in Schlesien’), August 19, 1870, with such success that she was engaged there as a light soprano, remaining there till 1885. In 1876 she played Woglinde and Helmwige, and sang the ‘Bird’ music in Wagner’s trilogy at Bayreuth. In that year she was appointed Imperial chamber singer. She made a successful début at Her Majesty’s at Violetta, June 3, as Philine (‘Mignon’), June 15, 1880, and sang there for two seasons. She appeared at Covent Garden in German with great success as Isolde, July 2, 1884. In passing through England to America, she gave a concert with Franz Rummel at the Steinway Hall, Oct. 22, 1885. From 1885 to 1890, she sang in German opera in America, but returned to Her Majesty’s in June 1887, singing three times in Italian as Fidelio, to the Florestan of her husband, Herr Ralisch. In 1890 she returned to Germany, singing both in operas and concerts. In 1899 she reappeared at Covent Garden as Fidelio, Sieglinde, Norma, Isolde, Ortrud, and Donna Anna, and won warm appreciation. She also sang in Paris at the Lamoureux Concerts, and appeared at the Nouveau Théâtre as Donna Anna in 1903.

A younger sister, Maria, born 1851, also a soprano, sang at Bayreuth as Wellgunde and Ortlinde in the ‘Trilogy’ in 1876, and was for many years a valued member of the company at Vienna, and an excellent concert singer. A. c.

LEIGHTON, Sir William, Knight, one of the band of Gentlemen Pianofoners of Elizabeth and James I. published in 1614 ‘The Toven or Lamentations of a Sorrowfull Soul; Composed with Musickal Ayres and Songs both for Veyces and Divers Instruments.’ The work consists of fifty-four metrical psalms and hymns, seventeen of which are for four voices, with accompaniments, in tablature, for the lute, lindora, and cittern; and thirteen for four voices, and twenty-four for five voices without accompaniment. The first eight pieces are of Leighton’s own composition, and the rest were contributed by the following composers—John Bull, William Byrd, John Coperario, John Dowland, Alfonso Ferrabosco, Thomas Ford, Orlando Gibbons, Nathaniel Giles, Edouard Hooper, Robert Johnson, Robert Jones, Robert Kennerley, Thomas Lupo, John Milton, Martin Pearson, Francis Pilkington, Timolypus Thopul (a pseudonym), John Ward, Thomas Weckes, and John Wilbye. From the dedication to Prince Charles we learn that the collection was compiled

¹ On March 15, 1888, at the Philharmonic, Miss Schumann accompanied her in Schumann’s ‘Nunstand’ and ‘Pepilungmass.’

² Ramon, Ramor, born Jan. 29, 1857, in London, Studied music and composition at the Guildhall School of Music. On May 30, 1903, a concert of his works was given at the Westminster Club. His compositions include an Opera, ‘Kit Marlow,’ and several various voices and orchestra; a love scene from ‘Roméo et Juliet,’ written for the Norwich Festival of 1892, and produced by Madame Clara Butt and Mr. Lanner-Buddenhol; a Nocturne produced by Madame Clara Butt at a London Philharmonic Society’s Concert, June 10, 1903; two ballads: ‘La Belle danse aussi merci,’ ‘La joie fait penser;’ and a Symphonic Poem for soprano voice and orchestra. His orchestral works include a suite, ‘Queen Rob,’ a concerto for voice, ‘Rowing the Wind;’ and a melody for strings, etc. He has also published an Album of English songs, a group of French songs, many detached songs, etc.
while the worthy knight was—unjustly, as he alleges—incurrated for debt. He had in the preceding year published the poetry alone in a duodecimo volume. [Some verses by him were prefixed to Allison’s ‘Psalms’ (1599), and he wrote a poem in praise of James I., called *Virtue Triumphant* (1603); this latter was probably what procured him his knighthood. *Dict. of Nat. Biog.*]

LEIPZIG (i.e. the place of Lime-trees), in Saxony, on the junction of the Pleisse and the Elster, has for a long time been the most musical place in North Germany. When Röchitz visited Beethoven at Vienna in 1822, the first thing which the great composer did was to praise Leipzig and its music—*If I had nothing to read but the mere dry lists of what they do, I should read them with pleasure. Such intelligence! such liberality!* The main ostensible causes of this pre-eminence have been (1) the long existence of the St. Thomas school as a musical institution with a first-class musician as its cantor; (2) the Gewandhaus concerts; (3) the presence of the great music-publishing house of Breitkopfs, almost equal in importance to a public institution; (4) the existence for fifty years of the principal musical periodical of the country—the *Allgemeine musikalische Zeitung*; (5) in later times, the long residence there of Mendelssohn, and the foundation by him of the Conservatorium, with its solid and brilliant staff of professors—a centre, for many years, of the musical life not only of Germany, but of other countries; and lastly (6) several very remarkable private musical institutions.

1. The Thomasschule, or School of St. Thomas, is an ancient public school of the same nature as our cathedral and foundation grammar-schools, but with the special feature that about sixty of the boys are taught music, who are called *Alumni*, and are under the charge of a cantor, forming the *Thomaner-Chor*. This body is divided into four choirs, with a Prefect at the head of each, and serve the Churches of St. Thomas, St. Nicholas, St. Peter, and the Neu-kirche or New-Church. On Sundays the first choir joins the town orchestra for the morning service at St. Thomas or St. Nicholas; and on Saturday afternoons at 1.30 the whole four choirs unite in a performance under the direction of the cantor. The boys are remarkable for the readiness and correctness with which they sing the most difficult music at sight.

In 1877 the school was removed from its old building in the Thomaskirchhof to a new one near the Plagwitzerstrasse in the western suburb of Leipzig. A minute account of the history of the school and of its condition in the time of Kuhlau and Bach will be found in Spitta’s *Buch* (Engl. transl.) ii. 189-203, and iii. 301-315.

The Cantor, in German towns and villages, corresponds to the Precentor or leader of the choir in English cathedrals and churches, and the cantor of the St. Thomas School at Leipzig has for long been acknowledged as the head and representative of them all. For more than two centuries the office has been filled by very distinguished musicians, as will be seen from the following list, taken from Riemann’s *Lexikon*:

2. The Gewandhaus Concerts have been already described under their own head. [See ante, pp. 163, 184.]

3. For the great publishing establishment of Breitkopf & Härtel, we refer the reader to vol. i. pp. 293-95.

4. The *Allgemeine musikalische Zeitung*, or *General Musical Times*, was begun by the firm just mentioned in 1798, on October 3 of which year the first number was published. See Periodicals, Music.

5. The idea and the foundation of the Conservatorium were entirely due to Mendelssohn, by whom the King of Saxony was induced to allow a sum of 20,000 thalers, bequeathed by a certain Hofkriegsrah Böllner ‘for the purposes of art and science,’ to be devoted to the establishment of a ‘solid musical academy at Leipzig.’ The permission was obtained in Nov. 1842, the necessary accommodation was granted by the corporation of the town in the Gewandhaus—a large block of buildings containing two Halls, a Library, and many other rooms—and the Conservatorium was opened on April 3, 1843. Mendelssohn was the first chief, and the teachers were:—harmony and counterpoint, Hauptmann; composition and pianoforte, Mendelssohn and Schumann; violin, Ferdinand David; singing, Pohlenz; organ, Becker. There were ten scholarships, and the fees for the ordinary pupils were seventy-five thalers per annum. In 1846, at Mendelssohn’s urgent entreaty, Moscheles left his London practice, and became professor of the pianoforte at the modest salary of £120; and at that date the staff also embraced Gade, Pliady, Brendel, Richter (afterwards Cantor), and others whose names have become inseparably attached to the Conservatorium. The management of the institution is in the hands of a board of directors chosen from the principal inhabitants of the town, and not professional musicians. The first name inscribed in the list of pupils is Theodor Kirchner, and it is followed by those of Otto Goldschmidt, Bargiel, Grimm,
Norman, etc. Amongst Englishmen are found J. F. Barnett, Sullivan, Walter Bache, Franklin Taylor, etc., and the American names include Dannreuther, Willis, Mills, Paine, and others.

6. Of the private institutions we may mention:—(1) the 'Riedelsche Verein,' a choral society founded in 1854 by Carl Riedel, its conductor, and renowned throughout Germany for its performances of sacred music of all periods, from Palestrina and Schütz down to Brahms and Liszt. (2) The 'Enteepr,' an orchestral concert society, which, though its performances cannot come into competition with those of the Gewandhaus, is yet of importance as representing a more progressive element in music than prevails in the exclusively classical programmes of the older institution. The names of Berlioz, Liszt, Raff, Rubinstein and others, appear prominently in the concerts of the Enteepr. Verhulst, Brunsart, and other eminent musicians, have been its conductors. (3) The 'Paulus,' an academical choral society of male voices, deserves mention as one of the best of its kind in Germany. 

**LEIT-MOTIF**, i.e. 'guiding theme.' The principle of 'Leit-motive' is so simple and obvious that it would seem strange that they have so lately found recognition in music, were it not remembered that music in general has progressed but slowly towards a sufficiently logical condition to admit of their employment. They consist of figures or short passages of melody of marked character which illustrate, or as it were label, certain personages, situations, or abstract ideas which occur prominently in the course of a story or drama of which the music is the counterpart; and when these situations recur, or the personages come forward in the course of the action, or even when the personage or idea is implied or referred to, the figure which constitutes the leit-motif is heard.

Their employment obviously presupposes unity and continuity in the works in which they occur. For as long as it is necessary to descend to the indolence or low standard of artistic perception of audiences by cutting up large musical works into short incongruous sections of tunes, songs, rondos, and so forth, figures illustrating inherent peculiarities of situation and character which play a part throughout the continuous action of the piece are hardly available. Musical dramatic works of the old order are indeed, for the most part, of the nature of an 'entertainment,' and do not admit of analysis as complete and logical works of art in which music and action are co-ordinate. But when it becomes apparent that music can express most perfectly the emotional condition resulting from the action of impressive outward circumstances on the mind, the true basis of dramatic music is reached; and by restricting it purely to the representation of that inward sense which belongs to the highest realisation of the dramatic situations, the principle of continuity becomes as inevitable in the music as in the action itself, and by the very same law of artistic congruity the 'leit-motive' spring into prominence. For it stands to reason that where the music really expresses and illustrates the action as it progresses, the salient features of the story must have salient points of music, more marked in melody and rhythm than those portions which accompany subordinate passages in the play; and moreover when these salient points are connected with ideas which have a common origin, as in the same personage or the same situation or idea, these salient points of music will probably acquire a recognisable similarity of melody and rhythm, and thus become 'leit-motive.'

Thus judging from a purely theoretical point of view, they seem to be inevitable wherever there is perfect adaptation of music to dramatic action. But there is another important consideration on the practical side, which is the powerful assistance which they give to the attention of the audience, by drawing them on from point to point where they might otherwise lose their way. Moreover, they act in some ways as a musical commentary and index to situations in the story, and sometimes enable a far greater depth of pregnant meaning to be conveyed, by suggesting associations with other points of the story which might otherwise escape the notice of the audience. And lastly, judged from the purely musical point of view, they occupy the position in the dramatic forms of music which 'subjects' do in pure instrumental forms of composition, and their recurrence helps greatly towards that unity of impression which it is most necessary to attain in works of high art.

As a matter of fact 'leit-motive' are not always identical in statement and restatement; but as the characters and situations to which they are appropriate vary in their surrounding circumstances in the progress of the action, so will the 'leit-motive' themselves be analogously modified. From this springs the application of variation and 'transformation of themes' to dramatic music; but it is necessary that the treatment of the figures and melodies should be generally more easily recognisable than they need to be in abstract instrumental music.

Leit-motive are perfectly adapted to instrumental music in the form known as 'programme music,' which implies a story, or some definite series of ideas; and it is probable that the earliest distinct recognition of the principle in question is in the Symphonie Fantastique of Berlioz (written before 1830), where what he calls an 'idée fixe' is used in the manner of a leit-motif. The 'idée fixe' itself is as follows:
It seems hardly necessary to point to Wagner's works as containing the most remarkable examples of 'leit-motive,' as it is with his name that they are chiefly associated. In his earlier works there are but suggestions of the principle, but in the later works, as in 'Tristan' and the 'Trilogy,' they are worked up into a most elaborate and consistent system. The following examples will serve to illustrate some of the most characteristic of his 'leit-motive' and his use of them.

The curse which is attached to the Rheingold ring is a very important feature in the development of the story of the 'Trilogy,' and its 'leit-motif,' which consequently is of frequent occurrence, is terribly gloomy and impressive. Its first appearance is singularly apt, as it is the form in which Alberich the Nibelung first declares the curse when the ring is reft from him by Wotan, as follows:

\[\text{\textit{Wie durch Fluch er mir ge-rith,}}\]

Among the frequent reappearances of this motif, two may be taken as highly characteristic. One is towards the end of the 'Rheingold,' where Fafnir kills his brother giant Fasolt for the possession of the ring, and the leit-motif being heard reminds the hearers of the doom pronounced on the possessors of the ring by Alberich.

A yet more pregnant instance is in the 'Götterdämmerung.' When Siegfried comes to the Hall of the Gibichungs on the Rhine, with the ring in his possession, having obtained it by slaying Fafnir, who had taken the form of a dragon to preserve it, the first person to greet him is Hagen, the son of Alberich, who looks to compass Siegfried's death, and regain the ring for the Nibelungs by that means. As Hagen says 'Heil Siegfried, theurer Held,' the greeting is belied by the ominous sound of the leit-motif of the curse, which thus foretells the catastrophe in the sequel of which Hagen is the instrument and Siegfried the victim, and lends a deep and weird interest to the situation. Siegfried himself has 'motive' assigned to him in different circumstances and relations. For instance, the following figure, which he blows on the horn made for him by Mime, is the one which most frequently announces his coming. It implies his youthful and light-hearted state before he had developed into the mature and experienced hero:

\[\text{\textit{This figure is frequently subjected to considerable development, and to one important transformation, which appears, for instance, in the death march as follows:}}\]

In his character as mature hero he is notified by the following noble figure,

\[\text{\textit{which occurs as above in the last act of the 'Walküre,' when Wotan has laid Brünnhilde to sleep on the 'Felsenhöhe,' with a wall of fire around her; and the sounding of the motif implies that Siegfried is the hero who shall pass through the fire and waken Brünnhilde to be his bride. A happy instance of its recurrence is when, in the first act of 'Siegfried,' the youthful hero tells how he had looked into the brook and saw his own image reflected there.}}\]

In the above examples the marked character of the figure lies chiefly in their melody. There are others which are marked chiefly by rhythm, as the persistent motif of Mime imitating the rhythmic succession of blows on an anvil—

\[\text{\textit{which points to his occupation as a smith. This motif occurs in connection with the rattling blows of the hammers of the Nibelung smiths underground, at the end of the second scene of the 'Rheingold,' and thus shows its derivation. Other 'motive' again are chiefly conspicuous by reason of impressive and original progressions of harmony. Of this kind that of the Tarnhelm is a good example. It occurs as follows, where Alberich first tests the power of the helm at the beginning of the third scene of the 'Rheingold'—}}\]
Another instance, where a strongly marked melodic figure is conjoined with an equally striking progression of harmony, is the ‘death motif’ in ‘Tristan und Isolde,’ which first appears in the second scene, where Isolde sings as follows:

\[\text{Note staff image}\]

A figure which it is difficult to characterise, but which has a marvellous fascination, is the motif of the love-potion in ‘Tristan und Isolde.’

The love-potion is the key to the whole story, and therefore the musical portion of the work appropriately commences with its leit-motif. Among the numerous examples of its recurrence one is particularly interesting. When King Mark has discovered the passionate love which existed between Tristan and Isolde he is smitten with bitter sorrow that Tristan, whom he had so loved and trusted, should have so betrayed him, and appeals to Tristan himself. Then as Tristan slowly answers him the motif is heard, and, without its being so expressed (for Tristan does not excuse himself), conveys the impression that Tristan and Isolde are not to blame, but are the victims of the love-potion they had unwittingly shared.

Prior to contemporary composers, though subsequent to the idée fixe of Berlioz, a few hints of the spirit of leit-motif may be found in various quarters: for instance, in Meyerbeer’s ‘Prophète,’ when the prophet in the early part of the work speaks of the dream of future splendour in store for him, the first strain of the processional march is heard. Again, the system of giving a particular instrumental tone to the accompaniment of particular characters which is clearly analogous, is notable in the string accompaniment of Christ’s words in Bach’s ‘Passion,’ and in the sounding of the trombones when the Commendatore appears in ‘Don Giovanni,’ and the adoption of a similar quality of tone or definite phrase as the accompaniment to special utterances of Elijah in Mendelssohn’s oratorio, and to the appearance of Don Quixote in his opera of ‘Camacho’s Hochzeit’ (1829).

Among other instances of the use of what is practically a ‘leading motive,’ apart from the advanced school of composers, should be mentioned ‘La Clochette’ of Hérold, in which the melody ‘Me voilà,’ allotted to Lucifer, appears at every entrance of the character. See Rev. et Gazette Mus. for 1880, p. 227. [Instances of the use of ‘leit-motives’ in modern music, from Macfarren downwards, are too numerous to mention; it is obviously a device which is useful alike to composers and listeners, and it has been stated that even Balfe used them. Weber’s employment of them is conspicuous in many of his works.]

C. H. H. P.

LE JEUNE, CLAUDE, or CLAUDIN, both at Valenciennes probably about 1540, for we first find his name as a composer in 1564, in ‘Dix Pseaumes de David.’ The only part of his life of which we have any record was spent in Paris. Thus in 1581 he attended the marriage of Henry III.’s favourite, the Duc de Joyeuse, and noted the magical effect of his own music.

About this time also, Leroy printed 5 vols. of chansons (a 4), thirty-nine of them by Le Jeune, and the publisher, himself a first-rate musician, seems to have valued them highly, placing the author by the side of Lassus, and selling the last 2 vols. with their works alone. Still the Huguenot composer met with slender encouragement for many years, and there is a pathetic story of his attempted flight at the siege of Paris in 1588, when bowed down by the weight of his unpublished MSS., he was caught by the catholic soldiers, and would have seen his treasures committed to the flames, but for the timely aid of Maudit, a Catholic musician, who saved the books and aided the escape of his brother artist.

Better times came late in life. In Henry IV.’s reign, Leroy printed ‘Recueil de plusieurs chansons et airs nouveaux,’ par Cl. le J. (Paris, 1594), and in 1598 Haultin, at La Rochelle, the ‘Dodecandre,’ twelve psalms written according to Glarean’s twelve Church modes. On the title-page of the latter we see for the first time ‘compositeur de la musique de la chambre du roy,’ so perhaps the permission to print such a work, and the possibility of holding the appointment, were a result of the Edict of Nantes in the same year. In any case the

1 The story goes that an officer was so excited by an air of the composer’s that he cried out, with oath, that he must attack some one, and was only pacified when the character of the strain was altered. Whatever truth there may be in the story, the effect was more probably produced by some martial rhythm in the music than by any superior intelligence which Claude possessed in the use of the modes, to which it is attributed by the narrator.

2 The last 5 of 25 vols. of chansons published between the years 1595 and 1597.
appointment was quite a recent one, and Le Jeune did not long enjoy it, for the next publication, 'Le Printemps' (dedicated to our king James I.), was posthumous, and on the fourth page an ode appears 'Sur la musique du defunct Sieur Cl. le J.,' the second stanza of which begins thus—

Le Jeune a fait en sa vieillesse,
Ce qu'un bien gaye jeunesse,
N'auseroit avoir enterpris.

The sixth page contains a general essay on music, claiming for Le Jeune the honour of uniting ancient rhythm to modern harmony. 'Le Printemps' contains thirty-three chansons with 'vers mesurez,' followed by longer settings of 'vers rimez.' Amongst the latter is Jannequin's 'Chant de l'Alouette' (a 4) with a fifth part added by Le Jeune, 'Le chant du Rossignol' in 6 nos., 'Ma mignonne' in 8 nos., and a Sestine (a 5) 'Du trist Hyver.'

The prefaces give no full explanation of 'vers mesurez.' On p. 6 we read that 'the wonderful effects produced by ancient music, as described in the fables of Orpheus and Amphion, had been lost by the modern Masters of Harmony,' that Le Jeune was 'the first to see that the absence of Rhythm accounted for this loss; that he had unearthed this poor Rhythm, and by uniting it to Harmony, had given the soul to the body,' and that 'Le Printemps' was to be an example of this new kind of music, but on account of its novelty, might fail to please at first.

The editor next tells us (p. 7) that M. Bafi and M. Le Jeune had meant to print the words with suitable spelling and without superfluous letters, and to make the scanning as clear in the French poetry as it would be in Latin; but that he (the editor) had been advised to abandon this as too great a novelty. We are, therefore, left uncertain as to the method which the authors meant to employ, and have little to guide us as to the interpretation of such a passage as this (the bars drawn and quavers joined as in original):

\[\text{Voice le verd à beau may convi-vant à tout sans.}\]

We have, however, above the ode 'Sur la musique mesuree de Cl. le J.' on p. 3 of this same book a scheme of the quantities of the four lines in each stanza. The first line of this scheme being \(-\) \(-\) \(-\) \(-\) \(-\) \(-\) \(-\); the corresponding line of the ode would then be accented

\[\text{Malta nuit} | \text{ciens dé çë} | \text{temps ci ii pâr fës à | cörs gravë} | \text{döa.}\]

and any music set to this would take the same accents. And so we might suppose that by some suitable directions as to the scanning of the words he might intend the above passage to be sung thus—

Using the bars in the original as a mere division of the lines in the poem, where there should always be a pause and the measure completed. In any case this is only an adaptation to French music of what had been already done by Lassus and others in using the metres of Latin verses, though their efforts at Rhythm may have been accidental, while Le Jeune's had a set purpose. It is interesting, at least, to see the importance of Rhythm being recognised, and some attempt at a notation to express it. It also seems clear from what is said in the preface, of making the French lines like the Latin, that the authors saw the impetus which the Latin odes had given to music in this direction.

The music (a 3) to the Psalms (Paris, 1607) was apparently not reprinted, being doubtless cast in the shade by the more important setting (a 4 and 5) of Marot and Beza's Psalms, printed at La Rochelle by Haultin, and dedicated by Cecile Le Jeune, in pursuance of the composer's expressed wishes, to the Duke of Bouillon, a great Protestant champion. This work, on which Le Jeune's great reputation entirely rests, went through many editions in France, found its way into Germany with the translation of Lobwasser, and, except in Switzerland, was soon used universally in all Calvinistic churches. 'It went through more editions, perhaps, than any musical work since the invention of printing.'

The melodies in the Tenor are the same as those used by Goudimel, and earlier still by Guillaume Frane. The other parts are written in simple counterpoint, note against note. The simplicity of the style, and its consequent fitness for congregational use, was not the only cause of its supplanting earlier works of the kind. There is real beauty in the music, which modern critics do not cease to recognise. 'Claude Le Jeune,' says Burney, speaking specially of this work, 'was doubtless a great master of harmony.' Ambros finds 'the discant so melodious that it might be mistaken for the principal part.'

'These psalms,' thinks Féris, 'are better written than Goudimel's.'

Other posthumous publications are the 'Aires à 3, 4, 5, 6' (Paris, Ballard, 1608), and a collection of thirty-six chansons, three on each of the twelve modes, under the title 'Octonaires de la vanité et inconstance du monde' (id. 1608).

Lastly, in 1612, Louis Mardo, Le Jeune's nephew, published a second book of Meslanges, in which, judging from the miscellaneous contents, he must have collected all that he could

1 See Hawkins's History (chap. 110). The copy we have seen had the first page torn out, on which this dedication probably appeared, and the words 'roy' and 'muncet's' erased on the second.
2 Poet and musician, 1520-1599.
3 All doubts to Le Jeune being a family name seems to be dispelled by the sister's signature as above.
4 Burney's History, iii. 45.
5 The belief which at one time existed in England that Le Jeune was the author of the melody of the 'Old Hundredth Psalm,' and which gains some support from the vague terms in which Burney (iii. 47) speaks of it, has no foundation in fact. [See Olof Runesson.]
6 Geschichte der Musik, iii. 344.
7 Biographie, v. 301.
still find of his uncle's works, French chansons a 4, 5, 8, canons, psalms, a magnificent, a fantaisie, Latin motets, and Italian madrigals.

In the higher branches of composition Le Jeune never met with great success. The Belgian and Italian masters would not look at his writings 1 Burney regarded him as a man of study and labour rather than of genius and facility, but this judgment was only passed on some of his very earliest works, 2 Fétis, on the other hand, considered him naturally gifted, but without the education of a great master; and this opinion seems to be borne out by the success of his simplier, and the failure of his more elaborate works.

Le Jeune is generally regarded as a Frenchman, though his birthplace did not become part of France till 1677. It would, however, be no great honour to be called the chief musician of an ungrateful country, which suffered Janneguin in his old age to bewail his poverty, which had killed poor Goudimel, and could now only boast of a decaying and frivolous school. It is more to his honour to remember him as the composer of one little book which was destined, after his death, to carry God's music to the hearts of thousands in many lands. J. R. S.-B.

LEKEU, GUILLAUME, born at Heusy, in the province of Liege, Jan. 20, 1870, was a pupil of the Conservatoire of Verviers, and subsequently studied with César Franck and Vincent d'Indy in Paris. He obtained the second prix de Rome in Belgium, with his scene lyricque 'Andromede,' which was followed by various symphonic compositions, works for voice and different instruments, many of which were unfortunately left incomplete at his early death. This took place at Angers, Jan. 31, 1894. His works include a sonata in G for piano and violin, dedicated to Ysaye; a trio for piano and strings, in which passages of very high rank alternate with weak and confused portions; a string quartet, finished by d'Indy; and, lastly, a 'fantaisie sur deux airs populaires angevins,' frequently played in Belgium and France. M. Ysaye has often conducted Lekeu's Etude symphonique on 'Hamlet,' an intimately poetical work, and an adagio for quartet and orchestra, of finely elegiac character. Most of Lekeu's compositions are published by Baudou in Paris and Muralle of Liege. M. K.

LE MAISTRE, MATTHAUS, a Flemish musician of the 16th century, supposed to have come originally from Liege, succeeded Johann Walther in 1554 as capellmeister to the Saxon Court at Dresden. He retired on a pension in 1568, and died about 1577. Otto Kade, in his otherwise excellent monograph on this composer (published 1862), made the mistake of identifying him with Matthias Hermann, surnamed Werrecorenis, who was choirmaster at the Duomo of Milan, and so represented Le Maistre as having come from Milan to Dresden; but the Milan choir-

master has since been proved to be a different person altogether from Le Maistre the Dresden capellmeister. Le Maistre's publications are (1) Cathechesis (Nuremberg, 1563); this work consists mainly of a few simple, note-for-note settings of the chief parts of the Lutheran Catechism in Latin, the Paternoster for four voices on the Plain-Song Melody, the Creed, and other pieces, for three voices. (2) Geistliche und weltliche Gesänge a 4 and 5 (Wittenberg, 1566), seventy sacred songs and twenty-two secular. (3) Liber I. sacrarum cantionum (Dresden, 1570), fifteen Latin Motets a 5. (4) Deutsche und lateinische geistliche Gesänge (Dresden, 1577), twenty-four numbers a 3. Two motets by Le Maistre were received into the great collection Thesaurus Musices (Nuremberg, 1564), one of which Estote Prudentes for four voices, has been reprinted by Commer in his Collectio, etc., tom. viii. Also a mass a 5 was published in 1568. Other masses and officia have remained in MS. Kade's Monograph contains ten of Le Maistre's Geistliche Gesänge, and five weltliche Gesänge, two of which are Quodlibets, that is, pieces with various texts and melodies combined. Two other pieces are contained in the Beilagen zu Ambros Geschichte. J. R. M.

LEMAIRE, EDWIN HENRY, born at Ventnor, Isle of Wight, Sept. 9, 1865, was elected to the Goss scholarship at the Royal Academy of Music in 1878, and became an associate on the completion of his studies. He was subsequently elected to a fellowship of the same institution, and in 1884 was made a fellow of the Royal College of Organists. His successive appointments as organist are as follows:—St. John the Evangelist's, Brownswood Park; St. Andrew's Church, and the Public Hall, Cardiff; the Parish Church, Sheffield (1889); Holy Trinity, Sloane Street; and St. Margaret's, Westminster. During his tenure of these last two posts, he became famous as a solo player and a giver of recitals of more than the usual interest. He excels in the representation of orchestral works upon the organ, but his playing of legitimate organ music is remarkably artistic and intelligent. He has written much for his instrument, and has edited various series of compositions for it. Since the death of W. T. Best, Lemaire has been generally considered the most brilliant of contemporary organists. In 1902 he accepted the post of organist and director of the music at Carnegie Hall, Pittsburgh, U.S.A., but after two years' tenure of this post he returned to England. (Brit. Mus. Brum; Mus. Times, 1899, p. 164, and 1902, p. 96.) M.

LEMLIN (= LAMMLEIN), LORENZ, a German composer of the earlier part of the 16th century, came from Eichstatt in Bavaria, and in 1513 attended the University of Heidelberg. He was afterwards singer and capellmeister to the Elector Palatine at Heidelberg. Georg Forster mentions him with respect as his worthy
preceptor in music, and inserts fifteen of his master’s Lieder in his collections of 1589 and 1549. Eitner speaks very slightly of these Lieder (Monatshefte, xxvi. 1854, p. 89), while on the other hand Ambros judges them very favourably (Geschichte der Musik, iii. pp. 403–4). The only one accessible in a modern reprint is a humorous ‘cuckoo’ song for six voices, which Ambros describes as quite a charming piece in Volkston, ‘Der Gutz-ganx auf dem Zanne sass.’ This was first republished by C. F. Becker in his book, Die Hausmusik in Deutschland, Leipzig, 1840, and is also contained in Eitner’s recent republication of Forster’s Liederbuch of 1540. The only other known works of Lemlin are a few Latin motets in collections from which Ambros sings out for special mention ‘a very beautiful’ ‘In manus tuas.’

J. R. M.

LEMmens, Nicholas Jacques, was born Jan. 3, 1823, at Zoerle-Parwys, Westerlooe, Belgium, where his father was provost and organist. His career was attached to the organ from the first. At eleven years of age he was put under Van der Broeck, organist at Dieste. In 1839 he entered the Conservatoire at Brussels, but soon left it owing to the illness of his father, and was absent for a couple of years. In the interval he succeeded his former master at Dieste, but fortunately gave this up and returned to the Conservatoire at the end of 1841. There he became the pupil of Fétes and was noted for the ardour and devotion with which he worked. He took the second prize for composition in 1844 and the first in 1845, as well as the first for organ-playing. In 1846 he went, at the government expense, to Breslan, and remained there a year, studying the organ under A. Hesse, who sent him back at the end of that time, with a testimonial to the effect that ‘he played Bach as well as he himself did.’ In 1849 he became professor of his instrument at the Conservatoire, and M. Fétes, as the head of the establishment, bears strong testimony to the vast improvement which followed this appointment, and the new spirit which it infused through the country; and gives a list of his pupils, too long to be quoted here. Though distinguished as a pianist, it is with the organ that his name will remain connected. In 1857 M. Lemmens married Miss Sherrington, and from that time resided much in England. His great work is his École d’orgue, which has been adopted by the Conservatoires at Paris, Brussels, Madrid, etc. He also published Sonatas, Offertories, etc., for the organ, and was engaged for twenty years on a Method for accompanying Gregorian Chants, which was edited by J. Duclos after the author’s death, and published at Ghent in 1856. Four volumes of œuvres inédites were published by Breitkopf & Härtel. Lemmens died Jan. 30, 1891, at Castle Linterport near Malines. On Jan. 1, 1879, he opened a college at Malines, under the patronage of the Belgian clergy, for training Catholic organists and choirmasters, which was soon largely attended. Madame Lemmens, née Sherrington, was born at Preston, where her family had resided for several generations, Oct. 4, 1834. Her mother was a musician. In 1838 they migrated to Rotterdam, and there Miss Sherrington studied under Verhulst. In 1859 she entered the Brussels Conservatoire, and took first prizes for singing and declamation. On April 7, 1856, she made her first appearance in London, and soon rose to the position of leading English soprano, both in sacred and secular music, a position which she maintained for many years. In 1860 she appeared on the English, and in 1866 on the Italian operatic stage, and her operas included ‘Robin Hood,’ ‘Amber Witch,’ ‘Helvelyn,’ ‘Africaine,’ ‘Norma,’ ‘Huguenots,’ ‘Roberto,’ ‘Don Giovanni,’ ‘Domino Noir,’ ‘Fra Diavolo,’ ‘Marta,’ etc., etc.

LEMOINE, a well-known Paris firm of music-publishers. It was founded in 1798 by Antoine Marcel Lemoine (born at Paris, Nov. 3, 1763; died there in April 1817), who was a performer on the guitar, and played the viola in the orchestra of the Théâtre de Monsieur. His son, Henri (born at Paris, Oct. 21, 1786; died there May 18, 1854), was a pupil of the Conservatoire in 1793-1809, and was one of the most successful piano-teachers of Paris; he took over the business on his father’s death, and raised it to a high position. His educational compositions include a Petite méthode élémentaire pour piano; a Traité d’harmonie pratique; a Solfège des Solfèges, in ten small volumes; Tableaux du Pianiste, etc., which are still in use. Achille Philipert Lemoine, the son of Henri (born at Paris, 1813; died at Sévres, August 13, 1895), was a partner from 1850, and two years afterwards undertook the sole direction of the firm. In 1858 he added to it an establishment for engraving and music-printing, which gave a great impulse to the business; this was carried still farther by the acquisition of the ‘fonds Schonberger.’ In 1885 Lemoine founded a branch establishment at Brussels, in association with his sons, Henri and Léon, who, since his death have carried it on. Among the numerous publications of the house, may be mentioned the Répertoire classique du chant français, and the Répertoire de l’ancien chant classique, both edited by Gevaert, and both remarkably useful and universally known.

G. F.

LENEPVEU, Charles Ferdinand, born at Roven, Oct. 4, 1849. After finishing his classical studies at his native place, he came to Paris by his father’s desire to study law, and at the same time he learnt solfège from Savard, a professor at the Conservatoire. His first essay as a composer was a cantata composed for the centenary of the Société d’Agriculture et de Commerce of
Caen, which was crowned and performed July 29, 1862. After this success he resolved to follow the musical profession, and through the intervention of Savard he entered the Conservatoire and joined Ambroise Thomas's class. He carried off the Prix de Rome in 1886 as the first competitor, and his cantata, "Renaud dans les jardins d'Armide," was performed at the opening of the restored Salle du Conservatoire, Jan. 3, 1886. It was thought at the time that this work showed promise of a great future, but opinions have since undergone modification, for Lenepveu has never risen above the crowd of estimable musicians. When he was at Rome he took part in the competition instituted by the Minister of Fine Arts in 1867, and his score of 'Le Florentin,' written on a poem by St. Georges, was accepted from among sixty-two compositions, without hesitation on the part of the judges, or murmurs on the part of the rival competitors. The prize work was to have been given at the Opéra Comique, but political events and the war delayed the fulfilment of the promise, and Lenepveu, instead of composing for the Concerts Populaires, which were always ready to receive new works, made the mistake of holding aloof, resting on his laurels, while his companions, Massenet, Dubois, Guiraud, Bizet, etc., all of whom were waiting for admittance into the theatres, devoted themselves to symphonic music, and thereby acquired skill in orchestration, as well as the recognition of the public. Lenepveu, who on his return from Rome had resumed his contrapuntal studies with the celebrated organist Chauvet, while waiting for the production of 'Le Florentin,' brought forward nothing except a funeral march for Henri Regnault, played under Pasdeloup, Jan. 21, 1872. In the preceding year he had produced a Requiem at Bordeaux for the benefit of the widows and orphans of those killed in the war, May 20, 1871; fragments of these works given at the Concerts du Conservatoire, March 29, 1872, and at the Concerts Populaires, April 11, 1873, showed an unfortunate tendency in the composer to obtain as much noise as possible. At length, after long delays and repeated applications, 'Le Florentin' was given at the Opéra Comique, Feb. 26, 1874, and was wholly unsuccessful. Since then Lenepveu has never been able to get any work represented in France. Having completed a grand opera, 'Velleida' (on the subject of Chateaubriand's 'Martyrs'), he determined to produce it in London, where it was performed in Italian, with Mme. Patti in the principal part (Covent Garden, July 4, 1882). Besides a number of songs and pieces for the piano, Lenepveu has only produced one important work, a 'drame lyrique,' 'Jeanne d'Arc,' performed in the Cathedral at Rouen (June 1, 1886). [A 'Hymne funèbre et Triomphale,' was performed at Rouen in 1889; an 'Ode à Jeanne d'Arc' at the same place in 1892; and a requiem in 1893.]

His music, which is naturally noisy, is also wanting in originality, and his style is influenced by composers of the most opposite schools. The artist is now entirely sunk in the professor. Since Nov. 1880 he has taken a harmony class for women at the Conservatoire in the place of Guiraud, now professor of advanced composition. In this capacity Lenepveu was decorated with the Légion d'Honneur on August 4, 1887. [He has been professor of composition in the Conservatoire since 1894, and was elected a member of the Institute in 1896.] A. J.; with additions by C. F.

LENTO, i.e. 'slow,' implies a pace and style similar to a slow Andante. Beethoven rarely uses it. One example is in his last Quartet, op. 135, Lento assai. Mendelssohn employs it for the introduction to his 'Ruy Blas' overture, but he chiefly uses it, like 'con moto,' as a qualification for other tempos—as Andante lento ('Elijah,' No. 1, and op. 35, No. 5), Adagio non lento (op. 31, No. 5), Adagio e lento (op. 87, No. 3).

LENTON, John, [sworn gentleman of the Chapel Royal in 1865], one of the band of music of William and Mary and of Queen Anne, [from 1692 to 1718], in 1694 published 'The Gentleman's Diversion, or the Violin explained,' with some airs composed by himself and others at the end. A second edition, with an appendix, and the airs omitted, appeared in 1702, under the title of 'The Useful Instructor on the Violin.' It is remarkable that in neither edition is there any mention of 'shifting,' and the scale given reaches not to e". About 1694, in conjunction with Thomas Totel, he published 'A Consort of Musick in three parts.' Lenton composed the overtures and act tunes to the following plays:—'Venice Preserv'd,' 1682; 'The Ambitious Step-mother,' 1700; 'Tamburlaine,' 1702; 'The Fair Penitent,' 1703; 'Liberty asserted' and 'Abra Mulcy,' 1704. Songs by him are in several of the collections of the period, and other vocal pieces in 'The Pleasant Musical Companion (1685). He contributed to D'Urfey's 'Third Collection of New Songs,' [to Apollo's Banquet'] and revised the tunes for the earlier editions of his 'Pills to purge Melancholy.' [The second vol. of Playford's Dancing Master, 1713, is 'correctly corrected by J. Lenton, one of Her Majesties Servants.'] The date of his death has not been ascertained, but it was probably soon after 1718, when his name disappears from the royal band. W. H. H.; additions from Dict. of Nat. Biog., etc.

LENZ, Wilhelm von, born 1808, Russian councillor at St. Petersburg, and author of Beethoven et ses trois styles (2 vols. Petersburg, 1852), in which the idea, originally suggested by Fétis, that Beethoven's works may be divided into three separate epochs, has been carried out to its utmost limits. This was followed by Beethoven: Eine Kunststudie, in 6
Leo, Leonardo, more correctly Leonardo Oronzo Salvatore de Leo, was born of humble parents at S. Vito degli Scavi, now called S. Vito dei Normanni, not far from Brindisi, on August 5, 1694. He was the youngest of the three sons of Leonardo de Léo and Saveria Martino, and was named Leonardo after his father, who died before his birth, Oronzo after an ancestor whose name has been perpetuated in the family up to the present day, and Salvatore because he came into the world poor like our Saviour. According to the family traditions recorded by Cavaliere Giacomo Leo, a descendant of his brother Giuseppe, he was educated at S. Vito by the Dominicans, who discovered his musical talent and persuaded his mother and his uncle Don Stanislae de Leo, Cantor of the church of S. Vito, and Doctor Teodolme de Leo to send him to pursue his musical studies at Naples. He was admitted to the Conservatorio della Pia
dei Turchini in 1703, being then nine years old, and remained there until he came of age in 1715. He must not be confused with a relative of his, Leonardo Leo (not de Léo), son of Corrado Leo, who was in easy circumstances, and was living at Naples 'in domibus Conservatorii,' i.e. in a house belonging to the Conservatorio della Pia
dei Turchini at this time. This Leonardo married in 1713; his namesake would not have been allowed to do so while still a pupil of the Conservatorio, and indeed he remained single all his life.

At Naples Leonardo studied first under Provenzale, and later under Nicola Fago il Tarentino. It has been stated that he was also a pupil of Pitoni at Rome, and of Alessandro Scarlatti at Naples; but although his work was certainly much influenced by both these masters, he cannot have received direct tuition from either of them. He could not have gone to Rome for lessons while a poor student at a Neapolitan Conservatory, and A. Scarlatti on his return to Naples towards the close of the year 1708 was teaching, not at the Pietà dei Turchini, but at the Poveri di Gesù Cristo.

Leo made his first appearance as a composer with a sacred drama on the subject of Santa Chiara, entitled 'L' Infedelta abbatutta,' performed by the students of the Conservatorio during the carnival of 1713, and repeated on Feb. 14 of that year at the royal palace, by command of the Viceroy, Florimo names as his first composition another sacred drama, 'Il trionfo della castità di S. Alessio,' produced, according to him, on Jan. 4, 1718, at the Conservatorio, but no trace of either score or libretto is to be found, and it is not mentioned in the newspapers of the time. His first secular opera was 'Pissistrate' (Teatro di S. Bartolomeo, May 13, 1714), which was much admired. In the following year the young composer was made second master at the Pietà dei Turchini, and (according to Florimo) organist of the cathedral; in 1716 he appears to have been appointed supernumerary organist of the royal chapel, and on June 23, 1717, organist, with a stipend of 12.75 lire a month. This promotion was probably connected with the departure for Rome of A. Scarlatti, which took place in the autumn, after which he received no stipend, but continued to hold the title of Primo Maestro della Real Cappella. Leo also became maestro di cappella at the church of S. Maria della Solitaria, which belonged to a convent of Spanish nuns. In 1718 he produced 'Solonisba,' hitherto supposed to have been his first opera, and in any case the first which definitely established his reputation as a composer for the stage. The scores of most of his operas of this time have disappeared, and only the more important ones need be mentioned here. In 1722 he composed recitatives and comic scenes for Gasparini's 'Bajazette,' first produced under the name of 'Tamerlano at Venice in 1711. The comic scenes were written by Bernardo Sabdamene, who afterwards became famous as a writer of comic libretti in Neapolitan dialect. This seems to have been the beginning of Leo's brilliant career as a composer of comic opera. 'La npeca scoperta ('L'imbroglio scoperto') was produced in 1723 at the Teatro dei Fiorentini, a theatre already celebrated for the comedies of A. Scarlatti and Leonardo Vinci, and was the first of a long series of successes in this line.

In 1725 Alessandro Scarlatti died, and a number of promotions took place on the staff of the royal chapel, Leo now becoming first organist. It was probably at this date that he became master at the Conservatorio di S. Onofrio. His fame now extended outside Naples. 'Timocrate' had been given in Venice in 1723, and in 1726 his 'Trionfo di Camilla' was produced at Rome. The charming pastorale 'In van la gelosia,' which occurs in this opera, enables
us to fix the date of the Neapolitan comic opera 'La semmeglianza di chi l'ha latta,' in which the same air is sung as a show-piece by one of the minor characters. In 1732 he succeeded Vinci as Pro-vice-maestro of the royal chapel, and in the same year produced his two celebrated oratorios 'La Morte di Abele' and 'Santo Elena al Calvario.' "Demofonte," perhaps the most successful of all his operas, appeared in 1735; in this opera occur the well-known duet 'La destra ti chiedo' and the pathetic air 'Misero pargoletto,' considered by Piccinni as a model of dramatic expression. In 1737 he was at Bologna for the production of 'Siface,' which was given twenty-seven times at the Teatro Malvezzi, and for which the composer received 1595 lire. 'Farnace' (1737) was the last opera given at the old Teatro di S. Bartolomeo before its final conversion into a church, the newly built San Carlo having taken its place as court theatre. Leo's 'L'Olimpiade' (1737) was the second opera performed there. In 1738 he composed 'Le Nozze di Amore e di Psiche,' a 'festa teatrale' in honour of the marriage of Charles III. with Maria Amalia Walburga of Saxony, and was so much taken up with this work that he was unable to finish the opera 'Demetrio,' on which he was engaged in spite of being imprisoned in his house and guarded by soldiers to ensure his working. He wrote the first act and part of the second, which was finished by De Majo, Lorenzo Fago, and Lagroscino, the third being written by Riccardo Broschi, brother of Farinelli. The whole opera was, however, eventually finished by Leo himself, and produced at Rome in 1742.

Two important compositions belong to the year 1739: the celebrated Misere and the comic opera 'Amor vuol sofferenze.' The Misere was composed in March, for the use of the royal chapel, and afterwards presented to King Charles Emmanuel of Savoy; Florimo tells a story of Leo's refusing to allow it to be copied after this, until his pupils contrived to do so secretly and perform it before him. The comic opera 'Amor vuol sofferenze' is that described with so great delight by the President Des Brosses to M. de Neville—'Nous avons eu quatre opéras à la fois sur quatre théatres différents (i.e. S. Carlo, Fiorentini, Nuovo, and della Pace). Après les avoir essayé successivement j'en quitte bientôt trois pour ne pas manquer une seule représentation de la Fresquetana, comédie en jargon dont la musique est de Leo ... Quelle invention! Quelle harmonie! Que belle partie plaisanterie musicale!' The heroine of the opera, Engenia, disguises herself as a maidservant from Frascati; hence the title La Finta Frascatana, under which the opera was revived at Bologna in 1742, and by which it was no doubt conveniently known at the time of its first production. It was also known as 'Il Ciòe,' from the absurd character Fazio, a middle-headed person who is always explaining and contradicting himself with the word 'ciò'—'that is to say.' In Nov. 1740 Leo went to Turin for the production of 'Achille in Sciro,' and to Milan for that of 'Scipione nelle Spagne,' being absent from Naples for four months. On Jan. 1, 1741, he succeeded Nicola Pago as first master at the Pietà dei Turchini, and with the exception of a short visit to Rome in November of that year, he seems to have remained in Naples until his death. On Saturday morning, Oct. 31, 1744, he was found dead, having succumbed to apoplexy, while seated at his harpsichord: the romantic statement of Florimo that he was engaged at the moment on the composition of 'La Finta Frascatana' is obviously untrue. The records of his death are conflicting, owing to a confusion with his namesake mentioned above; for the various documents the reader may be referred to Cav. G. Leo's biography. He was buried at the church of Montesanto, the last resting-place of A. Scarlatti and many other musicians of his school.

In person, Leo was of middle height and handsome features; in manner he was dignified and urbane. He was a man of serious character, working hard at night when his other occupations left him little opportunity for composition in the daytime, and so careful in the preparation of music for performance that he would begin on Ash Wednesday rehearsing the Misere to be sung in Holy Week. As a teacher he was severe, but greatly beloved of his pupils, the most distinguished of whom were Piccinni and Jommelli.

As a composer, his name rests chiefly on his sacred music and his comic operas. He was the first of the Neapolitan school to obtain a complete mastery over modern harmonic counterpoint. In the fugal movements of his psalms and masses he is entirely free from modal influences, and is careful to secure a strong rhythmic contrast between his subjects and counter-subjects, a means of effect but vaguely attempted by A. Scarlatti. Leo is in this respect an important factor in the development of modern scholastic counterpoint. In other respects he presents little that is new. His melody is flowing and dignified, but rarely passionate; his harmony clear and logical, with no attempt at romantic expression. Of his ecclesiastical style the Dixit Dominus in C, published by Novello & Co., is a very typical specimen; another Dixit Dominus, for ten voices and orchestra in D, exhibits similar qualities.

Of his masses that in D major for five voices and orchestra is the best; the well-known Misere and the series of Introits, etc., for Lent, composed in 1744, show a successful adaptation of old methods to modern needs of expression, combining poetic feeling with a studiously restrained style. His sacred music for solo voices
is less severe in manner; we may mention the beautiful Lamentations for Holy Week, a graceful and florid Salve Regina, and a fine motet, 'Inter tota vanitas insana blamiantur,' for soprano solo and double quartet of strings.

As a composer of serious opera Leo is not especially interesting, and the scarcity of his scores makes it difficult to trace his development. His comic operas, however, are full of life and humour. 'Amor vuol sofferenza' fully merits the praise bestowed on it by Dea Brossas, and no more amusing 'piasanterie musicale' could be found than Fazio's great air, 'Io non so dove mi sto,' in which the mock-ecclesiastical accompaniment admirably illustrates the grotesque pomposity of the character. 'La semmelgianza' shows a keen sense of musical parody; and all the comic operas are full of sparkling and vivacious music, generally including one or two ensemble movements which are spirited, though never developed to a strong climax, either dramatic or musical. Mention must also be made of his instrumental music, which includes a concerto for four violins, and six admirable violoncello concertos composed in 1737 and 1738, for the Duke of Maddaloni.

The best collection of Leo's operas is at Montecassino; the British Museum and Fitzwilliam Museum afford the best materials for the study of his sacred music.

A complete catalogue of his works, with the libraries where they are to be found, is printed in Cav. G. Leo's biography. The writer's special thanks are due to Cav. Leo for help in the preparation of this article.

Vito dei Normanni, Naples, 1904.)

I OPERAS AND OTHER DRAMATIC WORKS

* Sinfonia per la Sacra di San Francesco a Montecassino, Diana Amato (Naples, 1717). Serenata. Libretto, Brussels Conservatoire.

Senzatuti, Re d'Egitto (with Gasparini). Libretto, Brussels Conservatoire (Naples, 1717).

Artaxerse:

Trovatore (Venice, 1724). Libretto, Bologna, Venice (Bibl. Marc.).

* L'Amore Felsele (Naples, 1724).

Turco Aricono (Naples, 1724) by Leo and Vinci. Libretto, Brussels Conservatoire.

Zenobia in Palma (Naples, 1725). Score and libretto, Naples R.C.M.

* S. Chiara e l'Infedeltà abbattuta (Naples, 1727).

* Il Trionfo della caduta di Alabao (Naples, 1730).

* Dalla morte alla vita (8. Maria Maddalena). (Atanni near Aquis-Porta, 1732).

Oratorio for the B. V. of the Rosary (Naples, 1730). Score at Munich.

S. Francesco di Paola nel Deserto (Lece, 1736).

* Neither score nor libretto survive, but the work is mentioned in contemporary journals or other records.

OREAS

* S. Chiara e l'Infedeltà abbattuta (Naples, 1727).

* Il Trionfo della caduta di Alabao (Naples, 1730).

* Dalla morte alla vita (8. Maria Maddalena). (Atanni near Aquis-Porta, 1732).

Oratorio for the B. V. of the Rosary (Naples, 1730). Score at Munich.

S. Francesco di Paola nel Deserto (Lece, 1736).

Fragments of an autograph (autograph) in which the characters are Alba and Eline. Paris Conservatoire.

III. MAHER
22. S.A.T.B. and orchestra in G (Kyrie and Gloria). Two versions of this mass exist.

For S. Vincento Ferrari, 1733.  
Berlin  
Cambridge.  
Dresden.  
Munich.  

B.C.M.  
Paris Conservatoire.  

Choral spiritus, S. and organ. Cambridge.  

Dixit Dominus, S.S.A.T.B. and orchestra in A. Palermo B.C.M.  

Dixit Dominus, S.S.A.T.B. and orchestra in F. London B.C.M.  

Dixit Dominus, S.A.T.B. and orchestra in G. (an organ part only).  

in used mesiores, S.A.T.B. Brit. Mus., Berlin, Cambridge, Darmstadt, Dresden, Munich, Naples, Paris Conservatoire. (The Dresden Ms. is inscribed ‘Falco a richiesta de Pittoni’, which might be an error for ‘di’ or ‘del Pittoni’, but Cav. G. Leo, died in the 16th century, i.e. for the Congregazione del Pittoni in Naples.)

Introt per i vừa massa blandissimam, S. and double quartet of strings. Naples, B.C.M. (an organ part).

Passion of the fourth, S.A.T.B.  

Piae quisque fabulae (Si quaeris miracula). S.A.T.B. and strings. Naples B.C.M.
played accompaniments at café-concerts. In the latter capacity he travelled far, visiting England, France, Holland, and Germany, and going even as far as Cairo. After many years' wandering he returned to Italy, and presented himself to the house of Ricordi, with the scenario of a vast trilogy dealing with the history of the Renaissance in Italy, for which he had already completed the libretto of the first section, 'I Medici.' The latter was accepted, and in a year Leoncavallo had finished the music. For three years he waited vainly in the hope of seeing his opera produced, and then betook himself in despair to the rival house of Sonzogno. Here he was well received, and for this firm he wrote his two-act opera 'Pagliacci,' which was produced at the Teatro dal Verme, Milan, on May 21, 1892, with very great success. Leoncavallo's name soon became famous throughout Italy, and on Nov. 10, 1893, his 'Medici,' the first section of his Renaissance trilogy 'Crepuscolum,' was produced at the Teatro dal Verme. The work, which deals with the Fazzi conspiracy and the murder of Giuliano de' Medici, was a failure; and the composer, discouraged by its unfavourable reception, has never completed, or at any rate never published, the remaining sections of the trilogy, 'Savonarola' and 'Cesare Borgia.' Leoncavallo's early opera 'Chatterton,' which was finally given at the Teatro Nazionale, Rome, on March 10, 1896, was no more successful than 'I Medici,' but 'La Bohème' (Teatro della Fenice, Venice, May 6, 1897), an adaptation of Henri Murger's novel, was far more favourably received, although handicapped by inevitable comparisons with Puccini's opera on the same subject, which had been produced with overwhelming success a few months earlier, and was actually being played to crowded audiences at another theatre in Venice at the same time. Leoncavallo's next opera, 'Zaza,' an adaptation of the well-known play by MM. Berton and Simon, was produced at the Teatro Lirico, Milan, on Nov. 10, 1900, with fair success, and has subsequently been performed in Germany, Holland, and Paris. 'Der Roland,' Leoncavallo's latest work, was written in response to a commission of the German Emperor, who heard 'I Medici' in Berlin in 1894, and believed that in the Italian poet and musician he had found a bard worthy of celebrating the glory of the house of Hohenzollern, as in 'I Medici' he had celebrated that of the great Florentine family. 'Der Roland' is founded upon Willibald Alexis's romance 'Der Roland von Berlin,' which deals with the subjugation of Berlin by the Elector Frederick II. Of this work an Italian translation was made for Leoncavallo's benefit by the Emperor's orders, from which he constructed his own libretto. This, after the music was finished, was translated back into German by Georg Drosscher, and the opera was produced at the Royal Opera House in Berlin, on Dec. 13, 1904. In spite of the patronage of the Emperor, and the favour of the Court, 'Der Roland' proved anything but a permanent success. It is, in fact, in his most ambitious works, such as this and 'I Medici' that Leoncavallo shows to least advantage. In operas of the type of 'Zaza' and 'Pagliacci,' his strong feeling for theatrical effect serves him well, but his sheer musical inspiration is singularly deficient; and his more pretentious works are hardly more than strings of ill-digested reminiscences. In other ways, he is an expert musician; his orchestration is always clever and appropriate, and his mastery of modern polyphony is undeniable. As a librettist he shows uncommon dramatic ability. Not only has he invariably written the libretti for his own operas, but like Boito he has occasionally placed his talent at the service of his friends, as in the case, for instance, of 'Mario Wetter,' an opera by the Portuguese composer, Augusto Machado. Apart from his operatic works, Leoncavallo is the composer of a symphonic poem, 'Serafita,' founded upon Balzac's novel, and of a ballet entitled 'La Vita d'una Marionetta.'

**LEONI, LEONE, maestro di cappella at the Duomo of Vicenza from at least 1588, belongs to the Venetian school of composers, whose chief merit does not so much consist in the polyphonic interweaving of the separate voices in skilful and elaborate counterpoint, as in the variety and brilliance of colouring by expressive harmony and the contrasts of double choirs. His publications are five Books of Madrigals a 5, containing twenty or twenty-one each, Venice, 1588-1602; 'Penitenza,' a book of Spiritual Madrigals a 5, 21 n, 1596; 'Sacri Fiori,' four Books of Motets for one to four voices with organ accompaniment, 1606-22; 'Sacra Cantiones,' Lib. I. a 8, with double Organ Score 20 n, 1608; 'Psalmodia,' with two magnificats a 8, 1615; 'Aurea Corona,' Concerti a 10 for four voices and six instruments, etc. 25 n, 1615. It will thus be seen that Leoni also followed in the wake of Giovanni Gabrieli in the combining of voices and instruments, using the instruments obbligato. The works of Leoni which would seem to have been most valued by his contemporaries are his motets for double choir a 8, fifteen of which appear in the Promtuarium of Schadaeus, 1611, and four in the Florilegium of Bodenschatz, 1621. Of these Ambros singles out two for special mention. A Passion motet, 'O Domine Jesu Christe adorar te,' he describes as of an almost heavenly beauty, and of 'Petra amas me' he says that hardly any one has given a more beautiful and touching expression to the rapturous utterance of divine love. None of these works have yet appeared in any modern collection. In Torchì's L'Arte Musicale in Italia, vol. ii., there are two Madrigals of Leoni from the volume of 1602, both interesting, one a nightingale echo song,
the two upper voices meant to represent one nightingale echoing the other in canon. J.R.M.
LEONORA OVERTURES, see FIDELIO, ante, p. 33.
LEONORE, OU L'AMOUR CONJUGAL.
An opéra-comique in two acts; words by Bonilly, music by Gaveaux. Produced at the Opéra Comique, Feb. 19, 1798. The book was translated into Italian, composed by Paer, and produced at Dresden, Oct. 3, 1804. It was also translated into German by Jos. Sonnleithner (late in 1804), and composed by Beethoven. The story of the transformations and performances of the opera in its three shapes is given under FIDELIO, ante, p. 33.
LEONORE¹ PROHASKA. A romantic tragedy by Friedrich Duncker, for which Beethoven in the autumn of 1814 composed a soldiers' chorus for men's voices unaccompanied; a romance with harp accompaniment; and a melodram with harmonica, besides scoring the march in his Sonata, op. 26. The melodram has been already printed in this Dictionary (ante, p. 298). The opening-bars of the two others are given by Thayer, Chron. Verzeichniss, No. 187 (see the account in Thayer, iii. 317). The four pieces, as given in the article, have been published by Breitkopf in the supplemental volume to their complete edition of Beethoven. The march from op. 26 is transposed into B minor, and scored for Flutes, Clarinets in A, Bassoons, two Horns in D and two in E, Drums, Violins 1 and 2, Viola, Violoncello, and Bass. The autograph is in possession of the Gesellschaft der Musikfreunde in Vienna. Dr. Sonnleithner —no mean authority—believed that Beethoven had also written an overture and entr'acte for the piece. For some reason or other the play was not performed.

LE ROY, or LE ROY, ADRIEN, was a singer, lute player, and composer, but will be remembered as one of the most celebrated music printers of the 18th century, when printers were also publishers. Of the reasons of his taking to printing we have no account. He worked with the types of Le Bé (cut in 1540), as Attaingnant had done before him with those of Hautin. Fétis states that he worked by himself for some time, but cites no evidence. In 1551 Le Roy married the sister of R. Ballard, who was already occupying himself with music printing, and was attached to the court; they joined partnership and obtained a patent, dated Feb. 16, 1552, as sole printers of music to Henri II. In 1572 he received Orlando Lasso as his guest, and published a volume of 'moduli' for him, with a dedication to Charles IX., which has already been quoted in this volume (ante, p. 644). Leroy's name disappears from the publications of the firm in 1589, and it may thus far be inferred that he died then. His Instruction book for the Lute, 1557, was translated into English in two different versions, one by Aylford, London, 1568, and one by 'F. K. Gentleman' (ib. 1574). A second work of his was a short and easy instruction book for the 'Guierne,' or guitar (1578); and a third is a book of 'airs de cour' for the lute, 1571, in the dedication of which he says that such airs were formerly known as 'voix de ville.' Besides these the firm published, between 1551 and 1568, twenty books of 'Chansons' for four voices. [See BALLARD.]

LESCHE Zipy, THEODOR, a distinguished pianist, born at Lancut in Austrian Poland, June 22, 1830. He attracted notice in Vienna by his pianoforte playing in 1845. He was for some time a professor at the Conservatorium of St. Petersburg, from which appointment he retired in 1878, since which time he has lived in Vienna. His marriage with his pupil, Mme. Essipoff, took place in 1880, and was dissolved in 1892, and in 1894 he married another pupil. His compositions chiefly consist of morceaux de salon for the piano, but an opera, 'Die erste Paife,' was given with success at Prague in 1867, at Wiesbaden in 1881, and elsewhere. He made his début in England at the Musical Union concerts in 1864, playing in the Schumann Quintet, and solo of his own composition, and has frequently since then appeared at the same concerts. He was the principal master of Paderewski; an account of his method was published as Die Grundlage des Methode Leschetizky by Malwine Brée in 1902.
LESLIE, HENRY DAVID, born in London, June 18, 1822, commenced his musical education under Charles Lucas in 1838. For several years he played the violoncello at the Sacred Harmonic Society and elsewhere. In 1847, on the formation of the Amateur Musical Society, he was appointed its honorary secretary, and continued so until 1855, when he became its conductor, which post he retained until the dissolution of the Society in 1861. The choir which bore his name was actually formed by Mr. Joseph Henry, in 1853, and conducted at first by Frank Moris; Leslie undertook the leadership in 1855, and the first concert took place in 1856. At first the number of voices was limited to about sixty, but afterwards it was increased to 240, so that a large work could replace the madrigals, for the sake of which the choir was originally founded. In 1878 it gained the first prize in the International competition of choirs at Paris. In 1883 Leslie was appointed conductor of the Herefordshire Philharmonic Society, an amateur body at Hereford. In 1884 he became principal of the National College of Music, an institution formed on the principle of the foreign conservatoires, which, however, not receiving adequate support, was dissolved in a few years. In 1874 he became the director and conductor of the Guild of Amateur Musicians. In 1880 his choir was broken up; it was subsequently reorganised under Signor Randegger, and in 1885-1887 Leslie resumed its management. Henry Leslie's first published composition—a Te Deum and Jubilate in D—appeared in 1846. He produced a Symphony in F, 1847; a festival anthem, 'Let God arise,' for solo voices, chorus and orchestra, 1849; overture, 'The Templar,' 1852; 'Immanuel,' oratorio, 1854; 'Romance, or, Bold Dick Turpin,' operetta, 1857; 'Judith,' oratorio, produced at Birmingham Festival, 1858; 'Holyrood,' cantata, 1860; 'The Daughter of the Isles,' cantata, 1861; 'Ida,' opera, 1864; besides instrumental chamber music, anthems, songs, duets, trios, pianoforte pieces, and a large number of part-songs and madrigals composed for his choir. In addition to a wide range of madrigals, motets, and unaccompanied music of all ages and countries, the following are among the larger works which were performed by this excellent choir: Motets for eight voices by Bach and Sebastian Wesley; Mendelssohn's Psalms and motets, and his 'Antigone' and 'Euphues'; Gounod's motets and Messe Solennelle; Carissimi's 'Jonah'; Tallis's Forty-part song; Bourgault-Ducoudray's 'Symphonie Religieuse' (unaccompanied). Leslie died at Llanfair Safan, near Oswestry, Feb. 4, 1896.

LESSER, FRANZ, one of Haydn's three favourite pupils, born about 1780, at Pulawy on the Vistula, in Poland, his father, a pupil of Adam Hiller and Dittersdorf, being Music-director at the neighbouring castle of Prince Czartoryski. In 1797 he came to Vienna to study medicine, but the love of music proved a great distraction. Haydn eventually took him as a pupil, a service he repaid by tending him till his death with the care and devotion of a son. In 1810 he returned to Poland, and lived with the Czartoryski family, occupied entirely with music. After the Revolution of 1830 had driven his patrons into exile, Lesser led a life of great vicissitude, but being a man of varied cultivation always managed to maintain himself, though often reduced to great straits. In 1837 he was superseded in his post as principal of the gymnasium at Petriakau on the borders of Silesia, and feeling a presentiment of approaching death, he composed his requiem, and shortly after (August 1838) expired of the disease commonly called a broken heart. He left songs, chamber music, and symphonies; also church music, specially indicating gifts of no common order. Among his effects were some autographs of Haydn presented by himself. Some of his works were published by Artaria, Weigl, and Breitkopf & Hartel, among them being three sonatas for PF. (op. 2), dedicated to Haydn; fantasia for PF. (op. 8), dedicated to Clementi; another fantasia (op. 13), dedicated to Cecily Beidale; a piano concerto, etc. [See Quellen-Lexikon.]

Lesser's life was a romantic one. He was believed to be the love-child of a lady of rank. Mystery also enveloped the birth of his first love, Cecily Beidale, and he discovered that she was his sister only just in time to prevent his marrying her. One of his masses—'Zum Cäcilientag'—was composed in all the fervour of this first passion.

C. F. P.

LESSON, or LEÇON, a name which was used from the beginning of the 17th century to the close of the 18th, to denote pieces for the harpsichord and other keyed instruments. It was generally applied to the separate pieces which in their collected form made up a Suite. The origin of the name seems to be that these pieces served an educational purpose, illustrating different styles of playing, and being often arranged in order of difficulty. This is borne out by the fact that Domenico Scarlatti's 'Forty-two Lessons for the Harpsichord, edited by Mr. Roseingrave,' are in the original edition called 'Essercizi—xxx. Sonatas per Gravicembalo,' though they have little of the educational element in them, and by the following extract from Sir John Hawkins's History of Music (chap. 148; he uses the word 'lessons' for 'suites of lessons'):

In lessons for the harpsichord and virginal the airs were made to follow in a certain order, that is to say, the slowest or most grave first, and the rest in succession, according as they deviated from that character, by which rule the Jig generally stood last. In general the Galliard followed the Pavan, the first being a grave, the other a sprightly air; but this rule was not without exception. 'Rameau's Lessons for the Harpsichord, opp. 2 and 3, are not
arranged in order of difficulty, but are connected by the relation of their keys. In the case of Handel's 2 Leçons, the first consists of a Prelude and air with variations in B♭, the second of a Minuet in G minor, and the third of a Chaconne in G major; so they may be presumed to be intended for consecutive performance. The 'Suites de Pièces pour le Clavecin,' in two Books, were called 'Lessons' in the first edition, but in the later editions this name was discarded for that which they bear. Instances of the use of the word to indicate a composition in three movements are to be found in the works of many 18th century composers. One such lesson by Nares is quoted in the Oxford History of Music, vol. iv.; The Age of Bach and Handel, pp. 329-338.

An analogous word to this is 'Études,' which from originally meaning a special form of exercise, has in many cases come to be applied to pieces in which the educational purpose is completely lost sight of. [See Études.] Although in general the name was applied to pieces for the harpsichord alone, yet it was sometimes used for concerted chamber music, as in the 'Firste Booke of consort lessons, made by divers exquisite authors, for six Instruments to play together, viz. the Treble Lute, the Pandora, the Citterne, the Base Violl, the Flute and the Treble-Violl, collected by Thomas Morley, and now newly corrected and enlarged' (London, 1611), and in Mathius Vento's 'Lessons for the Harpsichord with accompaniment of Flute and Violin.'

LESTOCQ, Opera in four acts; words by Scribe, music by Aubé. Produced at the Opéra Comique, May 24, 1834. It was produced in English at Covent Garden, Feb. 21, 1835, as 'Lestocq, or the Fête of the Hermitage.'

LESUEUR, JEAN FRANÇOIS, grandnephew of the celebrated painter Eustache Lesueur, born Feb. 15, 1760,1 in the village of Ducrot-Plessiel, near Abbeville. He became a chorister at Abbeville at seven. At fourteen he went to the college at Amiens, but two years later, in 1779, broke off his studies to become, first, maître de musique at the cathedral of Séez, and then sous-maître at the church of the Innocents in Paris. Here he obtained some instruction in harmony from the Abbé Roze, but it was not any systematic course of study, so much as his thorough knowledge of Plain-song and deep study, that made him the profound and original musician he afterwards became. His imagination was too active, and his desire of distinction too keen, to allow him to remain long in a subordinate position; he therefore accepted in 1781 the appointment of maître de musique at the cathedral of Dijon, whence after two years he removed to Le Mans, and then to Tours. In 1784 he came to Paris to superintend the performance of some of his motets at the Concert Spirituel, and was re-appointed to the Holy Innocents as headmaster of the choristers. He now mixed with the foremost musicians of the French school, and with Sacchini, who gave him good advice on the art of composition, and urged him to write for the stage. In 1786 he competed for the musical directorship of Notre Dame, which he obtained, and immediately entered upon his duties. He was allowed by the chapter to engage a full orchestra, and thus was able to give magnificent performances of motets and Messes Solennelles. His idea was to excite the imagination and produce devotional feeling by means of dramatic effects and a picturesque and imitative style, and he even went so far as to precede one of his masses by a regular overture, exactly as if it had been an opera. Crowds were attracted by this novel kind of sacred music, and his masses were nicknamed the 'Beggars' Opera' ('L'Opéra des Gueux'). This success soon aroused opposition, and a violent anonymous attack was made upon him, under pretext of a reply to his pamphlet Éssai de musique sacrée, ou musique motivated et méthodique pour la fête de Noël (1786). Lesueur's rejoinder was another pamphlet, Exposé d'une musique vae, initiatrice et particulière à chaque solennité (Paris, Hérissoint, 1787), in which he gives a detailed sketch of an appropriate musical service for Christmas, and states expressly that his aim was to make sacred music 'dramatic and descriptive.' Meantime the chapter, finding that his projects had involved them in heavy expense, curtailed the orchestra while at the same time strong pressure was put upon him by the Archbishop to take orders. He willingly assumed the title of Abbé, but declined the priesthood, especially as he was composing an opera, 'Télémaque,' which he was anxious to produce. Finding his reduced orchestra inadequate for his masses he resigned, upon which an infamous libel was issued, accusing him, the most upright of men, of having been dismissed for fraud. Completely worn out, he retired in the autumn of 1788 to the country house of a friend, and here he passed nearly four years of repose and happiness. On the death of his friend in 1792 he returned to Paris, invigorated and refreshed in mind, and composed a series of three-act operas—'La Caverne' (Feb. 15, 1793), 'Paul et Virginie' (Jan. 13, 1794), and 'Télémaque' (May 11, 1796), all produced at the Feydeau. The brilliant success of 'La Caverne' procured his appointment as professor in the 'École de la Garde Nationale' (Nov. 21, 1793), and he was also nominated one of the inspectors of instruction at the Conservatoire from its foundation in 1795. In this capacity he took part with Méhul, Gossec, Catel, and Langlé, in drawing up the Principes élémentaires de musique and the Solféges du Conservatoire. He was then looking

1 See the Quellen-Lexikon for the evidence of this date.
forward to the production of two operas which had been accepted by the Académie; and when these were set aside in favour of Catel's 'Semi-rantis' his indignation knew no bounds, and he vehemently attacked not only his colleague, but the director of the Conservatoire, Catel's avowed patron. His pamphlet, Projet d'un plan général de l'instruction musicale en France (Paris, an IX. (1801) anonymous), raised a storm, and Lesueur received his dismissal from the Conservatoire on Sept. 23, 1802. Having a family to support, the loss of his salary crippled him severely, and he was only saved from utter indigence by his appointment in March 1804 as maître de chapelle to the First Consul, on the recommendation of Paisiello, who retired on account of his health. As the occupant of the post most coveted by musicians in France, Lesueur had no difficulty in securing the representation of 'Ossian, ou les Bardes' (five acts, July 10, 1804). The piece inaugurated the new title of the theatre as 'Académie Impériale.' Its success was extraordinary, and the Emperor, an ardent admirer of Celtic poems, rewarded the composer with the Legion of Honour, and presented him with a gold snuff-box inscribed 'L'Empereur des Français a l'auteur des Bardes,' intended also as an acknowledgment for a Te Deum and a mass performed at Notre Dame on the occasion of his coronation (Dec. 2, 1804). During the next five years Lesueur undertook no work of greater importance than a share in Persuis's interméle 'L'Inauguration du Temple de la Victoire' (Jan. 2, 1807), and in the same composer's three-act opera 'Le Triomphe de Trajan' (Oct. 23, 1807), containing the well-known 'marche solennelle'; but on March 21, 1809, he produced 'La Mort d'Adam et son Apothéose' in three acts—the original cause of his quarrel with the management of the Académie and the Conservatoire. The scenery and decorations of the new opera excited the greatest admiration; when complimented on his work, Degotti the scene-painter replied quite seriously, 'Yes, it certainly is the most beautiful paradise you ever saw in your life, or ever will see.'

In 1813 Lesueur succeeded Grétry at the Institut; and after the Restoration became, in spite of his long veneration for Napoleon, surintendant and composer of the chapel of Louis XVIII. On Jan. 1, 1816, he was appointed professor of composition at the Conservatoire, a post which he retained till his death. His lectures were largely attended, and very interesting from the brilliant remarks with which he interspersed them. Of his pupils no less than twelve gained the 'prix de Rome'—namely, Bourgeois, Ermel, Paris, Guiraud, Hector Berlioz, Eugène Prévost, Ambroise Thomas (whom he called his 'note sensible,' a leading note, on account of his extreme nervousness), Elwart, Ernest Boulangier, Besozzi, Xavier Boislet (who married one of his three daughters), and, lastly, Gounod. Lesueur also wrote Notice sur

1 This is said to have been a favourite amusement with Gounod as a boy.

2 Berlioz, Mémoires, chap. vi.
Hector Berlioz. [In the latter's *Les Musiciens*, etc., pp. 59 and 68, there are interesting essays on Levasseur and his oratorios.] g. c.

**LEUTZEN DINGE, DIE.** See Last Judgment.

**LEUTGBEB, or LEUTGBEB, JOSEF,** a horn player to whom Mozart was much attached. They became acquainted in Salzburg, where Leutgeb was one of the band, and on Mozart's arrival in Vienna he found him settled there, in the Altenrechenfeld, No. 32, keeping a cheese-monger's shop and playing the horn. Mozart wrote four Concertos for him (Kochel, 412, 417, 447, 485), a Quintet (407), which he calls "das Leitgebische," and probably a Rondo (571).

This shows that he must have been a good player. There must also have been something attractive about him, for with no one does Mozart appear to have played so many tricks. When Leutgeb called to ask how his pieces were getting on Mozart would cover the floor with loose leaves of scores and parts of symphonies and concertos, which Leutgeb must pick up and arrange in exact order, while the composer was writing at desk as fast as his pen could travel. On one occasion he was made to crouch down behind the stove till Mozart had finished. The margins of the Concertos are covered with droll remarks—

1 W. A. Mozart has taken pity on Leutgeb, ass, ox, and fool, at Vienna, March 27, 1783, etc.'

The horn part is full of jokes—'Go it, Signor Asno—you take a little breath—you wretched pig!'—'thank God here's the end!'—and much more of the like. One of the pieces is written in coloured inks, black, red, green, and blue, alternately. Such were Mozart's boyish romping ways! Leutgeb threw on his cheese and his horn, and died richer than his great friend, Feb. 27, 1811. g.

**LEVA, ENRICO DE,** famous for his very numerous songs, chiefly Neapolitan 'canzonette,' was born in Naples, Jan. 19, 1867. In early youth he studied the pianoforte under Pannain and Rossmandari, receiving lessons in harmony, counterpoint, and composition from Puzone and D'Arienza, professors at the R. Conservatorio Musical of Naples. He appears, however, to have owed his success less to theoretical acquirements than to his very distinct individuality and natural gifts, which he began to exercise in composing pianoforte pieces and songs at the age of fifteen. While still very young, he was so fortunate as to attract the favourable attention of the firm of Ricordi, who, after the extraordinary success of his Neapolitan canzonetta, 'Non mi guardà,' entered into a contract with the young composer to write for them five songs each year. De Leva's celebrity was still further increased in 1890 by royal favour, Queen Margherita having been so favourably impressed by de Leva's music at a concert given by him in Rome that she commissioned him to write a vocal piece for an open-air festivity at the Royal Palace of Capodimonte. This work, a serenata entitled 'A Capomonte,' was directed by the composer, whose songs enjoyed, thenceforward, the advantage of being interpreted by the foremost singers of the day. Of the hundreds of songs written by Enrico de Leva, it must suffice to mention only a few of the most successful, such as 'E spingole frangesse,' 'Triste aprile,' 'Voi siete l'alba,' 'Ultima Serenata,' 'Voce fra i campi,' 'Ammore piccirellato,' 'Ho sognato,' and 'Lacrime amare.' Some of his best have been written for popular local festivals. In these, the composer has skilfully preserved the spirit of the old Neapolitan folk-song, adapting it to the requirements of modern harmony with admirable spontaneity. Among de Leva's more important works may be mentioned his 'Sirenetta,' a setting of some verses from D'Annunzio's *Giocucoli.* He has also written innumerable pieces for the piano and violin, and suites for orchestra. His most ambitious effort was an opera in four acts, 'La Camargo,' produced in Turin in 1888 at the Teatro Regio, and in Naples at San Carlo.

De Leva is widely known as a teacher of singing in its higher branches, and as a successful advocate of improved methods in the cultivation of choral singing in elementary schools throughout Italy. His writings on this and other musical subjects have attracted considerable attention.

H. A. W.

**LEVASSEUR, NICHOLAS PROSPER,** was born March 9, 1791, at Bresles, Oise, the son of a labourer. He entered the Paris Conservatoire in 1807, and became a member of Garat's singing class, Feb. 5, 1811. He made his débuts at the Académie as Osman Pacha (Grétry's 'Caravane'), Oct. 5, 1813, and as Odipus (Sachini's 'Edipe à Colonus'), Oct. 15, and was engaged there. According to Féris he was successful only as the Pacha; the repertory was either too high for his voice, or unfavourable to the Italian method which he had acquired. He made his début at the King's Theatre, London, in Simon Mayr's 'Adelasia ed Alderano,' Jan. 10, 1815, and played there two seasons with success in 'La Clemenza di Tito,' in 'Gli Orazi,' as Pluto (Winter's 'Ratto di Proserpina') at Mme. Vestris's début, July 20, 1815; in Paër's 'Griselda,' Farinelli's 'Rite d'Efeo,' Ferrari's 'Heroine de Raab,' and Portogallo's 'Regina di Lidia.' He reappeared there with some success in 1829, and again in French as Bertram on production of 'Robert,' June 11, 1832. He reappeared at the Académie about 1816, and remained there as an under-study, but obtained much reputation in concerts with his friend Ponchard. He made his début at the Italiens as Figaro, Oct. 5, 1819, and remained there until about 1827, where he sang in new operas of Rossini, in Meyerbeer's 'Crociato,' and Vaccaj's
'Romeo.' He sang at Milan on the production of Meyerbeer's 'Margherita d'Anjou,' Nov. 14, 1820. He reap­peared at the Académie as Moses on the production of Rossini's opera there, March 26, 1827, a part which he had previously played at the Italians, Oct. 20, 1822; returned there permanently the next year, and remained until his retirement, Oct. 29, 1833. He created the part of Zacharias in the 'Prophète' at the request of Meyerbeer, who admired his talent as much as his noble character. He was appointed head of a lyric class at the Conservatoire, June 1, 1841, and on his retirement in 1869 was appointed a Chevalier of the Legion of Honour. He died at Paris, Dec. 5, 1871, having become blind a short time before his death. 'It was in the production of "Robert" that Levasseur created a class of characters . . . in which he has had innumerable imitators, but not one single artist with his peculiar physiognomy, his exceptionally toned voice, his imposing presence and intellectual grasp. His Bertram was a veritable creation.

Next to Bertram must rank his delineation of Marcel and Zachariah.'

LEVERIDGE, Richard, a singer noted for his deep and powerful bass voice, was born in London about 1870. His name appears as one of the singers in Dr. Blow's Te Deum and Jubilate for St. Cecilia's day 1696; and he took part in Motteux's 'Island Princess' in 1699, composing some of the music himself. In 1702 'Macbeth' was given at Drury Lane, 'with music by Leveridge.' This has not been identified (see MACBETH Music). Leveridge usually took the part of Hecate. He appeared in various operas, etc. of Purcell.] He sang in the Anglo-Italian operas, 'Arsinoe,' 'Camilla,' 'Rosamond,' and 'Thomyris,' at Drury Lane Theatre in 1705-7. In 1708 he was engaged at the Queen's Theatre and sang in 'The Temple of Love,' etc., and in Handel's 'Faithful Shepherd' ('Il Pastor Fido') on its production in 1712. He subsequently transferred his services to Rich, and sang in the masques and pantomimes at Lincoln's Inn Fields and Covent Garden for nearly thirty years. His voice remained unimpaired so long, that in 1730, when sixty years old, he offered, for a wager of 100 guineas, to sing a bass song with any man in England. About 1726 he opened a coffee-house in Tavistock Street, Covent Garden. [He appeared in pantomimes, etc. until 1751, taking his last benefit in that year. He wrote a kind of opera, 'Brittain's Happiness,' performed in 1704,] and 'Pyramus and Thisbe,' a comic masque, in 1716, composed by him from 'A Midsummer Night's Dream.' In 1727 he published his songs, with the music, in two small 8vo vols. [The best known are 'All in the Downs' and 'The Roast Beef of Old England.' Some of his songs are said to be adaptations from Irish traditional tunes.] Many others were published singly. In his old age he was maintained by an annual subscription among his friends, promoted by a city physician. He died March 22, 1758. There is a good mezzotint of him by Pether, from a painting by Frye. W. H. H.; additions from Dict. of Nat. Bio., etc.

LEVÉY, Richard Michael (whose real name was O'Shaughnessy), was born in Dublin, Oct. 25, 1811, and was apprenticed to James Barton in 1821, with whom he continued till 1826, when he entered the Theatre Royal orchestra. Balfe, Wallace, and Levey were intimate friends. Levey's earliest recollection was seeing Horn's opera, 'Lalla Rookh,' in Dublin, and he had pleasant memories of G. A. Lee and G. F. Stansbury as conductors of the 'old' Royal, of which he himself became leader in 1834. His accounts of the 'stars' between 1827 and 1847 make capital reading (a summary of them is given in his Annals of the Theatre Royal), and he often told the present writer stories of the two Keans, Alfred Bunn, Tyrone Power, Macready, Cooke, Miss Smithson (who married Berlioz), Taglioni, Paganini, Ole Bull, Bochsa, Lablache, and Grisi.

In all, from 1836 to 1880 (the 'Royal' was burned on Feb. 9, 1880), Levey composed fifty overtures, and he arranged the music for forty-four pantomimes. His first pantomime was 'O'Donoghue of the Lakes,' the book of which was written by Alfred Howard ('Paddy Kelly'). In 1839 he toured with Balfe's opera company in Ireland, and in 1840 he conducted the first performances in Dublin of 'The Maid of Artois' (with Balfe himself in the cast) and 'The Siege of Rochelle.' Levey often alluded with pardonable pride to Sir Robert Stewart and Sir Charles Villiers Stanford as his pupils. The latter's first appearance in public as a composer, at the age of eight, was as the writer of incidental music for the pantomime of 'Puss in Boots,' duly performed at the Theatre Royal during the Christmas of 1850, under Levey's baton.

In 1850, Levey was one of the founders of the Royal Irish Academy of Music—the other three being John Stanford, Joseph Robinson, and Sir Francis Brady, K.C. (still living)—and the infant institution was removed to more suitable premises, at 36 Westland Row, in 1870. In 1852-55 he was leader of the 'Dublin Quartet Concert Society'; in 1859-62 he formed and led the 'Classical Quartet Union.' In spite of the short duration of these enterprises, he helped to start the 'Monthly Popular Concerts' in 1868, when the quartet was led by Joachim, and the concerts lasted till 1871. He had a 'jubilee benefit,' April 20, 1876, and was presented with 250 guineas. Sir Robert Stewart conducted a new comic opera, 'The Rose and the Ring,' for Levey's benefit, on March 23, 1878.

Levey lived to see the opening of the 'new' Theatre Royal on Dec. 13, 1897, and repeated
his favourite joke that 'he still struggled to beat Time.' Among his published pieces are two volumes of old Irish airs. He married three times, and died June 28, 1899. His eldest son, R. M. LEVEY, jun., born in 1833, became a famous violinist, and played at Musard's concerts in Paris in 1851-58. He then appeared in London in an entertainment called 'Paganini's Ghost,' in which he was got up to represent that player, and performed his most difficult feats of virtuosity. In 1865-85 he gave concerts, etc., under the name of 'Paganini Redivivus,' and after 1888 he appeared at the music-halls. He is believed to be still living. The youngest son, JOHN LEVEY, author and comedian, died at Seaford, Liverpool, Sept. 17, 1891.

W. H. G. F.

LEVEY, WILLIAM CHARLES, born April 25, 1837, at Dublin, was taught music by his father, Richard Michael Levey (see above). He afterwards studied at Paris under Auber, Thalberg, and Prudent, and was elected a member of the Société des Auteurs et Compositeurs. He was conductor at Drury Lane from 1868 to 1874, and held the same post at Covent Garden, Adelphi, Princess's, Avenue, and Grecian Theatres, etc. His compositions include two operettas, 'Fanchette,' Covent Garden, Jan. 2, 1864; 'Punchinello,' Her Majesty's, Dec. 28, 1864; 'The Girls of the Period,' musical burletta, libretto by Burnand, March 1869; incidental music to 'Antony and Cleopatra,' 1873; music to the dramas 'King o' Scots,' 'Amy Robsart,' 'Lady of the Lake,' 'Rebecca,' and 'Esmeralda,' and to several pantomimes; 'Robin Hood,' cantata for boys' voices; Saraband for piano on a motif written by Henry VIII.; several drawing-room pieces and many songs, one of which, 'Esmeralda,' originally sung by Miss Furtado at the Adelphi in the drama of that name, and in the concert-room by Mme. Bodda-Pyne, obtained considerable popularity. He died in London, August 18, 1894.

A. C.

LEVI, HERMANN, born Nov. 7, 1839, at Giessen, studied with Vincenz Lachner from 1852 to 1855, and for three years from that time at the Leipzig Conservatorium. His first engagement as a conductor was at Saarbrücken in 1859; in 1861 he became director of the German Opera at Rotterdam; in 1864 Hofkapellmeister at Carmelhze; and finally, in 1872, was appointed to the Court Theatre of Munich, a post which he filled with great distinction until 1896. He attained to a prominent place among Wagnerian conductors, and to him fell the honour of directing the first performance of 'Parsifal' at Bayreuth, on July 28, 1882. In 1895 he came to England, but only conducted one concert, on April 25, in the Queen's Hall. His mental disease showed itself soon afterwards, and, though in 1898 he rearranged the libretto of 'Così fan tutte,' he was never able to resume active work. He died at Munich, May 13, 1900.

M.

LEWIS, THOMAS C., originally an architect, commenced business as an organ-builder in London about the year 1861. He built the organs of the Protestant and Catholic Cathedrals, Newcastle-on-Tyne, Ripon Cathedral, and in London those of St. Peter's, Eaton Square; Holy Trinity, Paddington, and the People's Palace. But his largest work is the organ of St. Andrew's Hall, Glasgow.

V. DE P.

L'HERITIER, JEAN, a French composer and pupil of Joaquin des Prés, flourished in the earlier part of the 16th century. His works appeared in the collections published between 1519 and 1555, and even as late as 1588 a mass of his was published at Venice along with several by Orlando Lassus. Only one work bears his name on the title-page, 'Moteti de la fama,' a 4, Venice, 1555, but even here his works only appear along with those of other composers. Ambros classes him with Antoine Fevin and Jean Mouton, and describes his works as characterised by a peculiar refinement and grace, uniting something of the solidity of the Netherlands school proper with the elegance of the French. Aron in his Toscanelli refers approvingly to L'Heritier, because in his earliest published motet, 'Dum comperentur' in Petrueci's 'Motetti della Corona,' 1519, he had expressly marked the E flat in the melodic progression from B flat to avoid the Tritone. See Ambros, Geschichte der Musik, iii, 102-3 and 273. J. R. M.

L'HOMME ARME, LOME ARME, or LOMME ARME. I. The name of an old French Chanson, the melody of which was adopted by some of the great masters of the 15th and 16th centuries, as the Canto fermo of a certain kind of Mass—called the 'Missa L'Homme armé'—which they embellished with the most learned and elaborate devices their ingenuity could suggest.

The origin of the song has given rise to much speculation. F. Martini calls it a 'Canzone Provenzale.' Burney (who, however, did not know the words) is inclined to believe it identical with the famous 'Cantilenas Rolandi,' anciently sung by an armed Champion at the head of the French army, when it advanced to battle. Baini confesses his inability to decide the question: but points out that the only relic of this poetry which remains to us—a fragment preserved in the 'Proportionale Musices' of Tinctor—makes no mention of Roland, and is not written in the Provençal dialect.1

1 Lome, lome, lome armé.
   Et Robinet tu m'as
   La mort donnée,
   Quand tu t'en vas.

The melody—an interesting example of the use of the Seventh Mode—usually appears, either in Perfect Time, or the Greater Prolation. Though simple, it lacks neither grace nor spirit. 2

2 No more information is given by Lopin, Melodies populaires, Paris, 1879.
As might have been predicted, slight differences are observed in the Canti firmi of the various masses founded upon it; but they so far correspond, that the reading adopted by Palestrina may be safely accepted as the normal form. We therefore subjoin its several clauses, reduced to modern notation, and transposed into the treble clef.

Upon this unpretending theme, or on fragments of it, masses were written by Guglielmo du Fay, Antonio Busnoys, Regis, François Caron, Johannes Tinctor, Philippus di Bruges, La Page (or Faugues), De Orto, Vasqueras, Monsieur mon Compère, at least three anonymous composers who flourished between the years 1484 and 1513, Antonio Busnel, Josquin des Prés, Pierre de la Rue (Petrus Platensis), Pipelare, Mathurin Forestyn, Cristofano Morales, Palestrina, and even Carissimi—a host of talented composers, who all seem to have considered it a point of honour to exceed, as far as in them lay, the fertility of invention displayed by their most learned predecessors, and whose works, therefore, not only embody greater marvels of contrapuntal skill than any other series preserved to us, but also serve as a most useful record of the gradual advancement of Art.

The masses of Du Fay and Busnoys and their successors, Regis and Caron, are written in the hard and laboured style peculiar to the earlier polyphonic schools, with no attempt at expression, but with an amount of earnest sobriety which was not imitated by some of their followers, who launched into every extravagance that could possibly be substituted for the promptings of natural genius. Josquin, however, while infinitely surpassing his predecessors in ingenuity, brought true genius also into the field; and, in his two Masses on the favourite subject—one for four voices, and the other for five—has shown that freedom of style is not altogether inconsistent with science. The Fugues, Canons, Proportions, and other clever devices with which these works are filled, exceed in complexity anything previously attempted; and many of them are strikingly effective and beautiful—none more so, perhaps, than the third Agnus Dei of the Mass in four parts; a very celebrated movement known as Clima de cæsae, from the Inscription appended to the Superius (or upper part), for the purpose of indicating that the notes are to be sung continuously, without any rests between them. In this movement the Superius sings the Canto fermo entirely in Longa and Breves, while the other three voices are woven together in Canon and Close fugue with inexhaustible contrivance, and excellent effect. In the second movement of the Sanctus—the Pleini sunt—for three voices, the subject is equally distributed between the several parts, and treated with a melodious freedom more characteristic of the master than of the age in which he lived. It was printed by Burney in his History, ii. 495.

It might well have been supposed that these triumphs of ingenuity would have terrified the successors of Josquin into silence; but this was by no means the case. Even his contemporaries, Pierre de la Rue, Brumel, Pipelare, and Forestyn, ventured to enter the lists with him; and, at a later period, two very fine masses, for four and five voices, were founded on the old tune by Morales, who laudably made ingenuity give place to euphony, whenever the interest of his composition seemed to demand the sacrifice. It was, however, reserved for Palestrina to prove the possibility, not of sacrificing the one quality for the sake of the other, but of using his immense learning solely as a means of producing the purest and most beautiful effects. His Missa L'Homme Arme, for five voices, first printed in 1570, abounds in such abstruse combinations of Mode, Time, and Prolation, and other rhythmic and constructional complexities, that Zazconi—writing in 1592, two years before the great composer's death—devotes many pages of his Pratica di Musica to an elaborate analysis of its most difficult Proportions, accompanied by a reprint of the Kyrie, the Christe, the second Kyrie, the first movement of the Gloria, the Osanna, and the Agnus Dei, with minute directions for scoring these, and other movements, from the separate parts. The necessity for some such directions will be understood, when we explain that, apart from its more easily intelligible complications, the Mass is so constructed that it may be sung either in triple or in common time; and, that the original edition of 1570 is actually printed in the former, and that published at Venice, in 1599, in the latter. Dr. Burney scored all the movements we have mentioned, in accordance with Zazconi's precepts; and his MS. copy (Brit. Mus. Add. MS. 11,581) bears ample traces of the trouble the process cost him; for Zazconi's reprint is not free from clerical errors, which our learned historian has always carefully corrected. The first Kyrie, in which the opening clause of the Canto fermo is given to the Tenor in notes three times as
It will be seen, that, though strictly Dorian in its tonality, this interesting melody exceeds the compass of the First Mode by two degrees. The regularity of its phrasing savours rather of the 16th than the 15th century. Possibly Fruytiers may have modified it, to suit his own purposes. Instances, however, are not wanting, of very regular phrases, in very ancient melodies: as, for instance, in the delightful little Romance, 'L'autrier par la matinée,' by Thibaut, King of Navarre (ob. 1254), quoted by Dr. Burney, ii. p. 309, the rhythm of which is scarcely less distinctly marked than that of Fruytier's adaptation.

W. S. N.

LIADOV, Anatol Constantinoivich, born in St. Petersburg, May 11 (April 29, O.S.), 1855. His father and grandfather had been professional musicians. Liadov showed remarkable talent at a very early age. He received his first musical instruction from his father, after which he went through a course—including composition under Rimsky-Korsakov—at the Conservatoire, St. Petersburg. He left with a brilliant record in 1877, returning the following year as assistant teacher in the elementary classes for theory. Liadov now holds a professorship at this institution, taking special classes for harmony and composition. He has also held a similar post in the Imperial Court Chapel. Together with Balakirev and Liapounov, he was charged by the Imperial Geographical Society to make researches into the folk-songs of various districts. As a composer Liadov has written his best work for the piano-forte. His compositions for this instrument are delicate and graceful in form. The influence of Chopin is clearly evident in them; at the same time their distinctively Russian colouring, and gay—frequently humorously—character, saves them from the reproach of servile imitation. The following is a list of Liadov's chief compositions:

A. Piano-forte Music.

Op. 2, 'Hirtoliki'; op. 3, Six Pieces; op. 4, Arabesques; op. 5, Studies; op. 6, 7, and 8, Intermezzi and Preludes i and 10; Preludes and Mazurkas; op. 11, idem; op. 12, Studies; op. 13, Four Preludes; op. 15, Two Mazurkas; op. 17, 19, 21, 'From Days of Old,' balalaie; op. 22, 'On the Sword'; op. 23, Two Pieces; op. 25, 1511; op. 26 and 27, Marionettes; op. 30, 31, 32, Musical Studi-box; op. 34, Three Chansons; op. 35, Variations on a theme by Gluck; op. 36, Three Preludes; op. 37, Studres; op. 38, Mazurkas; op. 39, Four Preludes; op. 40, Studies and Preludes; op. 44, Bacchantes; op. 46, Preludes; op. 48, Studies and Chorinetti; op. 51, Variations on a Polish Song; op. 52, Morceaux de ballet.

B. Vocal Music, Solo with P.F. accompaniment.

Op. 1, Four Songs; op. 14, 15, 16, 22, Album of Six Songs for Children to national words; op. 40, Ten National Songs for Female Voice; op. 49, Russian National Songs, 12th National Songs, in three volumes.

C. Choral.

Op. 28, Last scene from Schiller's 'Bride of Messina,' for mixed chorus and orchestra; op. 47, 'Shiva,' for women's voices, two and two pianofortes, with hand organ; op. 56, Source for Female Chorus and P.F. accompaniment; Female Chorus (in honour of Vladimir Stasov, 1884).

D. Works for Orchestra.

Op. 16, First Scherzo; op. 19, Scena; The Ien-Mazurkas; op. 49, Polonaise in memory of Pushkin.

Besides the above, Liadov collaborated in "The Paraphrases" (see Borisov), the string quartet 'B-la-f' (see Belaieff), in the "Fanfare" for the jubilee of Rimsky-Korsakov, etc. R. N.
LIBRARIES AND COLLECTIONS

LIAPOUNOV, SERGIUS MIKHAILOVICH, composer, born Nov. 30, 1859, at Yaroslav. He attended the classes of the Imperial Musical Society at Nijny Novgorod, and afterwards joined the Moscow Conservatoire, which he quitted in 1883. He was appointed by the Geographical Society to collect folk-songs in the governments of Vologda, Viatka, and Kostroma (1893). From 1894 to 1902 Liapounov was assistant director of the Court Chapel. His chief compositions are:—For orchestra: Ballade (1883), Solenn Overture (1896), Symphony in B minor, op. 12 (1887), Polonaise, op. 16. For pianoforte: Concerto, preludes, valse, mazurkas, studies (12 Etudes d'exécution transcendante), etc. Vocal: 35 national songs with PF. accompaniment.

LIBERATI, ANTIMO, of Foligno, a pupil of Gregorio Allegri and Orazio Bencivoli, became in 1661 a singer in the Papal Chapel. He was also for some time choirmaster and organist to two other churches in Rome. He is chiefly known as the author of an Open Letter addressed to a musical friend (Lettera scritta . . . in risposta ad una del Sig. Ovidio Persopeci . . .), printed and published at Rome in 1685, which has been relied on by Baini and others as the main authority for various statements with regard to the early life and works of Palestrina. He asserts that a certain Gaudio Mell, a Flemish musician of great talent, and master of a very graceful and polished style, founded in Rome a school of music, from which proceeded many excellent composers, and among them Palestrina, the greatest of all. This statement as to Palestri na's teacher was accepted by Adami in his Osservazioni, 1711, and afterwards by Padre Martini, and, in spite of the doubts expressed by Ottavio Pitoni on the further point, Baini boldly identified this Gaudio Mell with the well-known French composer Claude Goudimel, and is very angry with Dr. Burney for suggesting a possible confusion of Goudimel with Rinaldo del Mel. It is indeed Pitoni himself who identifies Gaudio Mei with Rinaldo del Mel, and it is very evident from what Pitoni says in his Notizie MS. de' contropuntisti, etc., as quoted by Baini in a later part of his work (Memorie Storico-critiche, t. ii. p. 127), that the whole story of Gaudio Mell has really originated in a distorted account of a visit paid to Palestrina by Rinaldo del Mel in 1586, and the subsequent confusion of this Rinaldo del Mel with the earlier Goudimel, a confusion of which Baini himself is guilty, in so far as he ascribes to Goudimel works in the Roman Archives which really belong to Rinaldo. There is no evidence that Goudimel was ever in Rome. The Flemish musician who opened a school in Rome is more likely to have been Arscawlt, who under the name of Jacobus Flandrus was a member of the Papal chapel in 1540-50, and whose flowing melodious style undoubtedly influenced Palestrina. Another statement of Liberati's is that Pope Marcellus II. was about to prohibit under anathema the use of figured music in church, but that by the composition of a Mass which was performed in presence of the Pope and Cardinals, and which was afterwards known by the name of this Pope, Palestrina brought him to another mind, and thus saved the cause of church music. Baini has shown the absurdity of this account of the matter, but unfortunately invented and gave currency to another equally false account. It is obvious that Liberati, writing in 1685, was not in a position to give at first hand a true account of the life and works of Palestrina, and most of the stories about Palestrina which rest on the mere gossip of the Papal Chapel must be relegated into the region of mere fable. The Papal Chapel did not always show that honour to Palestrina in his lifetime which it began to do after his death. Besides this Letter, Liberati wrote another work, Epi tome della Musica, which only exists in MS., also two letters in defence of a passage in one of Corelli's sonatas. Baini mentions madrigals, arias, and oratorios of Liberati in Roman Archives.

J. R. M.

LIBRARIES AND COLLECTIONS OF MUSIC.—I. EUROPE.—The article on Musical Libraries which appeared in the first edition of this work was the earliest attempt to tabulate information as to the music contained in the principal libraries of Europe and the United States. Confessedly imperfect at the time, since it was written so much research has taken place in musical bibliography that it has been found necessary largely to re-write and add to the original article. In preparing the present notes as to the musical contents of the libraries of Europe, considerable use has been made of Dr. Emil Vogel's paper, 'Musikbibliotheken nach ihrem wesentlichsten Bestande,' which appeared in the Jahrbuch der Musikbibliothek Peters for 1904. The sixth edition of Dr. Riemann's Musik-Lexikon has also been consulted, and much kind help has been given by various owners of private collections and by many friends and librarians, especially by Sir Dominic Colnaghi, Messrs. F. Corder, H. Davey, E. J. Dent, Frank Kidson, E. W. B. Neilon, and H. C. Miller, and Miss Stainer. Information has also been derived from W. H. Frere's Bibliotheca Musico-Liturgica (1901); W. H. J. Neal's Descriptive Catalogue of MSS. and Liturgical Books at the Music Loan Exhibition (London, 1885); Sancho's Critical and Bibliographical Notes on early Spanish Music (1887); the Catalogues and Guides to the Music Loan Exhibition (London, 1885); Victorian Era Exhibition (London, 1897); International Loan Exhibition (Crystal Palace, 1900); Company of Musicians' Loan Exhibition (London, 1904); and especially from the Catalogues of the Vienna Music Exhibition of 1892. To
these works, as well as to E. Vogel's Bibliothek der gedruckten, vollständigen Vocalmusik Italiens aus den Jahren 1600-1700 (Berlin, 1892), to Ettnier's Quellen-Lexikon, and the pages of the Monatshfte für Musik-Geschichte, the reader may be referred to supply the inevitable deficiencies and shortcomings of the following lists.

AUSTRO-HUNGARY

BARDELF. The church of St. Aegidius contains a small collection of printed vocal music of the late 16th and early 17th centuries.

CRACOW. a. The Musikverein possesses autograph and other manuscript compositions by Polish musicians.

b. The University Library. For the MSS. see W. Wislocki: Catalogus codicum manuscriptorum Bibliothecae Universitatis Jagellonicae Cracoviensis (1857-81). The early printed works are described in the same author's Inveniuntae Typographicae Bibliothecae Universitatis Jagellonicae Cracoviensis (1900), issued as vol. iii. of Monumenta Saccularis Universitatis Cracoviensis. Director: K. Estrach-Polczynski.

EISENSTADT. The Library of Prince Esterhazy's castle contains much MS. music of the 18th and 19th centuries, amongst which are autograph symphonies and quartets by Haydn; a series of masses (from c. 1770 to c. 1830), including works by Haydn, Vogler, etc., and many German and Italian operas.

GOTTINGEN. The Library of the Benedictine Abbey contains two MS. collections of songs by Mastersingers of the 16th century, and a MS. collection of organ music by Claudio Merulo.

Graz. The University Library possesses some printed theoretical works. Librarian: A. Schlossar.

INNSBRUCK. The University Library contains some rare early printed books on music, some treatises in a MS. of 1460, and a MS. with two-part compositions of the 14th century. Librarian: A. Hittmair.

KLOSTER NEUBURG. The monastery of Austin canons contains liturgical MSS. of the 13th and 15th centuries, and some printed music of the 16th century. Librarian: H. Pfeiffer.

KREMSMÜNSTER. The Benedictine Monastery contains a legendarium of the 11th century, with music in neums; printed theoretical works of the 16th-19th centuries; about 1000 masses, 300 symphonies, and several operas (mostly of the 18th century). See Huenem: Die Pflege der Musik im Stift Kremsmünster (Wels, 1877). Librarian: Prof. F. Sebastian Mayr.

b. The K. K. Lycealbibliothek contains a MS. gradual of the 14th century, and a small collection of printed music of the 16th and 17th centuries.

c. The K. K. Studienbibliothek contains some printed music of the early 17th century. Librarian: Dr. K. Schachinger.

OLMÜTZ. The K. K. Studienbibliothek contains a copy of Schmid's Tabulaturbuch (1607), some printed music of the early 17th century, and MS. graduals of the 13th and 14th centuries. Librarian: W. Müller.

PRAGUE. a. The Chapter Library possesses copies of masses by Layton (Prague, 1609, etc.), and a collection of sacred music of the late 16th and early 17th centuries. Catalogue by Dr. A. Pochala. (Prague, 1894.)

b. Prince George Lobkowitz is the owner of MS. graduals and antiphoners of the 15th and 16th centuries; some rare hymnals of the Moravian Brethren; a copy of N. Schmalt's lute-book (1613), and a collection of Viennese liettiri of the 17th century.

c. The Library of Count Nestitz-Rieneck contains copies of the Frottole intabulate da sonare organi. Libro Primo (Rome, 1517); the Canzoni Frottoli e Capolotti (Rome, 1531); and other printed works of the 16th and 17th centuries.

d. The Library of the Premonstratensian Monastery of Strakow contains a small collection of music, chiefly consisting of works of the late 16th and early 17th centuries. Librarian: Dr. I. T. Zahradnik.

e. The church of St. Thomas contains a copy of Uberti's Contrasto Musico (Rome, 1630).

f. The University Library contains MS. treatises of the 11th and 15th centuries; old Bohemian songs of the 14th and 15th centuries; two Easter mystery plays of the 15th and 16th centuries; printed theoretical works of the 16th and 17th centuries, and lute-books by Caroso, Negri, and Schmid (1607). Librarian: R. Kukula.

RAUDNITZ. The Library of the castle of Prince Moritz Lobkowitz contains a rite of vellum dating from about 1500.

RENN. The Library of the Cisterian Monastery contains some printed music of the early 17th century.

SAAZ. The Capuchin Monastery contains some sacred and secular music by Orlando de Lasso, Scandelli, Josquin d' Aix, etc.

SALZBURG. a. The Benedictine Abbey of St. Peter contains church music of the late 18th
and early 19th centuries, including compositions by Michael Haydn. Librarian: Fr. P. Lindner.

b. The Chapter Library possesses some MS. music of the early 16th century by Vittoria, Palestrina, etc., and some compositions by Michael Haydn.

St. Florian, near Enns. Monastery of Austin Canons. See Albin Carony, Die Handschriften der Stiftsbibliothek St. Florian. (Linz, 1871.) Librarian: Prof. F. Asenstorfer.

VIENNA. a. The Court Library received in 1826 and 1829 all the music not connected with church music in the archives of the Court chapel. In course of time it has acquired much scarce music (printed by Petrusci, etc.), and is also rich in autographs of different musicians, including a number of letters and MSS. by Beethoven; of special interest to English musicians is a volume of Bull’s organ music in tablature. The manuscripts have been catalogued by Dr. Joseph Mantani. His work appeared in two volumes (in 1897-99) as parts i. and x. of the Tabulae Codicum Manuscriptorum... in Bibliotheca Palatina Vindobonensi asservatorum. Ebdidit Academia Cesararia Vindobonensis. The Ambros and Kiesewetter collections, which form part of the Library, are not included in this catalogue, but are to form a supplementary volume. Director: Hofrat Josef Ritter von Karabacek.

b. Gesellschaft der Musikfreunde. [See article, ante, p. 162.]

c. The University Library possesses printed theoretical works of the 16th and 17th centuries, and lute-books by Jusekunig, Osenkhhun, Caroso, and Douss. Librarian: Reg.-Rat W. Haas.

d. The Library of the Landesarchiv contains some musical works printed at Vienna about 1600. Archivist: Dr. A. Mayer.

e. The Ministry for Religion and Education. Here are deposited the six precious volumes of MSS. formerly in the Chapter Library at Trent, from which two volumes of selections have been printed by Dr. Guido Adler and Dr. Oscar Koller in Jahrg. vii. and xi. of the Denkmäler der Tonkunst in Oesterreich. Director: Dr. W. Pötzl.

f. Benedictine Abbey of our Lady of the Scots. (Schottenkloster.) Valuable early liturgical MSS. and a small collection of MS. and printed works of the 16th century. See A. Hübli: Catalogus codicum manuscriptorum qui in bibliotheca Monasterii B.M.V. ad Scotos Vindobonae servabantur (1899), and (same author) Die Inkuenslein der Bibliothek des Stiftes Schotten in Wien (1901).

g. Monastery of the Minorites. The Library contains some MS. and printed organ music of the 17th and 18th centuries (including three works by Frescobaldi and G. B. Fasolo's Annali (Venice, 1848)) ; also some vocal music of the 17th century.

h. The Haydn-House (Mariahilferstrasse, 102) contains a small collection of printed and MS. documents relating to Joseph and Michael Haydn.

i. The private Library of Herr C. A. Artaria is rich in autographs of Beethoven. See Nottebohm-Adler: Verzeichniss der musikalischen Autographen von L. van Beethoven... im Besitze von A. Artaria (Vienna, 1880).

j. Herr Nicolaus Dunba has a valuable collection of autographs, which is especially rich in MSS. by Schubert.

k. Herr Max Kalbeck's collection comprises many musical autographs and printed works, chiefly of Viennese composers.

BELGIUM

BRUSSELS. a. Royal Library. In 1872 the Belgian Government was induced by Herr Gevaert, Director of the Brussels Conservatoire, to purchase the library of M. Fétis for 152,000 francs. This collection, which comprises 7595 works, together with the collection of C. J. E. van Hulthem, forms the bulk of the musical Library. The contents are very valuable, comprising about 4500 theoretical works, about 500 liturgies, over 100 Italian operas, about 170 French operas, and many rarities. The Van Hulthem collection is catalogued in vol. ii. of C. A. Voisin's Bibliotheca Hulthemiana (Ghent, 1836-37); the Fétis Library in the Catalogue de la Bibliothèque de F. J. Fétis [by L. J. Aloin] (Brussels, 1870). Conservateur-en-chef: H. Rymans.

b. Conservatoire Royal de Musique. Curator, M. A. Worquenne, who has published two volumes of an excellent catalogue (vol. i. 1898; vol. ii. 1902), besides an elaborate Supplement, Anzeige f. Libriettis d' Opéras et d' Oratorios Italiens du 17e Sècle (1901). This valuable Library has recently been enriched by the acquisition of the collection of Professor Wagener, of Marburg, which is especially rich in works printed in England in the 18th century.

GHENT. The Town and University Library contains liturgical MSS. of the 10th-12th
centuries, a copy of Monteverde’s ‘Lamento d’ Arianna’ (Venice, 1623), early theoretical works, and printed music from the presses of Phalèse and Gardano. See C. A. Voisin: Bibliotheca Gandavensis (Ghent, 1839); J. de Saint Genois: Catalogue méthodique . . . des Manuscrits de la Bibliothèque de la Ville et de l’Université de Gand (Ghent, 1849-52), and the Monatshefte für Musik-Geschichte for 1873, p. 62. Head Librarian: F. van der Haeghen.

**LIEGE.** a. Conservatoire Royal de Musique. See Catalogue de la Bibliothèque du Conservatoire Royal de Musique de Liège (1862).

**OUDENARDE.** The church of St. Walpurga possesses a collection of church music of the 18th century. See Liste générale de la Musique appartenant à l’Église Paroissiale de Ste, Walpurga à Audenarde (s.a.).

**TOURNAI.** The Chapter Library contains a three-part mass of the 13th century, which was published by Coussemaker in the Bulletin de la Société Historique de Tournai, and reprinted separately in 1861.

**Denmark**

**COPENHAGEN.** The Royal Library contains a collection of MS. organ music (in tablature) by German composers of the 17th century, Italian printed music of the late 16th and early 17th centuries, and some rare printed works from Copenhagen and Antwerp presses. Principal Librarian: H. O. Lange.

**France**

**AMIENS.** The Bibliothèque Communale contains a few early printed treatises, a number of French psalters of the 17th century, operas and song-books of the 18th century, and seventeen volumes of sacred music and five volumes of operas by Lesueur. For the printed music see Catalogue Méthodique de la Bibliothèque Communale de la Ville d’Amiens, Sciences et Arts (1859). Among the MSS. there are many interesting liturgics, etc., and a collection of sequences (with music), which belonged in 1572 to a monk named Guglielmus Lovel (described in the Ecclesiologist for October 1859). For the MSS. generally, see the catalogue by E. Coyecke in Catalogue générale des Manuscrits des Bibliothèques Publiques de France, tom. xix. (1893). Librarian: H. Michel.

**Bordeaux.** See J. Delas: Catalogue des Livres composant la Bibliothèque de la Ville de Bordeaux, Musique (Bordeaux, 1856), and tom. xxiii. of Cat. des MSS. des Bibl. Publ. de France (1894). Librarian: M. Céleste.

**CANNES.** Bibliothèque Municipale. See Carlez: Liste des Œuvres musicales et des Œuvres relatives à la Musique (Cannes, s.a.). Librarian: M. Lavalley.

**Cambrai.** The Public Library contains a precious collection of MS. church music by early Flemish and Burgundian musicians, besides songs for two, three, and four parts, dating from the 14th century. The collection was described in M. de Coussemaker’s Notice sur les Collections Musicales de la Bibliothèque de Cambrai et des autres Villes du Département du Nord (1843).

See also A. J. Le Glay: Catalogue . . . des Manuscrits de la Bibliothèque de Cambrai (Cambrai, 1831). Librarian: C. Capelle.

**DOUAL.** Bibliothèque Municipale. A 12th-century MS. with two-part music, a hymnarium of the 12th century, and some printed theoretical works of the 16th century. See Coussemaker’s work (quoted under Cambrai) and the Catalogue of the MSS. by the Abbé C. Debrasines in Cat. Gén. des MSS. des Bibl. Publ. des Départements, tom. vi. (1878). Librarian: M. Rivière.

**DUNKERQUE.** Bibliothèque de la Ville. Some music printed by Phalèse (16th century). See Coussemaker’s work (quoted under Cambrai).

**Foix.** Nine antiphoners and other liturgical works (formerly belonging to the Cathedral of Mirepoix), written between 1497 and 1535. See Cat. Gén. des MSS. des Bibl. Publ. de France, tom. xxxi. (1898).

LE HAVRE. In 1894 the Bibliothèque Musicale Publique contained about 4000 works, mostly dating from the latter part of the 18th century.

LILLE. See Catalogue des ouvrages sur la Musique et des Compositions musicales de la Bibliothèque de la Ville de Lille (Lille, 1879). The collection is rich in operas. See also Coussemaker’s work (quoted under Cambrai). Librarian: M. Desplanque.

b. Sainte Madeleine. A collection of liturgical MSS. from the 12th century downwards.

MONTPELLIER. Bibliothèque de la Faculté de Médecine. A precious antiphoner (noted in neums and letters) of the 9th century, and a 14th-century collection of French chansons for two and more voices. See Coussemaker: L’Art Harmonique, etc. (Paris, 1865), and Cat. Gén. des MSS. des Bibl. Publ. des Départements tom. i. (1849).

PARIS. a. Bibliothèque de l’Arsenal. The Library of the Arsenal contains very interesting MSS., such as the ‘Mazarinades’—songs sung under the Fronde, with their airs; collections of airs by Michael Lambert, and other little-known compositions of the 17th and 18th centuries, etc. See H. Martin: Catalogue des Manuscrits de la Bibliothèque de l’Arsenal (9 vols., Paris, 1885-94, issued as vols. iv.-xii. of Cat. des MSS. des Bibl. Publ. de France, Paris). There is a good index of the music in tom. vii. p. 457. Librarian: M. de Hérodia.

d. Bibliothèque Nationale. The Bibliothèque Nationale, in the Rue Richelieu, is very rich in French music, both printed and engraved. It is also more complete than any other in Paris in respect of musical literature, periodicals, almanacs, dictionaries, and similar works of reference. It is rich in valuable MSS. of Dom Caffaux, Parfait, Baini, Adrien de La Fage, and other distinguished writers, but the great value of the collection consists in its early MSS., in which it occupies the first position for the study of the origins of music in Europe. The Library contains MS. with musical notation from the 9th century downwards, and is especially rich in Troubadour songs of the 13th century, and French and Italian compositions of the 14th century, while later times are well represented in operas, oratorios, etc. The MSS. are catalogued in the various printed catalogues of J. Taschereau, H. Omont, and L. V. Delisle, and the printed music is included in the catalogue of the printed books now in course of publication. It is very much to be desired that separate catalogues should be printed of the musical works, or at least that indexes should be drawn up of the works containing musical notation described in the catalogues of the MSS.; at present the musical treasures of this great library are hardly known; the only special musical catalogue is the Catalogue d’œuvre Collection Musicales et d’ouvrages divers édités par M. O. Thierry-Poux (1896, pp. 59). Librarian: M. Marcel.

e. Bibliothèque Ste.-Geneviève. This library contains a large number of rare works on music, a fine collection of chansons and dramatic works, with the music, and many curious MSS., including a valuable MS. of the 11th century. See N. Poirié and G. Lamouroyx: Les Éléments d’une Grande Bibliothèque. Catalogue abrégé de la Bibliothèque Ste. Geneviève (Paris, 1892, etc.). Librarian: C. E. Ruelle.

f. Conservatoire des Arts et Métiers. The Library contains few musical works, but is rich in materials for the history of the music trade, such as patents, trade registers, etc. Director: M. Chandize.

g. Conservatoire National de Musique et de Déclamation. Some account of the Library has already been given (vol. i. pp. 592-593). To the rare works there mentioned may be added the autograph score of Mozart’s ‘Don Juan’ (presented by Mme. Viardot Garcia), a copy of the Harmonico Musices Odhecaton (printed by Petrucci in 1504), and the Liber Primus Missarum of Carpentras (Avignon, 1522). Of especial interest to English musicians are a large folio MS. containing compositions by Coprario, Lawes, Locke, Gibbons, Jenkins, Ferrabosco, and Ward; and an account-book of the Academy of Vocal Music (from Jan. 7, 1725 to 1726), formerly belonging to Owen Flintoff. The Library secured many fine and rare works at the dispersal of the Borghese collection in 1892. See J. B. Weckerlin: Bibliothèque du Conservatoire National de Musique. Catalogue . . . de la Reserve (Paris, 1885). Librarian: J. B. Weckerlin.

ROUEN. The Bibliothèque Municipale con-

Toulouse. **Bibliothèque de la Ville.** A sacramentarium of the 9th-10th centuries with neums; mystery plays of the 12th century; liturgies of the 15th-18th centuries; motets of the 17th century; organ music (including autographs by N. Le Bégue, 1678); a MS. of J. de Muris (15th century), and much else of interest. See A. J. Dornage: *Catalogue . . . des Manuscrits de la Bibliothèque de Tours* (1875); *Cat. Gén. des MSS., des Bibliothèques Publ. de France, Départements*, tom. xxxvii. (1900), and *Sammelbände* of the Int. Mus. Ges. for 1905 (p. 556, etc.). Librarian: M. Collon.

Troyes. **Bibliothèque de la Ville.** A copy of Praetorius's *Syntagma. . . lute-books; publications of Phalèse (Lovain, 1573, etc.); organ and violin music of the 18th century, etc. See E. Secard: *Catalogue de la Bibliothèque de la Ville de Troyes* (1875, etc.), tom. iii. pp. 281-300. Librarian: M. Dét.

Valenciennes. **Early MS. treatises, including 8th-century MSS. of Huchald, Isodore of Seville, etc.** See *Cat. Gén. des MSS., des Bibliothèques Publ. de France*, tom. xxv. (1894), and also Coussemaker's work (quoted under Cambrai). Librarian: M. Lecat.

Versailles. This library is rich in sacred music, dramatic works, and books on music, and contains also several interesting MSS. of the 17th century. See *Manuscrits Musicaux de la Bibliothèque de Versailles* (1881), and *Cat. Gén. des MSS., des Bibliothèques Publ. de France*, tom. ix. (1888). Librarian: A. Taphanel.

**Germany**

Augsburg. The Regierungsbibliothek contains a small collection of vocal printed music of the 16th century and MS. scores of Cavalli's *Pompeii,* and Ziani's *Annibale in Capua.*

Augsburg. The Church Library possesses six folio volumes of vocal music of the 16th century.

Augustsburg, Saxony. The Parish Church contains some music of the 16th and 17th centuries.

Aurich, East Friesland. The Royal Staats-Archiv contains a MS. collection (17th century) of songs. (See *Monatshefte* for 1874 and 1894.) Archivist: Dr. Wachter.

Bamberg. The Royal Public Library contains some liturgical MSS. with neums of the 11th-13th centuries, and printed music of the late 17th century. Librarian: J. Fischer.

Berlin. a. The Royal Library (founded in 1650; the musical division, of which Queen Charlotte's collection formed the nucleus, added in 1705) acquired in 1841 its most important addition, the Poehlau collection (autographs and copies of J. S. Bach, and the most important Italian writers on theory of the 17th and 18th centuries); in 1855 the Bach collection and autographs of the Singakademie; 2779 nos. from the Fulda Library of hymnology; and 103 MS. vols. from Winterfeld's collection; in 1859, 3378 nos. from the collection of Fischhof, of Vienna (Beethoviana, copies revised by Beethoven); in 1860, 216 printed and 8112 MS. sheets, and 142 autographs from the Landsberg collection (Beethoven's sketch-and-conversation-books, first examined by Thayer). The complete catalogue of the Landsberg collection is in the Royal Library of Brussels. All these works have been completed and admirably arranged by Dehn and his successor Franz Espagne. Dehn negotiated the purchase of the Poehlau and Landsberg collection; Espagne, that of Otto Jahn's Mozart collection, bought in 1869. Here may be seen the precious autographs of nearly all Mozart's great operas (with the exception of 'Don Juan'), and of several of Beethoven's symphonies and most important works; also a very large collection of autographs of J. S. Bach, and 42 vols. of autographs by Mendelssohn. In the Landsberg collection are scarce theoretical works by Italian and Spanish masters—such as 'El Melopeo' by Ceroni. The Library is rich in hymnals. Among the MSS. are a troparium of the 11th century, many autographs (especially of Bach, Haydn, Mozart, and Beethoven), and many modern MS. copies of old works. There are several books printed by Petrucci and many 16th-century works in organ tablature. No catalogue of the music has been published. Director: Professor A. Wilmanns.

b. The Royal Hochschule für Musik. This institution possesses the musical libraries of Ludwig Erk and of Professor Spitta, the former of which is rich in the literature of folk-songs and German choralis. The Hochschule Library also contains some rare printed music of the 17th and 18th centuries, and a number of printed scores of French 18th-century operas.

c. The Library of the Joachimsthal Gymnasium received in 1787 the music collected by Princess Amalia of Prussia, and in 1858,
190 vols. of musical works from the library of Dr. Spiker (see Meierotti's "Nachricht, etc. Berlin, 1788). Amongst the music are autographs and many early copies of the works of J. S. Bach. See R. Eitner: "Katalog der Musikalischen-Sammlung des J. A. Poschel'schen Gymnasium (Leipzig, 1884. Monatshefte, Beilage, 1884), and also "Bezüglich der Musikalischen-Sammlung des J. A. Poschel'schen Gymnasium [by J. A. Poschel]." (Leipzig, 1899. Monatshefte, Beilage, 1898-99).

d. The Library of the Grey Friars (zum Grauen Kloster) contains an important collection of works of the 16th and 17th centuries, in parts, carefully arranged so as to present a view of ancient vocal music. See H. Beller: "Verzeichniss der gröstenthell von S. Streit dem grauen Kloster geschenken Musikalien (in der Programm des Gymnasium for 1856).

f. The Kgl. Institut für Kirchenmusik. The Library contains a collection of 18th-century MSS.

Bonn. a. The University Library contains about 600 vols. of music, chiefly of the 19th century. Amongst the few early works is a copy of the 1517 edition of the "Mioeologus of Ornithoparcus." Director: J. Staender.

Brandenburg. The church of St. Catherine contains an important collection of part-books, and of vocal music of the 16th, 17th, and 18th centuries. See Tägliehe: "Die musikaliyen Schätze der St. Katharinen-Kirche zu Brandenburg a/H (in der Programm des Brandenburg Gymnasium, Easter, 1867).

Bremen. About seventy-four musical works belonging to the Stadtbibliothek are in the care of the Bremen Tonkünstler-Verein.

Breslau. a-c. See E. Bohn: "Bibliographie der Musik-Druckwerke bis 1700, welche in der [a.] Stadtbibliothek, [b.] der Bibliothek des akademischen Institutes für Kirchenmusik und [c.] der Kgl. u. Universitäts-Bibliothek zu Breslau aufbewahrt sind" (Berlin, 1883). Also E. Bohn: "Die musikalische Handschriften des 16. und 17. Jahrhunderts in der Stadtbibliothek zu Breslau" (Breslau, 1890). The Brief collection (see infra) is now in the Stadtbibliothek of Breslau. Librarian: (a) Dr. H. Markgraf, (b) and (c) W. Erman.

d. The Cathedral Library contains about 1000 musical works, of which 60 are in manuscript. The collection chiefly consists of church music of the 18th and 19th centuries.

e. The Domstifts-Bibliothek contains a small collection of MSS. Librarian: Dr. J. Jungnitz.

f. The church of St. Elisabeth contains about 4200 musical works, chiefly church music of the 18th and 19th centuries.

Brieg. The musical collection formerly in the Kgl. Gymnasium is now preserved in the Stadtbibliothek at Breslau. See F. Kuhn: "Beschreibendes Verzeichniss der alten Musikalien ... des Königlichen Gymnasiums, etc." (Leipzig, 1897. Monatshefte, Beilage, 1897)

cassel. a. The Ständische Landesbibliothek contains about 350 musical works, printed and MS. Amongst the former are copies of Morley and Weelkes' madrigals. Most of the works date between 1560 and 1620. See C. Israel: "Uebersichtlicher Katalog der Musikalien des ständischen Landesbibliothek zu Cassel" (Cassel, 1881). Director: Dr. E. L. W. Lohmeyer.

b. The Kgl. Hoftheater possesses the autograph scores of Spohr's 'Jessonda' and of Marschner's 'Templer und Judin' and 'Hans Heiling.'

Celle. The Kirchen- und Ministerialbibliothek contains some printed music of the 16th century (1539-64), mostly by Italian composers.

Charlottenburg. Kaiserin-Augusta-Gymnasium. See P. Meier: "Der Alter Notenschutz etc. (s. a.)."

Cologne. a. The Town Library possesses a MS. treatise (Musica Enchiriadis) of the 12th century, and a few printed part-books from Venetian and Antwerp presses of the 16th century. Director: Dr. A. Keysser.

b. The Jesuitenbibliothek has a small collection of printed 16th-century music, including copies of the 'Litium Musice Planes of 1506, and Wollick's 'Enchiridion (Paris, 1512).

Cranzn, near Liegnitz. The Library contains some printed music of the 17th century.

Danzig. a. The Town Library contains a valuable collection, principally of works of the second half of the 16th century. There is a MS. catalogue of the collection (by S. W. Dehn) in the Musical Department of the Royal Library at Berlin. Librarian: Dr. O. Günther.

b. The Allerheiligen-Bibliothek, in the Marienkirche, contains a small collection of sacred music, mostly printed works of the 17th century.

Darmstadt. Grand Ducal Library. See P. A. F. Walther: "Die Musikalien der Grossherzoglichen Hofbibliothek in Darmstadt (Darmstadt, 1874), and supplementary notices in the Monatshefte for 1888. Director: Dr. A. Schmidt.

Donauwörth. The Library of Prince Fürstenberg contains 13 MS. antiphoners (14th-15th century) and fragment of a MS. treatise on music of the 15th century. See C. A. Barack: "Die Handschriften der fürstlich-Fürstenbergischen Hofbibliothek zu Donauwörth" (Tübingen, 1865). Director: Dr. Tumbilt.

...
Beilage, Monatshefte, Japanuclien (now in collection of extensive musical MSS. and 17th century about late the Paul Hassel, autographs. in autographs of printed works, 1524). of and liturgies, (1671-1792), Tunder, D. musical books, compositions of eighty-five gical MSS. graphischc. The hcftc f. Praetorius. See G. kirche Dr. the of the Gymnasial-Bibliothek zu Erfurt. Die Erfurt. The Baron von Hanover. The University Library possesses a valuable collection of rare printed musical works, chiefly of the 16th century. They are described in the school Programme for 1885. GOTTINGEN. The University Library contains 145 musical works, mostly of the 15th and 16th centuries, many of which are of great rarity. See A. Quantz: Die Musikwerke der Kyl. Universitats-Bibliothek in Gottingen. Leipzig, 1884. Monatshefte f. M. Beilage, 1883.) Director: Professor R. Pietzschmann. GOTHA. The Ducal Library contains a small but interesting collection, comprising several rare early theoretical works of the 16th century, and about seventy hymnals of the 16th and 17th centuries. Principal Librarian: Dr. R. Ehwald. GRIMMA, SAXONY. The Landesschule has about 131 works of the 16th and 17th centuries. See N. M. Petersen: Verzeichnis der in der Bibliothek der Konigl. Landesschule zu Grimma vorhandenen Musikalien aus dem 16. und 17. Jahrhundert. (Grimma, 1862, reprinted from the Programme of the Landesschule for 1861.) GUSTROW, MECKLENBURG-SCHWERIN. The Domschule Library contains a small but valuable collection of rare early printed musical works, chiefly of the 16th century. EELANDEN. The University Institute for church music has a library of its own. Director: Prof. Oechsler. FRANKFURT A. M. a. The Gymnasium Library. See C. Israel: Die Musikalischen Schätze der Gymnasial-Bibliothek und der Peterskirche in Frankfurt a. M. (in the Programme of the Town Gymnasium for Easter, 1872); and also the articles by C. Valentin: Musikbibliographisches aus Frankfurt a. M. in the Monatshefte f. M. for 1901 and 1902. b. Herr Nicholas Manskopf owns a particularly rich musical collection, comprising some 10,000 objects. The autographs include works of F. Tunder, D. Buxtehude, G. P. Telemann, Weber, Spohr, Cornelius, Schumann, and Wagner; there is also a valuable collection of documents relating to Handel and his family, besides relics of Beethoven and an extensive collection of portraits.
of folk-songs, and also a collection of libretti (from 1686). Director: Dr. Schuchhardt.

HEILBRONN. Gymnasialbibliothek. See E. Mayser: 'Alter Musikschatz,' No. 2 of Mitteilungen aus der Bibliothek des Heilbronner Gymnasiums. (Heilbronn, 1883.)

HELMSTEIT. a. The Gymnasialbibliothek contains some theoretical and practical works, mostly by German musicians of the 16th and 17th centuries.

b. The church of St. Stephen possesses some German 17th-century music, chiefly by M. Praetorius, J. H. Schein, and A. Hammer.

JENA. The University Library contains many musical treasures, the chief of which is the 'Jenaer Handschrift' of 14th- and 15th-century songs (published in facsimile with an introduction by C. C. Müller: Jena, 1896; and in a critical edition by G. Holz, C. Saran, and E. Bernouilli: Leipzig, 1901). The Library also contains liturgical MSS., the printed collections of Lieder of Ott (1544), and Forster (1539-56), etc. See Nachricht von alten Musikalism auf der Jenischen Universitäts-Bibliothek (in Altp. Mus. Zeitung for 1828). Director: C. Brandis.

KAMENZ, SAXONY. Rathsbibliothek. The Catalogue is printed in the Serapeum (Leipzig) for 1858.

KÖNIGSBERG, PRUSSIA. The Royal and University Library contains the collection (about 25,000 vols.) made by Director Gotthold (died 1858); of importance for hymnology and vocal music of the 17th century. See J. Müller: Die musikalischen Schätze der Königlichen und Universitäts-Bibliothek zu Königsberg i. Pr., etc. (Bonn, 1870). Only Part I. of this work has appeared. Director: K. Boysen.

LEIPZIG. a. The Town Library possesses a valuable 10th-century MS. treatise by Regina of Prüm, and also a collection of theoretical works and instrumental music of the 17th century, collected by C. F. Becker, the well-known writer. [See vol. i. p. 214.] Principal Librarian: Dr. G. Wustmann.

b. The University Library possesses a small collection of theoretical works and a number of libretti (from 1662 to about 1836), mostly of performances at Dresden and Hanover. Director: Professor O. L. von Gebhardt.

c. The Musikbibliothek Peters. This admirable institution, founded by the firm of C. F. Peters, was opened on Jan. 2, 1894, in which year a Catalogue (by the first librarian, Dr. Emil Vogel) was published. Accessions have been noted in the interesting Jahrbiicher issued from the Library. The collection is particularly complete in modern practical and theoretical works, musical journals, etc., and is kept up to date by the liberality of the founders. There are also a number of works of antiquarian interest, and some valuable portraits and prints. Librarian: Dr. Rudolf Schwartz.

LÜBECK. a. The Stadtbibliothek contains valuable early German and Italian printed music. See C. Stielh: Katalog der Musik-Sammlung auf der Stadtbibliothek zu Lübeck (Lüb. 1893), and Monatshefte f. M. for 1884. Librarian: Dr. K. Curtius.

LÜNEBURG. The Town Library contains a miscellaneous collection of music, chiefly dating from the 17th to the 19th centuries. There is some important organ music, and also a copy of Book I. of the Paragon des Chansons, printed by J. Moderne. See Monatshefte f. M. 1873. Librarian: Professor W. Gorges.

MAHINGEN, NEAR NÖRDLINGEN. The Library of Prince Ottingen-Wallerstein contains much MS. music: 390 synphonies, 214 cantatas and oratorios, 114 masses, and 111 works for stringed instruments—chiefly by composers of the late 18th century. There are also 120 works on theory. Among the rarer printed books are copies of Genet's Liber Primus Missarum (Avignon, 1532); Morales's Missarum Libri Duo (J. Moderne, Lyons, 1546), and Magnificat (same printer and place, 1550); and the works in tabulature of Paix (1583) and Schmid (1607). Librarian: Dr. G. Grupp.

MAINZ. The Town Library contains some theoretical works of the 16th-17th centuries, and some part-books of the 16th and 17th centuries. See Monatshefte f. M. for 1889. Principal Librarian: Dr. W. Velke.

MÜNSTER, WESTPHALIA. The Library of the Abbate Santini (of Rome) was bought about 1856 by the See of Münster for a Collegium Gregorianum, which has never been founded. It consists chiefly of MSS. and printed music of the 16th to the 18th centuries, and is at present lodged in very inadequate quarters in the Episcopal Museum of Christian Antiquities. It has recently been roughly put
in order by Mr. E. J. Dent, of Cambridge. Admission by leave of the Domechofdirektor. See Stassoff: L'Abbe Santini et sa Collection Musicale (Florence, 1854), and Catalogo della Musica esistente presso F. Santini in Roma (Rome, 1820).

MUNICH. a. Royal Hof- und Staatsbibliothek. The musical collections rank with those of the Imperial Library at Vienna and the Royal Library at Berlin as the most important on the Continent. The printed books are rich in works from the early press of Italy and Germany. See J. J. Maier: Die musikalischen Handschriften der Kgl. Hof- und Staatsbibliothek in München, I. Theil. Die Handschriften bis zum Ende des 17ten Jahrhundert (Munich, 1879). Director: Dr. G. von Laubmann.

b. The autographs of Wagner's 'Liebesverbot,' 'Die Feen,' 'Rienzi,' 'Huldigungsmarsch,' 'Meistersinger,' 'Walschka,' and several sketches for the 'Fliegende Holländer,' 'Siegfried,' and 'Götterdämmerung,' are the private property of the Bavarian Crown.

c. The Pranen-Kirche contains some printed 17th-century music and a collection of MS. choir-books (dating from c. 1600), containing masses, etc., by Orlando and Rudolfo di Lasso, J. Reiner, G. Croce, J. C. Kerl, Fraetorins, etc.

d. The University Library has some printed music of the early 17th century and a MS. collection of compositions by Obrecht, Josquin, Senfl, etc., in the autograph of Clareanus, written at Basel in 1527. Principal Librarian: H. Schnorr von Carolsfeld.

NEISSE, SILESIA. The Kreuzheiliges Stift has a few printed works of the 16th century and also MS. liturgical works.

NUREMBERG. a. The Germanic Museum contains important liturgies, including masses and antiphons of the 12th and 13th centuries, and rare hymnals of the 16th century. There are also examples of the chief Nuremberg printing-presses, and valuable lute-books in tablature. Director: G. von Bezold.

b. The Stadtbibliothek possesses some musical works printed at Nuremberg in the 17th century, theoretical works, and a collection of theatre Programmes between 1779 and 1788. Librarian: Dr. E. Munnenhoff.

c. The collection of musical works formerly in the Stadtkirche is now at Dresden. It consists of eight 16th-century MSS. and sixty-three printed musical works of the 16th and 17th centuries. See O. Kade: Die Musikalien der Stadtkirche in Pirna (in the Scrapeam, Leipzig, 1857).

QUEDLINBURG. See T. Eckardius: Codices Manuscripti Quedlinburgenses (Quedlinburg, 1723).

c. Library of Prince Thurn and Taxis. This library contains about 53,000 volumes and 300 MSS. The printed music dates chiefly from the late 16th and early 17th centuries; among the MSS. are four volumes in organ tablature, and compositions by G. Aichinger (about 1610). Librarian: Dr. J. Rulams.

d. The musical library of Dr. F. X. Haberi, Director of the School for Church Music, is rich in theoretical works (16th-19th centuries), and also contains about 600 printed works of the 16th and 17th centuries, some of which came from the German College in Rome. Among the many valuable MSS. are autographs of Padre Martini and ten choir-books from the Hospital of S. Spirito at Rome, containing music by Paolo Papini. 18th-century church music is also well represented.

ROSTOCK. The University Library contains a small collection of musical works printed at Lyons and Venice in the 16th century; also operas, oratorios, etc., of the 17th and 18th centuries. Principal Librarian: Dr. Kern.

SCHWARZENBERG, SAXONY. The Church Library contains some German vocal music of the 17th century.

SCHWERIN. Grand Ducal Regierungbibliothek. See O. Kade: Die Musikalien-Sammlung des Großherzogtums Mecklenburg-Schwerin. Fürstenhaus aus den letzten zwei Jahrhunderten (2 vols., Schwerin, 1893); and (same author) Der Musikalische Nachlaß welcher ihrer Königlichen Hoheit der verwitweten Frau Erbprinzessin Augusta von Mecklenburg-Schwerin, etc. (Schwerin, 1899). Director: Dr. Schröder.

SÖNDRHEIMEN. The Schlosskirche Library contains much MS. music, chiefly sacred cantatas of the first half of the 18th century.

STOLBERG, SAXONY. Library of Prince Stolberg. See Monatshefte f. M. 1871 and 1876.

STRAUBING. a. The Universitäts- und Landes-Bibliothek possesses a small collection of early printed musical works, the rarest of which are the Harmonie of Tritonomus (Augsburg, 1607) and the Novus partus sive concertationes musicae of Besardus (Augsburg, 1617). Director: Dr. J. Euting.

c. Library of the Priester-Seminar. A list of the music (by J. Victor) was published in No. 10 of the Kirchliche Rundschau for 1901, and reprinted as a Beilage of the Monatshefte f. M. for 1902.

THORN, PRUSSIA. Gymnasialbibliothek. See Schulprogramm für 1871 (Thorn).

TORGAU, SAXONY. The Library of the Cantorei (founded in 1864) contains church music of the 18th and 19th centuries.

ULM. The Stadtbibliothek has about 142 volumes of printed music, chiefly works dating from the end of the 16th and early 17th century. Librarian: Professor C. F. Müller.

WEIMAR. a. The Grand Duke’s Library contains the music collected by the Duchess Amalia during her visit with Goethe to Italy, including interesting operas of the Neapolitan school. Also the score of Haydn’s opera ‘La vera Costanza,’ the autograph of the finale of Act II of Gluck’s ‘Orfeo,’ and a valuable 14th-century MS. of Meistersingers’ compositions. Principal Librarian: Geh. Hofrat P. von Bojowski.

b. The Liszt Museum contains a collection of Liszt’s autographs.

WERNIGERODE. In 1904 the Library of Count Stolberg contained 113,785 volumes, of which the hymnological collection comprised 5521 volumes. The chief treasure of the Library is the Locheimer Liederbuch (15th cent. MS.), as to which see Chrysander’s Jahrbiicher (Bd. II. Leipzig, 1867) and the Monatshefte f. M. for 1872. See also E. W. Förstemann: Die Graflchen Stolbergischen Bibliothek zu Wernigerode (Nordhausen, 1866). Librarian: Dr. Ed. Jacobs.

WÜRSBURG. a. The University Library contains liturgical MSS. of the 12th-14th centuries, besides theoretical works (from 1497), and some early operas of the 17th century. Principal Librarian: D. Kerler.

b. The Royal Music School contains MSS. and printed music of the 15th and 16th centuries.

c. The Episcopal Seminary possesses a small collection of printed sacred music of the late 17th and early 18th centuries.

ZITTAU. The Stadtbibliothek has seven masses, dating from 1435, decorated with illuminations of great beauty; ten volumes of MS. sacred music of the 17th century; some editions of Moravian hymnals, and many printed works of A. Hammerschmidt.

Zwickau. The Ratschulbibliothek is rich in early printed music, particularly in psalters and collections of hymns. There are also a few MSS. In 1904 the Library contained 20,000 vols. and 200 MSS. See R. Vollhardt: Bibliographie der Musik-Werke in der Ratschulbibliothek. (Leipzig, 1896. Monatshefte f. M. Beilage, 1893-96.) Librarian: Dr. Stötzer.

Great Britain and Ireland

ABERDEEN. The University Library contains about 2500 musical works, mostly acquired by the copyright privileges possessed by the University in the early part of the 19th century. Librarian: P. J. Anderson.

BRISTOL. The Baptist College contains the Lea Wilson collection of Bibles, included in which are 258 editions of the Psalms, many of the earlier of which are of great rarity. See Lea Wilson: Bibles, Testaments, Psalms, and other Books of the Holy Scripture in English. In the collection of Lea Wilson, Esq. (London, privately printed, 1845).

BRITWELL, BUCKS. Mrs. Christie Miller’s Library contains many rare printed musical works, mostly remarkable for the fine condition in which they are. There are many complete sets and odd parts of English and Italian madrigals; a copy of the 1654 edition of Playford’s Introduction, complete sets of Whythorne’s Songs (1571) and of Walter Porter’s Madrigalls and Ayres (1632), and several rare psalters. Some of the Italian madrigals are unknown to Vogel. A complete catalogue by Mr. E. Graves is in preparation, and will be printed privately.

CAMBRIDGE. a. Caius College. The Library contains a large MS. volume, dating from the early 16th century, containing masses and motets for five and six voices, by Fayrfax, Ludford, Cornysh, Turgis, Prentes, and Pasche. The volume seems to have belonged to Edward Higgyns, Canon of Lincoln and Prebendary of Carleton cum Thirlby, Sept. 3; 27 Hen. VIII. (See Valor Ecclesiasticus, temp. Hen. VIII., 1821, p. 19.) Librarian: Dr. J. S. Reid.

c. Magdalene College. The Pepysian Library contains a few early works on music by Butler, Holder, Morelli, Victorini, Wallis, and Alstedius; valuable MS. collections of vocal
music of the time of Edward IV., Henry VII., and Henry VIII. (comprising compositions by J. Gwynneth, R. Davis, W. Corenbruge, G. Banaster, J. Tudor, Sir William HAW, Neset, Fowler, and Garnesey); English, French, Scotch and Latin psalters; compositions by Blone, de Bacilvy, Kircher, Mersenne, Morley, Salmon, Deering, Merbeck, Coperraro, Lawes, King, Purcell, and Finger; ballads, songs, and other compositions adjusted to the compass of Mr. Pepys' voice, and solos, duets, and trios for stringed and wind instruments. Librarian: A. S. Ramsey.

d. St. Peter's College. In the College Library is a valuable collection of MS. anthems, services, masses, motets, etc., both Latin and English, in separate part-books. The anthems and services are by composers of the early 17th century, and were probably collected when Dr. Cosin was Master of Peterhouse (1634-60). They are in various handwritings, and contain some autograph compositions by Cambridge organists of the period. The masses and motets (in four part-books) date from the early part of the 16th century, and contain many rare and valuable compositions of the time of Henry VII. and Henry VIII., including four masses by Fayrfax, a Stabat Mater by Hunt, three masses by Ludford, and eleven compositions by Taverner. The collection contains works by upwards of eighty different musicians, as well as many anonymous compositions. There is a catalogue by the Rev. Dr. Jebb, which was printed in vol. xx. of The Eclesiologist (1859). See also an account of the collection (by R. C. Hope) in The Antiquarian Magazine and Bibliographer (vol. iii. 1883). Librarian: J. H. Grace.

e. Trinity College. The Library contains a small collection of musical works and treatises, including copies of the Psalterium Carolinum of J. Wilson (1652); Locke's Present Practice of Music Vindicated (1673); Carr's Vinculnis Societatis (1687); four volumes of Zarlinos' works (1589), and early editions of the works of Byrd, Watson, Morley, Playford, Bannister, Wilson, Gamble, Lawes, Mace, etc. Among the MSS. the most valuable is a 15th-century roll of English carols, which has been published by J. A. Fuller Maitland and W. S. Rockstro (London, 1891). A collection of lute music (in tablature) by R. Taylor, R. Johnson, J. Daniel, and T. Greaves, is also of interest. Librarian: Rev. R. Sinkar.

f. The University Library, besides a considerable and somewhat miscellaneous collection of printed music (chiefly of the 19th century), contains a few musical MSS., consisting principally of collections of well-known airs, dances, and lessons for the lute, bass viol and recorder, arranged and composed by Bachelor, Dowland, Holborne, Byrd, Tallis, R. and J. Johnson, Alison, Cutting, Pilkington, Reade, Nicholson, Robinson, and other composers of the early part of the 17th century. They are written in tablature, and date principally from 1600 to 1640. Besides these there is the tenor part of a 16th-century collection of masses and motets by Fayrfax, Prowett, Davy, Austen, Taverner, Lovell, Pasche, and Ashwell. The Bass part of this collection is in the library of St. John's College, Cambridge. Amongst the masses in this volume may be mentioned a 'Missa Regalis' and a mass, 'God save King Harry.' There is also preserved here a 15th-century mass in two parts, unfortunately wanting one page, and the superius and tenor parts of an anonymous mass of the time of Queen Mary. MS. installation odes by Boyce and Walmisley are also in the library, and a collection of exercises for the University musical degrees is being gradually accumulated. Librarian: F. J. H. Jenkinson.

canterbury. The Cathedral Library contains a number of volumes of music and works on music, including an incomplete copy of the contra tenor cantories of Barnard's Church Music (1641). Librarian: Dr. E. Moore.

chatsworth, derbyshire. The Library of the Duke of Devonshire, though not very rich in music, contains a few works of interest. The chief rarities are a volume of Altus parts of works printed by Petrucci, comprising the masses of P. de la Rus (Venice, 1593), A. Agricola (Venice, 1594), A. de Fevin (Fossombrone, 1515), J. Mouton's Book I. (Fossombrone, 1515), and Joaquin's Book I. (Fossombrone, 1516); there are also a few theoretical works; copies of 'The Maske of Flowers' (1613) and Coperario's 'Funeral Teares' (1608); Campion and Coperario's 'Songs of Mourning' (1613), and a number of single part-books of English and Italian madrigals, among which are a basso part of E. Bonnizoni's Primo Libro delle Canzoni a quatro voci (Venice, 1569), and a Canto part of the Lieti Amanti of 1586. Librarian: Mrs. Strong.

chester. The Cathedral Library contains a good collection of modern church music.

dublin. a. Royal Irish Academy of Music. This Society possesses a good library of scores and orchestral parts of the works of the great composers. It also includes the Library of the long defunct 'Antient Concerts.'

b. The Library of Christ Church Cathedral contains valuable MS. copies of anthems and services by Purcell, Child, Battishill, and others, which are said to differ greatly from those printed in England during the last seventy years. Of especial interest is a volume of 144 pp. containing a copy of an anthem by Handel, 'Blessed is he that considereth the poor,' for chorus, solos, and orchestra, a different setting from that written for the Foundling Hospital, and not printed in Chysander's edition of Handel's works.

c. Trinity College. Besides a miscellaneous
collection of modern music received under the
Copyright Act, the Library contains a few litur-
gical MSS. and some 16th-18th century music,
among which is Thomas Dallis's Lute Book
(1583). See T. K. Abbott, Catalogue of the
MSS. in the Library of Trinity College, Dublin

D. Archbishop Marsh's Library. This library
contains a good deal of printed and MS. music,
chiefly of the late 16th and 17th centuries.
The part-books include a complete set of Adason's
'Courtly Masquing Ayres' (1621); the C. T. B.
and Quinto of Prima Stella de Madrigali, . . . di O.
Lasso, di G. Nasco, di Zanetto, di Palestina, etc.
(Venice, 1570); nine part-books of 'Gratulationes
Marianae' (Antwerp, Phalese, 1636); twelve
part-books of the Masses of G. Messaus (Antwerp,
1633); eight part-books of the 'Primitiae
Marianae' of J. Willems (Antwerp, 1639); five
part-books of Viadana's First Book of Masses
(Antwerp, 1626); and many other part-books,
chiefly by English and Italian composers. The
MSS. consist largely of instrumental fantasias,
lute pieces, etc., by B. Rogers, R. Deering,
S. Ives, T. Giles, G. Jeffreyes, J. Copercario,
T. Lupo, W. Cranford, Tomkines, R. Mico,
Jenkins, Brewer, J. Ward, Lawes, A. Ferabosco,
O. and R. Gibbons, C. Coleman, R. Nicolson,
and other English and Italian composers of the
17th century. Librarian: Rev. N. J. D. White.

E. The National Library. The most important
musical works in this library are contained in
the collection (upwards of 23,500 volumes)
formed by Dr. Jasper Joly, and presented by
him to the Library. The musical portion of
this collection consists principally of 18th-
century works, comprising Irish and Scottish
song-books with a number of collections of
country dances, some of great rarity. Librarian:
T. W. Lyster.

DULWICH. Dr. W. H. Cummings has a
large and valuable library of ancient and modern
music, comprising some 6000 volumes. Amongst
the most interesting MSS. are a 16th-century
organ book by Adam Heborg; a 14th-century
treatise by John de Muris; autographs of
Purcell, Handel, Beethoven, Weber, Mendels-
sohn, Bennett, and many other composers of
note. In printed works this collection contains
fine copies of various editions of the treatises
of Galorius; all the editions of Morley's Plaine
and Easie Introduction; a perfect set of the
Salmon and Lock controversy; early editions
of madrigals and of Marot and Beza's Psaluts;
Wilson's 'Ayres'; Lawes' 'Ayres and Psalms';
a perfect copy of the three parts of Purcell's
'Don Quixote'; Muffat's 'Componimenti'(1727);
copies of Bach's 'Clavier Ubung' and 'Kunst
der Fuge' (1752); Goudimel's Psalms (1566);
and many rare works by Purcell, in which this
library is especially rich. Dr. Cummings also
possesses many interesting portraits, and a
collection of Handel relics, including the composer's
watch, one of his lace ruffles, the original
caricature of him by Goupy, a duplicate of his
autograph will, and his portrait by Kyte.

DUNDEE. The Free Library contains a
valuable collection of works relating to Scottish
music, formed by the late Mr. A. J. Wightou
(1802-66), and by him bequeathed to the
Library. The number of volumes is 421. The
collection contains many very rare books, besides
most of the musical works printed in Scotland
down to the early 19th century, as well as
several scarce English and Irish musical books.
A printed catalogue is in preparation. Chief
Librarian: J. Maclauchlan.

DURHAM. The Cathedral Library contains
a few books of glees and catches of the early
18th century, and an interesting collection of
old MS. part-books, containing anthems and
services formerly used in the cathedral. These
MSS. have been carefully collated and indexed
by the present organist, Professor Armes. They
consist of four sets of books, all unfortunately
imperfect. The old set contains about forty
full and fifty verse anthems by Tallis, White,
Parsons, Hooper, Morley, Weelkes, Byrd, Batten,
Giles, Tomkines, East, Gibbons, etc. The second
set is rich in anthems and services for men's
voices only. The third consists of eight out of
ten magnificent folio volumes containing Psecus
and Psalms for special days by Byrd, Gibbons,
William and Edward Smith; and services by
Shepherd, Parsons, Batten, and others. The
fourth set consists of organ parts of practically
all the anthems and services used in the
cathedral from Tallis to Purcell.

EDINBURGH. a. The University Music Class
Library has been formed by bequests and dona-
tions from the Reid Fund, from General Reid,
Professor John Thomson, and M. T. Bucher, and
others. It has been largely added to by the
present Professor of Music (F. Niecks) and his
predecessors (Donaldson and Sir H. S. Oakeley).
It is well supplied with modern full scores and
standard editions, besides works on theory, and
also contains some valuable old printed music,
such as the Musica Getutscht(1511) of Virdung;
Practorius's Symantiga; Morley's Introduction
(1597); Heyden's Ars Canzuti (1537); Cerone's
Melopeo (1613); the five volumes of Lasso's
Patrocinium Musices (1573-78), etc. Among
the MSS. are a collection of oratorios by Hasse,
and a Kyrie and Gloria in forty-eight real parts
by G. Balandc. There is also a fine collection
of musical instruments and acoustical apparatus.

b. The Advocates' Library, in common with
the British Museum, Bodleian, Cambridge, and
Dublin Libraries, receives, under the Copyright
Act, copies of all music entered at Stationers' 
Hall. The Library contains some works of
special interest to the students of Scottish music,
but its chief musical treasure is the Skene MS.,
which is separately noticed. (See Dauney,
c. Library of the Society of Writers to the Signet. The Catalogue, with two Supplements, appeared in three parts, 1871-91. The last volume contains a subject-index, in which music occupies a column and a half, chiefly consisting of theoretical and historical works, with a small collection of Scottish airs, etc. Principal Librarian: J. P. Edmond.

d. A very interesting collection of works illustrating the national music of Scotland was formed, during many years of collecting, by the late Mr. John Glen, who is noticed separately (see ante, p. 179). The collection contains, with the exception of a very few of the rarest works, everything relating to Scottish music that has been printed down to the early 19th century, besides a few MSS. and some collections of English Country Dances and rare English and Irish books. For a detailed list of a great portion of the Library see J. Glen's Early Scottish Melodies (1900). The collection at present (Nov. 1905) belongs to Mr. Glen's three sons, but it is hoped that it will be acquired by some Edinburgh Library.

Glasgow. (a) The Euing Library. This Library, containing over 5000 volumes, was collected by the late W. Euing, Esq., of Glasgow, in 1866 he founded a musical lectureship in Anderson's University, Glasgow, now merged in the Glasgow and West of Scotland Technical College. He bequeathed the whole of his musical library to the University for the use of the lecturer and students. It is a large and valuable collection, particularly rich in treatises and histories of music. The anonymous catalogue, which was prepared and printed in accordance with Mr. Euing's will, is unfortunately altogether inadequate, and displays the grossest ignorance. It fills 268 pages, 140 of which are occupied with the list of treatises, essays, etc., which form the nucleus of the collection. New buildings for the Technical College are at present (1905) being erected, which when finished will be the largest of their kind in the United Kingdom. The Euing Library will then be more accessible, and it is hoped that a new catalogue will be printed. Amongst the ancient music in this collection the following works may be mentioned: early editions of Byrd's Psalms, etc.; the Corale Constantini (1550-57); Faber's Melodiez Prudentianae (1553); 3 volumes of Frescobaldi's works; Nicolas de la Grotte's Chansons (1575); 47 volumes of Praetorius' works (1607-1618); 9 volumes of G. de Wert's works (1583-1589); and a valuable and extensive collection of English psalters and hymn-books, including the 'Gesangbuch' of the Picard Brethren (1538), referred to in Burney's History, iii. 31. See Catalogue of the Musical Library of the late Wm. Euing (Glasgow, 1878). Librarian: P. Bennett.

(b) The Stillie Musical Library in Glasgow University was collected and bequeathed to the University by Mr. Thomas L. Stillie, a well-known musical critic, who died at Glasgow in 1883. It contains 760 volumes, including many full scores and modern operatic works.

GLOUCESTER. The Cathedral Library possesses several old choir-books containing unpublished anthems by Rogers, Tye, Wise, Blackwell, Turner, Pickhaver, Henstridge, Davies, Jefferies, Portman, Parsons, etc., unfortunately wanting several of the parts; a complete full service in F, and two anthems in MS. by Fortunato Santini; a full MS. score of Boyce's anthem 'Blessed is he that considereth'; a few leaves of illuminated MS. music, and some printed and MS. church music of the 17th century.

GREAT BOOKHAM, SURREY. Mr. Adolph Schlosser's Library contains some interesting old printed music; but its chief feature is the large collection of musical autographs, which were mostly given either to Mr. Schlosser personally or to his father, the late Hofkapellmeister Louis Schlosser, of Darmstadt. Among the most valuable are examples of Aubert, Beethoven, Berlioz, Cherubini, Chopin, Franz, Gounod, Liszt, Moscheles, Mozart, Meyerbeer, Rubinstein, Raff, Sullivan, Robert and Clara Schumann, and Wagner.

GREAT WARLEY, ESSEX. Miss Willmott has an interesting musical Library containing many rare MSS. and printed works. Among the former are two sets of part-books of Italian church music of the early 17th century—one formerly in the Attempt Library—containing many compositions by Palestina and his school; finely bound volumes of French 18th-century chansons; cantatas by Scarlatti; an autograph of J. S. Bach and a collection of autographs—chiefly of the 19th century. The printed books comprise several complete sets and odd part-books of English madrigalists of the late 16th and early 17th centuries. Miss Willmott also owns many interesting musical instruments, among which are three clavichords, two harpsichords, two spinets, etc.

HEREFORD. The principal musical treasure of the Cathedral Library is the set of 10 volumes of Baruard's Church Music (1641). Eight of the volumes are nearly perfect, the remaining two are in MS., and were compiled with much care by Mr. John Bishop, of Cheltenham. There are also a few old organ books and other...
volumes for the use of the choir, and a copy of Kircher's *Musurgia* (1650).

**Hungerford, Berkshire.** The Library of the late Mr. H. Huth (present owner Mr. A. H. Huth) contains rare liturgies and psalters, a few MS. madrigals, treatises, and a small collection of printed madrigals by English and Italian composers of the 16th and 17th centuries, many of which are very rare. The Italian madrigals are included in E. Vogel's *Bibliography*, and all the musical works are catalogued in the admirable *Catalogue of the printed Books, Manuscripts, Autograph Letters, and Engravings, collected by Henry Huth, etc.* (5 vols., privately printed, London, 1880).

**Leeds.** Central Public Free Library. A fairly extensive collection of scores was bought some twenty years ago, and the Committee has recently decided to extend the musical portion of the Library. For this purpose a large quantity of theoretical and historical books has been acquired, and considerable purchases were made at the sale of the Taphouse collection (July 1905), so that the Library is now one of the most useful in Yorkshire for musical students. A printed catalogue of the music was issued in 1902, but since then much has been added to the collection. Librarian: T. W. Hand.

**Lichfield.** There are 189 volumes of printed and MS. music belonging to the Cathedral. The MSS. include a volume of Croft's anthems and Te Deum (in D) with orchestral accompaniments; two volumes of Blow's anthems; two volumes of anthems by Purcell, Blow, etc.; and a large collection of part-books. The chief treasure of the printed works is seven parts (three counter-tenors, two tenors, and two basses) of Barnard's *Church Music* (1641).

**Lincoln.** The Cathedral Library contains a considerable collection of madrigals and motets, dating from 1549 to 1620, mostly in complete sets of part-books. The secular Italian music is included in Vogel's *Bibliography*; the sacred music comprises R. Dering's 'Cantica Sacra' (Antwerp, 1618 and 1634); V. Raimundi, 'Third Book of Masses' (Venice, 1594); G. Croce's 'Musica Sacra' (London, 1608); Marenzio's 'Cantiones Sacrae' (Antwerp, 1603); Tallis and Byrd's 'Cantiones' (London, 1575); F. Lindner's 'Sacrae Cantiones' (Nuremberg, 1585 and 1588); Peter Philips's 'Cantiones Sacrae' (Antwerp, 1612); O. Vecchi's 'Pentential Psalms' (Milan, 1601); W. Damon's 'Psalms' (London, 1591); and R. del Mei's 'Sacrae Cantiones' (Antwerp, 1588). There are also anthems (dating from 1665 to 1800) by former organists and lay vicars of the cathedral, including compositions by Hecht (organist 1663-1693); Allanson (1693-1704); Holmes (1704-1721); Heardsor, Cutts, Blundeville, etc. Librarian: Rev. A. R. Maddison.

**Liverpool.** The Public Library contains a good general selection of musical works, including a number of 18th-century song-books. The music is incorporated in the general catalogue. Chief Librarian: P. Cowell.

**London.** a. British Museum. The musical portion of the library of the British Museum belongs partly to the department of Printed Books, and partly to that of MSS. The foundation of both collections consists in the musical works in the old Royal Library, which was presented by George II., and to this were added a number of treatises presented in 1778 by Sir John Hawkins; the musical library of Dr. Burney, which was bequeathed by its owner to the Museum, and transferred to Bloomsbury on his death in 1814, and the collection of Dragoletti, consisting of 182 volumes of scores of classical operas which became the property of the Museum by bequest on his death in 1846. In 1863 a notable purchase was made of duplicates from the Berlin Library, consisting mainly of old German and Italian madrigals, and church music, valued at about £1000. The collection was increased in 1886 by the acquisition from M. Kockx of Antwerp, of a large number of works printed by the Phaleines at Louvain and Antwerp. Many of these volumes were exhibited at the Brussels Exhibition of 1880, and described in section D of the catalogue. At the dispersal of the Borghese Library in 1892, the British Museum, the Paris Conservatoire, and the Academy of St. Cecilia at Rome were the three principal purchasers; a list of the works acquired for the Museum will be found in the *Jahrbuch* of the Peters Library for 1896. At the second sale of the Heredia collection in 1892, the British Museum acquired several very rare Spanish treatises and musical works. Besides these important acquisitions, old music has been steadily bought by the Trustees since the middle of the 19th century, and many valuable works have been received by presentation or bequest, so that from an antiquarian point of view the collection is now fully worthy the national position of the institution. A catalogue of Recent Acquisitions of Old Music (printed before the year 1800) was issued in 1899. It contains approximately about 4000 works, and represents the purchases or donations of printed music of this description made since the year 1886. But the great bulk of the collection consists of music deposited at the museum in accordance with the provisions of the Copyright Act. The disposal of this enormous mass of printed matter is a constant source of difficulty, since nothing is destroyed, and even the most unimportant composition may have to be produced as evidence in the Law Courts. The greater part of the copyright music is catalogued, bound, and placed on the shelves; but of late years the immense influx of music from America has necessitated a modification of the old system, and at present band parts and less important American, Colonial,
and foreign publications are only indexed in slips, so that they can easily be produced if required. Until 1884 the catalogue of the printed music remained in manuscript. In 1868 it filled twenty-two volumes; at present it occupies 314 volumes, partly manuscript and partly printed. Since 1884 all the acquisitions have been printed and issued in separate volumes, the titles in which are afterwards incorporated in the old MS. catalogue. The printed volumes of acquisitions of modern music issued up to date are as follows: 1884 (452 pp.), 1886 (154 pp.), 1888 (712 pp.), 1889 (197 pp.), 1891 (948 pp.), 1894 (610 pp.), 1895 (292 pp.), 1896 (287 pp.), 1897 (539 pp.), 1898 (372 pp.), 1900 (572 pp.), 1902 (585 pp.), 1903 (537 pp.), 1904 (545 pp.). Besides modern works acquired by copyright, a considerable amount of foreign music is bought every year, special attention being paid to the acquisition of full scores and other works beyond the means of the ordinary musical student. The most valuable musical acquisitions are mentioned in the yearly British Museum Returns to Parliament. A new catalogue of the older part of the collection—to include all music printed down to the year 1800—has been in preparation for the last three years. For this every work has been examined and catalogued afresh, and it is hoped that the result will be published in a few years' time.

The collection of musical MSS., including ancient service-books and treatises, but excluding oriental MSS., amounts to about 3000 volumes. The following are among the most noteworthy articles:—A large volume of autograph music by Purcell. A volume known as Thomas Mulliner's book, containing airs and chants for the virginals, by Tallis and others, and including the earliest known copy of Richard Edwards's madrigal 'In going to my naked bed.' Services and anthems of the Church of England down to Queen Anne's reign, collected by Dr. Tudway, 1715-20 in six volumes, containing works by Aldrich, Blow, Gibbons, Humfrey, Purcell, Tudway, etc. Two or three volumes of autograph pieces by Handel, some leaves of which supply the place of leaves wanting in the autograph of 'Admetus' in Buckingham Palace. Several volumes of rough draughts by Beethoven, in which the first ideas of themes of some of his great works were jotted down. Eleven volumes of autograph musical extracts, chiefly vocal, made by Dr. Burney for his History of Music. Twenty-eight volumes of MS. metrets, masses, madrigals, duets, etc. by Italian and English composers, copied by Henry Needler from the libraries at Oxford, and bequeathed in 1782. John Barnard's first book of Selected Church Music, a manuscript copy scored by John Bishop of Cheltenham, from the various voice parts of this book, of which no single perfect copy is known to exist. There are many interesting collections of Italian and early English (16th and 17th centuries) songs, having both words and music. Numerous autograph compositions by Haydn, Mozart, Schubert, Schumann, etc.; collections for a dictionary of music, etc. by Dr. J. W. Callcott. Thirty-nine operas or musical dramas by Sir Henry B. Bishop, in autograph score. Further, forty volumes of scores of Galle's operas, presented by his widow; and a large collection of Dibdin's songs and operas. There is also a good deal of late music in tablature. Among the more important articles acquired by purchase from time to time, are scores of operas—many, if not most, probably unpublished in score—especially by Rossini, Meyerbeer, Donizetti, Paisiello, Hasse, Winter, Ricci, and Mercadante; and church music, chiefly Italian, in 18th-century copies, comprising compositions by Palestrina, the Scarlattis, Durante, Leo, Bai, Clari, Perez, Pergolesi, and others. The purchase of MS. music has been much more extensive since 1872 than before that date. A complete official catalogue (by Mr. A. Hughes-Hughes) of the manuscript music, arranged in classes, is in progress. Volume i., containing sacred vocal music, is in the press, and will probably be published before the end of 1905. See also Catalogue of the MS. Music, by T. Oliphant (London, 1842). Director: Sir E. Maunde Thompson, K.C.B.

b. Victoria and Albert Museum. The Science and Art Libraries contain useful collections of works on music and musical instruments, besides some printed editions of German operas of small value, and the autograph MSS. of Mendelssohn's 'Hear my prayer' and Bishop's 'Legends of the Rhine.' The musical works formerly belonging to Mr. John Ella have been transferred to the Royal College of Music. The Museum contains a fine collection of old instruments, many of which are of remarkable beauty. Director: A. B. Skinner.

c. Royal Academy of Music. The Library of this institution contains many interesting and valuable works, amongst which may be mentioned a collection of English glees (in sixteen volumes) by Atterbury, Callcott, Danby, etc., and MS. operas by Leonardo Leo, Gasparini, Buononcini, Porpora, and others, which were presented to the Academy, together with the whole of his valuable musical library, by R. J. Stevens. From the same source came the MS. full score of Purcell's 'Fairy Queen,' partly in the composer's autograph—the only known complete copy of the work, (printed by the Purcell Society, 1904); copies of the treatises of Morley and Belin, and three copies of Mace's Musick's Movement. There is also a collection of the works of Sebastian Bach, being the library of the defunct Bach Society; a large number of Liszt's works (presented by Miss Constance Bache), and a collection of modern orchestral scores (presented by the publishers, Messrs.
Novello). In 1903, the Angelina Goetz Library was founded in memory of Mrs. Goetz by her children; this consists of a valuable collection of full scores, and includes many modern operatic works, etc., rarely found in either public or private libraries. Principal: Sir A. C. Mackenzie.

d. Royal College of Music. In addition to an extensive working library, the Royal College possesses the most extensive musical library in the United Kingdom. The basis of this collection is the fine library of the old Sacred Harmonic Society, which was acquired for the college in 1883 for the sum of £3000, £2000 being contributed by Sir Augustus Adderley and the rest by fifteen subscribers. The Sacred Harmonic collection is catalogued in Mr. W. H. Hask's Catalogue of the Library of the Sacred Harmonic Society. A new Edition, revised and augmented (London, 1872), with a Supplement published in 1882. With the exception of No. 1526 in this catalogue (the manuscript score of Mendelssohn's 'Elijah,' which, according to the original terms of its gift to the society, was returned to Mrs. Bartholomew) the whole library, together with the original book-cases, is arranged in a large room extending the whole length of the college buildings, which has been specially fitted up for the purpose. But this collection has been so largely increased by other donations and bequests that it now only forms about one-half of the College Library. Among the most important accessions the following may be mentioned: the library of the Concerts of Ancient Music, formerly preserved at Buckingham Palace and presented by Queen Victoria, comprising a very large collection of MS. scores and parts, chiefly of 18th and early 19th century music, and including many volumes of autographs of Bishop, interesting autographs of Croft, an opera by Keiser (probably autograph), and early copies of Handel; the large musical library of Sir George Grove, including autographs by Beethoven, Mendelssohn, and Schubert (unfinished symphony in E) and especially rich in musical literature; the collections of Mr. J. W. Windsor (of Bath) and his family, among which are an autograph string quartet (in C) by Haydn and some fine prints of musicians; several hundred bound volumes of music collected by Mr. S. W. Waley; several hundred volumes of duplicates from the Musical Library of the British Museum; a large collection of chamber music formerly belonging to Franz Ries; over 300 volumes of printed and MS. music (formerly belonging to Mr. John Ella, and including 20 MS. volumes of operas by D. Perez) transferred from the Victoria and Albert Museum; the full scores of 'The Golden Legend' and 'The Yeomen of the Guard' (bequeathed by Sir Arthur Sullivan); autographs of H. H. Pierson, A. W. Bach, C. Neate, Benedict (symphony in F), Pearsall, and Monk; the full score (MS.) of 'Love in a Village'; MSS. of Michael Haydn, Purcell, Durante, Hammerschmidt, Aulnois, Paisiello, Saratelli, and many others; a collection of autographs and other MSS. of A. Goring Thomas; over 100 volumes from the library of the late E. Dannreuther; and much printed music and musical literature of all kinds. This immense accumulation of music has naturally resulted in there being a good many duplicates. A sale of a portion of these took place a few years ago, and the proceeds have been devoted to binding, the acquisition of new works, etc. The whole collection is arranged, and is being catalogued. Though not a public library, access is generally granted on application (during term time) to the director. Besides the MSS. and printed books the library contains many interesting instruments, presented by the late Duke of Saxe-Coburg, the Souindro Mohun Tagore, Mrs. Day, Dr. Turpin, and others. There is also a small collection of paintings, drawings, and prints, the former include portraits of Buononcini (by Hogarth); Corelli (by Howard); Attwood; Weber (by Caws); Joachim (by Bendorfmann); Salomon (by Dance); Huilah (by Bower); M. A. Paton (by T. Sally); E. Paton (by E. T. Crawford); and Wesley (after Briggs). There are also some busts of musicians. The Donaldson Collection of old Instruments is preserved in a separate museum (see Musical Instruments, Collections of).

Director: Prof. Sir C. Hubert H. Parry, Bart.

e. The Madrigal Society. This Society possesses a valuable collection of more than 300 madrigals, anthems, etc., comprising works by more than 100 composers, principally of the English and Italian schools. The greater part of the collection consists of MS. copies of the 18th century, but there are some early printed part-books and some MSS. of the 17th century, including some interesting instrumental fantasias by English composers of the time of James I. and Charles I. The Library is at present deposited at the Royal College of Music.

f. The Philharmonic Society. This Library dates from the formation of the Society in 1813. It contains all the parts of the principal works of the classical composers necessary for an orchestra, and many full scores and MSS. of unique interest. Amongst the autographs may be mentioned three of Haydn's grand Symphonies; Beethoven's dedication to the Society of his Ninth Symphony; a MS. symphony by Cherubini; Mendelssohn's Symphony in C ('No. XIII.' known as 'No. 1'), dedicated to the Society; also 'Melusina,' the 'Trumpet Overture,' and the original setting of the scene 'Infelice,' with violin obbligato—all three with notes or alterations by himself; also original scores by Cipriani Potter, Ries, Clementi, Spohr, and other composers.

g. The Chapel Royal, St. James's, contains a small collection of part-books and scores (both
MS. and printed) of services and anthems which have been in use by the choir for the last century and a half. There is nothing of great rarity in the collection: it consists principally of well-known works of the English School.

b. Westminster Abbey. The Chapter Library contains a collection of music (chiefly in MS.) by Italian and English composers of the 17th and 18th centuries, and a number of madrigals, both English and Italian, of the late 16th and 17th centuries. See W. B. Squire: Musik-Katalog der Bibliothek der Westminster-Abtei in London (Leipzig, 1903, Monatshefte f. M., Beilage, 1903). Librarian: Rev. R. C. Blackmore.

i. Lambeth Palace. The Archiepiscopal Library contains many fine Psalters, Missals, and Breviaries, both printed and MS.; a good collection of early editions of psalms and hymn books; MS. treatises collected by W. Chelle; a MS. volume of English, French, and Italian songs with lute accompaniment (written in tablature), containing compositions by Charles and Edward Coleman, Alphonso Marsh, Matthew Locke, and John Guignard, and an explanation of the tablature; a MS. volume of harpsichord music (dances and airs) by R. Aylerward and others; a copy of Tyce's 'Acts of the Apostles' and a MS. volume containing the bass part of services and anthems by Tallis, Parsons, Byrd, Tomkins, Gibbons, Manday, Portman, Strogers, Morley, and many anonymous compositions. See W. H. Frere: Bibliotheca Musico-Liturgica, vol. i. (fasc. 1. 1901). Librarian: S. W. Kershaw.

j. Buckingham Palace. The collection of His Majesty the King is principally renowned for its priceless Handel autographs (eighty-seven volumes), which have been already noticed. But in addition to these, this library (which contains about 2000 works) is remarkable both for its valuable MSS. and fine printed works. Amongst the chief treasures are a splendid volume of autograph MSS. by Purcell; a valuable volume of English 16th-century music written by John Baldwin of Windsor, the Virginal Books of B. Cosyn and W. Forster; a curious volume of puzzle canons by Dr. John Bull; a collection of puzzle canons, in from two to twenty parts, by Elway Bevin, in the composer's own handwriting; a fine copy of the second edition of Monteverde's 'Orfeo'; a volume of 'Aires and Phantasies' by Coperario, which formerly belonged to Charles I.; an original copy of Mendelssohn's 'Gelius in Colonos,' sent by the composer to the Prince Consort for the production of the work at Buckingham Palace; curious masques by Schmel; a complete copy of 'Parthenia'; a large collection of Stellani's music, partly in MS. autograph, including a set of his operas, bound for the use of the opera at Hanover; the organ compositions of Frescobaldi; many full scores of operas by Lully, Mozart, Christian Bach, Graun, etc.; autograph symphonies by A. Scarlatti; musical compositions by King George IV.; and a very fine collection of madrigals, most of which were formerly in the possession of Sir John Hawkins. The collection is rich in fine copies; additions are still made to it from time to time. The collection has recently been moved into a fire-proof room in the basement of the Palace.

k. Bridgewater House. The Library of the Earl of Ellesmere contains some MS. and printed music. Among the former may be mentioned a set of madrigals and lute music (in six part-books) containing compositions by Coperario, Fabeloso, Croce, etc.; among the latter are many rare books, including the following: a complete set of the Italian edition of Morley's 'Ballads' (Este, London, 1586); 'Fiori Musicali di Diversi Autori a tre Voci, Libro ii.' (Venice, 1588, complete); the Superius and Bassus of C. Tessier's 'Premier Livre de Chansons' (Este, London, 1587); G. Bonagunt's 'Gli Amorosi Concerti' (Scoto, Venice, 1588, complete); 'Tripla Concordia: or a Choice Collection of New Airs in Three Parts' [by R. King, B. Smith, F. Forer, M. Locke, J. Bannister, and W. Hall] (London, 1677, complete); Robert Jones's 'Musical Dreame' (1609), and 'Muses Gardin for Delights' (1610). Librarian: S. Holme.

l. Mr. J. S. Bumpus, Glebelands, Stoke Newington, has made a special collection of church music. His library contains over 200 volumes of services and anthems of the 18th and 19th centuries; the Contratueror Cantoria and Bass Decani of Barnard's Church Music (1840); a nearly complete collection of English chant-books; a number of liturgies and treatises on plain-song printed at Antwerp, Lisbon, Mechlin, Paris, Ratisbon, Rome, Rouen, and Tournai in the 18th and 19th centuries, and a large collection of books and pamphlets and ecclesiastical music. The manuscripts include some forty volumes of unpublished services and anthems, including autographs of Aldrich, Blow, Croft, V. Richardson, J. Bishop, Pring, W. Horsley, Crotch, H. H. Pierson, Goss, and Ouseley; several organ-books and separate parts of early post-Restoration services and anthems; and over 300 autograph letters—mostly of English musicians, but including letters of Mendelssohn. Mr. Bumpus also possesses the MS. and printed collections of Miss Hackett (1783-1874) used in her history of Cathedral Schools, and an extensive collection of engraved portraits of musicians connected with English Cathedrals.

m. Mr. J. E. Matthew, South Hampstead, possesses one of the largest private collections of musical literature, comprising over 5000 distinct works. It is especially rich in printed treatises, as well as in history, biography, and dictionaries, including many rare works.
The practical music consists of about 1400 volumes, among which are Peri's 'Euridice' (1600, with a copy of the libretto of the same date); the original edition of Muffat's 'Componimenti'; the 'Florilegium' of Bodenschatz; Ravenscroft's 'Melismata' and 'Deuteromelia'; and R. Dowland's 'Musical Banquet.' An interesting account of this library will be found in a paper by the owner in the Proceedings of the Musical Association for 1902-3.

n. Mr. Fairfax Murray, The Grange, West Kensington, has a small but valuable collection of musical autographs, including specimens of Beethoven (a fragment of the Ninth Symphony), J. S. Bach, J. C. Bach, Mozart, Purcell, Schubert, Mendelssohn, Chopin, Rossini, etc. Mr. Murray also possesses a quantity of manuscript music, formerly belonging to the Duchess of Gloucester, including much that had been in the possession of the Royal family of George III.

Mr. Alfred H. Littleton possesses a small but valuable collection of about 200 volumes, which comprise several works that are unique in England, as well as especially fine early printed books. Amongst the principal rarities are the following works: Burdius, Musica Opusculum (Bologna, 1487); four editions of the treatises of Gafurius, including those of 1450 and 1502; Virdung's Musica Getutscht (1511); Agricola's Musica Instrumentalis (Wittenberg, 1529); Senf's Liber Selectorum Cantionum (1520); Animuccia's Masses (1567); Davante's 'Preamuses de David' (1560); and Peri's 'Euridice' (1600).

Manchester. a. Public Library. In 1899 Dr. Henry Watson of Salford transferred the ownership of his Musical Library to the Manchester Free Libraries Committee, with the stipulation that the collection should remain in Dr. Watson's custody and under his control during his lifetime, access to the books being granted to students on application to the chief librarian. The library consists of over 20,000 volumes, besides a large quantity of separate scores and parts. It is extremely valuable for general purposes of reference, and also contains many rare works, among which may be mentioned a MS. Antiphoner of the 14th century, sets of English madrigals by Byrd, Farmer, Estey, Lichfield, Ward, Pilkington, Tomkins, etc., and many printed treatises of the 16th and 17th centuries. See the Manchester Public Free Libraries Quarterly Record for 1899. Chief Librarian: C. W. Sutton.

b. Chetham Library. Here is preserved a collection of nearly 4000 proclamations, broadsides, ballads, and poems, accumulated by and presented to the Library by the late Mr. J. O. Halliwell-Phillipps. Amongst these will be found the music of many old popular songs ranging through the 16th, 17th, and 18th centuries; songs, catches, odes, etc., by Purcell, Eccles, Leveridge, Courteville, Croft, Carey, Weldon, and Pepusch, and a large collection of single sheet songs with music, published between 1680 and 1740. Many of the songs in this collection were introduced into operas for special occasions, and are therefore not to be found in the printed editions. There is a privately printed catalogue of this collection prepared by Mr. Halliwell-Phillipps.

Newbury, Berks. Mr. Arkwright has a collection of musical works containing a few manuscripts and many rare books. Among the former are a 12th-century gradual (with neums) in vellum, and a set of motets for three voices by Steslani. The printed books include Vittoria's Masses (Rome, 1583, folio); several part-books of Italian sacred music of the 17th century; Bevin's Briefe Introduction (1631), and other theoretical works; Coperario's 'Funeral Teares' (1606), and 'Songs of Mourning' (1613); Danyel's 'Songs for the Lute' (1606); Gibbons's 'Madrigals' (1612); 'The Lamentations of Jeremie with appt Notes' (London, J. Wolfe, 1687); Pilkington's 'First Book of Songs' (1605); Ward's 'Madrigals' (1613) and Weelkes's 'Ayres or Phantastickke Spirites' (1608), and 'Balletts and Madrigals' (1608).

Oxford. a. Bodleian Library. In 1759 and 1769 music began to be received by the Bodleian Library from Stationers' Hall. It was allowed to accumulate until, in the 19th century, it was arranged and bound up in some 400 vols. The cataloguing began in 1882, and since then all acquisitions have been catalogued. Some 3000 or 4000 musical works are received yearly under the Copyright Laws; classified hand-lists of all the music are available for reference. In 1801 a large collection of both MS. and printed music was bequeathed by the Rev. O. Wright. It consists of 209 bound volumes, and includes compositions by Ariosti, Blow, Boyce, Caldara, Clarke, Croft, Este, Ford, O. and C. Gibbons, Greene, Lotti, Morley, Purcell, Rogers, Scarlatti, Taylor, etc., besides numerous works by W. and P. Hayes. Much of this collection is autograph. The special Bodleian collection of musical manuscripts included only thirty-nine volumes, among which may be mentioned five part-books, dated 1576, of motets by Byrd, Tye, Taverner, Fayrfax, Tallis, and others. But among the general MS. collections of the library, forming about 32,000 bound volumes, are a large number of MSS. containing medieval music, mostly liturgical. Among these are a Winchester Troper (date 979 or 980), a Winchester Psalter, (date 998 or a little later), and an 11th-century Winchester Sequentiarium— all three adapted from lost books of the basilica of St. Martin at Tours;
the (10th- and 11th-century *Lecfric Missal*; the 11th-century *Heidenheim Troper and Sequentia*, and *Norselens Troper und Prosor*; a 12th-century Irish adaptation of the lost Winchester gradual; three 12th-century St. Albans books—a *Processional*, *Gradual*, and *Sacramentary*; M. S. Ashmole, 1285, containing (f. 235v.), a Norman-French song, apparently written in England about 1185; M. S. Rawlinson G. 22, containing (f. iv.) an English song of about 1225; M. S. Selden B. 26, containing a collection of secular and sacred songs written in a south English monastery (probably for the use of Christmas waits), apparently between 1450 and 1453; and M. S. Canonici misc. 213, a collection of 15th-century Belgian, French, and Italian by Dufay, Binchois, Hugh and Arnold de Lantins, and others.

The Rawlinson manuscripts include about 200 songs and instrumental music by Jenkins, Purcell, Eccles, Croft, Leveridge, etc.; 18 French and Italian songs; 61 sonatas (a 4) by Corelli, Matteis, Ruggiero, Purcell, etc. In the Bodleian is also now (since 1885) deposited the library of the Music School, containing about 880 volumes of manuscripts, among which are six part-books containing 18 masses by Taverner, Burton, Merbecke, Fayrfax, Rasar, Aston, Ashwell, Norman, Shepparde, Tyde, and Alwood; a collection of In Nomines, in four and five parts, by Byrd, Ferrabrasco, Bull, Taverner, Tyde, Tallis, etc.; motets by Felice Sances, etc.; motets with instrumental accompaniments by Rosenmüller, Schelling, and Knüpfer; sonatas, symphonies, etc., by Corelli and others; 235 pieces from Lully's operas; Henri de Gallot's *Pièces de Guitare* (1680-84); two fine folio volumes containing fantasias, music to masques, etc., by William and Henry Lawes; fantasies in six parts by J. Jenkins, Cooper, Lupo, T. Tonkinis, Byrd, etc.; John Jenkins's *Fancies and Ayres*, and fantasies for two trebles, two basses, and organ; pavans, galliard, corantos, dated 1664, by Coleman, Lawes, John Taylor, etc.; about 179 instrumental pieces a 4 by Benj. Rogers; Sylvanus Taylor's Ayres for two trebles and a base; vocal and instrumental parts of Dryden's *Secular Masque*; 9 instrumental pieces by C. Gibbons; songs by Purcell, Blow, W. Child, etc.; the *Oxford Act Music* (or commemoration music) by Blow, Goodson, etc.; Chris. Simpson's *Months and Seasons* for two basses and a treble (1668), and his *little Consort*; complete set of Occasional Odes by Boyce for the King's birthday and New Year (1755-79), etc. A good MS. catalogue of the collection was compiled in 1864, but both the Bodleian and the Music School MSS. are included in the printed *Summary Catalogue of the Western Collections*, by F. Madden, with notes by E. W. B. Nicholson, vols. iv. and v. An introduction by E. W. B. Nicholson to the MSS. with

neums preceding 1185 is being prepared, in continuation of the 'Early Bodleian Music' series. See also Stainer: *Du Fay and his Contemporaries* (1898), and *Early Bodleian Music* (1901), and Frere's *Bibliotheca Musico-Liturgica* (vol. i. fasc. 1), in which are also noticed some early musical treatises in the libraries of Balliol and St. John's Colleges. Librarian: E. W. B. Nicholson.

b. Christ Church. The Library of this college contains a very large and valuable collection of early English and foreign music, chiefly bequeathed to the college by Dean Aldrich and Mr. Goodson, but since then increased by many additions. The printed works comprise compositions by more than 180 different composers, while the MSS. contain 1075 anonymous pieces, and 2417 pieces by known composers, of whom 182 are English, 80 Italian, and 14 composers of other nations. This estimate does not include the many separate movements of operas, services, etc., and the Fancies for instruments, which if enumerated would amount to nearly 5000. Amongst the MSS. here are 30 anthems by Dr. Aldrich; 23 anthems, 7 motets, 4 services, and a masque ('Venus and Adonis') by Dr. Blow; 29 anthems, 43 motets, 19 madrigals, etc., and a very curious piece of programme music ('Mr. Bird's Battle') by W. Byrd; 18 anthems by R. Deering; 20 anthems and 21 madrigals and canzonets by T. Ford; 24 anthems by Orlando Gibbons; 21 anthems by John Goldwin; 33 motets by M. Jeffrey; 21 canzonets by J. Jenkins; 17 motets by W. Mundy; 15 operas by Henry Purcell; 39 motets by J. Shepperde; 17 motets by John Taverner; 10 madrigals by J. Warde; 25 motets by R. Whyte; 47 motets and 45 cantatas by Carissimi; 15 cantatas by Cesti; 67 motets by Gratiani; 27 cantatas by Michaelis; 30 motets by Palestrina; 112 cantatas by Luigi Rossi; 12 cantatas, a serenade, 2 dramas, and an opera by A. Scarlatti; and the following anonymous compositions:—259 motets, 162 cantatas, etc., to English words, and 408 cantatas, etc., to Italian words. There is a MS. catalogue of the collection compiled in 1845-47 by the late Rev. H. E. Havergal.

c. Mr. J. F. R. Stainer is the present possessor of the valuable Musical Library formed by his father, the late Prof. Sir John Stainer. The collection is especially rich in printed song-books. See *Catalogue of English Song-Books forming a portion of the Library of Sir John Stainer, with Appendices of Foreign Song-Books, Collections of Carols, Books on Bells, etc.* (printed for private circulation, London, 1891).

Riron. In theminster Library is preserved an interesting volume of theological tracts by Gerson and others, on blank leaves of which are written two 16th-century ballads for three voices. The first is entitled 'A ballet of y'' deth of y'' Cardinall' (i.e. Wolsey), and the second, 'A lytll ballet mayde of y'' yong dukes goe,'
(i.e. Henry Fitzroy, Duke of Richmond and Somerset, a natural son of Henry VIII., who died in 1536). The words of these ballads are printed in the *Yorkshire Archeological and Topographical Journal*, ii. 396. The library also contains some rare liturgical printed books, particularly a *York Manusale* (W. de Worde) of 1509, and a *York Missal* (Rouen) of 1517.

**Rochester.** The Music Library of the Cathedral consists of 478 volumes, 84 of which are in MS., and contain anthems and services (some of which are unpublished) by the following composers:—Hopkins, Henstridge, Loch, Wootton, Hine, Turner, Elvey, Child, Dupuis, Lambert, Pussell, Mason, Wallisley, Russell, Rogers, Marsh, and Pratt.

**Shenley, Herts.** Mr. Edward Speyer has a valuable collection of musical autographs, many of which are of great interest and rarity. The following are the chief musicians represented:—Albrechtsberger, Ancher, C. P. E. Bach, J. S. Bach (cantata, 'Wo Gott der Herr'); Beethoven (several letters, sketches, and proofsheets); Bellini, Berloz, Boccherini, Boieldieu, Brahms (vocal quartets, op. 112, Nos. 1 and 2, and many letters); Balow, Burney, Cherubini, Chopin, Clementi, Dalayrac, Donizetti, Elgar, Parinelli, Gluck (score of aria from 'Ifigile'); Gretty, Handel, Haydn, Josia, Liszt, Martini, Mâhul, Mendelssohn, Meyerbeer, Mozart and his family, Pater, Paganini, Philidor, Piccini, Rousseau, Sacchini, Salieri, Schubert, Schumann, Spohr, Spontini, R. Strauss, Thalberg, A. Thomas, Verdi, Wagner, and Weber.

**Sherborne.** The school Library contains a few rare musical printed works, including complete sets of both parts of the 'Selectissimae Cantiones' (Nuremberg, 1587) and 'Lectiones Hiob' (Nuremberg, 1588) of Lasso; the 'Balletti' of Castoldi (Antwerp, 1561); 'Paradiso Musicale' (Antwerp, 1596), and the five-part madrigals of Marenzio (Antwerp, 1593).

**Stonyhurst.** This college possesses the original MS. of de Vice's responses for Holy Week, MS. music by Cartoni, and a few litanies, motets, sequences, etc., by Palestrina.

**Tembury.** St. Michael's College possesses the Library of the late Rev. Sir F. A. Gore Ouseley, containing nearly 2000 volumes, mostly rare full scores and treatments. It includes the old Palais Royal collection, with the French royal arms on the covers, consisting of scores of operas, motets, etc., by Lully, Colasse, Desmouches, Lalande, Campra, and many other French composers. There is also a very large collection of MS. Italian sacred music of the Palestrina school, copied from the library of the Abbate Santini, and a very valuable MS. of Handel's 'Messia,' partly in the composer's own autograph, and partly in that of J. C. Smith. It was from this copy that Handel conducted the work on its first performance in Dublin, and it contains some various readings and curious annotations in his own handwriting. Amongst the autographs in this library may be mentioned a large collection of curious vocal music, original and selected, in the handwriting of Dr. Crotch; a full score of one of Spohr's symphonies; and autographs of Orlando di Lasso, Crazio Benevoli, Blow, Croft, Bononcini, Travers, Boyce, Arnold, Mozart, Paganini, and Mendelssohn. This library also contains copies of all the treatises of Gafurius and a large number of early MSS. of Purcell's works. For further information as to this collection see *Proceedings of the Musical Association* for 1875-76 and 1881-82. Warden: Rev. J. Hampton.

**Warr, Herts.** St. Edmund's College, Old Hall. The Library contains a valuable English manuscript of the 15th century, containing sacred music by English composers of the period, including two numbers ascribed to King Henry VI. For a full account and thematic catalogue see *Bennethumane of the International Musical Society*, ii. (1900-1) pp. 342-92, 719-22. Librarian: Rev. W. Burton.

**Wigan.** The Free Public Library contains a good collection of works on music, mostly English publications of the 19th century, as well as a few pianoforte scores of operas, etc. See Folkard (H. T.): *Music and Musicians, A list of Books and Pamphlets relating to the History, Biography, Theory, and Practice of Music, preserved in the . . . Wigan Free Public Library* (Wigan, 1905). Librarian: H. T. Folkard.

**Windsor.** St. George's Chapel. The Chapel Library contains a good collection of old church music, many MS. services and anthems, an interesting old organ book containing the Benedicite to Child's service in G (in score), and a copy of Tombini's 'Musicae Deo Sacrae' (1668).

**Worcester.** The Cathedral Library possesses a fine Sarum Missal, a MS. Service Book of the 13th century, and the Primus Contratenor, Bassus Decani, Secundus Contratenor, and Tenor Cantoris of Barnard's Church Music.

**York.** The Minster Library contains 258 musical works, both printed and MS., besides a large quantity of anthems and services. Amongst the MSS. the following works may be mentioned:—a collection of duets, glees, etc., by Aldrich, Wise, Blow, etc.; an installation ode by Hague; Te Deums by Haydn, Neukom, Schicht, and Weber; The Nativity, an oratorio by Homilius; a mass by Naumann; 'The Intercession,' an oratorio by King; a set of three-part Fancies by Jenkins; eight choir-books (formerly belonging to W. Gottling), containing the voice-parts complete of a large number of anthems and services of the 17th century; a Medius Decani part (early 17th century) of services by J. and R. Parsons, Mundy, Shooter, Morley, and Byrd; a sonata for trumpet and strings by Purcell, and much else of interest. The printed music includes works of Amner (*Sacred Hymns,*)
Library and Collections of Music

Holland

Amsterdam. Vereniging voor Noord-Nederlands Muziekgeschiedenis. (Maatschappij tot bevordering der Toonkunst.) See Catalogus van de bibliotheek der Maatschappij tot bevordering der Toonkunst en der Vereniging voor Noord-Nederlands Muziekgeschiedenis (Amsterdam, 1884). Lists also appeared in the Society's two first Bouwsteenen, afterwards continued as the Tijdschrift of the Society.

The Hague. Mr. D. F. Scheurleer possesses a very fine and extensive musical Library, of which he has published an admirable catalogue, containing facsimiles of title-pages, etc. See Catalogus der Muziekbibliotheek von D. F. Scheurleer (Diel i. and ii. 'S Gravenhage, 1893, Verfolg, 1903).

LEYDEN. a. The St. Pieterskerk possesses six choir-books containing compositions of the 16th century. They are described at length in the third Bouwsteenen of the Vereeniging voor Noord-Nederlands Muziekgeschiedenis, p. 57, etc. b. The University Library contains liturgical manuscripts of the 10th, 11th, and 15th centuries; a collection of Souterliedekens and some chamber music of the 18th century. See the third Bouwsteenen, p. 111, etc. Director: Dr. L. G. de Vries.

Italy

Arezzo. The Biblioteca Comunale contains some liturgical manuscripts of the 11th, 12th, and 15th centuries.

Bergamo. The Biblioteca Civica possesses some works printed by Petrucci; madrigals of the 16th and 17th centuries; manuscript vocal and instrumental music of the 18th century, and eleven volumes of youthful autograph compositions by Donizetti. Most of the music preserved here formerly belonged to J. S. Mays.

Bologna. a. Liceo Musicale. This magnificent Library was founded in 1798 and opened in 1805. It contains the collections of Padre Martini, S. Mattei, and G. Gaspari, and is probably the finest and most valuable musical library in existence. The musical instruments formerly here are now in the Museo Civico. See the elaborate published Catalogue, vol. i. (1890) and vol. ii. (1892), by G. Gaspari and F. Parisini; vol. iii. (1893) by G. Gaspari and L. Torchi; vol. iv. (1905), by R. Cadolini. Librarian: L. Torchi.

b. R. Biblioteca Universitaria. The music here is only manuscript, but it includes a missal of the 11th century, a valuable collection of sacred vocal music of the 15th century (see Vierteljahrschrift für Musikwissenschaft for 1885), two operas by Scarlatti, and some sacred music of the early 17th century.

d. San Petronio. The church archives contain some vocal sacred music (both printed and manuscript) of the 16th century. See Dr. L. Fatti: 'Notizie storiche sugli scrittori e miniatori dei libri corali della chiesa di S. Petronio,' etc. (in the Rivista delle Biblioteche, Ann. vi. p. 169, etc).

Cesena. Biblioteca Malatestiana (now Comunale). This celebrated Library possesses some old manuscript treatises. See J. M. Maciacci, Catalogus codicum manuscriptorum Malatestianae Casauratis Bibliothecae, etc. (Cesena, 1789-94), and Zazzari, Sui codici e libri a stampa della Biblioteca Malatestiana di Cesena (Cesena, 1887).

Cestona. Biblioteca Comunale. Liturgical manuscripts, including an Antiphoner of the 12th century.

Cesano. For the contents of the Canal Library see Biblioteca Musicale del Prof. F. Canal in Oceano Veneto (Bassano, 1885).

Ferrara. Biblioteca Comunale. The music here chiefly consists of printed vocal works by Italian composers of the 16th, 17th, and early 18th centuries. Librarian: Prof. G. Agnelli.

Florence. a. Biblioteca Nazionale Centrale (since 1861 combined with the Magliabechiana and Palatina). The musical collections here are very important, and a special musical department (under Prof. Arnoldo Bonaventura) has been recently formed. The manuscripts include theoretical works of the 12th and 15th
centuries, Laudi of the 14th century, and sacred and secular music from the 15th to the 18th centuries. The printed music is also very important, and includes early operas of the 17th century, and many works printed by Marescotti. Among the autographs Vincenzo Galilei is especially well represented. See F. Fossi, *Catalogus Codicum Seculorum XV impressorum qui in Publica Biblioteca Magliabechiana Florentiae adeae adventurum*, etc. (Florence, 1793-96); E. Palermo: *I Manoscritti Palatini di Firenze ordinati ad espositi* (Florence, 1853-68); A. Bartoli: *I Manoscritti Italiani della Biblioteca Nazionale di Firenze... Sezione Prima*. Codici Magliabechianii (Florence, tom. 1, 1879; tom. 2, 1881; tom. 3, 1883; tom. 4, 1885); I codici Panizziandani. *I Manoscritti della Biblioteca nazionale... Sezione Palatina* (Rome, 1887, vol. vii. of the Indici e Cataloghi, published by the Minister of Public Instruction); *Illustrazioni di alcuni Cinelli concernenti l'Arte Musicale in Firenze* (Florence, 1892); *Monatshefte f. Musikgeschichte* for 1872. Director: D. Chilovi.

b. Biblioteca Mediceo-Laurenziana. The liturgical manuscripts here are important, and include an Antiphoner of the 11th century. A precious collection of 13th-century music is described (with extensive excerpts) in vol. i. of the *Oxford History of Music*. The library also contains a portion of the Ashburnham manuscripts, among which are liturgies from the 10th to the 15th century, Greek hymnology of the 12th and 14th centuries, treatises of the 14th and 15th centuries, etc. See C. Paoli, *I codici Ashburnhamiani della R. Biblioteca Mediceo-Laurenziana*, vol. i. (Rome, 1887-97; vol. viii. of the Indici e Cataloghi, published by the Minister of Public Instruction); and *Illustrazioni di alcuni Cinelli concernenti l'Arte Musicale in Firenze* (Florence, 1892). Chief Librarian: Dr. Guido Biagi.

c. Biblioteca Riccardiana. This Library possesses some treatises and printed and manuscript music of the 16th and 17th centuries, including a German organ book (in tablature) of the early 17th century. See *Catalogus Codicum Manuscriptorum qui in Bibliotheca Riccardiana Florentiae adeae adventurum* (Leghorn, 1756), and R. Morpurgo: *I Manoscritti della R. Biblioteca Riccardiana*, vol. i. (Rome, 1893-1900, vol. xv. of the Indici e Cataloghi of the Minister of Public Instruction). Chief Librarian: Dr. Guido Biagi.

d. R. Istituto Musicale. This Library possesses the collections of the late A. Basevi, containing valuable theoretical and practical works of the 16th-17th centuries. The Tuscan Court Library, rich in 18th- and early 19th-century operas, is also preserved here. See Burbure: *Etude sur un Manuscrit du 16e Siècle* (Brussels, 1882) and *Illustrazioni di alcuni Cinelli concernenti l'Arte Musicale in Firenze* (Florence, 1892).

e. Biblioteca Marucelliana. Here are a few musical works printed in the early 16th century (described in Vogel's Bibliography, vol. ii.). Librarian: A. Bruschi.

f. The library of the late M. Horace de Landau now belongs to Mme. Finzi. It contains many valuable early printed works of the 16th and 17th centuries, including examples from the presses of Petrucci, Andrea Antiquus de Montana and J. Mazochius; also early operas, lute-books and madrigals. See the privately printed *Catalogue des livres manuscrits et imprimés composant la bibliothèque de M. Horace de Landau* (Florence, 1885).

GENOA. K. Biblioteca Universitaria. A few printed works and some MS. lute-books, the most important of which is described by A. Neri in vol. vii. of the *Giornale storico della Letteratura Italiana*. Librarian: Prof. A. Pagliani.

LUCCA. a. The Biblioteca dei Canonici contains liturgical MSS. (in neumes) of the 11th and 14th centuries, and choir-books of the 15th century.

b. The Biblioteca Comunale contains a few printed music-books of the 16th century and a MS. lute-book of the same period. For the latter, see the *Giornale storico della Letteratura Italiana*, vol. viii. p. 312. Librarian: E. Boselli.

MILAN. a. The Biblioteca Ambrosiana contains liturgical MSS. of the 16th–13th centuries; printed works (mostly sacred) by Italian composers of the late 16th and early 17th centuries, and autographs of Gaforius, C. de Rore, Zarlino, etc. Prefect: P. Antonio Reriani.

b. The Biblioteca del R. Conservatorio contains a very large musical library, to which additions are being constantly made by the deposit of copyright copies. The library is strong in printed vocal sacred music of the 16th century, and also possesses autographs of Durante, Leo, Paisiello, Zingarelli, Donizetti, Bellini, Generali, and Rossini. In 1889 the collection of G. A. Noseda was deposited here: it contains 700 autographs, 300 masses, 200 orchestral scores of operas, etc. See E. de' Guarinoni: *Indice Generale dell'Archivio Musicale Noseda... con... alcuni cenni interno... alla Biblioteca del R. Conservatorio di Musica di Milano* (Milan, 1897).

MODENA. Biblioteca Estense. The musical collections here, both MS. and printed, are important. The former contain valuable compositions of the 15th century, in which Dunstable and his English and foreign contemporaries and immediate successors are unusually well represented. There is a very rich collection of MSS. by Stradella and many 18th-century oratorios, operas, etc. The printed works are almost entirely Italian and French, dating from the 16th to the 18th centuries. For the latter see V. Finzi: Bibliografia delle Stampe musicali della R. Biblioteca Estense (Rivista delle Biblioteche, Ann. iii., iv. and v., containing careful descriptions of 321 works, with a good Index). The Stradella collection is described by A. Catelani: Delle Opere di A. Stradella esistenti nell'Archivio musicale della R. Biblioteca Palatina di Modena. Elenco con prefazione e note (Modena, 1866). Librarian: Dr. I. Luisi.

MONTE CASSINO. Besides liturgical MSS. and treatises of the 11th-16th centuries, the Abbey Library contains a large collection of Neapolitan Music in MS. (bequeathed by Maestro Eignano), including operas by A. Scarlatti, Leo, Vinci, etc., and the autograph of Pergolesi's 'Stabat Mater.' A Martyrology of the 14th century (formerly in the Cistercian monastery of SS. Vincent and Anastasius at Rome) is bound up with a valuable collection of 15th and early 16th-century compositions for four voices, containing works by Bernardus, Cornago, Dufay, Okeghem, Oriola, Gaforus, Loyset Compère, Damianus, etc. The words are Latin, French, Italian, and Spanish. Archivist and Prior: Mons. Ambrogio Amelli.

MONZA. The Biblioteca Capitolare contains some valuable liturgical MSS. of the 10th-14th centuries.

NAPLES. a. The Biblioteca Nazionale possesses some valuable liturgical MSS. of the 12th and 13th centuries, and a little printed vocal music of the 16th and 17th centuries. Prefect: Dr. E. Martini.

b. Real Conservatorio di Musica (Conservatorio S. Pietro a Majella). The Library is important for its collection of MS. Italian music (especially of the Neapolitan school) of the 18th and early 19th centuries. The printed works date from 1550 to 1728, and include some rare sets of madrigals printed at Naples. There is also a good collection of libretti. Some account of the contents of the library will be found in P. Florimo's La Scuola Musicale di Napoli e i suoi Conservatorii (3 vols. Naples, 1882). See also Indici di tutti i Libri e Spartiti di Musica che si conservano nell'Archivio del Real Conservatorio della Pietà de' Turchini (Naples, 1801). Librarian: Cav. R. Pagliara.

NOVARA. The archives of the Cathedral contain some sacred vocal music, mostly of the latter part of the 17th century.

PADOVA. a. Biblioteca Nazionale. This Library contains a few printed musical works of the 16th and 17th centuries.

b. The Biblioteca Universitaria contains MS. French and Italian songs (for one and two voices) of the 16th century; MS. music in organ tablature by Hasler, Erbach, Sweelinck, etc., and a little printed vocal music of the 16th and 17th centuries.

c. The Library of the Episcopal Seminary possesses a small collection of theories and other music of the 16th and 17th centuries. Librarian: Prof. Stevano.

PARMA. R. Istituto Musicale. The musical works formerly in the Biblioteca Palatina of Lucua are preserved here. Some of the earlier printed works are described by Prof. G. Niaruffi in the Rivista delle Biblioteche (Anno iv. p. 7).

PERUGIA. The Biblioteca Capitolare contains some liturgical MSS., including an Antiphoner of the 11th century.

PESARO. Biblioteca Oliveriana. A 16th-century MS. (songs and liete music) in this Library is described by A. Saviotti in vol. xiv. (1889) of the Giornale Storico della Letteratura Italiana. Director: Marchese C. Antaldi.

PISA. The University Library contains a few theoretical works and a copy of Bucchiatti's 'Arie, Scherzi e Madrigali' (Venice, 1627). Librarian: Prof. U. Morini.

ROME. a. Vatican Library. The music in this library chiefly consists of liturgical and theoretical works. The former—both printed and MS.—are especially valuable, and there are many MS. treatises from the 10th to the 15th century. A collection of French Troubadour songs (13th and 14th centuries) and a manuscript (in the Urbino collection) containing vocal compositions of the 15th century (Dunstable, Binchois, Ciconia, etc.) may also be mentioned, but the contents of the library are still but imperfectly known. See H. Ehrensberger: Libri liturgici Bibliotheca Apostolicae Vaticanae manuscripti (Freiburg, Breisgau, 1897); H. Stevenson: Inventorio dei Libri Stampsate Palatino-Vaticani (Rome, vol. i. 1886-89; vol. ii. 1886-91); G. Salvo Cozzo: I Codici Cappellani della Biblioteca Vaticana (Rome, 1897);

b. Barberini Library. This collection is now transferred to the Vatican. It contains some liturgical MSS. of the 12th to the 15th centuries, and valuable printed musical works of the early 17th century.

c. Archives of the Sistine Choir. For the valuable MSS. preserved here see F. X. Haberl: *Bibliographische und thematischer Musikkatalog des Päpstlichen Kapellarchivs im Vatikan* (Leipzig, 1888). Beilage to the Monatshefte für Musikwissenschaft for 1885 and 1887.

d. Archives of St. Peter's. The music here includes an Antiphoner of the 15th century, and some important collections of vocal compositions of the latter part of the 15th and beginning of the 16th centuries. See Vierjahrschrift für Musikwissenschaft for 1885 and 1887.

e. Lateran Choir. The Archives contain MS. and printed sacred music of the 16th and 17th centuries.

f. Santa Maria Maggiore. This church possesses some gradual of the 16th century.

g. Biblioteca Casanatense (S. Maria sopra Minerva). The musical collections of Baini are preserved here. The library contains liturgies of the 11th-14th centuries; MS. treatises by Ugolino of Orvieto, etc.; a volume of three-part compositions by Okeghem and his contemporaries, and MS. works by Scarlatti and Hass. The collection is rich in printed works—both practical and theoretical music—of the 16th and 17th centuries. Librarian: I. Giorgi.

h. Accademia di S. Cecilia. This Library is especially rich in printed music and libretti, and receives constant accessions by the copyright laws. Among the rarer books are the 'Liber quindecim Missarum,' printed by Andreas de Montona (Rome, 1516), and the only complete copy known of Cavalliere's 'Rappresentazione di Anima e di Corpo' (Rome, 1600). Valuable purchases were made at the dispersal of the Borghese Library in 1892. There is also a collection of musical autographs. The only printed catalogue seems to be Catalogo degli opere di musica... che dall'anno 1836 all'anno 1846 sono state depositate nell'Archivio della Congregazione ed Accademia di Santa Cecilia di Roma (s.l.o.). Director: A. Lanciani.

i. Biblioteca Nazionale Centrale Vittorio Emanuele. Besides some liturgical MSS. of the 15th-17th centuries this library contains a few musical MSS. of the 16th-19th centuries, among which are a valuable copy of Vittoria's Psalms for four voices (with autograph corrections and additions by the composer), and some compositions by A. Scarlatti. Director: D. Gnoli.

j. Biblioteca Chigiana. This Library possesses a valuable 15th-century MS. collection containing twelve masses by Okeghem, masses and motets by P. de la Rue, Josquin, and other contemporary composers. Librarian: Professor G. Cagnoni.

SIENA. Biblioteca Comunale. This Library contains a small collection of musical works, both printed and manuscript. Among the former are a few 16th- and 17th-century madrigals, among the latter a 15th-century MS. containing treatises by J. de Muris, Marchettus of Padua, etc., and collection of songs by French minstrels of the 13th century. The music is catalogued under the heading 'Belle Arti' in vol. vii. of L. Hali's *Indice per Materie della Biblioteca Comunale di Siena* (Siena, 1844-48); the French songs are described by L. Passy in *Les Chansons de la Belle Epoque* (Paris, 1859), and in the November number of the *Musical Times* for 1886. Librarian: Dr. F. Donati.

TREVISO. The Chapter Library of the Cathedral contains some manuscript vocal sacred music of the 16th and 17th centuries, but the greatest treasure is a complete copy of the rare *Harmonie Musicus Othecatuin*, printed by Petrini in 1501.

TURIN. a. Biblioteca Nazionale. The fire of January 1904, which destroyed so many priceless treasures in this library, fortunately spared the musical collections. These include a considerable number of printed madrigals of the 16th century, and a valuable series of ballets performed at the Court of Savoy between the years 1645 and 1660. A selection of music from this library was exhibited at the National Exhibition of Turin in 1898; the catalogue, after appearing in the *Rivista delle Biblioteche* (Anno ix.), was issued separately as *Epozione Nazionale di Torino, 1898. Manoscritti e Libri a Stampa Musicali esposti della Biblioteca Nazionale di Torino* (Florence, 1898). Chief Librarian: F. Carta.

b. Cathedral (S. Giovanni Battista). The Library possesses some sacred vocal music (both printed and manuscript) of the 16th-18th centuries.

c. Museo Civico. Some liturgical MSS. of the 17th and 18th centuries. Director: Cav. Quintino Carrega.

UDINE. Biblioteca Universitaria. The only musical work appears to be an imperfect copy of Cavalliere's 'Rappresentazione di Anima e di Corpo' (Rome, 1600). Librarian: P. Natalucci.

VENICE. a. The Library of St. Mark's (now transferred to the Zecch) contains much interesting music. Amongst the theoretical books are copies of the works of Galilei, Aron, Artusi, L. Foliarius, Zacconi, Zarlino, J. Frochtns, Gafoni, Ornithoparcus, Burtius (*Opusculum*, 1587), and many others. The collection of practical music
is rich in part-books of madrigals, chiefly in Venetian editions. The following is a list of composers whose works are contained in this section of the library: — Agostini, Anerio, Autognati, Arcadelt, Asola, Baccosi, Balbi, Berechel, Bertani, Bianco, Caccini, Cambio Perisseone, Corvus, Croce, Donato, Doni, Dorati, La Faya, Ferretti, Fiesco, Freddi, A. Gabrieli, Giovannieli, Gero, Gombert, della Gostet, Sigismondo d’India, Ingegneri, Orlando Lasso, G. de Macque, Manara, Marenzio, Marien d’Artois, Nasotti, Mazzone, Merulo, F. di Monte, Monteverde, Nasco, Peri, Petrinio, Phinor, G. da Ponte, Pordenone, Porta, Portinaro, Primavera, Rauldi, Romano, de Rore, Rossi, Rosso, Rubi, Rusini, Sabini, Spontini, Stabile, Stivori, Striggio, Tarditi, Tigrini, G. da Udine, Vecchi, Verdelot, dalla Viola, G. de Wert, Zacchino, Zappasorgo, Zacquarini, G. A. Bontempì, Crescintini, Crivelli, Frescobaldi, Grossi, Hartmann-Stunz, T. Merula, Miniscalchi, Moretti, Morlacchi, and Rinuccini. The MS. include works by Marcello (two Intermezzi and a Serenata, autograph, a treatise (1707), two cantatas, an aria and two operas); S. Alberi; D. Scarlatti (a Serenata a 4, and thirteen vols. of Sonatas, 1752-57); Perez (eight operas, 1752-55); Cafara; T. Traetta; L. Vinci; Sarti; Graun; Perotti; Haydn; Myśliweczek (‘Demofonte,’ played at Venice in 1769); Bonno; Galuppi; Guglielmi (‘Il Re Pastore,’ ‘1767’); Naumann; Lardini; C. Grossi; Venier (Procurator of St. Mark’s, 1732-45); Stradella; Matthes; Brusà; Giai (Theatre Aírs, 1738); G. Porta; Purpora (Theatre Aírs, 1727); D. Terradellas; Hassé (five operas, 1730-58), and two oratorios; A. Scarlatti (opera, ‘L’Eurillo,’ and the following twenty-seven operas by Cavalli: — Gli Amori d’Apollo e di Dafne, Alcebiade, L’Artemisia, La Calisto, Il Ciro, La Didone, La Doriclea, L’Egista Elena, L’Elogiabolo, Erode amante, L’Erismena (two settings), L’Eritrea II Giaccone, L’Hipermetria, Muzio Scevola, Le Nozze di Teti e Peleo, L’Orimont, L’Orione, L’Oristese, L’Orindo, Pompeo Magno, La Rosinda, Sopinone Africano, La Statra, La Virtù degli Strali d’Amore, Xerse.

There are also many detached cantatas and songs. For the Contrarini collection, which is extremely rich in operas (some autograph) of the early Venetian school, see T. Wiel: — L’opere musicali Contarini dei secolo XVII, nella R. Biblioteca di San Marco (Venice, 1888).

Librarian: Dr. S. Morpurgo.

b. The Museo Correr has a considerable collection of music, chiefly MS. compositions of the later Venetian schools. There are many autographs of B. Furlanetto, and church music, operas, intermezzos, etc., by Morlacchi, Bernasconi, Perotti, Salari, Pergolesi, Jommelli, Mayer, Lotti, Burzola, Bertoni, and many others. In 1881 the collection of Count Leonardo Martinengo, consisting chiefly of detached vocal and instrumental pieces, was added to the collection.

c. Biblioteca Uscini-Stampaglia. This library contains some manuscript vocal music of the late 17th century.

b. Biblioteca Comunale. This library contains a little printed and manuscript music, mostly of the 16th-19th centuries, including autographs of G. B. Beretta, G. Cellis, F. Morlacchi, and others. See G. Biadego: — Storia della Biblioteca Comunale di Verona condizionati e tavole statistiche (Verona, 1892), and (same author) Catalogo descrittivo dei manoscritti della Bibl. Com. di Verona (Verona, 1892). Librarian: G. Biadego.

c. Teatro Filarmonico. The collection of printed music of the 16th and 17th centuries preserved here is said to be of importance.

VICENZA. Biblioteca Comunale Bertoliana. This library possesses a small number of printed works (theoretical and practical) of the 16th and 17th centuries. Librarians: Mons. D. Bortolan and Abb. S. Rumor.

Luxembourg

The Landesbibliothek contains a small collection of early printed musical works, including copies of Wollick’s Opus Aureum (Cologne, 1608), and Twyvel (or Twyvel) de Montegauzio’s Introductio in musica practica (Cologne, 1513). See A. Namur: — Catalogue . . . des Editions Inaugurales de la Bibliothèque de l’Athéène (Brussels, 1865). Librarian: Dr M. d’Haart.

Russia

Moscow. The Synodal Library contains about 1200 musical MSS. dating from the 15th to the 19th century. See the Russkaya Muzikal'naia Gostina for 1898. Librarian: A. A. Pokrovsky.

St. Petersburg. a. The Imperial Public Library contains scores of operas by Galuppi, Sarti, etc., and a special collection of works of Gluck. A catalogue of the latter, by N. F. Pindezen, was printed in 1898. Director: D. F. Kobeko.

b. The Library of the Imperial theatres has a rich collection of operas of the 18th and 19th centuries.

Soria

BARCELONA. Biblioteca Provincial y Universitaria. This library contains liturgical manuscripts of the 13th-18th centuries; MS. and printed music from the 16th to the 19th
a copy of the original edition of Peri’s ‘Euridice’ (1609), together with a contemporary book of words. The collection of the Beethoven Society of Chicago was added in 1890, the private library of Julius Fuchs in 1891, and that of Otto Lob in 1892. Hubert H. Main’s collection of hymn-books and sacred music, numbering 3000 vols., was incorporated in 1891. The section of American sacred music is the most complete of any in the collection, but no effort is made to continue it. A MS. vol. of compositions for the lute, with illuminated borders, dates from the early 16th century, and there are liturgical MSS. of the 13th and 18th centuries. By the will of Theodore Thomas, who died in 1905, the set of programmes of concerts conducted by him in 1855-1904, to the number of 10,000, was bequeathed to the Library. Mr. George P. Upton published an article on the musical department of this library in The Nation, New York, 1889, vol. xlviii. pp. 361-2.

b. Mr. G. P. Upton has a musical library of interest.

HARTFORD, CONNECTICUT. The Theological Seminary has about 1000 vols. on music.

NEW YORK. a. The Public Library of the City of New York has at the present time (1905) about 10,000 volumes in the division devoted to music, and is the richest in the United States in respect of medieval publications and MSS. It consists of what were originally three distinct foundations—the Astor, Lenox, and Tilden, established respectively in 1849, 1870, and 1887, and consolidated in 1892. The first had a fair collection of music, with the publications of the Plain-song and Medieval Music Society of London, and of the continental antiquarian societies, as special features. The nucleus of the truly remarkable Lenox Library is the musical collection made by Joseph W. Drexel, of Philadelphia, and given to the library by will. Mr. Drexel began the formation of his library in 1858 by purchasing and combining the collections of H. F. Albrecht, a musician who came to America with the Germania Orchestra in 1848, and Dr. R. La Roche. Many purchases were made at the sale of Dr. E. F. Rimbaud’s library in London in 1877. A moderately trustworthy catalogue made in 1869 contains 12 vols. of 16th-century musical publications, 48 of the 17th, and 483 of the 18th. The unique copy of ‘Parthenia Inviolata’ is in this library. There are also several theoretical works of the 15th century, and some autograph scores of classical composers. Among the MSS. are two of great beauty and value, one a magnificent gradual on vellum, on which the writer, who calls himself Brother Leonard of Aix-la-Chapelle (Leonardo da Aquigiano) laboured, according to his own statement, for seven years. It was finished in 1494, and is supposed to have been commissioned by one of the princes who assisted at the coronation of Maximilian as King of the Romans. The other MS. is a gorgeous antiphoner of 1695, formerly belonging to Charles X. of France. A valuable historical collection of sacred and secular compositions of the 16th century is contained in a MS. vol. entitled ‘Francis Sambrook his book,’ which was in the Rinmanut collection. Dr. Rimbaud states that Sambrook died in 1660, aged seventy, and was buried in Salisbury Cathedral. A note in the MS. attributed to Dr. Alcock, says that the music was ‘wrote out of the Vatican (or Pope’s Library) at Rome.’ Some pages are damaged by sea-water, but there are intact over 300 compositions by Lasso, Peter Phillips, Byrd, Vittoria, Lupo, Daman, the two Ferraboscos, Marenzio, Clemens non Papa, Jacono Aquilino Dano, Alessandro Striggio, Joseph Biffo, Francesco Rore, Felice Anerio, Andrea Gabrieli, Benedetto Pallavicini, Rinaldo del Mel, Giulio Heremita, Agostino Agazzari, Giovanni Francesco Anerio, Thomaso Giglio, Soopiope Spavento, Antonio il Verso, Vincenzo Passerini, Giovanni Battista Lucatello, Giovanni di Macque, Lelio Bertani, Antonio Orlando, Giaches de Wert, Annibal Stabile, Leonardo Meldert, Alessandro Milleville, Giovanni Battista Moscaglia, Paolo Bellasio, Hippolito Bacconio, Marcantonio Ingegneri, Cornelio Verdone, Giovanni Croce, Orazio Vecchi, Tiburtio Massaini, Giovanni Gabrieli, Leone Leoni, Costanzo Porta, Giovanni Cavaccio, and Giovanni Coperario. The ‘Fancies for two voices and bass’ of the last-named composer, and two volumes of virginal music, are among the 17th-century MSS. in the Library.

c. The Columbia University had 1200 volumes of music in 1902.

d. Mr. H. E. Krebsiel’s Library contains nine vols. of opera airs in score collected by Thomas Gray in Italy, 1749.

NORTHAMPTON, MASS. The Forbes Library contained in 1902, 7500 volumes and sheets of music and musical literature, and in that year it supplied 2 per cent of the population of the town with material for musical study.

PHILADELPHIA. Private Libraries. Mr. James Warring has a collection of English and American Psalmody published prior to 1820, containing 7000 volumes. The Rev. L. F. Benson has also a collection of hymn-books. Mr. Oliver Hopkinson is the possessor of an autograph MS. ‘The Psalms of David, to former parts, for viols and voyce, The first booke Doricke Motets, The second, Divine Canzonets, Composed by Giles Farnaby, Bachelor of Musicke with a prelud, before the Psalmes, Cromatica.’ The MS. was once the property of Francis Hopkinson, the ancestor of the present owner, who was one of the signatories of the Declaration of American Independence, and probably the first American composer, being an amateur musician as well as a statesman, lawyer, and inventor.
Salem, Mass. The Essex Institute has 1000 volumes of or upon music, and 4000 pamphlets.

Washington, D.C. The Library of Congress is numerically the largest library in the United States, containing in all about 2,000,000 vols., including musical books and compositions. There are not less than 420,000 books, pamphlets, and pieces of music in the Music Division, most of them secured through the operation of the copyright law, which requires the deposition of works, for which legal protection is sought, in the archives of the Government. The Music Division was set apart in 1897, and since 1902, when the collections were reorganised and prepared for systematic development, it has completely altered its character, and within the lines laid down by Mr. Herbert Putnam, Librarian of Congress, and Mr. O. G. Sonneck, Chief of the Division, it has rapidly acquired first-class importance. In 1905 it contained about 6000 vols. of musical literature (history, bibliography, biography, aesthetics, etc.) and 7500 vols. of an educational kind. The yearly acquisitions of all kinds are naturally enormous, averaging about 23,000 numbers. Though much of the material acquired through the copyright law is of little or no permanent value, yet a large percentage is of lasting merit, as the best authors of Europe and America send their books and scores for copyright purposes. Moreover, large annual purchases of books and scores are now made, the amount set apart for this purpose alone being about $5000 per annum. The collection is developing on a systematic plan laid down by Mr. Sonneck, who has devoted a large share of his activity to original investigation in musical history. At present most stress is laid on the compositions of the latter half of the 19th century, and books published before 1850. The Library now contains 700 full scores of operas, and is acquiring old theoretical works so rapidly that it is hoped it will equal the libraries of New York and Boston in a few years. No special effort has been made to acquire rare works, but among those contained in the Library are the Compendium musicae, 1513; Coelaeus’s Tetrachordum musicae, 1514; Morley’s Madrigals, 1594, complete; and Canzonets, 1593, Cantus and Bassus; Tovar’s Libro de musica practica, 1510; and Weelkes’s ‘Ayres or phantasticke spirites,’ 1608. Cantus, Tenor and Bassus. There is an exceptionally fine collection of Confederate war-music. Of older Americana (15th century) there are N. Chauncey’s Regular singing defended, 1728; Th. Symmes, Utile dulci, 1723; J. Lyon’s Urania, 1761; D. Read’s Columbian Harmonist: A. Bull’s Responspecies, 1795; The Loveliness of Instrumental Music, 1763 (not the original, but the much scarcer parody published by Stewart), and a MS. volume of Ephraim Cloister Music, 1749, which is probably the largest collection of the kind. There are also several editions of the Bay Psalm Book.

Universities. Harvard. This was the first American University to give music a recognised place in its curriculum and to establish a chair of music, for which reason the University Library began about 1870 to make a collection of scores and musical literature. It now has about 5500 volumes, including many full scores, among them all the complete editions of the great masters that have appeared in Europe. There are MS. scores of a number of unpublished operas, and a few autographs. The collection is thus reasonably strong in scores as well as in historical works, its object being to provide material for historical and theoretical study. In addition to the collection in the University Library there is a special reference library of about 400 volumes, to which all students in musical courses have direct access.

Yale University, New Haven, Connecticut. The Lowell Mason library of music, belonging to the theological department of Yale University, was the bequest of the widow of Dr. Lowell Mason, in 1873. The nucleus of this collection is the library formed by Dr. C. H. Rinck, of Darmstadt, which was bought by Dr. Mason in 1852. It now contains 4460 distinct publications, and 630 MSS. More than one half belongs to the department of sacred music, and is particularly rich in hymnology (700 volumes). Roman Catholic and early French Protestant church music are also well represented, and there is much valuable material here for the history of music in America. The vocal secular music comprises some 1200 works of every description, and there is also a valuable collection of educational and theoretical works, including some 16th- and 17th-century treatises. In general literature there are about 850 volumes, one half being in the English language. Amongst the rare works in this library the following may be mentioned: — Riccio’s Introitus (Venice, 1589); Andreas Spaeth’s Paraphrase of the Psalms (Heidelberg, 1596); de Moncrief’s ‘Chansons’ (Paris, 1755); Krieger’s ‘Musikalische Partien’ (Nuremberg, 1697); and autograph MSS. by Dr. Mason, Rinck, A. André, Beczawzowsky, Pesca, Nageli, G. A. Schneider, and N. A. Strungk.

The Yale University Library has a small but valuable collection, comprising about 300 volumes of music, and 100 of musical literature, gathered principally with the income of a fund given by the late Mrs. William A. Larned, which yields about 60 dollars a year. This has been devoted mainly to the purchase of the works of the great composers, principally in score, of which there is a good collection in this library.
a copy of the original edition of Peri's 'Euridice' (1600), together with a contemporary book of words. The collection of the Beethoven Society of Chicago was added in 1899, the private library of Julius Fuchs in 1891, and that of Otto Lob in 1892. Hubert H. Main's collection of hymn-books and sacred music, numbering 3000 vols., was incorporated in 1891. The section of American sacred music is the most complete of any in the collection, but no effort is made to continue it. A MS. vol. of compositions for the lute, with illuminated borders, dates from the early 16th century, and there are liturgical MSS. of the 13th and 18th centuries. By the will of Theodore Thomas, who died in 1905, the set of programmes of concerts conducted by him in 1855-1904, to the number of 10,000, was bequeathed to the Library. Mr. George P. Upton published an article on the musical department of this library in The Nation, New York, 1888, vol. xlviii. pp. 361-2.

b. Mr. G. P. Upton has a musical library of interest.

HARTFORD, CONNECTICUT. The Theological Seminary has about 1000 vols. on music.

NEW YORK. a. The Public Library of the City of New York has at the present time (1905) about 10,000 volumes in the division devoted to music, and is the richest in the United States in respect of mediæval publications and MSS. It consists of what were originally three distinct foundations—the Astor, Lenox, and Tilden, established respectively in 1849, 1870, and 1887, and consolidated in 1892. The first had a fair collection of music, with the publications of the Plain-song and Medieval Music Society of London, and of the continental antiquarian societies, as special features. The nucleus of the truly remarkable Lenox Library is the musical collection made by Joseph W. Drexel, of Philadelphia, and given to the library by will. Mr. Drexel began the formation of his library in 1858 by purchasing and combining the collections of H. F. Albrect, a musician who came to America with the Germania Orchestra in 1848, and Dr. R. La Roche. Many purchases were made at the sale of Dr. E. F. Ridgwell's library in London in 1877. A moderately trustworthy catalogue made in 1869 contains 12 vols. of 16th-century musical publications, 48 of the 17th, and 483 of the 18th. The unique copy of 'Parthenia Inviolata' is in this library. There are also several theoretical works of the 15th century, and some autograph scores of classical composers. Among the MSS. are two of great beauty and value, one a magnificent gradual on vellum, on which the writer, who calls himself Brother Leonard of Aix-la-Chapelle (Leonardo di Aquignano) laboured, according to his own statement, for seven years. It was finished in 1494, and is supposed to have been commissioned by one of the princes who assisted at the coronation of Maximilian as King of the Romans. The other MS. is a gorgeous antiphoner of 1695, formerly belonging to Charles X. of France. A valuable historical collection of sacred and secular compositions of the 16th century is contained in a MS. vol. entitled 'Francis Sambrook his book,' which was in the Rimbault collection. Dr. Rimbault states that Sambrook died in 1660, aged seventy, and was buried in Salisbury Cathedral. A note in the MS. attributed to Dr. Alcock, says that the music was 'wrote out of the Vatican (or Pope's Library) at Rome.' Some pages are damaged by sea-water, but there are intact over 300 compositions by Lasso, Peter Phillips, Byrd, Vittoria, Lupó, Daman, the two Ferraboscos, Marenzio, Clemens non Papa, Jacomo Aquilino Dano, Alessandro Striggio, Josello Biffo, Francesco Roro, Felice Anerio, Andrea Gabrieli, Benedetto Pallavicini, Rinaldo del Mel, Giulio Herenits, Agostino Agazzari, Giovanni Francesco Anerio, Thomaso Giglio, Scipione Spavento, Antonio il Vero, Vincenzo Passerini, Giovanni Battista Lucatello, Giovanni di Macque, Lelio Bertani, Antonio Orlandini, Giaches de Wert, Annibal Stabile, Leonardo Meldert, Alessandro Milleville, Giovanni Battista Moscaglia, Paolo Bellasio, Hippolito Bacciusio, Marchionatto Ingegnieri, Cornelio Verdunco, Giovanni Croce, Orazio Vecchi, Tiburcio Massaini, Giovanni Gabrieli, Leone Leoni, Costanzo Porta, Giovanni Cavaccio, and Giovanni Coperario. The 'Fancies for two voices and bass' of the last-named composer, and two volumes of virgilian music, are among the 17th-century MSS. in the Library.

c. The Columbia University had 1200 volumes of music in 1902.

Mr. H. E. Krehbiel's Library contains nine vols. of opera airs in score collected by Thomas Gray in Italy, 1740.

NORTHAMPTON, MASS. The Forbes Library contained in 1902, 7500 volumes and sheets of music and musical literature, and in that year it supplied 2 per cent of the population of the town with material for musical study.

PHILADELPHIA. Private Libraries. Mr. James Warrington has a collection of English and American Psalmody published prior to 1820, containing 7000 volumes. The Rev. L. F. Benson has also a collection of hymn-books. Mr. Oliver Hopkinson is the possessor of an autograph MS. 'The Psalms of David, to fower parts, for viols and voyce,' The first booke Dorieke Motets, The second, Divine Canonets, Composed by Giles Farnaby, Bachelor of Musicke with a prelud, before the Psalms, Cromaticke.' The MS. was once the property of Francis Hopkinson, the ancestor of the present owner, who was one of the signatories of the Declaration of American Independence, and probably the first American composer, being an amateur musician as well as a statesman, lawyer, and inventor.
SALISBURY, N.H. The Essex Institute has 1000 volumes of or upon music, and 4000 pamphlets.

WASHINGTON, D.C. The Library of Congress is numerically the largest library in the United States, containing in all about 2,000,000 vols. including musical books and compositions. There are not less than 420,000 books, pamphlets, and pieces of music in the Music Division, most of them secured through the operation of the copyright law, which requires the deposition of works, for which legal protection is sought, in the archives of the Government. The Music Division was set apart in 1897, and since 1902, when the collections were reorganised and prepared for systematic development, it has completely altered its character, and within the lines laid down by Mr. Herbert Putnam, Librarian of Congress, and Mr. O. G. Sonneck, Chief of the Division, it has rapidly acquired first-class importance. In 1905 it contained about 6000 vols. of musical literature (history, bibliography, biography, aesthetics, etc.) and 7500 vols. of an educational kind. The yearly accretions of all kinds are naturally enormous, averaging about 28,000 numbers. Though much of the material acquired through the copyright law is of little or no permanent value, yet a large percentage is of lasting merit, as the best authors of Europe and America send their books and scores for copyright purposes. Moreover, large annual purchases of books and scores are now made, the amount set apart for this purpose alone being about $5000 per annum. The collection is developing on a systematic plan laid down by Mr. Sonneck, who has devoted a large share of his activity to original investigation in musical history. At present most stress is laid on the compositions of the latter half of the 19th century, and books published before 1800. The Library now contains 700 full scores of operas, and is acquiring old theoretical works so rapidly that it is hoped it will equal the libraries of New York and Boston in a few years. No special effort has been made to acquire rare works, but among those contained in the Library are the Compendium musicae, 1513; Coelhano’s Tetradactylum musicum, 1514; Morley’s Madrigals, 1594, complete; and Canzonets, 1593, Cantus and Bassus; Tovar’s Libro de Musica practica, 1510; and Weelkes’s ‘Ayres or phantasticke spirites,’ 1608. Cantus, Tenor and Bassus. There is an exceptionally fine collection of Confederate war-music. Of older Americana (18th century) there are N. Chafee’s Regular singing defended, 1728; Th. Synnes, Utile dulci, 1723; J. Lyon’s Urania, 1761; D. Read’s Columbian Harmonist: A. Bull’s Responsorial, 1795; The Loveliness of Instrumental Music, 1768 (not the original, but the much scarcer parody published by Stewart), and a MSS. volume of Ephraim Cloister Music, 1749, which is probably the largest collection of the kind. There are also several editions of the Bay Psalm Book.

WORCESTER, MASS. The American Antiquarian Society has a fair collection of early American psalmody.

UNIVERSITIES. Harvard. This was the first American University to give music a recognised place in its curriculum and to establish a chair of music, for which reason the University Library began about 1870 to make a collection of scores and musical literature. It now has about 5500 volumes, including many full scores, among them all the complete editions of the great masters that have appeared in Europe. There are MS. scores of a number of unpublished operas, and a few autographs. The collection is thus reasonably strong in scores as well as in historical works, its object being to provide material for historical and theoretical study. In addition to the collection in the University Library there is a special reference library of about 400 volumes, to which all students in musical courses have direct access.

Yale University, New Haven, Connecticut. The Lowell Mason Library of music, belonging to the theological department of Yale University, was the bequest of the widow of Dr. Lowell Mason, in 1873. The nucleus of this collection is the library formed by Dr. C. H. Rinck, of Darmstadt, which was bought by Dr. Mason in 1852. It now contains 8400 distinct publications, and 930 MSS. More than one half belongs to the department of sacred music, and is particularly rich in hymnology (700 volumes). Roman Catholic and early French Protestant church music are also well represented, and there is much valuable material here for the history of music in America. The vocal secular music comprises some 1200 works of every description, and there is also a valuable collection of educational and theoretical works, including some 16th- and 17th-century treatises. In general literature there are about 850 volumes, one half being in the English language. Amongst the rare works in this library the following may be mentioned:—Biceio’s Introitus (Venice, 1559); Andreas Spaeth’s Paraphrase of the Psalms (Heidelberg, 1596); de Moneris’s ‘Chansons’ (Paris, 1755); Krieger’s ‘Musikalische Partien’ (Nuremberg, 1697); and autograph MSS. by Dr. Mason, Rinck, A. Andrè, Beczawrowsky, Jesco, Nigeli, G. A. Schneider, and N. A. Strungk.

The Yale University Library has a small but valuable collection, comprising about 300 volumes of music, and 100 of musical literature, gathered principally with the income of a fund given by the late Mrs. William A. Larned, which yields about 60 dollars a year. This has been devoted mainly to the purchase of the works of the great composers, principally in score, of which there is a good collection in this library.
An excellent catalogue of both the University and the Lowell Mason collections was made by Mr. J. Sumner Smith, who, for years before his death in 1903, spent much of his salary in adding anonymously to the collection.

The University possesses, independently of the Lowell Mason collection, 3735 volumes of music and books on music.

The reader may be referred to two interesting articles in the Sammlungbande of the Int. Mus. Ges. for 1903; Botstiber's *Musicalia in der N. Y. Public Library*, and O. G. Sonneck's *Nordamerikanische Musik-Bibliotheken*. Acknowledgments are due to the latter writer for information in addition to that given in his article.

H. E. K.

LIBRETTI is the diminutive form of the Italian word *libro*, and therefore literally means 'little book.' But this original significance it has lost, and the term is used in Italian, as well as in other languages, in the technical sense of book of an opera. Its form and essential difference from spoken comedy or tragedy will best be explained by a short historic survey of its origin and development. In the most primitive form of opera, as it arose in Florence in the 16th century, that difference was comparatively trifling, the libretto in those days consisting mainly of spoken dialogue with a few interspersed songs and choral pieces. But the rapid rise of music and the simultaneous decline of poetry in Italy soon changed matters. Certain musical forms, such as the aria and the various species of concerted music, were bodily transferred to the opera, and the poet had to adapt his plot to the exigencies of the superior art. Thus he was obliged not only to provide primi uomo and prima donna with a befitting duet in a convenient place, but other characters had also to be introduced to complete the quartet or the sextet, as the case might be, and, in addition to this, the chorus had to come in at the end of the act to do duty in the inevitable finale. However legitimate these demands may appear to the musician, it is obvious that they are fatal to dramatic consistency, and thus the poet, and unfortunately the public also, had to submit to the inevitable, the former by penning, and the latter by serenely accepting, the specimens of operatic poetry with which we are all but too well acquainted. The most perfect indifference to the dramatic part of the entertainment can alone explain the favour with which such profoundly inane productions as 'Ernani,' or 'Un Ballo in Maschera,' as transmogrified by the Italian censorship, have been received at various times by English audiences. That this condition of things should in its turn detrimentally react on music is not a matter for surprise; for singers naturally would take little trouble to pronounce words to which nobody cared to listen, and with the proper declamation of the words intelligent musical phrasing is inseparably connected. In the Italian school, where vocalisation was carried to the highest pitch of perfection, the libretto accordingly sank to the lowest level. In France, on the other hand, where the declamatory principle prevailed, and where dramatic instinct is part of the character of the nation, a certain regard for story and dialogue was never lost, and the libretti of Lully's and Rameau's, and after them of Gluck's operas, share the classic dignity, although not the genius, of Corneille and Racine. In the same sense the marvellous skill and savoir-faire of the contemporary French stage is equally represented in the lyrical drama, in more than one instance supplied by the same hands. The same cannot be said of Germany, where few dramatists of repute have condescended to co-operate with the musician, and where, till comparatively recent times, even the finest dramatic subjects (e.g., Beethoven's 'Fidelio') were defaced by the execrable doggerel believed to be particularly suitable for operatic purposes. In all these respects a deep change has been wrought by Wagner's reform. In that great poet and greater musician the two faculties are inextricably blended, and in his work therefore the reciprocity between music and poetry may be studied in its most perfect form. His own words on the subject will be of interest. 'In *Rienzi,*' he says, 'my only purpose was to write an opera, and thinking only of this opera, I took my subject as I found it ready made in another man's finished production. . . . With the *Flying Dutchman* I entered upon a new course, by becoming the artistic interpreter of a subject which was given to me only in the simple, crude form of a popular tale. From this time I became, with regard to all my dramatic works, first of all a poet; and only in the ultimate completion of the poem was my faculty as a musician restored to me. But as a poet I was again from the beginning conscious of my power of expressing musically the import of my subjects. This power I had exercised to such a degree, that I was perfectly certain of my ability of applying it to the realisation of my poetical purpose, and therefore was at much greater liberty to form my dramatic schemes according to their poetical necessities, than if I had conceived them from the beginning with a view to musical treatment.'

The result of this freedom of workmanship is easily discoverable in Wagner's later music-dramas, such as 'Tristan' or 'Die Walküre.' They are, to all intents and purposes, dramatic poems full of beauty and interest, quite apart from the aid of musical composition. For the latter, indeed, they appear at first sight unadapted, and he must be a bold man who would think of resetting the Nibelungen Trilogy, as Rossini reset the 'Barber of Seville' after Paisiello. The ordinary characteristics of the libretto, such as the aria, or the duet, as distinguished from the dialogue, have entirely disappeared, and
along with these have gone those curious reitera-
tions by various persons of the same sentence, 
with a corresponding change only of the personal 
pronoun. In this and other respects Wagner's 
music-dramas must be considered by themselves, 
and the strict imitation of their form in ordinary 
libretti, written for ordinary musicians, would be 
simply fatal. At the same time his work has 
been of great influence on the structure of the 
epic poem in modern opera. Musicians 
have become more critical in their choice of sub-
jects, and the librettists accordingly more care-
ful in providing them, especially as the natural 
sense of the public also seems to be awakening 
from its long slumber. It is indeed a signif-
ants fact that three of the most successful 
modern operas, Gounod's 'Faust,' Bizet's 'Car-
men,' and Goeze's 'The Taming of the Shrew,' 
are all founded on stories of intense human 
interest, more or less cleverly adapted to opera
purposes. It is true that in France and Germany 
the dramatic interest was never at so low an 
ebb as in Italy or England. Numerous operas 
might be named which owe their permanent suc-
cess to a bright and sparkling libretto, and those 
in which the genius of the musician has been 
weighed down by the dulness of the opera 
director; 'Martha,' 'Fra Diavolo,' and 'Le Postil-
lon de Longjumeau,' belong to the former class; 
'Così fan Tutte,' 'La Clemenza di Tito,' and 
'Euryanthe,' nicknamed 'Ennuyante' by the 
despairing\(^1\) composer, to the latter. It is also 
a significant fact that by far the finest music 
Rossini ever wrote occurs in the 'Barber' and in 
'William Tell,' and that 'Faust' remains 
Gounod's unsurpassed masterpiece, the inspira-
tion of the composers being in each case distinctly 
traceable to the dramatic basis of their music. 
Instances of a similar kind from the works even of 
the most 'absolute' musicians might be multi-
plied ad libitum. The lesson thus taught has 
indeed been fully recognised by the best com-
posers. Beethoven was unable to fix upon a 
second subject after 'Fidelio'; and Mendelssohn, 
in spite of incessant attempts, found only one to 
satisfy his demands; and that, alas! too late for 
completion. The libretto of his unfinished opera 
'Loveley,' by Emanuel Geibel, the well-known 
poet, was afterwards set by Max Bruch, and 
performed with considerable success. The import-
ance of the libretto for the artistic as well as the 
popular success of an opera is therefore beyond 
dispute, and modern composers cannot be too 
careful in their choice. To assist them in that 
choice, or to lay down the law with regard to the 
construction of a model libretto, the present 
writer does not feel qualified. A few distinctive 
features may, however, be pointed out. In 
addition to the human interest and the truth of 
passion which a libretto must share with every 
dramatic poem, there ought to be a strong in-
fusion of the lyrical element, not to be mistaken
\(^1\) Weber's Life, by his son, ii. 319.

VOL. II

for the tendency towards 'singing a song' too 

\(^2\) Theatrical Life of the last twenty years.

LIBRETTO

721
lyrical honours, but without success. Of the professional librettists in that country few deserve mention. In connection with so-called 'English opera' the names of Gay, the author of the ' Beggar's Opera,' and, in modern times, of Alfred Bunn and of Edward Fitzball, both fertile librettists, ought to be mentioned. To the latter belongs the merit of having by one of his pieces supplied Heine, and through him Wagner, with the idea of a dramatised 'Flying Dutchman.' Planché, the author of Weber's 'Oberon,' also must not be forgotten. W. S. Gilbert's witty comediettas, which Sullivan fitted to such charming and graceful tunes, can be called libretti only in a modified sense.

A few words should be added with regard to the libretto of the Oratorio and the Cantata. Aesthetic philosophers have called the oratorio a musical epic, and, in spite of its dramatic form, there is a good deal of truth in this definition; for, not only does the narration take the place of the action on the stage, but the descriptive parts, generally assigned to the chorus, allow of greater breadth and variety of treatment than is possible in the opera. A reference to the choruses in 'Israel in Egypt' and other works by Handel will be sufficient to illustrate the point. In accordance with this principle, what has been urged above with regard to the operatic libretto will have to be somewhat modified. But here also terse diction and a rapid development of events should in all cases be insisted upon. The matter is considerably simplified where the words have been selected from Scripture, for here sublimity of subject and of diction is at once secured. Handel's 'Messiah' and 'Israel'—which also contain his finest music—Mendelssohn's 'St. Paul,' 'Elijah,' and 'Hymn of Praise,' owe their libretti to this source. Haydn's 'Creation' is based on the Bible and Milton, though the source is difficult to recognise under the double translation which it has undergone. Gay's 'Acis and Galatea,' Milton's 'Allegro' and 'Penseroso,' Dryden's 'Alexander's Feast,' and Pope's 'St. Cecilia's Ode,' have a literary value of their own; but in other cases Handel has been less happy; and some terrible couplets might be quoted from the works of his collaborators Morell and Humphreys. [Mention should be made of the admirable libretti made by Boito for Verdi's last and greatest works, 'Otello' and 'Falstaff'; of the 'Eden' of Robert Bridges, written primarily as a libretto for Stanford's oratorio; and of various admirable original poems in the oratorios and cantatas of Purdy, which are by the composer himself.] e. n.

LICENSE (Ital. Licenza; Germ. Lizenz; Fr. Licevoir). As long as any art has the capacity for development and expansion, true genius and dogmatism are constantly at war. The inherent disposition of the mind to stereotype into formulae conclusions drawn from the observation of an insufficient number of isolated instances, is probably the result of much bitter experience of the fruits of human carelessness and stupidity; against which the instincts of the race impel them to guard for the future by preparing temporary leading-strings for the unwise, to keep them from falling and dragging others with them into the mire of error. Up to a certain point even genius must have leading-strings, and these must needs be made of the best materials at hand till better be found. The laws cannot be made on principles whose bases are out of the ken of the wisest law-makers; and genius, like ordinary intellect, must needs be amenable at first to such laws as preceding masters have been able to formulate from the sum total of their experience. The trouble begins when something is found which is beyond the range of the observation which served as the basis for a law, and seems therefore to contravene it; for many men so readily mistake their habits for absolute truth that when they are shown a novelty which passes their point of realisation and is out of the beaten track, they condemn it at once as heresy, and use the utmost of their power to prevent its dissemination; and where they find themselves unable to stem the tide through the acknowledged greatness of the genius who has originated it, or through the acceptance of its principle becoming general, they excuse themselves and stigmatise what they mistrust by calling it a license.

A license, then, is the breaking of a more or less arbitrary law in such respects as it is defective and its basis unsound and insufficient; and it is by such means that the greater part of expansion in musical art has been made. An irresistible impulse drives genius forth into the paths of speculation; and when a discovery is made it frequently happens that a law is broken, and the pedants proclaim a license. But the license, being an accurate generalisation, holds its place in the art, and the laws have to be modified to meet it, and ultimately men either forget that it was ever called a license or stand in amazement at the stupidity of their predecessors; while it must be confessed that they assuredly would not have been any wiser if they had been in their places. The history of music is full end to end with examples—from De Muris in the 14th century bewailing in bitter terms the experiments in new concords, to the purists of Monteverde's time condemning his use of the dominant seventh without preparation, on to the vexation of the contemporaries of Mozart at the extravagant opening of the C major Quartet, and the amazement of many at Beethoven's beginning his first Symphony (in C) with a chord ostensibly in F major. Even at the present day Bach's complicated use of accidentals is a stumbling-block to many, who fancy
he breaks laws against false relations; while in reality this law, like that against consecutive fifths, is only the particular formula covering a deeper law which Bach had the power to fathom without waiting for its expression. So again with the resolution of discords; the old formulas were mere statements of the commonest practices of the older composers, and did not attempt to strike at the root of the matter; so we find even Haydn taking license in this direction in relation to the lights of his time; while Bach's resolutions are often inexplicable even at the present day as far as the accepted principles of resolution will go, because theorists have hardly got far enough yet to see clearly what he saw and expressed so long ago. At the present day, however, the increase of the accumulated results of observation and analysis, joined with a more philosophical spirit, tends to produce a more and more accurate determination of the real laws of art, and by the systematication of these into a more congruous and connected theory, a nearer approach is made to what is universally true, and so less room is left for those speculative experiments of genius which the denseness of mere pedants has been content to brand as licenses.

This progress explains the fact that the term 'license' is not so frequently heard in relation to music as it formerly was: but there is still plenty of room for theorists to invent false hypotheses; and the apparently growing desire of many scientists to force upon artists as final the results of the most elementary discoveries in relation to the material of the art, will still afford genius the opportunity of asserting the strength of its convictions by taking so-called licenses, and will likewise afford dogmatists further opportunity of making themselves ridiculous to posterity by condemning the truths thus discovered.

There is just one last consideration: Libertines are unfortunately to be met with in the art world as well as elsewhere, and the licenses they take too frequently deserve the bitter language of the enragcd pedant. There is no need to stay to consider their experiments, for they will not take long to die of inanition. It only remains to remind the too hasty enthusiast that to take licenses with safety for the art is not the part of every ready believer in himself; but only of those in whom the highest talents are conjoined with unflagging patience and earnest labour; who pass through the perfect realisation of the laws they find in force at first, and by learning to feel thoroughly the basis on which they rest, and the principles of their application by other great masters, finally arrive at that point where they can see the truths which lie beyond the formal expression of the law, and which the rest of humanity only call licenses for the nonce because their eyes are not clear enough nor their spirits bright enough to leap to the point which the inspiration of genius has achieved.

Beethoven appears to have used the term 'licenze' in relation to construction with reference to the fugue in B♭ in opus 106. It is difficult to indicate precisely in what particular the licenses consist. The case is similar to the sonatas which he called 'quasi Fantasia,' merely indicating that in them he had not restricted himself closely to the laws of form as accepted in his time, but had enlarged the bounds according to his own feelings. C. H. P.

LICENZA. Used by Mozart for the first movement of a vocal piece (No. 79), and last movement of another ditto (No. 36). (B. & H.'s List of new editions.)

LICHFILD, Henry, was the composer of 'The First Set of Madrigals of 5 parts, apt both for Viols and Voyces,' printed in 1614 (bass part dated 1613) and containing twenty madrigals, one of which, 'All yee that sleepe in pleasure,' is included in the first volume of Arion. Nothing is known of his biography except that the dedication of his books shows him to have been in the service of Lady Cheyney (or Cheney) of Toddington, Bedfordshire.

LICHNOWSKY, Carl, Fürst (Prince), by Russian patent issued Jan. 30, 1778; born 1758, died April 15, 1814; was descended from an old Polish family whose estates were so situated that, after the partition of Poland, it owed allegiance to all three of the plunderers. The principal seat of Prince Carl was Schloss Grätz, near Troppau in Silesia; but Vienna was his usual place of residence. He claims a place in this work as the pupil and friend of Mozart and the Mecenas of Beethoven.

Readers of Burney's Present State of Music will remember his eulogies of the Countess Thun-Klosterle, so celebrated for her beauty, intellect, and culture, whose disregard for mere form gave her the reputation of eccentricity, but whose house and family had charms that attracted even the Emperor Joseph and his brothers thither on the footing of friendly visitors. Of her taste in music it is sufficient to say that she was a profound admirer of the compositions of both the young Mozart and the young Beethoven, at a time when such appreciation was by no means universal. Her daughters—Georg Forster's 'Three Graces'—were worthy of their mother. Elizabeth married Rasomouwsky; Christine, born July 26, 1765, married Nov. 21, 1788, Lichnowsky; and the third the English Lord Guilford. Schönfeld, a Viennese, writes in 1796 of Lady 'Gilfort' as a guitar player of very high rank and a singer of uncommon excellence, and of Princess Lichnowsky as 'a strong musician who plays the pianoforte with feeling and expression.'

Lichnowsky, without pretending to rival the great magnates Esterhazy, Lobkowitz, and their
peers, in maintaining a complete ‘chapel’ of vocal and instrumental music, had within five years after his marriage his regular Friday quartet of youthful virtuosi, Schuppanzigh, Sina, Weiss, and Kraft, all of whom became famous, and also gave musical entertainments on a scale requiring a full orchestra.

His relations to the Prussian court compelled him occasionally to appear there; and he thus found opportunity to give Mozart—only two years his senior—a practical and substantial proof of his affection, by inviting him, in those days of tedious and expensive travelling, to join him on one of these occasions free of expense. This was the journey in the spring of 1789, during which the King of Prussia offered Mozart the then robushest musical position in Germany; a kind word from the Emperor, after his return, led him to reject it, without securing an equivalent. There seems to be no doubt that Lichnowsky, deeply moved by the distressing condition of his teacher and friend, had taken him to Berlin in the hope of improving his circumstances, and that the King’s offer was partly due to his influence. Two and a half years later poor Mozart was dead, leaving a void in the Lichnowsky-Thun circle which there was no one to fill. Another two years and young Beethoven had come from Bonn.

The relations between him and the Lichnowskys are sufficiently indicated in the article BEETHOVEN; but a current error must be corrected, namely, that the breach caused by the quarrel at Gratz in 1806 was final. Lichnowsky lived in a large house over the Schotten gate—both house and gate disappeared long since—and in the story below him dwelt Beethoven’s friends, the Erdijdy. The Schotten and Mólker bastions were contiguous, and the Pasqualati house, on the latter, was in the same row with that of Lichnowsky, though a few doors away from it. This then was the reason why Beethoven was content to live in rooms in the fourth storey, looking to the cold north, and without a direct ray of the sun. He remained there from 1804 to 1807, and then removed into rooms provided him by the Countess Erdidy.

An outbreak with the Countess led him to remove to the other side of the city, where he passed the years 1809 and 1810. Meantime, so complete a reconciliation had taken place between him and both Lichnowsky and the Countess Erdidy, that in 1811 he went again to Gratz, and on his return once more took his old lodging in the Pasqualati house, where he remained until the death of Lichnowsky. It was during these last years that Schindler records the frequent visits of the prince to the composer.

EDWARD MARIA, son and successor of Prince Carl (born Sept. 19, 1789, died Jan. 1, 1845, at Munich), distinguished himself as an agriculturist, but more as a man of letters. He stands high in Austrian literature as a national antiquary, especially for his great History of the House of Hapsburg.

LICHNOWSKY, Count Moritz, a younger brother of Prince Carl, was one of that small circle of most intimate friends of Beethoven faithful to the last. He was probably that Count Lichnowsky who published (1798) the seven Variations for P.F. on ‘Nel cor piu.’ After the death of his first wife he became deeply attached to the opera-singer, Mila. Stummer; but not until after the death of Prince Carl, when their daughter had already passed the stage of infancy, were they able to marry. It is in relation to this attachment that Beethoven is said to have written the Sonata in E minor, op. 90. [See vol. i. p. 2066.] A. W. T.

LIE, SIGURD, an eminent Norwegian musician, born May 23, 1871, was a pupil of the Leipzig Conservatorium in 1891-94. He was soon afterwards appointed conductor of the ‘Harmonien’ choral society in Bergen, and was the conductor of the Central Theatre. He undertook a second course of musical study in Berlin, and on returning to Christiania was appointed conductor of one of the best choral societies; he was a good violinist, and among his compositions are a symphony in A minor, a ‘marce symphonique,’ an ‘orientalisk Suite’ for orchestra, a quintet for piano and strings, duets, cantatas, songs, and choral works, many of which show such high qualities that if he had lived he would have taken a very high place among Scandinavian writers. He died Sept. 30, 1904 (Musical News, obituary notice, Dec. 17, 1904).

LIE-NISSEN, ERIKA, a distinguished Norwegian pianist, was born at Kangeviger, on Jan. 17, 1845, and was brought up in a family where many eminent musicians were guests. On the death of her father, a lawyer, the family went to live at Christiania, where Erika Lie became the pupil of Kjerulf; in 1869 she went to Berlin to study the piano with Kullak, and her progress was so rapid that she was appointed a teacher in his conservatorium. In 1886 she went to Paris and had some lessons from Telleseh, and in 1870 she went to Copenhagen as professor of the piano at the Conservatorium there. She undertook many concert-tours all over Europe, making a great success in the works of Chopin shall not be let, Beethoven will come again,” he was evidently uninformd, at least in part; but his error has been adopted and made the text of in all biographies and biographical sketches of Beethoven since 1828. The new lodging in 1814 was in the lower story of the Horstenseh house, on the same block. He removed it the year before; for, on the departure of the Erdijdy from Vienna in 1816, there was no inducement to remain, and Beethoven moved away from the Mólker Bastil, never to return.
and the romantic school. In 1874 she married Dr. Oscar Nissen of Christiania; in 1894 she received a yearly grant from the Norwegian Storting, and she died in Christiania, Oct. 27, 1903. She was buried at the Vor Freisers Church, and Edvard Grieg conducted the musical part of the service (Musical News, obituary notice, Nov. 28, 1903).

LIEBESVERBOT, DAS. Opera in two acts, text (founded on 'Measure for Measure') and music by Richard Wagner. Produced at Magdeburg, March 29, 1836.

LIEBICH GEDACT (i.e. gedeckt), literally 'sweet-toned covered or closed' pipe. This class of organ stop is a variety of the old quite-stopped Diapason or Gedact. It was invented by the elder Schulze, of Paulinzelle near Erfurt, and was first brought under notice in England in his organ in the Great Exhibition of 1851. It is made either of 15-foot tone (Lieblich Bourdon), 8-foot (Lieblich Gedaect), or 4-foot (Lieblich Flote). The pipes are made five or six sizes narrower than the Gedact, but are more copiously winded, and the mouths cut up higher. The tone, therefore, is nearly or quite as strong as that of the Gedact, though not so full, yet brighter and sweeter. When the three stops, 16, 8, and 4 feet are grouped together on the same manual their effect is very beautiful. The late Edmund Schulze combined them in this manner in the choir organ at the Temple Church in 1860, also in his fine organ at Doncaster (1852). Lewis adopted the same plan at Ripon Cathedral, and it was followed by Willis at Salisbury Cathedral.

E. J. H.

LIED, a German poem intended for singing; by no means identical with the French chanson, or the Italian canzona. All three terms are in fact untranslatable, from the essentially national character of the ideas embodied in each form, the German Lied being perhaps the most faithful reflection of the national sentiment. Certain aspects of nature appeal with peculiar force to the German mind—such, for instance, as the forest, the waste, the fall of rain, the murmur of the brook, the raging of the tempest; and connected with these certain other objective ideas, such as the hunter in the forest, the lonely bird, or the clouds stretching over the landscape, the house sheltering from wind and rain, the mill-wheels turned by the brook, etc. Such are the topics of the secular Lied, which have been embodied by Goethe, Schiller, Heine, and a hundred smaller poets, in imperishable lyrics, perfectly suited for music. Those of the sacred Lied are, trust in God, the hope of future blessedness and union, and other religious sentiments.

'Volkslieder'1 are what we call traditional songs, whose origin is lost in obscurity; in Germany these are both sacred and secular. [The 'Volksliedmiles Lies' is a song written in the manner of a folk-song, but by some individual composer; and the 'Kunstlied' is a more highly organised form of art. It is generally divided into two classes, the 'strophische,' in which the melody (and often the accompaniment) is repeated exactly for each verse, and the 'durcomponirte,' in which the melody and accompaniment follow the words without repetition.] The new form, naturalised by Haydn, Mozart, Reichardt, Schulz, Himmel, Beethoven, Conradin, Kreutzer, and C. M. von Weber, attained, in the hands of Franz Schubert, to that extension and perfection of expression which makes it so dear to the German nation. Since his time the accompaniment has constantly assumed greater prominence, so that the original form has nearly disappeared, the musical treatment being everything, and the poetry comparatively of less moment. Schumann may be considered the pioneer in this direction, and after him follow Brahms and Robert Franz. With the two last composers the accompaniment, as rich in melody as it is in harmony and modulation, divides attention with the words. The best works on the subject are Dr. Schneider's Geschichte des Liedes, 3 vols. (Leipzig, 1863-65), full of detail; von Lilienronc's Die historischen Volkslieder der Deutschen, etc. (1855-61); Lindner's Geschichte des Deutschen Liedes im XVIII. Jahrhundert (Leipzig, 1871); Böhme's Altddeutsehes Liederbuch; and Schüré's Histoire du Lied. [See Song.]

LIED-FORM. The term Lied-form has unfortunately been used by different writers with different significations; and the vagueness which results, conjoined with the fact that the term is not happily chosen, renders it doubtful whether it had not better be entirely abandoned.

Some people use it merely to define any slight piece which consists mainly of a simple melody simply accompanied, in which sense it would be perfectly adapted to many of Mendelssohn's Lieder ohne Worte, and innumerable other pieces of that class of small compositions for the pianoforte by various authors, as well as to songs. On the other hand, some writers have endeavoured to indicate by the term a form of construction, in the same sense as they would speak of the forms of the movements of sonatas. For the diffusion of this view Herr Bernhard Marx appears to be responsible, and his definition will be best given in his own terms.

In the fourth section of the fifth division of his Allgemeine Musiklehre he writes as follows:1 'Under this name of Lied-form we group all such pieces of music as have one single main idea, which is presented either in one developed section, or as a period (with first and second phrase), or even as a period divided into first and second similar parts, or into first, second, and third parts (in which case the last is

---

1 The English have, unfortunately, no equivalent word for Volkslied. We have the thing, though of a very different kind from that of Germany, but have no term to express the whole kind. Mr. Chappell's great work on English Volkslieder is entitled The Ballad Literature and Popular Music of the Olden Time. Popular, however, has now acquired a distinct meaning of its own.
generally a repetition of the first). It is possible in Lied-form to have even two such complete forms aggregated into one piece; but then they occur without close connection or interweaving with one another, perhaps with the two parts twice or three times repeated; in which case the second group will be called a Trio, and the third the second Trio, and be treated as a second independent piece. For the sake of contrast, such Trios will often be in another key, or in other key relationship, such as minor corresponding to major, and major to minor, of the same key, etc., return being afterwards made to the first portion and the original key to make the piece complete. In this Lied-form are cast most of the Lieder which are intended to be sung, dances, marches, many études, introductions, etc.

In the third section of the fourth division of his Lehr von der musikalischen Komposition, Marx further gives formulas, or types, of the harmonic distribution of this kind of composition; and in the earlier part of the second volume (Bk. 3) of the same work he discusses the details of the structure at length.

To this classification there appear to be two main objections. The first is the choice of the distinctive name 'Lied' for a form which comprises dances, marches, and other alien forms of music. Were there nothing else to say against it, it would certainly jar against our sense of fitness to have to speak of the funeral march in the Eroica Symphony, or the Scherzo of the Ninth Symphony, or even of far less conspicuously alien examples, such as the waltz in the 'Freischütz,' or a minuet of Haydn or Mozart, as in 'Lied-form.'

The other objection to the classification is its vagueness when formulated in such an empirical way; but in order to understand fully both this objection and the former it will be necessary to go somewhat deeper into the matter.

In every artistic whole there must be balance and proportion. In musical works this is chiefly obtained by the grouping of harmonies. An artistic whole may be obtained in one key by throwing stress first upon one harmonic centre, passing from that to one which represents an opposite phase, and then passing back to the original again. In the article Harmony it has been pointed out that the harmonies of the Tonic and the Dominant represent the most complete opposition of phase in the diatonic series of any key; the most perfect simple balance is therefore to be found in their alternation. For example, the first fifteen bars of the Trio in the Scherzo of Beethoven's Symphony in A form is a complete artistic whole of themselves. There are six bars of Tonic harmony and one of Dominant forming the first group, and then six of Dominant harmony followed by one of Tonic harmony forming the second group. The balance is perfect, and the form the simplest in all music; and it might reasonably be called the 'simple primary form.' It is to be found in the most diverse quarters, such as single chants of the Anglican Church, sailors' hornpipes, German popular waltzes and Landler, and the trivial snatches of tunes in a French opéra-bouffe. The manner of obtaining the balance is, however, not necessarily restricted to the above order; for it is quite equally common to find each of the two groups containing a balance in themselves of Tonic and Dominant harmony. In that case the balance is obtained thus—\( CGCG \), instead of \( CGCG \) as in the former instance; but the principle which underlies them is the same, and justifies their being classed together. The subsidiary harmonies which are associated with these main groups are independent, but are most effective when they converge so as to direct attention to them. When greater extension is required, the balance is found between key and key; each key being severally distinguished by an alternation of harmonic roots, so as to be severally complete when they are to be a prominent part of the form. Subsidiary transitions occur much as the subsidiary harmonies in the preceding class, and must be regarded in the same light. The identity of principle in these two classes is obvious, since in both alike it consists of taking a definite point to start from, and marking it clearly; then passing to another point, which will afford the needed contrast, and returning to the original to conclude. But as in the latter class the process is complicated by the changes of key, it may best be distinguished from the former as 'complex primary form.'

It is not necessary to enter into details on the subject of the extent, treatment, and distribution of the keys; neither is it possible, since the principle when put upon this broad basis admits of very great variety, as indeed it is desirable that it should. But to guard against misapprehension, it may be as well to point out a few of the broadest facts.

In the first place, the several sections which serve to mark the elements of form need not be distinct and independent pieces, though they most frequently are so in the older opera and oratorio songs, and in the minuets and trios, or marches and trios, of instrumental music. In many examples, especially such as are on a small scale, there is no marked break in the continuity of the whole, the division at most amounting to nothing more than a cadence or half-close and a double bar, and often to not even so much as that. With regard to the distribution of ideas, it may be said that the several sections are often characterised by totally independent subjects, especially when the piece is on a large scale; but there are many examples, especially in the form of themes for variations, when, notwithstanding a certain freedom of
The occurrence of codas with this form is very common, but for the discussion of that point reference must be made to the article under that head and to the article Form.

Finally, it will be well to return shortly to the consideration of the distinctive name of 'Lied' which has been given to this form. In the choice of it, its author was probably guided by a well-grounded opinion of the superior antiquity of song to other kinds of music, which led him to infer that the instrumental forms which he put under the same category were imitated from the 'Lieder.' But this is not by any means inevitable. It will have been seen from the above discussion that in this form the simplest means of arriving at artistic balance and proportion are made use of; and these would have been chosen by the instinct of the earliest composers of instrumental music without any necessary knowledge that vocal music was cast in the same mould. And there is more than this. In songs and other vocal music the hearer is so far guided by the sense of the words that a total impression of completeness may be obtained even with very vague structure in the music; whereas in instrumental music, unless the form is clear and appreciably defined, it is impossible for the most intelligent hearer to realise the work as a whole. So that, in point of fact, vocal music can do without a great deal of that which is vital to instrumental music; and therefore the Lied is just the member of the group which it is least satisfactory to take as the type: but as this form has been classified under that head, it has been necessary so to review it fully, in order that a just estimation may be formed of its nature, and the reason for taking exception to the title. The form itself is a very important one, but inasmuch as it admits of great latitude in treatment, it appears that the only satisfactory means of classifying it, or making it explicable, is by putting it on as broad a basis as possible, and giving it a distinctive title which shall have reference to its intrinsic constitution, and not to one of the many kinds of music which may, but need not necessarily, come within its scope. C. H. H. R.

LIED OHNE WORTE, i.e. Song without words (Fr. Romance sans paroles), Mendelssohn's title for the pianoforte pieces which are more closely associated with his name than any other of his compositions. The title exactly describes them. They are just songs. They have no words, but the meaning is none the less definite—I wish I were with you,' says he to his sister Fanny in sending her from Munich to the earliest of these compositions which we possess—but as that is impossible, I have written a song for you expressive of my wishes and thoughts. The pieces are not Nocturnes, or Transcripts, or Études. They contain no bravura; everything is subordinated to the wish or the thought which filled the heart of the composer at the moment.

The title first appears in a letter of Fanny Mendelssohn's, Dec. 8, 1828, which implies that Felix had but recently begun to write such pieces. But the English equivalent was not settled without difficulty. The day after his arrival in London, on April 24, 1832, he played the first six to Moscheles, and they are then spoken of as 'Instrumental Lieder fur Clavier.' On the autograph of the first book, in Mr. Felix Moscheles' possession, they are named 'Six songs for the Pianoforte alone,' and this again was afterwards changed to 'Original Melodies for the Pianoforte,' under which title the first book was published (for the author) by Alfred Novello (then in Frith Street), on August 20, 1832, and registered at Stationers' Hall. No opus-number is given on the English copy, though there can be no doubt that Mendelssohn arranged it himself in every particular. The book appeared concurrently in Berlin, at Simrock's, as 'Sechs Lieder ohne Worte, etc. op. 19.' The German name afterwards became current in England, and was added to the English title-page (see below).

The last of the six songs contained in the

1 Letters from Italy and Switzerland, June 14, 1830.
2 See Sonata, Oct. 15, 1941.
3 The 'Romance' (op. 63) was originally a Lied ohne Worte (MS. Oct. No. 294).
4 See the Translation of the Life of Moscheles, 1. 267, for this and the following fact.
5 There are two opus 19, a set of six songs with words, and a set of six without them.
first book—'In a Gondola,' or 'Venetianisches Gondellied'—is said to be the earliest of the six in point of date. In Mendelssohn's MS. catalogue it is marked 'Venedig, 16th Oct., 1830, für Delphine Schauroth'—a distinguished musician of Munich, whom he had left only a few weeks before, and to whom he afterwards dedicated his first PF. Concerto. An earlier one still is No. 2 of Book 2, which was sent from Munich to his sister Fanny in a letter dated June 26, 1830. [The second book was called 'Six Romances for the Pianoforte,' a change of title probably necessitated by the fact that this book was published by Lavena, not Novello. It was entered at Stationers' Hall in 1835. Book 3 (Novello, 1837 or 1838) has a similar title to Book 1; but bears at the top of the title-page the words 'The celebrated Lieder ohne Worte,' this being the first employment of the German name. F. G. E.]

Strange as it may seem, the success of the Lieder ohne Worte was but slow in England. The books of Messrs. Novello & Co., for 1836, show that only 114 copies of Book 1 were sold in the first four years.1 Six books, each containing six songs, were published during Mendelssohn's lifetime, numbered as opp. 19, 30, 38, 53, 62, and 67, respectively; and a seventh and eighth (opp. 85 and 102) since his death. A few of them have titles, viz., the Gondola song already mentioned; another 'Venetianisches Gondellied,' op. 30, No. 6; 'Duett,' op. 38, No. 6; 'Volkssied,' op. 53, No. 5; a third 'Venetianisches Gondellied,' and a 'Frühlingslied,' op. 62, Nos. 5 and 6. These titles are his own. Names have been given to some of the other songs. Thus op. 19, No. 2, is called 'Jägerlied' or Hunting-Song; op. 62, No. 3, 'Trauermarsch' or Funeral march; op. 67, No. 3, 'Spinnerlied' or Spinning-Song; but these, appropriate or not, are unauthorised. (See Mendelssohn.)

LIEDERKREIS, LIEDERCYCLUS, or LIEDERREIF. A circle or series of songs, relating to the same object and forming one piece of music. The first instance of the thing and the first use of the word appears to be in Beethoven's op. 98, 'An die ferne Geliebte. Ein Liederkreis von Al. Jetteles.' Für Gesang und Pianoforte... von L. van Beethoven. This consists of six songs, was composed April 1816, and published in the following December. The word Liederkreis appears first on the printed copy. Beethoven's title on the autograph is 'An die enereate Geliebte, Sechs Lieder von Aloys Jetteles,' etc. It was followed by Schubert's 2 'Die schöne Müllerin, ein Cyclops von Liedern,' twenty songs, composed 1823, and published March 1824. Schubert's two other series, the 'Winterreise' and the 'Schwanengesang,' have not the special title. Schumann has left several Liederkreis—by Heine (op. 24); by Eichendorff (op. 39); 'Dichterliebe, Lieder-Cyclus' (op. 48); 'Liederreise' von J. Kern (op. 35); 'Frauenlieb und Leben' (op. 42). Of all these Beethoven's most faithfully answers to the name. The songs change their tempo, but there is no break, and the motif of the first reappears in the last, and closes the circle. Thayer's conjecture (iii. 401) that in writing it Beethoven was inspired by Amalie von Sebad, whom he had met at Linz in 1811, is not improbably correct. He was then forty-five years old, an age at which love is apt to be dangerously permanent. [Of later song-cycles, the following are among the best known: Brahms's 'Magelone-Lieder,' and von Fielitz's 'Elliland'; Sullivan's setting of Tenneyson's 'The Window, or the loves of the Wrens'; Stanford's quartet-cycle from the same poet's Princess; and Somervell's song-cycle of lyrics from Maud. Elgar's 'Sea Pictures,' and many other song-cycles, are anomalous in that the words are not all by the same hand; but R. Vaughan Williams's fine series of songs from Rossetti's House of Life fulfils the recognised condition.]

LIEDERSPIEL, a play with songs introduced into it, such songs being either well-known and favourite airs—Lieder—or, if original, cast in that form. It is the German equivalent of the French Vaudeville, and of such English pieces as the 'Beggar's Opera,' the 'Waterman,' etc. The thing and the name are both due to J. F. Reichardt, whose 'Lieb' und Treue' was the first Liederspiel. It was an attempt to bring back the musical stage of Germany from artifice to natural sentiment. Reichardt's interesting account of his experiment and the reasons which led to it, will be found in the Allg. mus. Zeitung, 1801 (709-717). Strange and anomalous as such a thrusting of music into the midst of declamation may seem, the attempt was successful in Germany, as it had been in England fifty years before. The tunes could be recognised and enjoyed without effort, and the Liederspiel had a long popularity. After Reichardt, Himmel, Lortzing, Bervein, and a number of other second-class writers composed Liederspiel which were very popular and they even still are to be heard.—Mendelssohn often speaks of his 'Heimkehr' ('Son and Stranger') as a Liederspiel, but that can only be by an extension of the phrase beyond its original meaning.

LIEDERTAFEL, originally a society of men, who met together on fixed evenings for the practice of vocal music in four parts, drinking forming part of the entertainment. These clubs arose during the political depression caused by Napoleon's rule in Germany; and the first, consisting of twenty-four members only, was
founded by Zelter in Berlin, Dec. 28, 1808. Others soon followed at Frankfort and Leipzig, gradually relaxing the rules as to numbers. Bernhard Klein founded the 'Jüngere Berliner Liedertafel,' which aimed at a higher standard of art. These societies gave an immense impetus to men's part-singing throughout Germany. Since the establishment of the Männergesangvereine proper (male singing-societies), the word Liedertafel has come to mean a social gathering of the 'Verein,' i.e., a gathering of invited ladies and gentlemen, at which the members perform pieces previously learned. They are in fact informal concerts, where the guests move about, eat, drink, and talk as they please, provided they keep silence during the singing. The Liedertafeln of the large male singing-societies of Vienna, Munich, and Cologne, are pleasant and refined entertainments, not without a musical significance of their own.

F. G.

LIFE FOR THE TSAR, A. Opera in four acts and an epilogue, text by Baron Rosen, music by Olinka. Produced at St. Petersburg, Nov. 27, 1836. At Covent Garden (in Italian as La Vita per lo Czar), July 12, 1857. At the theatre in Great Queen Street (in Russian) in 1887.

LIFE LET US CHERISH. A favourite German song, commencing 'Freut euch des Lebens,' the author of which is Martin Usteri of Zurich; first published in the Göttinger Musenalmanach for 1798 without the author's name. The music was written in 1798 by Hans Georg Nageli. It is used as subject for the elaborate variations which form the last movement of Woolf's celebrated sonata called 'Non plus ultra.'

F. M.

The melody is frequently but erroneously attributed to Mozart, probably in the first instance by its inclusion in a Collection of Original songs . . . for the Pianoforte or Harp composed by W. A. Mozart, etc., etc., the poetry by Peter Pindar, Esq. (London, Broderip & Wilkinson, circa 1800). Peter Pindar's words are entitled 'The Adieu' ("O faithless maid adieu"); but about this time there were also numerous translations of the original German words, the most common of which was 'Taste Life's Glad Moments' by Sir Alex. Boswell. For the first fifty years of its introduction into England it had an unfortunate existence as an elementary lesson for the flute, after which it suffered equally on the pianoforte.

F. K.

LIGATOSTIL (Ital. Stile ligato), also called gebundener Stil, is the German term for what is called the strict style, as distinguished from the free style of musical composition. Its chief characteristic lies not so much in the fact that the notes are seldom or never detached, as that all dissonances are strictly prepared by means of tied notes.

F. T.

LIGATURE, i. (Lat. Ligatura; Ital. Legatura; Fr. Liaison). A passage of two or more notes, sung to a single syllable. [See Notation.]

LIGATURE, ii. (in reed instruments). The flexible metal band regulated by two adjusting screws, which is used to secure the reed to the mouthpiece in instruments such as the clarinet and the saxophone. In former days the reed was held in position merely by a binding of waxed thread.

D. J. H.

LIGHT, Edward, a musician who claimed the invention of the harp-lute and a kindred instrument named the Apollo-lyre. The harp-lute, known also as the dital harp (see HARPLUTE, ante, pp. 227-28), was popular at the junction of the 18th and 19th centuries, and the Apollo-lyre less so. The latter took the form of the ancient instrument, but it had a centre finger-board and a sound chamber. In 1794 Light was living at Kensington, and about this period he was making the above two instruments for sale. He soon removed to 8 Foley Place, Cavendish Square, and was "lyrist to the Princess of Wales." In 1818 he took out a patent in connection with the harp-lute which shortly after this date was made by Wheatstone & Co. Light was a teacher of the guitar, and arranged some music for it. He published a number of works, being arrangements and instructions for the harp-lute, Apollo-lyre, and for the guitar.

F. K.

LIGHT OF THE WORLD, THE. An oratorio in two parts; the words compiled from the Scriptures, the music by Arthur Sullivan. Written for the Birmingham Festival, and first performed there August 27, 1873.

LILIENCRON, RICHARD FREIHERR VON, was born at Plön in Holstein, Dec. 8, 1820. After going through a course of theology and law at Kiel and Berlin, and graduating both as Doctor of Theology and Philosophy, he devoted himself chiefly to Germanistic studies, including Old Norse languages and literature, on which he contributed various essays to periodicals. From 1848 to 1850 he was in the diplomatic service of the Schleswig-Holstein Government during the war with Denmark. In 1850 he became Professor of Old Norse languages and literature at Kiel, and in 1852 of 'Germanistik' at Jena. From 1855 to 1868 he was Geheimer Kabinettsrat (Privy Cabinet Councillor) to the Duke of Meiningen. In 1855 he published 'Lieder und Sprüche aus der letzten Zeit des Minnesangs,' containing twenty melodies with texts from the celebrated Jena Minnesinger codex, written about 1320. Dr. Wilhelm Stade of Jena provided the melodies with a modern setting in four-part harmony. Liliencron afterwards settled at Munich as Editor of the Allgemeine Deutsche Biographie, of which from 1854 up to the present, fifty volumes have appeared. It was also during his stay at Munich that he published Dec...
historischen Volkslieder der Deutschen vom 13.-16. Jahrh., in five volumes (1865-69), the last volume containing valuable notes on the old tunes, besides eighteen polyphonic settings of some of them by H. Isaac, Senfl, H. Finck, Mahn, and others. For Kürschner's Deutsche National-Literatur, Bd. 13 (1884), he published Deutsches Leben im Volkslied von 1550, which contains 147 Volkslieder of the 16th-century texts and melodies. From 1876 Lilienron has chiefly resided at Schleswig as Prätlat des St. Johannissitzen. Latterly, he has occupied himself much with the question of church music. Besides contributing various essays on the subject to Sionia and other Church and musical periodicals, he published in 1893, Liturgisch-musikalische Geschichte der evangel.-Lutherischen Gottesdienste von 1523 bis 1700, which is a valuable sketch of the history of Lutheran Church-music from the liturgical point of view up to the rise of the form of Church-Cantata as perfected by Sebastian Bach. It is based on a thorough liturgical as well as musical knowledge, and is in effect a plea for the closer welding of music with the liturgy by a return to the older forms of liturgical music. Practical proposals to the same effect are embodied in a more recent work, entitled Chorordnung für die Sonn- und Festtage des evangel. Kirchenjahres (Gutersloh, 1900). The task of providing a musical setting for the liturgical texts contained in this work in accordance with the author's principles, he has entrusted to a Berlin musician, H. van Eyken. Three parts have appeared up to the present, published by Breitkopf & Härtel, and a fourth is in preparation. Another historically-musical work by Lilienron of some importance is Die Horazischen Motoren in deutschen Komponisten des 16ten Jahrhunderts, which includes nineteen Odes of Horace as set in simple note-for-note counterpoint, and in accordance with metrical principles by Tritonius, Senfl, and Hofnauer respectively. An edition of these settings in modern score has also been published (Breitkopf & Härtel). Among more recent works of Lilienron may be mentioned a novel, Wie man in Amoral Musik macht (1903), written to further the cause of reform in Church-music which the author has so much at heart. Mention may also be made of an earlier writing on the Danish composer, C. E. F. Weyse, and Danish music generally (1878). It should also be added that von Lilienron is now the President of the Royal Prussian Commission for the editing and publication of the Denkmäler Deutscher Tonkünst, of which twenty-two volumes have now appeared.

J. R. M.

LILLE (Nord). One of the most important of the Conservatoires of provincial France (suc- cursales of the Paris Conservatoire), was founded under the title of 'Académie royale de musique' in 1816, with classes for singing and solfege, to which, in 1821, were added classes for violoncello and wind instruments. In 1826 the Académie became affiliated to the Ecole royale de Paris, and new classes for violin, clarinet, bassoon, and pianoforte, were formed. In 1852-1853 the institution was completely organised, and developed rapidly under the direction of Victor Magnien, professor of music at Beauvais, who added classes for horn, flute, oboe, cornet, trumpet, saxophone, harmony, and ensemble singing. Under his active and intelligent direction the number of pupils rose to 475. His successor, Ferdinand Lavaine, piano professor from 1832, formed, from materials available in the school, a concert society which gave several grand performances of large works, but could not be permanently maintained. Classes for dramatic singing shortly afterwards completed the curriculum of the school. M. Emile Ratez (born 1851 at Besançon), who has been director of the school since 1891, has raised the Lille Conservatoire to its highest point; at the present day it is the most flourishing and important of the music-schools of France outside Paris. M. Ratez established classes for harp, organ, viola, and re-established the concert society. The number of pupils is at present 350, of both sexes; the subvention of the institution, contributed by the town, the department, and the state, is 43,000 francs a year.

M. K.

LILLIBURLERO. 'The following rhymes,' says Dr. Percy, 'slight and insignificant as they may now seem, had once a more powerful effect than either the Philippians of Demosthenes or Cicero; and contributed not a little towards the great revolution of 1688.' Bishop Burnet says: 'A foolish ballad was made at that time, treating the papists, and chiefly the Irish, in a very ridiculous manner, which had a burden said to be Irish words, "Lero, lero, lilliburlero," that made an impression on the [king's] army, that cannot be imagined by those that saw it not. The whole army, and at last the people both in city and country, were singing it perpetually. And perhaps never had so slight a thing so great an effect.' [The tune is said to have been known in Ireland as early as the first quarter of the 17th century, and as, on its inclusion in The Delightful Companion (1686) and Musick's Handmaid, pt. ii. (1689), it is called 'A New Irish Tune,' Purcell's claim to have composed it must be considered very doubtful. See Chappell's Popular Music of the Olden Time (1893), where the editor, Professor Wooldridge, supports Purcell's claim as the composer.]

Henry Purcell, the composer of the tune, here receives no share of the credit, of which nine-tenths, at least, belong to him. The song was first taken up by the army, because the tune was already familiar as a quick-step to which the soldiers had been in the habit of
marching. Then the catching air was repeated by others, and it has retained its popularity down to the present time. As the march and quick-step have not been reprinted since 1686, although by Henry Purcell, it is well that, at last, they should reappear. The only extant copy of both is in The Delightful Companion: or, Choice New Lessons for the Recorder or Flute, 2nd ed. 1686, oblong quarto. As this little book is engraved upon plates, and not set up in types, as then more usual, and this march and quick-step are on sheet F, in the middle of the book, we may reasonably assume that they were included in the first edition also, which cannot be less than a year or two earlier in date.

March.

The words are the merest doggerel. They refer to King James's having nominated to the lieutenancy of Ireland, in 1687, General Talbot, newly created Earl of Tyrconnel, who had recommended himself to his biassed master by his arbitrary treatment of the Protestants in the preceding year, when he was only lieutenant-general. One stanza as sung to the tune may suffice. After that, the two lines of new words only are given:

Ho! by shanty Tyburn, it is de Talbote, And he will cut all de English route. 

Dough by my shoul de English do praat, De law's on dare side, and Creish knows what.

But if diligence come from de pope, We'll hang Macqua Chartra, and dem in a rope: For de good Talbot is made a lord 
And with brave lads is coming aboard: Who all in France have taken a sware Dat day will have no protestant heir.

And why does he stay behind? Ho! by my shoul 'tis a protestant wind.

But see, de Tyrconnel is now come ashore, And we shall have commiscious gillora, And he dat will not go to mass Shall be torn out, and look like an ass.

But now de hereticks all go down, By Creish and shaint Patrick, de nation's own.

Dare was an old prophecy found in a bog, 'Ireland shall be ruled by an ass, and a dog.'

And now dis prophecy is come to pass, For Talbot's de dog, and Ju... es is de ass.

Such stuff as this would not have been tolerable without a good tune to carry it down. And yet Lord Wharton has had the entire credit: 'A late viceroy, who has so often boasted himself upon his talent for mischief, invention, lying, and for making a certain Lilliburlero song; with which, if you will believe himself, he sung a deluded prince out of three kingdoms.'

From this political beginning 'Lilliburlero' became a party tune in Ireland, especially after 'Dublin's Deliverance: or the Surrender of Drogheda,' beginning:

Protestant boys, good tidings I bring, and 'Undaunted Londonderry,' commencing:

Protestant boys, both valiant and stout, had been written to it.

It was discontinued as a march in the second half of the 18th century, in order to avoid offence to our Irish soldiers of the Roman Catholic faith.

The tune has been often referred to by dramatists and by other writers, as by Shadwell and Vanbrugh in plays, and by Sterne in Tristram Shandy. It appears as 'A new Irish tune' by 'H. Purcell' in the second part of Music's Handmaid, 1689; and in 1691 he used it as a ground-bass to the fifth piece in The Gordian Knot untied. The first strain has been commonly sung as a chorus in convivial parties:

A very good song, and very well sung, Jolly companions every one.

And it is the tune to the nursery rhyme:

There was an old woman tossed up on a blanket 

A large number of other songs have been written to the air at various times. W. C. The following additions throw light on various points in the vexed question of the origin of the song:

---

1 [The quick-step had, however, appeared in An Antidote against Melancholy, 1661.]

2 A True Relation of the several Facts and Circumstances of the intended Riot and Tumult on Queen Elizabeth's Birthday. Third edition, 1712.
The evidence quoted above in support of the theory that Purcell composed the tune is clearly very slight, as in collections of the kind referred to the name of a well-known composer was often attached to tunes with which he had little or nothing to do. 'Lilliburlero' is called 'A new Irish tune' in the very place where Purcell's name is attached to it; and the fact that he used it as a bass proves nothing as to his authorship, for he also used the tune 'Cold and Raw' in the same way in the Ode for the Queen's Birthday, 1692. It is curious that these two tunes should have a further bond of connection; for the tune of 'Cold and Raw,' or 'Stingo,' was attached to the words of 'Lilliburlero,' in a version similar to that given above, as early as 1688, in a broadside now in the Bodleian Library, formerly in the possession of Antony Wood.

A New Song.
From a broadside, Bodleian Library.

No brother Teague, etc.

The name 'Lilliburlero' was first appended to the major tune in 1690, in the 5th edition of the Dancing Master, and the 6th of Apollo's Banquet.

As far back as the first quarter of the 17th century the tune given above was sung to an Irish nursery-song entitled 'Cailleach a thussa,' and soon found its way to England, where it became popular in a variant known as 'Joan's Placket,' referred to by Pepys under date June 22, 1667. No satisfactory translation of the word 'Lilliburlero' is forthcoming, unless we accept 'lero' as laochrocht, champions, but the words 'builin (or bullin) la' are said to mean 'strike the ball,' to be taken from a game of the football kind. The tune was printed for the first time in 1655, in '180 Loyal Songs,' it was subsequently set to various songs, and often introduced upon the stage. w. h. g. f.

LILT (verb and noun), to sing, pipe, or play cheerfully, or, according to one authority, even sadly; also, a gay tune. The term, which is of Scottish origin, but is used in Ireland, and occurs in Chaucer, would seem to be derived from the bagpipe, one variety of which is described in the 'Houlate' (an ancient allegorical Scottish poem dating 1450), as the 'Lilt-pipe.' Whenever, in the absence of a musical instrument to play for dancing, the Irish peasant girls sing lively airs to the customary syllables la-la-la, it is called 'liling.' The classical occurrence of the word is in the Scottish song, 'The Flowers of the Forest,' a lament for the disastrous field of Flodden, where it is contrasted with a mournful tune:—

I've heard them lillin' at the ew¢ milkin',
Lasses a lillin' before dawn of day;
Now there's a noo nin on ilk¢ green laillin',
The Flowers of the Forest are at wees a way.

The Skene MS., ascribed (though not conclusively) to the reign of James VI. of Scotland, contains six lills: 'Ladie Rothemayes' (the air to the ballad of the Burning of Castle Frindraught), 'Lady Laudians' (Lothian's), 'Ladie Cassilles' (the air of the ballad of Johnny Fae), Lesleis, Adernees, and Gilreich's Lills. We quote 'Ladie Cassilles':—

W. Dauney, editor of the Skene MS., supposes the Liltpipe to have been a shepherd's pipe, not a bagpipe, and the Lills to have sprung from the pastoral districts of the Lowlands. E. P. S.

LILY OF KILLARNEY. A grand opera in three acts, founded on Boucicault's 'Colleen Bawn'; the words by John Oxenford, the music by Jules Benedict. Produced at the Royal English Opera, Covent Garden, Feb. 8, 1882.

LIMPUS, RICHARD, organist, born at Isleworth, Sept. 10, 1824, was a pupil of the Royal Academy of Music, and organist successively of Drury Hall; of St. Andrew's, Undershaft; and St. Michael's, Cornhill. He composed a good deal of minor music, but his claim to remembrance is as one of the founders of the College of Organists, which, owing to his zeal and devotion, was established in 1884. He was secretary to the College till his death, March 15, 1875. [See Royal College of Organists.]

LINCKE, JOSEPH, eminent violoncellist and composer, born June 8, 1783, at Trachenberg in Prussian Silesia; learnt the violin from his father, a violinist in the chapel of Prince Hatzfeld, and the violoncello from Oswald. A mismanaged sprain of the right ankle left him lame for life. At ten he lost his parents, and was obliged to support himself by copying music, until in 1809 he procured a place as violinist in the Dominican convent at Breslau. There he studied the organ and harmony under Hanisch, and also pursued the violoncello under

1 See W. Chappell's criticium, Popular Music, p. 614.
2 He always wrote his name thus, though it is usually spelt Lincke.
3 It is perhaps in allusion to this that Bernard writes, 'Lincke has only one fault—that he is crooked' (Arnou).
lose, after whose departure he became first violoncellist at the theatre, of which C. M. von Weber was then capellmeister. In 1808 he went to Vienna, and was engaged by Prince Rasomowsky for his private quartet-party, at the suggestion of Schuppanzigh. In that house, where Beethoven was supreme, he had the opportunity of playing the great composer's works under his own supervision. Beethoven was much attached to Lincke, and continually calls him 'Zunftmeister violoncello,' or some other droll name, in his letters. The Imperial Library at Berlin contains a comic canon in Beethoven's writing on the names Brauchle and Lincke.

The two Sonatas for PF. and Violoncello (op. 102) were composed by Beethoven while he and Lincke were together at the Erdidys, in 1815. Lincke played in Schuppanzigh's public quarters, and Schuppanzigh in turn assisted Lincke at his farewell concert, when the programme consisted entirely of Beethoven's music, and the great composer himself was present. His playing appears to have been remarkable for its humour, and he is said to have been peculiarly happy in expressing Beethoven's characteristic style, whence no doubt the master's fondness for him. He then went to Gratz, and from thence to Pancevecz near Agram, the residence of Countess Erdidy, as her chamber-virtuoso, where he remained a year and a half. In 1818 he was engaged by Freiherr von Braun as first violoncellist in the theatre 'an der Wien,' and in 1833, played with Merk, the distinguished violoncellist, in the orchestra of the court-opera. He died on March 26, 1837. His compositions consist of concertos, variations, capriccios, etc., his first three works only (variations) having been published. C. F. P.

Lincoln Festival. See Festivals, ante, p. 209.

Lincoln, Henry Cephias, born 1789 and died 1864, was an organ-builder in London. He built the organ in the Pavilion, Brighton, which is now in Buckingham Palace. V. DE P.

His son, Henry John Lincoln, born Oct. 15, 1814, in London, began as organist of Christ Church, Woburn Square, and from 1846 was employed upon the Daily News, succeeding G. Hogarth as its critic in 1866, and retaining the post till 1886. He lectured frequently on musical subjects, in London, Edinburgh, Glasgow, Manchester, Liverpool, etc. In a lecture on Mendelssohn, at the Western Literary Institution, on Dec. 23, 1845, that master's violin concerto was played for the first time in England, by Herr Kreutzer, with Lincoln at the piano-forte. He died at Hampstead, August 16, 1901. (Brit. Mus. Biog.)

Lincoln's Inn Fields Theatre stood nearly in the centre of the south side of Lincoln's Inn Fields, the principal entrance being in Portland Street. It was erected by Christopher Rich, and opened (after his death) in 1714 by his son, John Rich, with Farquhar's comedy, 'The Recruiting Officer.' Here Rich first introduced his pantomimes, a curious mixture of masque and harlequinade, in which he himself, under the name of Lun, performed the part of Harlequin. Gailliard was his composer, and Pepusch his music director. [Gal- liard; Pepusch.] Here 'The Beggar's Opera' was first produced in 1727. [Beggar's Opera.] Rich removing in 1732 to the new theatre in Covent Garden, the house in Lincoln's Inn Fields was let for a variety of purposes. Here in 1734 Italian operas were given, in opposition to Handel's at the King's Theatre, with Porpora as composer and Senesino as principal singer; and here, when Handel was compelled to quit the King's Theatre, he, in his turn, gave Italian operas, and also, occasionally, oratorio performances. His 'Dryden's Ode on St. Cecilia's Day' was first performed here in 1739, and in 1740 his 'L'Allegro, Il Pensieroso, ed Il Moderato,' his serenata 'Parissio in Festa,' and his operetta 'Hymen.' Plays were occasionally performed here until 1756, when the building was converted into a barracks. It was afterwards occupied as Spode and Copeland's 'Salopian China Warehouse,' until it was taken down in 1848 for the enlargement of the College of Surgeons. This theatre must not be confounded with two others which previously stood near the same spot, viz. the Duke's Theatre, erected by Sir William Davenport in 1662, and occupied until 1671, when the company removed to the Theatre, and the Theatre in Little Lincoln's Inn Fields, built upon the same site and opened in 1695 with Congreve's 'Love for Love,' and occupied until the company removed to the Queen's Theatre in 1706, when it was abandoned. [King's Theatre.] W. H.

Lind, Jenny, was born at Stockholm, Oct. 6, 1820. When she was nine years old, Count Puke, director of the Court Theatre, admitted her to the school of singing which is attached to that establishment, and she received there her first lessons from the singing-master and Court secretary, Crolius, and subsequently from a master named Berg. After appearing in children's parts from 1830 onwards, she made her debut at the Opera in her native city, March 7, 1838, as Agatha in Weber's 'Freischütz,' and played afterwards the principal

1 Weiss played the viola, and the Prince the second violin.

rôle in 'Euryanthe,' Alice in 'Robert le Diable,' and finally 'La Vestale,' all with brilliant success. [In 1840 she was made a member of the Royal Swedish Academy of Music, and was appointed court singer.] She upheld the Royal Theatre until July 1841, when she went to Paris in hope of improving her style of singing. There Manuel Garcia, after expressing the opinion that her voice had been worn out by faulty method and overwork, ultimately gave her lessons, during a period of eleven months, but she herself mainly contributed to the development of her naturally harsh and unbending voice, by ever holding before herself the ideal which she had formed from a very early age. She had been wont to sing to her mother's friends from her third year; and, even at that period, the intense feeling of melancholy, almost natural to all Swedes, which filled her young soul, gave to her voice an expression which drew tears from the listeners. Meyerbeer, who happened to be at Paris at the time, heard her, was delighted, and foretold a brilliant future for the young singer. [He arranged a private 'audition' for her at the Opéra, and recommended her for the opera at Berlin. She returned to Stockholm for two years, and in 1844 went to Dresden, to study German.] In September she returned to Stockholm, and took part in the fêtes at the crowning of King Oscar; but went to Berlin in October, and obtained an engagement at the Opera through the influence of Meyerbeer, who had written for her the principal rôle in his 'Fellilager in Schlesien,' afterwards remodelled as 'L'Étoile du Nord.' She appeared first, Dec. 15, as Norma, and was welcomed with enthusiasm; and afterwards played, with equal success, her part in Meyerbeer's new opera. She also appeared as Euryanthe, and in 'La Sonnambula.' In the following spring she sang at Hanover and Hamburg. After this tour she returned again to Stockholm and once more enjoyed a triumphant success. [She sang before Queen Victoria and Prince Albert at Stockholm in the following August, and appeared at Frankfort, Darmstadt, and Copenhagen; she was again in Berlin in the winter, appearing in the parts of Donna Anna, Agatha, the Vestal, and Valentine in 'Les Huguenots.'] At the Gewandhaus, Leipzig, she made her first appearance, Dec. 4, 1845. Engaged soon after for Vienna, she appeared there April 22, 1846, and at Whitsuntide of the same year, sang in the Niederheinische Fest at Aix-la-Chapelle, appearing at Hanover and Hamburg in the summer. After engagements at Darmstadt, Munich, Stuttgart, and various cities of South Germany in the autumn, she returned to Vienna and added La Figlia del Reggimento to her list of characters.

Difficulties had arisen between the two London managers, Dunn and Lumley, as to the validity of a contract which Jenny Lind had been induced to sign with the former; and it was not until May 4, 1847, that she appeared at Her Majesty's Theatre, in 'Robert.' Moscheles had already met her in Berlin, and wrote thus (Jan. 10, 1845) of her performances in 'The Camp of Silesia,'—'Jenny Lind has fairly enchanted me; she is unique in her way, and her song with two concertante flutes is perhaps the most incredible feat in the way of bravura singing that can possibly be heard. . . . How lucky I was to find her at home! What a glorious singer she is, and so unpretentious withal!' This character, though true to life, was, however, shamefully belied by the management of the London Theatre, both before and after her arrival. It is curious now to look back upon the artifices employed, the stories of broken contracts (this not without some foundation), of long diplomatic pourparlers, special messengers, persuasion, hesitation, and vacillations, kept up during many months,—all in order to excite the interest of the operatic public. Not a stone was left unturned, not a trait of the young singer's character, public or private, unexploited, by which sympathy admiration, or even curiosity, might be aroused (see Lumley's Reminiscences, 1847). After appearing as the heroine of a novel (The Home by Frederika Bremer), and the darling of the Opera at Stockholm, she was next described as entrancing the opera-goers of Berlin; and her praises had been sung by the two great German composers, and had not lost by translation. But, not content with fulsome praise founded on these circumstances, the paragraphists, inspired of course by those for whose interest the paragraphs were manufactured, and assuredly without her knowledge or sanction, did not hesitate to speak in the most open way,—and as if in commendation of her as a singer, and above other singers,—of Mlle. Lind's private virtues, and even of her charities. Singers have ever been charitable, generous, open-handed, and open-hearted; to their credit be it recorded: the exceptions have been few. With their private virtues critics have nought to do; these should be supposed to exist, unless the contrary be glaringly apparent. The public was, however, persistently fed with these advertisements and harassed with further rumours of doubts and even disappointment in the early part of 1847, it being actually stated that the negotiations had broken down,—all after the engagements had been signed and sealed!

The interest and excitement of the public at her first appearance was, therefore, extraordinary; and no wonder that it was so. Yet her great singing in the part of Alice disappointed none but a very few; and those were silenced by a tumultuous majority of idolators. She certainly sang the music splendidly, and acted the part irreproachably. The scene at the cross in the second act was in itself a complete study, so strongly contrasted were the emotions she portrayed,—first terror, then childlike faith and
confidence,—while she preserved, throughout, the innocent manner of the peasant girl. "From that first moment till the end of that season, nothing else was thought about, nothing else talked about, but the new Alice—the new Sonnambula—the new Maria in Donizetti's charming comic opera,—his best. Pages could be filled by describing the excesses of the public. Since the days when the world fought for hours at the pit-door to see the seventh farewell of Siddons, nothing had been seen in the least approaching the scenes at the entrance of the theatre when Mile. Lind sang. Prices rose to a fabulous height. In short, the town, sacred and profane, went mad about "the Swedish nightingale" (Chorley). Ladies constantly sat on the stairs at the Opera, unable to penetrate farther into the house. Her voice, which then at its very best showed some signs of early wear, was a soprano of bright, thrilling, and remarkably symphatique quality, from b to g". The upper part of her register was rich and brilliant, and superior both in strength and purity to the lower. These two portions she managed, however, to unite in the most skillful way, moderating the power of her upper notes so as not to outshine the lower. She had also a wonderfully developed "length of breath," which enabled her to perform long and difficult passages with ease, and to fine down her tones to the softest pianissimo, while still maintaining the quality unvaried. Her execution was very great, her voice true and brilliant, her taste in ornament altogether original, and she usually invented her own cadence. In a song from "Beatrice di Tenda," she had a chromatic cadenza ascending to E in alt, and descending to the note whence it had arisen, which could scarcely be equalled for difficulty and perfection of execution. The following, sung by her at the end of "Ah! non giunge," was given to the present writer by an ear-witness:—

![Musical notation image]

In this comparatively simple cadenza, the highest notes, though rapidly struck, were not given in the manner of a shake, but were positively martelées, and produced an extraordinary effect. Another cadenza, which, according to Moscheles, 'elevated' them at the Gewandhaus, occurred three times in one of Chopin's Mazurkas:—

![Musical notation image]

[Ancient cadenza is given in the Musical Union Record for 1849, op. 8, and more in Jenny Lind, the Artist (see below.)]

'Lind...'

"What shall I say of Jenny Lind?" he writes again (1847): "I can find no words adequate to give you any real idea of the impression she has made... This is no short-lived fit of public enthusiasm. I wanted to know her off the stage as well as on; and, as she lives some distance from me, I asked her in a letter to fix upon an hour for me to call. Simple and unceremonious as she is, she came the next day herself, bringing her answer verbally. So much modesty and so much greatness united are seldom if ever to be met with; and, although her intimate friend Mendelssohn had given me an insight into the noble qualities of her character, I was surprised to find them so apparent." And again he speaks in the warmest terms of her, and subsequently of her and her husband together.

Meanwhile Mile. Lind maintained the mark which she had made in 'Robert,' by her impersonation of the Sonnambula, a most effective character,—"Lucia," Adina, in 'L'Elisir,' 'La Figlia del Reggimento,' and perhaps, altogether her best part, Giulia in Spontini's 'Vestale.' [She also created the part of Amalia in Verdi's 'I Masnadieri' (July 29), and sang that of Susanna in 'Figaro.'] In 1848 she returned to Her Majesty's Theatre, and added to these "Lucia di Lammermoor" and 'L'Elisir d'Amore.' In 1849 she announced her intention not to appear again on the stage, but so far modified this resolution as to sing at Her Majesty's Theatre in Mozart's 'Flauto Magico' arranged as a concert, without acting (April 12); the experiment was so unsuccessful that instead of similar concert performances previously announced, she gave six more operatic performances, appearing as Amina, Lucia, Maria, and Alice. Her last appearance on any stage took place in 'Roberto,' May 10, 1849. Henceforward she betook herself to the more congenial platform of the concert-room. How she sang there some of the present generation can still remember,—the wild, queer northern tones brought here by her, her careful expression of some of Mozart's great airs, her mastery over such a piece of execution as the Bird song in Haydn's 'Creation,' and lastly, the grandeur of inspiration with which the 'Sancta' of angels in Mendelssohn's 'Elijah' was led by her (the culminating point in that oratorio). These are the triumphs which will stamp her name in the Golden Book of singers (Chorley). On the other hand, the wondrous effect with which she sang a simple ballad, in the simplest possible manner, can never be forgotten by those who ever heard it. After another season in London, and a visit to Ireland in 1848, Mile. Lind was engaged by Barnum, the American speculator, to make a tour of the United States. She arrived there in 1850, and remained for nearly two years, during part of the time unfettered by an engagement with any impresario, but accompanied by Mr., afterwards Sir Julius, Benedict. The Americans, with their genius for apprecia-
LINDA DI CHAMOUNI

In 1827 he returned to Stockholm and there resided, giving singing-lessons and composing until his death, August 23, 1878.

Lindblad composed but little instrumental music; a symphony in C which was given under Mendelssohn's direction at one of the Gewandhaus Concerts at Leipzig in Nov. 1839, and a duo for pianoforte and violin (op. 9) are considered the best, but they aim so little at effect and are so full of the peculiar personality of their author that they can never be popular, and even his own countrymen are not familiar with them. It is his vocal compositions which have made him famous. He was eminently a national composer. He published a large collection of songs for voice and piano to Swedish words, which are full of melody, grace, and originality. Written for the most part in the minor mode, they are tinged with the melancholy which is characteristic of Swedish music. In such short songs as 'The Song of the Dalecarlian Maiden,' 'Lament,' 'The Wood by the Aar Lake,' etc., whose extreme simplicity is of the very essence of their charm, his success has been most conspicuous. In longer and more elaborate songs, where the simplicity at which he aimed in his accomplishment has limited the variety of harmony and figures, the effect is often marred by repetition and consequent monotony. Yet even in this class of work there are many beautiful exceptions, and 'A Day in Spring,' 'A Summer's Day,' and 'Autumn Evening,' are specially worthy of mention.

Jenny Lind, who was Lindblad's pupil, introduced his songs into Germany, and their rapidly acquired popularity earned for the author the title of 'the Schubert of the North.' His only opera, 'Frondäran,' was performed at Stockholm, 1835, and revived for the opening of the new opera-house there in 1898. Several of his duets, trios, and quartets have a considerable reputation in Sweden.

An analysis of Lindblad's Symphony will be found in the "Ally. Mus. Zeitung" for Oct. 22, 1839 (comp. col. 937 of the same volume). There is a pleasant reference to him, honourable to both parties alike, in Mendelssohn's letter of Dec. 28, 1833.

A. H. W.

LINDLEY, ROBERT, born at Rotherham, March 4, 1776, showed so early a predilection for music that when he was about five years of age, his father, an amateur performer, commenced teaching him the violin, and at nine years of age, the violoncello also. He continued to practise the latter until he was sixteen, when Cervetto, hearing him play, encouraged him and undertook his gratuitous instruction. He quitted Yorkshire and obtained an engagement at the Brighton theatre. In 1794 he succeeded Sperati as principal violoncello at the Opera and all the principal concerts, and retained undisputed possession of that position until his retirement in 1851.

LINDLEY

736 LINDA DI CHAMOUNI

tion and hospitality, welcomed her everywhere with frantic enthusiasm, and she made £20,000 in this progress. Here it was, in Boston, on Feb. 5, 1852, that she married Mr. Otto Goldschmidt. [GOLDSCHMIDT.]

Returned to Europe, Mrs. Goldschmidt now travelled through Holland, and again visited Germany. [Dresden was her home in 1852-55.] In 1856 she came once more to England, and for some years appeared frequently in oratorios and concerts. Her actual last appearance was at a concert for a charity at Malvern, July 23, 1883. In that year she accepted an appointment as teacher of singing at the Royal College of Music, which she held till 1886.

It must be recorded that the whole of her American earnings was devoted to founding and endowing art-scholarships and other charities in her native Sweden; while in England the country of her adoption, among other charities, she gave a whole hospital to Liverpool and a wing of another to London. In the winter of 1848-49, she raised a sum of £10,500 for charities. The scholarship founded in memory of her friend Felix Mendelssohn also benefited largely by her help and countenance; and it may be said with truth that her generosity and her sympathy were never appealed to in vain by those who had any just claims upon them. [MENDELSOHN SCHOLARSHIP.]

Madame Lind Goldschmidt was respected and admired by all who knew her, the mother of a family, mixing in society, but in no degree losing her vivid interest in music. The Bach Choir, conducted by Mr. Goldschmidt, which gave the English public the first opportunity of hearing its entirety the B minor Mass of that composer, profited in no small degree by the careful training bestowed on the female portion of the chorus by this great singer, and the enthusiasm inspired by her presence among them. She died at Wynd's Point, Malvern, Nov. 2, 1887. [In 1891 the memoir Jenny Lind, the Artist, by Canon H. Scott Holland and W. S. Rockstro, appeared in two volumes; a condensed edition appeared in 1893, and in 1894, Mr. Rockstro published a short record and criticism of her method, giving numerous cadenzas, etc. Many corrections in the above article have been made from the first of these books. On April 20, 1894, H.R.H. Princess Christian unveiled a medallion of Jenny Lind in Westminster Abbey. See Billroth's Studies in Music, p. 252.] J. M.

LINDA DI CHAMOUNI. Opera in three acts; words by Rossi, music by Donizetti. Produced at the Karntherther Theatre, Vienna, May 19, 1812; in Paris, Nov. 17, 1842; in London, at Her Majesty's, June 1843.

LINDBLAD, ADOLF FREDRIK, born near Stockholm, Feb. 1, 1801. This Swedish composer passed several years of his early life in Berlin, and studied music there under Zelter.
LINDNER

Dragonetti (see vol. i. p. 728) lasted for half a century. He was appointed professor of his instrument in the Royal Academy of Music, on its foundation in 1822, Dict. of Nat. Biog.] Lindley's tone was remarkable for its purity, richness, mellowness, and volume, and in this respect he has probably never been equalled. His technique, for that date, was remarkable, and his accompaniment of recitative was perfection. He composed several concertos and other works for his instrument, but his composition was by no means equal to his execution. He died in London, June 13, 1855. His daughter married John Barnett the composer.

His son, William, born 1802, was also a violoncellist. He was a pupil of his father, first appeared in public in 1817, and soon took a position in all the best orchestras. He gave great promise of future excellence, but was unable to achieve any prominence owing to extreme nervousness. He died at Manchester, August 12, 1869.

W. H. H.

LINDNER, FRIEDRICH, born at Liegnitz, in Silesia, about 1540, was first a boy-chorister in the Electoral Chapel at Dresden, received his further education at the famous school at Pforz, and afterwards studied at Leipzig University. After serving for a while as Hof-musikus to the Margrave of Brandenburg at Ansbach, he received in 1574 the appointment of cantor to the important St. Agudien Kirche at Nuremberg, where he died, Sept. 15, 1597. Although Lindner published none of his own compositions, he is known to have sent to the Duke of Württemberg in 1567 a Cantional-buch, for which he received the then considerable honorarium of 30 thaler, and again in 1570 and 1572, he also sent two musical settings of the Passion, for which he received 6 and 10 thalers respectively (Eitner, Monatshefte, xxxi. pp. 18, 19). But he is chiefly known as the meritorious editor of various collections of music, sacred and secular, published by the Nuremberg firm of Gerlach, which are important as testifying to the kind of music which continued to be cultivated and favoured in the Lutheran churches and schools of Nuremberg and elsewhere. They are as follows: 1. Sacrae Cantiones, 1585, 41 n. a 5-9; Notitia by Italian composers, chiefly of the Venetian school, but including some by Palestrina. 2. Continuatio Cantionum Sacrarum, 1588, 56 n. a 4-12. 3. Cortalium Cantionum Sacrarum, 1599, 70 n. a 4-12. 4. Missae quinque, a 5. 5. Magnificat octo tonorum, 1591; three sets by Guerrero, Ruffo, and Varotto, a 4 and 5. 6. Bicinia Sacra, 80 n. 7. Gemma Musicalls; three books, 1588, 1589, 1590, containing altogether 198 Italian Madrigals by the most representative composers of the genre, such as Marenzio, the Gabrieli, Striggio, and many others. J. R. M.

LINDPAINTER, Peters Joseph von, born at Coblenz, Dec. 9, 1791, studied the violin, piano, and counterpoint at Augsburg, and subsequently appears to have received some instruction at Munich from Winter. In 1812 he accepted the post of Musik-director at the Isartor Theatre in Munich, and whilst so engaged completed his musical studies under Jos. Gritz, an excellent contrapuntist. In 1819 he was appointed Kapellmeister to the Royal Band at Stuttgart, and held that post until his death, which took place August 21, 1856, during a summer holiday at Nönenhorn, on the Lake of Constance. He was buried at Wasserburg. He died full of honours, a member of almost every musical institution of the Continent, and the recipient of gifts from many crowned heads amongst others a medal from Queen Victoria, in 1848, for the dedication of his oratorio of 'Abraham.'

By quiet and persistent labour he raised his band to the level of the best in Germany, and acquired a very high reputation. 'Lindpaintner,' says Mendelssohn, describing a visit to Stuttgart in 1831, 'is in my belief the best conductor in Germany; it is as if he played the whole orchestra with his baton alone; and he is very industrious.' Of the many professional engagements offered him in other towns and foreign countries, he accepted but one, and that, in 1853, three years before his death, was to conduct the New Philharmonic Concerts in London, at which his cantata 'The Widow of Nain,' his overtures to 'Faust' and 'The Vampyre,' and others of his compositions were given with success, including the song of 'The Standard-bearer,' at that time so popular, sung by Pischek. He conducted some of the New Philharmonic Concerts in 1854. He wrote twenty-eight operas, three ballets, five melodramas and oratorios, several cantatas, six masses, a Stabat Mater, and above fifty songs with pianoforte accompaniment. To these were added symphonies, overtures, concertos, fantasias, trios and quartets for different instruments. He rescued 'Judas Maccabaeus.' Some of his symphonies, his operas 'Der Vampyr' and 'Liechtenstein,' his ballet 'Joko,' the overture to which was often heard at concerts, his music to Goethe's 'Faust' and Schiller's 'Song of the Bell,' have been pronounced to be among the best of his works. And two of his songs, 'The Standard-bearer' and 'Roland,' created at the time a veritable furore.

Though wanting in depth and originality Lindpaintner's compositions please by their clearness and brilliancy, melody and well-developed form; and the hand of a clever and practised musician is everywhere visible in them.

LINLEY, Francis, born 1771 at Doncaster, blind from his birth, studied music under Dr. Miller, and became an able organist. He was chosen organist of St. James's Chapel, Pentonville, and soon afterwards married a blind lady.

LINLEY, 737

VOL. II
of considerable fortune. He purchased the business of Bland, the music-seller in Holborn, in 1796, but his affairs becoming embarrassed, his wife parted from him and he went to America in the same year, where his playing and compositions were much admired. He returned to England in 1799, and died at Doncaster, Sept. 13, 1800 (as stated in Wilson's *Biography of the Blind*). His works consist of songs, pianoforte, and organ pieces, flute solos and duets, and an *Organ Tutor*. His greatest amusement was to explore churchyards and read the inscriptions on the tombstones by the sense of touch, *W. H. H.*; additions and corrections by F. K.

LINLEY, George, a composer, born at Leeds in 1798. The statement made in Batty's *History of Rothwell*, 1877, p. 290, that he was born at Glass Houses, near Rothwell, is undoubtedly erroneous. His birthplace was a house in Briggate, where his father, James Linley, carried on business as a tinplate worker. As a young man he amused himself with much satirical literature, directed against the magnates of the town. He removed to London, and besides doing much literary work of sundry kinds, wrote the words or the music (frequently both) of some of the most popular drawing-room lyrics of the day; *Ever of thee*, 'I cannot mind my wheel, mother,' 'Thou art gone from my gaze,' being among these productions.

His operas include 'Francesca Doria,' 1849; 'La Poupee de Nuremberg,' acted at Covent Garden in 1861; 'The Toymaker,' produced Nov. 10, in the same year at the same theatre, and 'Law versus Love,' 1892. He edited and arranged several collections of songs as; *Scottish Melodies,* 'Songs of the Camp,' *Original Hymn Tunes,* etc. Two books of Nursery Rhymes were among his latest musical works. His *Musical Cynics of London*, 1862, was an attack on the metropolitan music critics, H. F. Chorley being severely treated. The *Modern Hudibras* was published in 1864. He is said to have been a skilled violoncellist, and to have played at the Italian Opera. He died at Kensington, Sept. 10, 1865, and was buried at Kensal Green.

LINLEY, Thomas, born in 1732 at Wells, Somerset, commenced the study of music under Thomas Chilcot, organist of Bath Abbey church, and completed his education under Paradies. He established himself as a singing-master at Bath, and for many years carried on the concerts there with great success. On the retirement of John Christopher Smith in 1774 Linley joined Stanley in the management of the oratorios at Drury Lane, and on the death of Stanley in 1786 continued them in partnership with Dr. Arnold. In 1775, in conjunction with his eldest son, Thomas, he composed and compiled the music for 'The Duenna,' by his son-in-law, Sheridan, which had the then unparalleled run of seventy-five nights in its first season. In 1776 he purchased part of Garrick's share in Drury Lane, removed to London and undertook the management of the music of the theatre, for which he composed several pieces of merit. He became a member of the Royal Society of Musicians in 1777. Linley died at his house in Southampton Street, Covent Garden, Nov. 19, 1795, and was buried in Wells Cathedral. His dramatic pieces were 'The Royal Merchant,' 1768; 'The Duenna,' 1775; 'Selima and Azor' (chiefly from Grétry, but containing the charming original melody, 'No flower that blows'), 1776; 'The Camp,' 1798; 'The Carnival of Venice,' 'The Gentle Shepherd,' and 'Robinson Crusoe,' 1781; 'The Triumph of Mirth,' 1792; 'The Spanish Maid,' 1783; 'The Spanish Rivals,' 1784; 'Tom Jones,' 1785; 'The Strangers at Home,' 'Richard Cœur de Lion' (from Grétry), 1796; and 'Love in the East,' 1788; besides the song in 'The School for Scandal,' 1777, and accompaniments to the songs in 'The Beggar's Opera.' He also set such portions of Sheridan's *Monody on the Death of Garrick*, 1778, as were intended to be sung. Six *Elegies* for three voices, composed at Bath (much commended by Burney), and 'Twelve Ballads' were published in his lifetime. The posthumous works of himself and his son, Thomas, which appeared a few years after his death, in two vols., consist of songs, cantatas, madrigals, and elegies, including the lovely five-part madrigal by him, 'Let me, careless,' one of the most graceful productions of its kind. As an English composer Linley takes high rank. [See Parke's *Musical Memoirs*, Busby's *Concert-Room Anecdotes*.

ELIZABETH ANN, his eldest daughter, 'The Maid of Bath,' born at Bath, Sept. 7, 1754, received her musical education from her father, and appeared at an early age at the Bath concerts as a soprano singer with great success. In 1770 she sang at the oratorios in London and at Worcester Festival, and rose high in public favour. In 1771 she sang at Hereford Festival, and in 1772 at Gloucester. On April 13, 1773, she became, in romantic circumstances, the wife of Richard Brinsley Sheridan, and, after fulfilling engagements at Worcester Festival and at Oxford, contracted before her marriage, she retired at the zenith of her popularity. Her voice was of extensive compass, and she sang with equal excellence in both the sustained and florid styles. She was painted by Sir Joshua Reynolds as St. Cecilia, and sat for the Virgin in his *Nativity.* She died of consumption at Hotwells, Bristol, June 28, 1792. [See the *Dict. of Nat. Bioys.* s.v. 'Sheridan, Elizabeth Ann,' from which corrections have been taken.]

MARY, his second daughter and pupil, also a favourite singer, was born at Bath, sang with her sister at the oratorios, festivals, etc., and
for a few years afterwards, until her marriage with Richard Tickell, commissioner of stamps, in 1780. She died at Clifton, July 27, 1787.

Maria, his third daughter, was also a concert and oratorio singer. She died at Bath, Sept. 15, 1784, at an early age. Shortly before her death she raised herself in bed, and with momentary animation sang part of Handel's air 'I know that my Redeemer liveth,' and then, exhausted with the effort, sank down and soon afterwards expired.

Thomas, his eldest son, born at Bath in May 1756, displayed at an early age extraordinary skill on the violin, and at eight years old performed a concerto in public. After studying with his father he was placed under Dr. Boyee. He then went to Florence and took lessons on the violin from Nardini, and whilst there became acquainted with Mozart, then about his own age, and a warm attachment sprang up between them; when they parted, they were each bathed in tears, and Mozart often afterwards spoke of Linley with the greatest affection. On returning to England he became leader and solo-player at his father's concerts at Bath, and subsequently at the oratorios, etc., at Drury Lane. In 1773 he composed an anthem with orchestra ('Let God arise') for Worcester Festival. In 1775 he assisted his father in 'The Duenna,' by writing the overture, three or four airs, a duet and a trio. He subsequently composed a chorus and two songs for introduction into 'The Tempest.' In 1776 he produced 'An Ode on the Witches and Fairies of Shakspeare.' He also composed a short oratorio, 'The Song of Moses,' performed at Drury Lane, and added accompaniments for wind instruments to the music in 'Macbeth.' He was unfortunately drowned, through the upsetting of a boat, whilst on a visit at the Duke of Ancaster's, Grimsthorpe, Lincolnshire, Augt. 7, 1778. The greater part of his miscellaneous compositions are contained in the two vols. of posthumous works above mentioned.

Another son, OZIAS THURSTON, born 1765, was also instructed in music by the father. He entered the Church and obtained a living, which he resigned on being appointed, May 6, 1816, a junior fellow and organist of Dulwich College, where he died March 6, 1831.

William, his youngest son, born about 1771, and educated at St. Paul's and Harrow, learned music from his father and Abel. Mr. Fox procured for him a writership at Madras. [He came back to England in 1796, joined his brother-in-law, Sherland, in the management of Drury Lane Theatre, and between that year and 1800, brought out three pieces, 'Harlequin Captive,' 'The Honeymoon,' and 'The Pavilion' (afterwards called 'The Ring'). They were unsuccessful, and in 1800 the author resumed his official duties at Madras.] He was subsequently paymaster at Nellore, and in 1805 was sub-treasure to the presidency, Fort St. George.

In 1806 he returned from India with a competence, and devoted his attention to literature and music, composed many glees ('At that dread hour' won the Glee Club prize in 1821), published a set of songs, two sets of canzonets, and many detached pieces, edited Shakspeare's Dramatic Songs, two vols. fol. 1815-16, and wrote two novels, and several pieces of poetry. He died in London, May 6, 1836. W. H. H.; additions from Dict. of Nat. Biog.

LINTEYN, J. and W. Music-publishers in Bath at the end of the 18th century. Their place of business was in the Abbey Churchyard. One of the partners had been a blacksmith, and is said to have first given the title 'The Harmonious Blacksmith' to Handel's well-known composition on a copy which he published. 'The Harmonious Blacksmith' had been a nickname bestowed on Lintern himself. F. X.

LIPIINSKI, Karl Joseph, eminent violinist of the modern school, born Oct. 30 (or, according to a family tradition, Nov. 4), 1790, at Radzyn in Poland, son of a land-agent and amateur violinist, who taught him the elements of fingerng. Having outgrown this instruction he for a time took up the violoncello, on which he advanced sufficiently to play Romberg's concertos. He soon, however, returned to the violin, and in 1810 became first concertmeister, and then capellmeister, of the theatre at Lemberg.

Not being able to play the piano, he used to lead the rehearsals of his violin, and thus acquired that skill in part-playing which was one of his great characteristics as a virtuoso. In 1814 he resigned his post, and gave himself up to private study. In 1817 he went to Italy, chiefly in the hope of hearing Paganini. They met in Milan, and Paganini took a great fancy to him, played with him daily, and even performed in public with him at two concerts (April 17 and 30, 1818), a circumstance which greatly increased Lipinski's reputation. Towards the close of the year Lipinski returned to Germany, but soon went back to Italy, attracted by the fame of an aged pupil of Tartini's, Dr. Mazzurana. Dissatisfied with Lipinski's rendering of one of Tartini's sonatas, but unable on account of his great age (ninety) to correct him by playing it himself, Mazzurana gave him a poem, which he had written to explain the master's intentions. With this aid Lipinski mastered the sonata, and in consequence endeavoured for the future to embody some poetical idea in his playing—the secret of his own success, and of that of many others who imitated him in this respect. In 1829 Paganini and Lipinski met again in Warsaw, but unfortunately a rivalry was excited between them which destroyed the old friendship. In 1835 and 1836, in the course of a lengthened musical tournée, he visited Leipzig, then becoming the scene of much musical activity owing to
Mendelssohn's settlement there; and there he made the acquaintance of Schumann, which resulted in the dedication to him of the 'Carneval' (op. 9) which was composed in 1834. In 1836 he visited England and played his military concerto at the Philharmonic Concert of April 25. In 1839 Lipinski became concertmeister at Dresden, where he entirely reorganised the royal chapel, thus doing very much the same service to Dresden that Helm-lesberger subsequently did to Vienna. He retired with a pension in 1861, and died on Dec. 16, of sudden paralysis of the lungs, at Orlow, his country house near Lemberg.

His compositions (now forgotten) are numerous, and his concertos, fantasias, and variations are valuable contributions to violin music. One of the best known was the 'Military Concerto,' which for years was much played, and was the object of the ambition of many a student of the violin. In conjunction with Zalewski, the Polish poet, he edited an interesting collection of Galician 'Volkslieder' with pianoforte accompaniments.

The most prominent qualities of Lipinski's playing were a remarkably broad and powerful tone, which he ascribed to his early studies on the violoncello; perfect intonation in double stops, octaves, etc. and a warm enthusiastic individuality. But the action of his right arm and wrist was somewhat heavy. He was an enthusiastic musician, and especially in his later years played Beethoven's great quartets and Bach's solos in preference to everything else.

LIPSIUS, MARIE (known under the pseudonym 'LA MARA'), was born at Leipzig, Dec. 30, 1837, a member of a family of remarkable literary attainment; she has devoted her life to the literature of music. Her works consist of the following:—Musikalische Studienköpfe (five volumes, 1868-82, of which the first series went through nine editions); Musikalische Gedanken-Polyphonie (1873), a collection of musicians' sayings about their art; Beethoven (2nd ed. 1873); Das Bühnenfestspiel in Bayreuth (1877); a translation of Liszt's 'Chopin' (1880); Musikbriefe aus fünf Jahrhunderten (1886); Klassisches und Romantisches aus der Tonwelt (1892); and many other books of value. She has edited several collections of letters, such as Liszt's correspondence from 1828 to 1886 (translated into English by Constance Bache, and issued with some additional letters, in 1894); three volumes of letters to Liszt from various contemporaries (1898-1904); the correspondence between Liszt and Von Bülow (1898); and Berlioz's letters to the Princess Karolyne zu Sayn-Wittgenstein (1903). (Riemann's Lexicon.)

LISCHEN ET FRITZCHEN. An operetta in one act; words by Paul Dubois, music by Offenbach. Produced at Ems; and reproduced at the Bouffes-Parisiens, Paris, Jan. 5, 1864; in London (French), at St. James's, June 2, 1868.

LISLEY, JOHN, contributed a six-part madrigal—'Faire Citharae presents her doves'—to 'The Triumphs of Oriana,' 1601, but no other composition by him has survived, nor is anything known of his biography.

LISZT, FRANZ (Freencz), was born Oct. 22, 1811, at Raiding in Hungary, and was the son of Adam Liszt, [a steward in the service of Prince Esterhazy] and a musical amateur of sufficient attainment to instruct his son in the rudiments of pianoforte-playing. At the age of nine young Liszt made his first appearance in public at Oedenburg with such success that several Hungarian noblemen guaranteed him sufficient means to continue his studies for six years. For that purpose he went to Vienna, where, at his first public appearance, Jan. 1, 1823, his genius was acknowledged with an enthusiasm in which the whole musical republic, from Beethoven down to the obscure dilettante, joined unanimously. He took lessons from Czerny on the pianoforte and from Salieri and Randhartinger in composition. The latter introduced the lad to his friend Franz Schubert. His first appearance in print was probably in a variation (the 24th) on a waltz of Diabelli's, one of fifty contributed by the most eminent artists of the day, for which Beethoven, when asked for a single variation, wrote thirty-three (op. 120). The collection was published in June 1823 (see VATERLÄNDISCHE KÜNSTLER-VEREIN). In the same year he proceeded to Paris, where it was hoped that his rapidly growing reputation would gain him admission to the Conservatoire in spite of his foreign origin. But Cherubini refused to make an exception in his favour, and he continued his
LISZT

LISZT

studies under Reicha and Faer. [In 1824 he paid his first visit to England, astonishing all the amateurs and musicians at his concert in the Argyll Rooms, London, on June 21. In the following season, he came to London again, and played at the Duke of Devonshire's, May 13, 1825, and elsewhere, with great success. In June of that year he played twice in Manchester—on the 16th, in a concerto of Hummel, in which, two years afterwards, he made his first appearance at the Philharmonic; and on the 20th, in a fantasia of his own on the 'Reichsstadt Waltz.'] Shortly afterwards he also made his first serious attempt at composition, and an opusetta in one act, called 'Don Sanche,' was produced at the Académie Royale, Paris, Oct. 17, 1825, and well received. [See the Harmonicon, vol. iii. p. 224.] Artistic tours to Switzerland and England, accompanied by brilliant success, occupy the period till the year 1827, when Liszt lost his father, and was thrown on his own resources to provide for himself and his mother. During his stay in Paris, where he settled for some years, he became acquainted with the leaders of French literature, Victor Hugo, Lamartine, and George Sand, the influence of whose works may be discovered in his compositions. [More important still was his intercourse with Chopin.] For a time also he was attracted by the tenets of the Saint-Simonians, but in after years he denied that he had ever joined that body. In 1834 he became acquainted with the Countess D'Agoult, better known by her literary name of Daniel Stern, who for a long time remained attached to him and by whom he had three children. [Their intimacy ceased in 1844.] Two of the children, a son, and a daughter, the wife of M. Emile Ollivier the French statesman, are dead. The third, Cosima, was married first to Hans von Bölow, and second to Richard Wagner. The public concerts which Liszt gave during the latter part of his stay in Paris placed his claim to the first rank amongst pianists on a firm basis, and at last was he induced, much against his will, to adopt the career of a virtuoso proper. [The dazzling career of Paganini, to which his own was to be in some sort a parallel, no doubt attracted him forcibly, as did also the compositions of that great artist: the transcriptions for piano of his famous studies were first published in 1839.] The interval from 1839 to 1847 Liszt spent in travelling almost incessantly from one country to another, being everywhere received with unparalleled enthusiasm. In England he played at the Philharmonic Concerts of May 21, 1827 (Concerto, Hummel), May 11, 1840 (Concertstück, Weber), June 8, 1840 (Kreutzer sonata), June 14, 1841 (Hummel's septet). Some amusing English criticisms may be read in Raman's Life, vol. ii. pp. 82, 83, 109, etc. His reception seems to have been less warm than was expected, and Liszt, with his usual generosity, at once undertook to bear the loss that might have fallen on his agent. Of this generosity numerous instances might be cited. The charitable purposes to which Liszt's genius was made subservient are legion. The disaster caused at Pesth by the inundation of the Danube (1837) was considerably alleviated by the princely sum—the result of several concerts—contributed by this artist; and when two years later a considerable sum had been collected for a statue to be erected to him at Pesth, he insisted upon the money being given to a struggling young sculptor, whom he, moreover, assisted from his private means. The poor of Raiding also had cause to remember the visit paid by Liszt to his native village about the same time. It is well known that Beethoven's monument at Bonn, erected in 1845, owed its existence, or at least its speedy completion, to Liszt's liberality. When the subscriptions for the purpose began to fail, Liszt offered to pay the balance required from his own pocket, provided only that the choice of the sculptor should be left to him. From about 1842 dates Liszt's more intimate connection with Weimar, where in 1849 he settled for the space of twelve years. This stay was to be fruitful in more than one sense. [The Princess Karolyne zu Sayn-Wittgenstein united her life with his in 1847, and their house at Weimar, the 'Altenburg,' was for many years a centre of artistic influence, always exerted on behalf of the most modern tendencies in music. The princess undoubtedly collaborated with Liszt in the composition of various literary efforts that made a considerable stir at the time; such were the very untrustworthy Life of Chopin, and certain pamphlets on the early works of Wagner. (On the whole question, Mr. W. Ashton Ellis's Life of Wagner, vol. iv. may be consulted.)] When he closed his career as a virtuoso, and accepted a permanent engagement as conductor of the Court Theatre at Weimar, he did so with the distinct purpose of becoming the advocate of the rising musical generation, by the performance of such works as were written regardless of immediate success, and therefore had little chance of seeing the light of the stage. At short intervals eleven operas of living composers were either performed for the first time or revived on the Weimar stage. Amongst these may be counted such works as 'Lobengrin,' 'Tannhäuser,' and 'The Flying Dutchman' of Wagner, 'Benvenuto Cellini' by Berlioz, Schumann's 'Genoveva,' and music to Byron's 'Manfred.' Schubert's 'Alfonso und Estrella' was also rescued from oblivion by Liszt's exertions. For a time it seemed as if this small provincial city were once more to be the artistic centre of Germany, as it had been in the days of Goethe, Schiller, and Herder. From all sides musicians and amateurs flocked to Weimar, to witness the astonishing feats to
which a small but excellent community of singers and instrumentalists were inspired by the genius of their leader. In this way was formed the nucleus of a group of young and enthusiastic musicians, who, whatever may be thought of their aims and achievements, were inspired by perfect devotion to music and its poetical aims. It was, indeed, at these Weimar gatherings that the musicians who formed the so-called School of the Future, till then unknown to each other and divided locally and mentally, came first to a clear understanding of their powers and aspirations. How much the personal fascination of Liszt contributed to this desired effect need not be said. Amongst the numerous pupils on the pianoforte, to whom he at the same period opened the invaluable treasure of his technical experience, may be mentioned Hans von Bülow, the worthy disciple of such a master.

But, in a still higher sense, the soil of Weimar, with its great traditions, was to prove a field of richest harvest. When, as early as 1812, Liszt undertook the direction of a certain number of concerts every year at Weimar, his friend Duerger wrote 'Cette place, qui oblige Liszt à séjourner trois mois de l'année à Weimar, doit marquer peut-être pour lui la transition de sa carrière de virtuose à celle de compositeur.' This passage has been verified by a number of compositions which, whatever may be the final verdict on their merits, have at any rate done much to elucidate some of the most important questions in Art. From these works of his mature years his early compositions, mostly for the pianoforte, ought to be distinguished. In the latter Liszt the virtuoso predominates over Liszt the composer. Not, for instance, that his 'transcriptions' of operatic music are without merit. Every one of them shows the refined musician, and for the development of pianoforte technique, especially in rendering orchestral effects, they are of real importance. They also tend to prove Liszt's catholicity of taste; for all schools are equally represented in the list, and a selection from Wagner's 'Lohengrin' is found side by side with the Dead March from Donizetti's 'Dom Sebastien.' To point out even the most important among these selections and arrangements would far exceed the limits of this notice. More important are the original pieces for the pianoforte also belonging to this earlier epoch, and collected under such names as 'Consolations' and 'Années de pèlerinage,' but even in these, charming and interesting in many respects as they are, it would be difficult to discover the germs of Liszt's later productiveness. The stage of preparation and imitation through which all young composers have to go, Liszt passed at the piano and not at the desk. This is well pointed out in Wagner's pamphlet on the Symphonic Poems:

'He who has had frequent opportunities,' writes Wagner, 'particularly in a friendly circle, of hearing Liszt play—for instance, Beethoven—must have understood that this was not mere reproduction, but real production. The actual point of division between these two things is not so easily determined as most people believe, but so much I have ascertained beyond a doubt, that, in order to reproduce Beethoven, one must be able to produce with him. It would be impossible to make this understood by those who have, in all their life, heard nothing but the ordinary performances and renderings by virtuosi of Beethoven's works. Into the growth and essence of such renderings I have, in the course of time, gained so sad an insight, that I prefer not to offend anybody by expressing myself more clearly. I ask, on the other hand, all who have heard, for instance, Beethoven's op. 106 or op. 111 (the two great sonatas in Bb and C) played by Liszt in a friendly circle, what they previously knew of those creations, and what they learned of them on those occasions? If this was reproduction, then surely it was worth a great deal more than all the sonatas reproducing Beethoven which are "produced" by our pianoforte composers in imitation of those imperfectly comprehended works. It was simply the peculiar mode of Liszt's development to do at the piano what others achieve with pen and ink; and who can deny that even the greatest and most original master, in his first period, does nothing but reproduce? It ought to be added that during this reproductive epoch, the work even of the greatest genius never has the value and importance of the master works which it reproduces, its own value and importance being attained only by the manifestation of distinct originality. It follows that Liszt's activity during his first and reproductive period surpasses everything done by others under parallel circumstances. For he placed the value and importance of the works of his predecessors in the fullest light, and thus raised himself almost to the same height with the composers he reproduced.'

These remarks at the same time will, to a large extent, account for the unique place which Liszt held amongst modern representatives of his instrument, and it will be unnecessary to say anything of the phenomenal technique which enabled him to concentrate his whole mind on the intentions of the composer.

The remaining facts of Liszt's life may be summed up in a few words. In 1859 he left his official position at the Opera in Weimar owing to the captions opposition made to the production of Cornelius's 'Barber of Bagdad,' at the Weimar theatre. From that time he lived at intervals at Rome, Pesth, and Weimar, always surrounded by a circle of pupils and admirers, and always working for music and musicians in the unselfish and truly catholic spirit characteristic of his whole life. How much Liszt can be
to a man and an artist is shown by what perhaps is the most important episode even in his interesting career—his friendship with Wagner. The latter's eloquent words will give a better idea of Liszt's personal character than any less intimate friend could attempt to do.

'I met Liszt,' writes Wagner, 'for the first time during my earliest stay in Paris, at a period when I had renounced the hope, nay, even the wish, of a Paris reputation, and, indeed, was in a state of internal revolt against the artistic life which I found there. At our meeting he struck me as the most perfect contrast to my own being and situation. In this world, into which it had been my desire to fly from my narrow circumstances, Liszt had grown up, from his earliest age, so as to be the object of general love and admiration, at a time when I was repulsed by general coldness and want of sympathy. . . .

In consequence I looked upon him with suspicion. I had no opportunity of disclosing my being and working to him, and, therefore, the reception I met with on his part was altogether of a superficial kind, as was indeed natural in a man to whom every day the most divergent impressions claimed access. But I was not in a mood to look with unprejudiced eyes for the natural cause of his behaviour, which, though friendly and obliging in itself, could not but wound me in the then state of my mind. I never repeated my first call on Liszt, and without knowing or even wishing to know him, I was prone to look upon him as strange and adverse to my nature. My repeated expression of this feeling was afterwards told to him, just at the time when my "Rienzi" at Dresden attracted general attention. He was surprised to find himself misunderstood with such violence by a man whom he had scarcely known, and whose acquaintance now seemed not without value to him. I am still moved when I remember the repeated and eager attempts he made to change my opinion of him, even before he knew any of my works. He acted not from any artistic sympathy, but led by the purely human wish of discontinuing a casual disarray between himself and another being; perhaps he also felt an infinitely tender misgiving of having really hurt me unconsciously. He who knows the selfishness and terrible insensibility of our social life, and especially of the relations of modern artists to each other, cannot but be struck with wonder, nay, delight, by the treatment I experienced from this extraordinary man. . . .

At Weimar I saw him for the last time, when I was resting for a few days in Thuringia, uncertain whether the threatening prosecution would compel me to continue my flight from Germany. The very day when my personal danger became certain, I saw Liszt conducting a rehearsal of my "Tannhäuser," and was astonished at recognising my second self in his achievement. What I had felt in inventing this music he felt in perform-

ing it: what I wanted to express in writing it down, he expressed in making it sound. Strange to say, through the love of this rarest friend, I gained, at the moment of becoming homeless, a real home for my art, which I had hitherto longed for and sought for always in the wrong place. . . . At the end of my last stay at Paris, when ill, miserable, and despairing, I sat brooding over my fate, my eye fell on the score of my "Lohegrin," which I had totally forgotten. Suddenly I felt something like compassion that this music should never sound from off the death-pale paper. Two words I wrote to Liszt: his answer was, the news that preparations for the performance were being made on the largest scale that the limited means of Weimar would permit. Everything that men and circumstances could do was done, in order to make the work understood. . . . Errors and misconceptions impeded the desired success. What was to be done to supply what was wanted, so as to further the true understanding on all sides, and with it the ultimate success of the work? Liszt saw it at once, and did it. He gave to the public his own impression of the work in a manner the convincing eloquence and overpowering efficacy of which remain unequalled. Success was his reward, and with this success he now approaches me, saying: "Behold we have come so far, now create us a new work, that we may go still further."

In addition to the commentaries on Wagner's works just referred to, Liszt also wrote numerous detached articles and pamphlets, those on Robert Franz, Chopin, and the music of the Gipsies, being the most important. It ought to be added that the appreciation of Liszt's music in this country is almost entirely due to the unceasing efforts of his pupil, Walter Bache, at whose annual concerts many of his most important works were produced. Others, such as "Mazepa" and the "Battle of the Huns," were first heard in England at the Crystal Palace.

The last concert given by Franz Liszt for his own benefit was that at Elisabethgrad towards the end of 1847, since when his artistic activity was exclusively devoted to the benefit of others. No more striking evidence of the nobility of Liszt's purpose and of the gracious manner in which he fulfilled it could be wished for than that contained in the published correspondence between Liszt and Wagner.2 The two volumes cover the Weimar period, but by no means represent the extent of the friendship between these two great men, which was only interrupted by death. Liszt's character as here revealed calls for nothing less than reverence. His solicitude is so tender, so fatherly, so untainted with selfishness, and, above all, so wise! The letters tell the story of a struggle and of a victory for his friend, but they are silent upon

the incidents of his own life. On being asked one day the reason of his abstention from creative work, Liszt replied by another question, 'Can you not guess?' To Wagner himself, who urged him to compose a German opera on his (Wagner's) tragedy of 'Wieland der Schmidt,' Liszt answered that he felt no vocation for such a task; he thought it more likely that he might give his first dramatic work a trial in Paris or in London. So he continued a life of self-abnegation, and died faithful to the last to the claims of friendship and of genius, many young composers besides the titanic Wagner owing their first successes in life to his generous sympathy and penetrating judgment. He made Weimar, during the twelve years of his residence, the centre of musical life in Germany. 'I had dreamed for Weimar a new Art period,' wrote Liszt in 1860, 'similar to that of Karl August, in which Wagner and I would have been the leaders as formerly Goethe and Schiller, but unfavourable circumstances brought these dreams to nothing.' Though Liszt did not accomplish all he wished for Weimar, the little city still ranks high among German art-centres, and in some degree carries on the work of advancement so firmly established between the years 1844 and 1861.

[The 'Graner Messe' was first performed at the consecration of the Gran Cathedral, August 31, 1866.]

The resignation of the Weimar capellmeistership in 1861 was followed, after some years during which Rome was his headquarters, by what Liszt called his vie triumperule, divided between Budapest, Weimar, and Rome. The Hungarian Government, in order to ensure Liszt's presence in Budapest during part of the year, invented for him (1879) the post of president of an institution which at the moment did not exist, but which soon afterwards rose as the Academy of Music. ['The Legend of Saint Elizabeth' was given there in August 1856.] Impressive scenes occurred when the Magyars publicly feted their compatriot, and hero-worship was at its height on such occasions as the jubilee of the master's career in 1873, when 'Christus' was performed at the Hungarian capital.

The aspect of Liszt's everyday life at Weimar has become known through the accounts of some of the host of aspiring pianists and music lovers who gathered around him there. Liszt's teaching had already borne fruit in the wonderful achievements of his most distinguished pupils—Von Bülow, D'Albert, the lamented Tausig, and others, and no wonder that the music-room which the generous artist had thrown open to all comers was thronged by a number of more or less gifted young people in search of inspiration—no other word so well describes the ideal character of the instruction they were privileged to receive.

Liszt held his classes in the afternoon, during which several of the pupils would play in the presence of the rest—some dozen or more, perhaps—all being expected to attend the service. At times the master would seat himself at the piano and play, but this supreme pleasure could never be counted upon. It was noticeable that this most unselfish of geniuses was never more strict or more terrible than when a Beethoven sonata was brought to him, whereas he would listen to the execution of his own compositions with indulgent patience—a characteristic trait. Yet Liszt's thoughts often dwelt upon his great choral works, and he was heard to declare that sacred music had become to him the only thing worth living for.

A lively description of Liszt's professorial life has been given by an American lady who visited Weimar in 1875. [See also an article in the Fortnightly Review for September 1886, by F. Haeffer.] In Rome again Liszt found himself the centre of an artistic circle of which Herr von Kendall and Sgambati were the moving spirits. The significance, however, of his residence in the Eternal City lies rather in the view he took of it as his annies de recollection, which ultimately led to his binding himself as closely as he could to the Church of Rome. He who in his youth, with the thirst for knowledge upon him, had enjoyed the writings of freethinkers and atheists (without being convinced by them), was now content with his brevity and book of hours; the impetuous artist who had felt the fascination of St. Simonianism before he had thoroughly understood its raison d'être, who had been carried away by the currents of the revolution, and had even in 1841 joined the Freemasons, became in 1856 or 1858 a tertiary of St. Francis of Assisi. In 1879 he was permitted to receive the tonsure and the four minor orders (door-keeper, reader, exorcist, and acolyth), and an honorary canony. The Abbé Liszt, who as a boy had wished to enter the priesthood, but was dissuaded therefrom by his parents and his confessor, now rejoiced in the public avowal of his creed as conveyed by his priestly garb, although he was indeed no priest, could neither say mass nor hear a confession, and was at liberty to discard his cassock, and even to marry if he chose, without causing scandal. Thus, in the struggle with the world which the youth of sixteen had so much dreaded, his religious fervour was destined to carry the day. Extracts from Liszt's private papers throwing further light on his inmost thoughts have been published, but can only be referred to in this place.

1 Sanka Wehli's François Liszt.
2 Music Study in Germany, Amy Fay.
3 'I neither officially nor unofficially belonged to the St. Simonians.' See Remnants, Vol. I. Heine is inaccurate on this and some other points.
4 At Frankfort-on-Main, during the period of his sojourn at Nonnenworth with the Countess d'Agoult.
5 Allgemeine Musik-Zeitung, May 12, 1887.
[In the last year of his life he received special honours in the two capitals where his earliest successes had been won. On March 25, 1886, his 'Granier Messe' was given at St. Eustache, Paris.] Liszt's former triumphs in England were destined to be eclipsed by the enthusiasm of the reception which awaited him when he was prevailed upon to return in 1886. In 1824 George IV, had given the sign to the aristocracy of homage to the child-prodigy; and his visits in the following year and in 1827 were successful enough. In 1840-41 the Queen's favour was accorded to him, and he shared with Thalberg a reputation as a skilful pianist in fashionable circles. But it was not until 1886 that the vast popularity which had hitherto been withheld from him, owing to the conditions of musical life in our country, was meted out to him in full measure.

Liszt paused awhile in Paris on his way [see above], and received much attention, his musical friends and followers gathering to meet him at the concerts of Colonne, Lamoureux, and Pauleloup. At length on April 3, the Abbé Liszt reached our shores, and on the same evening three or four hundred people met at Mr. Littleton's house at Sydenham to do honour to the great artist, and a programme consisting entirely of his compositions was gone through by Walter Bache and others. The gracious and venerable appearance of the distinguished guest, and his kindly interest in all that went forward, won the hearts of those who witnessed the scene; all recognised the presence in their midst of a marvellous personality such as is rarely met with. On the following day Liszt played part of his Es Concerto before a few friends. On the Monday he attended the rehearsal of his oratorio 'St. Elizabeth' in St. James's Hall; and in the evening of the same day he astonished his host and a circle of friends by an improvisation on some of the themes. April 6 was the date of the concert, which was conducted by Mackenzie, and when the composer walked into the hall he received such ovations as had probably never been offered to an artist in England before. Even before he entered his arrival was announced by the shouts of the crowd outside, who hailed him as if he were a king returning to his kingdom. During the afternoon Liszt had been entertained at the Royal Academy of Music, where the Liszt Scholarship, raised with so much zeal by Mr. Walter Bache, was presented to him by the master. A short programme was performed, Nessus, Shakespeare and Mackenzie conducting, and when Liszt rose from his seat and moved towards the piano, the excitement of the students and of the rest of the audience knew no bounds. A visit to Windsor, where he played to Her Majesty a reminiscence of the Rose Miracle scene from 'St. Elizabeth,' filled up most of the following day (April 8), on the evening of which Mr. Walter Bache's reception at the Grosvenor Gallery took place. The brilliant scene of Saturday was here repeated, with the very important additional feature of a solo from Liszt himself. [See Bache, vol. i. p. 169.]

The events which followed in the course of the great man's visit included a performance of 'St. Elizabeth's' at the Crystal Palace on the 17th. On the 22nd, a week later than he intended, Liszt left England, pleased with his reception, and promising to repeat his visit. No wonder that his death was felt by English people as the loss of a personal friend. The last music he wrote was a bar or two of Mackenzie's 'Troubadour,' upon which he had intended to write a fantasia.

The remaining incidents in the life of Liszt may only be briefly touched upon. Paris gave him a performance of 'St. Elizabeth' at the Trocadéro. The master left Paris in May, and visited in turn Antwerp, Jena, and Sondershausen. He attended the summer festival here while suffering from weakness and cold. 'On ma mis les bottes pour le grand voyage,' he said, excusing himself to a friend for remaining seated. His last appearance upon a concert platform was on July 19, when, accompanied by M. and Mme. Munkácsy, he attended a concert of the Musical Society of Luxembourg. At the end of the concert he was prevailed upon to seat himself at the piano. He played a fantasia, and a 'Soirée de Viene.' It need not be said that the audience, touched and delighted by the unlooked-for favour, applauded the master with frenzy. In the pages of Janka Wohl's François Liszt there is an account of a scene during Liszt's stay at the Munkácsy's house, according to the writer a record of the last time the greatest master of the pianoforte touched his instrument. A flying visit had been paid to Bayreuth on the marriage of Daniela von Bülow—Liszt's grand-daughter—with Herr von Thode on July 4. Liszt returned again for the performance of 'Parsifal' on the 23rd. He was suffering from a bronchial attack, but the cough for a day or two became less troublesome, and he ventured to attend another play, an exceptionally fine performance of 'Tristan,' during which the face of Liszt shone full of life and happiness, though his weakness was so great that he had been almost carried between the carriage and Mme. Wagner's box. This memorable performance of 'Tristan,' in which the singers (Sucher, Vogl, etc.) and players surpassed themselves, lingered in Liszt's mind until his death. When he returned home he was prostrate, and those surrounding him feared the worst. The patient was confined to his bed and kept perfectly quiet. The case was from the first hopeless, the immediate cause of death being general weakness rather than the severe cold and inflammation of the lungs which.
July 31, 1886. His death that night was absolutely painless.

Since the funeral in the Bayreuth cemetery on August 3, Liszt’s ashes have not been disturbed, although Weimar and Budapest each asserted a claim to the body of the illustrious dead. Cardinal Haynauld and the Princess Wittgenstein (heirress and executrix under his will) gave way before the wishes of Liszt’s sole surviving daughter Cosima Wagner, supported as they were by public opinion and the known views of Liszt himself, who had not looked with favour on the removal of the remains of Beethoven and Schubert, and had expressed a hope that it might not also be his fate to ‘beurnufahrne.’ These towns, as well as others, have therefore raised monuments to the genius who was associated with them. The memory of Liszt has been honoured in a practical way in many places. Liszt societies existed during the master’s lifetime, and they have now been multiplied. Immediately after the funeral a meeting of the leading musicians was held at Bayreuth, at which Richter made a speech and urged that all the living forces of the artistic world should unite to preserve the memory of the master by perfect renderings of his own and other modern works. The Grand Duke of Weimar, Liszt’s friend and protege, sent the intendancy of the theatre to Bayreuth to confer with Richter upon the best means of perpetuating Liszt’s intentions. He proposed a Liszt foundation after the manner of the Mozarteum at Salzburg. A Liszt museum was to be established in the house where he lived at Weimar, and scholarships were to be offered to promising young musicians, and on similar lines scholarships have been instituted elsewhere.

An outcome of this project is the Fondation-Liszt, instituted by his firm friend the Duke of Weimar after his death, to continue instruction on the basis he had laid.

The first competition for the Liszt Royal Academy scholarship took place in April 1887.1 The scholarship is open for competition by male and female candidates, natives of any country, between fourteen and twenty years of age, and may be awarded to the one who may be judged to evince the greatest merit in pianoforte playing or in composition. All candidates have to pass an examination in general education before entering the musical contest. The holder is entitled to three years’ free instruction in the Academy, and after that to a sum for continental study. (The most important book on Liszt is L. Ramaun’s Frome: Liszt als Künstler und Mensch, the first volume of which appeared in 1889, and was translated into English by Miss E. Cowley [2 vols. 1889. The second volume of the original appeared in 1894.] Among portraits of the master, the bust executed by Boehm, and exhibited at the Grosvenor

Gallery in 1886, has great interest for English people, as Liszt sat for it during his visit to Sydenham in the same year. The head of Liszt upon his death-bed has been successfully represented in a plaster cast by Messrs. Weissbrod & Schnappau of Bayreuth. On pp. 149 and 219 of Janka Wohls volume, and in the second volume of L. Ramann’s life, a detailed account and list of portraits and paintings may be found.

The following catalogue of Liszt’s works is as complete as it has been possible to make it; but no authoritative catalogue has appeared since the Thematistisches Verzeichniss published by Breitkopf und Härtel (as No. 14,373) shortly before the master’s death. The earlier edition of the catalogue, published in 1856, contained mention of early editions and some compositions which Liszt afterwards disowned, so that a really complete list is still to be desired. This is compiled with the help of the various published lists, etc.

I. ORCHESTRAL WORKS

1. Symphony zu Dante’s Divina Commedia, in D minor, for orchestra.\footnote{1 For this England is indebted to the exertions of Walter Bache (who raised upwards of £1100 for the purpose).}

2. Eine Fast-Symphonie in dritter Charakterbildern nach Goethe, orchest. for piano.

3. To the memory of Franz Schubert.

5. Hungarian march. The first performance of this at the Bayreuth Festival, 1876, is now celebrated as the fiftieth anniversary of the first performance of Schiller’s ‘Huldigung der Heimat,’ a grand tour of the national capacity of overtures in the theatre and as a mark of respect for the jubilee of the entry into power of the Grosserster Meinistokalman, November 9, 1844. An edition was published in June 1856, but in 1856 this was revised, issued to, and revised in the form as at present known. 2. Orphée, conceived in January 1849, during the rehearsals of Gluck’s ‘Orfeo’ at Weimar, and first performed in the middle of February of that year.

6. Unabridged, conceived in 1856 after Liszt saw Kaulbach’s painting which bears the same title; apparently completely performed between January and March 1877. 7. ‘Die Ideale’ (after Schiller’s poem), written for the foreman of the Grand-Schiller monument at Weimar, September 1857. 8. ‘Hamlet,’ composed in 1859, apparently was not publicly performed until under the aegis of the Alpens. 9. Musique, 1. on Rossini in 1847, 2. at Bayreuth in 1857.

10. Hungarian March, for Goethe’s birthday. Score and parts also for PF. 3, and hands. Schuberth.

11. Hungarian March, for ascension of Duke Carl of Saxony, 1857. Score; and for PF. 2 and 4 hands.

12. ‘Vom Fels zum Meer’: Patriotic March. Score and parts also for PF. 2 and 4 hands. Schuberth.

13. ‘Künstler-Fest’ for Schiller Festival, 1859. Score; and for PF. 2 and 4 hands. Schuberth.

14. ‘Gustav’s Lieder’. Humorous music for the centenary of the Anderst Tasso, 1877. Score and parts; also for PF. 2 and 4 hands. Schuberth.

15. ‘A Hundred Years Ago’ (Prague, 1859), not published.

Also PF., or vocal score. Published by Kahnt's Nachfolger.

more particularly the collection of the letters addressed to him by his contemporaries,—shows how unscrupulously his generosity was in many cases abused. Still, his influence was far from being wasted, for without his help it is quite certain that the fame of Wagner would not be what it is at the present day; and the disappointments with which that master had to contend might quite conceivably have crushed him, and so his greatest works might have been lost to the world, but for the encouragement and devotion of Liszt. The catalogue of operas produced during his artistic reign at Weimar shows how Catholic were his tastes, and his brave defiance of Cornelius, as a consequence of which he gave up the most useful duties of his life, was the kind of action that appeals to the imagination and no doubt advanced the cause of modern music, both for good and evil. For of course with such open-handed liberality there was little room for discrimination, and a great many of the disciples of the Liszt-school were very poor musicians, just as many of his pianoforte pupils were entirely unworthy of his name.

His sympathy for all sorts of music was again manifested in his interpretation of the music of widely different schools on the pianoforte. He lived before the time when musical archeology was in vogue, and it was owing to his ecclesiastical tastes rather than to any antiquarian instinct, that he was moved to practical adulation of Palestina. His playing of the older music (before Beethoven) was never the most remarkable side of his art, and it must have been the difficulty of combining the pedal and manual parts of Bach's organ works which drew him to arrange them for the piano. But with all modern music he was in fullest sympathy, up to the time when he gave up the regular career of a virtuoso. In regard to pianoforte technique, his work was of the utmost importance; the full discussion of this point must be left to another place (see Pianoforte-Playing). It must suffice here to say that even to those who only heard him in the last year of his life, his playing was a thing never to be forgotten, or approached by later artists. The peculiar quiet brilliance of his rapid passages, the noble proportion kept between the parts, and the meaning and effect which he put into the music, were the most striking points, for it is quite a mistake to suppose that the habit of thumping, which so many of his pupils and followers thought fit to adopt, came from himself.

His pianoforte transcriptions and arrangements cover an immense field of music, good, bad, and indifferent. Yet very few of the productions suggest that they were done to order, or that the task was at all un congenial to the arranger. Among the most famous of these, and as a matter of fact, among the very best, are the arrangements of Schubert's songs, in many of which he contrives to throw a new

LISZT

LISZT
light on Schubert's ideas, and, in the opinion of a good many people, to enhance their beauty. Naturally there are cases where his additions cannot meet with unqualified approval from every one; but his sympathy with this master was so complete that he very seldom erred in taste in treating his music. Even operatic fantasies, which for the most part are the dreariest of imaginable compilations, became, in Liszt's hands, things of some beauty and musical interest, besides reproducing the theatrical situation with success. One of the many paradoxes of Liszt's nature was his warm admiration for the kind of themes that we associate with Bellini and Donizetti, combined with a rather uncouth type of melodie invention, in the case of his own creations, which asserts remarkably ill with the Italian sentimentality. In his own original works as a composer it is remarkable that he nearly always required a poetic idea to illustrate in his compositions. (In this connection, it is of course possible that the process was similar to that employed by Schumann, i.e. the music may have been composed first, and the fancy title found for it afterwards; but, taking all the compositions into consideration, it would seem more likely that in the great majority of instances, the music was deliberately written up to an impression produced by some other art, or by some natural scene.) It is not exactly that the imagination was defective, but it required to be kindled from without. Liszt's efforts at abstract music are very few and, for the most part, very unsatisfactory. This is, no doubt, explained by the circumstance that so much of his early life had been given to the attainment of his wonderful pianoforte technique, that he could not undergo the drudgery of learning how to develop musical themes and bow to make them self-dependent and inherently interesting. Not that he ever showed the kind of helplessness of invention which often mars the fine conceptions of Berlioz; but, while his employment of orchestral and other colouring is always admirable, the actual fabric of his themes, as well as their invention, often leaves much to be desired, more especially in such things as the pianoforte ballades, or the sonata in B minor. It is a commonplace of criticism to say that Liszt owed much to Berlioz, but he very seldom attained that quality of distinction which so constantly appears in the French master's work; whether ugly or beautiful, Liszt's themes are most rarely such as to produce the feeling in the hearer that a new revelation was made in them. Where Liszt was supreme was in his handling of the orchestra, and it must for ever be a problem how he learnt the art of scoring. The 'Hungarian Rhapsodies,' in the transference between the piano and the orchestra of the special effects of the national bands, must have been the means by which he became the master of the orchestra that we know him to have been. The 'Symphonic Poems' mark the point of greatest divergence from the classical ideals, and the discussion they aroused was the chief cause of the defection of Joachim and others from the Liszt camp. Even Wagner hesitated for a time before accepting some of the perversties which occur in them, just as, in earlier days, some of Liszt's extravagances in his pianoforte works had repelled Chopin. The symphonic poems, and the 'Faust' and 'Dante' symphonies, are the works in which the theories of 'programme-music' were pushed to the furthest point reached in that peculiar department of art until the advent of Richard Strauss. The fact that this latter composer has out-Liszted Liszt must not blind us to the boldness of Liszt's work at the time it was written. The idea was of course not a new one by any means; from the very primitive instances of programme-music to be found in certain collections of virginal music, through Bach's 'Capriccio on the Departure of a Brother,' or Kuhnau's Bible Sonatas, to Beethoven's 'Wuth über dan verlornen Greschen,' composers had indulged on occasion in such jeux d'esprit, but up to the time of Berlioz had regarded them as a more or less jocular means of turning music to an object that was recognised as not its primary one. In the opinion of those best worth listening to, the music which is interesting purely on its own account, without making any attempt to illustrate a story, is music in its highest function, and the works which profess to narrate an anecdote, or to illustrate a poetic or prosaic idea, are meritorious or the reverse according as they fulfill the conditions of absolute music. Viewed from this standpoint, the 'Faust' symphony is far superior to the 'Dante,' for the whole of its slow movement belongs to the sphere of pure music, and the conception of the work seems more spontaneous than that of the other, or of most of the symphonic poems. Of the finale, Dannreuther (see below) says:—

This movement exhibits the outlines of symphonic structure ... but the details for the most part have reference to the exigencies of the poetical idea, and such exigencies are permitted to over-rule considerations of musical consistency and beauty.

In this class of his compositions, Liszt laid great stress upon a innovation which has been generally associated with his name, although it had been practically used from time to time long before his days. The system of 'Transformation of Themes' as he called it, is beyond question an easier thing to handle than the logical development which the older masters preferred. This may or may not have been the reason why Liszt adopted it so readily. It is easy to see that it lends itself well to the illustrative music of which he and his followers were so fond; for a theme appearing in a new guise, altered in tempo and rhythm—so long
as it is easy to recognise in its changed shape—stands well as the counterpart of one character in different circumstances. The Wagnerian 'leading-motive' fulfils a far higher function in regard to operatic music than this Transformation of Themes does in symphonic music; for even when the latter is employed by a master of construction, it has evidently very little to do with musical interest of the best kind. A well-known instance of its use, in music of a different order from Liszt's, is in the third movement of Brahms's second symphony, where the theme of the allegro non troppo is thus transformed, and the device is employed as if it were of small moment. In the same master's two early sonatas, opp. 1 and 2, are other instances. The two concertos of Liszt, and nearly all the symphonic poems, contain cases where he has illustrated his theory that it is a really important invention.

The larger compositions of Liszt intended for ecclesiastical use are so seldom performed that it is difficult to speak of them with any certainty at first-hand. In the late Mr. Dannreuther's Romantic Period (his contribution to the Oxford History of Music, vol. vi.) he analyses the 'Grüner Festmessen' and the other sacred works very minutely, and with great insight and acumen. He points out that in this great mass and in the two oratorios which Liszt completed, there is a copious use of Wagner's method of employing representative themes, and connected the various movements of the mass by their means. He says:

Liszt came to interpret the Catholic ritual in a histrionic spirit, and tried to make his music reproduce the words not only as ancilla theologica et ecclesiastica, but also as ancilla dramaturgiae. The influence of Wagner's operatic method ... is abundantly evident; but the result to this influence is more curious than convincing (p. 200).

In speaking of the 'Hungarian Coronation Mass' (1866-67) Mr. Dannreuther says —

Liszt aimed at characteristic national colour, and tried to attain it by persistently putting forward some of the melodic formulae common to music of the Hungarian type. ... The style of the entire mass is as incongruous as a gipsy musician in a church vestment (ib. pp. 204, 209).

The same author sums up the other pieces by Liszt that belong to sacred music in these words:

The majority of them can hardly be accounted good music in the full sense of the word. Taken simply as music, and without regard to any symbolism or causal association with the ritual, they convey an undeniable sense of effort and weakness (ib. p. 220).

The 'concert-oratorio' called 'The Legend of St. Elizabeth' is a living illustration of the dual personality of Liszt; it is fervently religious in character, and yet is far more of an opera than a real oratorio. It had a far greater success on the stage (at Munich, Weimar, Hanover, Leipzig, and elsewhere) than on the concert-platform. The scene of the miracle of the roses is by far the finest point of the work, and, as Mr. Dannreuther says, 'one of the best things Liszt ever produced.' For an analysis of 'Christus' the reader must be referred to the volume already quoted.

It remains to speak of a branch of art in which Liszt was at his very best. The purely lyrical pianoforte pieces, such as the 'Consolations,' many of the 'Annares de Pelerinage,' the beautiful 'Bénédiction de Dieu dans la Solitude,' and several of the other 'Harmonies poétiques et religieuses,' have an amount of inspiration which is rarely found in the more ambitious works of the composer; and in his songs he reaches a level of invention that is unequalled for the most part elsewhere. All, or almost all, are highly original, effectively written for the voice, and interesting in the accompaniment; some are a little forced in sentiment, but in all the natural accentuation of the words is followed with singular fidelity, and a few are among the most expressive lyrics of the world. 'Kennst du das Land' is held by many good judges to be the best of the many excellent settings of the words; 'Der König von Thule' is another of finest quality; 'Es muss ein Wunderbares sein' has an emotional directness, and 'Comment, disaient-ils' a whimsical grace, that are obvious to every hearer; 'Die Lorelei' and 'Du bist wie eine Blume' are perfect counterparts of Heine's words, and if Liszt had been nothing more than a song-writer, he would have been hailed as a composer of rare gift. What amount of his work will endure throughout the ages cannot be guessed with any certainty; but if one whole class were spared by time, that class would surely be the songs. As pianoforte technique develops still further, the pianoforte pieces may join the bravura pieces of the past in oblivion; already, as was said above, the bolder flights of Strauss have thrown into the shade many of the more ambitious efforts in the department of programme-music, but the songs are even now increasing in general popularity, and finding acceptance even with singers of the less advanced class.

LITANIAE LAURETANAe (Litany of Loreto). A solemn Litany, sung in honour of the Blessed Virgin Mary.

It is no longer possible to ascertain when, where, or by whom, this Litany was originally written; but, if we may trust the very generally received tradition that it was first chanted at Loreto, and carried thence, by pilgrims, to all parts of the world, it cannot be of earlier date than the closing years of the 13th century. In other places than Loreto (where it is sung every evening) it is most frequently sung, either in solemn Processions, or, during the Exposition of the Blessed Sacrament at Benediction; but its use—especially on the Continent—is by no means restricted to those particular occasions. In Rome, for instance, it is constantly sung, at
almost every popular service, to a simple Plain-song melody, familiar to all Italians, and printed in the Ratisbon edition of the Directorium Chori. This is, probably, the oldest music to which the words were ever adapted. Its date, like theirs, is uncertain: but it is at least old enough to have attracted the attention of the great polyphonic composers of the 16th century, some of whom have treated it in their best and most devout style, and, when adopting it as a Canto fermo, have carefully abstained from destroying the simplicity of its character by the introduction of vain and irrelevant conceits.

Palestrina was especially devoted to the Litany; and, in 1593, published a volume containing, in two books, ten different settings of exquisite beauty, composed for the use of the ‘Confraternity of the Holy Rosary.’ One of the most beautiful divisions of the work is reprinted in the fourth volume of Proske’s Musica Divina, and all are published in the complete edition of Breitkopf & Härtel.

Another volume of Litanesies, by various authors, was published at Munich, in 1596, by Georgius Victorinus, under the title Thesaurus Litaniarum. We here find, among other interesting works, a charming Litany, by Orlando di Lasso, founded entirely upon the Plain-song Canto fermo, and so simple in construction that the most modest choir need feel no hesitation in attempting it. This Litany is also reprinted, entire, in the fourth volume of Musica Divina, together with some others from the same rare work, which, fortunately, is not the only collection that has been preserved to us from the 16th century. Under the title of Litaneiae Catholicae ad Christum, Beatum Virginem, et Sanctos, a highly interesting work was printed by Wolfgang Eder, at Ingolstadt, in 1559. Another, called Sacrae Litaneæ variæ, was published at Antwerp in 1595. A precious volume, believed to be unique, wanting the title and first nine pages—and, therefore, without date—is preserved in the Library bequeathed by Dr. Proske to the cathedral of Ratisbon. And many other printed collections are still extant, containing quite a little treasury of Art.

At Notre Dame the Litany is annually sung, in grand procession, on the afternoon of the Feast of the Assumption, to a form of the First Tone, which, set with the melody in the tenor, produces an indescribably solemn effect.

W. S. T.

LITANY (Old Eng. Latanie; Lat. Litaneia; Gr. Ἀρατέα, a Supplication). A solemn form of prayer, sung, by solo voices and choir, alternately; and found in most Office-Books, both of the Eastern and Western Church. [See Litaniæ, etc.]

The origin of the Litany may be traced back to a period of very remote antiquity. Its use was, probably, first instituted in the East, and it retained even in the West its Greek respond ‘Kyrie eleison.’ Starting from this response as a nucleus the Litany developed a number of special petitions with varying refrains: at a later stage it incorporated a number of invocations of saints, which grew so largely in bulk as to overshadow at times the older petitions. The Litany was the first form of Prayer to be translated in England at the Reformation. The invocations of saints were first cut down to very small proportions in order to restore the ancient character of the Litany, and then subsequently were cut out altogether.] The English translation was first published, without musical notes, in the reign of Henry VIII., on May 27, 1544, five years before the appearance of King Edward the Sixth’s ‘First Prayer-Book.’ Three weeks later—on June 16—another copy, with the Plain-song annexed, was printed, in London, by Craiton; the Priest’s part in black notes, and that for the choir in red. It would seem, however, that the congregations of that day were not quite satisfied with monosson Plain-song; for, before the end of the year, Craiton produced a third copy, set for five voices, ‘according to the notes used in the Kynges Chapel.’

This early translation was, in all probability, the work of Archbishop Cranmer, who refers to it in a letter preserved in the Record Office. And, as he recommends the notes (or similar ones) to be sung in a certain new procession which he had prepared by the King’s command, there is little doubt that it was he who first adapted the English words to the ancient Plain-song. If this surmise be correct, it supplies a sufficient reason for the otherwise unaccountable omission of the Litany in Marbeck’s ‘Booke of Common Praier Noted.’

In the year 1560—and, again, in 1565—John Day printed, under the title of ‘Certaine notes set forth in foure and three partes, to be song at the Morning Communion, and Evening Prayer,’ a volume of Church Music, containing a Litany, for four voices, by Robert Stone, a then gentleman of the Chapel Royal. According to the custom of the time, the Canto fermo is here placed in the Tenor, and enriched with simple, but exceedingly pure and euphonious harmonies, as may be seen in the following example, which will give a fair idea of the whole:—
The Rev. J. Jebb has carefully reproduced this interesting composition in his 'Choral Responses and Litanies,' together with another Litany by Byrd (given on the authority of a MS. preserved in the Library of Ely Cathedral), and several others of scarcely inferior merit. The only parts of Byrd's Litany now remaining are, the Cantus and Bassus: in the following example, therefore, the Altus and Tenor (containing the Plain-song) are restored, in accordance with the obvious intention of the passage, in small notes:

\[ O \text{ God the Father, of Heaven, have mercy upon us, miserable sinners, etc. } \]

All these Litanies, however, and many others of which only a few fragments now remain to us, were destined soon to give place to the still finer setting by Thomas Tallis. Without entering into the controversy to which this work has given rise, we may assume it as proved, beyond all possibility of doubt, that the words were originally set by Tallis in four parts, with the Plain-song in the Tenor. In this form, both the Litany and Proses are still extant in the 'Clifford MS.' (dated 1570), on the authority of which they are inserted in the valuable collection of 'Choral Responses' to which allusion has already been made; and, however much we may be puzzled by the consecutive fifths in the Response, 'And mercifully hear us when we call upon Thee,' and the chord of the 4 in 'We beseech Thee to hear us, Good Lord,' we cannot but believe that the venerable transcription is, on the whole, trustworthy. Tallis's first Invocation, which we subjoin from the 'Clifford MS.,' is, alone, sufficient to show the grandeur of the composer's conception.

More than one modern writer has condemned the celebrated five-part Litany printed by Dr. Boyce as an impudent corruption of this four-part text. Dean Aldrich goes so far as to assure Dr. Fell, in a letter still extant, that 'Barnard was the first who despoilt it.' The assertion is a rash one. It is too late, now, to ascertain, with any approach to probability, the source whence Barnard's version, printed in 1641, was, in the first instance, derived. There are, in truth, grave difficulties in the way of forming any decided opinion upon the subject. Were the weakness of an unpractised hand anywhere discernible in the counterpoint of the latter composition, one might well reject it as an 'arrangement'; but it would be absurd to suppose that any musician capable of deducing the five-part Responses, 'Good Lord, deliver us,' from that in four parts, would have condescended to build his work upon another man's foundation.

\[ Good \text{ Lord, deliver us. Good Lord, deliver us. } \]

The next Response, 'We beseech Thee to hear us, Good Lord,' presents a still more serious error. The Canto fermo of this differs so widely from any known version of the Plain-song melody that we are compelled to regard the entire Response as an original composition. Now, so far as the Cantus and Bassus are concerned, the two Litanies correspond, at this point, exactly; but, setting all prejudices aside, and admitting the third chord in the 'Clifford MS.' to be a manifest lapsus calami, we have no choice but to confess, that, with respect to the mean voices, the advantage lies entirely on the side of the five-part harmony. Surely, the writer of this could—and would—have composed a Treble and Bass for himself!

\[ We \text{ beseech Thee to hear us, Good Lord. } \]

From the 'Clifford MS.'

\[ We \text{ beseech Thee to hear us, Good Lord. } \]

From the Five-part Litany.

LITANY

Vol. II
The difficulties we have pointed out with regard to these two responses apply, with scarcely diminished force, to all the rest; and, the more closely we investigate the internal evidence afforded by the double text, the more certainly shall we be driven to the only conclusion deducible from it: namely, that Tallis has left us two Litanies, one for four voices, and the other for five, both founded on the same Plain-song, and both harmonised on the same basses, though developed, in other respects, in accordance with the promptings of two totally distinct ideas.

The four-part Litany has never, we believe, been published in a separate form. The best edition of that in five parts is, undoubtedly, Dr. Boyce's; though Messrs. Oliphant, and John Bishop, have done good service, in their respective reprints, by adapting, to the music of the Preeces, those 'latter Suffrages,' which, having no place in the First Prayer-Book of King Edward VI., were not set by any of the old composers. Some later editions, in which an attempt has been made at 'restoration,' have, it is to be feared, only resulted in depraving the original text to a degree previously unknown.

In recent years the ancient Sarum Plain-song of the Litany has been reproduced and set to the words of the English Litany; this is far richer than Cranmer's form.

LITOLFF, HENRY CHARLES, was born in London, Feb. 6, 1818. His father, a French Alsatian soldier taken prisoner by the English in the Peninsula War, had settled in London as a violinist after the declaration of peace, and had married an Englishwoman. In the beginning of the year 1831 Henry Litolf was brought by his father to Moscheles, who on hearing the boy play the piano, was so much struck by his unusual talent, that he offered to take him gratis as a pupil; and under his generous care Litolf studied for several years. He made his first appearance (or one of his first) at Covent Garden Theatre, July 24, 1832, as 'a pupil of Moscheles, 12 years of age.' In his 17th year a marriage of which the parents disapproved obliged him to leave England and settle for a time in France. For several years after this event Litolf led a wandering life, and during this period he visited Paris, Brussels, Leipzig, Prague, Dresden, Berlin, and Amsterdam, giving in these towns a series of very successful concerts. In 1851 he went to Brunswick, and undertook there the business of the music-publisher Meyer, marrying, as his second wife, the widow of the owner. In 1860 he transferred this business to his adopted son, Theodor Litolf, and he, in 1861, started the well-known 'Collection Litolf,' as a cheap and accurate edition of classical music, which was among the earliest of the many series of similar size and aim now existing. It opened with the sonatas of Beethoven, Mozart, and Haydn (vols. i.-iv.). Henry Litolf himself went to Paris. His third wife was a Comtesse de Larochefou-

As a pianist Litolf's rank is high; fire, passion, and brilliancy of execution were combined with thought and taste in his playing. Had it been also correct, it would have reached the highest excellence. In his works, however, there is great inequality; beautiful and poetic ideas are often marred by repetition and a want of order, and knowing what the author's true capacity is, the result is a feeling of disappointment. About 115 of his works, including several operas, a violin concerto, a short oratorio, 'Ruth et Boaz' (1869), and much chamber music have been published. Among the best of them may be reckoned some of his pianoforte pieces, such as the well-known 'Spannied,' a few of his overtures and his symphony-concertos, especially Nos. 3, 4, and 5; the latter are remarkable for their wealth of original ideas in harmony, melody, and rhythm, and for their beautiful instrumentation (see Berlioz's Les Musiciens, p. 303).

LITUUS. A Roman instrument used by the cavalry, and answering to the 'cavalry trumpet' of modern armies. It was cylindrical in bore with an expanding bell-mouth, and was turned back upon itself only at the bell-end, so that its general form was that of a crooked staff, or the letter J. The pitch of one discovered in 1827 at Cervetri, and now preserved in the palace of the Vatican at Rome is $g$, an octave higher than the Bucina ($a$), and a major third higher than the modern cavalry trumpet of the British army, which is in $e$.

LIVERPOOL MUSICAL FESTIVALS.

These have not taken place with regularity. The first was held in 1784, the next in 1790, and the next in 1799. They were then suspended till 1823, 1830, and 1836 (Oct. 4-7, Sir G. Smart conductor), when Mendelssohn's 'St. Paul' was performed for the second time, and for the first time in England. Up to this date the concerts had been held in churches, but the next Festival took place at the Philharmonic Hall in 1874 (Sept. 29-Oct. 1)—conductor Sir Julius Benedict. The St. George's Hall, containing rooms available for music, was opened in September 1854.

The Philharmonic Society was founded Jan. 10, 1840, and opened its hall August 27, 1849. There are twelve concerts every year, six before and six after Christmas. Sir Julius Benedict succeeded Mr. Alfred Mellon as conductor April 9, 1867. [He was succeeded as conductor of the Philharmonic Society in 1880 by Max Bruch, and he by Sir Charles Hallé in 1882; after his death Dr. F. H. Cowen was appointed, and has held the post from 1896 to the present time. No festival has taken place since 1874.] The Liverpool Musical Society, which formerly gave oratorio concerts in St. George's Hall, has
been extinct since 1877. — The St. George's Hall has a very fine organ by Willis, on which performances were regularly given by Mr. W. T. Best.

LLOYD, CHARLES HARFORD, born Oct. 18, 1849, at Thornbury, Gloucestershire, son of Edmund Lloyd, a solicitor, was educated at Thornbury Grammar School and Rossall School. From the latter he went to Magdalen Hall (now Hertford College), Oxford, in Oct. 1868 as the holder of an open classical scholarship. He graduated M. A. 1871, B. A. 1872, M. A. 1875, taking a second class in the Final Theological School, but it was not till 1890 that he proceeded to the degree of M. A. D. While an undergraduate he was instrumental in establishing the Oxford University Musical Club, and was elected its first president. This society (see University Musical Societies) has done a great deal for the advancement of classical music in the University. It still flourishes, and up to December 1904 its performances of chamber music had been given. Dr. Lloyd was appointed organist of Gloucester Cathedral in June 1876 as successor to Dr. S. S. Wesley. In this capacity he conducted the Festivals of the Three Choirs in 1877 and 1880. In September 1882 he succeeded Dr. C. W. Corfe as organist of Christ Church Cathedral, Oxford, and in the same year became conductor of the Choral Society in succession to Sir Walter Parratt. From 1887 to 1892 he taught organ and composition at the Royal College of Music. In 1892 he succeeded Sir J. Barnby as professor and musical instructor of Eton College. During 1902-3 he was engaged on the music of a new edition of Church Hymns. In 1902 he was placed on the council of the Royal College of Music. His works, though few in number, have obtained well-deserved success. His themes are original and beautiful, and their treatment shows much experience and knowledge of effect. His part-writing is excellent, and in the structure of his compositions he displays a moderation and self-restraint which cannot be too highly commended. His published works are as follows:—

1. Cantatas.—Hercy and Leander,' for solo, chorus and orchestra (Hereford Festival, 1884); 'Song of Bidder,' for soprano solo and chorus (Hereford Festival, 1885); 'Andromache,' for solo, chorus and orchestra (Gloucester Festival, 1886); 'The Longbeards,' for male chorus and P. F. parts, 1887; 'A Song of Judgment' (Hereford, 1889); 'Sir Ulysses and Lady Elise' (Hereford, 1884); 'A Hymn of Thanksgiving' (Hereford, 1897) motet, 'The Sons of the Knights' (Gloucester, 1891).

2. Choruses and incidental music to 'Aesthetic' (see Greek Plays given, p. 224), for male chorus, flutes, clarinets, and harp, 1887; 'The Gleamer's Harp,' for female chorus.

3. Services in E flat (Festival, Edinburgh service in D and A flat; E flat and G flat). Magnificat and Nunc Dimittis in F, solo, chorus, and orchestra (Gloucester Festival, 1886).

4. Anthems.—'All things are worthy eight voices unaccompanied,' 'Blessed is he,' with full orchestral accompaniment (Gloucester Festival, 1890); 'Pax tibi, Domine,' 'Give the Lord the honor,' etc. Duo concertante for clarinet and piano.

5. Motets:—In D minor; concert In F minor (MS. written for Gloucester Festival, 1890), and other pieces.

6. Madrigals, five parts—'When At Corinth's eye,' Various parts—'The Rose Dawn' (eight parts); 'Allen-a- Dale,' with orchestral accompaniment, 'Twelve by the dock' (female voices), etc. Also several songs. An interesting biographical article appeared in the Musical Times for June 1899.

LLOYD, EDWARD — son of Richard Lloyd, afterwards assistant lay vicar of Westminster Abbey, and assistant vicar choral of St. Paul's (born March 12, 1833, died June 28, 1853), and Louisa, sister of Dr. John Larkin Hopkins—was born March 7, 1845, and received his early musical education in the choir of Westminster Abbey under James Turle. [His was a curious instance of a voice which never 'broke,' but deepened gradually from treble to tenor.] In 1866 he obtained the appointment of tenor singer in the chapels of Trinity and King's College, Cambridge, which he resigned in 1867 in order to join the choir of St. Andrews, Wells Street, under Barnby; he retained this post on being appointed a Gentleman of the Chapel Royal in 1869, a place which he held about two years. He has since devoted himself entirely to concert-singing. He made his first great success at Gloucester in 1871, in Bach's St. Matthew Passion, and in 1874 won universal admiration by his singing of 'Love in her eyes sits playing' at the Handel Festival at the Crystal Palace. In a very short time, Lloyd reached a position of great importance, both as an oratorio and concert-singer. [No tenor was ever associated with the production of so many important works in the concert-room. Besides many other tenor parts, he created those in the 'Martyr of Antioch,' 'The Redemption, 'Mors et Vita,' 'Rose of Sharon,' 'Golden Legend,' 'Saint Ludmilla,' 'Judith,' 'Voyage of Maeldune,' 'Eyen,' 'The Swan and the Skylark,' 'King Saul,' 'Caractacus,' and 'The Dream of Gerontius.' The title-part in this was the last part of importance studied by Lloyd before his retirement from the profession, while still at the top of his powers, in 1900, when he had a series of farewell concerts, and then went to live in Sussex. Lloyd's exceptional value as a festival tenor was perhaps not fully realised until his retirement, for no one of his successors had a voice equal to his in range and beauty, or so comprehensive a talent. In looking back on Lloyd's career of about thirty years as a leading tenor, something more than passing mention should be made of his unvarying success in singing Wagner's music in the concert-room. He made the 'Preislied' a familiar melody to thousands of people who had never heard 'Die Meistersinger.' At different times he was heard in the third acts of 'Lohengrin' and 'Tannhäuser,' in the great duet in the first act of 'Die Walküre,' and in the Forging Songs of 'Siegfried.' w. h. h.; additions from S. H. F., Musical Times for Jan. 1899, etc.]

LO, HE COMES.—With CLOUDS DESCENDING, the first line of the hymn which is usually sung to the tune called HELMSLEY, or OLIVERS. This tune claims a notice on account of the various opinions that have been expressed respecting its origin. The story runs that Thomas Oliver, the friend of John Wesley,
was attracted by a tune which he heard whistled in the street, and that from it he formed the melody to which were adapted the words of Cennick and Wesley's Advent hymn. The tune heard by Olivers is commonly said to have been a Hornpipe danced by Miss Catley in the 'Golden Pippin,' a burlesque by Kane O'Hara, but this seems inconsistent with chronology. The hymn-tune appeared first, as a melody only, in the second edition of Wesley's 'Select Hymns with Tunes annexed,' 1765, under the name of 'Olivers,' and in the following form:—

In 1769 an improved version, in three parts, was published by the Rev. Martin Madan in the Lock 'Collection of Hymn and Psalm Tunes.' It is there called 'Helmsley,' and under that name became widely popular:

But at this time the 'Golden Pippin' was not even in existence. O'Keeffe, who possessed the original MS., tells in his Recollections that it was dated 1771. The burlesque, in three acts, was produced at Covent Garden in 1773; it failed at first, but obtained some success when altered and abridged. The source from whence 'Olivers' was derived seems to have been a concert-room song commencing 'Guardian angels, now protect me,' the music of which probably originated in Dublin, where it was sung by a Mr. Mahon, and no doubt also by Miss Catley, who resided in the Irish capital from 1763 to 1770. The melody of 'Guardian Angels' is as follows:—

This melody was not in the 'Golden Pippin' as originally written, but (adapted to the words of the burlesque) was introduced into it in 1776 in the place of a song by Giordani, and was sung by Miss Catley in the character of Juno. The published score of the 'Golden Pippin' does not contain any hornpipe, but such a dance may have been interpolated in the action of the piece. It will be noticed that the resemblance between 'Olivers' and 'Guardian angels' extends only to the first part of the tune, the second part being wholly different. On the other hand, the hornpipe corresponds with the hymn-tune throughout, and with 'Helmsley' more closely than with 'Olivers.' In 1765, when the latter was published, Miss Catley was in Ireland, and did not return to London until five years afterwards, and if the hornpipe was not of earlier date than the 'Golden Pippin,' it seems to follow that instead of the hymn-tune having been derived from the hornpipe, the latter was actually constructed from the hymn-tune, which by that time had become a great favourite. [It was pointed out by Mr. G. E. P. Arkwright in the Musical Times for 1901, p. 195, that the tune occurs in Arne's 'Thomas and Sally,' the date of which has usually been given as 1743. Even if, as Mr. F. Kidson showed in Musical Times, 1901, p. 205, there is no evidence that 'Thomas and Sally' was produced before 1760, in that we have an earlier date than any other for the first appearance of the tune. In the published score of Arne's works it stands as follows:—

1 The same words, under the title of 'The Forsaken Nymph,' had been set by Handel, some years before, to a totally different air.
[See also Carter and Catley, in vol. i.]

LOBE, JOHANN CHRISTIAN, musician and writer on music of some eminence, was born May 30, 1797, at Weimar, and owed his musical instruction to the Grand Duchess Maria Paulowna. The flute was his instrument, and after performing a solo at the Gewandhaus, Leipzig, in 1811, he settled at his native place as second flute in the Duke's band. He wrote five operas ('Wittekind,' 'Die Flibustier,' 'Die Fürstin von Granada,' 'Der rote Domino,' 'König und Pächter,' all performed at Weimar), besides overtures and two symphonies for the orchestra, PF. quartets, and other compositions. But it is as a littérateur that he is most interesting to us. He resigned his place at Weimar in 1842, and in 1846 undertook the editing of the Allgemeine Zeitung of Leipzig which post he retained until the termination of that periodical in 1848.

In 1853 he began a publication called Fliegende Blätter für Musik, of which about twenty numbers were published; he then edited the musical department of the Leipzig Illustrirte Zeitung, and made endless contributions to other periodicals. His principal works, some of which have appeared first in the periodicals, are Musikalische Briefe . . . von einer Wohlbekannten, two vols., Leipzig, 1852; Aus dem Leben eines Musiker (Ib. 1859); a Catechism of Composition, and another of music (both have been translated); Consonanzen und Dissonanzen (Ib. 1869); Lehrbuch der musikalischen Composition (4 vols. Ib. 1850 to 1867). To the amateur student these works are all valuable, because they treat of the science of music in a plain and untechnical way, and are full of intelligence and good sense. The Musikalische Briefe, a series of short sketches of the progress of music and of the characteristics of musicians, will be read with interest by many. Some conversations with Mendelssohn appear to be faithfully reported, and bring out some of his traits in a very amusing manner.

LOBGESANG, EINE SYMPHONIE CANTANTE. A well-known work of Mendelssohn's (op. 52), composed for the Gutenfels festival, and first performed at the Church of St. Thomas, Leipzig, in the afternoon of June 25, 1840. The form of the work is no doubt due to Beethoven's Ninth Symphony, and in Germany it is taken as the second of Mendelssohn's published symphonies. Mendelssohn was engaged during 1838 and 1839 on a symphony in B♭, which he often mentions in his letters, and at last speaks of as nearly complete. No trace of it has, however, been found. Is it possible that he can have converted it into the orchestral movements of the Lobgesang, the first of which is also in B♭? It was performed the second time at Birmingham, Sept. 23, 1840 (Mendelssohn conducting); and after this performance was considerably altered throughout—including the addition of the entire scene of the Watchman—and published by Breitkopf & Hartel early in 1841. First performances, as published—Leipzig, Nov. 27, 1840; Gloucester Festival, Sept. 10, 1841; London, Sacred Harmonic Society, March 10, 1843. The selection of the words was doubtless in great measure Mendelssohn's own, though the title 'Symphonie-Cantate' was Klingemann's. The English adaptation was made with his concurrence by Mr. J. A. Novello, to whom, according to rumour, more of the English texts of Mendelssohn's works is due than is generally known. The phrase (a favourite one with Mendelssohn) with which the symphony opens, and which forms the coda to the entire work, is the Intonation to the eighth Tone for the Magnificat.

LOBKOWITZ. A noble and distinguished Austrian family, founded early in the 15th century, by Nicholas Chuzy von Ujezd, and deriving its name from a place in Bohemia. The country seat of the family is at Raudnitz, near Theresienstadt, and its town residence is the well-known palace on the Lobkowitz-Platz, Vienna. Two princes of this race have been closely and honourably connected with music.

1. FERDINAND PHILIP was born at Prague, April 17, 1724. By the death of his father and two elder brothers he became the head of the house before he was fifteen. Gluck was in his service, and was much aided in his early success by the assistance of the Prince. The two were present together at the coronation of Francis I. (Sept. 28, 1745); after which they went to London in company with the Duke of Newcastle, who had represented the English Court at the coronation. There Lobkowitz is said to have lived in a house of the Duke's for two years, and it was during this time that Gluck produced his operas at the King's Theatre, and appeared in public in the strange character of a performer on the musical glasses. [See Gluck, ante, p. 183; Harmonica, p. 297.] A story is told by Burney of his having composed a symphony bar by bar alternately with Emanuel Bach. The feat was an absurd one, but it at least shows that he had considerable practical knowledge of music. He died at Vienna, Jan. 11, 1784, and was succeeded by his son JOSEF FRANZ MAXIMILIAN, born Dec. 7, 1772. This is the prince whose name is so familiar to us in connection with Beethoven. He seems, notwithstanding the temptations of his immense early wealth, to have been an exemplary character, with no vices.

1 See Mendelssohn's Letter, Nov. 18, 1840.
2 Comp. Burney, Hist. iv, 402.
and with no fault but an incon siderate generosity rising to prodigality, which ultimately proved his ruin. He married Princess Marie Caroline Schwarzenberg, August 2, 1792. His taste for music was an absorbing passion. He played both violin and violoncello, and had a splendid bass voice, which he cultivated thoroughly and with success. He maintained a complete establishment of orchestra, solo and chorus singers, with Wranitzky and Cartellieri at their head, for the performances of masses, oratorios, operas, symphonies, etc. When Beethoven arrived at Vienna in Nov. 1792, Lobkowitz was twenty, and the two young men soon became extremely intimate. True, beyond the frequent mention of his name in Rie's Recollections, there is not much definite proof of this; but it is conclusively shown by the works dedicated to him by Beethoven; for we must remember that the dedication of a work by this most independent of composers, was, in nineteen cases out of twenty, a proof of esteem and affection. The works are these—and excepting those inscribed with the name of the Archduke Rudolph they form the longest and most splendid list of all his dedications:—six Quartets, op. 15 (1801); Sinfonia Eroica, op. 55 (1806); Triple Concerto, op. 56 (1807); the 5th and 6th Symphonies— in C minor and Pastorale (1808)—shared by Lobkowitz with Rasoumowsky; Quartet in E, op. 74 (1810); and the Liederkreis, op. 98 (1816). We must not suppose that the course of such a friendship as this betokens was always smooth; the anecdote told on p. 222 of vol. i. of this work, shows that Prince Lobkowitz, like all the intimates of Beethoven, and other men of genius, had occasionally a good deal to put up with. No doubt the Prince was a kind and generous friend to the composer. It was he who advised him to apply for the position of composer to the opera, and promoted two profitable concerts for him in his own palace and with his own band in 1807. Two years later he joined Kinsky and the Archduke in subscribing to Beethoven's annuity, contributing 700 florins (paper) per annum. On Jan. 1, 1807, an association of noblemen, with Lobkowitz at its head, took charge of the Court theatres, and during 1810, 1811, and 1812, the Prince had the sole direction of the opera. The anecdotes by eye-witnesses of his tact and generosity in this position are many, but we have no room for them here. Nor are others wanting to testify to his enlightened zeal in reference to other musicians besides Beethoven. He was one of the promoters and founders of the great Gesellschaft der Musikfreunde in Vienna, and sang the bass solos at the second performance of Alexander's Feast, Dec. 3, 1812 [see ante, p. 162]. He had Haydn's 'Creation' translated into Bohemian, and performed it at Raudnitz. In addition to his great expenditure on music, he, like Kinsky, raised, equipped, and maintained a body of riflemen during the campaign of 1809. At length came the depreciation in the Austrian currency, the bankruptcy of the Government, and the Finance-patent of 1811. Lobkowitz was unable to change his habits or reduce his expenditure, and in 1813 his affairs were put into the hands of trustees, and he left Vienna for the smaller spheres of Prague and Raudnitz. By the Finance-patent Beethoven's 700 florins were reduced to 280 flor. 26 kr. in Einlösungsscheine—all that the trustees had power to pay. Beethoven was clamorous, and his letters are full of complaints against the Prince—most unjust as it turned out, for early in 1815, through the Prince's own exertions, the original amount was restored with arrears. Beethoven acknowledged this by the dedication of the Liederkreis. On Jan. 24, 1816, the Princess Lobkowitz died, and in less than a year, on Dec. 16, 1816, was followed by her husband. A. W. T.

LOCATELLI, Pietro, a celebrated violinist, was born—like Lollia and Piatti—at Bergamo in 1693, and was still very young when he became a pupil of Corelli at Rome. Very little is known of his life, but he appears to have travelled a good deal, and finally to have settled at Amsterdam, where he established regular public concerts, and died April 1, 1764. [Date communicated by Mr. Arthur F. Hill.] There can be no doubt that Locatelli was a great and original virtuoso. As a composer we must distinguish between a number of caprices and études—which he evidently wrote merely for practice, to suit his exceptional powers of execution, and which have no musical value—and the sonatas and concertos, which contain very graceful and pathetic movements, and certainly prove him to have been an excellent musician. In these serious works he certainly shows himself as a worthy disciple of his great master. All the more striking is the contrast when we look at his caprices and études. Here his sole aim appears to have been to endeavour to enlarge the powers of execution on the violin at any price, and no doubt in this respect he has succeeded only too well; for, not content with legitimately developing the natural resources of the instrument, he oversteps all reasonable limits, and aims at effects which, being adverse to the very nature of the violin, are neither beautiful nor musical, but ludicrous and absurd. A striking example of this tendency of his is to be found in a caprice entitled, 'Le Labyrinthis,' where the following arpeggiando passages occur:—

---

1 Beethoven nicknames him 'Prince Fitzl Pitul;'—but then he nicknames every one.
This savours strongly of charlatanism, and it is astonishing to find a direct pupil of Corelli one of the first to introduce such senseless feats of execution into the art of violin-playing. Wasielewsky not unjustly speaks of him as the great-grandfather of our modern "Finger-heroes" (Fingerhelden).

Locatelli published ten different works:

2. Sonatas for flute. Amsterdam, 1724.
3. L'arte del violino, containing 12 concerti grossi and 24 concertos, 1725.
4. Six 'Introduzioni teatrali' and six concertos, 1725.
5. Six sonatas en trio. 1727.
6. Six concerti a quattro. 1732.
7. Six concerti a quattro. 1733.
8. Trios. 2 violins and bass. 1741.

Modern editions of some of his Sonatas and Caprices have been issued by Witting, Alard, and David.

LOCHABER NO MORE. A song and melody used for a great number of years in the north of Scotland, and by Scottish regiments as a dirge or lament. Without entering into the vexed question as to its Scottish or Irish origin, the following are definite facts relative to the tune.

The earliest known copy of the melody is one called "King James' March to Ireland" (or "Irland"), which appears to have been contained in two manuscript collections of Scots and other airs, written in tablature for the Lyra Viola. One, known as the Leyden, and the other, the Blaikie MSS., both dated 1692, and the other written by the same hand, about that period. These MSS. are both lost, and only modern transcripts remain to us, one in the Advocates' Library, Edinburgh, and the other in the Wighton Library, Dundee. Translated as nearly as may be (for the time-values are not marked, and the barring is inaccurate), this copy of the tune stands thus:

King James' March to Ireland.

From the Leyden MS.

Another early copy, simply named 'King James' March,' occurs in a manuscript of the date 1710 in the John Glen collection. Closely following, in period, the first named, is an air bearing considerable resemblance to the above in the eleventh, 1701, and later editions of Playford's Dancing Master.

Reece's Maggot.

From The Dancing Master, 1701.

These tunes have nothing of a pathetic character about them, but in Aria di Camera published in London by Daniel Wright about 1727 (see Irish Music, bibliography) is 'Limbick's Lamentation,' and here we get the tune first associated with a lament, and having the flat seventh so characteristic of 'Lochaber.'

Limbick's Lamentation.

From Aria di Camera, circa 1727.

Under the title 'Irish Lamentation' the same air occurs in Daniel Wright's collection of country dances; his Compleat Tutor for ye Flute, and in one of Walsh's country dance books, all issued about 1734-35.

Meanwhile Allan Ramsay included in the second volume of The Tea-Table Miscellany circa 1726-27, "A song to the tune of Lochaber no More," beginning 'Farewell to Lochaber.' This was apparently written by Ramsay himself to supersede an existing song now lost, or to an air so named; it is the one now associated

1 This may or may not be a misspelling of 'Limerick.' No other copy yet known prior to Bowling's, 1809, names the air 'Limerick's Lamentation,' therefore it is scarcely safe to build theories connecting the air with either of the sieges of that place.
with the melody. In *The Merry Musician or a Cure for the Spleen*, vol. iii. circa 1729, we first find Ramsay’s song united to the music, and headed:—

Lochaber no more.

The Scottish publications of the melody begin with one under the ‘Lochaber’ title in Adam Craig’s collection, Edinburgh, 1730 (no words), and in Thomson’s *Orpheus Caledonius* vol. ii. 1738, with the song followed by later copies. Another curious claim to the melody comes in Watts’s edition of the ‘Lover’s Opera,’ printed in 1730, where the old name of the tune is given as ‘Since Celia’s my foe.’ This song was written by Thomas Duffet, and published in his *New Poems, Songs*, etc., 1676, where it is directed to be sung ‘To the Irish Tune’; there is no music printed in Duffet’s work, and his verses, set to quite a different melody from ‘Lochaber,’ is in Playford’s *Choice Ayres*, 1676. The title given in Watts’s ‘Lover’s Opera’ is evidently either a mistake, or Duffet’s words have been used with the air we are dealing with at a later period. Still another claim has been made, viz. that the old Scottish ballad air, ‘Lord Randal,’ first published in Johnson’s *Scots Musical Museum*, vol. iv. 1792, is the original of ‘Lochaber.’ ‘Lord Randal’ is a melody of one strain which bears considerable resemblance to ‘Lochaber,’ but as this does not appear until a hundred years after the perfect copy of the melody the claim may be dismissed as doubtful.

F. K.

LOCKE, Matthew, born at Exeter about 1630, was a chorister of the cathedral there in 1638-41 under Edward Gibbons, and afterwards studied under William Wake. [This last is denied in the *Quellen-Lexikon*, but without any evidence given.] He and Christopher Gibbons composed the music for Shirley’s masque, ‘Cupid and Death,’ ‘represented at the Military Ground in Leicester Fields’ before the Portuguese Ambassador, March 26, 1653. In 1656 he published his ‘Little Consort of Three Parts’ for viols or violins, composed, as he tells us, at the request of his old master and friend, William Wake, for his scholars. He composed part of the music for Davenant’s ‘Siege of Rhodes’ in 1656, and sung in it himself. He composed the music, ‘for ye king’s sagbutts and cornets,’ performed during the progress of Charles II. from the Tower through the city to Whitehall on April 22, 1661, the day before his coronation, for which he received the appointment of Composer in Ordinary to the King. [He (or a namesake) married Alice, daughter of Edmund Smyth, Esq. of Armables, Herts, on March 8, 1663-64, and is stated in the register to be thirty years old at the time. There was another Matthew Locke, and in Aubery’s *Lives* (ii. 254) it is stated that one or other of them married ‘Mr. Garson’s daughter, of Herefordshire.’] He composed several anthems for the Chapel Royal, and on April 1, 1666, produced there a *Kyrie* and *Credo*, in which he departed from the ordinary usage by composing different music to each response. This occasioned some opposition on the part of the choir, in consequence of which he published his composition, with an angry preface, on a folio sheet, under the title of *Modern Church Music; Pre-Accused, Censur’d, and Obstructed in its Performance before His Majesty*, April 1, 1666, *Vindicated by the Author, Matt. Lock, Composer in Ordinary to His Majesty*. (Of this publication, now excessively rare, there is a copy in the library of the Royal College of Music. Another is in the Fitzwilliam Museum, Cambridge.) To this period may probably be assigned the production of 13 anthems for 3 and 4 voices, all contained in the same autograph MS., which Roger North describes as ‘Psalms to music in parts for the use of some virtuoso ladies in the city.’ Soon afterwards, having, it is assumed, become a convert to the Romish faith, he was appointed organist to the queen. He had in 1664 composed ‘the instrumental, vocal, and recitative music’ for Sir Robert Stapylton’s tragi-comedy, ‘The Stepmother,’ and in 1667 renewed his connection with the theatre by furnishing the instrumental music for Dryden and Davenant’s alteration of ‘The Tempest,’ the vocal music being supplied by Humfrey and Banister. In 1672 Davenant’s alteration of ‘Macbeth,’ with the songs and choruses from Middleton’s ‘Witch’ introduced, was produced at the theatre in Dorset Garden; and Downes, the prompter, in his *Resitus Anglicanus*, 1708, expressly states that the vocal music was composed by Locke. The very remarkable music then performed remained unpublished until about the middle of the 18th century, when it appeared under the editorial care of Dr. Boyce, with Locke’s name as composer, and as his it was long undisputedly accepted. But Downes’s proved inaccuracy in some other things at length occasioned doubts of the correctness of his statement as to the authorship of the ‘Macbeth’ music, and eventually Locke’s right to it was denied and its composition claimed by some for Purcell, by others for Eccles, and by others again for Leveridge. No positive proof, however, has been adduced in support of
any one of these claims, and until such is forthcoming it would be premature to set aside the long-standing traditional attribution of the music to Locke. [See Macbeth Music.] In 1673 Locke composed the music (with the exception of the act tunes, by Draghi) for Shadwell’s ‘Psyche,’ which he published in 1675, under the title of ‘The English Opera,’ together with his ‘Tempest’ music, prefaced by some observations, written with his usual asperity, but curious as an exposition of his views of the proper form for opera. The work itself is constructed upon the model of Lully’s operas. In 1672 an extraordinary controversy commenced between Locke and Thomas Salmon, who had published An Essay to the Advancement of Musick by casting away the Perplexity of different Cliffs and writing all sorts of musick in one universal character. Locke attacked the work in Observations upon a late book entitled An Essay, etc., written in a most acrimonious and abusive tone, to which Salmon replied in A Vindication of his essay, bristling with severity, and Locke in 1673 retorted in The Present Practice of Musick vindicated, &c. To which is added Duellum Musicum, by John Phillips [Milton’s nephew]. Together with a Letter from John Playford to Mr. T. Salmon in confutation of his Essay, which closed the dispute. Of its merits it is sufficient to observe that the old practice has continued in use to this day, whilst Salmon’s proposed innovation was never accepted, and probably, but for the notice taken of it by Locke, would have long ago passed into oblivion. In 1673 Locke published a small treatise entitled Melothesia, or Certain General Rules for playing upon a Continued Bass, with a Choice Collection of Lessons for the Harpsichord or Organ of all sorts, said to be the first of the kind published in England. His compositions were numerous and various. His anthem, ‘Lord, let me know mine end,’ was printed by Boyce, and several other anthems exist in MS. in the Tideway collection, the Fitzwilliam Museum, at Westminster Abbey, Ely, and elsewhere. Some anthems and Latin hymns are in ‘Cantica Sacra, 2nd set,’ 1674; some hymns in ‘Harmonia Sacra,’ 1688 and 1714; songs in The Treasury of Musick,’ 1669; ‘Choice Ayres, Songs and Dialogues,’ 1676-84; and The Theater of Music,’ 1687; and eight three-part vocal compositions by him (including ‘Never trouble thyself at the times or their turning,’ reprinted in some modern collections) in The Musical Companion,’ 1667. Instrumental compositions by him are printed in Comty Masquing Ayres,’ 1662; ‘Musick’s Deight on the Cithern,’ 1666; ‘Apollo’s Banquet,’ 1669; ‘Musick’s Handmaid,’ 1678 (reprinted in J. S. Smith’s ‘Musica Antiqua’); and Greeting’s ‘Pleasant Companion,’ 1680. In several of these is ‘A Dance in the Play of Macbeth,’ evidently written for an earlier version than Davenant’s. A song by him is in D’Urfey’s ‘Pool turned Critic’ (see D’Urfey’s Songs, 1683). The library of the Royal College of Music contains the autograph MS. of a ‘ Consort of floure Parts’ for viols, containing six suites, each consisting of a fantasia, courante, ayre, and saraband, which Roger North (1728) tells us was ‘the last of the kind that hath been made.’ Autographs are in the library of King’s College, Cambridge, the Royal College of Music, and the Brit. Mus. (Add. MSS. 17,501, 31,437, 17,799). Lockedy in August 1677. He is said to have been buried in the Savoy, but the fact cannot be verified, the existing registers extending no farther back than 1680. Purcell composed an elegy on his death, printed in ‘Choice Ayres,’ etc., Book II. 1689. A portrait of him is in the Music School, Oxford. w. H. H.; with additions from Diet. of Nat. Biography, etc.

LOCKEY, CHARLES, son of Angel Lockey of Oxford, was born at Thatcham near Newbury, March 28, 1629, and was admitted a chorister of Magdalen College, April 1, 1628, remaining so until 1836, when he went to Bath to study under Edward Harris. In 1642 he became a pupil of Sir George Smart, and lay clerk of St. George’s Chapel, Windsor. In 1643 he was appointed vicar choral of St. Paul’s Cathedral. In 1646 he was engaged (as the youngest of four tenors) for the Birmingham Festival, and allotted the air ‘Then shall the righteous,’ in the first performance of Elijah.’ On hearing him rehearse the song, Mendelssohn immediately requested him also to sing ‘If with all your hearts,’ which had before been assigned to another singer. ‘A young English tenor,’ says the composer, ‘sang the last air so very beautifully that I was obliged to collect myself to prevent my being overcome, and to enable me to beat time steadily.’—In April 1818 Lockey was appointed a gentleman of the Chapel Royal. He married, May 24, 1828, Miss Martha Williams, contralto singer, who died at Hastings, August 28, 1897. In 1859 an affection of the throat deprived him of voice and compelled his retirement. He died at Hastings, Dec. 3, 1901. w. H. H.

LOCO (Lat.), ‘in (the usual) place.’ A term used to re-establish the actual pitch of notes, after their transposition an octave higher or lower, as is explained under ALTISSIMUS. LOCKEY (Lat. Modus Locius, Modus Hyperacuolinus). The Eleventh Ecclesiastical Mode: a tonality which can scarcely be said to have any real existence—as it is universally discarded, in practice, on account of its false relation of Mi contra Fa—though, in

1 William Penny’s Art of Composition, or, Directions to play a Thomas pass is mentioned in Cleveland’s Catalogue of Books printed in England since the Dreadful Fire, 1675, and in a catalogue of Henry Playford’s, but no copy has been found.

2 Pepys, who from Nov. 5, 1664 to Dec. 21, 1665, saw ‘Macbeth’ performed seven times, mentions (April 19, 1667) the ‘variety of dancing and musick’ in it.

3 Letter of August 20, 1946.
theory, it necessarily takes its regular place in the series. [See Mi contra Fa.]

Theoretically, the Final of the Locrian Mode is B. Its compass, in the Authentic form, ranges between that note, and its octave above; and its semitones lie between the first and second, and third and fourth degrees. Its Dominant is G (F being inadmissible, by reason of its forbidden relation with the Final), and its Mediant, D. Its Participants are E, and F; its Conceded Modulations, C, and the A below the Final; and its Absolute Initials, B, C, D, and G.

**Mode XI.**

In its Plagal, or Hypolocrian form (Mode XII.) its compass lies between F and the F above; and its semitones fall between the fourth and fifth and the seventh and eighth degrees. Its Final is B; its Dominant, E; and its Mediant, D. Its Participants are G, and C; its Conceded Modulations, A, and the upper F; and its Absolute Initials, G, A, B, C, D, and E.

**Mode XII.**

It will be observed that the actual notes of Modes XI. and XII. correspond, exactly, with those of Modes IV. and V. The reason why the two former are discarded, and the two latter held in good repute, is this. Mode IV. being Plagal, is subject to the 'Arithmetical Division'; *i.e.* it consists of a Perfect Fourth, placed below a Perfect Fifth. But Mode XI. is Authentic; and, by virtue of the 'Harmonic Division,' consists of a *Quinta falsa*, placed below a *Tritonus*—both of which intervals are forbidden, in Plain-song. Again, Mode V. being Authentic, and therefore subject to the 'Harmonic Division,' resolves itself into a Perfect Fifth, below a Perfect Fourth. But, Mode XII. is Plagal; and, under the 'Arithmetical Division,' exhibits a *Tritonus*, below a *Quinta falsa*. [See Modes, the Ecclesiastical.]

A very few plain-song Melodies, and Polyphonic Compositions, are sometimes referred to these rejected Modes: but such cases are exceedingly rare; and it will generally be found that they are really derived, by transposition, from some other tonality.

W. S. R.

**LODER, Edward James,** son of John David Loder (see below), born at Bath, 1813, was in 1826 sent to Frankfort to study music under Ferdinand Ries. He returned to England in 1828, and went back to Germany with the view of qualifying himself for the medical profession, but soon changed his mind and again placed himself under Ries. When he again came back to England he was commissioned by Arnold to compose the music for 'Nourjahad,' an old drama of his to which he had added songs, etc., to convert it into an opera, for the opening of the new English Opera House, then building. The opera was produced in July 1834, and, notwithstanding very general admiration of the music, proved unattractive owing to the poverty of the libretto. In 1835 Loder set Oxenford's 'Dice of Death.' He next entered into an engagement with Dalmaine & Co., the music publishers, to furnish them with a new composition every week, in part performance of which he produced his 'Twelve Sacred Songs,' dedicated to Stern-dale Bennett. As it became necessary that some of the pieces produced under this arrangement should be heard in public, an opera entitled 'Francis I.' was written to incorporate them and produced at Drury Lane in 1838. As might have been expected, so heterogeneous a compound met with little success, although one song, 'The old house at home,' obtained a widespread popularity. ['The Foresters, or twenty-five years since,' and 'The Deerstalkers,' were brought out in 1845 and] 'The Night Dancers,' his finest work, was produced at the Princess's Theatre in 1846, revived there in 1850, and again at Covent Garden in 1860. 'Puck,' a ballad opera, additions to 'The Sultan,' and 'The Young Guard,' were brought out at the Princess's in 1848. His cantata 'The Island of Calypso,' was written for the National Concerts at Her Majesty's Theatre in 1850, but, owing to their cessation, remained unperformed until given at the New Philharmonic Concerts in 1852. 'Raymond and Agnes,' an opera, was produced at Manchester August 14, 1855. Besides these works Loder wrote some string quartets and numerous songs, of which 'The Diver,' 'The brave old oak,' and 'Invocation to the deep' are well known. [After his retirement (see below) a set of twelve songs, six sacred and six secular, was brought out by subscription. Among these, together with several remarkably fine lyrics, there is a setting of an English version of 'Wohin' (immortalised by Schubert), called 'The Brooklet,' which is among the most beautiful and effective songs in existence, quite worthy to stand beside Schubert's setting of the original words.] His compositions are distinguished by the melodiousness of the parts and their skilful instrumentation. He was for several years conductor at the Princess's Theatre, and afterwards at Manchester, but although musically well qualified for the office his want of regular, business-like habits militated greatly against his success. About 1856 he was attacked by cerebral disease, which long afflicted him, and prevented his resuming his old avocations. He died April 5, 1865. Albums of collected songs were issued by Messrs. Novello and Joseph Williams many years after his death.
LODER, Kate Fanny, only daughter of George Loder, and first cousin to E. J. Loder, was born at Bath, August 1825, and commenced playing the pianoforte when a mere child. In her twelfth year she became a pupil of Henry Field, and a year afterwards entered the Royal Academy of Music, where she studied the pianoforte under Mrs. Anderson, and harmony and composition under Charles Lucas. At the end of the first year of her studentship in 1839 she obtained a king's scholarship. Early in 1840 she appeared in public at her uncle's concerts at Bath, and in March at the Royal Academy concerts. In 1841 she was re-elected king's scholar. She quitted the Academy in 1844, in which year she played the Adagio and Rondo from Mendelssohn's G minor Concerto in presence and to the satisfaction of the composer at Mrs. Anderson's concert at Her Majesty's Theatre. She was then appointed professor of harmony at the Academy. She first appeared at the Philharmonic Society, March 15, 1847, when she played Weber's Concerto in Es, and in 1848 (May 29) her performance there of Mendelssohn's G minor Concerto received the unprecedented distinction of an encore. Her reputation was now confirmed, and her public performances frequent. In 1851 she was married to Mr. (afterwards Sir) Henry Thompson, the eminent surgeon. On March 6, 1854, at the Philharmonic Concert, she made her last public appearance. She composed an opera, 'L'Elisir d'Amore' an overture, two string quartets, two sonatas and some studies for the pianoforte, a sonata for pianoforte and violin, and several minor pianoforte pieces. [About 1871 she gradually became paralysed, but up to the end of her life she kept up her enthusiasm for the best music; she was the kindest friend to young artists of all kinds, and was a powerful influence on the art of her time, even after she had ceased to play. It was at her house, on July 7, 1871, that Brahms's 'Requiem' was first performed in England, three years after it was written; she and Cipriani Potter played the accompaniments as a pianoforte duet. She died in London, August 30, 1894.]

LOEILLET, Jean Baptiste, an accomplished flute player and composer, born at Ghent in the second half of the 17th century. At a very early age he reached a high degree of proficiency on the instrument, and in 1702, migrated to Paris, where he composed and published four sonatas for flute alone, a book of...
sonatas for two flutes, and some trios for the same instrument.

In 1765 he established himself in London as a member of the Opera orchestra, and teacher of the flute; and, five years later, organised weekly concerts for amateurs at his house in Hart Street, Covent Garden. He died in London in 1726, leaving a considerable fortune made by his life's work.

He also composed—(1) Six lessons for the harpsichord (Walsh, London); (2) Six sonatas for flutes, hautboy, German flutes, and violins (Walsh, London); (3) Twelve sonatas for violins, German flutes, and common flutes; (4) Twelve solos for a German flute; (5) Twelve suites of lessons for the harpsichord, in most of the keys, with variety of passages and variations throughout the work, London (n.d.). Fétis, Biographie; Bing, Dict. de Mus. E. R. A.

LOESCHHORN, ALBERT, was born June 27, 1819, in Berlin. He was a pupil of Ludwig Berger, and subsequently studied at the Royal Institute for Church Music in Berlin, where from 1851 he was teacher of the pianoforte. The title of Royal Professor was conferred upon him in 1858. For many years he carried on concerts of chamber music in Berlin with eminent success. He has done great service for the advancement of classical music, and by his conscientious and thorough discipline as a teacher many of his pupils have also distinguished themselves. He is most widely known through his numerous studies for the pianoforte, although he has published a long list of other worthy compositions, such as quartets and sonatas; he died in Berlin, June 4, 1905.

C. E.

LOEWE, JOHANN CARL GOTTFRIED, born Nov. 30, 1796, at Loebejuen, between Cöthen and Halle, twelfth and youngest child of a cantor and schoolmaster. Near his home were collieries employing 300 miners, and this underground world, so near in his boyish fancy to the world of spirits, took powerful hold on his imagination, to reappear later when he was composing 'Der Bergmann' ('The Miner'). His father taught him music early, and his singing, especially his power of hitting the right note, having attracted attention, he was offered in 1807 a place in the choir of Cöthen. There he remained two years, hearing Pergolesi's 'Stabat Mater,' and other good music, and went thence to the Gymnasium of the Franke Institution at Halle. Türk, the head of this, was director of the town choral society, and at the twelve annual concerts produced much good music, although he had some curious notions, for Loewe tells that he always omitted the introduction to the Finale of Beethoven's first Symphony (then well known) as 'ludicrous,' and for fear of making the audience laugh. Niemeyer, chancellor of the Gymnasium was proud of the choir, and made them sing to distinguished visitors, among others to Mme. de Staël, who made Loewe a present, and to King Jerome, who at Türk's instigation gave him an annuity of 300 thalers. This enabled him to devote himself entirely to music. He had already become a pianist by studying Bach's 'Wohltemperirtes Clavier,' and he now took daily lessons from Türk, and worked hard at Kirnberger, Marpurg, and Forkel. He also learned French and Italian. Two of his songs of this date, 'Clothar' and 'Die Einsetzung der Neunten' (op. 2) have survived.

Meantime the war of 1812-13 broke out, and Loewe has left a graphic account of its horrors in his Selbstbiographie (edited by Bitter, Berlin, 1870). Türk died in 1814, and the flight of King Jerome (Oct. 26, 1813) deprived Loewe of his income, but by the aid of Niemeyer he entered the university of Halle as a theological student under Michaelis. Nane, Türk's successor, founded a Singakademie like that of Zelter at Berlin. Loewe joined this, and thus became acquainted with his future wife, Julie von Jacob, a very gifted person, whom he married Sept. 7, 1821. In 1818 he composed his first ballads, 'Edward,' and the 'Erl-king,' followed in 1824 (after his wife's death) by 'Der Wirthin Töchterlein,' which, by Marx's assistance, were printed. In 1819 and 1820 he paid visits to Dresden, Weimar, and Jena, making the acquaintance of Weber, Hummel, and Goethe. In 1820 he was invited to Stettin, and having passed with credit through various tests, such as a musical exercise submitted to Zelter, and a trial sermon, was duly installed professor at the Gymnasium and Seminary, and Cantor. In 1821 he became Musikdirektor to the municipality, and organist of St. Jacobs. He made a considerable mark both as a conductor and professor in Stettin and throughout Pomerania. In 1837 he was elected member of the Akademie of Berlin. He was a favourite with both Frederick William III. and IV., the latter being especially fond of his ballads. He travelled much, and was present at the Musical Festivals of Düsseldorf (1837) and Mayence (the Gutenberg Commemoration), visiting Hamburg, Lübeck, and Bremen on the way. In 1844 he went to Vienna, and in 1847 to London. The Duchess of Coburg had specially recommended him to the Prince Consort and Queen Adelaide; he sang and played at Court, the Prince turning over his music; and here he heard Jenny Lind for the first time; but he left not the least trace of his presence behind him. In 1851 he went to Sweden and Norway, and in 1857 to France. In 1864 he had a singular illness—a trance of six weeks' duration, and in 1866 the authorities of Stettin asked him to resign. After this mortification—somewhat atoned for by the King's

1 He afterwards printed three ballads by Herder and Goethe as

2 Some experiments in accompaniment conducted with his colleague Grammann, produced results of real value.
opportunite bestowed of a higher grade of the Order of the Red Eagle than he had before enjoyed— he left Stettin for Kiel, where he quietly expired April 20, 1869, after another trance. His heart was buried near his organ in St. Jacobus at Stettin.

Carl Loewe was an industrious composer, as will be seen from the list of his music—five operas, of which one only was performed—"Die drei Wünsche" (Theatre Royal, Berlin, 1834). Mantius was the tenor; Spontini took unusual pains; the opera was a great success, and the Crown Prince presented the composer with a gold medal. Oratorios—"Die Festzeitten"; "Die Zerstörung Jerusalem" (1829); "Die sieben Schläfer" (1833); "Die Zeremonies der politischen Welt" (1836). None of these editions (1836) sold very well. An edition of the 'Singspiele' was published for voices only.
was appointed Secretary and Privy Councillor to the Duke of Cleve-Bernstadt, and was also director of the church music. About the same time he was raised to noble rank by the Emperor Ferdinand II., and took the name of Loewenstein. He died at Berstadt, April 16, 1648. His chief published work is a book of thirty Geistliche Lieder, for two to four voices, entitled 'Frühling-Magen' (the words also by him). The first dated edition is 1644. Some of these hymns and tunes were received into the various Choralbücher up to modern times, of which the best known are Christe du Beschieden deiner Kreuz und gemindete, and Mein Augen schliesst sich jetzt. He also composed the chorous to Martin Opitz's Tragedy 'Judith,' for three voices with basso continuo, which were published at Rostock, 1646. There remain in MS. a number of Latin and German motets for four to eight voices, and sacred concertos in the style of Viadana with instrumental accompaniment. J. R. M.

LOGIER, JOHANN BERNARD, a descendant of a family of French refugees, was born in 1750 at Kaiserlautern in the Palatinate, where his father and grandfather were organists. He received his early musical education from his father. After the death of his parents, and when about ten years old, he came to England in the company of an English gentleman, with whom he resided for two years, and studied the flute and pianoforte. He then joined the band of a regiment commanded by the Marquis of Abercorn, of which Willman, father of the celebrated clarinet player, was master, and with which he went to Ireland. In 1796 he married Willman's daughter, and engaged in composing for and instructing military bands and teaching the pianoforte. At the close of the war, his regiment being disbanded, he became organist at Westport, Ireland (holding the post till 1807, when he was appointed bandmaster of the Kilkenny Militia. He settled in Dublin in 1809, as did also his brother-in-law Willman, the clarinetist. He opened a music-shop at 27 Lower Sackville Street in July 1811, and was musical director of the Royal Hibernian Theatre, Peter Street, for twelve months.] Whilst there he invented his machine for guarding the hands of learners on the pianoforte, and devised the system of instruction known by his name. For an account of this machine and system, and the controversy which raged on their introduction, see Gymnastics, ante, pp. 263, 264. In 1821 the Prussian government sent Franz Stoepe to London to inquire into the merits of the system, and the result was that Logier was invited to Berlin to superintend the promulgation of it in Prussia. He remained in Berlin three years, being allowed an annual vacation of three months to visit England. In 1826, having acquired a competency by the sale of his chiroplast and elementary works, his very numerous classes, and the fees received for permission to use his invention and teach on his system,—it was asserted that he had received 100 fees of 100 guineas each for that purpose,—he retired and settled in Dublin. [He re-opened a music-shop at 46 Upper Sackville Street; in 1843 we find him at 28 Westmoreland Street, and two years later at 45 St. Stephen's Green. His Thoroughbass was the first musical text-book used by Wagner in 1828.] He died, July 27, 1846. He composed some sonatas and other pieces, besides making numerous arrangements for the pianoforte. He also composed an ode on the commencement of the fiftieth year of the reign of George III., October 25, 1809, performed in Dublin. Besides the publications connected with his chiroplast, he was author of *A Complete Introduction to the Keyed Bugle*, of which instrument he is said to have been the inventor. W. H. H.; additions from W. H. G. F. etc.

LOGROSCINO, or LOGROSCINO, NICOLA, was born at Naples about 1700, and became a pupil of Durante at the Conservatorio di Loreto. He is first heard of in 1738, when he collaborated with Leo and others in the production of *Demetrio* (see Leo); in the autumn of the same year he produced a comic opera, 'L'inganno per inganno' at the Teatro dei Fiorentini. This was followed by a long series of comic operas, which were so successful that Logroscino was called by the Neapolitans 'Il Dio dell' Opera buffa.' It was probably in 1747 that he went to Palermo to teach counterpoint at the Conservatorio dei Figliuoli Dispersi, the study of music being first introduced there in that year. (It should be remembered that the Italian Conservatori were originally not schools of music, but simply orphanages.) He is last heard of as a composer in 1759, and is supposed to have died in 1763 at Naples; this, however, is doubtful, since the Conservatorio at Palermo possesses a receipt for his stipend signed by him in August of that year.

It has been stated that Logroscino would never compose except for words in Neapolitan dialect, and that he was the inventor of the concerted finale in several movements. Both statements are untrue, as far as can be gathered from his few remaining works. He wrote a certain amount of quite uninteresting church music, and at least one serious opera, Giunio Bruto (score at Minster). His finales show no structural advance on those of Leo, but are distinctly superior to them in humorous treatment of voices and instruments. For genuine comic feeling Logroscino stands in the front rank of operatic composers.

Le Furetto, Naples, 1760 (libretto, Naples R.C.M.).

LOHENGRIN. A romantic drama in three acts; words and music by Richard Wagner. Composed in 1847, and produced at Weimar, under the direction of Liszt, August 1850; in London, in Italian, at Covent Garden, May 8, 1875; in English, Carl Rosa Company, Her Majesty's Theatre, Jan. 1850; and in German, Drury Lane, May 1882.

LOHET, SIMON, was appointed organist to the Court of Wurtzberg at Stuttgart, in 1571, and his name is mentioned up to 1611. Wolz in his Organ Tabulatur-Buch of 1617, inserts twenty-four pieces by Loheit, with some commentary words in memoriam (see Ritter, Geschichte des Orgelspiels, 1854, p. 109). Twenty of these pieces are called Fugues, though they are not developed Fugues in the modern sense, the subjects being very short, and the answer coming in before the subject itself is completed. These fugues are followed by a Canzona, and two Choral-bearbeitungen, one on the Plain-song melody of the 'Media vita in morte sumus,' with the melody in the bass throughout. Ritter has high words of praise for Loheit's pieces, and gives four specimens (Nos. 68-71 in his book), two Fugues, the Canzona, and the 'Media vita' pieces. The first of these fugues has the familiar theme of the E major Fugue in the Second Part of the Wohltemperirte Clavier. Of the 'Media vita' piece Ritter says it alone would suffice to justify for Loheit a high place among the best masters of organ music. 'In feeling so deep, in expression true and touching, it is a perfect piece from the old time, and therefore for all times' (Ritter, p. 110).

LOLLI, ANTONIO, a celebrated violinist, born at Bergamo between 1728 and 1733. If it cannot be doubted that he was a most extraordinary performer, he appears certainly also to have been the type of an unmusical, empty-headed virtuoso, and in addition a complete fool.

Hardly anything is known of the earlier part of his life and career. It is, however, generally assumed that he was almost entirely self-taught. We know for certain that he was at Stuttgart in 1762 with Nardini. There he remained, attached to the court of the Duke of Wurtzberg, till 1773, when he went to St. Petersburg, where he is said to have enjoyed the special favour of the Empress Catherine II. He remained in her service till 1778. In 1779 he came to Paris, and played with great success at the Concert Spirituel. After this he went to Spain, and in 1785 we find him in London, where, however, according to Burney, he appeared but seldom in public. He continued to travel, and we read of his appearance now at Palermo, now at Copenhagen; then again at Vienna or Naples. He died in Sicily in 1802.

According to all contemporary testimony Lollì was an extraordinary performer, but an indifferent musician. Schubart, the well-known German poet and musician, who had many opportunities of hearing both him and Nardini, speaks with unmeasured praise of Lollì's feats of execution, the wonderful ease and absolute certainty with which he played the most difficult double stops, octaves, tenths, double-shakes in thirds and sixths, harmonics, etc. As to his having been a bad musician, or rather no musician at all, the testimonies are equally unanimous. The Abbé Bertini plainly states that Lollì could not keep time, could not read even easy music, and was unable to play an Adagio properly. On one occasion, when asked to play an Adagio, he said: 'I am a native of Bergamo; we are all born fools at Bergamo,—how should I play a serious piece?' When in England, he almost broke down in a Quartet of Haydn which the Prince of Wales had asked him to play. If, with all these drawbacks as a musician, he nevertheless created, wherever he played, an immense sensation, we are all the more compelled to believe that his powers of execution were of the most exceptional kind.

He is described as a handsome man, but a great dandy and charlatan, very extravagant, and a gambler. The Emperor Joseph II., himself a very fair musician, habitually called him 'muddle-headed Lollì' (der Faselhans). Burney (Hist. iv. 680) writes that 'owing to the eccentricity of his style of composition and execution, he was regarded as a madman by most of the audience. In his freaks nothing can be imagined so wild, difficult, grotesque, and even ridiculous as his compositions and performance.' True, Burney adds, 'I am convinced that in his loud intervals he was in a serious style a very great, expressive, and admirable performer,' but it appears doubtful whether Burney ever heard him in a 'lucid interval,' and therefore his 'conviction' is gratuitous.

His compositions (Concertos and Sonatas for the violin), poor and insipid as they are, yet are said to have been his own productions in a limited sense only. We are assured that he
LOMAKIN, Gabriel Joachimovich, born April 6 (March 25, O.S.), 1812. As a boy he sang in the celebrated choir of Count Sheremetev, of which he became choir-master in 1830. He also taught singing in the Court Chapel (1848-59), and the Theatrical School. His services were greatly in demand, and he held singing-classes in the most important educational establishments in St. Petersburg. In 1862 he joined Balakirev in founding the Free School of Music, in which he directed the choral classes until 1870. In 1874 he was compelled, on account of failing health, to retire from active life. He died at Gatchina in 1885. Lomakin arranged a great number of the old church-tunes, national airs, etc. He exercised a considerable influence upon the musical life of his day, and may be regarded as the Henry Leslie of Russia.

LOMBARDI, I, ALLA PRIMA CROCIATA. Italian opera in four acts; libretto by Solera, music by Verdi. Produced at the Scala, Milan, Feb. 11, 1843; in London, at Her Majesty's, March 3, 1846; and in Paris, Théatre Italien, Jan. 10, 1863. A great part of the music was afterwards employed by Verdi in the opera 'Jerusalem.'

G. LOMBARDY, School of Music of. [See Milan.]

LONDON ACADEMY OF MUSIC, THE. Dr. Henry Wylde started a music-school under this name in 1861, and in 1867 St. George's Hall, Langham Place, was opened to accommodate it. At his death in 1890, the school passed into the hands of Herr Pollitzer, Messrs. Raimo and Denza, and in 1904 was amalgamated with three other teaching institutions—The London Music School (formerly called The London Organ School), founded in 1865 by the Rev. Steenson Clark, and after his death directed by Dr. T. H. Yorke Trotter; The Forest Gate College of Music, founded in 1885 by Mr. W. Harding Bonner (the present chairman of the Board of Directors); and The Metropolitan College of Music, founded in 1889 by the Finshby Choral Association at Finsbury Park, with Mr. C. J. Dale at its head. In 1905 the Hampstead Conservatoire, founded in 1885 by Mr. G. F. Geansett, and subsequently directed by Mr. Cecil Sharp, was added to the number of amalgamated schools. The present premises of the combined institutions, under the direction and style of 'The United Music Schools, Limited,' are at 22 Princes Street, Cavendish Square.

LONDON MUSICAL SOCIETY, THE. This society was formed in 1878 by Mr. Heathcote Long and other prominent amateurs. Its objects are stated in its second rule—a canon unimpeachable in spirit, if not in grammar—to be 'the practice and performance of the works of composers which are not generally known to the musical public.' Barnby was appointed musical director, and Mr. Long and Mr. Alfred Littleton honorary secretaries. An efficient choir was formed, and the first concert was given on June 27, 1879, in St. James's Hall, although, strictly speaking, the occasion was a private one. Goetz's Psalm cxxxvii. was introduced to London at that concert, the solo being sung, as on many subsequent occasions, by competent amateurs. From 1884 until the last season of the society's existence, Mr. Heathcote Long was alone in the honorary secretari ship. After the season of 1886, Barnby was succeeded as conductor by Mackenzie, who conducted the final concert on May 24, 1887. In the course of that year the society was disbanded, and a sum of £100 was handed over from its funds to the Royal College of Music. During the nine years of its existence the institution performed the following works for the first time in England, besides others which had been heard before, though not frequently. Stanford's 'Three Holy Children,' for instance, was given, for the first time in London, by the London Musical Society:

CHORAL WORKS

Beethoven. Choral Fantasy, op. 81.
Verdi. Stabat Mater.
Goetz. Psalms cxxxvii. and cxxviii. (Messina.)
Gounod. Troadoiene Mass (selections).
Grieg. Kiotetthorn.
Hiller. 'O weep for those.'
Hinshaman, Heinrich. Cinderella.
Jensen. 'Fest of Adonai.'
Rheinberger. Christoforus.
Sibelius. Magnificat.
Schumann. 'The King's Son,' 'The Minstrel's Curse,' and Spanische Liebeslieder.

ORCHESTRAL WORKS

Bach. Toccata in E, arranged.
Bach. French Violin Concerto in E minor (Miss Shinner).
Beethoven. 'Peasant.'
Brahms. 'Des Teufels Lustmahes.'

LONDON SACRED HARMONIC SOCIETY, THE, was formed on March 6, 1848, after the dismissal of Mr. Surman from the post of conductor to the Sacred Harmonic Society. The Rev. George Roberts was president of Surman, who resigned, and the affairs of the society were managed by a committee. Six concerts were given in Exeter Hall during the year 1848, resulting in a loss of £394. The so-called society lingered on for some years, and gave its last concert on Dec. 22, 1856 ('Messiah'). After this it seems to have ceased to exist.

LONG (Lat. Longa, Naturae caudata). A note, intermediate in value between the Large and the Breve. In Plain-song, the Long appears as a square black note, with a tail, which may either ascend, or descend, on either side. In Polyphonic Music, it is figured as a square white note, with a tail descending on the right. In this case, the position of the tail is important: for, though it is sometimes, in modern
LONGHURST

music, made to ascend, it can only be transferred to the left-hand side in Ligatures, when it materially affects the duration of the note. [See Notation.]

The Long represents one third of the Perfect Large, and half of the Imperfect. [See Large.] Its duration, in the Lesser Mood Perfect, is equal to that of three Breves: in the Lesser Mood Imperfect, to that of two. [See Mood.] Its corresponding Rest is drawn, when Perfect, across three spaces; when Imperfect, across two only.

Perfect Long Rest. Imperfect Long Rest.

In Plain-song it is longer than the Breve, but not in any definite proportion, except in Ligatures, where it represents a Breve and a half, or three Semibreves. Merbecke, in his 'Booke of Common Praier Noted' (1550), calls it a 'Close,' and uses it only at the end of a verse; but this restriction is not usual in Plain Chant Office-Books.

W. S. R.

LONGHURST, JOHN ALEXANDER, born in London, 1809, studied under John Watson, musical director at Covent Garden, and on April 22, 1820, came out at Covent Garden as the Page in Bishop's 'Henri Quatre,' and gained great popularity by his singing in the duet 'My pretty page,' with Miss Stephens. During that and the next four years Bishop composed original parts for him in 'Montrose,' 'The Two Gentlemen of Verona,' 'Maid Marian,' 'Clari,' 'The Beacon of Liberty,' and 'As You Like It,' besides giving him the boy's parts in 'The Miller and his Men,' 'The Slave,' etc., which he had formerly written for Gladstanes and Barnett. Early in 1826 he was allotted the part of Puck in Weber's 'Oberon,' then in preparation, but shortly afterwards, whilst in the middle of a popular ballad, 'The Robin's Petition,' his voice suddenly broke, and he was compelled to relinquish singing. Weber mentions the event in a letter to his wife, March 9, 1826:—'The young fellow who was to have sung Puck has lost his voice, but I have a charming girl, who is very clever and sings capital.' After a short time he became known as a teacher of singing and the pianoforte and an excellent accompanist. He died in 1856, aged forty-six.

His younger brother, WILLIAM HENRY, Mus. Doc., born in the parish of Lambeth, Oct. 6, 1819, was admitted a chorister of Canterbury Cathedral, Jan. 6, 1828, under Highmore Skeats, sen., having afterwards Stephen Elvey and Thomas Evance Jones as his masters. In 1836 he was appointed lay clerk and assistant organist of the cathedral. [In 1865 he was one of the earliest Fellows of the College of Organists.] On Jan. 26, 1873, he was chosen to succeed Jones as organist and master of the choristers. [He retired in 1898, after a period of seventy years' service in the cathedral.] His doctor's degree was conferred on him by the Archbishop of Canterbury (Tait), Jan. 6, 1875. His compositions consist of anthems, services, songs, etc., and a MS. oratorio, 'David and Absalom.' [He died at Canterbury, June 17, 1904.]

W. H. H.

LONGMAN & BRODERIP, a well-known firm of London music-publishers during the latter half of the 18th century. The business was commenced in or before 1767, when James Longman with others, as 'J. Longman & Co.,' were established at the Harp & Crown, 26 Cheapside. The sign of the Harp & Crown was that also of another Cheapside music-publisher, John Johnston (q.v.), but Longman's was nearer St. Paul's, and on the opposite side of the road, i.e. the south side, between Friday Street and Mitre Court. In the latter part of 1771 the house became known as Longman & Lukey, and this title remains until 1777 or 1778, when, Francis Broderip entering, it is styled Longman, Lukey, & Broderip. In 1779 Lukey's name is absent, and the firm remains as Longman & Broderip until 1798. Before 1785 an additional address was at 13 Haymarket. In or near the year 1798 the firm became bankrupt, and John Longman, who had succeeded the original James, held for a couple of years a partnership with Muzio Clementi (q.v.) at the old address, 26 Cheapside; while the other partner, Broderip, entered with Wilkinson at 13 Haymarket (see BRODERIP & WILKINSON. Fresh information which has come to hand makes it very doubtful whether he was Robert Broderip as there suggested: it is certain that Francis was the original partner).

John Longman in 1802 had left Clementi and set up for himself at 131 Cheapside, where about 1830 the name stands as G. Longman.

The first James Longman and Longman & Lukey issued much music now of an interesting antiquarian character, while Longman & Broderip's publications embrace the whole range of musical productions. They were also makers, in great quantity, of spinets and harpsichords, pianofortes, and the smaller class of musical instruments. Their catalogues chronicle an immense variety of these, and some curious items are mentioned as 'Glove horns,' 'Stucco pasturals,' 'pipes and tabors' (1751-82): also 'upright harpsichords with a curious new invented swell,' 'pianofortes in commodores, sideboards, and dressing-tables of small rooms' (1786); and in the 1789 catalogue is—'Portable Clavecins . . . agreeable for travelling with, as they may be conveyed and even performed on in a coach.'

E. K.

LOOSEMORE, HENRY, Mus.B., was a
chorister in one of the Cambridge colleges, afterwards lay clerk there, and organist of King's College. He graduated at Cambridge in 1640. A service and an anthem by him are in the Tudway collection (Harl. MSS. 7337, 7338) and at Ely, and two Latin litanies (in D minor and G minor) are printed in Jebb's _Choral Responses and Litanies_. He died at Cambridge in 1670.

His son, George, Mus. D., was a chorister of King's College, Cambridge, under his father, and in 1660 became organist of Trinity College, retaining the post till 1682, when he probably died. He took his Doctor's degree at Cambridge in 1665. Anthems by him are in the Tudway collection (Harl. MS. 7389) and at Ely Cathedral.

Another son, John, built the organ of Exeter Cathedral in 1665, and died 1681. Parts of his work still remain in that organ. w. h. h.; additions, etc. from West's _Cath. Org._

**LORD OF THE ISLES, THE.** A Dramatic Cantata founded on Scott's poem; the music by Henry Gadsby. Produced at Brighton, Feb. 13, 1879.

**LORELEY, DIE.** 1. An opera by Geibel, upon the composition of which Mendelssohn was engaged at the time of his death (Nov. 4, 1847). He had completed—as far as anything of his could be said to be complete until it was published—the finale to the act in which the heroine, standing on the Loreley cliff, invokes the spirits of the Rhine. This number was first performed at Leipzig, and at the Birmingham Festival, Sept. 8, 1852, to an English adaptation by Bartholomew, and was published as op. 98, No. 27 of the posthumous works. In October 1868 an Ave Maria (scene 2) for soprano solo and chorus, and a Vintagers' Chorus (scene 4) were published, and portions of the 2nd and 7th scenes are more or less advanced towards completion (see _Musical Times_ for October 1868). The finale is frequently put on the stage in Germany. The opera has been since composed by Max Bruch (produced at Cologne in August 1884).

2. The Loreley is the subject of an opera by F. Lachner, words by Molitor, produced at the Court Theatre, Munich, in 1846.

**LORENZ, FRANZ,** physician and writer, born at Stein, Lower Austria, April 4, 1805; took his doctor's degree M. A., and died at Wien-Neustadt, April 8, 1883. Like many other physicians, he did much for music, and his publications are of special interest and value:

- _In Stachen._ Mozart's (Vienna, 1851), much praised by Kochel in his Mozart-Catalogue (Preface, p. xvii); _Haydn, Mozart, and Beethoven's Kirchenmusik_, etc.; _W. A. Mozart als Clavier-Componist_ (Breslau, 1866); various accurate and interesting contributions on Mozart, Beet-

hoven, and Haydn, to the _Deutsche Musik-Zeitung_, 1861, 1862; the _Wiener Zeitung_, Aug. 3, 1850, Aug. 16, 1863. It is to Dr. Lorenz that we owe Kreiss's important account of Beethoven's last autumn, and the other anecdotes and traits there given.

**LORTZING, GUSTAV ALBERT, opera-composer, born at Berlin, Oct. 23, 1801, son of an actor.** He studied for a time under Rungenhagen, but the wandering life entailed by his father's profession made steady instruction an impossibility, and at nine he was thrown upon his own resources, played the pianoforte, violin, and violoncello, studied the works of Albrechtsberger and others, and soon began to compose. At the same time he habitually sang and acted on the stage, and thus secured a familiarity with the practical requirements of the boards which was of great advantage to him. In 1822 he went with his parents to Cologne, where he married in 1823, and produced his first operaetta, 'Ali Pascha von Janina,' in 1824. The company to which he belonged served the theatres of Detmold, Münster, and Osnabrück, in addition to that of Cologne, and at all these his opera was repeated. [In 1828 an oratorio, 'Die Himmelfahrt Christi,' was performed.] In 1833 he was engaged as first tenor at the Stadttheater at Leipzig, and here he passed a happy and successful ten years. In 1837 he wrote and composed two comic operas, 'Die beiden Schützen' and 'Ozier und Zimmermann.' Both were successful, and the latter was at once performed all over Germany. His next few works, however, fell flat, and it was not till 1842 that his 'Wildschütz,' arranged from Kotzebue's comedy, again aroused the public. He then gave up acting, and in 1844 was appointed capellmeister of the theatre, a post for which he was unfitted, both by his easy disposition and his defective education, and which he resigned in the following year. He next produced 'Undine' (1845) with success at Hamburg and Leipzig, and 'Der Waffenschmied' (1846) at Vienna, where he was for a short time capellmeister at the theatre 'an der Wien.' In 1849 the success of his 'Rolandsknappen' at Leipzig again procured him the offer of the capellmeistership, but to his disappointment the negotiations fell through, and Rietz was appointed. His life was now a hard one; he travelled from place to place with his numerous family, earning a precarious existence now as an actor, now by conducting his own operas; enduring at the same time the mortification of having his later operas rejected by all the more important theatres. In 1850 he obtained the conductorship at the Friedrich-Wilhelmstadt Theatre in Berlin, where he had only farces and vaudevilles to direct; 7

---

1. _Den andenchen Felix Mendelssohn-Bartholdy_ (Hannover, Ernst Julius Volkmann, 1860).

2. This was performed in London, March 2, 1859, at a concert of the Vocal Association.

3. Mozart's Requiem (1861, No. 23, 48); Mozart's _Klavier-Sonaten_ (op. 11, 42); Mozart's _Pianosonaten_ (1862, No. 34, 30); Beethoven at _Gründerzeit_ (op. 10); Haydn and his prince patrons (nos. 40, 47, 48).

5. Haydn and Beethoven.
but he was completely worn out, and died on the 21st of Jan., 1551. The public discovered its neglect too late, honoured his remains with a solemn funeral procession, and raised a subscription which placed his family above want. He left an opera, 'Regina' (first performed at Berlin, 1589), several overtures, a second oratorio, 'Petrus,' incidental music for various plays, lieder, and part-songs, all unpublished. His operas are still stock-pieces at the comic theatres in Germany, and 'Undine' is frequently performed, although romantic subjects were not his forte. 'Zaar und Zimmermann' was produced as 'Peter the Shipwright,' at the Gaiety Theatre, London, on April 15, 1871; his 'Beiden Schützen' by the London Academy of Music in St. George's Hall, March 31, 1898; and the 'Wildschütz' by the Saxe-Coburg Opera Company at Drury Lane, July 3, 1895.

As a composer Lortzing is remarkable for naturalness. In stead of straining after a depth and subtlety beyond his powers, he wisely aims at expressing natural and healthy sentiments by means of graceful and pleasing music, and his keen sense of humour enables him to give an interest to commonplace situations. He was never able to free himself entirely from a slight amateurishness in the technical part of his work, but his compositions, though not belonging to the highest branch of art, are good of their kind, and in spite of an occasional tendency to fanciful exaggeration, are sound and artistic music.

LOSSIUS, Lucas, born in 1508 at Vaacha in Hesse-Cassel, was Rector or Con-rector of the school at Lüneburg from 1533 to his death in 1582. He is author of a theoretical work, *Eratomata musicae practicae* . , Nuremberg, 1563, which passed through many editions; also the compiler of a comprehensive collection of liturgical music for the use of the Lutheran church, entitled *Psalmodia hoc est Cantica sacra veteris ecclesiae selecta* . , Nuremberg, 1553. This latter work is introduced with a preface by Philip Melancthon, and is divided into four parts; the first part containing the Latin texts and plain-song melodies of the antiphons, responsoria, hymns, and sequences for all Sundays and chief holydays, also the passion according to St. Matthew and the Lamentations; the second part makes a similar provision for all the minor holydays of the year; the third part contains the plain-song melodies for the mass and for funerals; the fourth contains the psalms and canticles with their antiphons and intonations according to the eight tones. Only a few German hymns appear in the collection. A second revised and enlarged edition of this work was published by George Rhow at Wittenberg in 1561, and two others in 1569 and 1579. The musical editor of Schöberlein's *Schatz des liturgischen Gesangs*, F. Riegel, claims that the psalm-tones, with all their differences, have been preserved in greater purity in Lossius than in the form in which they have been current in the Roman church, based on Guidetti's *Direc-
torium Chori* ; Lossius in 1563 being in closer contact with the older Catholic tradition than Guidetti in 1589.

LOTTO, Antonio, eminent composer, son of Matteo Lotto, a Venetian, capellmeister to the then Catholic Court of Hanover; born probably in 1667, and possibly in Venice, since he styles himself 'Veneto' on the title-page of his book of madrigals (1706), and his brother Francesco was lawyer to the Procurators, a post tenable only by a native. At any rate, his early years were passed in Venice, and before he was sixteen he produced an opera, 'Il Giustino,' to words by a nobleman, Nicolo Beregani. His master was Legrenzi, then maestro di cappella to the Doge. Lotto entered the Doge's chapel as a boy; in 1687 joined the 'Confraternität musicale di Santa Cecilia'; was appointed, May 30, 1689, 'cantore di contra alto,' with a salary of 150 ducats; and August 6, 1690, became deputy-organist, with an addition of 30 ducats. On May 31, 1692, the Procurators of St. Mark's unanimously elected him organist in place of Pollaro.lo, appointed vice-maestro di cappella. As second organist he composed a book of masses, for which he received 100 ducats, July 22, 1698. On August 17, 1704, he succeeded Spada as first organist, and retained the post forty years, receiving permission in 1732 to employ as substitute his pupil Saratelli, who eventually succeeded him. In 1733 the maestro di cappella, Antonio Biffi, died, and an eager competition for the vacant post ensued. Lotti's chief rivals were Pollaro.lo and Forpora, and at the first election, March 8, 1733 (the dates throughout are from State documents), he obtained six votes out of twelve. A majority being necessary, the matter remained in suspense, and meantime Lotti was authorised to call himself maestro di cappella. Forpora retired before the second election (April 2, 1736), but his place was taken by a scarcely less formidable competitor, Giovanni Porta. Lotti, however, received nine votes and thus obtained the post, with its salary of 400 ducats and an official residence. In the interim he composed his celebrated 'Miserere,' which superseded that of his master Legrenzi, and has been performed in St. Mark's on Maundy Thursday ever since. This was followed by a number of masses, hymns, and psalms, with organ accompaniment only, although his predecessors had employed the orchestra. He also composed seventeen operas (for list see Fétis), produced with success.

1 Through the kindness of Dr. Keetner of Hanover I am able to say that no documents as to music or musicians at the Court of Hanover in the 17th century are now to be found there. The Register of the Catholic Church at Hanover contains, under Nov. 3, 1662, an entry of the baptism of Hieronymus Dominicus, son of Matthias de Lotti and Maria de Paprinus, and under Nov. 9, 1671, of that of a daughter of Matteo de Lotti. The Register was begun in May 1671, so that it does not go far enough back for our purpose.
between the years 1693 and 1717, at the theatres of S. Angelo, S. Cassiano, S. Giovanni Crisostomo, and SS. Giovanni e Paolo. Some of these having attracted the attention of the Crown Prince of Saxony during his stay in Venice (1712), he engaged Lotti to visit Dresden, with a company of singers, including Boschi and Personelli, both members of the chapel, and his own wife, a Bolognese singer named Santa Stella. The joint salary of husband and wife was fixed at 2100 doppia (about £1600). The party set out on September 5, 1717, having obtained special leave of absence from the Procuratori of St. Mark’s—"per farvi un opera."

In Dresden Lotti composed ‘Giove in Argo’ (1717), ‘Ascanio, ovvero gli odi delusi del Sangue’ (1718), and ‘Teofane’ with Pallavicini (1719); intermezzi, and various other pieces, including church works, among which may be specified the eight-part ‘Crudelìs’ occurring in a ‘Credo’ for five voices and instruments. The Procuratori gave him one extension of leave, but in 1719 he was compelled to return or vacate his post; and accordingly left Dresden in October in a travelling-carriage, which he ever after retained as a memorial of his visit, and finally bequeathed to his wife. After his return to Venice he composed entirely for the church and chamber. Lotti died of a long and painful illness (dropsy) on Jan. 5, 1740, and was buried in the church of S. Geminiano, where his widow (who died 1759 and was buried with him) erected a monument to his memory. It was destroyed by the church in 1815.

Besides the compositions already mentioned he wrote for Vienna an opera, ‘Constantino,’ overture by Fux (1716), and two oratorios, ‘Il Voto crulele’ (1712), and ‘L’ Umità coronata’ (1714); for Venice, the oratorios ‘Gioa Rè di Giulia,’ ‘Ginditta’ (printed by Poletti), and the celebrated madrigal ‘Spirtò di Dio’ for the Doge’s espousal of the Adriatic, performed on the Bucentoro in 1736—a very effective composition. His book of madrigals (1705), dedicated to the Emperor Joseph I., contains the one in five parts, ‘In una siepe ombrosa,’ which Bononcini claimed in London as his own composition, and which led to his disgrace (see vol. i. pp. 360-361). Another is given as a model by Padre Martini in his Esemplc da fonte in contrapunto. Nevertheless they were severely handled at the time in a Lettera familiare d’un accademico flaminiano, circulated in MS. anonymously, but attributed on Fontana’s authority to Marcello, who had been a pupil of Lotti’s. [See Chrysander’s Händel, ii. 294 and 308.] Many of his compositions are still in the King of Saxony’s musical library, and Breitkopf & Hartel once possessed several of his MSS., as did also Dr. Burney.

Lotti’s rank among musicians is a high one, from the fact that though the last representative of the old severe school, he used modern harmonies with freedom and grace. The expression and variety of his music struck even his contemporaries, especially Hasse, when he was at Venice in 1727. Burney, who heard his church music sung in Venice in 1770 (Present State, France and Italy, p. 145), credits him with ‘grace and pathos,’ and characterises his choral music as both solemn and touching, and so capable of expression, though written in the old contrapuntal style, as to have affected him even to tears. Of his cantatas he says that they contain recitatives full of feeling (Hist. iv. 534). As a specimen of his writing for a single voice we may cite the favourite song ‘Far diesti.’ He was so afraid of overloading the voices that he never used orchestral accompaniments in church music. There are wind instruments as well as the four strings in his Dresden operas, but not in those produced in Venice. [The Quellen- Lexikon enumerates twelve operas as still extant, and gives the names of fifteen more, and a list of masses, church music of different kinds, and arias and madrigals.]

Besides Saratelli and Marcello, Alberti, Basani, Gasparini, and Galuppi were among his pupils. A motet of Lotti’s, ‘Blessed be thou,’ and a madrigal, ‘All hail, Britannia,’ both for four voices, are given in Hullah’s Port Music (1st ed.), and a fine Credo in C, also for four voices, in his Vocal Scores and Port Music (2nd ed.). Froke has a mass of his (a 4) in Musica Divina, vol. i., and Rochlitz a Crucifixus, a 6, and another a 8, and a Qui tollis, a 4, in his Sammlung. There is also a Kyrie in the Auswahl von Musikwerke (Trautwein). Four masses and a requiem are in Lieck’s Sammlung, and various other pieces in the collections of Schlesinger, Moskowa, etc. P. C.

LOTTINI, ANTONIO, the principal Italian basso in London in 1737 and 1738. He sustained that part in Handel’s ‘Farancondo’ in 1737, in his ‘Serse,’ and in the ‘Conquista del Vello d’oro’ in 1738.

LOUIS FERDINAND, PRINCE, accurately Friedrich Christian Ludwig, born Nov. 18, 1772, killed at the battle of Saaalfeld, Oct. 13, 1806, was the son of Prince August Ferdinand of Prussia, and therefore nephew of Frederick the Great and of Prince Henry (the patron of J. P. Salomon and cousin of Frederick William II.) the violoncello-player, for whom Beethoven wrote his op. 5. His sister Louise married Prince Radziwill, who composed the Faust music, and to whom Beethoven dedicated the Overture, op. 115. Louis Ferdinand thus belonged to a musical as well as a royal family, and he appears to have been its brightest ornament on the score of natural gifts—his uncle the Great Frederick excepted—even down to our own time; in music undoubtedly so. He was kindly and generous in the highest degree, and free from all pride of
rank: energetic and enterprising, and as a soldier bold to temerity. In conversation he was brilliant, in social intercourse delightful. On the point of morals his reputation was not good; but one who knew him well, while admitting that, being prevented by his rank from making a marriage of affection, he chose female friends with whom he lived in the most intimate relations, asserts positively that ‘he never seduced an innocent girl, or destroyed the peace of a happy marriage.’ This, in the time of Ferdinand II., was high praise. He was passionately fond of his two illegitimate children, and left them to the care of his sister, Princess Radziwill. That he very early entered the army was a matter of course, for no other career was open to a Prussian prince; but that, amid all the distractions of a military life, no small part of which (1792-1806) was spent in hard service, he should have become a sound practical musician and composer proves his energy and perseverance no less than his talent; but music was his passion, and in garrison or camp he had musicians with him and kept up his practice. He preferred English pianofortes, of which he is said to have purchased no fewer than thirteen.

We find no account of his masters and early studies, nor any but vague notices of his rapid progress, until 1798. He was then with his regiment at Frankfort, and is reported to have aided a poor musician not only with his purse, but by a very fine performance of a sonata in a concert. Three years later, in 1796, Beethoven, then in Berlin, formed that opinion of his playing which he afterwards expressed to Ries (Elog. Not. p. 110), that, though the playing of Hummel—then among the most renowned of pianists—was elegant and pleasing, it was not to be compared to that of the Prince. Ries also (Ib.) records Beethoven’s compliment to him—that he did not play at all like a king or a prince, but like a thorough, solid pianist. [See the article on Dussek for an account of his relations with that great musician.] In 1804 he made a journey to Italy. In Bohemia he visited Prince Lobkowitz at his seat, Randinitz. We see no sufficient reason to doubt the truth of an anecdote of the scene of which lay then and there. Lobkowitz had purchased from Beethoven the recently composed Eroica Symphony, and had it performed in his palace at Vienna. He consulted with Wranitzky, his capellmeister, as to a programme for the entertainment of his guest. Wranitzky proposed the new symphony. Louis Ferdinand listened with the utmost interest, and at the close of the performance requested a repetition, which was of course granted. After supper, having to depart early the next morning, he besought the favour of a third performance, which was also granted.

It was under the fresh impression of this music that Louis Ferdinand renewed his acquaintance with Beethoven. We have no particulars of the meeting. Ries (Elog. Not. p. 11) only relates that an old Countess, at the supper after a musical entertainment, excluded Beethoven from the table set for the Prince and the nobility, at which the composer left the house in a rage. Some days later Louis Ferdinand gave a dinner, and the Countess and Beethoven being among the guests, had their places next the Prince on either hand, a mark of distinction of which the composer always spoke with pleasure. A pleasant token of their intercourse survives in the dedication to the Prince of the PF. Concerto in C minor, which was first played in July 1804, and published in November.

In the autumn of the next year (1805), the Prince being at Magdeburg on occasion of the military manoeuvres, Spohr was invited to join them. ‘I led,’ says Spohr (Selbstb.ion.), ‘a strange, wild, stirring life, which for a short time thoroughly suited my youthful tastes. Dussek and I were often dragged from our beds at six in the morning and called in dressing-gown and slippers to the Prince’s reception-room, where he, often in shirt and drawers (owing to the extreme heat), was already at the pianoforte. The study and rehearsal of the music selected for the evening often continued so long, that the hall was filled with officers in stars and orders, with which the costume of the musicians contrasted strangely enough. The Prince, however, never left off until everything had been studied to his satisfaction.’ Louis Ferdinand’s compositions, like his playing, were distinguished for boldness, splendour, and deep feeling; several of which are in print were composed before the intercourse with Dussek had ripened his taste, and made him more fully master of his ideas. Those he would gladly have suppressed. The Pianoforte quartet in F minor is considered to be his most perfect work.

Leduc’s list of the published compositions (made 1861) is as follows:

   2. Trio for PF, Violin, and Violoncello, Ab.
   3. Trio for PF, Violin, and Violoncello, Bb.
   4. Andante, and variations, for PF, Violin, and Violoncello, Bb.
   5. Quartet for PF, Violin, and Violoncello, Bb.
   6. Quartet for PF, Violin, Violoncello, and Horn.
   7. Fugue and variations for PF, solo.
   9. Rondo for PF, 2 Violins, Flute, 2 Clarinetts, 2 Horns, Violin, and Violoncello, B.

LOUILLE. Musical Romance in four acts; text and music by Gustave Charpentier. Produced at the Opéra Comique, Paris, Feb. 2, 1900.

LOUILLE, ETIENNE, protégé of Mlle. de Guise, and music-master, in the second half of the 17th century, is only known as the author of Éléments ou Principes de Musique (Paris, 1695), at the
close of which is an engraving and description of his 'Chronomètre.' Loulié was the first to attempt to indicate the exact tempo of a piece of music by means of an instrument beating the time. The one he invented took the minute as the unit, and went up to seventy-two degrees of rapidity; but being six feet in height was too cumbersome for general use. Nevertheless to Loulié belongs the merit of the idea which more than a century later was carried into practice by Maclzel.

LOURE. This word, whether derived from the Latin lura, a bag or purse, or the Danish luer, a shepherd's flute, or merely an alteration of the Old French word outra with the article prefixed, l'outra—signified originally a kind of bagpipe, common in many parts of France, but especially in Normandy. The peasants of Lower Normandy still call the stomach 'la loure,' just as those of Normandy and Poitou call an 'outra' or leathern wine-bottle, 'une vèze.' Again, the Old French words 'chêvire,' 'chervie,' 'chervette,' were derived from cabrète in dog-latin, and 'gogue' meant an inflated bag or bladder. These circumstances seem to point to the conclusion that the names of all these instruments, 'chêvre,' 'chevrète,' 'gogue,' 'loure,' 'vèze,' 'sacoussonse,' etc., refer to the wind-bag, ordinarily made of goat-skin; an argument strengthened by the English 'bagpipe' and the German 'Sackpfeife,' 'Balgpfeife,' 'Dudelsack,' etc.

From its primary signification—a kind of bagpipe inflated from the mouth—the word 'loure' came to mean an old dance, in slower rhythm than the gigue, generally in 6-4 time. As this was danced to the nasal tones of the 'louer,' the term 'louré' was gradually applied to any passage meant to be played in the style of the old bagpipe airs. Thus 'louer' is to play legato with a slight emphasis on the first note of each group. The 'louré' style is chiefly met with in pastoral, rustic, and mountaineer music. [A 'loure' occurs as the sixth movement of the fifth of the French Suites of Bach, in G.]

As an example we give the first strain of a Loure from Schubert's 'Die Tanzmusik.' c. c.

LOVE IN A VILLAGE. The earliest and the most famous work of the second period of English ballad opera. The first stage of English opera, where the music was dependent upon popular airs, began with 'The Beggar's Opera' in 1727-28, and ended about 1738. In 1762, the revival of this type was due to the production at Covent Garden of 'Love in a Village.'

The libretto was by Isaac Bickerstaffe, and the plot was compiled from an earlier ballad opera, 'The Village Opera' of 1729, Wycherley's 'Gentleman Dancing Master,' 1673, and other plays. The piece is pretty rustic, and from its first appearance down to nearly the middle of the 19th century, always attracted an audience. The character of Young Meadows has formed the first public essay of more than one famous singer. Miss Brent, John Beard, and Mattocks were among the original performers. The music of 'Love in a Village' was compiled from rather more scholarly sources than was that of the earlier ballad operas; it was in all probability arranged and selected by Dr. Arne. 'Love in a Village' and his prior opera 'Thomas and Sally,' 1760 (the music of this wholly by Arne), made Bickerstaffe the most popular of librettists, and his succeeding Covent Garden operas, 'The Maid of the Mill,' 1765, 'The Padlock,' 1768, 'Lionel and Clarissa,' 1768, which followed, obtained the highest favour.

LOVE'S TRIUMPH. An opera in three acts; words by J. R. Planche, after 'Le Portrait vivant,' music by W. Vincent Wallace. Produced at the Royal English Opera, Covent Garden (Pyne and Harrison), Nov. 3, 1862. c.

In addition to the above-named modern opera the title has been used for other earlier musical productions; the first on record being 'Love's Triumph thro' Callipos,' printed in 1640. This was a masque written by Ben Jonson, and acted in the Court of Charles I. in 1630. The name of the composer of the music has not survived; the decorations for its staging were by Inigo Jones. Another work, 'Love's Triumph or the Royal Union,' was a tragedy acted in 1678. Probably the best-known opera under the title 'Love's Triumph,' is a pre-Handelian one produced at the Haymarket theatre in 1708, and printed in folio by Walsh and Hare about that year. Richard Leveridge, and Mrs. Tofts were the principal English vocalists, while the other parts were taken by Italian singers. The words were adapted from the Italian of Cardinal Ottoboni, by Peter Anthony Matteux, and the music was by C. F. Cesarini ¹ and F. Gasparini.

LOVER, SAMUEL, was born in Dublin, Feb. 24, 1797, the eldest son of a stockbroker, and displayed talent in many directions at an early age. After an unsuccessful attempt to follow his father's business he devoted himself to miniature-painting, and was elected a member of the Royal Hibernian Academy in 1828, becoming its secretary two years afterwards. Ten years before this, he had sung a song of his own composition at the banquet given to Moore in Dublin. He also achieved success as a writer of prose and verse, before the publica-

¹ Fitz's gives the name as Cesarini, but both Hawkins and Burney speak of him as Carlo Cesarini Giovanni, sometimes Del Violone.
tion of his Legends and Stories of Ireland in 1851. In that year his opera, 'Graine Uaile, or The Island Queen,' was given in Dublin. In 1832 he gained much fame by the exhibition of a miniature he had painted of Paganini. In 1835 he settled as a miniature-painter in London, and attained a good deal of social and artistic success. He was associated with Dickens in the foundation of Bentley's Miscellany. His first novel Nora O'More (the title taken from his own song of the same name, dated 1826) came out in 1837, and he dramatized it, in the same year, for the Adelphi Theatre, where it ran for more than a hundred nights. Other dramatic pieces were: 'The White Horse of the Peppards,' 1838; 'The Happy Man,' 1839; 'The Olympic Premier,' and 'The Beau Ideal,' 'The Greek Boy,' 1840; 'Il Paddy Whack in Italia' (a burlesque Italian opera, English Opéra House, Lycceum, 1841). His last play was 'MacCarthy More,' 1861. Meanwhile, he was writing novels, etc., and the best-known of his works, 'Handy Andy,' came out in 1842. In 1844 the regular practice of his art had to be abandoned, owing to failing eyesight, and on March 13, 1844, he started a musical entertainment, called 'Irish Evenings,' in the Princess Concert Rooms. The success of his experiment was so great that he repeated the entertainment in the chief towns of England, Scotland, and Ireland, going to America in 1846. In 1848 he returned to London, and appeared in a new entertainment called 'Paddy's Portfolio.' He wrote two libretti for Balfe, married for the second time in 1852, and brought out some books of poems which were not successful. From 1854 he wrote no more, and in the latter years of his life went back to live in Dublin. He died at St. Heliers, Jersey, July 6, 1868. He was buried at Kensal Green. Among his most popular songs were 'The Angel's Whisper,' 'Molly Bawn,' and 'The Low-Backed Car.' Some of these were adapted to old Irish tunes. (Dict. of Nat. Biog.)

LOWE, EDWARD, was born about 1610 at Salisbury, and was a chorister in the cathedral there under John Holmes, the organist. About 1630 he succeeded Dr. William Stonard as organist of Christ Church Cathedral, Oxford. [He married Alice, daughter of Sir John Poyton of Dodington, in the diocese of Ely, who died March 17, 1648-49. Wool's Life, i. 151.] In 1660 he was appointed one of the organists of the Chapel Royal. In 1661 he published at Oxford A Short Direction for the performance of Cathedral Service, published for the information of such as are ignorant of it and shall be called upon to officiate in Cathedral or Collegiate Churches where it hath formerly been in use, containing the notation of the Process, Responses, Litany, etc., for ordinary days, and, under the title of Extraordinary Responses upon Festivals, a version of Tallis's Responses and Litany, and also 'Veni Creator,' harmonised for four voices. In 1662, on the resignation of Dr. Wilson, he was appointed Professor of Music at Oxford, having been deputy for some time before. In 1664 he published A Review of his Short Direction, adapted to the then newly revised Liturgy, and including also several chants and John Parsons' Burial Service. This edition was reprinted by Dr. Rimbault in 1843, and by Dr. Jebb in his Choral Responses in 1857. Low composed several anthems, some of which are in the Tudway collection and at Ely Cathedral. He died at Oxford, July 11, 1682, and was buried in the Divinity Chapel on the north side of the cathedral.

LOWE, THOMAS, favourite tenor singer, made his first appearance on any stage at Drury Lane, Sept. 11, 1740, as Sir John Loverul in 'The Devil to pay'; on Oct. 17 he performed Macbeath, and on Dec. 20 had the distinction of being the original singer of Arne's beautiful songs, 'Under the Greenwood tree' and 'Blow, blow, thou winter wind' in 'As You Like It.' [In 1743 he appeared in Dublin in 'The Provoked Wife,' singing O'Carolan's song, 'Bumpers, Squire Jones.' w. h. n. f.] He was the original singer of the following parts in Handel's oratorios:—Priest of Dagon and Israelitian Man in 'Samson,' 1742; First Elder in 'Susanna,' 1743; Joshua, 1748; Zadok in 'Solomon,' 1749; and Septimius in 'Theodora,' 1750. In 1745 and several subsequent years he sang at Vanbrugh Gardens, and in 1763 became lessee and manager of Marylebone Gardens, and continued so until 1768, when an unsuccessful season compelled him in Feb. 1769 to assign his interest in the place to trustees for the benefit of his creditors. His powers beginning to fail, he was compelled to accept engagements at Finch's Grotto Garden, Southwark, and similar places. In 1772 he was engaged at Sadler's Wells. He died March 1, 1783. Lowe is said to have possessed a finer voice than Beards, but to have been inferior as musician and singer. [See Dict. of Nat. Biog.]

LUCAS, CHARLES, born at Salisbury, July 28, 1808, was a chorister in the cathedral under Arthur Thomas Corfe from 1815 to 1829, when he became a pupil of the Royal Academy of Music, and studied the violoncello under Lindley, and harmony and composition under Lord and Dr. Crotch. He remained there for seven years. In 1830 he became a member of Queen Adelaide's private band, and composer and arranger of music for it, and soon afterwards music preceptor to Prince George (afterwards Duke) of Cambridge and the Princess of Saxe-Weimar. In 1832 he succeeded Cipriani Potter as conductor at the Royal Academy of Music. He also became a
member of the opera and other orchestras as a violin-player. In 1839 he was appointed organist of Hanover Chapel, Regent Street. He was for some time conductor of the Choral Harmonists' Society, and in 1840-43 he occasionally conducted at the Antient Concerts. On the retirement of Lindley he succeeded him as principal violinist at the opera, the provincial festivals, etc. From 1856 to June 30, 1865, he was a member of the music-publishing firm of Addison, Hollier, & Lucas. In 1859 he was appointed successor to Potter as Principal of the Royal Academy of Music, which office he held until July 1866, when ill-health compelled him to relinquish it. His compositions include 'The Regicide,' opera, three symphonies, string quartets, anthems, songs, etc. He edited 'Esther' for the Handel Society. He died March 30, 1869. His son, STANLEY LUCAS, born 1834, was Secretary to Leslie's Choir from its formation to Oct. 1855; Secretary to the Royal Society of Musicians from 1861, and to the Philharmonic Society from 1866, and as a publisher did good work in London for many years. [He died at Hampstead, July 24, 1903.]

LUCAS, CLARENCE, composer and conductor, of mixed Dutch and Irish extraction, was born Oct. 19, 1866, near Niagara, Canada. He received his early musical education in Montreal, where he played trombone in a military band, and, for a season, second violin in the local Philharmonic Society, besides acting as organist at different churches. At the age of twenty he went to Paris, and studied under Georges Marty before entering the harpmony class of Theodore Dubois at the Conservatoire. In 1889, after visiting Rome and Florence, he returned to Canada and became professor of harmony and counterpoint at the College of Music, Toronto, and conductor of the Philharmonic Society at Hamilton, Ontario. Two years later he was appointed professor of musical theory and history in the Utica (N.Y.) Conservatory of Music, conductor of the Utica Choral Union, and organist of two churches.

In 1893 Mr. Lucas took up his residence in London, acting as critic and correspondent for several papers, and also for a time as proof-reader and manuscript reviser to Messrs. Chappell & Co. He was appointed conductor of the Westminster Orchestral Society in December 1902, but resigned that post in the summer of 1904, when he went on a prolonged tour with a musical play entitled 'Peggy Macdree,' for which he provided an entirely new score in July 1905. All this time Mr. Lucas was doing prolific work as a composer, and proving his versatility by contributions to well-nigh every branch of his art. Between 1880 and 1897 he wrote, inter alia, seven operas, one of which, a comic opera called 'The Money Spider,' was produced (with little success, however) at the

Matinée Theatre, London, in 1897. He also wrote four oratorios and cantatas, one of which, 'The Birth of Christ,' was performed in the Chicago Auditorium, Feb. 17, 1902, by the Apollo Club, and received with much favour. This work contains considerable evidence of contrapuntal skill, notably a chorus, 'Carol, Christians,' cleverly devised in the form of a passacaglia.

Among a dozen more or less important compositions for orchestra are a symphony, two symphonic poems, and several overtures, three of which—viz. overtures to 'Othello,' 'As You Like It,' and 'Macbeth'—have been heard at Queen's Hall under Mr. Henry J. Wood. The last-named work was originally performed under the late Theodore Thomas at Chicago in Feb. 1901, and it elicited praise on both sides of the Atlantic. One of Mr. Lucas's good qualities is a skilful and vigorous employment of the fugal style, and this may be aptly cited in connection with his prelude and fugue in F minor, op. 38, for pianoforte, which has won admiration from good judges like MM. Saint-Saëns and Loschitzky. He has written nearly forty pieces for piano, in addition to many for the organ and for strings; the former including a popular 'Meditation' in A flat, and the latter a very difficult but effective Ballade in A for violin. A list of sixty-four songs comprises many varieties of styles, perhaps the best being a cycle of five (op. 45)—'The rainy day' (Longfellow), 'The fountain's mingled' (Shelley), 'Take hands, touch lips' (Swinburne), 'When stars are in the quiet skies' (Lyttton), and 'Eldorado' (Tennyson)—first introduced to the public by Mr. David Bispham in 1903. As a hobby for recreation, Mr. Lucas has made a number of excellent violins. W. H. L.

LUCCA. In 1640 an Academy, that of the 'Accisi,' was founded at Lucca entirely for dramatic musical representation. C. M. F.

LUCCA, PAULINE, one of the most brilliant operatic artists of a brilliant epoch, is a native of Vienna, where she was born of Italian parents, April 26, 1841. Her high musical gifts showed themselves early, when, a mere child, she sang in the choir of the Karlskirche, in 1856. One Sunday the principal singer was missing, and the young chorister, put forward to supply her place in the solo of a mass of Mozart's, revealed a beauty of voice and charm of style that startled all present. She studied under Uschmann and Lowy, and, her parents being in straitened circumstances, entered the chorus of the Opera at Vienna, which she quitted in 1859 to come out at Olmitz. Just before leaving, it fell to her to lead the Bridesmaids' Chorus in the 'Freischütz,' her performance creating a sensation that made Vienna eager to retain her; but it was too late. On Sept. 4, 1859, she made her début at Olmitz as Elvira in 'Ernani,' and there became a favourite at once. In March 1860 she appeared at Prague as Valentine in
PAULINE LUCCA
The Huguenots,' and as Norma. The fame of a young singer of rare gifts, including the rarest of all, original genius, reached Meyerbeer in Berlin, then vainly seeking an artist to whom he could entrust the unconventional role of Selika in his yet unpublished 'Africaine.' At his instigation Mlle. Lucca was engaged for Berlin, where she first appeared in April 1861, and soon roused an enthusiasm rarely equaled by any former singer. She studied the role of Selika and others under Meyerbeer's personal supervision. At Berlin she was engaged as Court singer for life; and on July 18, 1863, made her first appearance in England, at Covent Garden, in the part of Valentine, creating an extraordinary impression, which was further enhanced by her performance of Margherita, in 'Faust,' during her second fleeting visit to our shores the following year. On July 22, 1865, the 'Africaine' was produced at Covent Garden, and Mlle. Lucca's impersonation of Selika must be ranked among the very highest achievements in the lyrical drama. She reappeared in London every season (excepting 1869) up to 1872; and in 1882-84 she sang again at Covent Garden, in the parts of Selika, Cherubino, Carmen, etc., being announced to appear in 'Colomba,' but that opera was not produced in Italian. She sang throughout Germany with triumphant success, and at St. Peters burg, where she was received with the wildest enthusiasm. Her voice, a full soprano, with a compass of 2½ octaves extending easily to C in alt, and sympathetic throughout, seemed capable of taking every grade of expression; and to her rare lyrical endowments she united one still rarer—a genius for representation. In London, besides the parts specified above, she was heard mostly in Zerlina ('Fra Diavolo'), Leonora ('Favorite'), and Cherubino; but Berlin knew better the extent of a répertoire said to include over fifty-six roles. Auber was so delighted with her singing of his music that he presented her with the pen with which 'Fra Diavolo' was written, in token of his admiration. Meyerbeer pronounced her a very David Garrick, and no wonder. To each impersonation she imparted a specific individuality, presenting characters as directly opposed as Cherubino and Selika, Halévy's Juive and Nicolai's Merry Wife of Windsor, Wagner's Elsa, and Angela in the 'Domino Noir,' with the same truth, natural ease, and vivid originality; whilst to colourless roles, such as Agata in the 'Freischütz,' she gave a distinct personality and charm. In 1872 she severed her connection with Berlin, and went to America, where she remained two years, on an operatic tour through the States. She returned to Europe in 1874, and sang at all the chief cities of Germany, except Berlin. At Vienna she remained one of the chief attractions of each season. Besides starring engagements in Germany, she reappeared in Brussels, 1876; St. Peters burg and Moscow, 1877; and Madrid, 1878. At Vienna she added Donna Anna, Carmen, and Maddalena in 'Le Postillon,' to her list of successful parts. In 1869 she married Baron von Rulden, but was separated from him in 1872. While in America she married Herr von Wallhoffen, who died in 1899 in Vienna. She lives in Vienna, and is honorary member of the Court Opera.

B. T.

LUCCHESINA. MARIA ANTONIA MARCHE- SINI, DETTA LUCIA, an Italian mezzo-soprano, who sang in London, 1737-39. In the former year she played Rosinonda in Handel's 'Faramondo'; in the following year, besides other parts, that of Arsamene, a male character, in 'Serse'; and she sang the music of David in 'Salut' on its first production, Jan. 16, 1739.

J. M.

LUCIA, FERNANDO DE, well-known Italian tenor, was born at Naples about 1860. Having gained his reputation at Lisbon and elsewhere he came to London in 1887, being engaged by the late Sir Augustus Harris for that manager's experimental season of opera at Drury Lane. At first, however, de Lucia made no impression on London audiences. He was altogether overshadowed at Drury Lane by the brilliant success of Jean de Reszke, and, moreover, the parts in which he appeared—one of them Don Ottavio in 'Don Giovanni,'—were scarcely suited to his voice and style. His real opportunity in London came in 1893, when, again under Sir Augustus Harris's management, he appeared as Canio in the first production in England of Leoncavallo's 'Pagliacci.' The passion and intense expression with which he sang the lament at the end of the first act established his English reputation in one night. He remained associated with Covent Garden for some time, singing in 'Faust,' 'Cavalleria Rusticana,' Boito's 'Mefistofele,' and also in the first performance in England of Mascagni's 'L'Amico Fritz.' Ceasing to be a member of the Covent Garden company, Signor de Lucia had not been in London for some years when he reappeared at the new Waldorf Theatre in May 1905, singing in 'Pagliacci,' 'L'Amico Fritz,' and other operas with undiminished power. De Lucia's full tones do not fail very pleasantly on English ears, but he has a beautiful mezza voce, as will be admitted by every one who has heard him sing Faust's song in the last act of 'Mefistofele.' He is an admirable actor, especially in parts, like Canio, that demand vigour and passion.

LUCIA DI LAMMERMOOR. Opera in three acts; libretto by Cammarano, music by Donizetti. Produced at Naples in 1835; in Paris, in four acts (words by A. Royer and Wace), at the Théâtre de la Renaissance, Aug. 10, 1838; and the Académie-royale, Feb. 20, 1846; in London, at Her Majesty's, April 5, 1838; in English, at Princess's Theatre, Jan. 19, 1843.

G.

LUCIO SILLA. A Dramma per musica, in three acts; libretto by G. da Camara, music by
Mozart. Produced at Milan, Dec. 26, 1772—the last which he wrote for Italy.

LUCREZIA BORGIA. Opera in three acts; libretto adapted by Romani from Victor Hugo's drama, music by Donizetti. Produced at La Scala, Milan, spring, 1834; given at the Théâtre Antique, Paris, Oct. 27, 1840. Victor Hugo then stopped the performance, and the words were re-written under the title of 'La Rinnegata.' In England it was produced (in two acts) at Her Majesty's Theatre, June 6, 1839, for the début of Mario; in English, at the Princess's Theatre, Dec. 30, 1843.

LUDWIG, JOSEPH, violinist and composer, was born in Bonn, April 6, 1844. He commenced the study of music at the age of eleven, and was sent, four years later, to the Cologne Conservatorium, where he studied for four and a half years under Grünwald (violin), and Ferd. Hiller (composition). Later he went to Hanover and was taken in hand by Joachim, with whom he remained two years. Then came the inevitable military examinations, and an interregnum during which music was put aside, after which he accepted engagements to play solos in various German towns. He came in 1870 to London, where he received, shortly after his arrival, an appointment at the London Academy of Music in succession to Leopold Jansa. Since then he has identified himself with English musical life, taken out naturalisation papers, and won a respected position as a performer of chamber music, both in public and private. He has given numerous quartet concerts in London and provinces, his colleagues being usually G. Collins (second violin), A. Gibson or A. Hobday (viola), and W. E. Whitehouse (violoncello). In his playing he recalls the manner of his master, Joachim, whose serious artistic aims he shares. He has written two symphonies, a pianoforte quartet, and several smaller pieces for violin and violoncello. He plays upon a Joseph Guarnerius del Gesù violin, lent to him for life by a pupil. It is a master instrument to that of Paganiini, the upper table being made from the same piece of wood.

LUDWIG, PAUL, violoncellist, son of the above, was born in Bonn, August 11, 1872. He took early to the violoncello, studying at first under Hugo Daubert, and W. E. Whitehouse; went in 1890 to the Royal College of Music, where he took some further lessons from H. Howell and subsequently studied with Piatti, through whose recommendation he came to occupy the violoncello desk at the Popular Concerts on many occasions, and always with credit. Of late his style has considerably ripened, and now, whether as soloist or chamber-music player, he ranks high among the violoncellists resident in London.

LÜBECK, JOHANN HEINRICH, conductor and violinist, born Feb. 11, 1799, at Alphen in Holland; held the post of capellmeister and head of the Conservatoire at the Hague until his death, Feb. 7, 1866. His eldest son, Ernst, a very distinguished pianist, was born Aug. 24, 1829, and first appeared in public at twelve years of age, when he played Beethoven's Op. 104 concerto. He made a tour to the United States, Mexico, and Peru, which lasted from 1849 to 1854. On his return he was made Court pianist at the Hague. In 1855 he moved to Paris, where he principally resided until driven from the city by the disturbances of the Commune, which gave a shock to his brain from which it never recovered. He became at length hopelessly insane, and died Sept. 17, 1876. He wrote only for piano. Among his compositions are the following:—Berceuse in Ab, op. 13; Tarentelle; Polonaise, op. 14; 'Triptyh le Sprit, Réverie caractéristique.' The two former were chosen by him for performance at the Philharmonic Concert, May 7, 1869, when he also played Mendelssohn's Concerto in G minor. In the same year he first appeared at the Musical Union. His playing was distinguished for brilliancy and technical dexterity. Berlioz says of him: 'Son talent est tout à fait extraordinaire, non seulement par un mécanisme prodigieux, mais par un style musical excellent et irréprochable. C'est la verge unie à la raison, la force unie à la souplesse; c'est brillant, pénétrant, et élastique comme une lame d'épee.' His brother, Louis, born 1838 at the Hague, was for some years the leader of the violoncello at the Leipzig Conservatorium, until about 1872, when he moved to Frankfort. He was a member of the Court orchestra at Berlin from 1880, and died at Berlin, March 8, 1904.

LUIGNI, ALEXANDRE CLÉMENT LÉON JOSEPH, famous French conductor, was born at Lyons, March 2, 1850; was a pupil of the Paris Conservatoire, gaining a third accessit in 1867, a first accessit in 1868, and a second prize in 1869. In the latter year he was appointed leader of the orchestra in the Grand Théâtre of Lyons, becoming conductor there in 1877. He held this post till 1897, when he became conductor of the Opéra Comique in Paris, at first with Danbé, and afterwards (May 4, 1904) as principal conductor, a post he still holds with distinction. While at Lyons he was professor in the Conservatoire there, and founded the 'Concerts Bellecour,' and the 'Concerts du Conservatoire.' He wrote numerous ballets, and has also composed symphonic music:—'Ballet égyptien,' 'Ballet russe,' 'Marche de l'Empire,' 'Carnaval turc,' 'Marche Solennelle,' etc.; chamber music, a cantata, 'Gloria Victis,' performed at Lyons, 1887, and lastly, 'Faublas,' an opéra-comique in three acts given at the Théâtre Cluny, Paris, Oct. 25, 1851, etc. G. É. LUIGNI, or LUINEAG, a choral song used to accompany labour, sung (or formerly sung) principally by women in the remote Highlands and Islands of Scotland. Patrick M'Donald,
1783, says that they were of a plaintive character, and were then most common on the north-west coast of Scotland and in the Hebrides. He mentions that Luinigs were 'sung by the women not only at their diversions but also during almost every kind of work where more than one person is employed, as milking cows, fulling cloth, grinding of grain,' etc. When the same airs were sung as a relaxation the time was marked by the motions of a napkin held by all the performers. One person led, but at a certain passage he stopped, and the rest took up and completed the air. As they were sung to practically extemporary words by the leader with a general chorus, they resembled the sailors 'Chanty' of modern times.

A 'Luineag' is given in Albyn's Anthology, 1818, vol. ii.

F. K.

LUISA MILLER. Opera in four acts; libretto (from Schiller's 'Cabale und Liebe') by Camarrano, music by Verdi. Produced at Naples, Dec. 8, 1849. Given in French at the Grand Opera, Paris, as 'Louise Miller,' Feb. 2, 1853; in English, at Sadler's Wells, June 3, and in Italian, at Her Majesty's, June 8, 1858—both as 'Louise Miller.'

LULLY, or LULLI, JEAN BAPTISTE. [The correct orthography of this name may be settled by the fact that all extant authentic documents signed by him end with the y. It is probable that he dropped the Italian i and substituted the y, when he became a naturalised Frenchman. Lully, who was greatly in favour with Louis XIV.—whose band of 'Petits-Violons' he led,—was a graceful composer of the minuets and dances then in vogue, and was the first composer of legitimate French Opera. He was born at or near Florence in 1632, though the precise date is unknown, the certificate of his birth not having been discovered, and the whole history of his earliest childhood is veiled in obscurity. In spite of the statement in his Letters de Naturalisation granted to him by Louis XIV., in December 1661, wherein he is declared to be the son of Lorenzo de' Lulli a 'Florentine Gentleman,' and Caterina del Serti, it is most probable that Lully's origin was humble, and that France only learned that about this brilliant genius which he himself chose to reveal. An old shoemaker monk gave the gifted but mischievous child some elementary instruction, and taught him the guitar and the rudiments of music. Lully was in the midst of these studies, when the Chevalier de Guise, returning from Malta, chanced to come across him, and, to please his niece Mlle. de Montpensier (who wanted a 'joli petit Italian' to teach her his language) brought this child, then about ten or twelve years of age, with him to France. It is doubtful whether 'La Grande Mademoiselle' thought Lully joli, for we are told he entered her service as a scullion in the kitchen, and employed his leisure in learning the songs of the day, and playing them upon his second-rate violin. The Comte de Nocent, chance to hear him one day, was so struck with his talent that he mentioned it to Mlle. de Montpensier, with the result that he was promoted from the kitchen to the princess's band, where he soon out-distanced the other violinists. Thus, when quite young, fortune smiled upon the little Lully, and further favours were probably in store for him at the Palais d'Orleans, when his mischievous habit of writing sarcastic verses and setting them to characteristic music, brought him all at once into disgrace with the princess. Mademoiselle having discovered that he had composed the air of a satirical song, full of gaiety and 'go,' at her expense, promptly dismissed him from her service. However, that which seemed a loss was really a gain to Lully, for the young King Louis—then a youth of fifteen or so—had previously taken a fancy to Baptiste, and astutely perceiving his superior gifts made him a member of his band of 'Twenty-four violins' (Les vingt-quatre Violons du Roi). Here his wonderful powers on the violin, an instrument which he played with a perfection none had heretofore attained (Charles Perrault, Hommes Illustres) so impressed Louis XIV., that His Majesty was pleased to establish a band entirely for his favourite to train. He named these players Les Petits-Violons, and under Lully's instruction they soon surpassed the famous 'Twenty-four violins' both in power and celebrity. His new post enabled him to perfect himself as a solo player, and gave him valuable practice as a conductor and composer for the orchestra. With his band of Petits-Violons as a means, he completely revolutionised the dull methods of composition formerly employed. Instead of treating his subjects as airs with an accompaniment (as was generally the custom) he studied the capacity of each instrument, and arranged his harmony and counterpoint in such a manner that each one was allotted a 'part' of individual interest, thus greatly adding to the novelty and balance of the whole composition. Baptiste, as he was then called, had common sense as well as ambition, and soon perceived that without deeper study he could not make full use of his talents. To remedy his defective education he took lessons on the harpsichord, and in composition, of Nicholas Mertz, a professor of singing; François Roberdet, who combined the functions of valet de chambre to the queen-mother, with those of organist at l'Eglise des Petits-Pères, and of Gigault, the greatest man of the three, who filled the post of organist at several churches, and was also a composer of talent. Lully's brilliant intellect and natural gifts were not slow in profiting by the superior knowledge of these masters, and in the meantime he lost no opportunity of ingratiating himself with men of rank. A born courtier, full of the resource and aplomb necessary to face an intriguing
court, he knew, above all, how to please and amuse the king, and how to profit by this precious favour at the commencement of a reign full of youth, passion, and art. In the midst of his dissipated life he continued tenaciously composing, and found time to write innumerable songs (amongst them 'Au Clair de la Lune'), dances, violin solos, and even church music, and gained such a reputation that no court fête was complete without Baptiste’s music.

He was soon chosen to compose the music for the court ballets, in which Louis XIV. himself danced side by side with Lully; and after the success of 'Alexiane' (1658, words by Benserade) was commissioned to write the divertissements for 'Sérac,' an Italian opera by Cavalli, performed at the Louvre (Nov. 22, 1660) in honour of the king’s recent marriage with Marie Thérèse of Austria (June 9 previous), and a year and a half later the ballets for 'Ecole Amante,' another opera by Cavalli, performed at the opening of the magnificent 'Salle de Spectacles' at the Taileries (Feb. 7, 1662). The Royal favour was not slow in manifesting its pleasure in these performances in a palatable form. On May 16, 1661, Lully received the 'Brevet de la charge de Composition de la Musique de la Chambre du Roi,' on July 3, 1662, a new brevet; 'La charge de Maître de Musique de la Famille royale.' These two united were fixed at a value of 30,000 livres, and the bénédiction of them was extended after Lully’s death to his daughter for her life. In 1664 Lully married the daughter of Michel Lambert, ‘maître de musique de la cour'—a man greatly esteemed for his talents, his singing, and his amiable character—who brought with her a dot of 20,000 livres. In the same year he became very friendly with Molière, and collaborated with him in the composition of numberless ballets until 1671. It was by studying the works of the Venetian composer Cavalli, and observing his method, that Lully laid the foundation of his own individual style.] In composing the divertissements of 'Le Mariage forcé,' 'Pourçaugnac,' 'La Princesse d'Elide,' and 'Le Bourgeois Gentilhomme' he made good use of the feeling for rhythm which he had imbibed from Cavalli, and also endeavoured to make his music express the life and variety of Molière’s situations and characters. The exquisitely comic scene of the polygamy in 'M. de Pourçaugnac' (which Lully himself impersonated to such perfection that he often employed it as a means to gain the king’s pardon when His Majesty was displeased) is, in itself, sufficient evidence of the point to which he had attained, and of the glorious future which awaited him.

From 1658 to 1671—the year in which Molière produced his tragedy 'Psyché'—Lully composed no less than thirty ballets, all unpublished.1 These slight compositions, in which he personally took part with considerable success as dancer and comic actor, confirmed him still further in the favour of Louis XIV. But neither the lucrative posts granted him by the king nor his constantly increasing reputation were sufficient to appease his insatiable ambition. With all his genius he possessed neither honour nor morals, and would resort to any base expedient to rid himself of a troublesome rival. His envy had been roused by the privilege conceded to the Abbé Perrin (June 28, 1659) of creating an Académie de Musique, and was still further excited by the success of Cambert’s operas, 'Pomone' and 'Les Peines et les Plaisirs de l’Amour' (1671). With the astuteness of a courtier Lully took advantage of the squabbles of the numerous associés directeurs of the opera, and with the aid of Mme. de Montespian procured the transference of Perrin’s patent to himself (March 1672). Once master of a theatre, the man whom Boissan branded as a corroy boy, a coquin ténébreux, and a bouffon odieux proved his right to a place in the first rank among artists, though as a man he could claim neither sympathy nor respect. In the post Quenault was fortunate enough to discover a collaborateur of extraordinary merit, and a doele, modest character, admirably adapted to agree with that of the excitable, domineering court musician. In conjunction with him, Lully composed the first legitimate French opera, 'Les Fêtes de l’Amour et de Bacchus,' which was produced with great éclat at the new theatre on Nov. 15, 1672. [The partnership so auspiciously inaugurated continued for a space of fourteen years, within which time Lully composed no less than twenty operas, paying Quenault a retaining fee of 4000 livres to supply him annually with an operatic libretto.]

The following is a list of the works produced:

2. Cadmus et Hermione. 5 acts. April 1673.
8. Psyché. 5 acts. April 19, 1678.

The variety of subjects in this list is surprising, but Lully was perfectly at home with all, passing easily from lively and humorous divertissements to scenes of heroism and jathos, from picturesque and dramatic music to downright comedy, and treating all styles with equal power. He revolutionised the 'ballets de la cour,' replacing the slow and stately airs by lively allegros, as rapid as the pironettes of the serviteur de Musique contains the music of several of these divertissements. None, notably that of 'Le Bourgeois Gentilhomme,' have been revived on the Parisian stage.
dances whom he introduced on the stage, to the great delight of the spectators. For the 'recitativo secco' of the Italians he substituted accompanied recitative, and in this very important part of French opera scrupulously conformed to the rules of prosody, and left models of correct and striking declamation. On the other hand, he made no attempt to vary the form of his airs, but slavishly cut them all after the fashion set by Cavalli in his operas, and by Rossi and Carissimi in their cantatas. But although the 'chanson à couples,' the 'air-complainte' (or 'arioso' as we call it), and the 'air déclamation'—afterwards brought to such perfection by Gluck—unduly predominate in his works, that monopoly of form is redeemed by a neatness of execution and a sweetness of expression worthy of all praise. He thoroughly understood the stage—witness the skill with which he introduces his choruses; had a true sense of proportion, and a strong feeling for the picturesque. The facts that his works are not forgotten, but are still republished, in spite of the progress of the lyric drama during the last 200 years, is sufficient proof of his genius. Not but that he has serious faults. His instrumentation, though often laboured, is poor, and his harmony not always correct: a great sameness of treatment disfigures his operas, and the same rhythm and the same counterpoint serve to illustrate the rage of Roland and the rocking of Charon's boat. Such faults are obvious to us; but they were easily passed over at such a period of musical revolution. It is a good maxim that in criticising works of art of a bygone age we should put them back in their original frames; and according to this rule we have no right to demand from the composer of ‘Thésée,’ ‘Atys,’ ‘Issis,’ ‘Platon,’ and ‘Armide’ outbursts of passion or agitation which would have disturbed the solemn majesty of his royal master, and have outraged both stage propriety and the strict rules of court etiquette. The chief business of the king's Surintendant de la Musique undoubtedly was to please his master, who detected brilliant passages and lively melodies; and making due allowances for these circumstances we affirm that Lully's operas exhibit the grace and charm of Italian melody and a constant adherence to that good taste which is the ruling spirit of French declamation. Such qualities as these will always be appreciated by impartial critics.

Lully was also successful in sacred music. Ballard published his motets for double choir in 1684, and a certain number of his sacred pieces, copied by Philidor, exist in the libraries of Versailles and of the Conservatoire. See the Quellen-Lexicon. Mme. de Savigné's admiration of his 'Miserere' and 'Libera' (Letter, May 6, 1672) is familiar to all. Equally well known is the manner of his death. While conducting a Te Deum (Jan. 8, 1687) in honour of the king's recovery from a severe illness, he accidentally struck his foot with the baton; an abscess followed; the quack in whose hands he placed himself proved incompetent, and he died in his own house in the Rue de la Ville-l'Évêque on Saturday, March 22.

[During the whole of his fifteen years' directorship of the Opera, Lully guarded his privileges with the utmost care and jealousy. The National Archives chronicle the numerous commands issued in favour of Lully by Louis XIV.: August 12, 1672, Order forbidding any theatre other than Lully's to employ more than six violins or twelve musicians in all; Forbidding Lully's actors and dancers to play at any other theatres but his own, unless expressly given leave by Lully. April 1673, Forbidding any of the other theatres to employ more than 'two voices and six violins' in any of their representations. In 1684 a Royal Command that no Opera should be played in the kingdom unless by the permission of the 'Sieur Lully'; for infringement of this rule a penalty of 500 livres was demanded.

Mounting still higher in the king's favour, Lully was granted in 1681 his Lettres de Naturalisation and his Lettres de Noblesse, and, through sheer impudence, was made one of the Scecrétaires du Roi, a privilege previously only accorded to the noblesse of the land.]

As both Surintendant de la Musique and secretary to Louis XIV., Lully was in high favour at court, and being extremely avaricious, used his opportunities to amass a large fortune. At his death he left four houses, all in the best quarters of Paris, besides securities and appointments valued at 342,000 livres (about £14,000). His wife Madeleine, daughter of Lambert the singer [or of Michel Cambert, according to the Quellen-Lexicon], whom he married July 24, 1662, and by whom he had three sons and three daughters, shared his economical tastes. For once laying aside their parsimonious habits, his family erected to his memory a splendid monument surmounted by his bust, which still exists in the left-hand chapel of the church of the 'Petits-Prêtres,' near the Place des Victoires. Cotton had the sculptor, and the well-known Latin epitaph was composed by Santeuil:

Peridia mora, inimica, audax, tempera et excors,
Crudelesque, e carga prodes te absolvimus ipsis,
Non de te querimus nisi hanc unam magna.
Sed quando per te populus regnique voluptas,
Nos aut auditis repuit qui calamitas urbem
Lullius crispis, querimus modo sura fusi.

'Lulli musicien, a pamphlet to which both Fétis and the author of this article are indebted, was chiefly compiled by Le Prévost d'Exmes from various articles written by Séspéct, de Fressinier, and Titon du Tillet. There are many portraits of Lully, of which the best-known are those engraved by Edelinck, Thomas, St. Aubin (from the bust by Colignon), and
Desrochers. Mignard's portrait of him is in the possession of Dr. W. H. Cummings, and the full-length engraving by Bonnard, which forms the frontispiece to the score of 'Psyché,' published by Fourcault, is now extremely scarce. Our engraving is copied from Edelinck.

Lully's eldest son, Louis, born in Paris, August 4, 1664, died about 1715, composed with his brother Jean Louis 'Zéphire et Flore,' five acts (1688), revised in 1715; by himself, 'Orphée' (1690), a failure; and with Marais, 'Alcide,' five acts, successfully produced in 1693, and revived as 'La Mort d'Hercule' in 1705, as 'La Mort d'Alcide' in 1716, and again under its original title in 1744. He also composed with Colasse a four-act ballet, 'Les Saisons,' the memory of which has been preserved by one of J. B. Rousseau's satires. The second son, Jean Baptiste de Lully, born in Paris, August 6, 1665, was appointed surintendant de la musique in 1695, and died June 9, 1701 (Fétis). He wrote a cantata, 'Le Triomphe de la Raison,' performed at Fontainebleau in 1696.

His brother, Jean Louis, third son of the great composer, and a musician of considerable promise, was born Sept. 23, 1667, and died Dec. 28, 1688, aged twenty-one. His father's court appointments devolved on him, and on his death his brother became 'Surintendant' and 'Compositeur de la Chambre du roi,' to which posts he owed the slender reputation he succeeded in acquiring.

Radet, Lully Homme d'affaires, Propriétaire et Musicien (Paris, 1891); M. de Montrond, Les Musiciens les plus célèbres (Lille, 1853, p. 41). Article in The People's Magazine (London, Nov. 1, 1869), with a print of de la Charlerie's picture of Lully in Mlle. de Montpensier's kitchen. Fétis, Biographie, vol. v., g. c.; with additions, in square brackets, by E. H. A.

LUMBYE, Hans Christian, Danish composer of marches and dance-music, born May 2, 1810, in Copenhagen. Like Strauss and Lanner he had an orchestra, which, when not travelling professionally, was engaged from 1848 at the Tivoli near Copenhagen. His many marches and dances ('Kroels Ballklänge,' 'Eine Sommernacht in Danemark,' 'Der Traum des Savoyarden,' etc.), were long popular. On his retirement in 1865, he was created a Kriegsrath. He died March 20, 1874. His son Georg, the composer of an opera, 'Die Hexenflöte,' (1869), now enjoys nearly as great a popularity in Copenhagen as his father once did. R. G.

LUMLEY, Benjamin, born in 1811 (the son of a Jewish merchant named Levy), was bred to the law, and in Nov. 1832 admitted a solicitor. Being concerned for Laporte he became mixed up with the affairs of the Opera, and on Laporte's death in 1841 was induced to become its manager. Pursuing a policy initiated by his predecessor, he gave prominence to the ballet to the neglect of the opera, and in a few years had so alienated his performers that at the end of the season of 1846 nearly the whole of his principal singers, band, and chorus, seceded and joined the newly formed establishment at Covent Garden. The popularity of Jenny Lind sustained him during the next three seasons; and after her retirement from the stage in 1849, the return of Sontag to public life enabled him to maintain his position for a time, but afterwards the fortune of the house waned, until, at the end of the season of 1852, the manager was compelled to close the theatre until 1856, when the burning of Covent Garden induced him again to try his fortune. [In 1850-1851 he was manager of the Paris Théâtre des Italiens.] He struggled on for three seasons, but at the end of 1858 was forced to submit. Four benefit performances were given for him in 1863. He produced during his period of management the following operas for the first time in England—Donizetti's 'Figlia del Regimento,' 'Don Pasquale,' 'Linda di Chamouni,' and 'Favorita'; Verdi's 'Ernani,' 'Attila,' 'Nabucco,' 'Traviata,' 'Trovatore,' and 'Manzaniere'; Costa's 'Don Carlos,' and Halévy's 'Tempesta' and introduced, among others, the following singers—Jenny Lind, Tadolini, Prezzolini, Cruvelli, Parodi, Castellan, Johanna Wagner, Piccolomini, Tietjens, Gardoni, Calzolari, Fraschini, Giorgini, Fornasari, Ronconi, and Belletti. After his retirement he returned to his original profession. In 1863 appeared (2nd edition) an account of his trouble with Lord Dudley, as The Earl of Dudley, Mr. Lumley, and Her Majesty's Theatre. In 1864 he published an account of his managerial career, under
the title of Reminiscences of the Opera (Hurst & Blackett, 1864). He died March 17, 1875, w. h. n.; addtions from Dict. of Nat. Bio.
LUNN, Louisa Kirkey, born Nov. 8, 1873, at Manchester, was first taught singing there by Mr. J. H. Greenwood, organist of All Saints' Church; later, 1893 to 1896, by Signor Visetti at the Royal College of Music, where in 1894 she gained a scholarship. On Dec. 6, 1898, as a student, Miss Lunn made her début in opera at Drury Lane as Margaret in Schumann's 'Genoveva,' and at the Prince of Wales Theatre on Dec. 13, 1894, as the Marquise de Montcontour in Delibes's 'Le Roi l'a dit,' on the production of these operas in England by the Royal College of Music. Her success, both as singer and actress, was such that Sir Augustus Harris engaged her for five years to sing in opera, but the contract became void by his death in 1896. In the meantime, on March 2 of the last-named year, she played with great success as Norah on the production of Stanford's 'Shamus O'Brien' at the Opéra Comique Theatre, since demolished, and later in the summer played small parts at Covent Garden. From 1897 to 1899 she was the principal mezzo or contralto of the Carl Rosa Company, both in London and in the provinces. Her parts included Ortrud, Brangïne, Magdalena, Carmen, both Frederick and the heroine in 'Mignon,' Julia in a stage version of Sullivan's 'Martyr of Antioch' (Oct. 23, 1897), Ella on the production of MacCunn's 'Diarmid' at Covent Garden, etc. In June 1899 she married Mr. W. J. K. Pearson of London. For a time she sang in concerts only at the Queen's Hall and elsewhere, under the direction of Mr. Robert Newman, with whom she had signed a contract. On May 14, 1901, she reappeared at Covent Garden with the Royal Opera Syndicate as the Sandman in Humperdinck's 'Hansel and Gretel,' since which date she has sung there every season. In 1904 she made a great advance there in public favour, notably as Amneris and Fricka; June 20, Pallas in Saint-Saëns's 'Hébé,' and July 6, Hesiodoide in 'Salome,' a new version of Massenet's 'Hérodiade,' on the production of these two last operas in England. Mme. Kirkby Lunn, with her fine mezzo-soprano of over two octaves in compass from e to b flat, is equally successful in the concert-room in oratorios, lieder, and ballads, singing with equal facility in four languages. On Nov. 12, 1902, she sang at the Queen's Hall, on the production of Prout's version of the 'Messiah' by the Royal Society of Musicians, having previously sung the same year at the Festivals of Sheffield and Norwich. Later in this year she went to the United States and played in opera at New York as Brangïne, Ortrud, Erda in 'Siegfried,' Amneris, etc. She also sang with great success six times with the Symphony Orchestra at Boston and elsewhere, twice at Chicago with the Pittsburg Orchestra, and twice with the Chicago Orchestra under the late Theodore Thomas. In 1904 she took part in the 'Elgar Festival' at Covent Garden, and, late in the summer, she sang at the Kursaal, Ostend, under M. Léon Rinskoff. In the autumn she went again to America, and on Oct. 17 sang as Kundry at Boston in the first English performance of 'Parsifal' by the Savage Company, under the conductorship of Capellmeister Bothwell, with great success. On her return to England in 1905 she gained golden opinions in various parts previously sung by her, and added Orpheus to their number. A. C.
LUPOT. The name of seven members of the Royal Band in England in the 16th and 17th centuries. No doubt the origin was Italian—Ambros (Ceschi) quotes a reference to a 'Lupo de Myllan.' In 1559-94 AMBROSE was a violinist, in 1581-1605 JOSEPHO and PETRO were violists (the former wrote a set of commendatory verses prefixed to John Mundy's 'Songs and Psalms,' 1594), and in 1593 the name THOMAS occurs for the first time; the violinist must have died about 1627, as his successor was appointed in that year. Another THOMAS, son of Pietro, was violinist in 1599, and in 1637 his widow petitioned for the arrears of salary due to him. These two, Thomas senior and Thomas junior, are the most important of the family; but it is a hopeless task at present to decide what compositions are to be ascribed to either (see the article in Dict. of Nat. Bio.). A third Thomas, son of Josepho, is mentioned in 1601. A HORBIO was violinist from 1612 to 1625, and THEOPEL, son of one of the Thomases, was in the band from 1627 to 1640. [He issued in 1654 a volume containing a 'Suite of Languages,' with five movements respectively headed: 'English Humor,' 'Irish Humor,' 'French,' 'Spanish,' and 'Scottish Humors.' W. H. G. F.] Among works by 'Thomas Lupo' [whether senior or junior] are noted the following: parts of the music for Campon's masque for the marriage of Lord Hayes, 1607; two pieces, for four and five voices respectively, in Sir William Leighton's 'Tears or Lamentations' (1614); five motets in Thomas Myrill's Tristitiae Remedium (Brit. Mus. Add. MSS. 29,372-6); the MS. collection intended to be published in 1616; two anthems, a madrigal, and instrumental pieces, in the library of Christ Church, Oxford; six fantasias in five parts are in Brit. Mus. Add. MSS. 17,792-6; and Elizabeth Rogers's Virginal Book contains an Ayre by 'Lupus.' (Dict. of Nat. Bio., Quellen- Lexikon, etc. See also Historical Manuscripts Commission, Lord Cowper's MSS., etc.)
LUPO, NICOLAS, the most famous of French violin-makers. The family came from the village of Mirécourt in the Vosges mountains, which has for three centuries or more been the seat of a violin manufacturer. JEAN LUPOT, the
great-grandfather of Nicolas, was a violin-maker here. His son Laurens, born 1596, established himself in the trade at Lanéville (1751-1756) and Orleans (1756-1762). François, son of Laurens, first worked with his father at Lanéville, and in 1768 migrated to Stuttgart, where he remained for twelve years as fiddle-maker in ordinary to the Grand Duke of Württemberg. In 1770 he returned, and settled at Orleans. He was the father of two sons, Nicolas, the 'French Stradivarius,' born at Stuttgart in 1758, and François, in his time a reputable bow-maker, born at Orleans in 1774. Nicolas began his career early. We have good instruments made by him at Orleans (Rue d'Illiers), before he had completed his twentieth year. These juvenile instruments are cheap in Paris at 500 francs.

In 1794 Nicolas Lupot removed to Paris and set up a shop in the Rue de Grammont (1798-1803). He afterwards removed to the Rue Croix des Petits Champs, where he made those famous copies of the great Italian makers on which his reputation rests. Lupot wisely dropped all pretensions to originality, and became the first of copyists. His favourite pattern was the Stradivarius; his few copies of Guarnerius violins are less successful. Many instruments are signed with his autograph. He made several quintets of two violins, two tenors, and bass, to which he sought to give a perfect unity of tone and appearance. These quintets fetch fancy prices: but any Lupot violin dated from 1805 to 1824 is worth from 1000 to 1200 francs. The violoncellos are rarer: a handsome one is worth 2000 francs. Nicolas Lupot ranked in his time as the first of his trade in Europe. Spohr, who long played on one of his violins, recommends him as a maker. His weakest point is his varnish. He employed several kinds: the usual one is a thick and not very transparent oil varnish, which is sometimes badly dried, and presents a rough and lumpy appearance. Lupot died in 1824. His business descended to his son-in-law, Charles Francis Gand; and the present well-known makers, Gand and Bernardel, 21 Rue Croix des Petits Champs, correctly describe themselves as the 'Ancienne Maison Lupot, 1798.' François Lupot, the bow-maker, and brother of Nicolas, invented the 'coullissé,' or metal groove attached to the 'nut,' and carefully fitted to the stick, on which it works. He died in 1837, leaving as his successor Dominique Pecate, who ranks as the best bow-maker after Tournet. E. V. P.

LURLINE. Grand legendary opera in three acts; words by E. Fitzball, music by W. Vincent Wallace. Produced at the Royal English Opera, Covent Garden, Feb. 23, 1860. G.

LUSCHNITZ, OTTMAR (Nachtgall), born 1487 at Strasburg, a pupil of Hofhaimer, was organist at Strasburg in 1515, and afterwards canon of St. Stephen's, Vienna. Owing to the Reformation troubles he was obliged to leave Strasburg in 1523, and led a somewhat wandering life, dying at the Carthusian house near Freiberg-im-Breisgau, in 1537. He was the author of Musicae Institutiones, 1515, also of Musurgia, 1536, the latter work mainly a translation into Latin of Virdung's Musica getutscht. His name appears as the composer of a threepart organ piece in Kleber's organ Tabulatur-Buch, with the date 1516. J. R. M.

LUISINGANDO, or LUISINGHIERO, literally 'flattering' or 'coaxing,' whence its musical meaning comes to be 'in a soft, tender manner,' resembling Amoroso in character, with perhaps a hint of coquetry in it, except that the latter is generally used at the beginning of movements, and the former as applying only to a short passage. Beethoven uses it in the Quartet, op. 131, in the slow movement (No. 4), where the entry of the second subject is marked 'Andante moderato e lusinghiro.' Lusingando is a very favourite direction of Weber's, occurring in the Piano Sonata, op. 2, first movement, 'tranquillo e lusingando,' in L'invitation à la Valse, where the coquetish second subject reappears pianissimo in C major, and in several other places. Chopin uses it in the Rondo in F (in 3–4 time).

M.

LUSTIGE WEBER VON WINDSOR, DIE. See MERRY WIVES OF WINDSOR.

LUTE (Fr. Luth ; Ital. Lusso or Lusso; Germ. Lute; Dutch Luth ; Spanish Lutá; Port. Altoide). A large and beautiful stringed instrument with a long neck and fretted fingerboard; at one time much in use, but now obsolete. In medieval Latin the lute is called Testudo and the guitar Cithara, both inaccurate identifications of ancient Greek instruments of very different construction. [See LYRE.] The lute is of Oriental origin, and its Arabic name is Al'ud—from which its European names are derived by the omission of the initial vowel of the definite article Al. 1 The Portuguese Altoide alone retains it. The lute became known throughout the West in the time of the Crusades. We class the Russian Kobos as a lute: while the Balalaika of the same country is of the guitar kind. As in the viol da gamba and violoncello, the formal difference between a lute and a guitar is to be found in the back, which in the lute is pear-shaped and in the guitar is flat. The lute is without ribs, which are essential to the framing of the guitar. [See GUITAR.]

The invention of stringed instruments with finger-boards, or the neck serving as a fingerboard, precedes the earliest historical monuments. The long-necked Egyptian Nefer was certainly depicted in the fourth dynasty; and wall-painting of the time of Moses, preserved in the British Museum, shows that it then had frets. We observe a similar instrument in Assyrian monuments, and the Hebrew Nebel has been supposed

1 In the same way K-nor, the cedar, became in English Larch.
to be one. Strangely enough the Greeks had it not. The Arabs derived the lute from Persia, and with the instrument a finesse in the division of the octave into smaller parts than our semitones, rendered possible by the use of frets, and still an Asiatic peculiarity; the best authorities assuring us that the modern Arabian ud and tambura are thus adjusted. It is usual to speak of these fractions as 3/5 of a tone. Kiesewetter, however (Musique des Arabes, Leipzig, 1842, pp. 32, 33), gives the Persian-Arab scale as a division of seventeen in the octave; twelve of the intervals being the Pythagorean limma (not quite our equal semitone), and five of the dimension of the comma, an interval, though small, quite recognisable by a trained ear. [See Comma, vol. i. p. 568.] Carl Engel (Musical Instruments, 1874, p. 60) states that the Arabs became acquainted with the Persian lute before their conquest of the country, and names an Arab musician who, sent to the Persian king to learn singing and performance on the lute, brought it to Mekka in the 6th century of our era. The strings of the Arab lute are of twisted silk, an Asiatic, especially Chinese, material for strings. The same, bound round the neck, has served for the frets. [See Frets, ante, p. 108.] The modern Egyptian lute, named oud or ould, of which there is a specimen at South Kensington, and an excellent woodcut in Lane's Modern Egyptians, chap. v., has seven pairs of gut strings, and is, moreover, played with a plectrum of eagle's or vulture's quill.

The Western lute was a Medieval and a Renaissance instrument. It flourished during the creative period of Gothic architecture and later, its star beginning to pale as the violin quartet arose, and setting altogether when the pianoforte came into general use. There were publications for the lute as late as 1740—six sonatas by Falkenhagen, Nuremberg; and, 1760, Gellert's Odes by Beyer. The latest use of the instrument in the orchestra seems to have been in Handel's 'Deidamia,' 1741. The great J. S. Bach himself wrote three sets of pieces for the lute, besides introducing the instrument in the St. John Passion. Carl F. Becker has described them in Die Hausmusik in Deutschland, Leipzig, 1840. He gives (p. 54) their titles—'Partita al Liuto, composta del Sign. J. S. Bach' (in C minor), 'Pièces pour le Lut, par J. S. Bach'; lastly, 'Fuga del Signore J. S. Bach' (in G minor), of which the subject—

![Lute Diagram]

is to be found in a violin sonata by the same composer. Those lute pieces were in MS. May we think with Becker that it was not improbable that Bach played the lute?

To proceed to the description of the instrument.

The pear-shaped or vaulted body of the lute is built up of staves of pine or cedar. The belly is of pine, and has one or more sound-bars for support and to assist the resonance. It is graduated in thickness towards the edges and is pierced with from one to three sound-holes in decorative knots or rose patterns. Great pains were evidently taken in choosing and making this very

---

1. Observe the elision of the consonant.
the finger-board these deeper strings were attached to pegs elevated by a second and higher neck. These extended instruments became afterwards known as theorboes, and in time virtually banished the older single-necked lutes. Mersenne's engraving of Lute and Theorbo (Tuorba, Теорбо) gives nine frets besides the nut, to the lute twenty-one strings, to the theorbo twenty-three strings (eight to the upper neck). [See CHITARRONE, THEORBO, and ARCHLUTE, the bass theorbo.] The fingers of the right hand, without a plectrum, touched the strings pizzicato in melody or chords. The tender charm and colouring of the lute-player's tone can, in these days of exaggerated sonorosity, be scarcely imagined. —The frets of the finger-board followed a division by half-tones, and in the old lutes were eight to each pair of strings. Later, as will be presently shown, they were carried farther in the higher strings. Mace (Musick's Monumeit, London, 1676, p. 59) said nine was the best number, but there was a limitation to this stopping nearer the bridge, by the proportions of the strings, thickness, and weight being unduly disturbed to the detriment of the tone. According to Baron (Untersuchung des Instrumenten der Laiiten, Nuremberg, 1727) and an older authority, Praetorius, the lute had originally four open notes (a); in course of time two G's were added (b). Melchior Neusiedler of Augsburg, who was living A.D. 1574, added the F, making thirteen strings in all, the highest, or Chanterelle, being a single string. This compass Baron calls Gamaut, and the deeper bass strings he calls Brummer or Bombarte, the finer ones Bombartlein. Brummer was usually applied, and the appellations in German, Italian, and English were as follows:—

\[\text{g'. Quintsaite.} \quad \text{canto.} \quad \text{treble.}\]
\[\text{d'. Kleinsangsaite.} \quad \text{sottanita.} \quad \text{small mean.}\]
\[\text{a. Grossangsaite.} \quad \text{mezzana.} \quad \text{great mean.}\]
\[\text{f. Kleinbrummer.} \quad \text{tenore.} \quad \text{counter tenor.}\]
\[\text{c. Mittelbrummer.} \quad \text{bordone.} \quad \text{tenor.}\]
\[\text{G. Grossbrummer.} \quad \text{basso.} \quad \text{bass.}\]

At page 122 of his work, Baron gives the compass of an 'eleven course' lute thus,

\[\text{\[\text{\text{\(a\)}}\]}\]

the two highest (the melody strings) being single, the remainder pairs. His division of the finger-board has ten frets for the F; eleven for the G; and twelve for each of the highest six. There is thus a compass of 3½ octaves from C below the bass stave to the f'. We gather further from him that this tuning would represent 'sammer,' or theatre pitch; for the 'chor,' or church pitch, the chanterelle would be tuned to the treble G, to the greater peril of the strings (Mahillon's Catalogue, 1880, p. 247). This would be the 'Discant Lute' of Praetorius; see below. Praetorius (Organographia, Wolfenbüttel, 1619, p. 49) has G for the chanterelle. There were, at last, thirteen pairs of strings in large lutes, descending at the tuner's pleasure to the deep A or G. Mace (p. 41) explains a large compass of strings as bringing the stopping 'to a natural form and aptitude for the hand.' There were other tunings besides the above D minor. Mace gives a new French tuning in E minor, and a 'flat' tuning which he preferred; referring to that we quote from Baron (b) as the old lute, theorbo, or viol-way: but he wisely remarks (p. 191) 'that tuning upon any instrument which allows the artist most scope, freedom, and variety, with most ease and familiarity, to express his conceptions most fully and completely, without limitation or restraint throughout all the keys, must needs be accounted the best.'

It must have been very troublesome to keep a lute in order. Mace, in his often-quoted work, recommends that a lute should be kept in a bed which is in constant use, and goes on to say that once in a year or two, if you have not very good luck, you will be constrained to have the belly taken off as it will have sunk from the stretch of the strings, 'which is a great strength.' Mattheson said a lutenist of eighty years old had certainly spent sixty in tuning his instrument, and that the cost in Paris of keeping a horse or a lute was about the same. Baron replied that the horse would soon be like one of Pharaoh's lean kine.

In Italian lutes of early date the tuning pegs were disposed diagonally across the head in two rows, the projections for tuning being at the back. They were afterwards inserted at the side of the head as in a violin, the head being bent back at an obtuse or even a right angle to the neck. Ultimately metal screws replaced the pegs, but only when large single strings were put on instead of double strings. The lute is now esteemed solely for the great beauty of its form and design. Inlays of various hard woods, tortoiseshell, ivory, and mother-of-pearl, and sometimes painting on the sound-board, have been employed to decorate them. Through their decorative value many lutes have been preserved; and many were transformed into Vielles or Hurdy-gurdies. Lutes and viols having been made by the same artists, the word luthier in French still designates a maker of violins.

The lute player had not our musical notation; systems special to the instrument, and known as TABLATURE, being long in vogue. [See also Musical Times, 1899, p. 530 ff.] The lute and organ are the two instruments for which
the oldest instrumental compositions we possess, were written (Mahillon's Catalogue, 1880, p. 246). Many instruction-books were written for the lute, with examples in tablature; the oldest known to exist in this country is the Lautenbuch of Wolf Heckel (Strasburg, 1562), preserved in the Library of the Royal College of Music.

The next in order of date are The Science of Luting, licensed to John Alden in 1565; A Brief and easy instruction to learn the tablature, to conduct and dispose the hand into the Lute [by Adrien Le Roy]. Englished by J. Alford, Londoner, 1668; an English translation by F. K. (London, 1574), of the famous Tutor of Adrien Le Roy, which had appeared in Paris in 1551; Thomas Dalli's MS. Lute-Book, 1583, in the library of Trinity College, Dublin; and William Ballet's MS. Lute-Books (1594) in the same library. There is another in the British Museum by Thomas Robinom, written in the form of a dialogue (London, 1603). We must not omit the treatise by Thomas Mace (London, 1676), to which we have so frequently referred. Praetorius, in his Organa organographia, was careful to describe the then (1619) familiar lute. He gives (p. 51) a graduated family of lutes with their quints or chanterelles, which show how much variety in size and scale was permitted. They are—(1) Klein Octav (o); (2) Klein Discant (b); (3) Discant (c); (4) Recht Chorister odet Ait (d); (5) Tenor (e); (6) Bass (f); (7) Gross Octav Bass (g).

Thus it will be seen that the lute generally known and described here, the 'French' lute of Mace, is the Alto lute. Vincenzo Galilei, the father of the astronomer, was the author of a dialogue on the lute (Venice, 1538). Other noteworthy continental publications were by Judenkind, Vienna, 1523; Gerle, Nuremberg, 1545; Hans Neusiedler, Nuremberg, 1558; Melchior Neusiedler, 1574; Ochsenkhuns, Heidelberg, 1558; Kargel, Strasburg, 1588; Besardus, Cologne, 1603; Campion, Paris, 1710; and Baron, Nuremberg (already quoted from), 1727.

Much valuable information collected about lute makers and the literature of the lute is communicated by Carl Engel in his admirable catalogue of the Victoria and Albert Museum referred to. The finest lutes were made in Italy; and Bologna, Venice, Padua, and Rome were especially famous for them. There would appear to have been a fusion of German and Italian skill in northern Italy when the Bolognese lutes were reputed to excel over all others. Evelyn in his Diary (May 21, 1645) remarks their high price, and that they were chiefly made by Germans. One of the earliest of these was Lucas (or Laux, as he inscribed his name on his instruments) Maler, who was living in Bologna about 1500-20. There is one of his make at South Kensington, represented in the drawing, a remarkable specimen, notwithstanding that the head is modernised, to correspond with that of the modern guitar, the strings are single, and the belly later adorned with painting. According to Thomas Mace, 'pittifull old, batter'd, crack'd things' of Laux Maler would fetch a hundred pounds each, which, considering the altered value of money, rivals the prices paid nowadays for fine Cremona violins. He (p. 48) quotes the King (Charles I.) as having bought one for £100 through the famous lutenist Gaultier; but the correspondence of Huygens (Musique et Musiciens, etc., ed. Jonckbloet and Land, 1882) relates that the lute belonged to Jehan Ballard, who would not part with it. After his death Charles I. bought it of the relations for £100, and gave it to Gaultier. [Among the last occurrences of the lute in the orchestra are in Bach's 'Passion according to St. John,' in the bass air, 'Betrachte, meine Seele'; and in Handel's 'Deidamia,' 1741. A collection of lute compositions by Spanish masters of the 16th century was edited by G. Morphy, and published by Breitkopf & Hartel in 1902. On the history of the lute in France see Rivista Musicale, v. 657, vi. 1.]

LUTENIST, a lute player. In the 16th and 17th centuries lutenists, or, as they were sometimes called, 'leuters' or 'luters,' invariably formed part of the musical retinue of kings and princes, and one at least was commonly attached to the households of nobles and landed gentry. On August 8, 1715, a lutenist's place was created in the Chapel Royal of St. James's, and John Shore was appointed to it, who held it until his death in 1752, when it was given to John Immyns, who filled it until his death in 1784. The office afterwards became a sinecure, and was eventually annexed to the Mastership of the Children as a means of increasing the stipend. It continued until the death of William Hawes in 1846, when it was abolished.

W. H.

LUTHER, Martin, born at Eislenben, on St. Martin's Eve, Nov. 10, 1483. For the main facts of the life of the great Reformer, the reader must consult some other work, as our space compels us to confine ourselves to his relation to music, and especially to the hymns and services of the Church. It was after his departure from the Wartburg, March 22, 1522, that he began to occupy himself with projects for the reform of the services of the Church, among which his alterations in the musical parts of the Mass led to such great results. There is ample evidence that German hymns were sung during the service before Luther's alterations; but if not the actual founder, there is no doubt that he was the establisher of congregational singing. The musical part of the Mass had grown to an inordinate length;
accordingly, in his first ‘Formula Missae’ (1523), Luther objects to the singing of long graduals, and recommends that the choice of certain hymns should be left to the priest. The Reformer had long cherished the idea of a German Mass, and during the latter part of the year 1524 he was occupied with arranging that service. In order to help him in the musical part of his work, he summoned to Wittenberg two able musicians, Conrad Rüpf, Capellmeister to the Elector of Saxony, and Johann Walther, Cantor at the Court of Frederick the Wise at Torgau. To the latter we are indebted for much information about Luther as a musician. He says that at this time he stayed with Luther at Wittenberg for three weeks, and that the Reformer himself set to music several Gospels and Epistles and the words of consecration, inventing the tunes on his flute, while Walther noted them down. Luther used also to discuss the eight Church Tunes; giving the Epistle to the 8th Tone, and the Gospel to the 6th.

For,' said he, 'Christ is a gentle Lord, and His words are lovely; therefore let us take the 6th Tone for the Gospel; and since St. Paul is a grave apostle, we will set the Epistle to the 8th Tone.' The result of these labours was the publication of the ‘Order of the German Mass,’ which contained the following alterations. Instead of the introit there was ordered to be sung a hymn or German psalm (‘Ich will den Herrn loben, or ‘Meine Seele soll sich rühmen’). Then followed the Kyrie Eleison, sung three times (instead of nine). After the Collect and Epistle a German hymn (‘Nun bitten wir den heil’gen Geist,’ or another) was sung, and after the Gospel, instead of the Latin Creed, the German (‘Wir glauben all’). The sermon then followed, and after this a paraphrase of the Lord’s Prayer, and the Exhortation to Communicants. After the Consecration, was sung ‘Jessia dem Propheten,’ Hues’s hymn ‘Jesus Christus, unser Heiland,’ or ‘Christe, du Lamm Gottes.’ This form of service was first used on Christmas Day, 1524, in the parish church of Wittenberg, but it was not published until the following year. It is evident that while introducing a more popular element into the music of the Mass, Luther did not despise the singing of a trained choir. In the ‘Vermahnung zum Gebet wider den Tirken’ (1541) he says: ‘I rejoice to let the 78th Psalm, ‘O God, the heathen are come,’ be sung as usual, one choir after another. Accordingly, let one sweet-voiced boy step before the desk in his choir and sing alone the antiphon or sentence “Domine, nescundum,” and after him let another boy sing the other sentence, “Domine, nemo nomineris”; and then let the whole choir sing on their knees, “Aduva nos, Deus,” just as it was in the Popish Fasts, for it sounds and looks very devotional.’ At the same time that he was engaged in arranging the German Mass, Luther was turning his attention to writing and adapting hymns to be sung during the service. In 1524 he wrote to his friend, George Spalatin, ‘I wish, after the example of the Prophets and ancient Fathers of the Church, to make German psalms for the people, that is to say, sacred hymns, so that the word of God may dwell among the people by means of song also.’ In the same year (1524) the first Protestant hymn-book appeared: ‘Etlich christliche Lyeder Lobgesang und Psalm dem reinen Wort Gottes gemess aus der h. geschriift durch mancherlay Hochgerelter gemacht, in der Kirchen zu singen, wie es den zum tail bereyt zu Wittenburg in ycbung ist. Wittenburg, 1524.’ It is not certain whether Luther actually arranged this book; it contains only eight hymns (four of which are by him), and five tunes. During the same year several other collections appeared, and their number increased so rapidly that space forbids the insertion of a list of even those that were published during Luther’s lifetime. Scattered through these different collections there is great difficulty in deciding what hymns are really Luther’s, and what are merely adaptations; the lists given at the end of this article have been compiled chiefly from Koch’s ‘Geschichte des Kirchenlieds,’ etc. (Stuttgart, 1866-1877). The immediate popularity which these early Protestant hymns attained was immense; they were taught in the schools, and carried through the country by wandering scholars, until his enemies declared that Luther had destroyed more souls by his hymns than by his writings and speeches. On June 11, 1525, Luther was married to Catherine von Bora, formerly a nun at Nimpfich in Saxony. This marriage proved a most happy connection, and the letters of his friends abound with descriptions of the domestic felicity to which it gave rise. We are told that after supper he used to sing motets and hymns with his children and friends, his favourite composers being Senfl and Josquin des Prés, the works of the latter of whom he particularly admired. Luther possessed a fine deep voice, and played both the flute and lute, the latter so well as to attract the attention of passers-by as he journeyed to Worms. It has been said that he wrote motets himself, but there is no proof of this, and it is probably a mistake arising from the existence, in the Munich Library, of a collection of motets with a preface by the Reformer. In 1538 Luther wrote a short treatise in praise of music; a poem by him on the same subject (entitled ‘Frau Musik’) also exists, and may be found in the ‘Leipziger Allgemeine Musikalische Zeitung’ for 1811. The latter years of Luther’s life were principally spent at Wittenberg, but he died at Eisleben, on Feb. 18, 1546. He was buried in the Schloss-Kirche at Wittenberg; his greatest hymn, ‘Ein’ feste Burg,’ being sung over his grave.

The following is a list of Hymns, the words of which were written or arranged by Luther,
LUTHER LUTHERAN

Together with their dates, so far as it has been possible to ascertain them:

I. Translations and Arrangements of Latin Hymns.
1. "Jesus Christus unser Heiland," 1524. From a Christmas Hymn by Coulibi Salutius (6th cent.).
2. "Verlebt sei Fried und ruhiglich," 1524. From a Christmas Hymn by Coulibi Salutius (6th cent.).
5. "Hier am Schlos' leben wir," 1524. From the "Te Deum.

II. Amplifications of Early German Translations of Latin Hymns.

III. creations or Arrangements of early German Hymns.

The following are the hymn-tunes which were probably composed by Luther:
1. "Josua dem Propheten das geoffnet."
2. "Komm, Gott, Schopfer." in the "Veni Creator.

The above tunes, Nos. 1 and 2 are almost without doubt by Luther; Nos. 3 to 8 are very probably by him; and Nos. 9 to 13 are ascribed to him with less certainty. The following works contain much information as to Luther as a musician, and have been carefully consulted in the compilation of this article:

Forkel's Musikalischer Almanach for 1794.
The Leipzig Allgemeine musik. zeitung for 1841 and 1849.
Luther's Werke, by The Annaberg. Ramburg, 1843.
Luther's geistliche Lieder nach den Berichten aus dem Kirchenthode.
Kurz's Schriften, 1790.
W. B. S.

LUTHER'S HYMN, a popular name among a former generation for a hymn beginning 'Great God, what do I see and hear!' set to an old German tune 'Es ist gewisslich an der Zeit,' and formerly much in vogue at musical festivals and sacred concerts. It was written by Cetlen and Brahaim, and Harper used to accompany it with very effective fanfares on the trumpet between the lines. The author of neither words (German nor English) nor tune is exactly known. There is a tradition that Luther made the words to the tune as he heard it sung by a traveller. It was first printed in a collection published by Joseph Kopl in 1535, and had already served as second melody to the older hymn 'Nun recht euch, lieben Christen gmein.' It will be found in the following collections as 'Luther's Hymn.'

LUTHERAN (German) CHAPEL of St. JAMES'S PALACE. The building long used as the German Chapel is said to have been erected about 1626 by Inigo Jones, for Queen Henrietta Maria, who had been permitted the free use in England of her religion. In 1662 it was assigned for the like purpose to Queen Catherine of Braganza, the first mass being celebrated on Sept. 21 in that year. The choir was composed of Italians, and the soprani were enuchus. At the Revolution the friars were expelled, and the chapel was in Dec. 1688 appropriated to the use of French Protestant. Shortly afterwards a service in Dutch was also established in it for the benefit of the followers of William III. About 1703, Queen Anne and Prince George of Denmark established a German Lutheran service in a small chapel in the Middle Court of St. James's Palace, which was

1 Dürer, Chronik, 1800, p. 31. 407.
in 1781 transferred to the present chapel, the French and Dutch services being removed at the same time to the chapel vacated by the Germans, where they were performed until their discontinuance in 1839. Upon the removal, a new organ was erected in the chapel. The present organ, by Snetzler, was built for Buckingham House, and removed here prior to the demolition of that edifice in 1825. The organists since 1784 have been Augustus Friedrich Karl Kollmann, died Easter Day, 1829; George Augustus Kollmann, died March 19, 1845; Miss Joanna Sophia Kollmann, died in May 1849; and Frederic Weber, the last organist, died 1905. [During recent years the services have been held in Danish instead of German.]

W. H. H.

LUTZ, WILHELM MEYER, was born in 1822 at Münnerstadt, Kissingen, where his father was organist and teacher of harmony to the Schoolmaster’s Institute. He showed a gift for the piano at a very early age, and when twelve played in public with the orchestra. His father removing to Würzburg, he entered the Gymnasion and University there, and at the same time studied music under Eisenhofer and Keller. From 1848 Lutz was settled in England, first as organist to St. Chad’s, Birmingham, and St. Ann’s, Leeds, and then organist and choir-master to St. George’s Catholic Cathedral, London, for which he composed several grand masses and much other music. Meyer Lutz also had a long and wide experience of the stage as chef d’orchestre, first at the Surrey Theatre (1851-59), and from 1869 at the Gaiety Theatre; and also had the management of the operatic tours of Grisi and Mario, Pyne and Harrison, and other eminent artists. Many of his operas and operettas are well and favourably known in England, amongst them ‘Faust and Marguerite’ (Surrey Theatre, 1855), ‘Blonde and Brunette’ (1862), ‘Zaida’ (1863), ‘Miller of Milburg’ (1872), ‘Legend of the Lys’ (1873), a cantata entitled ‘Herne the Hunter,’ etc. etc. More generally popular than these are the many compositions for the Gaiety Theatre in its most fashionable days. The well-known tune of the ‘Pas de Quatre’ was by him. A string quartet, which he wrote for M. Sainton’s chamber concerts, was very well spoken of, and he left much music, orchestral and chamber, in MS. He died in London, Jan. 31, 1903.

C. LUYTON, or LUYTHON, CARI, was born at Antwerp, about the middle of the 16th century. The earliest known date in his life is 1576, in which year he dedicated a mass to the Emperor Maximilian II., and in the same year was appointed Kammer-musikus or organist to the Emperor. On Maximilian’s death at the end of 1576, Luython was reappointed organist at Prague to the new Emperor Rudolf II., and also for a time held other offices about the court. On Rudolf’s death in 1612, Luython seems to have remained in Prague up to his own death in 1620, although even then the arrears of pay due to him for his service under Rudolf had never been made up (see Quellen-Lexikon for details). Luython is important both as a vocal and instrumental composer. His chief vocal works are: one book of Italian madrigals a 5, 1582, 21 n.; Sacrae Cantiones a 6, Prag, 1603, 29 n.; Lamentationes a 6, Prag, 1604; Lib. I. Missarum, Prag, 1609, 9 masses a 3-7. Of these F. Commer republished the Lamentations in vol. 20 of his Musica Sacra, and 3 masses a 3-4, in vols. 18 and 19. See Eitner for a characterisation of these masses. Ritter describes two of Luython’s motets appearing in the Promptuarium of Schadaeus as masterly in treatment and full in harmony. Generally speaking, Luython is remarkable as a pioneer in the use of chromatic modulation without any sacrifice of harmonic euphony or pleasing melody. Of his instrumental works only two are preserved, one entitled a Fuga suavissima, which appeared in Woltz’s Tabulatur-Buch of 1617, and fully deserves its name. It is reproduced in Ritter’s Geschichte des Orgelspiels, Ex. 29, and is remarkable for its union of attractive melody with a freedom of modulation into different keys after the modern fashion. The other work is an organ Ricercare in a MS. of 1624, concerning which and the Fuga suavissima see Ritter, pp. 51, 52. In connection with these experiments in chromatic modulation, it is interesting to be told by Michael Praetorius that he had seen, in the possession of Luython at Prague, a Clavicymbel of Vienna manufacture, in which different keys were provided for two distinct semitones between each whole tone, so as to have pure major thirds, and to allow the transpositions of the church modes on any key; also two keys were inserted between the semitones e-f and b-c, for enharmonic modulation; there were thus, as Praetorius says, seventy-seven keys in the four octaves from C to e″ (Syntagma, tom. ii. c. xI.).

J. R. M.

LUVASCHI, LUZZASCHI, of Ferrara, was a pupil of Cipriano de Rore at Ferrara, before Cipriano left that city in 1558, and was afterwards first organist at the court chapel of the Duke of Ferrara, Alfonso II. He is also designated as maestro di cappella. The date of his death is given as 1607. Van der Straeten, in his Musique aux Pays-Bas, tome vi. p. 134, communicates the text of a document, relating to a composition of Rore, subscribed by Luzzaschi in 1606, Pressobaldi was his most illustrious pupil. His compositions consist of seven books of madrigals a 5, published from 1575 to 1604, but not all perfectly preserved (two books altogether missing); another book of madrigals

1 The dates 1625 and 1630 are given by various authorities, but the above is probably correct.
for one, two, and three sopranis, 1601; and a Liber I. Sacrarum Cantionum a 5, 1598, containing fourteen motets. A few other madrigals appeared in collections. In Diruta’s In Transitum there is an organ Toccata in the fourth tone, reprinted in Ritter, Geschichte des Orgelspiels, also two Ricercari in the first and second tones.

J. R. M.

LVOV (LWOFF), FEODORE PETROVICH, succeeded Bortniansky as Director of the Imperial Court Chapel in 1825. He was an authority upon church-music and folk-songs.

ALEXIS FEODOROVICH, son of the above, was born at Reval, June 6 (May 25, O.S.), 1799 (1798 ?). Before entering the army he received some musical education at home. He rose rapidly in the military service, and was appointed Adjutant to the Emperor Nicholas I. In 1836 Alexis Lvov succeeded his father as Director of the Imperial Court Chapel. An excellent violinist, he was well known in Russia and Germany as a good quartet player. The permanent string quartet which he organised in St. Petersburg was celebrated for its perfection of ensemble. Lvov composed a violin concerto, a fantasia (‘Le Duel’—for violin and violoncello), and twenty-four caprices. His operas ‘Bianca e Gualtiero’ (Dresden and St. Petersburg, 1845), ‘Undine’ (1846), and ‘Starosta Boris’ (1854) had very little success. He also wrote a considerable quantity of church music, but the work by which his memory lives is the Russian National Hymn, ‘God save the Tsar’ (words by Joukovsky) composed in 1833. Previously to this the English or Prussian national anthems had been used on State occasions. The tune is devoid of those national characteristics which endear the ‘Slavisa’ from Glinka’s opera ‘A Life for the Tsar’ to the hearts of musical Russians. Lvov, who suffered from deafness, retired from active service in 1867, and died on his estate near Kovno, Dec. 16, 1870.

LYCEUM THEATRE. The original theatre bearing this name occupied the site of a building erected in 1765 (on ground formerly belonging to Exeter House) for the exhibitions of the ‘Society of Artists’ (subsequently ‘Royal Academy of Arts’), but afterwards used for a great variety of entertainments. It was constructed about 1798 under the direction of Dr. Arnold, who contemplated performing in it operas and other musical pieces, but being unable to obtain a license was compelled to abandon his intention, and the house was occupied, occasionally only, for pictorial exhibitions, table entertainments, etc., until 1809, when Samuel James Arnold, the Doctor’s son, succeeded in getting a license for English operatic performances during four months in each year, June 3 to Oct. 3. Drury Lane Theatre having been burnt down, Feb. 24, 1809, the company performed at the Lyceum from April 11 following during the rebuilding of their own house. Arnold opened the theatre June 26, under the title of ‘The English Opera House,’ for the performance of operas, melodramas, and musical farces. In 1815, having obtained a ninety-nine years’ lease of the ground, he employed Samuel Beazley to rebuild the theatre on the same site, behind the houses on the north side of the Strand, a narrow avenue from which formed the approach to the box entrance, the pit and gallery doors being in Exeter Court to the westward. On April 2, 1818, the elder Charles Mathews gave here his ‘Mail Coach Adventures,’ the first of that remarkable series of entertainments known as his ‘At Home.’ The most noticeable operatic event in the history of the house was the production on the English stage of Weber’s ‘Der Freischütz,’ July 23, 1824. The house being burnt down, Feb. 16, 1830, another theatre (also designed by Beazley) was erected. It did not occupy the exact site of its predecessor, advantage having been taken of the opportunity to form the continuation of Wellington Street on the north side of the Strand, by building the stage of the new house at the west instead of the east end. During the rebuilding the company performed at the Adelphi and Olympic Theatres. The new house opened July 14, 1834, the first new opera performed in it being Loder’s ‘Nourjahad,’ and Barnett’s ‘Mountain Sylph,’ produced later in the year, achieving a great success. Early in 1839 ‘Promenade Concerts à la Musard’ (the first of the kind given in England) took place here under the conductorship of Signor Negri. In 1841 the management passed into the hands of Balfe, who produced his opera ‘Koelanthe,’ but his career was brief. The house then ceased to be an English opera-house and became, under its old name of ‘Lyceum,’ a theatre for the performance of the general drama, Keeley, Madame Vestris, Madame Celeste, Falconer, and others by turns holding the reins of management. For three seasons, 1837, 1838, and 1841 Italian opera buffa was given here in the winter, and the house has frequently been occupied by French comedians. During the rebuilding of Covent Garden Theatre after the fire in 1856 the performances of the Royal Italian Opera were given at the Lyceum, and in the same year the Pyne and Harrison English Opera Company performed there. It was occupied for the performance of operas in English by the Carl Rosa Company in 1876 and 1877, and as a special enterprise, Verdi’s ‘Otello’ was given there in July 1889. The history of the long and successful management of the late Sir Henry Irving does not belong to a musical dictionary; in 1904 the building, very much modified in design, was turned into a music hall.

W. H. H.

LYDIAN MODE. (Lat. Modus Lydicius, Modus V, Tonus V.) The Fifth of the Ecclesi-
astical Modes; called, by medieval writers, 
*Modus lactus* (The Joyful Mode), from its generally jubilant character.

The Final of the Lydian Mode is F; and its compass, in the Authentic form, lies between that note, and the octave above. Its semitones fall between the fourth and fifth, and seventh and eighth degrees. Its Dominant is C; its Mediant, A; and its Participant G. Its Conceded Modulations are, B, D, and E; and its Absolute Initials are, F, A, and C.

---

In the Plagal, or Hypolydian form (Mode VI.), its compass lies between the C below the Final, and the C above it: and its semitones fall between the third and fourth, and seventh and eighth degrees. The Final of the Hypolydian Mode is F; its Dominant is A; its Mediant is D; its Participant, the lower C. Its Conceded Modulations are B (the 7th), B (the inverted 7th), and G; the two B's being frequently made flat, to avoid the Tritonus. [See Modes.] Its Absolute Initials are C, D, and F.

---

The Lydian Mode by use of the accidental B₃ is capable of becoming identical with the Ionian Mode. It was so used in early days before the Ionian Mode was recognised, but only sparingly. It was never a popular Mode for Plain-song because of its leading note; and such melodies as exist in it were constantly transposed a fifth higher where, by use of the accidental B₃, the leading note could be evaded. (See Ionian Mode.)

The Fifth Mass in Palestrina's Tenth Book—
*Missa Quinti Toni*—is written, as its name implies, in the Lydian Mode. A beautiful example of the use of the Hypolydian, and one which fully justifies the epithet anciently applied to it—*Modus devotus* (The Devout Mode)—is to be found in the first movement of the Plain-song *Missa pro Defunctis*, printed, at length, in the article, Kyrie, ante, p. 612.

The Lydian Mode of the Middle Ages has nothing but its name in common with the older Greek scale, which is said, on the authority of Apuleius, and other ancient authors, to have been characterised by a tone of soft complaint—peculiarly which modern poets have not forgotten, in their allusions to it. W. S. N.

**LYRA.** A form of Chimes. See Glockenspiel.

**LYRA VIOL** (sometimes 'Lyre Viol' or 'Viol Lyra way'), a term used in the 17th century to indicate a method of playing the ordinary viol da gamba from a letter tablature instead of from note. This was in use in 1650 to the end of the 17th century, and it was considered a simpler and easier way of reading for the instrument than from the ordinary notation.

John Playford, who printed several editions of a work on the subject, speaks of it as 'but a late invention in imitation of the old English lute or bandora'; and that the first author he 'had met with in setting lessons this way to the Viol, was Mr. Daniel Ferrant, Mr. Alphonse Ferabosco, and Mr. John Coparrio, who composed lessons not only to play alone, but for two or three viols in consort' (Music's Recreation). Playford also, in his Introduction to the Skill of Music, mentions that the viol used to play 'Lyra-way' is 'somewhat less in size, with strings proportionable, than the other two sizes of viols.' The principle of the lyra viol is the simple adaptation of the lute tablature to the fretted six-stringed viol, the music being written on a six-line stave, each line corresponding to a string on the instrument. Burney (Hist. iii. 409) says that 'the lyra viol was a viol da gamba with more strings, but differently tuned from the common six string base. Its notation, like that of the lute, was written in entablature.' It is possible that in odd cases the viol played lyra-way had more than six strings, but contemporary writers always treat it as being a six-stringed instrument. The stopping is indicated by letters placed either on, or above the lines, thus:—a, open string; b, first fret; c, d, e, f, g, a, succeeding half note stoppages. The viol finger-board only having seven frets, other letters, i, k, l, m, etc. are to be stopped, 'according to the judicious ear of the performer,' above the last fret. The time duration in viol tablature is shown by the crotchets, quavers, etc. being placed above the stave. The reading of the tablature is of course simplicity itself, provided that the tuning is known; but as this tuning seems to have been somewhat elastic, each viol player apparently having one of his own, the translation of viol tablature from manuscript is sometimes puzzling; in a printed source, however, the tuning is generally given which renders the task easier. For ease of fingering in certain pieces, tunings named 'harp-way sharp,' and 'harp-way flat,' besides some others were in use (see TABLATURE and Viol). The principal English work on the lyra viol was, as above indicated, by John Playford who, in a Musical Banquet, 1651 (Bodleian Library) published some 'new lessons for the Lyra Viol,' afterwards developing this into Music's Recreation on the Lyra Viol, in which some editions is named Music's Recreation on the Viol Lyra-way. The work consists of 'lessons' and instructions besides a number of popular melodies all in viol tablature. Copies are dated 1651 (in Musical Banquet), 1652-53, 1661, 1669, and
proved by use in the Greeks, and undoubtedly derived by them from Asia. It consisted of a hollow body or sound-chest, from which were raised two arms, sometimes also hollow, which were curved both outward and forward. These arms were connected near the top by a crossbar or yoke. Another crossbar was on the sound-chest, and formed a bridge to convey the vibrations of the strings to it. The strings—at different times four, seven, or ten in number—were made of gut, and were stretched between the yoke and the bridge, or carried on to a tail-piece below the bridge. The lyre differs from the harp in having fewer strings, and from the lute or guitar in having no finger-board. It was played by being struck with the plectrum, which was held in the right hand, but the fingers of the left hand were also used to touch the strings. The larger lyres (Cithara) were supported by a ribbon slung across the player’s shoulders, or held as shown in the illustration, but the treble lyre (or Celyx) was held by the left arm or between the knees. The illustration is taken from a drawing upon an amphora (b.c. 440-330) in the British Museum, first vase-room, Case 53, No. 744. The portion engraved represents Apollo holding a Cithara or large lyre as rarely shown in detail in Greek art. With his left hand he at once supports the instrument and stops the strings. The plectrum would be held in the right hand and be guided by the thumb, the fingers closing over it.

The modern Greek ‘lyra’ is a kind of rebec, a bowed instrument with three strings, having no connection with the ancient lyre or cithara, the link between the latter and modern stringed instruments being supplied by the Psaltery, in use in the Byzantine epoch, from which was developed the clavecin, and ultimately the pianoforte. But in the 14th century there were several bowed instruments known in Europe as lyres, and also the Hurdy Gurdy, the lyra mandicorum. In Italy, in the 15th century, there was a bowed lyra bearing a similar relation to the viol that the well-known theorbo did to the lute—namely, that from a second and higher neck, bass strings were hung that were not in contact with the finger-board. Three varieties have been distinguished—Lira da braccio, Lira da gamba, and Archiviole di lira. It would be for one of these, a favourite instrument with Ferdinand IV., King of Naples, that Haydn wrote twelve pieces. [See ante, p. 367.] The museums at home or abroad, known to the writer, have no specimens of this bijuga viol; the cut is taken from the Archiviole di lira in the Rceuil de Planches de l’Encyclopédie, tome iii. (Paris, 1784).

LYRIC; LYRICAL. The term Lyric is obviously derived from the lyre, which served as an accompaniment or support to the voice in singing the smaller forms of poetry among the ancient Greeks. The poems thus accompanied were distinguished by the name of Odes, and all Odes were in those times essentially made to be sung. Among the Romans this style of poetry was not much cultivated, and the poems which fall under the same category, such as those of Horace and Catullus, were not expressly intended to be sung: but inasmuch as they were cast after the same manner as the Greek poems
LYRIC

which had been made to be sung, they also were called Odes or Lyrics. On the same principle, the name has been retained for a special class of poems in modern times which have some intrinsic relationship in form to the Odes of the ancients; though, on the one hand, the term Ode has considerably changed its signification, and become more restricted in its application; and, on the other, the term Lyric is not generally associated either in the minds of the poets or their public with music of any sort. It is true that a great proportion are not only admirably fitted to be sung, but actually are set to most exquisite music; but this fact has little or no influence upon the classification. Thus the able and intelligent editor of the beautiful collection of modern lyrics called the Golden Treasury explains in his preface that he has held the term ‘Lyric’ to imply that each poem shall turn upon a single thought, feeling, or situation, and though he afterwards uses the term ‘Song’ as practically synonymous, he does not seem to imply that it should necessarily be sung. In another part of his preface he suggests an opinion which is no doubt very commonly held, that the lyrical and dramatic are distinct branches of poetry; and Mendelssohn has used the word in this sense even in relation to music, in a letter, where he speaks of his Lobgesang as follows: ‘The composition is not a little Oratorio, its plan being not dramatic but lyrical.’ But it is in respect of this sense of the term that its use in modern times is so singularly contradictory. It is true that the class of poems which modern critics have agreed to distinguish as Lyrics are quite different in spirit from the dramatic kind—Robert Browning’s ‘Dramatic Lyric’ notwithstanding—but the principle of classification has really been erroneous all along, as though a man were called a sailor because he chose to wear a sailor’s hat. Consequently the apparent anomaly of calling dramatic works lyrical when they are associated with music is not the fault of musicians, but of the long-continued habit of mankind of classifying things according to outward resemblance, instead of regarding the true basis of the terms of classification. The term Lyric, then, originally implied music, and the Lyre stood as the type of accompaniment, of whatever kind; and it is strictly in conformity with this derivation to give the name ‘Lyric’ to dramatic works which are associated with music; and we have a forcible and substantial reminder of this use of the term in the name of the celebrated ‘Théâtre Lyrique’ in Paris.

It has been necessary to enter into some detail on this subject in order to explain the confusion which exists in the use of the word. It must be confessed that nothing can now be gained by trying to go back to its original meaning; for the modern sense, as expressed by the editor of the Golden Treasury, has a prescriptive title of such great antiquity as would suffice to bar the most unquestionable prior claim. It would be well to bear in mind, however, that the term can have two significations, and that in relation to poetry pure and simple it does not necessarily imply music, in our language at least; and that in relation to the stage it should imply nothing else.

LYSBERG, CHARLES SAMUEL, originally named Bovy, and better known under the pseudonym ‘Bovy-Lysberg,’ born March 1, 1821, at Lysberg (Canton Bern), died Feb. 25, 1873, at Geneva, was an admirable pianist and composer of morceaux de salon. He was the son of Antoine Bovy, a well-known stamp-engraver, who after giving his son a good musical education sent him, at the age of fifteen, to Paris, where he became a pupil of Chopin and studied composition under Berlioz. Subsequently he returned to his native country, and was appointed a professor of the Conservatoire at Geneva. He was chiefly successful as a writer of brilliant pieces for the pianoforte, and it was in this capacity that he borrowed the name of his birthplace as a nom de plume. He published over 130 compositions in various styles, including barcaroles, nocturnes, caprices, waltzes, concert études, and operatic paraphrases; also a romantic sonata entitled ‘L’absence,’ and an opera, ‘La fille du Carillonner,’ which was produced with tolerable success at Geneva, but never attained the dignity of a stage performance elsewhere.

END OF VOL. II
ADDENDA ET CORRIGENDA FOR VOL. I

LIST OF CONTRIBUTORS. Add the name of T. L. Southgate, Esq.; and the names of Dr. Franz Gehring, William Henderson, Esq., Rev. Charles Mackeson, and Russell (properly 'Russell') Martineau, Esq., should have been in italics, to indicate that they were deceased at the time of publication.

P. 54, art. AGRICOLA, line 3, for 'Crespel's' read 'Cretin's.'

P. 62, art. ALBERT, line 6 from end, for 'is not yet performed,' read 'performed at Berlin, Feb. 17, 1900.'

P. 64, art. ALBONI, add date of death, June 23, 1894.

P. 67, art. ALKAN, add that a complete edition of his works is being issued in Paris.

P. 101, art. ARBOS, column 1, line 11, for 'compositions' read 'composition.'

P. 102, art. ARCHER, add that he died at Pittsburgh, U.S.A. in 1901.

P. 108, art. ARNE, column 1, line 17, for 'Tenducci' read 'Tenducci.'

P. 115, column 2, the last note of the second musical example, left hand, should be G, not A.

P. 121, art. ARTUSI, line 9, for 'Frost' read 'Trost.'

P. 126, art. ATKINS, line 5, for 'C. Lee Williams,' read 'G. R. Sinclair.'

P. 147, art. BACH (Joh. Gottfried Bernhard), delete the words in line 2, 'the youngest of Sebastian's sons.'

P. 151, art. BACH, column 2, line 15 from bottom, for 'April' read 'May.' Carlyle's date has been proved to be incorrect in Spitta's life.

P. 166, art. BAILDON, correct date of death, as the MS. registers of St. Paul's Cathedral show that he was buried May 2, 1774 (communicated by Dr. W. H. Cummings).

P. 177, art. BALTZAR, line 6 from bottom, for '1693' read '1663.'

P. 183, art. BAR, many instances of the use of bars earlier than those mentioned have been quoted.

P. 187, art. BARGIEL, add date of death, at Berlin, Feb. 23, 1897.

P. 203, art. BATES, line 4, for 'Harley' read 'Hartley'; line 6, for 'Robert' read 'John.' P. 204, same article, last line but one, for 'Coates' read 'Cotes.'

P. 208, art. BATTLE SYMPHONY, add that the first performance took place in Vienna, Dec. 8, 1831.

P. 312, art. BERLIOZ, column 2, line 18 from bottom, for 'sixty-third' read 'sixty-sixth.'

P. 318, art. BERNSDORF, add date of death, June 27, 1901.

P. 323, art. BEXFIELD, line 5 from end, for 'Oct. 28' read 'Oct. 29.'

P. 336, art. BLAKE, line 2, for '1808' read '1708.'

P. 366, art. BOSIO, delete last four lines of column 1, as the quotation refers to Mme. Nantier-Didice, not to Mme. Bosio.

P. 395, art. BREMA, line 4 from end, for 'trilogy' read 'trilogy.'

P. 399, art. BREWER, column 2, line 23, for 'Dr. C. H. Lloyd' read 'Mr. C. Lee Williams.' At end of article add that his oratorio, 'The Holy Innocents,' was performed at the Gloucester Festival of 1904, and that he received the degree of Mus.D. from the Archbishop of Canterbury in 1906.

P. 416, art. BULL, line 11, for '1852' read '1582.'

P. 429, art. BYRD, column 1, line 3 from bottom, for '1687' read '1587.'

P. 448, art. CAMBERT, line 17, for 'thirty-two' read 'twelve.'

P. 449, art. CAMIDGE, line 8 from bottom, delete the sentence beginning 'The present organ of the cathedral.

P. 477, art. CASENTINI, line 6, for '1893' read '1793.'

P. 505, art. CHARPENTIER (Gustave), at end of first paragraph, delete the words 'not yet performed,' as 'Impressions fausses' was given at a Colonne Concert on March 3, 1895, and 'Le Couronnement de la Muse,' at Lille, June 5, 1893.

P. 519, art. CHOPIN, line 2, the correct date of birth is Feb. 22, 1810, as has been proved by the discovery of the certificate of birth. The footnote on the same page, and line 10 of first column of p. 523, are therefore to be deleted.
ADDENDA ET CORRIGENDA FOR VOL I

P. 560, art. COCCIA (CARLO), line 9 from end, for '1814' read '1844.'
P. 564, art. COLLECTIONS OF MUSIC, add 'Kade's Beilagen zu Ambros.'
P. 587, art. CONDUCTING, refer to article BATON IN ENGLAND, p. 206.
P. 596, art. COOKE (NATHANIEL), add date of death at Bosham, April 5, 1827.
P. 598, art. COPERARIO, line 15 from end, for '1614' read '1613,' and three lines lower, for 'same' read 'following.'
P. 640, art. CROSSLEY, last line of first column, for 'Faraville' read 'Tarraville.'
P. 654, art. DALLAM, column 1, line 27, for '1898' read '1893.'
P. 661, DANNREUTHER, add date of death, Feb. 12, 1905.
P. 664, art. DAUBLAINE ET CALLINET, add date of death of Joseph Merklin, on July 10, 1905, at Nancy.
P. 676, footnote, line 2, for 'imprint' read 'imperfect.'
P. 696, art. DIBDIN (CHARLES), the last line of article should be 'in Notes and Queries from July 1901 to June 1904.'
P. 709, art. DO, line 5, for '1660' read '1647.'
P. 711, art. DÖRFFEL, line 4, for 'entered the Leipzig Conservatorium' read 'went to Leipzig.' At end of article, add that he died in Leipzig in Feb. 1905.
P. 713, art. DON PASQUALE, line 4, for 'June 30' read 'June 29.'
P. 719, art. DORN, column 2, line 11, for '2 vols.' read '3 vols.'
P. 734, art. DRYSDALE, column 2, for the last line of article, read 'performed at Dundee in 1898.'
P. 770, art. EHRLICH, add date of death, Dec. 29, 1899.
P. 772, art. EITNER, add that the Quellen-Lexikon was completed in 1904, and that Eitner died at Templin, near Berlin, Jan. 22, 1905.
P. 774, art. ELGAR, in list of works, the number 47 is taken up by an Introduction and Allegro for stringed orchestra and quartet, first performed at the Queen's Hall London Symphony Concert, March 8, 1905.
P. 779, art. EMPEROR CONCERTO, line 4, for 'op. 7' read 'op. 73.'
P. 783, art. ENGRAVING, column 1, line 14, for 'Manwaring' read 'Mainwaring.'
BEETHOVEN AND HIS FORERUNNERS

By DANIEL GREGORY MASON

Author of "From Grieg to Brahms," etc.

Cloth 12mo

This book tells, in untechnical fashion, the story of the development of instrumental music up to its first great culmination in the work of Beethoven. Beginning with a concise summary of the chief periods that can be discriminated in the history of music, it proceeds to examine in more detail the great choral epoch of Palestrina, describing the mystical spirit of which his music was perhaps the profoundest and most adequate artistic expression; then it studies the influence of the modern spirit of idealism on the contents and methods of musical art, and discusses in language intelligible to the layman the principles of design on which pure music (as distinguished from dramatic and programme music) is based; and finally sets forth the contributions made to this art by Haydn, Mozart, and Beethoven. The latter part of the book is frankly personal in treatment; that is, it introduces the reader to the characteristic traits of these three great masters' art through an acquaintance with their characteristics as men. In method "Beethoven and his Forerunners" is thus, like Mr. Mason's earlier book, "From Grieg to Brahms," part historical and psychological, and in part biographical. The chapters are: The Periods of Musical History; Palestrina and the Music of Mysticism; The Modern Spirit; The Principles of Pure Music; Haydn; Mozart; Beethoven; Conclusion.

FROM GRIEG TO BRAHMS

STUDIES OF SOME MODERN COMPOSERS AND THEIR ART

By DANIEL GREGORY MASON

Cloth 12mo $1.50 net

"Mr. Mason's felicity in characterizing the important things as regards composers and compositions seems to me remarkable; he so often expresses what one has felt, but never quite formulated." — ARTHUR FOOTE.

"A valuable addition to our musical literature." — WALTER DAMROSCH.

THE HISTORY OF AMERICAN MUSIC
By LOUIS C. ELSON
Musical Editor of the Boston Advertiser

FULLY ILLUSTRATED WITH TWELVE PHOTOGRAVURE PLATES AND OVER ONE HUNDRED ILLUSTRATIONS IN THE TEXT

Cloth Imperial 8vo $5.00 net

In this "History of American Music," the second of the series, the author has told of the beginnings, the foreign influences, the changes, the methods, the personal endeavors, that have gone to the making of our present music. Many of the events here narrated occurred but yesterday or are happening to-day, and hence have little perspective for the historian. It has not always been possible to say a final word, even if that were desirable. In its stead the widely scattered facts have been brought together and arranged sequentially that they might tell their own story and point their own conclusion.

CONTENTS

II. Early Musical Organizations.
III. Instrumental Music and American Orchestras.
